Byrd emphasizes the Democrats' fight against Reagan's attempts to cut social security benefits. "The President sent us in 1981 a proposal to cut $88 billion over five years, with an immediate impact on people electing early retirement," Byrd said. "We discussed this in our caucus and developed a resolution in unanimous opposition. That proposal was defeated by one vote. But immediately Sen. [Robert] Dole [of Kansas, chairman of the Finance Committee] took the same proposal and changed a word or number to make it meet parliamentary requirements. All the Republicans voted for it. I said, 'Whoopie.' We don't care who gets the credit, we wanted to send a message to the White House and community of senior citizens that the Senate would not stand for it."

Later, Byrd led successful fights to restore the minimum benefit for certain social security recipients and oppose a $40 billion package of unspecified cuts.

Although the Democrats have appeared nearly unanimous in opposing the controversial tax withholding plan for interest and dividends, disagreements have flared behind the scenes. For example, O'Neill and House Ways and Means Committee chairman Dan Rostenkowski, D-Ill., have firmly supported the new law, and a few liberal Senate Democrats have criticized their colleagues for appearing to be too responsive to appeals from the banks and their customers.

"The Democratic support for repeal was partly to embarass Dole and partly to avoid helping Republicans pull their chestnuts out of the fire," said an aide to a Senate Democrat who favors withholding. "My boss and a few others tried to convince the others to switch but without much success."

The recent medicare debate revealed the limits of the Democrats' partisan approach. When the Democrats' medicare task force began considering the issue in early April, chairman Max Baucus of Montana urged opposing any cutbacks. The Democrats had arranged to announce their position following the caucus meeting on April 19, but the press conference was delayed at the last hour.

Meanwhile, Senate Budget Committee Democrats, after having rejected Reagan's proposal for $2 billion in cuts in 1984 and $40 billion during the next five years, approved a plan cutting more than $800 million next year and $21 billion by 1988. Committee Democrats, under the leadership of ranking minority member Lawton Chiles of Florida, had discussed their positions on medicare as well as other issues with Byrd and the Democratic caucus, but they did not seek formal party approval before taking action in the committee.

After the Budget Committee acted, Byrd, Baucus and Sen. Edward M. Kennedy, D-Mass., held a press conference on April 28 to announce their opposition to Reagan's proposed cuts and to call on Senate and House committees to recommend steps to assure the solvency of medicare. Asked about the Budget Committee's action, Baucus responded, "There may be some cuts in medicare, but less than the [amount] approved by the committee. What we're trying to do is dramatize the issue."

Another issue Byrd has worked on with Senate Democrats who have tried to score points against Reagan, despite their internal disputes, was the nomination of Kenneth L. Adelman as administrator of the Arms Control and Disarmament Agency. When Sen. Paul E. Tsongas of Massachusetts announced that he and others might filibuster the nomination, Byrd urged that opponents allow a vote. Tsongas said he dropped the filibuster for other reasons, including some Democrats' opposition to a filibuster and the extensive public attention the fight received. Adelman's nomination was confirmed, 57-42, with all but 8 Democrats voting against him.

"Sen. Byrd briefly told me not to filibuster, but it was friendly advice, not pressure," Tsongas said. "That would be counterproductive in this body." He added that Byrd's aides provided strategic assistance. "He has given us a better sense of working together as a party."

REGAINING CONTROL

Byrd leaves no doubt that regaining a Democratic majority in the Senate is one of his two top goals. The other goal is combating West Virginia's 21 per cent unemployment rate, the highest in the nation.

"The prospects are good that we can succeed in 1984," Byrd said. "Within the Senate universe, winning back the majority is the top priority of every Democrat. In the past two elections, the arithmetic was on the Republican side; now the shoe is on the other foot, with 19 of the 33 seats [at stake] under their control."

Byrd has taken several steps to help win the five seats that the Democrats need to regain the majority. The Senate Democratic Campaign Committee has been merged with the leadership Circle, its major fund-raising arm, and Sen. Lloyd Bentsen of Texas, who ran highly successful financing and voted turnout operations in his 1982 reelection campaign, has been named chairman.

In addition, Byrd holds occasional meetings with Democratic Senators campaigning for reelection in 1984 and frequently attends fund-raising events in their behalf. He said he is also establishing his own political action committee to disburse money to candidates. "That's the rule right now, and I'm playing by that," he said.

With four Senate Democrats campaigning for President, Byrd may be hard pressed to maintain party harmony. Already, presidential candidate Alan Cranston of California, who as Senate Minority Whip has not worked particularly closely with Byrd in any case, has spent even less time than usual on his Senate leadership work.

Byrd plans to keep the heat on Republicans as they become increasingly uneasy about supporting Reagan's policies. "The Republicans will have to keep explaining their votes on the economy, foreign policy and so on," said Liberatore. "We'll try to keep pinning them down. Sen. Byrd is in the middle of this, though he is not always out front." Part of his task includes attracting and financing the most effective challengers to take on GOP incumbents.

If the Democrats recapture control, there is little doubt that Byrd would regain the Majority Leader post he held from 1977-81. Some predict that the Senate Democrats would band together and be more amenable to party cooperation than they were during much of the 1970s, but their diversity and independence may make that difficult.

If the Democrats fail in 1984, they will begin preparing for 1986, when 22 GOP seats will be at stake. On the other hand, a major Democratic setback at the polls could revive unhappiness with Byrd and inspire support for a more outgoing and media-conscious leader. In the past, similar efforts to challenge Byrd have failed.

The growing influence of Senate Democrats may allow Byrd to assume a more visible public profile in the coming months. After an often difficult two years for himself and other Senate Democrats, the West Virginian may be warming to the opportunity.

KENNEDY'S INDUSTRIAL POLICY TASK FORCE LOOKS TO THE LONG TERM

Of the nine party task forces created by Senate Minority Leader Robert C. Byrd , D-W. Va., the one with the potential for the biggest policy contribution and controversy is the industrial policy group chaired by Sen. Edward M. Kennedy, D-Mass. Like similar efforts by Democrats in the House and elsewhere to develop long-term economic policy, it may founder in generalities or become bogged down by sectional or interest-group rivalries. But with the prominent interest that Byrd, Kennedy and their aides say they are giving the project, it could produce an economic blueprint that will fill an important political role for Democrats.

"I tried to establish a task force representing the broad spectrum within our party so a consensus could be reached," said Byrd. "On industrial policy, we are looking to the long term; we know that our smokestack industries are being hurt by trade policies of other countries." But he agrees that economic policy must also address the needs of other industrial sectors.

Aides said the task force is exploring public and private-sector issues affecting such problems as employment, international competitiveness and prospects for both smokestack and high-technology industries. They emphasize that all these interests must be addressed and that they are not incompatible, as some say.

"It's not a choice between the steel industry and fifth-generation computers," said an aide. "If you destroy one, there's no future for the other."

The 13-member task force has held a half-dozen meetings, including sessions with economists Lester C. Thurow and Felix G. Rohatyn and AFL-CIO president Lane Kirkland. Kennedy, who plans to issue the initial recommendations by the end of this month, hopes the report will stimulate a sharp discussion of economic themes for the 1984 campaign.

The House Democratic Caucus issued a comparable report last year under the leadership of Reps. Timothy E. Wirth of Colorado and Richard A. Gephardt of Missouri, but it received a lukewarm reaction from the press and many Democrats. "It may be easier for Senate Democrats to do this because we are not nearly so encumbered by the day-to-day constraints of committee chairmanships, jurisdictional struggles and other legislative activity," said Robert G. Liberatore, staff director of the Senate Democratic Policy Committee.

After Kennedy dropped out of the presidential race in November, he sought the task force assignment as an opportunity to help Democrats offer new ideas on economic policy, an aide said.

The task force is receiving staff assistance from Liberatore and other aides on the policy committee as well as David Smith, Kennedy's aide on the Joint Economic Committee.

JUDGE JAMES L. OAKES

Mr. LEAHY. Mr. President, Vermont's renowned jurist, James L. Oakes, recently received the Learned Hand Medal for excellence in Federal jurisprudence. Judge Oakes is a member of the U.S. Court of Appeals for the Second Circuit. Prior to that, he served as a Federal district judge and as Vermont's attorney general.

I first knew Judge Oakes as attorney general when I served as one of Vermont's 14 State's attorneys. In my experience, no one has served with more distinction as our attorney general.

It comes as no surprise to all Vermonters, therefore, that Judge Oakes is now being honored as he is. Certainly as attorney general, Federal district judge and circuit of appeals judge he has set a standard for which we all should aim, but one which most would find impossible to attain.

An editorial in his hometown newspaper states clearly the feelings of Vermonters, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Brattleboro Reformer, Apr. 14, 1983]

AN HONOR TO A JUDGE

Windham County contains a seemingly endless supply of multi-talented people who have contributed to their community, their nation, and, in many cases, the world. Thus all of us can take pride in the singular achievement of Judge James L. Oakes, who is to receive the Learned Hand medal "for excellence in federal jurisprudence."

Judge Oakes has been a Brattleboro lawyer; a Windham County state senator; the attorney general of Vermont; and, for the last decade, a federal judge. He sits on the U.S. Court of Appeals for the 2nd Circuit. He has participated in many landmark cases, and he has written many opinions which, his colleagues now note in awarding the Learned Hand medal to him, have brightened the federal judiciary.

Judge Hand, who also served on the appeals court, is described in a biography as "a defender of freedom from the onslaughts of extremists of both Left and Right."

Judge Hand never served on the United States Supreme Court.

Judge Oakes, we all hope, will have that opportunity some day. He deserves it, and the nation deserves him.

HAYNES JOHNSON DISCUSSES THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, Haynes Johnson recently discussed the American Gathering of Jewish Holocaust Survivors in a television interview for "Washington Week in Review."

Throughout the interview, Mr. Johnson recounts the overwhelming experience of this extraordinary gathering. He applauds the act of Congress to create a Holocaust Memorial Museum on the Mall. He also commends President Reagan and Vice President BUSH for their magnificent performances throughout the week.

Despite Mr. Johnson's praise for the U.S. efforts to remember the Holocaust, he is quick to point out that there is still another piece of unfinished business "that has been collecting dust in our Senate for 34 years." He is, of course, referring to the Genocide Convention. He notes that this treaty outlawing genocide says, essentially:

That you can't have sanctuary. That the nations of the world would gather to say that if war criminals exist and they tried to hide in your country, they could not—you would back them and allow them to be extradited.

Mr. President, Haynes Johnson certainly does not stand alone in his belief that now is an opportune time for the Reagan administration and the Senate to push for the ratification of the Genocide Treaty. The recent commemoration of the Holocaust demonstrates our desire to prevent such a horrible event from ever occurring again. Let us now confirm this desire by quickly ratifying the Genocide Convention.

Mr. President, I ask unanimous consent that Mr. Johnson's interview be printed in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Washington Week in Review, Apr. 15, 1983]

INTERVIEW WITH HAYNES JOHNSON

PAUL DUKE. For four days this week we all looked back in sorrow at one of the greatest examples of man's inhumanity to man, Haynes.

HAYNES JOHNSON. I guess you have to deal with this one personally as you did about where you've just been. In my case I went over to this gathering of the survivors of the Holocaust, the American Jewish survivors, generations really—those who were in the camps, those who were the children, some grandchildren.

I've seen a lot of emotional meetings. Washington is a great convention center forum for the world.

But I sat in the audience there, Paul, and I just watched the faces as people would go by. You would see a man or a woman walking around holding up a little sign in various languages—either, the name of the concentration camp or the name of their home town—and they would just look into the audience of 14,000 to 15,000 people, looking around. And then, suddenly, someone would stand up and look at that sign and race over and embrace them.

And you had the sense you almost didn't want to look. It was too intimate. It was too personal. They had found a link to their past and it was overwhelming in the experience of this really quite extraordinary gathering, I think, and I use the adjective advisedly.

You brought together for the first time all these people in this country. It is sponsored by the government, that is to say it comes out of a governmental resolution, an act of Congress, to create a Holocaust Memorial Museum. The President spoke to them one night, the Vice-President at the end of the week. They transferred two buildings on the Mall to serve as a permanent national museum to remember the Holocaust.

But what I remember and what the point of it was, was the experience of these people that you would see, and then, they would talk about their own lives.

One child who was taken at one year of age while her parents were sent to Auschwitz and she never knew what happened to them. She didn't even know she had a sister. She was smuggled out and raised by French nuns. And people would talk about these things in a way that it was a very painful and yet cathartic sort of experience for them.

DISCUSSANT. Haynes, isn't it odd that we can never, never seem to come to grips with this kind of issue because I think the one analogy, a current analogy that occurs to me, is the Cambodians.

HAYNES. Yes.

DISCUSSANT. Was it 6 million Jews killed during the Holocaust?

HAYNES. Yes.

DISCUSSANT. The number of Cambodians who have been butchered, in effect, over the last 10 to 15 years, must be close to that.

HAYNES. And still going on as a matter of fact, and then you talk about a . . .

DISCUSSANT. Different kind of holocaust.

HAYNES. Different kind of mass extermination—mass murder—which is what the experience in Germany and Europe was all about, and WWII with the Jews.

It is a legitimate question to say, why was this being singled out as opposed to others, and I think the answer was really put quite well by the President and the Vice-President, and indeed the people who had this gathering.

It wasn't intended just to be for the Jews alone or just that experience. It was the universal experience.

And the Vice-President particularly, Mr. Bush, was eloquent on that point. He said never again must these human rights abuses occur. We have a responsibility to hold to a standard that they cannot occur again and that there's a universal lesson in what happened to them.

DISCUSSANT. Isn't there something we should keep in mind in that regard in the attitude of the Israeli government toward peace talks in the Middle East? Because, in effect, the Israeli government is saying never again, and that's something we should keep in mind (interjection: Absolutely.) as we drive toward negotiations.

DISCUSSANT. Isn't there another piece of unfinished business, Haynes, in the Treaty outlawing genocide that has been collecting dust in our Senate for 34 years?

HAYNES. 34 years, yes.

DISCUSSANT. Why? Why doesn't this move?

HAYNES. This is one of the saddest things, Terry, is that there—growing directly out of the experience of the Holocaust, the extermination of 6 million Jews out of 8½ million in Europe, all gone—was a treaty that came out of the United Nations outlawing genocide. And what is really said, essentially, was that you can't have sanctuary. That the nations of the world gather to say that if war criminals exist and they tried to hide in your country, they couldn't—you would back them and allow them to be extradited.

DISCUSSANT. Such as Klaus Barbi?

HAYNES. Exactly. Right now, that treaty has been endorsed by 85 nations, and in the United States, even though it has had the backing of every president since Harry Truman, it still gathers dust. And one of the tragedies of it is that it got caught up in our domestice politics in the 50's and 60's as a states' rights issue.

There was a fear during our own turmoil in the southern states and so forth that this could be seen as sanctions against abuses here at home. That was one thing.

And you remember the Bricker amendment of the 50's and the idea that internationalism was bad. There's lot of this background.

And the truth is that it is irrelevant now. And one of the things that I think is most poignant about this is that the Reagan administration—with its really, I thought, magnificent performance of the President and the Vice-President this last week—has not pushed for our endorsement of that treaty.

And one of the reasons is that it has become sort of an issue of the far right. They say the same issues: that it's a violation of our liberties, of our Bill of Rights, of freedom of states and so forth. Jesse Helms for instance has pledged, to vow, to filibuster if it ever comes up.

And it remains 34 years later, unfinished business.

DISCUSSANT. Is the treaty itself mainly a symbolic act? Would it really do any kind of concrete good?

HAYNES. It is a symbolic act such as the Holocaust memorial here was. Except it does have specific sanctions. A nation pledges its honor not to allow sanctuary for war criminals and therefore, you can extradite them if indeed they're in your borders. So that is not a bad thing to have happen.

PAUL DUKE. Well perhaps we should close tonight with some words from one of the survivors who spoke here this week, identified as prisoner number 25673 at Auschwitz, Itka Fratman, who said, "The gathering showed that good triumphs over evil; that from despair there is hope; from pain comes knowledge; and we can share that knowledge with the world."

I'm Paul Duke. Good night for all of us here on Washington Week.

WHAT PRACTICAL EFFECT FROM THE CATHOLIC BISHOPS' SUPPORT OF THE FREEZE?

Mr. PROXMIRE. Mr. President, the nuclear freeze poses an agonizing challenge for many Americans. Yesterday a story in the New York Times brought home vividly how painfully difficult the resolution of this great national issue is for some. The Times went to the area of the country where the Electric Boat Co. builds Trident submarines—that is nuclear-powered submarines that carry devastating nuclear weapons. The Times reporter, Douglas McGill, questioned Catholics whose livelihood depends on their jobs building these Trident submarines. He interviewed them in the immediate aftermath of the passage of the Catholic bishops' pastoral letter that called for a halt to the contruction of nuclear weapons.

That letter in part suggested that defense workers might be led to quit their job. What a test for the practical effect of the bishops' plea to stop the arms race. The reaction as reported by McGill was mixed. No one has quit their job although the church has started to establish procedures to help those who decide to do so to find other work.

An engineer at Electric Boat is quoted as saying:

Unfortunately our main enemy is an atheist country. I don't think they care what God's words are. They've got to listen to something that's meaningful to them—our deterrent force.

On the other hand another Catholic church member who worked for the freeze says:

The pastoral letter has removed a stigma from the antinuclear movement. It's no longer possible to say the freeze movement is Communist inspired.

Another church member said:

The church is becoming more vulnerable, and we're becoming more vulnerable. But that's the risk of discipleship.

A Catholic priest in a nearby community said:

Whenever I bring up the topic on a Sunday morning, I get a very few people who are upset. Some people agree wholeheartedly. Many have said to me, "Say I wish you'd said that a lot earlier."

Mr. President, Members of this body are practical men and women. We sometimes tend to believe that the pronouncements of a group of clergymen on a political issue—especially a military issue has little or no practical effect. I think that view is wrong. Power may indeed come out of the barrel of a gun. But on the other end of that gun is a human being with a mind and a heart and a soul. A halt to the nuclear arms race can serve all mankind. Painful, dangerous, risky as the path to peace may be, the Catholic bishops are helping us find the way.

Mr. President, I ask unanimous consent that the article to which I have referred from the May 9, New York Times be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BUILDERS OF NUCLEAR WEAPONS PONDER BISHOPS' PEACE LETTER

PRESTON, CONN., May 8.—The people of St. Catherine's Roman Catholic Church here had something special to discuss after mass today. Many of them build submarines that carry nuclear weapons. And today they talked of those weapons and of the American Roman Catholic bishops' stand against them.

Until recent months, many people here say, the moral questions about working on nuclear weapons systems had not seemed pressing. But for many, and especially those Roman Catholics who build Trident submarines at the Electric Boat shipyard in nearby Groton, that all changed last week, with the overwhelming passage of the bishops' pastoral letter.

The letter called on Catholics and "all men and women of good will" to make peacemaking their most important spiritual and worldly goal.

BISHOP HELPED WITH LETTER

"It took real courage for the bishops to even attempt this letter," said the Rev. Joseph Finnerty, the pastor of St. Catherine's, where about 75 percent of the congregration are Electric Boat or Navy workers and their families. "At the same time, I think if they didn't address that problem, then they really couldn't address, with any amount of credibility, any of the lesser prolems plaguing our society."

To bring the matter even closer to home, Daniel P. Reilly, the Bishop of the Diocese of Norwich, in which the town of Preston falls, was one of the drafters of the letter. A portion of the letter, addressed directly to defense workers, suggested that anyone who studies the letter's teachings might be led to quit his or her job.

"We are the first generation since Genesis with the power to virtually destroy God's creation," the letter said. "We cannot remain silent in the face of such danger."

After the mass at St. Catherine's today, about a dozen parishioners, including Electric Boat and Navy workers, talked in the church meeting hall.

Boyd W. Cohenour, who retired from the Navy after many tours aboard Polaris submarines that carry nuclear missiles, said the issues raised in the letter reminded him of an old fear.

"Every time there was an emergency drill aboard ship, I was scared to death," he said. "I was thinking, 'Is this the real thing? If we have to fire one of those things, what will we go back home to? Total annihilation?' "

The parishioners at the meeting agreed the letter was a positive and important document. But some were skeptical of its effectiveness.

"Unfortunately, our main enemy is an atheist country," said David A. Swercewski, an engineer at Electric Boat. "I don't think they care what God's words are. They've got to listen to something that's meaningful to them—our deterrent force." One parishioner, Virginia Allen helped work for a nuclear freeze referendum in Preston last year. "The pastoral letter has removed a stigma from the antinuclear movement," she said. "It's no longer possible to say the freeze movement is Communist-inspired."

The pastoral letter has caused much argument, but "no terrible outburst" in the parish, Father Finnerty said. Once or twice, Electric Boat workers have asked for counseling about the morality of their jobs, but no one has quit, he said.

The Norwich diocese is preparing for that possibility, however. Bishop Reilly said the diocese will provide financial assistance and counseling to anyone who leaves a defense job as a matter of conscience.

But the letter, he added, did not say anything more than that anyone in defense work should examine their conscience and make their own decision.

"Will it be a mortal sin to work on the Trident?" Bishop Reilly said. "We don't say that. Sin comes in when you act against your conscience. This letter, we hope, will be used by people to help form their consciences."

His personal approach to the nuclear issue has changed a great deal, Bishop Reilly added. "I grew up in a tough neighborhood in Rhode Island," he said. "If someone took a swing at me, being a good Irishman, I would say swing back. But we're not talking about stones or snowballs anymore. The destructive power of nuclear weapons is difficult to conceive."

After services at Our Lady of Lourdes Roman Catholic Church in Gales Ferry, Conn., a few miles south of Preston, another group of parishioners, including defense workers, gathered to discuss the pastoral letter. Some members of the group said the letter marked a new and somewhat frightening stage in their life as Catholics.

"I remember rolling tin foil in World War II," said Janet C. Didier, the wife of a former submarine officer. "The war was good, and just. But some years afterward, everything started to change. I first felt it when my husband took me on a submarine and I felt like I was walking into a bullet. I began to wonder: Is war the Christian way to solve our problems?"

The pastoral letter, Mrs. Didier said, seemed to confirm a lingering feeling she had had since then, that using any form of violence may be immoral. "It's made me a nervous person," she said. "The church is becoming more vulnerable, and we're becoming more vulnerable. But that's the risk of discipleship."

The Rev. Robert Washabaugh, of Our Lady of Lourdes, belongs to the Justice and Peace Commission of the Norwich diocese. The commission has kept the people of the diocese informed about the pastoral letter as it went through several drafts over the past two years.

Last weekend, before the bishops met to discuss and vote on the letter, the commis-

sion asked people in each parish to pray for them. Now that the letter has been passed, the commission will turn its attention to disseminating the document, and holding workshops for clergy and laity on its meaning.

"Whenever I bring up the topic on a Sunday morning, I get a very few people who are upset" Father Washabaugh said. "Some people agree wholeheartedly. Many have said to me, 'Say, I wish you'd said that a lot earlier.' "

TRIBUTE TO WILLIAM KEEL—ADMINISTRATIVE ASSISTANT TO SENATOR JIM SASSER

Mr. SASSER. Mr. President, it is with sadness that I must report today that my administrative assistant, Mr. William Keel, is retiring from Senate service at the end of this month. He will be deeply missed, and his absence will leave a void in my office.

I have grown to rely on his advice and counsel, and I have always found his judgment to be sound and thoughtful. I shall miss our daily association, but I look forward to continuing to call on Mr. Keel for counsel and assistance in his retirement.

As my administrative assistant for the past 5 years, Mr. Keel has worked tirelessly to insure that my office responded quickly and aggressively to meet the needs of Tennessee constituents. The reputation that my office has achieved for hard work, efficiency, and effectiveness is due, to a large extent, to his efforts. He has seen to it that every letter was answered and that all Tennesseans seeking help from their Senator were given priority attention.

Bill, as he is known by thousands of Tennesseans, has worked diligently to assure that Tennessee cities and towns receive a fair share of Federal grants and projects.

Bill is the kind of administrative assistant every Senator wants and desires. He is a man of high loyalty and devotion. He is a man of creativity and imagination. He is a man of honor and integrity.

His service will not be forgotten by those of us who have worked with him. I wish him the best as he leaves Washington to join his family in Tennessee.

After almost a quarter century of public service, I am confident that Bill will remain involved in the political process of our State. I am confident that he will make many substantial contributions to our State in the years ahead.

Bill is also one of the finest writers that I have known. His eloquent prose has found its way into many of my speeches, just as it did for those of candidate Jimmy Carter whom Bill served as a speechwriter in 1976.

In fact, it was as a writer that Bill began his long and illustrious career.

He worked as a reporter for the Knoxville Journal and later reported on governmental and political affairs at the Nashville Tennessean. He also worked as a night city editor at the Tennessean and as an instructor in journalism at the University of Tennessee in Knoxville.

Bill came to Washington in the early 1960's with many other young men and women who wanted to be a part of President Kennedy's New Frontier.

He worked with the Democratic National Committee and later as Special Assistant to the Small Business Administration's Deputy Administrator for Financial Assistance.

The bulk of Bill's career in Washington, however, was devoted to the office of Congressman Joe L. Evins, one of the most respected and admired public officials in Tennessee's history.

Bill served for 11 years as administrative assistant to Congressman Evins.

During that time, he gained knowledge and developed a working relationship with Members of the House which has served him well as a member of my staff over the years.

After Congressman Evins' retirement in 1976, Bill worked as speech coordinator for the campaign of Jimmy Carter for President. He later served as the director of the Carter administration's transition team for the Small Business Administration and as a member of the Commerce Department transition team.

He was appointed Assistant Administrator for Congressional and Legislative Affairs at the Small Business Administration when President Carter took office. At SBA, Bill also served as a member of the Management Board, and he was instrumental in developing the national businesswomen's ownership program. He remained with the SBA until he joined my staff.

Mr. President, Bill's service here in Washington is clearly something for which he can take great pride.

I respect Bill's decision to retire and I want to congratulate him today on his fine career, but this is also a sad occasion for me. Bill Keel has been more than my AA. He has been my friend. It is a great loss that he will no longer be my AA, but I will always value his friendship.

APPROPRIATIONS COMMITTEE HEARINGS ON MX MISSILE BASING MODE

Mr. HATFIELD. Mr. President, today the Appropriations Committee held an additional hearing on Senate Concurrent Resolution 26, pertaining to the MX missile basing mode, to receive testimony from Senator JOHN TOWER, the chairman of the Armed Services Committee, and Senator HENRY JACKSON, the ranking minority member of the Armed Services Committee. The hearing was held at the request of Senator TOWER, so that he and Senator JACKSON might present their views on this important matter.

The Appropriations Committee will hold a markup session on Senate Concurrent Resolution 26 this Thursday, May 12, at 3:30 p.m., in SD-192.

I ask unanimous consent that the opening statements of Senator TOWER and Senator JACKSON be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

OPENING STATEMENT BY SENATOR JOHN TOWER BEFORE THE SENATE APPROPRIATIONS COMMITTEE

Mr. Chairman and Members of the Committee, I appreciate your affording me an opportunity to appear before you today to discuss the subject of the President's proposal for the modernization of our strategic forces, in general, and that involving the land-based element of our nuclear deterrent, in particular.

I am testifying in my capacity as Chairman of the Senate Committee on Armed Services which has been conducting in full Committee and in its Strategic and Theater Nuclear Forces Subcommittee extensive hearings on these matters. While the views I will express are my own, they have been informed by the weight of the testimony made available to us in the course of our open and closed sessions. Hopefully, the following assessment of the material presented to our Committee will be of use to the Members of this panel in your forthcoming action on the resolution of approval provided for in the Fiscal Year 1983 Continuing Resolution.

The distinguished Chairman of this Committee, Senator Hatfield, is to be commended for the forthright and expeditious manner in which he has moved forward with the consideration of this Resolution. I would respectfully disagree with the assertion attributed to him by the press, however, that the issue upon which the membership will be asked to vote is narrowly circumscribed.

It has been suggested that Senators must, in acting on this Resolution of Approval, consider only the MX basing component thereof, in isolation and without reference to other key elements of the package.

In my judgment, no one should be under any illusion that this early vote in Committee is other than a test vote on the acceptance by the Congress of the broad outline of the Scowcroft Commission's recommendations.

The findings and recommendations of the President's Commission on Strategic Forces are, by this time, well known to all Members of this Committee. I will not take your time to repeat them except to highlight several of the points made by the Scowcroft Panel which are especially noteworthy and which, as a result of their subsequent endorsement by President Reagan, now constitute the official views and policies of his Administration.

Let me begin by noting that General Scowcroft and his colleagues have indicated—in my view correctly—that we, as a Nation, stand at a most important crossroad. At long last, a decision is about to be made by the Congress whereby we will finally choose whether or not this Nation will modernize its aging intercontinental ballistic missile force—elements of which have

been in the inventory since the early 1960's—with modern systems of vastly greater reliability and capability. In its report, and in congressional testimony, the Scowcroft Commission has elucidated carefully the implications this decision holds for us, for our allies and for our adversaries. I would like to dwell for a moment on these potential implications—both adverse and positive.

There can be little doubt that our failure to proceed with deployment of the MX missile at this time in the manner recommended by the blue-ribbon Scowcroft Commission and the President, will have severe and untoward consequences. One can only speculate what such consequences might be. It does not seem unreasonable to me, however, that they might include some or all of the following:

The emergence of complete Soviet intransigence at the negotiating table in Geneva, effectively foreclosing realistic possibilities for substantive progress in talks on strategic arms reductions and intermediate-range nuclear forces;

The Soviets may intepret our inability to muster the necessary political resolve to modernize that component of strategic power—the ICBM force—which they consider to be the most important, as a sign of paralysis. The fact that we might forgo such modernization—even when confronted by the enormous investment of resources in such weapons by the Soviets themselves—could lead to a reevaluation by the Soviet leadership on the so-called "correlation of forces," a development which might encourage increased assertiveness and aggression on the part of the USSR.

A refusal on the part of our Western European allies to proceed with deployment of Pershing II and ground-launched cruise missiles on their soil;

Dissipation of public support in the United Kingdom and France for the planned modernization of their independent nuclear deterrent forces.

In short, the weight of expert testimony before the Committee has indicated that significant risks attend a decision not to go forward with production and deployment of the MX missile as recommended by the bipartisian Scowcroft Commission and by the President.

What is more, testimony taken by our Committee from supporters and critics of the Scowcroft Report has indicated, on balance, that the decision to proceed at this time with the package of initiatives recommended by General Scowcroft and his copanelists holds significant promise for a strategic balance characterized by greater stability, smaller numbers of nuclear weapons, and a reduction in the risk of nuclear war.

Specifically, many of our expert witnesses, including the Chairman and members of the Scowcroft Commission, the Secretary of State, the Secretary of Defense, the Joint Chiefs of Staff and the Commander-in-Chief of the Strategic Air Command, stated their common belief that a production goahead on MX was indispensable to the success of our arms control negotiating efforts. Where we have tried previously to afford both the carrot and the stick as incentives to Soviet negotiators we have achieved notable successes. The ABM accord is an oft-cited case in point and the recent Andropov proposal regarding intermediate range nuclear forces suggests that this principle still applies.

Absent credible bargaining leverage, however, we have seen negotiations aimed at achieving such objectives as Mutual, Balanced Force Reductions, bans on chemical and anti-satellite warfare, and verifiable agreements on, among other things, nuclear testing, drag on and on inconclusively. The Soviets are unrivalled masters of diplomatic intransigence when they perceive such behavior to be in their interest.

To realize such important beneficial consequences as those envisioned by many of our witnesses, the recommendations of the President's Commission must be regarded—and acted upon—by the Congress as a package. The present resolution is uniquely suited for this purpose. While the Senate will shortly have before it the Defense Authorization bill, in which the various components of the Scowcroft recommendations will be explicitly addressed, an opportunity is afforded in this symbolic resolution to affirm the broad outlines of the revised ICBM modernization and arms control program submitted by the President.

That being said, it might be useful to this Committee to take with respect to this program in the Fiscal Year 1984 Defense Authorization bill. I believe that we will render explicit in the law the commitment made by the President not only to limited procurement and Minuteman siting of the MX missile, but to an aggressive research and development effort on the small ICBM, as well, My expectation is that our bill will also support the range of developmental activities intended to explore alternatives for enhancing, in the future the survivability of the MX and/or a small ICBM force.

Furthermore, I anticipate that we will strongly encourage the pursuit of a strategic arms reduction agreement whose emphasis will be upon obtaining increased nuclear stability through reductions in warheads and missile payloads rather than cuts in launchers.

At this point, with a sense of the nature of the recommendations likely to be made by the Senate Armed Services Committee and with confidence that an imminent opportunity will be afforded to all Senators to act in the context of the Defense Authorization bill on specific elements of the Scowcroft Commission recommended program, I believe that members of this committee should consider the vote they are about to cast on the pending resolution of approval as a vehicle for weighing the merits of this program as a complete package.

Having said that, permit me to address in closing perhaps the most controversial component of those recommendations. That is, the issue of the survivability of the proposed MX basing mode. I have been among the most vocal adherents to the theory that each element of our strategic forces should—to the maximum degree feasible—be constituted of systems whose retaliatory capability will not be severely degraded by a Soviet first-strike. My views as to the means whereby such survivability could be afforded to the MX missile are a matter of record.

I am prepared at this time, however, to concur in the findings of the Scowcroft Commission, that the real "window of vulnerability" is the present and growing imbalance between U.S. and Soviet prompt, hard-target kill capable forces. I join the President's Commission in concluding that the earliest possible deployment of the MX is needed to regress this important deficiency.

While it is regrettable that, for a variety of political, technical and budgetary reasons the Administration and the Congress have foreclosed options which might have resulted in such an earliest feasible deployment of MX in a survivable basing system, I believe that the Commission's finding is correct that further delay in MX deployment could be perilous to our security and that of our allies. The package of future missile and basing research and development alternatives coupled with the immediate deployment of the MX in Minuteman silos, represents the best option available to us today for the modernization of our land-based strategic forces.

In conclusion, I commend to the Members of this Committee for their favorable consideration the recommendations of the Scowcroft Commission and of President Reagan. I believe the record compiled to date by the Senate Armed Services Committee and its Subcommittee on Strategic and Theater Nuclear Forces supports an affirmative report by this Committee of the pending Resolution of Approval to the full Senate. I urge the distinguished Members of this panel to do so with dispatch.

STATEMENT BY SENATOR HENRY M. JACKSON BEFORE THE SENATE COMMITTEE ON APPROPRIATIONS ON MODERNIZATION OF U.S. LAND-BASED ICBM FORCES

Mr. Chairman, I requested the opportunity to testify before you today to join Senator Tower and others in urging support for the President's proposal for modernization of our land-based ICBM forces. Specifically, I am here to urge you and your colleagues to report favorably the concurrent resolution provided for in P.L. 97-377.

I want to share with you my reasons for supporting the President's proposal and, in particular, to give my assessment of the necessity for deploying the MX in existing silos.

For about a quarter of a century our nuclear deterrence based on a triad of forces has proven effective in inhibiting Soviet adventurism and maintaining the peace. The strongest leg of that triad has been until recently the land-based ICBM force. Now because of efforts by the Soviets to harden their important military assets which we would target, our Minuteman III force is no longer sufficiently effective as a counterforce to a first strike by the Soviets. Modernization of the land-based ICBM force is required to maintain deterrence by restoring our ability to retaliate promptly against such targets as the Soviet national command structure.

In addition, we must restore the credibility of our land-based ICBM force to maintain the survivability of our strategic bomber and sea-based nuclear deterrence forces. The symbiotic relationship between the three legs of the triad in terms of deterrence is well established. The triad forces are mutually reinforcing and severely complicate the problem of Soviet planners. However, if the Soviet leaders become convinced that our land-based ICBM force is not a sufficient deterrent, they will be able to concentrate their efforts on how to attack the sea-based and bomber forces. They might, for instance, adopt a strategy of attacking the bomber force first before most of it can become airborne.

Some find solace in stating that there is essential parity today between the Soviet Union and the United States in strategic systems. However, Soviet deployments of modern strategic systems over the past 10 years have created a very disturbing trend. Furthermore, the current Soviet efforts are relentless in the development of new sys-

tems. For instance, there are reports of new ICBMs undergoing flight tests. Additionally, deployment of an upgraded ABM system around Moscow appears to be nearing completion.

We must not only worry about deterrence of the strategic Soviet force, but also the imposing Soviet conventional forces. While we must maintain strong conventional warfighting capabilities, they alone will not deter the Soviets unless we maintain parity in strategic forces. Not only our resolve to stand up to Soviet aggression is at stake, but the resolve of our allies and other peace-loving nations to stand up to Soviet and Soviet surrogates' aggression is dependent on the perception by all parties of our will and capability.

The message from these facts is clear to me. We must modernize our land-based ICBM force and at the same time we must seek to negotiate with the Soviets a balanced, verifiable reduction in strategic armaments. These are the two cornerstones of the President's proposal.

However, we should not delay the modernization program in the hope that a treaty on nuclear arms reduction will be readily achieved. I believe that the Soviets will seriously negotiate toward such a treaty only with our modernization program going forward. This is testified to by history where the ABM treaty was negotiated only after the Congress approved a limited deployment of an ABM system.

The content of a modernization program for the land-based ICBMs—MX deployment as well as the development and deployment of a new, small, single RV ICBM—has been well described in the Scowcroft Commission report. The deployment of MX missiles in existing silos provides the counterforce capability to attack hard-targets. If there is success in the treaty negotiations, this decision can be reviewed to limit or lower the number of MX missiles. An adjunct to MX deployment in existing silos should be an on-going program to evaluate alternative basing modes such as deep-underground basing. However, given the 10-year history of countless basing proposals, it would be a mistake to delay deployment any longer in hope of finding a better solution. The trade-offs among such factors as cost, environment, land-use, security and survivability will make it difficult to find an ideal basing mode. While full survivability is not possible in existing silos, MX deployment in them will complicate the Soviet planners problem by reinforcing the land-based leg of the triad and thus increasing the survivability of the other two legs of the triad.

There are those who advocate the further upgrading of the Minuteman III force rather than deploying the MX. This proposal would cost about 60 percent of the MX deployment cost with several negative aspects. The MX would still have a better hard-target kill capability due to an improved warhead design with potentially a higher yield. The range of the Minuteman III would be further reduced and the MIRV footprint would be affected. The accuracy might not be as good as the MX since it is an adaptation rather than a fully integrated design. Also, it might not be available until 2 years after the MX deployment.

A program for development of a small ICBM, which could be mobile, for deployment in the 1990's should be vigorously pursued. While there are many technical questions to be answered, it offers the clear possibility of nullifying the accuracy of the Soviet missiles, by increasing the positional uncertainty of the target. This would greatly complicate the Soviet planners task and further strengthen the land-based ICBM force. The small, single warhead ICBM would contribute to nuclear arms reduction by allowing us to eliminate over time the multiple warhead missiles.

I think it important, however, to point out that there will undoubtedly be opposition to the deployment of the so-called Midgetman missile from many of the same groups opposing the MX.

Issues of arms reduction, verification, environmental effects, possible use of non-Federal land on alerts, cost due to its manpower intensive nature, and command and control must all be resolved.

There is a tendency to want to wait for the next generation of technology believing that it will be available on schedule, on cost, and will be more acceptable than the current system. That approach may be acceptable in coal gasification technology or automotive developments, but it is not prudent in planning and maintaining our National defense.

We must meet the growing threat by pressing forward and showing a national will to do what is necessary until such time as treaty negotiations are successfully concluded. A decision not to deploy the MX missile would, in effect, be a unilateral freeze of our land-based deterrent. It would increase the vulnerability of our strategic bomber force and put unacceptable dependence on our sea-based strategic forces.

I encourage you, Mr. Chairman, and other Members of this Committee to study the Scowcroft Commission report. If you do, I believe you will come to share my view that deployment of the MX in existing silos would be an important addition to our strategic deterrent capability.

STATE OF MAINE PETITIONS CONGRESS ON ACID RAIN REDUCTIONS

Mr. MITCHELL. Mr. President, on behalf of the legislature of the State of Maine I submit a joint resolution memorializing this Congress to take immediate action to curtail the pollution which contributes to the acid rain and snow affecting Maine and the entire Northeastern United States and Canada.

The Maine State Legislature and the people of Maine have waited for years for the National Government to take action which is beyond the power of the State itself to take. That action is to require the reduction of emissions into the atmosphere which create acid precipitation which originate beyond the State's borders.

The Maine Legislature notes, in its petition, that the economic costs of acid rain are potentially disastrous: Fully 43 percent of the value of all products produced by Maine derives from the forestry industry. That economic foundation is directly threatened when acidity in the rainfall retards tree growth.

More importantly, the petition serves as a reminder that our Nation and Canada "share a common stewardship of the resources, flora and fauna of one of the richest land masses in the world for the benefit of future generations." I urge my colleagues to remember that fundamental reality as the Senate turns to consideration of the Clean Air Act later this year.

The elected representatives of Maine's people are asking that we, the National Legislature, acknowledge their concerns and act on them. I hope the Senate will heed their request.

I ask unanimous consent that the full text of the resolution be printed in the RECORD at this point.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

JOINT RESOLUTION MEMORIALIZING THE 97TH CONGRESS OF THE UNITED STATES TO TAKE ACTION TO ADDRESS THE PROBLEMS POSED BY ACID PRECIPITATION

We, your Memorialists, the Senate and House of Representatives of the State of Maine in the First Regular Session of the One Hundred and Eleventh Legislature, now assembled, most respectfully present and petition the members of the 97th Congress of the United States of America, as follows:

Whereas, hundreds of lakes in the northeastern United States and eastern Canada are devoid of animal and plant life due to the effects of acidic precipitation, so-called acid rain; and

Whereas, the same acid rain continues to pose a similar threat to the lakes and rivers and animal and plant life of this region; and

Whereas, in Maine the acidity in some of our lakes has increased eightfold in the last 40 years; and

Whereas, acid rain poses an enormous economic burden on those regions it affects producing an estimated cost of $250 million in damages annually to lakes and rivers east of the Mississippi River; and

Whereas, the effects of acid rain are not limited to aquatic resources, but also seriously affect local flora; and

Whereas, 90% of Maine is forested and 30% of all of its manufacturing jobs are in forest related industries which produce more than $2.5 billion worth of products, or 43% of the value of all products produced in this State; and

Whereas, the potential loss to Maine's economy posed by the effects of acid rain is enormous; and

Whereas, in a more general and yet more important regard the United States and Canada share a common stewardship of the resources, flora and fauna of one of the richest land masses in the world for the benefit of future generations which is being continually endangered by the effects of acid rain to the detriment of these future generations and in derogation of our stewardship responsibilities; and

Whereas, the American response to this problem has succeeded only in causing a serious strain on our relationship with our Canadian neighbors; and

Whereas, more responsible and responsive actions on the part of the American Government are required now to eliminate this problem before the damage done is totally irreversible; now, therefore, be it

Resolved: That We, your Memorialists, respectfully urge and request that the 97th United States Congress take prompt action to make significant reductions in sulfur dioxide emissions in the 31-state region east

of or bordering on the Mississippi River; and be it further

Resolved: That a duly authenticated copy of this memorial be immediately submitted by the Secretary of State to the President of the Senate and the Speaker of the House of the Congress of the United States and to each member of Congress from this State.

EMPLOYEE STOCK OWNERSHIP—A NEW APPROACH TO PRODUCTIVITY

Mr. LONG. Mr. President, I am sure that many Members have noticed that employee stock ownership is catching on. The legislation that the Congress has enacted over the past 10 years has been successful in encouraging more than 5,000 companies to share ownership with their employees.

Although we have recently placed increased national emphasis on such hard economic factors as capital investment and research and development, thus far we continue to overlook the soft factors that have such an important impact on productivity—the motivation, commitment, and dedication of working Americans. Employee stock ownership provides a way to link these two factors and to end the costly mismatch between the national goal of improved productivity and our system of incentives and rewards.

Some would have us believe that our sagging productivity is due to an erosion of the work ethic. The evidence, however, is to the contrary. For example, a 1980 Gallup study for the U.S. Chamber of Commerce found that an overwhelming 88 percent of working Americans feel that it is personally important to them to work hard and to do their best on the job.

Other surveys reveal similar findings. In 1977, for example, a survey conducted by the University of Michigan's Survey Research Center found that 75 percent of Americans would prefer to go on working even if they could live comfortably without working for the rest of their lives. Seven years earlier, only 67 percent of those surveyed expressed the same attitude, indicating that Americans' commitment to the value of work is growing.

Other studies indicate that not only are Americans committed to work, they also have a great deal of control over how hard they work and over the quality of the work performed. In 1982, a pilot study for the Public Agenda Foundation explored aspects of the unwritten work contract—the assumptions that each individual makes about what he or she will give to the job and what is expected in return.

Of those surveyed, 78 percent alined themselves with the statement, "I have an inner need to do the very best job I can regardless of pay." Only 7 percent thought of work as simply a business transaction whereby one regulates effort according to the size of the paycheck.

This study also found that a huge majority—82 percent—felt that they had some control over the effort they gave to their job, and an even greater majority—88 percent—responded that they had control over the quality of the work they performed. Too few policymakers realize just how much control working Americans have over whether they will meet only the minimum requirements of the job or whether they will contribute that extra effort that makes the difference between mere adequacy and competitive excellence.

When the Public Agenda study asked whether those surveyed were using this freedom of choice to fulfill their "inner need to do the very best job" they can, only 16 percent said that they were. The rest indicated that they could improve their effectiveness, and many claimed that they could be twice as effective.

Why are not they being more effective? One clue is found in the 1980 Gallup study which asked workers who they thought would benefit from improvements in their productivity. Only 9 percent felt that they, the workers, would. Most assumed that the beneficiaries would be others—consumers or stockholders or management. This finding conforms with the results of a Yankelovich, Skelly, and White study several years ago which found that a majority of college students no longer believe that working hard pays off.

Similar findings stem from a 1981 Harris survey for Sentry Insurance which revealed that 73 percent of working Americans believe that "the motivation to work hard is not as strong today as it was a decade ago," and 78 percent feel that "people take less pride in their work than they did 10 years ago."

Some have argued that such findings are proof that the work ethic is eroding. I disagree. The evidence indicates that the work ethic is strong and growing stronger. I think it signifies something more troubling; it signifies that more and more people are doubting that hard work will bring the personal rewards that they have a right to expect. The problem, I believe, lies in our management systems and in our flawed reward system, both psychological and financial that now dominates the American workplace.

For example, when Gallup's Chamber of Commerce study asked people whether they would work harder and do a better job if they were involved in decisions relating to their work, an overwhelming 84 percent said that they would. Similarly, psychologist Raymond Katzell of New York University reviewed 103 experiments designed to test whether an improved incentive system, including both money and greater control over one's work, would lead to higher individual productivity. It did in 85 of the experiments.

The growing appreciation of the benefits available through participative styles of management is well reflected in a 1982 New York Stock Exchange survey of management's attitude toward participative management. Eighty-two percent of those surveyed in corporations with 500 or more employees considered participative management to be a promising new approach—versus only 3 percent who considered it a fad destined to disappear.

Similarly, a new McKinsey & Co. study commissioned by the American Business Conference, found a strong link between more participative management methods and increased profits and productivity. This study of midsized growth companies—those with $25 million to $1 billion in annual sales—reveals that reliance on such management approaches has become a chief characteristic of highly successful firms.

Within the American work force is a large reservoir of potential for improved performance and increased productivity. Americans appear to be willing to work harder and to work smarter in order to turn out a higher quality service or product. Indeed, their self-esteem demands that they do no less. The problem facing U.S. policymakers is how to tap that productive potential.

In a recently released report on the Nation's long-term productivity problems, the Committee for Economic Development concludes that no single approach to boosting productivity will work for every firm or industry. Consequently, this public policy group suggests that businesses adopt a set of guiding principles to increase productivity growth rates. Each of the guidelines suggests the potential impact of policies and programs supportive of employee stock ownership.

These guidelines include:

First. Making increases in productivity a central goal of long-range business strategy, alongside such key objectives as improved profits, stock-price appreciation and increased market shares.

Second. Establishing a portfolio of policies to achieve productivity gains.

Third. Encouraging entrepreneurship, risk-taking and constructive criticism at every level of the organization.

Fourth. Offering real incentives, both financial and nonfinancial, to workers and managers to cooperate with one another and apply their skills and creativity to such long run objectives as productivity growth.

This report, prepared by the CED's Research and Policy Committee, concludes that, due to their decision-

making role, top management must take the lead in boosting productivity growth. For firms with a unionized labor force, the report concludes that it is essential to make the union an integral part of all productivity programs, which may require a new attitude on the part of both management and union leaders.

Recent evidence indicates that not only is there much that should be done but also there is much that can be done. For example, one study disclosed that from 1957 to 1978 the percentage of workers who saw their job as a source of personal fulfillment decreased from 50 to 25 percent. Similarly, the Survey Research Center at the University of Michigan found in a 1977 survey that 60 percent of the work force would prefer another job, up from 44 percent since 1969. In a 1980 study, 27 percent reported that they would not buy the products they make.

For many, increased productivity is still regarded as a code word for speedups that benefit management and stockholders and threaten jobs security. Yet that need not be the case. In searching for a more productive and a more fulfilling way to get things done, perhaps we should take a lesson from Pope John Paul II who suggested in the 1981 papal encyclical, "On Human Work," that:

> Every effort must be made to ensure that . . . the human person can preserve his awareness of working "for himself".

The evidence indicates that employee stock ownership has the potential for creating a work environment and a reward system that can bring out the best that the American worker has to offer.

The following four studies are representative of the productive potential that employee ownership has only just begun to tap:

In a 1978 report prepared on contract to the Economic Development Administration of the Commerce Department, the University of Michigan's Survey Research Center found in a study of 30 employee ownership companies that such firms were 1.5 times as profitable as comparable firms owned in the more traditional manner. Employee ownership also seemed to be associated with better attitudes toward the job. The impact of this ownership effect increased with the amount of equity employees owned.

From a 1979 survey of 72 ESOP companies, the Employee Stock Ownership Association of America compiled a profile of the average ESOP company. The average company had been in operation for 24 years and had established its ESOP 3 years prior to the survey. In that 3-year period, the ESOP acquired an average of 20.8 percent of the sponsor company's stock. Over that same period, average profits had increased 15 percent, employment grew 25 percent, sales per employee rose 37 percent, and total annual sales jumped 72 percent.

In a 1981 study of 229 companies by Iowa Law School's Journal of Corporation Law, ESOP companies showed an annual average productivity increase of 0.78 percent (1975–78) compared to the national average of a 0.74 percent decline. In other words, the ESOP companies appeared to be 1.5 percent more productive than comparable firms. Indeed, it appears that this ownership effect may have made the difference between positive growth and economic decline.

In a 1967 survey of worker-owned plywood companies in the Pacific Northwest, output per worker was found to be approximately 30 percent higher than in comparable plywood companies.

ROUND-THE-WORLD SAILOR WELCOMED BY NEWPORTERS

Mr. PELL. Mr. President, I would like to share with my colleagues the news of yet another record breaking sail that ended in Newport, R.I., with appropriate fanfare.

Philippe Jeantot, a 31-year-old Frenchman, broke the world record yesterday for the round-the-world singlehanded sailing race when he sailed into Newport waters as the Sun came up and the sea mists parted.

He sailed the 27,000-mile course to victory in 159 days and 2 hours, breaking the previous record of 169 days set by a fellow Frenchman, Alain Colas, back in 1973–74.

Timing, of course, is an essential skill in sailing and this new world champion displaced both precise timing and a flair for the dramatic as he ended his long journey. He waited for the Sun before sailing into the welcoming armada off Newport's shores.

I ask unanimous consent that an article from the Providence (R.I.) Journal of May 10, 1983, title "Round-the-World Sailor Orchestrates Finish" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Providence, R.I., Journal, May 10, 1983]

ROUND-THE-WORLD SAILOR ORCHESTRATES FINISH

(By Douglas R. Riggs)

NEWPORT.—Philippe Jeantot did it his way. He wanted to cross the finish line in style yesterday, and that's exactly what he did.

Early yesterday, with only 50 miles of his 27,000-mile course to go, victory in the BOC Challenge round-the-world singlehanded sailing race and a new world's record so close he could taste the champagne, he slowed down to wait for daylight.

On the three previous legs, he had always arrived in darkness and foul weather, he explained later. He wanted the finish to be different. He even sailed in the wrong direction for a time, waiting for the sun.

Jeantot was coming into Newport 159 days and 2 hours after he and 16 other boats set sail late last summer. He is French, 31 years old, a professional diver. The record he broke was also French—169 days set back in 1973–74 by Alain Colas. Behind Jeantot, nine boats still sailed; six have dropped out.

When daylight came, it did so grudgingly, hidden by a gauze of fog that kept the 20-odd press and spectator boats huddled within a few hundred yards of Brenton Tower, one end of the finish line.

Most of their passengers hadn't slept all night, having gone out on the boats to greet Jeantot at his predicted arrival time of 2 a.m. When the sailor radioed that he would cross the line between 6 and 7 a.m., there was some good-natured grumbling.

As morning advanced, the fog grew thicker, reducing visibility to 100 yards or less. The boats wallowed in five-foot swells, their foghorns honking at each other like irritated geese.

Then, at 7:05 a.m., the predicted windshift finally came, the fog parted and Philippe Jeantot's 56 foot cutter, Credit Agricole, came bounding out of it less than half a mile away, like an actor taking a final curtain call after a bravura performance.

The grumbling gave way to cheers, followed by a frantic jockeying for position as the fleet converged on Jeantot's sleek, black-and-white craft, the skippers maneuvering for favorable photo angles, a chance to wave boom mikes close enough to pick up the sailor's words, or just to gawk and pay homage at close range.

He crossed the finish line six minutes later, waving and grinning and looking completely fit and relaxed, as if coming back from a Sunday sail around Block Island. The whole armada careened and plunged full tilt toward Naragansett Bay, like a school of gigantic dolphins in a feeding frenzy, led by a Coast Guard cutter spouting water high into the air from a fire hose.

Philippe's mother, Genevieve Jeantot, was aboard the Viking King. She tried to call him on the radio: "Allo, Philippel Allo, Phillippel Ca va?" ("How's it going?") There was no immediate response, but the answer was obvious: It was going well.

"My son, he is good skeep-pere, no?" she asked a reporter. Then she waved and snapped pictures of Philippe as he unfurled the French Tricolor and attached it to an after stay.

Lee Mortensen, a banker from Milwaukee, was elated. He had been attending a bankers' convention in Newport that ended Wednesday. He suggested to his wife that they stay around for the finish of the race. "She said, 'Oh, you're crazy.' So I put her on the plane."

He hung around the press headquarters until yesterday, got aboard the Viking King and there he was. "I wouldn't have missed it for the world," he said. "It is hard to conceive that a man could do that all by himself. It's just awesome."

No less so was Jeantot's endurance in the face of all the media attention yesterday. After the usual dockside champagne (French, of course) and informal press conference, Jeantot again entertained reporters' questions at the Sheraton Islander hotel. Later he left for Boston for more interviews and a television appearance. Then back to Rhode Island and a flight to New York City for an appearance on Ted Koppel's "Nightline" at an hour when many landlubbers had called it quits for the day.

As of late last night there are nine more round-the-world sailors out there. The next one expected to finish was Bertie Reed of South Africa, who yesterday afternoon was about 100 miles from Newport. He was expected to land early today, possibly as early as 2 a.m.

Mr. LEAHY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

The PRESIDING OFFICER. The clerk will state the unfinished business.

The assistant legislative clerk read as follows:

A Senate concurrent resolution (S. Con. Res. 27) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

The Senate resumed consideration of the concurrent resolution.

The PRESIDING OFFICER. The pending question is on the amendment numbered 1247.

Mr. DOMENICI. Mr. President, the question is on the pending amendment by Mr. Pryor, amendment No. 1247, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. How much time is left on the amendment?

The PRESIDING OFFICER. The Senator from Arkansas has 41 minutes remaining, the Senator from New Mexico 38.

Mr. DOMENICI. I suggest the absence of a quorum and ask that the time be charged to the Senator from New Mexico.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1247

(Purpose: To reduce funds for security assistance programs)

Mr. DOMENICI. Mr. President, I understand now that we are debating the Pryor amendment No. 1247. I understand Senator PRYOR would like to discuss his amendment a little further. I yield the floor at this time.

Mr. PRYOR. Mr. President, I thank the distinguished chairman of the Budget Committee, my friend from New Mexico. I once again will outline very briefly the intent of this particular amendment and in a very few moments, Mr. President, I will try to conclude my statement. Then I would certainly be happy to engage in a colloquy with the distinguished chairman of the Budget Committee or any of my colleagues.

This afternoon, we will vote on an amendment which I offered yesterday. Mr. President, this amendment reduces the international affairs function by $880 million in each of the next 3 years with a reduction of outlays of $180 million this year, $590 million and $760 million in fiscal years 1985 and 1986.

My purpose in offering this amendment is so that we can begin an adequate debate, an adequate study, a scrutiny of a program that is absolutely out of control.

In his first year in office, for example, President Reagan and our Government sold an alltime high of $21.5 billion in U.S. arms around the world.

We have become the world's arms merchant. That total more than doubles the total of the previous year. We provide 45 percent of all arms to the Third World.

Last year, the ratio of our military to developmental assistance was 57 percent to 43 percent.

My amendment is simple. It is meant to target such authority assistance programs as the military assistance program, which provides grants to allow foreign governments to buy U.S. equipment; foreign military sales credits, forgiven loans and loan guarantees for the same purpose; international military education and training; and the economic support fund, grants, and loans to our allies to free up their own budgets for military expenditures.

The security assistance programs in the budget resolution total $4.97 billion. My amendment would reduce that total to roughly the same level that we spent in fiscal year 1982. It does not obliterate the program; it does not cut it out.

In addition to this onbudget funding, I wish to emphasize that our security assistance program includes about $4.5 billion in budget loan guarantees which are not affected by the amendment under consideration at this time.

This year, the military assistance program alone has been increased by $457 million, and the request for the economic support fund totals nearly $3 billion, an increase of $288 million from last year.

My amendment does not target any particular country or region. Yesterday, the distinguished chairman of the Foreign Relations Committee, Senator PERCY, raised the issue that if the Foreign Relations Committee and the Appropriations Committee had to go back and relook at our military assistance program abroad, certain countries would be cut out of the program or diminished to a large degree. My amendment simply leaves it up to the Foreign Relations Committee and the Appropriations Committee to decide where our security interests really lie and what direct or indirect aid we should give those areas.

Mr. President, I hope that with this amendment we can reduce the enormous escalation of our military assistance abroad to a more reasonable level and that we can show, as a nation and as a Congress, a greater selectivity in where we send our money and our weapons.

Mr. President, that is the end of my statement. I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, a parliamentary inquiry. How much time remains on the Pryor amendment, No. 1247?

The PRESIDING OFFICER. The Senator from New Mexico has 23 minutes. The Senator from Arkansas has 36 minutes.

Mr. DOMENICI. I have nothing further to say on the subject.

I ask the Senator from Arkansas if he would have an objection at this point to our temporarily setting aside the Pryor amendment and proceeding with a Melcher amendment. We have no objection to proceeding with it.

This would not be an agreement as to when to vote on the Pryor amendment, but it would simply set aside that amendment so that the Melcher amendment could be debated between now and noon. The Senator from Arkansas would retain his time.

Mr. PRYOR. I ask this of the distinguished chairman of the Budget Committee, who has been generous in working with us on this particular amendment and another amendment I have pending: I assume that I would not lose or sacrifice any of my time under this arrangement.

Mr. DOMENICI. Until 12 o'clock, if we get off the Melcher amendment, the Senator from Arkansas has his time. Otherwise, he would have 5 minutes preceding the vote on each of his amendments, as provided in the unanimous-consent agreement. I do not want to deny the Senator time at this point. If he wishes to speak further on this subject, we can do that.

Mr. PRYOR. I wonder whether this might be a workable solution: For the purpose of answering any questions about the amendment or perhaps even a closing statement, if we might take more than the 5 minutes allocated; if we might arrange for 15 minutes to be granted to me for the purpose of clari-

fying points, answering questions, or a statement, before the noon hour.

Mr. DOMENICI. That would not change our 5 minutes preceding; but, rather, the Senator from Arkansas would like at least 15 minutes before 12 o'clock to return to his amendment, for further debate on his side. I would have no objection to that.

Mr. PRYOR. With that understanding, I have no objection to the Senator's request.

One further question: I have another amendment, relating to a nuclear rollback to the 1982 level in the production of nuclear warheads. I am wondering if the Senator from New Mexico is taking into consideration the need for some time for me to explain that amendment a little further.

Mr. DOMENICI. I did not have that in mind, before noon. Obviously, this afternoon we will return to the unanimous-consent agreement and we will have some votes, with 5 minutes intervening. I am certain that sometime this afternoon the Senator could call up his amendment. But I cannot agree to that at this point.

Mr. PRYOR. I do not want to keep the distinguished Senator from Montana from moving forward with his amendment, I wonder if—with the understanding of the Senator from Montana—we might allocate 10 minutes before noon for me to explain the amendment further, the rollback in the production of nuclear weapons.

Mr. DOMENICI. The Senator from Arkansas wants 10 minutes before noon to discuss both his pending amendments or just one?

Mr. PRYOR. I would like to reserve about 15 minutes on the arms sales amendment. I would be willing now to strike a compromise. If I could have 10 minutes on the arms sales amendment and 10 minutes available to me before noon on the nuclear arms reduction, that would be more than satisfactory to the Senator from Arkansas.

Mr. DOMENICI. I certainly have no objection to that. Let us see if we can phrase that appropriately. The Parliamentarian can help me.

Mr. President, I ask unanimous consent that the pending Pryor amendment be temporarily set aside so that we can permit the distinguished Senator from Montana (Mr. MELCHER) to offer an amendment. Further, that if we have not disposed of the Melcher amendment by 20 minutes to 12, we will set aside the Melcher amendment and return to the pending Pryor amendment, at which time Senator PRYOR would use 10 minutes on each of his two pending amendments, prior to 12 o'clock.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. PRYOR. I thank the distinguished Senator from New Mexico. He has been very accommodating.

Mr. DOMENICI. The Senator is most welcome.

AMENDMENT NO. 1252

(Purpose: Transfer $100 million in budget outlays from foreign aid to soil conservation in 1984)

Mr. MELCHER. Mr. President, I have an amendment, which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. KASTEN). The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an amendment numbered 1252.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered

The amendment is as follows:

On page 10, line 9, strike $12,000,000,000 and insert in lieu thereof $12,200,000,000.

On page 10, line 10, strike $12,500,000,000 and insert in lieu thereof $12,600,000,000.

On page 7, line 6, strike $18,200,000,000 and insert in lieu thereof $18,000,000,000.

On page 7, line 7, strike $12,700,000,000 and insert in lieu thereof $12,600,000,000.

Mr. MELCHER. Mr. President, I asked unanimous consent that the reading of the amendment be dispensed with because it is very simple to explain what we are trying to accomplish with the amendment. It is a very positive amendment. It is very easy to understand.

I propose in the amendment to recognize the urgent need that should have our highest priority. That urgent need of the most highest priority in this country is the need for further work for soil conservation here in the United States.

The amendment recognizes, first of all, that soil conservation work has been set aside; Federal participation in soil conservation work has been decreased over the past number of years.

What the amendment does is to add $100 million to the budget for soil conservation work.

The amendment also recognizes two other factors.

One of them is that the Federal deficit is so large that the anticipated shortfall in revenues for this coming fiscal year is of such huge dimensions, likely to be close to $200 billion or perhaps even exceed $200 billion, that it is very difficult for any one of us as Senators to recommend to the body that we increase that deficit by add-ons in the budget for appropriations no matter how desperately we need them.

The second factor that is taken into consideration along this line is the fact that in foreign aid we are looking at a program that has doubled in actual appropriations out of the Treasury since 1979.

So the amendment would transfer $100 million from function 150, that is the foreign aid program, to the function covering soil conservation work. I do this for a number of reasons.

First of all, the soil conservation programs have either been held at a standstill or have been actually decreased in Federal participation for the past dozen years—12 years of lack of attention to our greatest resource, our soil, land, and water base here in the United States.

So the need is here. There is very desperate need for soil conservation work; and, as I have just said, in the foreign aid appropriation for the past several years we have had a rather dramatic increase in spending for those.

Those programs, designed to assist countries abroad, are programs that in my judgment have been increased too rapidly.

The budget for 1984, like the current expenditures that are going on now in this fiscal year, is in excess of $12 billion—I repeat $12 billion—for foreign aid.

Those increases can be reduced. Part of the foreign aid package, of course, is the availability of food supplies from the United States. Public Law 480, for instance, that is Food for Peace, is part of the foreign aid package.

When Food for Peace is used in an honest way and food actually gets to the people of a country, it is a very worthwhile program.

There are instances when there has been fraud, deception, and illegal activities connected with Food for Peace in terms of actual distribution of the food from the governments that receive it in the foreign countries and from time to time we found occasion when they have abused the intent of Food for Peace and have actually sold the food within a country rather than distributing it without charge to meet the nutritional needs of low-income, poor, hungry people of those countries.

When that happens, of course, Food for Peace is not too effective. But when properly and honestly handled and the sacks, bags, and boxes of American food products which carry with it a label that says both in English and in the language of the particular foreign country that the food contained therein is a gift from the people of the United States to the people of that particular country, and it is actually distributed to those people who are in need of food, that is a most successful program.

That capability of having food available for distribution under Public Law 480 depends upon the capability of the United States to produce the food and produce it in quantities that allow us

to be generous to our foreign neighbors.

That, of course, points out that our capability depends upon the soil that we have, this great land base of the United States, to produce these commodities.

That brings us back to the need for soil conservation. Whether we are talking about the need for soil conservation for ourselves or for our neighbors abroad who need American food, we are talking for a common purpose and for a common goal, and that is retaining the capability of our production here, and retaining that capability depends upon the basic soil conservation work that we do here in the United States.

Agronomist Henry Ahlgren in the 1948 "Yearbook of Agriculture":

> The soil comes first. It is the basis, the foundation of farming. Without it, nothing. With good soil, good farming and living.

And those words by Henry Ahlgren were true then, were true before then, were true since then, and are true throughout all the future that we have here in this vast and bountiful country of ours. Not only do soil and water resources undergird our remarkable agricultural industry but agriculture is the foundation of our total economy. There absolutely can be no higher priority than protecting and conserving the very basis of all of our wealth here in the United States and that is our land base and our water base.

The current services level for basic Department of Agriculture conservation programs under the budget level represent a significant increase over the budget figures offered in the administration's budget. The administration's budget was woefully lacking in concern about soil conservation. Indeed, if the Soil Conservation Service within the Department of Agriculture thought Congress would agree to those figures, we would have the most despondent group of career employees in any part of the Federal Government. But the Soil Conservation people within the Department of Agriculture are hopeful that the budget figure that is allowed in the appropriations that follow as acts of Congress will be adequate to at least maintain the level for last year.

But remember, last year was a retreat from the work that is necessary for our soil in this decade. That retreat, I repeat, has been for over a dozen years, and the work we are contemplating doing within this budget falls far short of what we would have been satisfied with in the forties, fifties, or sixties. That is very much of a tragedy for the United States to find that we are desperately watching conservation work for land and water slacken off and slacken off over a period of time that is truly harmful to this great resource that we have.

But even the figures that we are discussing here in this budget, while higher than administration recommendation, still fall short of what is needed and must be had. In fact, with this payment-in-kind program that is now implemented by the Department of Agriculture, the need for soil conservation becomes even greater because a payment-in-kind program—or for short the PIK program—results in the idling of additional millions of acres of cropland here in the United States. So it is even more important, in view of the PIK, in view of that program, that we have an adequate budget provision for conservation purposes.

Let me stress this importance. A payment-in-kind program, or PIK, is the most massive land idling program, setting aside more acres, more millions of acres, for growing nothing than any other program that we have had by the Department of Agriculture. It is the biggest program we have had in cost. It appears the first 12 months of the PIK program will cost the Federal Treasury $12 billion. The payment-in-kind program, those payments to farmers for agreeing to set aside land and not grow anything on that idled land, are not on budget, they are off budget. But from all the available information that I have looked at, it will likely cost the Federal Treasury $12 billion for the first 12 months of the PIK program when it becomes necessary during 1984—calendar year 1984—and calendar year 1985 to make the funds within the Commodity Credit Corporation come out to the proper level. Although the payments for PIK are off budget, are payments made by the Commodity Credit Corporation to individual farmers, those funds toward the tail end of 1984 or during 1985 will have to be replenished and at that time it will require a like amount to be appropriated—a like amount which has been expended from the Commodity Credit Corporation for PIK—to reimburse the Commodity Credit Corporation out of the Federal Treasury, and I repeat, as far as I can tell, it looks like it will be about $12 billion for the first year of PIK.

Why would it be important, with idling these millions of acres of cropland under PIK, why would it be more important than ever to have soil conservation work done? The reason is this: Without a crop cover that, for the first year of this program, is not likely to happen for those idled acres, erosion is more likely and with erosion you lose topsoil, and when we lose topsoil we lose the very essence of the capability of our land to produce crops.

So we are faced not only with a dozen years of lack of advancement with soil conservation work but we are also faced with this particular year and each succeeding year that PIK is in place idling millions upon millions of acres of cropland. It is more urgent that we have soil conservation work ongoing at a much greater rate, and for that reason I urge the Senate to accept this amendment to add the $100 million for soil conservation work and to substitute or reduce $100 million in the foreign aid program to accomplish that without increasing the overall expenditures contemplated in this particular budget.

The current services for conservation activities in particular should see increased funding in the following parts of the soil conservation work assisted by the Federal Government. I would suggest that the amount for watershed and flood prevention operations that will be appropriated this year be increased up to $200 million from the level which has been proposed so far by the Committee on Agriculture and allowed for in this budget. For the Great Plains conservation program, it should be increased up to $50 million. These are areas where the work is badly needed.

The Great Plains program has been a highly successful program that was enacted to attempt to avoid any repetition of the drastic situation we had in the thirties where with dry weather the winds blowing across the prairies of the Great Plains caused untold losses of tons—millions of tons—of topsoil from wind erosion. We do not want that repeated. The Great Plains conservation program is designed to work against any repetition of that situation.

There is a program called the resource conservation and development program, and it too should be funded and funds appropriated to the level of $50 million.

For the agricultural conservation program, it should be at a level of $220 million. I would remind the Senate that even if we are at that level we are going to buy less conservation than what we bought in the 1960's and in the first 2 years of the decade of the 1970's, when we appropriated approximately $160 million to $170 million. The toll of inflation since that time means that $220 million will not quite buy the same amount of conservation work.

For the part of the program that has to do with the forestry incentives, I would suggest that we should have that appropriated at a level of $13.5 million for the coming fiscal year and for the water bank program at a level of $10 million.

Now, all of these levels of expenditures would aggregate an increase in the budget of a total of $100 million over what is carried in the budget and what is contemplated on being the expenditures to actually be appropriated for the coming fiscal year.

Let me give you a very brief description of some of these programs.

The watershed and flood prevention program is important not only in terms of what it does but also in terms of impact on local economies. Many local sponsors have already made commitments under this program and construction contracts can provide employment for thousands of people in the private sector. That is just what the doctor has ordered for the economy that we have not. We need the soil conservation done, we need people employed, we need jobs available, and these jobs are scattered throughout all of rural America. This program, as I said, should be funded at $200 million with an appropriate number of new starts. Now, these starts are waiting in line. People have been lining up and they are ready to go. The only thing that holds them back is the Department's availability of funds.

I have already spoken about the need for the Great Plains conservation program, but I would like to say something about the resource conservation and development program. This is a program that, from time to time, the various administration have attempted to eliminate over the past 10 years, but it has always had very strong support not just in Congress but across the country.

This program has been kept going despite the fact that various administrations have attempted to eliminate it. It has been kept going very simply because it is successful. This program is truly a program that builds the grassroots of America. It has proved itself a vital catalyst for rural development activities. I am told that, in fiscal year 1981, over $57 million from other funds was attracted to the scant amount that was appropriated out of the Treasury for the RC&D program. In other words, it has been about a ratio of 10 to 1. The resource conservation and development program in rural areas with seed money from the Federal Government has attracted $10 for every $1 that was invested on the Federal side. That means real, honest to goodness rural development activities.

The agriculture conservation program is a very fine example of where the Federal Government puts out some money and they get a bigger bang for its buck because of the cost-sharing requirement.

Mr. President, the cost-sharing requirements work something like this. In a local county, the Federal Government makes available a contract to a landowner to do some basic soil conservation work or water protection work. Those programs are defined by the Department of Agriculture, the county committee in each county identifies which ones fit their particular area best and allow those programs to be available to landowners who are willing to invest up to about one-half, sometimes a little more than half, of the expenditure required to accomplish the work.

This program has been the very backbone of farmer- and rancher-directed conservation efforts and should be expanded not reduced. This program has been the very mainstay of soil conservation work throughout the United States on farms and ranches. It has been highly successful. It has been very much a tragedy that its work has not been allowed to increase and develop even more than it has over these past dozen years where it has been held in check and in effect reduced.

Mr. President, all this adds up to a sound program to help assure us that our valuable land and water base will not be lost, that we will not be losing topsoil from wind or water erosion, that we will not be allowing land to debilitate to less productive capacity, but that we will be protecting it for the present and in the future.

All the world recognizes the vast abundance and the vast capability of agricultural production in the United States. We not only lead the world in total productivity of agricultural goods, we do it very easily. We produce it very easily and we produce it cost effectively.

This marvel of the world in agricultural proficiency is something we should protect for this country for the future. It is always cheaper to preserve now rather than to try to rebuild later. And that is very much the case with soil and land and water.

This money is needed very urgently. It is needed very much for fiscal 1984 so that we can set a pattern in 1984 for a return during the next 10 years after that to a very sound, worthwhile, good program for soil conservation.

The amendment recognizes that, to do better in meeting our needs here in the United States for soil conservation, it is absolutely essential to do it now.

The fact that the money is transferred out of foreign aid is not a direct loss to our foreign friends in countries around the world that use American food. It is insurance that that food will be available also in the future. So it is very much justified that the transfer be made out of function 150 in foreign aid programs and put where we need it most, not just for the sake of agricultural producers in this country but for the sake of all of us that are consumers here in the United States and all those throughout the world who are consumers of U.S. foods.

Mr. President, I hope the Senate can accept this amendment. I very much recommend it and I urge its adoption.

I now yield the floor.

Mr. DOMENICI. Mr. President, first let me say to my good friend from Montana—and while I am sure I need not say this, I feel like I should—I have the greatest respect for the distinguished Senator. In terms of what he attempts to accomplish in terms of increased funding for Soil Conservation Service programs. I, too, have been, from time to time, concerned about the adequacy of funding for these programs. With reference to his abiding concern, I commend him. But I do not think the Senate ought to support his amendment.

Let me see if I could just quickly tell the Senate why. I do not intend to use a lot of time.

This program comes within function 300: Natural resources and environment. It is a large function, containing many programs. The Budget Committee, in its domestic discretionary spending considerations, which are crosswalked to the Appropriations Committee, has already increased function 300 by $500 million in budget authority above the 1983 appropriated level—prior to enactment of the Emergency Jobs Act.

Funding is included for the Soil Conservation Service as part of those assumptions, none of which are binding, obviously. The appropriators decide how to allocate their crosswalk allocation.

The budget resolution provides funding for soil conservation programs at the 1983 levels plus an adjustment for inflation, somewhere around 3 to 5 percent.

In addition, the distinguished Senator from Montana has spoken about the President's fiscal year 1984 budget proposal to reduce agricultural conservation programs by 21 percent below 1983. I repeat that the Senate Budget Committee did not do that. We did what I have just described. We added a half a billion dollars in budget authority to the function. Our assumption is that soil conservation would be at what we call the baseline, which means the 1983 level plus inflation.

Obviously, in almost any function of Government, we are confronted with a situation where those who feel strongly about a program think that whatever we would do in the budget resolution is not enough. In the last 8 or 9 days, we have had, whether it was education or whatever, those who feel strongly about what is called appropriate prioritizing in our Government's functions. We can always find some justification, and I say that in the best sense of the word, for additional money. But, frankly, we have been very generous in terms of function 300, natural resources and environment.

I think as attractive as the Senator's amendment is, the Senate should not adopt it.

I would also tell the Senate that the Budget Committee, as it has in all the other functions, has included the increase that comes out of the emergency jobs program. In this case, the Soil Conservation Service received an addi-

tional $5 million in budget authority for 1983. That is continued and carried over in fiscal year 1984 and beyond in terms of outlay levels in this resolution. This is consistent with what we have done on all of the jobs bill increases that the Senate passed and is now law.

So, while I share the concerns of the Senator from Montana, I hope the Senate understands that the Senate Budget Committee, while it is not made up of Senators who might be from areas that have as basic a concern about the Soil Conservation Service as the Senator from Montana, or even the Senator from New Mexico, that this function has been treated rather fairly in terms of a general approach by the Budget Committee. This was a year to be reasonable, not to dramatically cut any programs, but not to let any programs grow dramatically unless we found that they were absolutely and unequivocally very high priority items, or unless we found that there had been some dramatic change in the situation in the country that would justify it, as we did in some of the jobs programs.

Mr. President, it is with reluctance that I must oppose the amendment. It is not based upon my own priorities. I might well prefer a lot more money in this function. But I think the broad cross section of Senators on the Budget Committee did a pretty good job when it came to this function, even though many of them are not from the areas that are directly affected by soil conservation programs.

Having said that, I hope that we will vote on this amendment this afternoon, and perhaps in short order we will be able to do something by way of unanimous consent to assure the Senator and the Senate of an orderly and timely vote on the Melcher amendment, or any matter related thereto.

We have about 5 minutes remaining before Senator PRYOR regains the floor and has 20 minutes allotted to him to discuss or answer questions about his two amendments. I do not intend to use the time. I wonder if my good friend from Montana needs additional time. If he does, I will yield the floor. If not, I will use the time in a quorum call.

Mr. MELCHER. I thank the chairman. I do have a few more comments on the amendment.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the budget resolution that we have before us for adoption has as its main purpose the beginning of the setting of priorities for the next fiscal year in matters of revenue and appropriations. So the budget resolution is a framework of funds that are going to be available for fiscal 1984, funds that will be gained by revenue and funds that will be appropriated from the Treasury for expenditure, and also sets the limit of the anticipated deficit, which is sadly the case this year, and which is sadly the case for the next fiscal year of 1984.

But what we are engaged in in this debate on the budget resolution is establishing where we think the highest priorities are for expenditure of the funds that are available. I repeat, there is no higher priority in the budget than for the work necessary for soil conservation.

Mr. President, I think it is worth debating whether or not the level that had been appropriated last year, for this current fiscal year, and which would be anticipated to be appropriated in the next fiscal year for foreign aid is excessive. In my judgment, it is excessive in terms of what is needed for our other needs.

I believe that if the budget resolution is to be a meaningful document we should face up to some of these priorities and begin to make the preliminary decisions. That is why I ask the Senate in this instance to make a preliminary decision in this budget resolution that we need for money for soil conservation work here in the United States, and that we should appropriate less for foreign aid programs.

I do so not without concern for helping people abroad. I do so because it is necessary if we are going to continue this charity through the foreign aid programs to help our neighbors abroad we have to first of all have the capability of doing it. I am not exaggerating the seriousness of more soil conservation work here in the United States. I cannot exaggerate that. We cannot emphasize it enough. We have fallen behind. We have graver needs now than we had a dozen years ago and it is time that we set the stage for a recovery in the soil conservation work.

I ask the Senate for a positive decision on this amendment. It is more important to have the needed funds for soil conservation work here in the United States, or is it more important to have $100 million for foreign aid programs?

I ask the Senate to consider our priorities. I ask the Senate to make that decision in its treatment of this amendment. I urge the Senate to consider it very seriously and to support the amendment.

Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 1246

(Purpose: To cut funds for nuclear warhead production)

The PRESIDING OFFICER. Under the previous agreement, the Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, I have only a few moments this morning to discuss finally the amendment. I understand the Senator from New Mexico wishes to make a request?

Mr. DOMENICI. Will the Senator from Arkansas yield for a unanimous-consent request?

Mr. PRYOR. I shall be glad to yield.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the rollcall in relation to the Melcher amendment No. 1252 occur in sequence following the vote on the Pryor amendment No. 1247.

I further ask unanimous consent that there be 5 minutes of debate prior to the vote to be equally divided in relation to the Melcher amendment.

Mr. BYRD. Mr. President, reserving the right to object, I do not personally intend to object, but I call to the attention of Mr. MELCHER that the request as stated will permit a tabling motion. Even without the request, any Senator could move to table, so that is nothing new. I just wanted to call that to the Senator's attention. I have no objection.

Mr. MELCHER. Will the chairman yield?

Mr. DOMENICI. Yes.

Mr. MELCHER. Mr. President, I have no objection, either, because that could be done by any Senator.

The PRESIDING OFFICER. Without objection, the unanimous-consent request of the Senator from New Mexico is agreed to.

The Senator from Arkansas.

Mr. PRYOR. Mr. President, yesterday, during the consideration of the budget resolution, I introduced an amendment that would roll back the production of nuclear weapons to the fiscal year 1982 level, thus reducing the atomic energy defense activities spending by some $2 billion. The reduction that I am asking for in this amendment comes from the budget of the Department of Energy and not from the Department of Defense.

As we all know in this body, the Atomic Energy Commission, formed roughly in 1945, if my memory serves me correctly, ultimately became the Department of Energy and the Department of Energy is in charge of nuclear warhead production. The cost of the nuclear warhead program in our country has risen from $1.2 billion in 1975 to a proposed $6.7 billion for fiscal year 1984. By fiscal year 1987, it will be in the neighborhood of $8 billion. This represents a growth during this period of time of 638 percent. Holding the cost of nuclear weapon production activities at the level proposed by the amendment I am presenting would represent, I think, a prudent decision by this Congress. It would show an interest in arms control. It would show a concern about potential nuclear accidents. It would

show a sensitivity to the magnitude, I think, of the present budget deficit.

Mr. President, once again, I wish to reiterate, this is not a nuclear freeze proposal, it is a rollback to the fiscal year 1982 funds, which would save approximately $2 billion.

My concern rests simply with the rate of escalation at which we are building these warheads today. I only seek to slow the rate of production and to slow the escalation of this program.

From 1945 to 1948, we went from a nuclear warhead stockpile that consisted of 2 nuclear warheads to 50 nuclear warheads. Our present stockpile now numbers tens of thousands of nuclear warheads and represents over 16,000 megatons of destructive power.

We have seen, Mr. President, an escalation in this program for many, many reasons—of course, the fear of the Soviets and their production of nuclear warheads. I think the issue that we must concern ourselves with is how much is enough? How many warheads do we need? What kind of nuclear activity and warhead production must we pursue in the near future?

I would also like to stress, Mr. President, that my amendment in no way line-items any type or any particular type of nuclear warhead program or nuclear warhead item. This question, if this $2 billion rollback could be achieved, would be left up to the Committee on Armed Services and ultimately to the Appropriations Committee and the Congress.

I think, Mr. President, also, that on this amendment there was an objection raised yesterday that the budget resolution is no place to debate an issue of this sort. I take the contrary position, Mr. President, by saying that this amendment, this attempt to guide our colleagues on the Committee on Armed Services and the Appropriations Committee, has an appropriate place in the budget resolution process. It is one of the three times when we shall have the opportunity of discussing this and other issues like this in the legislative process.

One, of course, is at present with the budget resolution; the second would be during the authorization procedure, and finally, the appropriations procedure. We all know that we have funded the necessary functions of our Government for the last two decades by the process known as continuing resolutions. During that time, when we involve ourselves in the continuing resolution processes, all of us in this body know, Mr. President, that we do not have the time nor the opportunity to discuss these issues of real and significant magnitude. Therefore, I am simply asking that we reduce by $2 billion the budget function under which nuclear warheads are produced and manufactured by the Department of Energy.

Mr. President, on this particular amendment at this time, I have no further remarks. I wish to reserve the remainder of my time and—I do not see either of the managers at this time. I do see the distinguished Senator from Virginia (Mr. WARNER), who is a member of the Committee on Armed Services. He may want to add a few comments.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. On this amendment, the Senator from Arkansas has 2 minutes and 15 seconds remaining.

Mr. PRYOR. I would like to reserve at least 30 seconds. I yield the floor for the moment.

Mr. WARNER. Mr. President, may I inquire of the distinguished chairman of the Committee on the Budget what his time constraints are?

Mr. DOMENICI. We have a unanimous-consent agreement that from now until 12 noon, the time belongs to Senator PRYOR for whatever debate he desires.

Mr. WARNER. Would the Senator provide 3 or 4 minutes to me at this time?

Mr. DOMENICI. I cannot, Mr. President. It all belongs to Senator PRYOR until 12 noon.

Mr. WARNER. I shall be very brief.

Mr. President, I rise in opposition to the proposal by the distinguished Senator from Arkansas. It is my understanding that he is putting before the Senate an amendment by which he will cut $2 billion from the 1984 budget for the defense program handled by the Department of Energy.

Mr. President, I regret that we did not have an opportunity to discuss this heretofore, but I should like to indicate briefly the following points in opposition: First, our inventory of nuclear weapons today, the so-called nuclear stockpile, is substantially less in total numbers than it was in 1970. Despite the rhetoric that we so often hear about building thousands of nuclear warheads and simply adding them to our stockpile, the facts are that for the past 10 years, for every new weapon that we have built, we have dismantled nearly two older weapons that had previously been in the stockpile. Even today, every time we build a new warhead, an old warhead is destroyed.

Second, I am not certain where Senator PRYOR got his figures on the stockpile yield, but I respectfully submit that his figures are inaccurate. According to the information provided to me by the Department of Energy and corroborated by the Department of Defense, the total yield of our stockpile today is only one-third of the yield that existed in the late 1960's. Increases in accuracy and other targeting data have permitted us to refine the newer systems so that we do not need the weapons of large yield that were in our stockpile in the 1960's.

The PRESIDING OFFICER. The time yielded to the Senator from Virginia has expired.

Mr. PRYOR. Mr. President, I would be glad to accommodate the Senator from Virginia, if we can do it in this fashion: I propose yielding 4 minutes on the time I have remaining, which is 10 minutes, on the second amendment I have. I would be glad to yield that time to Senator WARNER, to be taken from my time on the amendment dealing with arms sales.

Mr. DOMENICI. If the Senator will yield 30 seconds, I point out that the unanimous-consent agreement reads that there will be 2½ minutes on each side prior to disposition of the Pryor amendment in which the Senator from Virginia is interested. We would welcome the comments of the Senator from Virginia. We have argued against that amendment, and it is my intention to move to table it, and I will yield the Senator 2½ minutes.

Mr. WARNER. I thank the Senator from New Mexico.

Mr. President, the Senator from Arkansas is mistaken about what programs are in that portion of the Energy Department budget that goes for national defense. Let me briefly summarize:

First, we have the nuclear naval reactor program begun years ago by Admiral Rickover. This program develops the nuclear powerplants that go into our naval vessels. Would the Senator propose that we cut out this program?

Second, there is a program for safeguard and security at our nuclear installations around the country. Perhaps the Senator is suggesting that we should forgo these efforts to protect our facilities against the international terrorist threat?

Third, there is a program involving international intelligence concerning nuclear arms and nuclear proliferation. It is this program that provides the funds for the monitoring of proliferation issues and the participation in ongoing negotiations involving the use of nuclear power with other nations. Does the Senator suggest that we should cancel this effort?

Fourth, there is a program to manage the current inventory of defense nuclear waste. For the first time, thanks to the efforts of this administration, we are on the threshold of solving the long-term issue of how to handle defense nuclear waste. We have a pilot geologic repository under construction in New Mexico; we have a facility under construction in South Carolina to solidify the liquid nuclear waste now stored in expensive underground tanks; we have a coherent program to take care of the nuclear waste issue once and for all. Does the Sena-

tor suggest that we terminate this program in midstream?

Fifth, we have a research and development program that looks at new warhead concepts, but this research and development program also has significant payoffs in other areas of energy research and they support our arms control and nuclear nonproliferation initiatives with the foremost scientific expertise that exists in the United States. Is the Senator suggesting that we ought to close Los Alamos Laboratory?

Sixth, there is a testing program designed in part to prove that the weapons in our nuclear stockpile work. This proof testing of nuclear warheads is an integral component of the nuclear deterrent—the Soviets must know that the weapons in our stockpile will work if necessary. The testing program also contributes to the understanding that nuclear physics that has application in not only the weapons business, but in commercial power, in nuclear medicine, and so forth. Perhaps the Senator would like to see us have a unilateral nuclear test ban; and

Finally, there is the program to produce nuclear warheads and to retire existing warheads. If the Senator's cuts were made in this program, the result would cancel the modernization program.

Mr. President, I ask unanimous consent to have printed in the RECORD the actual request for the DOE authorization budget pending before the Armed Services Committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF ENERGY, FISCAL YEAR 1984 CONGRESSIONAL BUDGET REQUEST, SUMMARY OF ESTIMATES BY APPROPRIATION BY MAJOR ACTIVITY, ATOMIC ENERGY DEFENSE ACTIVITIES

[Budget authority in thousands of dollars]

	Fiscal year—		
	1982 actual	1983 estimate	1984 request
Inertial confinement fusion	209,062	189,750	151,800
Research, development and testing	1,103,280	1,184,800	1,380,080
Production and surveillance	1,596,733	1,900,900	2,337,315
Program direction—weapons	47,258	50,091	55,930
Verification and control technology	52,000	53,900	61,650
Materials production	955,612	1,202,760	1,485,300
Defense waste and byproducts management	373,893	518,729	611,500
Nuclear materials safeguards and security	47,219	47,360	52,000
Naval reactors development	495,920	526,910	613,000
Security investigations	23,600	28,500	29,500
Total, atomic energy defense activities	4,904,577	5,703,700	6,778,075

Mr. PRYOR. Mr. President, I have no further comments on this amendment. What remaining time do I have on the amendment relative to arms sales?

The PRESIDING OFFICER. The time has expired. Nine minutes remain on the second amendment.

Mr. PRYOR. Mr. President, with respect to the second amendment, I did speak at some length yesterday relative to the arms sales we are involved with abroad, the military assistance we are giving all over the world, which amounted to $21.5 billion last year.

My amendment simply would take approximately $880 million from the program in fiscal year 1984. When we talk about outlays that would result from that cut of $880 million, we are not talking about a significant amount of arms that would not be selling. In fact, my amendment is a most modest and most meager amendment. My amendment simply attempts to do something about the escalation rate of arms sales that this Nation finds itself in at this time.

Less than 5 percent of this year's international affairs function total would be affected by this amendment. Eighteen percent of on-budget security assistance would be affected by this amendment; 9½ percent of the total security assistance request for this year would be affected by this amendment.

This amendment has been alluded to by some in opposition to this particular approach as a drastic cut in our weapons sales abroad. Since last year, the military assistance program, the economic support fund, and the credit accounts have been increased by $645 million in this budget resolution. I do not know of another increase that has been so escalated and that has risen to that degree in such a short period of time.

In addition to this allegation or this adverse review, so to speak, of this particular approach in this amendment, it has been stated that several countries will be forced to suffer because of this weapons reduction. If I stress this point for about the fifth time, I apologize, but some of my colleagues may not have heard it: This amendment does not take aid specifically from any one country or military support. It forces the Foreign Relations Committee, as the authorizing committee, and the Appropriations Committee, in its wisdom, to go back and look at these accounts under this function of the budget authority and the budget resolution, to see how we can effectuate some $880 million in sales.

It is my feeling that this is not only a prudent but also a conservative approach to try to slow down an escalating arms race that all of us know has become totally out of control.

My amendment takes our security assistance total back to the fiscal 1982 level. It is my opinion that cutting back a small amount in these funds would not in any way jeopardize their or our national security.

Every day in this body, we make some hard choices about social security, food stamps, health care, education, and other domestic programs. I think it is now time to take a hard look and make some hard decisions on foreign aid, especially military assistance.

Mr. President, I reserve the remainder of my time. I understand that the distinguished ranking minority member of the Budget Committee, Senator CHILES, may have a statement.

Mr. CHILES. I thank the senior Senator from Arkansas.

Mr. President, I should like to make a brief statement and put a letter into the RECORD.

I am concerned more and more about hearing that we may not have a budget resolution. I thought this was conversation that primarily was going to come from the administration, and we did hear that there were people in the administration who felt that we did not need a budget. But now I am beginning to hear that there are people in the Senate who are saying, "If we cannot win with our proposition, we would just as soon not have a budget resolution."

I reiterate the statements I made: I think that would be the worst thing we could possibly have. It would be bad for the institution, but, more than that, it would be very bad for the country; because I think we would see an increase in interest rates and we would see problems in the financial markets if it appeared that we were going to have no resolution.

The letter I want to put in the RECORD is from David Jones of Aubrey G. Lanston & Co. He has testified a number of times on the Hill. He is an economist who specializes in watching the budget and the financial markets. He says:

> We are at a critical Federal budget crossroads, as viewed from a financial market perspective. In the event that significant and credible actions to cut the projected structural deficits are forthcoming, financial market psychology is likely to improve and longer-term Treasury bond rates might fall by as much as 2 percentage points from their current level of just under 10½ percent. However, if no budget action is taken, longer-term interest rates might rise by as much as 2 percentage points from current levels, and the result would be disaster for the U.S. and world economies.

Mr. President, I agree entirely with that statement.

He says that "the latest Baker-Domenici budget proposal would, if enacted, have an extremely unsettling impact on the financial markets."

They might, but even that proposal would be better than no proposal at all. Of course, I hope that proposal will not be the final product.

However, my concern would be if we got into a situation in which we had no budget resolution whatsoever.

As the clock is ticking down and the hours are beginning to run out on the budget resolution, I reiterate our

stand, on this side of the aisle: We are ready. We would like to be able to participate in the process to come forward with a budget resolution that will help the country and that will help assure the financial markets that we are serious about dealing with deficits.

Mr. President, I ask unanimous consent to have printed in the RECORD the full text of the letter from David Jones, dated May 10, 1983.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AUBREY G. LANSTON & CO., INC.,
New York, N.Y., May 10, 1983.

Hon. LAWTON CHILES,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHILES: Please allow me to express my respect and admiration for your excellent leadership as ranking minority member of the Senate Budget Committee. Your much needed Federal deficit-cutting proposals have been a source of encouragement to those of us in the financial markets. More than anything else, it is necessary that the structural deficit be systematically eliminated through a series of credible annual declines—perhaps involving both revenue-enhancing and spending-restraint measures. This would put the deficit on a desirable declining path in fiscal years 1984–88. Only with such a prudent move towards fiscal restraint will the Federal Reserve be given leeway to ease sufficiently to push interest rates lower and keep them there long enough to assure sustained recovery without renewed inflationary expectations.

Most recently, however, I have been greatly alarmed by the lack of a budget consensus, particularly among the Republican majority in the Senate. For example, the latest Baker-Domenici budget proposal would, if enacted, have an extremely unsettling impact on the financial markets. Because of inadequate measures to either increase revenues or cut spending, this plan would result, even assuming moderate recovery, in a rising deficit pattern rather than the desired declining trend. By fiscal 1988 the deficit could end up well above the unacceptable $200 billion level. In that unfortunate event, Federal borrowing requirements would gobble up an unacceptably high 75 percent or more of our net private savings, leaving precious little savings available to finance longer-term business spending on new plant and equipment.

To be sure, the fiscal stimulus resulting from these mounting Federal deficits should serve to initially strengthen consumer spending. Nevertheless, the clash of recovery-induced consumer and business credit demands against excessive Federal borrowing demands is likely to eventually push interest rates higher, thus causing our still fragile recovery to stall or falter. Inevitably, this would bring renewed weakness to a recently improving job market; and it would bring increasing jitters to world financial markets beset by country debt problems that can only be solved by lower interest rates and a solid world recovery.

The problem of run-away fiscal irresponsibility places an unfair burden on our monetary authorities. Most likely, in the face of an out-of-control Federal deficit the Federal Reserve would seek to maintain a degree of monetary discipline (i.e., it will set annual monetary targets consistent with moderate recovery and it will try to hit them). This Fed limit on the supply of money and credit relative to private and excessive Federal government demands, would tend to keep real interest rates high, thus causing the recovery to halt from time to time. However, if the Fed should alternatively try to fully accommodate the combined private and Federal government credit demands, interest rates may initially fall, but the resulting excessive monetary growth would promptly renew inflationary expectations and should eventually push longer-term interest rates higher.

Without major deficit-cutting actions, both the domestic and international financial markets are likely to lose confidence in the Reagan Administration. Just tinkering with the budget won't do, the solution must be radical—involving both revenue-raising and spending-curtailing measures—and we need action fast.

We are at a critical Federal budget crossroads, as viewed from a financial market perspective. In the event that significant and credible actions to cut the projected structural deficits are forthcoming, financial market psychology is likely to improve and longer-term Treasury bond rates might fall by as much as 2 percentage points from their current level of just under 10½%. However, if no budget action is taken, longer-term interest rates might rise by as much as 2 percentage points from current levels, and the result would be disaster for the U.S. and world economies.

I hope these views are helpful.

Sincerely,

DAVID M. JONES,
Senior Vice President.

Mr. PRYOR. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Arkansas has 29 seconds remaining.

Mr. PRYOR. Mr. President, I am not going to take any more time except to propound a question to the Chair.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PRYOR. What is the status now of both of the amendments that I have proposed and is there a scheduled time to make final disposition of these amendments?

The PRESIDING OFFICER. Under the previous order there will be 5 minutes of debate equally divided before each of the rollcall votes.

Mr. PRYOR. It is my understanding that the rollcall votes begin at 2 p.m.; is that correct?

Mr. DOMENICI. Mr. President, the 5-minute debate starts at 2 p.m., not the disposition.

The PRESIDING OFFICER. The Senator is correct.

Mr. PRYOR. I thank the Chair and I thank the chairman of the Budget Committee very much for accommodating me.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will stand in recess until 2 p.m.

The Senate, at 12 noon, recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

AMENDMENT NO. 1242, AS FURTHER MODIFIED

The PRESIDING OFFICER. The Senate will now have 5 minutes of debate, time equally divided on the Nunn-Jackson amendment No. 1242.

Who yields time?

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. As I understand it, each side has 2½ minutes prior to the vote; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. Mr. President, I reserve my time.

The PRESIDING OFFICER. Who yields time?

Mr. JACKSON. Mr. President, the Nunn-Jackson amendment that we have proposed and which is now pending would cut some $66 billion in budget authority and some $36 billion in outlays from the President's requests over the next 3 fiscal years.

The outlay reduction figure is comparable to the Domenici package. The budget authority figure is $7 billion more of a reduction than the Domenici figure.

I must say, Mr. President, that what we have proposed here I think is a sound, middle-ground approach to addressing the problem that we all face in determining what is an overall figure for defense that we should follow as a guide over the next 5 fiscal years. While the budget resolution addresses only 3 fiscal years, the nub of this particular Nunn-Jackson amendment really addresses the problem that we constantly push aside, and that is those outyears.

The problem that we face is that while cuts are being made in terms of current outlays they do not address the larger problem of budget authority—which means that the due bill as we look down the road gets higher and higher and makes the management of our national defense requirements that much more difficult.

I ask my colleagues on behalf of Senator NUNN and myself to address this problem in a sensible way; a way in which we can provide some long-term continuity and planning in our national security area.

Mr. President, I yield to the Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. NUNN. Mr. President, first, with the very limited time, let me say I completely endorse the statement made by my colleague and friend, Senator JACKSON.

Our amendment consciously sets ratios between budget authority reductions and outlay reductions over the resolution period which would pro-

tect the continued emphasis on maintaining the readiness of our forces, permit a sustained but more moderate pace of force modernization and guard against inevitable raids in future years on readiness because investment programs are locked in by prior year budget authority. In other words, we are establishing a better balance between authority and outlays, also going from 5 percent to 6.5 percent for fiscal year 1984, from 5 percent to 5.5 percent in fiscal year 1985, and to 5 percent in fiscal year 1986, compared to the Budget Committee authority that is now pending.

The PRESIDING OFFICER. All time is now under the control of the Senator from New Mexico.

The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, if the distinguished Senator from Georgia wanted some additional time, I would yield him what I have. I am prepared to yield back my time.

Mr. LEVIN. Mr. President, will the Senator yield me 30 seconds?

Mr. DOMENICI. Mr. President, I yield 30 seconds to the Senator from Michigan and yield the remainder of my time to the Senator from Texas.

The PRESIDING OFFICER. The Senator from Michigan is recognized for 30 seconds.

Mr. LEVIN. Mr. President, I only wish to make a matter of record a letter which I received this morning from the Secretary of Defense in which he commented on the 7.5-percent real increase level and he stated:

That probable revised assumptions with respect to inflation and fuel costs, together with the reductions permitted in the MX funding as a result of the Scowcroft Commission report will enable us to come reasonably close to the 7.5-percent real increase level mentioned by the President.

In other words, the 7.5-percent real growth means no cut, no cut whatsoever in the defense budget.

Mr. President, I ask unanimous consent to have printed in the RECORD the letter from Secretary Weinberger to me dated May 9.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., May 9, 1983.

Hon. CARL LEVIN,
U.S. Senate,
Washington, D.C.

DEAR SENATOR: Paul Thayer and I received your May 9 letter this morning. You should be advised that our staff and the staff of the Committee have been working for some time on the matters covered in your letter. We have already indicated to the Committee that probable revised assumptions with respect to inflation and fuel costs, together with the reductions permitted in the MX funding as a result of the Scowcroft Commission report will enable us to come reasonably close to the 7.5 percent real increase level mentioned by the President (assuming, of course, that we start from a proper base). The other requests in our budget are based on validated military needs, and I hope will be approved by the Committee.

Sincerely,

CASPAR W. WEINBERGER.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mr. TOWER. Mr. President, I am going to reluctantly vote for the Nunn-Jackson proposal. I say reluctantly because I do not think that the increase they provide for is enough. I think we should go to 7½ percent.

With the understanding that we will have another opportunity to vote for a 7½-percent real increase, I will go ahead and vote for the Nunn-Jackson proposal in that it is probably the best of the bad lot.

I still think even at 6½ percent we would have to make some rather sharp cuts, for that will not only affect modernization programs but might also affect force structure and operational maintenance accounts as well.

So I hope that all of those who do support this are still prepared to support a higher figure when we get an opportunity to vote on a higher figure.

VOTE ON AMENDMENT NO. 1242, AS FURTHER MODIFIED

The PRESIDING OFFICER. All time has expired.

The question is on agreeing to the amendment of the Senator from Georgia and the Senator from Washington (amendment No. 1242).

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY (when his name was called). Mr. President, on this vote I have a pair with the Senator from Pennsylvania (Mr. HEINZ). If he were here and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withhold my vote.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Colorado (Mr. HART) are necessarily absent.

I further announce that, if present and voting, the Senator from Colorado (Mr. HART) would vote "nay."

The PRESIDING OFFICER. Are there other Senators in the Chamber who have not voted?

The result was announced—yeas 48, nays 48, as follows:

[Rollcall Vote No. 80 Leg.]

YEAS—48

Abdnor	Domenici	Humphrey
Armstrong	East	Jackson
Baker	Garn	Jepsen
Bentsen	Goldwater	Kassebaum
Cochran	Hatch	Kasten
D'Amato	Hawkins	Laxalt
DeConcini	Hecht	Long
Denton	Heflin	Lugar
Dole	Helms	Mattingly
McClure	Quayle	Thurmond
Moynihan	Randolph	Tower
Murkowski	Roth	Trible
Nickles	Simpson	Wallop
Nunn	Stennis	Warner
Packwood	Stevens	Wilson
Pressler	Symms	Zorinsky

NAYS—48

Andrews	Dodd	Matsunaga
Baucus	Durenberger	Melcher
Biden	Eagleton	Metzenbaum
Bingaman	Exon	Mitchell
Boren	Ford	Pell
Boschwitz	Gorton	Percy
Bradley	Grassley	Proxmire
Bumpers	Hatfield	Pryor
Burdick	Hollings	Riegle
Byrd	Huddleston	Rudman
Chafee	Inouye	Sarbanes
Chiles	Johnston	Sasser
Cohen	Lautenberg	Specter
Cranston	Leahy	Stafford
Danforth	Levin	Tsongas
Dixon	Mathias	Weicker

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Kennedy, against.

NOT VOTING—3

Glenn	Hart	Heinz

So the amendment (No. 1242), as further modified, was rejected.

Mr. CHILES. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1246

The PRESIDING OFFICER. The question recurs on amendment No. 1246 on which there will be 5 minutes of debate, time equally divided. Who yields time?

Mr. DOMENICI. Mr. President, may we have order?

The PRESIDING OFFICER. Order in the Senate. Senators will please take their seats and clear the aisle. We have 5 minutes of debate and the debate must be heard. Please, may we have order so that Senators may be heard in this debate?

We have 5 minutes of debate, time equally divided on amendment No. 1246. Who yields time?

Mr. DOMENICI. Mr. President, we have 2½ minutes on this side.

The PRESIDING OFFICER. That is correct.

Mr. DOMENICI. Mr. President, I am pleased to let Senator PRYOR go first, and he does not have to use all of his 2½ minutes, and then I will yield to a couple of Senators on our side.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, this amendment simply addresses one of the budget functions that is doubling every 24 months. That particular budget function is the production of nuclear warheads, not by the Department of Defense but by the Department of Energy.

In 1975, the request in the budget appropriation was $1.2 billion for this

function. For fiscal year 1984, it is $6.7 billion.

I reiterate, Mr. President, this function is doubling each 2 years. My amendment is not a nuclear freeze amendment. It is simply a rollback to the 1982 level and it would take $2 billion from this particular function.

Mr. FORD. Mr. President, may we have order so we can hear the distinguished Senator from Arkansas?

The PRESIDING OFFICER. The Senator's point is well taken. May we have order in the Senate so we may hear this important debate?

Mr. PRYOR. Mr. President, it will take $2 billion from this function to the 1982 level and allow the Armed Services Committee and the Appropriations Committee to come forward and make its recommendations on what we actually need for this program.

If we continue manufacturing nuclear warheads at the present level, in the mid-1990's we could have approximately 32,000 nuclear warheads. My question is, How much is enough? My request is, Mr. President, that we subtract $2 billion from this particular budget function.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. From the budget standpoint, let me tell the Senate what this is. Defense is in here at 5 percent real growth. It does not matter how the Senator from Arkansas described it. This cuts $2 billion in budget authority below that 5 percent. He contends it will be done in a different way, but budgetwise that is what it does.

I yield to the distinguished Senator from Texas and then to the Senator from Idaho.

Mr. TOWER. The Senator from Arkansas has spread a lot of misinformation around the Senate. In fact, we are trying to modernize our nuclear warheads. If we build new warheads, we dismantle the old ones. The fact is we have only one-third of the total yield in our nuclear warheads now as we had in the late 1960's. What the Senator from Arkansas has proposed really is a blueprint for unilateral disarmament. It would be a disaster if this amendment were adopted because it takes $2 billion off the $13.5 billion, which has already been reduced from the Presidential request.

Mr. McCLURE. Mr. President, it is not just nuclear warheads that we are talking about. This amendment would destroy our ability to modernize the nuclear propulsion program, the fuels program for the nuclear-powered ships of the Navy. It would reduce the expenditures on the defense nuclear waste program, on security clearances, on improved protection of our weapons, and on the verification technology that is absolutely essential to verification of any treaties with the Soviet Union.

It would deal crippling blows to the startup of some of the facilities that must be converted in the immediate future to maintain the program that we have.

It would cripple the Trident program and the air-launch cruise missile program.

For all of these reasons, I hope the amendment is not agreed to.

Mr. PRYOR. How much time have I remaining?

The PRESIDING OFFCER. Forty-nine seconds.

Mr. PRYOR. In conclusion, this amendment destroys nothing. It forces the Energy Committee, the Armed Services Committee and the Appropriations Committee to reconsider the entire totality of this program.

Second, the Senator from Texas, who is a very learned member of the Armed Services Committee, concerning these matters, certainly knows that one of the reasons for his statement just a moment ago is simply that we are building smaller warheads, which have more efficient yields and are delivered by weapon systems which have a higher degree of accuracy, which thus, I think, would diffuse the argument of the Senator from Texas.

Mr. McCLURE. Mr. President, I would like to take this opportunity to inform my colleagues of the vitally important role that the DOE defense programs weapons complex plays in supporting the needs of the Department of Defense. I believe any attempt to provide less than the President has requested in the fiscal year 1984 budget will do irreparable harm to the ability of our weapons complex to meet the requirements set forth in the President's stockpile memorandums. I would therefore like to address briefly those key areas of defense programs activities that have received significant increases since fiscal year 1982, so that my colleagues will have a better understanding of how DOE defense programs have utilized those increases provided in fiscal year 1983 and proposed in the President's fiscal year 1984 budget.

The naval reactors program is under DOE defense programs and has the responsibility for developing and maintaining the nuclear powerplants utilized in the Navy's submarines and surface ships. The increases requested since fiscal year 1982 have been utilized to offset the effects of escalation within the program and to support the construction of a new naval nuclear fuel facility. The development of advanced reactor cores is also being pursued. Increases also allow for servicing the land-base prototype plants that are used for testing and training purposes. Lastly, these increases reflect the increased cost of enriched uranium that the Navy must procure for the submarines and surface vessels. Some of these increases have been in part offset by reductions in capital equipment and construction funding due to completion of prior year activities.

DOE's weapons activities program is responsible for the research and development and testing as well as production and surveillance of the nuclear stockpile. The increases provided since fiscal year 1982 have been used to provide for an improved nuclear testing program and to provide for escalation of operating expenses in capital equipment. Increases have also been provided for additional research to restore the technology base that is required for modernizing our weapons. Increases also have supported new weapons production as well as continued improvements in the stockpile. The purpose of these stockpile improvements is to improve the safety of the weapon and its efficiency. Increased investments in plants have been made to restore facilities and slow the deterioration of utilities and equipment in the weapons production complex. Many of these facilities are 30 years old and have completed their useful life cycle and require refurbishment and renewal. These increases have been partially offset by reductions in previously authorized construction projects. Lastly, the increases support construction of production support facilities that are necessary to support long-term work load increases required in our weapons modernization program.

The development of weapons verification and control technology is a little discussed function of DOE's defense programs. This program has had increases to provide for research and development effort aimed at improved methods of detecting underground nuclear tests. These methods are aimed at determining if certain atmospheric phenomena are reliable indicators of these tests. Increases have also been provided for deliveries of nuclear explosion detection sensors which ride on satellites. These increases also allow for a higher level of support for technical analysis of national security issues related to nuclear weapons and to DOE's intelligence responsibilities. It is the work done under this program that will provide the basis for assuring the verifiability of any treaties.

Defense programs is also responsible for producing all of the special nuclear material used in the nuclear weapons. The increases provided to this program since fiscal year 1982 and those currently proposed provide for the impact of inflation of production activities and the greater amounts of materials required to be produced to support the new weapons builds required in the President's stockpile

memorandum. This is achieved through reactivation of the PUREX facility, the restoration of L reactor and the converting of the N reactor for plutonium production. Included in these increases are funds that allow for the restoration of the facilities in the complex many of which are 30 years old. These increases have been offset by decreases due to the completion of prior year construction projects.

DOE's defense nuclear waste management program is responsible for the storage, management, and ultimate disposal of the nuclear waste developed as a result of manufacturing nuclear materials and weapons. The increases provided since fiscal year 1982 have been to support interim waste storage operations at Hanford, Idaho, and Savannah River. This support has been in the form of improvements to the sites, construction of new storage tanks, and includes an escalation increase for operating equipment and general plant projects. These increases are being used to support the development of long-term waste management technology and the terminal storage of transuranic waste at the WIPP facility. Funds are also included for the initiation of construction of the defense waste processing facility at Savannah River. The initiation of this activity is an important milestone for that site as it represents an important step toward putting that waste into a form suitable for terminal storage. The progress being made by this program is important to the confidence of those communities surrounding these sites and to the Nation as a whole in demonstrating that the waste from these important national security activities can be terminally disposed of and safely stored.

If we roll back across the board the President's fiscal year 1984 request for defense programs to fiscal year 1982 levels, I believe this will have a drastic effect on the infrastructure of the weapons production complex. The upgrading activities that are currently underway to modernize this infrastructure will be dramatically affected as will be those activities that provide the support to the weapons complex such as the defense waste program. Clearly without the increases we may be unable to produce the material required for either our submarines or support the new weapons builds called for in the President's stockpile memorandum. The action represented by a roll back of funding would send confusing signals to our allies since our ability to deliver warheads for systems that we are currently committed to deploy would be jeopardized. Our enemies would become more emboldened, more strident, more demanding and we would have far less to take to the negotiating table. We should not permit policy decisions that concern atomic energy defense to be driven by budget actions that strike at the very heart of our ability to technically support larger national policy decisions.

Mr. SYMMS. Mr. President, I rise to oppose Senator PRYOR's amendment cutting funding for our nuclear weapons programs back to fiscal year 1982 levels. This amendment amounts to another example of American unilateral disarmament, in the face of the ongoing, relentless Soviet strategic buildup.

Mr. President, last summer there was a famous report in the New York Times that the United States planned to produce 17,000 nuclear warheads in the decade of the 1980's. This report is misleading. While it is true that the United States will actually fabricate nuclear weapons on that scale, only a few thousand will be net additions to the U.S. stockpile. The exact number is classified, but the impression that the United States is engaging in a vast nuclear weapons buildup is simply wrong.

Moreover, we need to bear in mind that since the late 1960's, the United States has deactivated about 8,000 warheads around the world, and the megatonnage of the U.S. stockpile has declined drastically since the mid-1960's. Thus the United States has a long history of unilateral restraint in nuclear warhead production, and the Pryor amendment seeks to perpetuate this dangerous trend.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield back the remainder of my time.

Mr. PRYOR. I yield back the remainder of my time.

Mr. DOMENICI. I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY (when his name was called). Mr. President, on this vote, I have a pair with the Senator from Pennsylvania (Mr. HEINZ). If he were present and voting, he would vote "Yea." If I were at liberty to vote, I would vote "Nay." Therefore, I withhold my vote.

Mr. EAGLETON (after having voted in the affirmative). On this vote I have a live pair with the Senator from Colorado (Mr. HART). If he were present and voting, he would vote "Nay." I have voted "Aye." I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Colorado (Mr. HART), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 74, nays 21, as follows:

[Rollcall Vote No. 81 Leg.]

PRESENT AND GIVING A LIVE PAIR AS PREVIOUSLY REPORTED—2

Kennedy, against.
Eagleton, for.

NOT VOTING—3

Glenn	Hart	Heinz

So the motion to lay on the table amendment No. 1246 was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the motion to table the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 1247

The PRESIDING OFFICER. The question recurs on amendment No. 1247 by the Senator from Arkansas (Mr. PRYOR). There are 5 minutes on this amendment, equally divided. Who yields time?

Mr. DOMENICI. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order so that debate on amendment No. 1247 can be heard by all Senators. Senators will please clear the aisles and take their seats.

The Senate is in order. Who yields time?

Mr. PRYOR. Mr. President, if the distinguished chairman will allow me, I will proceed.

Mr. DOMENICI. I believe the Senator from Arkansas controls 2½ minutes.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senate will be in order. The Senator from Arkansas is about to present his argument. The Senate will be in order before we commence debate on this amendment.

The Senate is in order. The Senator from Arkansas is recognized.

Mr. PRYOR. I thank the Chair.

Mr. President, the second amendment—my last amendment of today—is an amendment to deal with the situation that led to some $25.5 billion of arms sales by this country in 1982. This amendment in no way touches any particular country or any particular region of the world. It in no way diminishes, to the best of my knowledge, overall economic assistance; but, basically, it slows down the rate of growth and escalation of those assistance programs that we would classify as military or sales of arms to foreign countries.

Today, we see 57 percent of our foreign aid going for military purposes and 43 percent for development purposes. This amendment would simply do this: It takes $880 million, which is about 5 percent of the international affairs function, out of budget authority. I attempt to do this to force the Foreign Relations Committee and the Appropriations Committee to look again at what we are doing in the escalation of military assistance, particularly arms sales, by this country.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. I yield 1 minute to the distinguished junior Senator from Wisconsin (Mr. KASTEN).

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

Mr. KASTEN. Mr. President, first of all, I point out that it has long been a popular political tactic to cut or to take after foreign aid. It has a weak constituency. However, it is important to look at some of the countries that would suffer if the amendment were adopted.

I might say, as chairman of the Foreign Operations Appropriations Subcommittee, we are not talking about $21 billion or $22 billion; that is, the total including the military sales. Function 150 is $12.7 billion in outlays, so the base the Senator from Arkansas is talking about is incorrect and his percentages should be doubled. Taking $880 million out of a $12.7 billion base is a significant decrease. There is no way we could do that and continue to exempt Israel from these cuts, as the Senator would try to do. It seems to me that Israel, by necessity, would be affected. In the case of Egypt, there would be a $250 million cut to our vital ally in the Middle East.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMENICI. I yield the Senator 30 seconds.

Mr. KASTEN. Turkey is important to our NATO alliance; our bases in Portugal are vital, all U.S. contingency plans for Rapid Deployment Forces include this area. In the Philippines, U.S. bases are important to our defense in that part of the world. Taking $880 million out of this account is not possible.

I also point out to the Senator that his amendment is to the function 150 account. That means it could be economic assistance or security assistance, depending on what the authorizing and appropriating committees do.

Mr. DOMENICI. Mr. President, I yield the remainder of my time to the Senator from Illinois (Mr. PERCY).

Mr. PERCY. Mr. President, there was some confusion yesterday about the precise impact of the Pryor amendment. There should be no confusion:

It cuts nearly 20 percent from U.S. security assistance programs.

Of the $4.8 billion requested, $3 billion of the budget authority would be used for Israel and Egypt under the proposal now being considered by the Foreign Relations Committee.

If we do not cut Israel and Egypt, the $880 million cut would cut about 50 percent of the budget authority for the rest of the world. That means major reductions for Turkey, Pakistan, the Sudan, Oman, Kenya, Tunisia, Somalia, and Central America.

In short, this amendment would cripple the foreign policy of the United States by disrupting the delicate aid balance for the Middle East and negatively affecting U.S. access to critical military facilities around the world.

The PRESIDING OFFICER. The time of the Senator has expired.

The Senator from Arkansas is recognized.

Mr. PRYOR. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Twenty seconds.

Mr. PRYOR. Mr. President, in response to both my colleagues on the other side of the aisle, I say that this cut would not affect the off-budget items and that those loan guarantees would still be available as part of our security assistance program. This cut would affect only on-budget items over which we have at least some control.

Second, it would affect such programs as the economic support fund, international military education and training, foreign military sales credits, and the military assistance program.

Mr. President, I assume that I am out of time. I would appreciate support from my colleagues on this amendment.

Mr. DOMENICI. Mr. President, I move to table the Pryor amendment, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

VOTE ON MOTION TO TABLE AMENDMENT NO. 1247

The PRESIDING OFFICER. The question is on agreeing to the motion to table the amendment of the Senator from Arkansas. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Colorado (Mr. HART) are necessarily absent.

The PRESIDING OFFICER (Mr. PRESSLER). Are there any other Senators wishing to vote?

The result was announced—yeas 79, nays 18, as follows:

[Rollcall Vote No. 82 Leg.]

YEAS—79

Abdnor	Garn	Murkowski
Andrews	Goldwater	Nickles
Armstrong	Gorton	Nunn

NOT VOTING—3

Glenn	Hart	Heinz

So the motion to lay on the table Mr. PRYOR's amendment No. 1247 was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the

motion to lay on the table was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORITY FOR COMMITTEE TO MEET

Mr. KASTEN. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Tuesday, May 10, 1983, in order to consider and act on pending nominations, commemorative resolutions, and the following bills:

S. 215—The Bail Reform Act of 1983.

S. 1191—Authorization for Department of Justice activities and expenditures.

S. 1192—Department of Justice authorization for fiscal year 1984.

S. 53—The Justice Assistance Act of 1983, with an amendment in the nature of a substitute.

S. 57—To amend the Protection of Children Against Sexual Exploitation Act of 1977, with amendments.

Mr. METZENBAUM. Mr. President, reserving the right to object—and I will not object, provided the committee does not meet beyond the hour of 4 p.m. I have already advised the chairman of the committee to that effect.

Mr. KASTEN. I have no reason to object to that change. I am assuming these are relatively routine matters. So I would, in addition, after the listing of bills, ask the committee to finish its business by 4 p.m. this afternoon.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Later the following occurred:)

Mr. KASTEN. Mr. President, I ask unanimous consent that the 4 p.m. deadline for the Judiciary Committee to meet during today's session be vitiated.

I further ask unanimous consent that the Judiciary Committee be authorized to meet during today's session to consider the same items identified in the prior unanimous-consent request.

Mr. BYRD. Mr. President, reserving the right to object, I am advised that Mr. METZENBAUM has removed his objection. Therefore, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

The Senate continued with the consideration of Senate Concurrent Resolution 27.

AMENDMENT NO. 1252

Mr. DOMENICI. Mr. President, am I correct now in understanding that we have 5 minutes equally divided between the Senator from Montana and the Senator from New Mexico on the Melcher amendment?

The PRESIDING OFFICER. Under the previous order, that is correct.

The Senator from Montana.

Mr. MELCHER. Mr. President, this amendment is a very clear amendment, easily understood. It transfers $100 million from one function in the budget to another; $100 million is needed for soil conservation work. The overall increase in the Federal deficit will not be affected. I have proposed in this amendment to recognize an urgent need that I believe has the highest priority. Adding $100 million to soil conservation work in this country is absolutely vital, and the transfer would come out of function 150 which is the foreign aid function.

Soil conservation programs for the past 12 years have either stood still or been actually decreased during that span of time. Yet the need is here, vitally needed, for carrying on soil conservation work.

The fact is with PIK, the payment-in-kind program, there are hundreds of millions of additional acres of croplands that are idle that are requiring attention. Why do they need attention? Simply because without attention there is either erosion from water or wind and we lose some of our topsoil.

Spending for foreign aid in this budget is $12.7 billion. So $100 million can be spared from it. Foreign aid when rigidly watched is often wasteful. Despite our good intentions and our efforts, much of the money that is used in foreign aid from the United States ends up in not accomplishing worthwhile purposes.

There are 97 countries involved in the various programs and this function for foreign aid has been increased 12 percent this year over last year and foreign aid appropriations have more than doubled since 1979.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MELCHER. Could I ask an additional 30 seconds for Senator RANDOLPH to ask his question?

The PRESIDING OFFICER. Does the Senator yield time?

Mr. DOMENICI. I did not hear the request.

Mr. MELCHER. I asked an additional 30 seconds for Senator RANDOLPH to ask his question.

Mr. GOLDWATER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DOMENICI. I have 2½ minutes. I yield 30 seconds to the senior Senator from West Virginia.

Mr. RANDOLPH. I thank the Senator very much.

Mr. President, is it not true, I say to the able Senator from Montana, that we continue to send billions and billions and billions of dollars overseas, and that a large amount of it goes to those persons whom we really do not know and we have no knowledge really, accurate knowledge, of how the money is spent. At the same time here at home, we know that the unemployment rate is 10.2 percent, and in West Virginia the rate is over 21 percent. We know that in Montana and all over America we have a job to do and that is to create jobs, and not continue to send billions overseas is that correct?

Mr. MELCHER. The Senator is absolutely correct.

Mr. President, I ask unanimous consent that Senator DIXON be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I will take only 1 minute. The Senator seeks to take $200 billion in budget authority and $100 billion in outlays in the first year out of foreign assistance and to transfer that to function 300, which includes, among many things, soil conservation. The premise of the Senator is that we need more money in soil conservation because the President proposed dramatic cuts in it.

Mr. President, the function that contains soil conservation has had added to it by the committee a half-billion dollars. There is no proposed cut in soil conservation. To the contrary, the resolution before us assumes between 3½ and 5 percent growth over last year in soil conservation.

So it seems to me that jobs is not the issue. The issue is whether or not we want to take from foreign assistance, which we just voted not to cut, and put it in a function because we want to increase soil conservation when we have already increased it.

I yield back the remainder of my time.

Mr. MELCHER. Mr. President, I ask unanimous consent that Senator RANDOLPH and Senator BAUCUS be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

VOTE ON MOTION TO TABLE AMENDMENT NO. 1252

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from New Mexico (Mr. DOMENICI) to table the amendment of the Senator from Montana (Mr. MELCHER). The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Pennsylvania (Mr. HEINZ) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Colorado (Mr. HART) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 56, nays 41, as follows:

[Rollcall Vote No. 83 Leg.]

NOT VOTING—3

Glenn	Hart	Heinz

So the motion to lay on the table amendment No. 1252 was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, I ask for the yeas and nays on the pending substitute.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There are 40 minutes remaining for the Senator from New Mexico and 60 minutes for the Senator from Florida.

Mr. CRANSTON. Mr. President, I ask unanimous consent to set aside the substitute so I may offer an amendment.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Mr. President, reserving the right to object.

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. DOMENICI. Mr. President, I did not hear the unanimous-consent request and the ruling from the Chair.

The PRESIDING OFFICER. The objection was heard to setting aside the pending amendment.

Mr. DOMENICI. Was the distinguished Senator from Kansas the one who objected, or was it my objection?

The PRESIDING OFFICER. The Senator from Kansas objected.

If neither side yields time, the time runs equally.

Mr. BYRD. The Senator from California is seeking recognition to call up an amendment.

The PRESIDING OFFICER. An amendment is not in order at this point.

Mr. CRANSTON. Mr. President, I gather it is now not to be objected to. I ask unanimous consent to set aside the substitute amendment so I may bring up an amendment.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Reserving the right to object. I assume the Senator from California would have no objection to adding that all provisions of the Budget Act regarding floor consideration of the aforementioned amendments shall remain in full force and effect?

Mr. CRANSTON. That is correct.

Mr. DOMENICI. I have no objection.

AMENDMENT NO. 1253

(Purpose: To add additional funds to provide for the extension of medicaid eligibility to certain low-income pregnant women and newborn children)

Mr. CRANSTON. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself and Mr. HATFIELD, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. RIEGLE, Mr. MATSUNAGA, Mr. INOUYE, Mr. LEVIN, Mr. TSONGAS, Mr. DODD, Mr. KENNEDY, Mr. SARBANES, Mr. BRADLEY, and Mr. BUMPERS, proposes an amendment numbered 1253.

Mr. CRANSTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 13, increase the figure by $70,000,000.

On page 3, line 14, increase the figure by $75,000,000.

On page 3, line 15, increase the figure by $80,000,000.

On page 3, line 19, increase the figure by $70,000,000.

On page 3, line 20, increase the figure by $75,000,000.

On page 3, line 21, increase the figure by $80,000,000.

On page 4, line 1, increase the figure by $70,000,000.

On page 4, line 2, increase the figure by $75,000,000.

On page 4, line 3, increase the figure by $80,000,000.

On page 4, line 7, increase the figure by $70,000,000.

On page 4, line 8, increase the figure by $145,000,000.

On page 4, line 9, increase the figure by $225,000,000.

On page 4, line 14, increase the figure by $70,000,000.

On page 4, line 15, increase the figure by $75,000,000.

On page 4, line 16, increase the figure by $80,000,000.

On page 17, line 8, increase the figure by $70,000,000.

On page 17, line 9, increase the figure by $70,000,000.

On page 17, line 15, increase the figure by $75,000,000.

On page 17, line 16, increase the figure by $75,000,000.

On page 17, line 22, increase the figure by $80,000,000.

On page 17, line 23, increase the figure by $80,000,000.

Mr. CRANSTON. Mr. President, I am offering this amendment on behalf of myself and 14 other Senators—Senator HATFIELD, the chairman of the Committee on Appropriations. Senator HOLLINGS, Senator MOYNIHAN, Senator METZENBAUM, Senator LEVIN, Senator RIEGLE, Senator INOUYE, Senator MATSUNAGA, Senator KENNEDY, Senator TSONGAS, Senator DODD, Senator SARBANES, Senator BRADLEY, and Senator BUMPERS.

This amendment would add $70 million to function 550 for fiscal year 1984, $75 million for fiscal year 1985, and $80 million for fiscal year 1986 for the purpose of providing sufficient budget authority and outlays to permit the enactment of legislation to close the gaps in the medicaid program that allow certain low-income pregnant women—principally those in a first pregnancy or residing with their spouse—to be excluded from coverage for medical services during their pregnancy. In many of these cases, the woman and her infant will become eligible once the infant has been delivered, but no medicaid assistance is available during the critical prenatal period, when adequate medical care can increase the probabilities of a healthy child.

Mr. President, on April 28, I described in a statement printed in the CONGRESSIONAL RECORD the history behind this amendment, the need for legislative action to correct an inequity which has gone unresolved for far too long, and the relationship between adequate prenatal care and the outcome of a pregnancy. I shall not reiterate today all of the compelling data which demonstrate beyond a shadow of a doubt the importance of prenatal care in efforts to reduce infant mortality and birth defects. There is simply

no question that the single most important thing that we can do in this country to reduce infant deaths and birth defects would be to insure that adequate prenatal care is made available to all pregnant women.

Mr. President, this point was made over and over during the debate last week on the amendment adopted to provide room in the budget for the creation of a program—a much needed program—to help with the urgent health care needs of unemployed workers. A number of the Senators speaking on behalf of that amendment made specific reference to the need to provide maternity health care for those families and stressed the long-term impact of not providing such care.

Precisely the same arguments can be made with respect to the medicaid program. None of the proposals to create a health program for unemployed workers suggests that maternity coverage should be optional for the first pregnancy or if the father is still residing in the home. There is no logical basis for allowing maternity care to be denied under the medicaid program on those grounds either.

It seems particularly appropriate at the time we are taking steps to protect the health care needs of unemployed workers and their families, that we also put an end to the inequity that has existed too long in the medicaid program with respect to these low-income pregnant women.

Mr. President, thousands and thousands of low-income pregnant women go without medical care during their pregnancies because of financial barriers. The General Accounting Office's 1980 report on the steps that should be taken to strengthen Federal efforts to improve pregnancy outcome describes the inadequacies and gaps in health care programs—inadequacies and gaps that existed prior to the recent budget cutbacks in many of those programs. Since 1980, the situation has clearly gotten worse, not better. There have been increasing reports throughout the country of more poor women arriving at hospital emergency rooms in labor, without having had any prenatal care.

I do not think there is any serious question that a problem exists. There really are only two questions before us: First, is there more that the Federal Government can and should do to help get medical care to these women during their pregnancies, and second, can we afford the cost?

The answer to the first question is clear. We know that in many States medicaid coverage is denied to low-income pregnant women because of factors that are totally unrelated to need. In some States, they are ineligible for help if it is a first pregnancy. In other States, a pregnant woman, regardless of family income, is denied medicaid if her husband is residing with her. If the husband leaves, she becomes eligible for medicaid. In other States, medicaid is only available in the last few months of a pregnancy—often too late to identify and treat those factors that contribute to infant mortality and birth defects.

A number of the cosponsors of this amendment and I have introduced legislation that would close these gaps and assure that all low-income pregnant women, regardless of where they live, would have this important medicaid eligibility. There is simply no justification for continuing these inequities in the medicaid program.

Mr. President, I think the answer to the second question is also clear. Indeed, the question might well be phrased, "Can we afford not to provide this coverage?"

The cost of closing the gaps in medicaid is not great—$70 million in the first year, and $75 million and $80 million in each of the two succeeding years.

But the cost of not providing this care can be enormous. In the short term, we are talking about the costs of neonatal intensive care units. Over the long-run, we are talking about the increased costs of medicaid for remedial care for conditions that could have been prevented through proper prenatal services. We are also talking about the costs of institutional care for severely handicapped children—costs that will ultimately be borne by the taxpayers and, in many cases, could be avoided.

Mr. President, I stress again there is nothing we can do that can be more helpful in reducing infant death in our country and birth defects than to insure that prenatal care is made available to all pregnant women. We can, I believe, save substantial sums over the long haul through this cost-effective, preventive approach. In addition, of course, there is the very humane aspect of the need to deal with this very difficult problem.

Mr. President, I am delighted to yield to my friend from New York.

Mr. MOYNIHAN. I thank the distinguished sponsor of the amendment.

Mr. President, it needs first be said that the sums involved are of the smallest order we are likely to consider in this long budget debate, and the issue involved is the lives of children.

What we are asking here is for funds to establish what should be thought of as the elemental, primal provision by society for its citizens, which is the opportunity to be born healthy and well. We know how to do this. In most States of the Union, it is done for most of the pregnant mothers and their children. In some, it is not, in many it is not done entirely, and in many it is not done at all.

It is the plain fact of the law that medicaid does not cover first pregnancies and occurs only after a child is born, and a child has AFDC after that. A number of States refuse coverage to children regardless of family income.

What our amendment—and the laws that would follow from it—proposes to do is simply to establish a uniform eligibility across the Nation for essential prenatal care.

I repeat: If there is any primal responsibility a society owes its citizens, it is the provision of those services that enable them to be born alive and healthy. We know how to do this, and the fact that we do is a matter that has puzzled me over a quarter century of involvement in the affairs of the National Government in the executive and the legislative branches.

We know from "Better Health for Children," the Health and Human Services report of 1977—it would then have been HEW—that 25 percent of the women who gave birth in 1977 had no prenatal care in the first trimester of their pregnancy, in 44 States. The consequences were as statistically clear as any pediatrician would have predicted.

The proportion of such women who had premature births, had births that involved the death of the fetus, was twice as high as those who had the normal medical care—twice as high. Twice as many children died. Twice as many children were born too soon.

With the great advances in medical science, a premature child, it might have been impossible to keep alive a generation ago can be kept alive today, but at enormous cost in care. One has only to visit a clinic in a ward for premature children in any hospital, and one can see the extraordinary things that can be done. But at what extraordinary cost. Whereas, the most modest expenditures in prenatal counseling and care—not in every case, obviously, but statistically in a very large proportion of these instances—could be avoided altogether.

There is an elemental question of the entitlement of citizenship in this matter. The sums are modest. The dollars involved are few. The lives involved are many.

In a budget that approaches a trillion dollars, if we cannot find the resources for the care of these children, one wonders as to the values of this body. I hope we shall. We have come very close to doing so many times before.

I recall that in 1979, the Senator from California (Mr. CRANSTON), the Senator from New Jersey (Mr. BRADLEY), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Michigan (Mr. LEVIN) introduced and spoke on behalf of the Child Health Assessment Act of 1979, as we hoped it would be. It never was adopted. It remains to be done. It re-

mains the case for the reason which I do not think should be oversimplified and I would not wish to oversimplify: that the United States has perhaps the highest infant mortality rate of any industrial nation of our general standard of living in the world.

This cannot be a simple question. It has remained in this position. This situation has continued over at least a generation that I have been able to follow the statistics, but it is even so the fact. It is even so that while there has been a general lowering of infant mortality rates in our country as elsewhere, while there is a better level of child health at birth, the United States continues to have the least distinguished, least honorable—and I dare to use that term—position, rank, among the democratic industrial nations with which we would assume to be at least at par; and in many matters, we are the example to which others aspire and always have been. Here, it is different.

Mr. President, sometimes it is painful to speak of these matters, but there is a social component of this health problem that has remained equally obdurate, equally unbending, unyielding to effort for a generation, and that is the fact that the infant mortality rate for black infants is twice that for white infants. It is the plain fact that the prospect of not being born alive was twice that for the Nation's largest minority group as for the majority. That once, at least, made a claim on the conscience of this body. Once, at least, it was seen as evidence of the most ultimate form in which our concerns as a society ought to be engaged.

So it seems to me that with such a relatively small cost in dollars, a miniscule effect upon the budget, we can do now what we should have done years ago, and which we failed to do, at the cost of the lives of children and in some respects, I cannot doubt, the lives of mothers as well. When we do it at merely the cost of premature birth, almost invariably we are involved in tremendously expensive medical procedures: 24-hour care by nurses; special oxygen arrangements, oxygen tents; constant attention by one nurse for one child 24 hours a day—none of which is necessary in anything like the degree to which it now occurs.

It is an elemental proposition that the prevention of such events is vastly to be preferred to their cure when possible and altogether to be preferred to the ultimate failures which are the infant mortality records and statistics of our country.

It seems to me that the managers of this legislation might wish to speak to the matter.

I see that the distinguished members of the Budget Committee are in the Chamber and rather than go beyond what seems to us the elementally pervasive facts of the case I am happy to yield for any comments they might have; alternately, I can continue to discuss the matter. If there are difficulties I would be happy to hear from them.

Senator SYMMS has risen and I will be happy to hear his thoughts on this subject.

Mr. SYMMS. Mr. President, I yield myself such time as I may need in opposition to the amendment.

I listened to my colleague on the Budget Committee make the case, and I must say this is one of those amendments where people will say, "Who can be against expectant mothers?"

I suppose one could say that in a budget of some $800 billion plus, maybe $70 or $80 million per year. Well, that is no problem.

I think, though, what we have to do is recognize the facts, and I know my good friend from New York comes in here with records about the high infant mortality rate. I think to myself there is one thing that the United States has always forgotten and that is that we do keep better records than other countries, and I think that one thing that happens in the statistical evidence is that we simply have a better set of records than some of the countries that we make those comparisons with.

So we have to keep that in perspective. What is our mortality rate compared to what? Compared to 10 years ago, 20 years ago, 100 years ago? Is it better, worse? Of course, losing one child is too many, and I agree with my friend from New York that losing any is too many. The conservatives in this country used to say that the politicians in Washington are leading us down the road to a cradle-to-the-grave society. Now if we add this amendment it will not be cradle to the grave, it will be precradle-to-the-grave society where the Government is going to be responsible for everything.

I might mention the fact that in the jobs bill there was $105 million for maternal and child health, community health centers have $70 million, women, infants, and children, the WIC program, has $100 million. So it is not that the Federal Government is not making quite a commitment of the taxpayers' dollars to the prenatal care in this country.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. SYMMS. I will make one other point and then I will be happy to yield, and I note that Senator DOLE is in the Chamber and wishes to make some comments.

But no matter how much of the taxpayers' money we spend, you can lead the horse to water but you cannot make him drink. What I am getting at, I say to my friend from New York, it may be a noble idea but if a pregnant woman refuses to take proper care of herself, refuses to participate in a proper healthy diet, refuses to make the choices that only commonsense tells us are good for people, to get plenty of rest, a normal nutritious diet, and some moderate exercise in order to facilitate the best health prior to the delivery of birth or a young child; if she continues to live some kind of life that is not good for her health by doing those things which we all know are not good for her health, nonnutritious diet, not enough rest, and so forth, there is not too much that the Federal Government can do about it or those of us in this Congress.

So I think it is nice to be able to try; but here we go again. It is another open-ended entitlement program.

What about the States that are pressed for cash out there? How are they going to pay for it? Where will they come up with the matching money? Whose taxes or who is going to pay for the program? And I think that if this amendment is accepted, no matter how generous and how noble it sounds, it is going to be seen as an endorsement of the proposal.

We do not even know what the specifics of the bill are. This same suggestion has been rejected in Congresses in the past. If we assume the income or the service level to hold the program to $70 million, we would soon have additional proposals to broaden it. So we would have, in fact, a precradle-to-the-grave society developing, and there is no limit to how much money we could spend.

I yield to my good friend from Florida, the ranking minority member of the Budget Committee.

Mr. CHILES. I thank the Senator.

We should accept this amendment.

It will allow room in the budget resolution for preventive medical care for low-income women and infants that will cost little now but is going to save much in larger costs in the long run.

This amendment is aimed at insuring that medical care will be available to low-income women who probably would be eligible for medicaid if they already had children—because they would then qualify for the program of aid to families with dependent children. But for those women who are pregnant for the first time, even though their incomes are low enough to qualify, essential prenatal and postnatal care is not there. It just does not make sense to deny medical attention before a child is born—when later health problems could be prevented—but give it later, when it is too late to avoid costly health problems.

The percentage of medicaid going to children has steadily declined in recent years. Over 30 States have reduced or eliminated medicaid services important to keeping babies and children healthy. We are all going to

suffer for that, and it is going to cost us a lot more money in the long run.

This amendment is not a big expense item. It will cost $70 million now, with slight increases of $5 million each year after. It is targeted at a priority problem. We should accept it.

My distinguished colleague said this would create a new open-ended entitlement. It would not do that at all. There already is an entitlement in the medicaid program. This is simply going to say, let us spend some small additional money wisely, let us spend it for preventive care in that open-ended entitlement program before the infants are born, before they become wards. They are later going to get medicaid under aid to dependent children. They are entitled to that entitlement. They are going to eventually have that. We are going to pay for them after they are sick. We are going to have to pay for them as taxpayers after they have problems.

I say again to my distinguished colleague, knowing of the care that many of us in this body feel for life, we are talking about something now that is going to encourage a pregnant woman to go to term with her child.

You know the decisions that she has to weigh. She is someone without funds in a very low-income situation, many times probably without a husband in the household. The decision that she is going to be faced with is, "Should I go to one of these clinics or one of these places and abort this child, take the child, or is there going to be some help to get some care for this child so I should carry it to term, so I should try to deliver the child?"

Goodness knows, with all the debate that we have had in here on the sanctity of life and the right to life, here is an encouragement to say to that mother: "We are going to try to help you have a healthy child. Do not go to some clinic. Do not abort that child. We will help you."

Or to say to another mother, "We are going to try to help you a little bit to have a healthy child, so we will not have to pay for the rickets or the other health care problems and the diseases that will come after that child is born."

We are not creating a new entitlement at all.

Mr. SYMMS. Mr. President, if the Senator will yield to allow me to comment on that, in the specific case, I quite agree that you cannot argue with the sincerity with which the Senator makes his point, but the fact of the matter is, if he is right, this is like the housewife who goes shopping and she says, "Gee, the dresses are on sale today and I can buy the $80 dress for $40," or what have you. "Look at the money I saved."

When her husband comes home from work, she says, "Honey, I saved $40 today because I bought a dress on sale."

If the Senator is correct, we should not be spending $70 million on this; we should spend $200 million or $500 million. But where does it stop? Where does the cradle-to-the-grave society stop?

I suppose we could come up with some kind of a program that could aid the conception.

Mr. CHILES. The fastest growing cost that we have is health cost, inflating above the weapons systems cost, and above everything else.

Mr. SYMMS. I agree.

Mr. CHILES. Are we not trying to take a direction in this Senate to say, let us do more for preventive care? Let us not pay for all the problems afterward when they are much more expensive? Let us pay for preventive——

Mr. SYMMS. I quite agree with that.

Mr. CHILES. You agree with that.

Mr. SYMMS. I quite agree. Preventive medicine——

Mr. CHILES. Then the Senator is agreeing we ought to accept this little mark to allow the Finance Committee to look at this and then determine whether this reasonably should be done and we ought to put it in.

Mr. SYMMS. What we are trying to do by adding $70 million, no matter how noble and touching this program may be, is somehow say we can pass an amendment here to add $70 million to a budget that is already way in arrears as far as income and outgo are concerned and somehow answer the question and say, if it is going to solve the problem, add $70 million. But is it going to solve the problem? Is not the information available now on television and all the massive ways? What are we doing with the other billions of dollars we spend? Is it honestly true that Americans do not have access to what the commonsense information is? We have a Government school system——

Mr. CHILES. That same argument could have been made for home health care. That same argument could have been made for what we did with hospice under medicare. You could say, why in the world do we want to put some money into hospice? Why do we not have those people die in the hospital no matter what they want? It will cost more.

Mr. SYMMS. But Senator——

Mr. CHILES. What I am saying——

Mr. SYMMS. We have $105 million, we already have money in there.

Mr. CHILES. I have the floor now.

Mr. SYMMS. I think the time is mine.

The PRESIDING OFFICER (Mr. CHAFEE). The Senator from Idaho is yielding time.

Mr. CHILES. It is on his time, and he certainly can speak on it.

Mr. SYMMS. I would be glad to have the Senator's comments, but I would say if we are not spending money on this, I would agree with you. But we are spending money. We have television, we have public television stations that the taxpayers support to put on programs for people. We have public health clinics, we have prenatal money in this budget, for this particular program. What we are trying to do here is just have a vote here to say whether or not you are for or against prenatal health care. I am for prenatal health care and for preventive medicine, but I am not for continually adding entitlement money to a budget in a country that already has $1 trillion less than nothing in the Federal Treasury. And I might say, Mr. President, in addition to a trillion-dollar debt this Congress has run up, we also have a nearly half-trillion-dollar unfunded liability facing us with respect to the civil service retirement program; we have got nearly a half-trillion dollars of unfunded liability in the military retirement program. So when someone comes out and says we have a trillion-dollar debt, they are really lucky if it is only a trillion-dollar debt.

It is just, you know, $70 million is just another $70 million, and maybe someone can say—the distinguished Presiding Officer is concerned about this deficit and I heard him make the comment the other day, you know, $200 billion. He said, "What is $200 billion?" From his opinion and background, $200 billion is a lot of money. We are going to make it $200.07 billion if this is added.

Medical care as provided for in medicaid is only a small portion of the problem, and I just think to have us bring this out and somehow make this case here today that we have to pass $70 million is simply not necessary to do it today. It is not going to solve the problem if there, in fact, is as bad a problem, and I do not doubt from my colleague from New York it is a bad problem.

I do not say the statistics are not there that we have a problem but I say again if a woman who is expecting a child insists on not eating a nutritious diet, insists on taking all kinds of drugs, there is a limit to how much the Congress of the United States can do about it. It is not that the information is not available. If one would look at the numbers of women in the country who are pregnant, how do they obtain health care, how do they do it? And I would say they do it because they are motivated and have an attitude that they desire to do what is necessary to have a healthy baby. This is done with or without what we do here in Washington, and I think sometimes we think we can do more than is possible. Some of these decisions have to be made by the individuals.

I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from New York

Mr. MOYNIHAN. Mr. President, let me begin by agreeing with much that the Senator from Idaho, my distinguished friend on the Budget Committee, has said. The personal behavior of the individual is increasingly emerging as a preeminent determinant of health or the absence thereof. But there are such things as diseases, there are such things as disorders, and the highest motivation in the world will not undo them. That is what doctors do and they do it in hospitals or clinics and they identify it.

One of the great advances in medicine has come in my lifetime because I know that when our children were born this concept was just barely beginning, that of the well-baby clinic, teaching mothers with babies, who had no evident difficulties at all, nonetheless to check in. It has proved a major advance in medical science. It has saved—the amounts of difficulty we have in early childhood compared now with 50 years ago are strikingly fewer.

Why are medical costs growing? Because of the other end of the life spectrum, lifespan. I would say to him on the same subject, prenatal care, something which hardly existed 50 years ago, has proven to be enormously effective and, if it matters, it is cost effective, the value of a well baby as against a sick baby, you can put a dollar amount on it and the simple fact is that where these facilities are available to indentical socioeconomic classes the difference in outcome is statistically striking.

I would like to say, too, on the question of records, it is really not the case that ours are the best records here. The better records are probably kept in Scandinavia, and then Britain and the Federal Republic and France. We are still a much larger and a much less—we were lucky to get a census that comes within a 2-million or 3-million count of the actual population. Our data are likely to underestimate the problem than otherwise. I do not know that there is more to be said, Mr. President.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER (Mr. SPECTER). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I thank the generous interpretation of the Chair.

If there is no one wishing to speak further, I remind the Senate we are talking about $75 million in fiscal 1984, and we are talking melodramatically but not in some symbolic or anecdotal mode, we are talking about the lives of children and their well-being, and we are talking about modern medicine and what it knows how to do best which is to prevent illness and to prevent death.

Mr. SYMMS. Mr. President, I yield myself such time as I may need.

Mr. President, I appreciate the sincerity of the argument that my friend from New York presents here to this body today. I would only remind my colleagues that modern medicine in the United States of America and in the free world, for that matter, and the improved health care that we all enjoy and that the yet unborn children will look forward to enjoying was not developed somehow by Government programs in Washington.

We have much discussion in this Chamber about the deficit and about the money, and I suppose from an economic theory standpoint, and I know my distinguished colleague from New York has spent time in academia and this Senator has not, but I am sure in the economics departments in some of the schools in the country that they probably talk about the fact that in theory this budget is balanced each and every year and it is just a determination of how much of the gross national product we choose to consume with Federal spending.

And we are either going to borrow this money which will have an impact on the lives of many American citizens because we are cutting them out at the loan window, or we are really printing the money, which is a polite way to say inflating the currency or stealing from the value of the money from the people in the hidden tax or we will actually raise taxes and spend this money.

So from a theoretician's point of view, from an academic point of view, one could say that this budget is balanced and so what the heck is another $70 million this year. It is somewhat meaningless.

What we are deciding for the people of this country is that we in Washington know what is best. We are going to take $70 million out of the labors of the people in this country and add it to this budget and put it into prenatal care so that we will not have a society that has a cradle to the grave society but that is going to be "precradle" to the grave.

I cannot argue with my good friend from Florida or my good friend from New York on a specific case. I am sure he has statistics that show that if you give those prenatal courses and child care courses that maybe some of those children grow up more healthy than the others. I will not argue on a case-by-case basis. It is an irrefutable argument.

I would say to my friend from New York and to my colleagues that it was those exact arguments that brought about a $800 billion budget which is some 20 percent over and above what the Federal revenues are.

Mr. MOYNIHAN. Mr. President, would my friend yield for a comment?

Mr. SYMMS. I am happy to yield.

Mr. MOYNIHAN. May I say it is the same logic that got rid of poliomyelitis. It is a rare day when I would say that we in this Chamber know what is best for America, but we do know what is best. We know that prenatal care is better for children than its absence. So does anybody else who ever had a child or who has ever been a father of one.

Mr. SYMMS. I understand that. I have four children of my own. We have the Salk vaccine and the Sabin vaccine. And I would ask which one of those had the most to do with getting rid of poliomyelitis? The one that was not funded by the Federal grant, I would say to my colleague. Actually, one was funded by a Federal grant and one was funded by private enterprise and the private enterprise one solved the problem.

Mr. MOYNIHAN. Shall we move on to yellow fever?

Mr. SYMMS. I say to my friend, we come back to this question: Where did the money come from? Did it not come from the people who produced it, who produced the wealth? So what we are really arguing about here is do we want to add more money than we already have in the bill? Do we want to start another open-ended entitlement program or do we want to say we made a commitment to it, we realize it is a problem, and we would recommend to the American people that they do more about preventive medicine.

But there is a limit to how much wealth we have. How much do we want it capped? Do we want to spend 25 percent of the gross national product, 30 percent, 40 percent, or 50 percent? I say to my colleague that there is a limit, I think, to how far we can go.

It is what we spend here that is important. It is what we spend because we are spending it and it is taxed no matter whether we raise the taxes directly on the backs of the people so they can see it or, as I say, we borrow on the money, or we actually print it and just steal it from the value of the money that they have with the Government printing presses.

Are there any other Senators on my side of the aisle who would request time on this amendment or on the other side in opposition to the amendment? If not, Mr. President, I ask unanimous consent that the time be divided equally from both sides and I suggest the absence of a quorum.

Mr. CRANSTON. Mr. President, might we have a few remarks on this side first?

The PRESIDING OFFICER. Is there objection?

Mr. MOYNIHAN. Reserving the right to object.

Mr. SYMMS. Mr. President, I withdraw the request and reserve the remainder of my time.

Mr. MOYNIHAN. Mr. President, may I inquire of the Chair what time remains on behalf of the amendment?

The PRESIDING OFFICER. Each side has 40 minutes.

Mr. MOYNIHAN. Mr. President, I believe the Senator from Arkansas or the Senator from Ohio wishes to speak on the amendment.

Mr. METZENBAUM. Mr. President, I ask the Senator from New York, who controls the time, to yield me such time as is necessary.

Mr. MOYNIHAN. I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, the amendment before us represents only a small amount of dollars in the face of the overall Federal budget. Amounts under $100 million get rounded off in the budget process. Yet in terms of human lives, the amendment represents an enormous investment in the future of our society.

Under current Federal law, States are not required to provide medicaid coverage to two-parent intact families no matter how low their income. This policy actually encourages unemployed and underemployed fathers to leave their families so that they may qualify for assistance.

During the Budget Committee consideration of the health function, I offered an amendment to expand medicaid coverage to all children and pregnant women in two-parent families that met their State's income guidelines for medicaid eligibility. That addition of $350 million in 1984 would have encouraged families to stay together and would have provided a real safety net for the poor. However, my budget proposal for health was defeated in the committee.

Today Senator CRANSTON and cosponsors are offering a modified version of this proposal to increase the 550 health function by $70 million in 1984 to provide medicaid coverage for all low-income pregnant women. This is essential to provide necessary medical care for pregnant women who are currently denied assistance either because they are pregnant with their first child or because they are living in an intact family.

Mr. President, what we are talking about here is whether we are going to be pennywise and dollar foolish, whether we are going to charge future budgets of this country for the cost of failing to provide adequate prenatal care.

What we are talking about is spending a few dollars—and the distinguished Senator from Idaho talks about balancing the budget. I want to point out to him if he closed one one-hundredth of all the tax loopholes that exist in this country, if he provided the same effort, the same volume of his voice, the same ingenuity, the same tenacity to closing those tax loopholes, we would not have $70 million available for this prenatal care, we would have $700 million, we would have $7 billion available. But that is not what happens around here.

Mr. SYMMS. Will the Senator let me comment on that?

Mr. METZENBAUM. As soon as I finish, I will be very happy to, and I will not be long.

What we are talking about is whether we are going to be willing to do that which we ought to do. But too often around this Senate floor and in this Congress and this administration, all we know how to do is complain about spending a few dollars for the kind of future that we have for our young people in this country and the kind of present we have for our senior citizens. What we are talking about here is a rather paltry $70 million as compared to the value of the lives of those future unborn children.

I hope that this Congress will not be so penurious that it turns down this simple amendment of $70 million. If the mathematics work out right, as a matter of fact, it will not even show up in the budget figures, because if you have a figure that is $800 billion and you add plus $70 million, it does not even show up. So what we are talking about is having a sense of responsibility, a sense of care, a sense of concern, and a sense of compassion. If we have that, we will adopt the Cranston amendment.

Mr. SYMMS. Mr. President, I yield myself such time as I need.

I would just say again and reiterate the point for my friend from Ohio that the Congress just added $275 million to maternal and child health care, the WIC program, and community health centers in the emergency jobs bill. The resolution assumes an increase of over $100 million for MCH and community health centers, and $250 million for the WIC programs in fiscal year 1984.

These increases are aimed at the same population which this amendment proposes to entitle.

States presently have the option of providing AFDC coverage and, therefore, medicaid coverage, for pregnant women in the later months of their first pregnancy, and at least 30 States already provide this coverage.

If this amendment is passed, the Cranston amendment will mandate State coverage. The amendment is limited to medical care as paid for by medicaid, and the problem is beyond medical care, in my opinion, as I said earlier, Mr. President. It involves the social and lifestyle factors that medicaid simply cannot address.

So even though, as the Senator from New York pointed out, we do have high mortality rates in this country, the survey data from HHS shows that infant mortality is at an all-time low. The two groups at the highest rates are mothers under 16 or over 35. For both groups, care as provided in medicaid is only a small part of the solution.

I would say to my friend from Ohio, who is again talking about balancing the budget, the budget is balanced. To my friend from Ohio, Senator METZENBAUM, I would say the budget is balanced, in theory. Senator MOYNIHAN and I were just talking about it. You will either tax for it or you will print money, a polite way of stealing from the people by printing it, or we are going to crowd them out. It is what we spend here that matters.

I am saying to my friends here that we have developed the best lifestyle and the best health care in the world in the United States of America. It was not done because of what happened in Washington, D.C. It, in fact, happened because of the entrepreneurial genius and delivering factors of our system.

Mr. METZENBAUM. Will the Senator yield for a question?

Mr. SYMMS. I yield for a question

Mr. METZENBAUM. I respect the ingenuity of those who have made many of the major medical discoveries of this country. But we had testimony before our committee the other day from the American Society of Pediatrics in which they were saying that there are literally 10 times as many mothers not getting adequate prenatal care today as they had in the past, and blaming that directly upon economic conditions, unemployment, and the lack of funds. My question to the Senator is, would he not agree that in spite of all the great medical developments that have come about by reason of private ingenuity that there are still people in this country who, if they cannot afford to get the benefits that are provided by that kind of ingenuity, are going to suffer, as they are suffering at this very moment?

Mr. SYMMS. I would say to my friend what I have just repeated, that we have already added money in the bill for that very constituency that the Senator is talking about.

What you are saying is that you want to add $70 million more to that program. Well, if $70 million more is needed for that program, maybe we need $170 million or $1,700 million. Who knows how much is enough?

I would simply say that there are also people in this country who are having a difficult time simply because the Federal Government is deciding how to spend their money, Mr. President, instead of allowing them the privilege of making that decision themselves. We are taking this free choice away from people, bringing it over here and letting the Government decide for them.

That is all I am saying. I cannot argue with my friend from a humanitarian point of view. Of course, we want to take care of these people, but how much is enough? If your case is right, we ought to not limit it to $70 million, and I am surprised that my friend from California limited it to $70 million. Maybe it ought to be $700 million.

Mr. METZENBAUM. I offered a $350 million amendment and I did not have the support of my good friend from Idaho on that amendment in the Budget Committee. I am speaking today in support of $70 million because 20 percent of a loaf is better than no loaf at all.

Mr. SYMMS. I would say to my colleague we are now getting down to what the grist of the argument is. I am simply saying that Congress has spent this country almost to the verge of bankruptcy. I know my good friend wants to go out and close all the loopholes. It is really irrelevant whether you close the loopholes because you are going to spend the money anyway. How will you pay for it? Borrow it or print it?

Mr. METZENBAUM. I solemnly swear if you go back and undo President Reagan's tax bill, which reduced taxes $750 billion, I will not spend all of those dollars. I promise you that.

Mr. SYMMS. I hope, Mr. President, that has been properly recorded for the posterity of the country. I think my good friend from Ohio made a great commitment that he would not spend the whole of $750 billion. But I am saying that at the rate we are going, we are spending it anyway, with or without a change in the Tax Code.

I yield such time as he may need and consume for the enlightenment of this body to the distinguished chairman of the Finance Committee, the Senator from Kansas, who I might note, Mr. President, is the chairman of the committee which will have to figure out how this program is somehow going to, in a utopian fashion, solve all the problems from prenatal and precradle to the grave for the country. I think that is a pretty tall order. We will hear how the Senator from Kansas proposes we solve all of these problems for everyone from Kansas, to Idaho, to Ohio, to New York. I yield to the chairman.

Mr. DOLE. I thank the Senator from Idaho.

Much of this seems to end up in the Senate Finance Committee. We are very pleased to have that focus placed on our committee. It is not that I am unsympathetic with the amendment offered by the distinguished Senator from California. I certainly know it is well intentioned. But we have tried to check to see whether or not it is necessary and we cannot make that judgment at this time.

I am advised that the States already have the flexibility to provide services to pregnant women and this amendment would require that it be mandated.

Also, we have included with this Senator's amendment, $1.8 billion over 3 years in the budget resolution to provide health benefits for the unemployed. We are considering legislation now in our committee, in the Senate Finance Committee, which puts special emphasis on prenatal and postpartum care and prohibits the imposition of cost sharing on such care. Furthermore, all States are given the option of providing AFDC coverage to children in two-parent families who are needy because of the unemployment of principal wage earner.

As I understand, the budget also provides for an increase of 10 percent in the medicaid program.

It just seems to me that, for the reasons which were probably stated by others, it is not a great deal of money. It is $225 million if it is all totaled up over the next 3 years. But, again, we are faced with all these deficits and we are told we ought to reduce spending. But every amendment in the budget process will add spending. Maybe we should rearrange our priorities. Maybe there is something else we can do in the Senate Finance Committee.

I must say that we try to be very sensitive when we focus on programs that affect or impact on low-income Americans. Very honestly, I think there have been some areas where we may have gone too far.

So it is not that I am unsympathetic with the Senator from California. It just seems to me that if in fact there is a demonstrated need, we may be able to address this without additional spending. We have all kinds of programs in the Senate Finance Committee that might be trimmed back.

For example, when medicare passed in 1965, we were told if we were not careful it would cost $9 billion by 1990. It is in the budget this year for $7 billion. We are now told the 1990 cost will exceed $100 billion. Consider medicaid, of which the Federal share is about $20 billion—perhaps it should receive a higher priority. Maybe we ought to reduce some other program that we have jurisdiction over and add money for prenatal care. If that kind of amendment were proposed, it might be different.

Based on the problems we have, Mr. President, I hope the amendment might be modified.

Mr. CRANSTON. Mr. President, I know that the Senator from Kansas is sympathetic to the purpose of my amendment and the need we are trying to address. I should like to respond to a point he has made very briefly.

Mr. President, it is true that States have the option to extend full coverage to all low-income pregnant women. Many States already do. But many States do not. Laws in at least 13 States provide that a woman who is pregnant for the first time is ineligible for medicaid. Once the child is delivered, medicaid eligibility can be established, but no services are available during the critical prenatal period in those 13 States. In over half of the States, a needy woman whose husband is present in the household cannot get medicaid assistance unless he leaves.

The basic question is whether, in a health care program for low-income individuals financed in large part by the Federal Government, pregnancy-related services should be part of the core program and not subject to arbitrary restrictions unrelated to need.

I think they should be. As I stated earlier, maternity services are included as a core, mandatory element of the various proposals to establish health programs for unemployed workers. The legislation introduced by the distinguished chairman of the Finance Committee, the Senator from Kansas (Mr. DOLE) S. 951, specifically mandates that prenatal and postpartum care be provided in his proposal. Certainly they should be. The Senator from Kansas does not say these services can be optional if this is a first pregnancy or if the father is still residing in the home. Medicaid should not work that way, either.

I should like to respond also to the argument that if prenatal care is so important and cost-effective, why do all the States not exercise the option to offer it? The problem is that we are dealing with what is basically a preventive health care service. That is what prenatal health care is—a preventive service. Unfortunately, however cost-effective preventive health care services may be and however shortsighted the result, when budgets are tight, they are often the first to be dropped, because the return on this kind of health care comes later.

Finally, Mr. President, I want to stress that the Federal Government has a direct fiscal interest in seeing that this coverage is made mandatory under medicaid. The Federal Government is going to have to pick up a major share of the cost of providing health care, education, institutional care, and, in many cases, the cost of welfare dependency for children who are born with disabilities and handicapping conditions that could have been avoided through the provision of adequate prenatal services. If these services are not available, Federal taxpayers will pay the costs many times over in the end.

Mr. President, regarding the funds in budget for the maternal and child health grant program, let me say at the outset that I fully support the activities carried out under the maternal

and child health block grant program, which includes the former title V program. I have cosponsored amendments to increase funding for this program and have strongly opposed efforts to reduce its funding.

However, it is critical to understand exactly how the maternal and child health block grant program and the medicaid program differ in their effectiveness in reaching the target groups.

The 1980 report of the General Accounting Office—entitled "Better Management and More Resources Needed to Strengthen Federal Efforts To Improve Pregnancy Outcome" (HRD 80-24)—is very helfpul in understanding this difference.

Title V and the new maternal and child health block grant program support specific projects. If you happen to live in an area served by such a project, great! If you do not—and the GAO found that most of the counties in this country are not served by maternal and child health projects—they do not help. Medicaid, on the other hand, is a universal third-party reimbursement program. You do not have to live near a project to get services. You do not have to get on a waiting list if the project is already overenrolled. You just find another doctor or program.

Moreover, the MCH block grant is not focused just on maternity care. The block grant funds received by the States are used for a variety of purposes, including such things as family planning, immunizations, and dental clinics. These are certainly important and desirable services. But they compete with the need for the same projects to provide prenatal services. In 1980, the GAO found that some States gave little emphasis in allocating these block grant funds to activities directly related to improving pregnancy outcome.

Mr. President, we also need to look very carefully at how much is available for the MCH program. It is true that Congress has taken steps to restore the funds that were cut from this program in 1981. However, it is important to remember that GAO found that even the pre-1981 level of funding was inadequate. The additional funds for the MCH program are needed and can be well spent. But the problem we are seeking to address—assuring that all low-income pregnant women have access to adequate prenatal care wherever they may live—cannot be solved simply by adding more money to the grant program, unless we are willing to put enough money in to establish a project in every community. Medicaid eligibility is the only direct way to reach all of these women.

Mr. President, medicaid and the MCH programs are both needed in order to reach all of the needy women who need prenatal services. They each serve a different role in overall efforts to improve the health care of low-income families. The same point can be made regarding the WIC program, another vitally important program. Each is needed.

Finally, Mr. President, we also need to look at the social costs of not providing financial assistance to needy women for medical costs associated with carrying a pregnancy to term.

The Senator from Florida has spoken eloquently on this point, but I want to stress that this is clearly an amendment that should be supported by Members on all sides of the abortion debate. Lack of economic resources to pay for the medical care necessary to carry a pregnancy to term can be a factor in the decision of a pregnant woman to terminate a pregnancy. It can also serve to make these women easy victims for black market baby sellers who are all too ready to pay for the full pregnancy costs in exchange for the infant.

Finally, there is deep concern—which I share—over the tragic and heartbreaking decisions made when a child is born with life-threatening birth defects. There is no question that we should do everything possible to reduce the number of these situations and there is no question that adequate prenatal care can help reduce the incidence of these great human tragedies.

Passage of this amendment is an important step in this direction and I hope the Senate will agree to action on this matter.

Mr. President, I ask the Senator from Arkansas if he would like to speak at this point. If so, I shall yield such time as he needs.

Mr. BUMPERS. Mr. President, I thank the Senator from California for yielding. I shall not be long. I just want to add my voice to those that have already been raised in favor of this amendment because, even though I probably am not going to say anything very new or creative, I certainly would feel terribly neglectful of my duties if I did not speak out.

As I have sat here and meditated on the purpose of the amendment and the arguments pro and con, I never cease to be amazed at how the U.S. Congress can shoot itself in the foot as regularly as it does. Just a few moments ago, we had a tie vote, I believe it was 48 to 48, on a $6.5 billion increase in defense expenditures. That was on top of the 5-percent increase that the budget resolution already provided. We are talking in terms of $260 billion for defense. Nobody here is really quarreling with whether we want a strong America or not.

This may come as a shock to some of my colleagues, but I have never run across a man or woman in Congress who favored a weak America. However, I have run across some who felt that the Russians probably could not resist coming up the Potomac and getting us if we happened to cut a couple billion dollars out of a $250 billion defense budget. But I have never run across anybody who said they favored a weak America. Yet they always couch it in terms of defense.

I have been saying for a long time that there are a lot of things that I think are very important to the strength of this Nation in addition to how many planes, and tanks, and guns we have. I look forward to, indeed I pray for, the day that we consider ourselves a strong nation because of our inner strength as well as our military strength. I look forward to the day when the U.S. Senate suddenly comes to its senses and understands that when you cut out funds for prenatal and neonatal care for poor, pregnant women, you are not guaranteeing, but you are helping to guarantee, a defective baby.

If you have ever been Governor of a State, and some 12 to 15 Members of this body have been, you know what it is like to try to find money for all those learning disabled children, for all those child study centers for children with everything from mental retardation to dyslexia. Or, as a Governor you have had to come up with the money for the prisons or the mental institutions where one out of every eight people are there because of some disease they got because the children were not immunized against some childhood disease.

We have a lot of good programs in this country. We have the WIC program, we have the maternal and child health care program; we have AFDC. And we can stand up, all of us, and take great pride in those programs. But you know something else, Mr. President? These programs do not cover all of the needy people in this country. If we do not want to help these needy people, and I shall give statistics in a minute of who is not covered in those programs, and if, for example, we want to punish some teenage girl who is pregnant and not provide her with prenatal care, that is an option. Just say, "We are not going to give you any prenatal care or any neonatal care when the baby is born, because you should not have done that." I do not think that is a very sensible option, but if that is the way you want to vote, vote against this amendment.

If you want to be sensible and you want to take the position that you would rather spend between $250 to $350 on prenatal care for one pregnant woman, rather than spend $2 to $3 million to institutionalize a defective child for its entire life, then vote for the amendment.

Here are the people who are falling through the cracks. These are the sta-

tistics. You can talk about the other programs all you want.

Incidentally, the maternal and child health care program, which I have tried to shepherd through this body almost every year since I have been here, right now, in 1983, with corrections for inflation is receiving approximately 35 percent less funds than were available to its programs prior to the creation of the block grant in 1981. Every State in the Union, from Mississippi to New York, would tell you that the maternal and child health care program saves them $10 in State funds for every dollar they spend in that program. Yet, every year, for reasons that are absolutely beyond me, we have to get up here and scream and shout and storm to get that program funded at a decent level.

Well, who has fallen through the cracks? The statistics we have are for 1980, and 1980 was before all these massive cuts in all these programs.

Even in 1980, one out of every 20 pregnant women did not receive prenatal care until the last trimester of pregnancy, and 1 out of 76 women received no prenatal care. One out of every 11 black pregnant women received no prenatal care until the last trimester of pregnancy, and 1 out of every 37 black pregnant women received no prenatal care.

Here is a kicker with respect to low-birth-weight babies: one out of every nine teenagers received no prenatal care until the last trimester of pregnancy.

It is disgusting to even have to debate an amendment such as this. We stand up here and talk about all kinds of things, from defense on down, yet none of these matters are as important to the national security and well being of this Nation as healthy babies.

There are thousands of pregnant women who are falling through the cracks of the health care system and are not receiving prenatal care. We know that these mothers are more likely to deliver babies needing future expensive care. If only 70 mothers receiving prenatal care could be prevented from delivering a baby requiring long-term institutionalization, the government could save $70 million. That is $70 million that could be saved—the entire amount of this amendment.

Here is a figure for you: Prenatal care costs between $250 and $350 per woman. Neonatal intensive care for babies who are sick or low birth weight can cost $1,000 a day. It is not at all unusual for premature babies, low-birth-weight babies, sick babies, or brain damaged babies, to cost anywhere from $20,000 to $40,000 or more before they ever get out of the hospital.

Between her first and second years in college, my daughter worked in what they call the preemie section of the University of Arkansas Medical Center, where the premature babies receive care. Babies in this part of the hospital weigh anywhere from 1 pound up to 4 pounds. I visited her there two or three times, and I talked to the nurses and to the doctors, and I watched those tiny babies. It was not unusual to see a baby in there who had been hospitalized there for 2 months or longer. Some of these babies cost the State of Arkansas $1,000 a day. In some cases these lengthy and costly hospitalizations were necessary, because the mother had not received prenatal care for herself because she came from a poor family. You should see these mothers coming in to see their babies. These mothers had not had a decent diet before or after the birth of their babies.

The way we deal, it is unusual to get this steamed up around here for $70 million. This amount of money is just a pittance. But it is just another classic case of how we get our priorities so unbelievably skewed and I cannot believe it.

Mr. President, I hope that when Senators come to the floor, they will not just walk to the well and say, "What is our vote on this amendment?" but, that they will ask, "What is the substance of this amendment?" I hope they are listening on their squawkboxes; that they will vote for something decent and sensible and something that, above all, if you want to look at it in pure economic terms, is terribly cost effective.

Mr. President, I see that the floor manager of this amendment is not in the Chamber, and I am prepared to yield the floor.

Mr. SYMMS. I yield myself such time as I may need.

Mr. President, I want to respond to what my colleague from Arkansas just said. He made a very impassioned plea.

For our colleagues who are listening in their offices and who are not on the floor, and for those who are here, I point out that the characterization of this problem by the Senator from Arkansas would make it sound as though this is an either/or situation: either you are for prenatal care or you are against it. I say to my colleagues that that simply is not the situation.

I am not sure the Senator from Arkansas is aware of the fact, but in the 1983 budget, we have appropriated $373 million for the same targeted constituency that the Cranston amendment points toward. In the jobs bill which was passed last December, $105 million was added.

So what Senators really are voting for is whether they are for 478 million dollars worth of care for this problem or for $548 million. That is really what we are talking about.

So I do not think the record should be left unclear, so that those Senators who may choose not to vote for the Cranston amendment may appear to be completely insensitive to the problem that the distinguished author of the amendment brings before this body. It simply is not the case.

We have made it eminently clear that there are adequate funds for what this Nation can afford.

I say again to my colleagues that this kind of openended entitlement will put pressure on hard-pressed States that may not believe they can afford to match those payments.

To characterize this as a situation in which this Government, this Congress, or this country is doing nothing, when we are in fact spending $478 million, nearly a half billion dollars, on this problem, is a characterization that should not be left, and it should not be misunderstood by our colleagues.

Mr. President, I suggest the absence of a quorum, and I ask that the time be divided equally.

Mr. BUMPERS. Mr. President, will the Senator yield for one moment?

Mr. SYMMS. I yield.

Mr. BUMPERS. Mr. President, the statistics I gave a moment ago for 1980, I pointed out, was before a lot of these massive cuts in programs for the medically indigent took effect.

Arkansas in 1 of 13 States that do not cover prenatal care under medicaid for poor first-time pregnant women who are not yet on AFDC.

These mothers will be covered by medicaid just prior to delivery but that is like shutting the gate after the cow is out. It is too late.

In Kentucky the University Hospital in Lexington has quit providing indigent care because it could not finance the caseload of uninsured pregnant women.

In Oklahoma City clinics offering health services to low-income families estimate that at least 1,000 women are pregnant and have no place to go for prenatal care or for delivery. Think about it. In Oklahoma City 1,000 women are going to receive no prenatal care and have no place to go to even have the baby.

In Mobile, Ala., all but one of the six hospitals in Mobile have closed their emergency rooms over the weekends to cut down on the cost of providing care for the uninsured.

Mr. SYMMS. I thank the Senator very much, and I will take back my time, Mr. President.

I only say, and I will repeat again for the RECORD and for my friend from Arkansas, if they have that problem in Arkansas, his party controls the governorship, his party controls the legislature. This Congress has already a maternal and child health block grant of $373 million for fiscal year 1983, it is funded at $373 million in the continuing resolution, and $105 million was added during the jobs bill. So I say again we already have $478 million in

it. If that is not enough for my good friend from Arkansas, then his State legislature and his friend, the Governor, out there should do something about it. But do not come in here and ask for funds from the taxpayers of the United States, who are already spending money they do not have. We are already spending a half billion dollars on this problem. Do not paint a picture that the U.S. Federal Government is not doing something on this problem.

I simply say to my colleagues that this is the way the Federal Government got in the mess that it is in. This is how we have reached this point in our time in history where we already have, as I mentioned earlier, a trillion dollars less than nothing just in the general fund, and we already have an unfunded liability of almost a half trillion dollars in the civil service retirement fund, another half trillion dollars in the military retirement fund, and I do not know how many other billions of dollars the U.S. Treasury and the taxpayers of this country are committed for. But yet we come in with every heart-plucking suggestion and say that $478 million is not enough, we just want to add $70 million to it and that is going to erase the problem.

I simply say that as to the supposition and the premise from which my colleague makes that argument, all the money in the world will not solve the problem. If that were the case, then I would say that we could have utopia here and we could see that we could get all those young pregnant women to drink milk and to do all the proper things and it would just be taken care of and we would not have this problem.

But we do not live in an utopian situation. Health spending has grown from $23 billion in 1980 to $25 billion in 1983, and that does not include medicare spending, so we have not had these big cuts that the Senator from Arkansas is talking about. We are not cutting out every single thing in this budget or in this budget last year from what has been happening. If $70 million would solve the problem, I think most Senators would say, "Fine." But I do not think that the evidence supports that fact that the $70 million will be able to even scratch the surface and solve the problem.

This is an attitude problem in many cases, and in many cases, if it is not, we are just adding $70 million to the already overbloated Federal budget. In my judgment we are spending more money right now.

Mr. BUMPERS. Is the Senator suggesting poor women who get pregnant have a bad attitude?

Mr. SYMMS. I say to my colleague as to the point he is trying to get at, if I thought that we could add $70 million here or, as the Senator from Ohio was talking about—he wanted to add $350 million to this program in the committee—if that would solve the problem I do not think there would be any discussion here. But I made the point over and over again we are spending $478 million to this very constituency. If we add $70 million to it I simply would say we add another $70 million and then we find out that there are still pregnant women in need of prenatal care that maybe they even get the prenatal care but they say, "Thanks but no thanks; I would prefer to live an unhealthy lifestyle." I do not know what this Senator can do about it.

I appreciate the Senator's sincerity, and my heart goes out to those people and to those babies. But I think there is a limit to what we can do in this body and how much money we can add for every heart-plucking amendment that comes along here and if we intend in any fashion to come out of here with any kind of a budget that points toward fiscal responsibility we simply cannot add $70 million here, $70 million there, and so on and so forth, when nearly a half billion dollars, I say to my friend, are being spent.

If Arkansas thinks they have a problem, then I encourage Arkansas to take care of the problem. There is a limit to what we can do with the Nation's Federal budget about that particular specific problem.

I say also to my friend, and I made the point earlier before the Senator got to the Chamber, we have a system in this country. In addition to the commercial television stations, we have national public radio, we have commercial radio, and we have newspapers in this country that give access to information like this, and we have a federally supported public television system in this country where this kind of information about taking better care of one's self is not being hidden from the public and it is available for the American people. I do not know how much more a person can do than to lead the horse to water and if he will not drink, I do not know what you do with the horse.

In closing, Mr. President, there has been an increase of nearly $2.4 billion in health care and medicaid in this budget, and I do not know when we are going to say that enough is enough, whether it is $70 million more or $80 million, or $100 million more.

I see the distinguished chairman of the Budget Committee is in the Chamber.

Mr. BUMPERS. Mr. President, will the Senator yield for a question?

Mr. SYMMS. I am happy to yield to my friend for a question.

Mr. BUMPERS. The Senator has been pointing out that there is $478 million in the maternal and child health care program to do this, to take care of the problem that the Senator from California is trying to take care of.

Mr. SYMMS. That is correct. It is already done in 30 States. I think 20 States do not.

Mr. BUMPERS. Let me make a point for the Senator. If the Senator from California will permit, I will use his time to make this point so the Senator from Idaho is not deprived of his time. The Senator should understand that, first of all, the maternal and child health care program does not deal exclusively with the problem of providing prenatal and neonatal care we are talking about right now. It also covers crippled children clinics. We have had 10 crippled children clinics in my State for years. We have had to cut back. The funds were cut back. This is a great program. The maternal and child health care program also covers the lead-based program and a whole range of other problems that children have. The maternal and child health program is not an exclusive program of prenatal and neonatal care.

I only wish to clarify that for the record.

Mr. SYMMS. I thank the distinguished Senator.

Mr. President, it is too bad that we cannot wave a magic wand and have all these problems disappear.

I say again for my colleagues that this amendment is not a clear-cut case of whether you are for or against precradle to the grave support and health care from the Federal Government.

There is money in the bill, $373 million, another $105 million in the emergency jobs bill, for a total of nearly a half billion dollars.

It may be that is not all for prenatal health care, as the Senator from Arkansas points out, but it is the same constituency that would be receiving it. It is the same people who would be delivering these health services, and there is no reason why there cannot be some spillover.

In addition, there is $1.3 billion in this budget for women and children, for feeding, run by the same agencies that administer the maternal programs. So it is not that we are not making a commitment toward these noble goals that the author of the amendment is striving for.

I think once again I would remind my colleagues that the prosperity and the health care and the delivery of that health care in this country were not developed during a time when the Federal Government was spending in excess of 25 percent of the gross national product at the Federal level, where the Federal Government was making those decisions.

MEDICAID COVERAGE FOR LOW-INCOME PREGNANT WOMEN AND THEIR INFANTS

Mr. BRADLEY. Mr. President, Congress established the medicaid pro-

gram to make sure that no one would be cut off from necessary health care just because they were too poor to afford it. As a budget cutting measure in 1981, at the administration's request Congress restricted access to a number of programs, including aid to families with dependent children, AFDC. Because eligibility for medicaid is tied to eligibility for welfare, this loss of income assistance for 1 million needy resulted in the loss of medicaid benefits unless the States chose to provide coverage. Among those dropped were childless couples and the States were given the option not to cover the first pregnancy since no family technically existed to qualify for benefits. As a result many States have chosen not to provide medicaid coverage to low-income women who were dropped from the welfare rolls.

We have witnessed striking results in a very short period of time. The contributions of cuts in nutrition programs, health care, child care, and community support services have left pregnant women and their infants even more at risk for increased morbidity and mortality. In our cities we are seeing a rise in newborn mortality directly related to inadequate prenatal care. Preventive measures taken during a pregnancy are crucial and directly relate to the well being of the mother and the newborn. Toxemia, anemia, and inadequate nutrition merely add to the risks of pregnancy and can readily be altered through simple prenatal care. The vulnerability of women and their newborn to physical and mental impairment are only heightened by the lack of early prenatal care.

The vast majority of risks associated with low birth weight and its complications can be evaluated in early prenatal visits, and steps can be taken to reduce such risks and increase the probability of a healthy child. Providing care in that early stage of pregnancy is essential.

While it might have seemed logical in 1981 that childless couples did not need prenatal care, in fact it has turned out to be a tragic mistake. It has left women in their first pregnancy without the preventive care that can easily avoid countless human tragedies. Society pays for its errors in cold, hard budget terms and in very human terms. We must correct a very bad mistake.

Mr. President I am pleased to cosponsor the amendment of Senator CRANTSON to increase medicaid funding for this purpose. Just because a poor pregnant woman is not quite poor enough to receive income assistance, she and, more importantly, her newborn should not be denied access to care. We cannot afford the price we pay not to do so.

Mr. SYMMS. I now yield to the distinguished chairman from New Mexico, Senator DOMENICI.

The PRESIDING OFFICER (Mr. RUDMAN). The Senator from New Mexico.

Mr. DOMENICI. Mr. President, parliamentary inquiry. How much time remains on the amendment?

The PRESIDING OFFICER. The proponents have approximately 20 minutes left; the opponents have approximately 14 minutes left.

Mr. DOMENICI. Have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not.

Mr. SYMMS. They have.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. I suggest the absence of a quorum and charge it to the opposition.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, since an agreement is apparently being worked out on the amendment which is pending, and which I offered, on which the yeas and nays had been ordered, I ask unanimous consent that the order for the yeas and nays be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1253, AS MODIFIED

Mr. CRANSTON. Mr. President, I send a substitute amendment to the desk and ask for its immediate consideration. It is a modification.

The PRESIDING OFFICER. The Chair inquires whether the Senator would like to modify his amendment.

Mr. CRANSTON. It is a modification.

The PRESIDING OFFICER. The Senator has the right to modify his amendment. The amendment is so modified.

The amendment, as modified, is as follows:

On page 3, line 13, increase the figure by $49,000,000.

On page 3, line 14, increase the figure by $49,000,000.

On page 3, line 15, increase the figure by $49,000,000.

On page 3, line 19, increase the figure by $49,000,000.

On page 3, line 20, increase the figure by $49,000,000.

On page 3, line 21, increase the figure by $49,000,000.

On page 4, line 1, increase the figure by $49,000,000.

On page 4, line 2, increase the figure by $49,000,000.

On page 4, line 3, increase the figure by $49,000,000.

On page 4, line 7, increase the figure by $49,000,000.

On page 4, line 8, increase the figure by $49,000,000.

On page 4, line 9, increase the figure by $49,000,000.

On page 4, line 14, increase the figure by $49,000,000.

On page 4, line 15, increase the figure by $49,000,000.

On page 4, line 16, increase the figure by $49,000,000.

On page 17, line 8, increase the figure by $49,000,000.

On page 17, line 9, increase the figure by $49,000,000.

On page 17, line 15, increase the figure by $49,000,000.

On page 17, line 16, increase the figure by $49,000,000.

On page 17, line 22, increase the figure by $49,000,000.

On page 17, line 23, increase the figure by $49,000,000.

Mr. DOMENICI. I believe the chairman of the Finance Committee has a colloquy he would like to engage in with the Senator from California.

Mr. DOLE. I would like to say to the Senator from California, as I said in my earlier statement, that this is a matter which should have a higher priority and we are certainly willing to take a look at programs within our jurisdiction, in medicare, in medicaid, and other programs, to see if we can accommodate most of what the distinguished Senator from California would like to do.

As I indicated earlier, this certainly has great merit. We will do the best we can to accommodate the Senator and others who support his view, including this Senator.

Mr. CRANSTON. Mr. President, I appreciate the cooperation of all Senators involved in this, the Senator from Kansas, the Senator from New Mexico, the Senator from New York, the Senator from Arkansas, and others. We have worked out a solution. This add-on of $49 million will provide the Finance Committee the opportunity to enact legislation to close the gaps in medicaid coverage for pregnant women without reducing other programs. That was the purpose of my amendment, to make sure that we could act on the underlying problem. I am satisfied we have reached an agreement to take the steps necessary to do that.

I also thank the Senator from Florida for his assistance and strong support.

Mr. CHILES. Mr. President, I congratulate the Senator from California. I think it is a good solution. I think it does make the point and provides the rationale for doing this. We modified the amendment slightly to include the lower figure of $49 million. The chairman of the Finance Committee is willing to accept this amount as an add back under medicaid so the Finance Committee can consider additional medicaid coverage for low-income pregnant women.

As Senator DOLE pointed out earlier, we had already voted additional funds for health insurance for the unemployed, which had been assigned to the Finance Committee. We do not have a final bill yet for either of these purposes. I think this agreement means that the Finance Committee will be in a position to adequately consider additional medicaid coverage for prenatal care as well as other programs.

I think it is important what the Senator from California has done that and I think this amendment takes care of that problem.

Mr. DOLE. I think I am in total agreement with these statements. The only point I raise is that we are, of course, going through all the programs that we have jurisdiction over. If, in fact, we find that there can be reductions without adversely impacting certain areas, we have that option. We are going to try to accommodate the distinguished Senator from California. We do have some money. We do have the provision for health care coverage for the unemployed. We feel there is enough flexibility to accommodate what he desires.

Mr. CRANSTON. I thank all Senators.

Mr. DOMENICI. Mr. President, I do want to say I was pleased when I returned to the floor to work with the Senators. I thank all those who participated today. I think this is a good solution to the problem raised by the distinguished Senator from California.

I yield back the remainder of my time on the amendment.

Mr. CRANSTON. I yield back any time I have left.

The PRESIDING OFFICER. All the time has been yielded back.

The question is on agreeing to the amendment.

The amendment (No. 1253), as modified, was agreed to.

Mr. DOMENICI. I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I might say to the Senate that we thought we were going to have another amendment with reference to the EDA and Appalachia. There had been a combined amendment that was being considered on that side of the aisle. I understand from the sponsors that they are not ready; therefore, their amendment will have to be redone to take into consideration some changes that they want to make. That cannot be ready tonight because of the complexity, so we shall not have any further amendments this evening.

The distinguished Senator (Mr. STEVENS), who will be the acting majority leader this evening, will close the Senate. I understand he will be here shortly. For the purpose of waiting for him, I suggest the absence of a quorum and ask that it be charged to my time on the resolution.

The PRESIDING OFFICER. Without objection, the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BRADLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. Mr. President, I have a question for the chairman of the Budget Committee. As he is probably aware, Senator PACKWOOD and I introduced a home care bill, entitled "Senior Citizens Independent Community Care Act." This measure has an effective date of January 1, 1984.

This bill is designed to assist medicare patients age 65 or older to avoid placement in a nursing home unless it is absolutely necessary. People eligible under this bill would receive all medicare part A and B services as well as homemaker, adult day care, respite care, individual assessment and treatment plan, and service coordination. To participate, individuals must demonstrate unmet needs for the service provided and a prescribed level of disability defined in the bill. The payment mechanism would be in the form of a capitation payment to a provider such as an HMO for all services rendered.

The program would allow the Secretary of Health and Human Services to initiate the program in four States in order to assess the appropriate payment mechanism and to determine how this program could be implemented nationwide after 4 years. We estimate that the cost will be approximately $30 million for the new service provisions in fiscal year 1984.

Is there $30 million in the budget resolution in 1984 to accommodate the expected costs of this bill?

Mr. DOMENICI. The Senator's legislation could be accommodated, given his estimate of $30 million.

Mr. BRADLEY. Will those funds be crosswalked to the Finance Committee for the medicare function and used for this program?

Mr. DOMENICI. Yes; funding is assumed in the medicare account.

Mr. CHILES. Demonstration projects to test the feasibility of a coordinated program of home and community care as an alternative to institutional care are very appropriate and needed.

The direction proposed by Senator BRADLEY is one that I have long supported, and I note that the Appropriations Committee has encouraged the Department to enter into similar demonstration projects in the past. I hope we can continue to encourage these efforts.

Mr. BRADLEY. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged to the time of the chairman on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE EXECUTIVE CALENDAR

Mr. STEVENS. Mr. President, may I inquire of my good and patient friend whether it is possible we might go into executive session at this time in order to consider the nominations on the Executive Calendar commencing with Calendar Order No. 137 through the nominations on pages 5, 6, 7, 8, 9, and also the nominations on the Secretary's desk on page 11.

Mr. BYRD. Mr. President, reserving the right to object, would the Senate not charge this time against anybody on the resolution?

Mr. STEVENS. Does the Senator mean the time now?

Mr. BYRD. Yes.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session for the purpose of considering the nominations commencing on page 4.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. So the time then would not be running against the budget resolution?

Mr. STEVENS. Yes.

Mr. BYRD. Mr. President, may I say to the distinguished Senator that on this side of the aisle all nominations on page 2 have been cleared, all nominations on page 3 have been cleared, except the one at the bottom in the Department of Justice, all nominations on page 4, all nominations on page 5, all nominations on pages 6, 7, 8, 9, and 11, but not the nomination on page 10.

Mr. STEVENS. I thank the Senator. As a matter of fact, I think that that would mean, Mr. President, that we might be able to clear one additional nomination.

Mr. President, I ask unanimous consent that the nomination on the bottom of page 2, Calendar No. 101, the nomination for the promotion in the Army and the nominations commencing with Calendar Order No. 137 through 155 and the nominations on the Secretary's desk be considered and confirmed en bloc.

Mr. BYRD. No objection.

The PRESIDING OFFICER. Without objection, the nominees are considered en bloc and confirmed en bloc.

The nominations considered and confirmed en bloc are as follows:

IN THE ARMY

The following-named officer, under the provisions of title 10, United States Code, Section 3034, to be Chief of Staff, U.S. Army:

To be Chief of Staff, U.S. Army

Gen. John A. Wickham, Jr., 092-20-1086, U.S. Army.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Kenneth L. Peek, Jr., 314-30-4967FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601.

To be lieutenant general

Lt. Gen. Winfield W. Scott, Jr., 230-24-1597FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen John L. Pickitt, 451-44-6719FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert E. Kelley, 049-24-0301FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert W. Bazley, 188-18-6278FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Carl H. Cathey, Jr., 244-36-7303FR. U.S. Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Hans H. Driessnack, 064-22-2830FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Harry A. Griffith, 113-18-4835. (Age 58), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Arthur E. Brown, Jr., 424-24-4091, U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Robert J. Lunn, 361-14-7936, (Age 55), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert L. Moore, 223-40-5576, U.S. Army.

The following officers for appointment as Reserve commissioned officers in the Adjutant Generals Corps, Army National Guard of the United States, Reserve of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3392:

To be major general

Brig. Gen. Donald E. Edwards, 008-26-2639, Army National Guard of the United States.

To be brigadier general

Col. Raymond R. Galloway, 298-18-1011, Army National Guard of the United States.

Col. William A. Hornsby, 417-32-3908, Army National Guard of the United States.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John R. Galvin, 005-28-5597, U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. Lando W. Zech, Jr., 536-16-2620/1110, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601 to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. William P. Lawrence, 410-44-3904/1310, U.S. Navy.

The following-named officer under the provisions of title 10, United States Code, section 5141, for appointment as Chief of Naval Personnel for a term of four years:

To be chief of naval personnel

Vice Adm. William P. Lawrence, 410-44-3904/1310, U.S. Navy.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. Robert R. Monroe, 409-38-6086/1110, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. William J. Cowhill, 331-20-9875/1120, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Carol C. Smith, Jr., 418-30-4646/1310, U.S. Navy.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. D'Wayne Gray, 462-38-7595, U.S. Marine Corps.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE, MARINE CORPS, NAVY

Air Force nominations beginning William P. Abraham, and ending Jane B. Ward, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

Air Force nominations beginning Ray S. Adkins, and ending John B. Wissler, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

Marine Corps nominations beginning Richard M. Ahlers, and ending Kenneth W. Zitz, which nominations were received by

the Senate and appeared in the CONGRESSIONAL RECORD of April 18, 1983.

Navy nominations beginning Brandon O. Clarke, and ending Mark C. Wilson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 15, 1983.

Navy nominations beginning James William Arvin, and ending William John Zuchero, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 18, 1983.

Navy nominations beginning Thomas N. Cheamitru, and ending Joseph J. Tepas, III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask that the President be immediately notified.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-140. A resolution adopted by the House of Representatives of the State of Washington; to the Committee on Armed Services:

"RESOLUTION No. 83-60

"Whereas, our state and nation were founded on the tradition of brave men and women sacrificing their freedom and even their lives to protect the freedom of others; and

"Whereas, the country has grown great due to the unselfish commitment of its citizens to defending the right of freedom; and

"Whereas, Llewellyn M. Chilson, holding the rank of sergeant during World War II, distinguished himself in the European war theater through his valor and heroism; and

"Whereas, Llewellyn M. Chilson was the second most decorated United States soldier in the second world war; and

"Whereas, Llewellyn M. Chilson, in December, 1946, was decorated by President Harry S. Truman with seven medals, the largest number of awards given to a soldier at the same time; and

"Whereas, Llewellyn M. Chilson exemplified the qualities both in combat and in civilian life which are an integral part of our great nation;

"Now therefore, *Be it resolved*, By the members of the House of Representatives, That the Congress of the United States is requested to posthumously bestow on Master Sergeant Llewellyn M. Chilson the Congressional Medal of Honor; and

"Be it further resolved, That a copy of this resolution be sent to the President of the United States Senate, the Speaker of the United States House of Representatives, and the members of the congressional delegation from the state of Washington."

POM-141. A joint resolution adopted by the General Assembly of the State of North Carolina; to the Committee on Banking, Housing, and Urban Affairs:

"HOUSE JOINT RESOLUTION 279

"Whereas, the Federal Government has, through actions and expressed intentions, begun to transfer to the state governments the responsibility for many of its housing programs; and

"Whereas, funding for these programs has never fully supported existing needs; and

"Whereas, the existing funding levels are in jeopardy of diminishing as the programs are being transferred to state control: Now, therefore, be it resolved by the House of Representatives, the Senate concurring:

"Section 1. The North Carolina General Assembly requests that the delegation to the United States Senate and the House of Representatives from North Carolina use every available means to assure that the level of federal funding provided to North Carolina is adequate to meet the State's housing needs, while supporting increased State authority and responsibility for housing.

"Sec. 2. The Secretary of State shall send a certified copy of this resolution to each member of the United States Senate and the United States House of Representatives representing North Carolina, and to the Secretary of the United States Senate and the Clerk of the United States House of Representatives.

"Sec. 3. This resolution is effective upon ratification."

POM-142. A resolution adopted by the San Diego County Federation of Republican Women's Clubs urging Congress to reject any and all applications for funds to the International Monetary Fund to bail out the banks, and to insist that the banks pay for their own mistakes; to the Committee on Banking, Housing, and Urban Affairs.

POM-143. A resolution adopted by the San Diego County Federation of Women's Clubs urging Congress to look elsewhere for budget cuts and to take advantage of the present market situation to step up the stockpiling of our crucial oil reserves; to the Committee on Energy and Natural Resources.

POM-144. A concurrent resolution adopted by the House of Representatives of the State of Arkansas; to the Committee on Energy and Natural Resources:

"HOUSE CONCURRENT RESOLUTION 5

"Whereas, the United States and its various departments and agencies own millions of acres of land located in the various states; and

"Whereas, although in some cases the minerals underlying such lands are extremely valuable, many mineral leases on such lands are granted each year for one dollar per acre or some other nominal fee, while only a small number of such leases are awarded on the basis of competitive sealed bids; and

"Whereas, the United States Government and the various states are in urgent need of additional funds to provide essential services of government and the award of mineral leases on federal lands on competitive sealed bids would produce a substantial amount of revenues; and

"Whereas, good business practices, fairness and equity dictate that all mineral leases on federal-owned lands be awarded to the highest responsible bidder based on competitive sealed bids: Now, therefore, be it

"Resolved by the House of Representatives of the Seventy-Fourth General Assembly of the State of Arkansas, the Senate concurring herein, That the Arkansas General Assembly hereby respectfully urges the Congress of the United States to enact appropriate legislation to require that all mineral leases on federal-owned lands be awarded to the highest responsible bidder based on competitive sealed bids; Be it further

"Resolved, That the General Assembly hereby urges the Arkansas Congressional Delegation to sponsor and support such legislation; Be it further

"Resolved, That upon adoption of this Resolution, a copy shall be transmitted to the presiding officer of the U.S. Senate and the U.S. House of Representatives and to each member of the Arkansas Congressional Delegation."

POM-145. A resolution adopted by the Board of Directors of the Ocala Board of Realtors, Inc. urging Congress to take necessary steps to deactivate the Cross-Florida Barge Canal and to return the property previously condemned for the Barge Canal to the individuals and their heirs who were the previous owners of said land upon reimbursement to the proper governmental authority of the monies previously paid by the government for such lands; to the Committee on Environment and Public Works.

POM-146. A concurrent resolution adopted by the Legislative Assembly of the State of North Dakota; to the Committee on Finance:

"HOUSE CONCURRENT RESOLUTION No. 3099

"Whereas, many North Dakota residents are currently engaged in railroad employment or have been engaged in such employment in the past and look to the railroad retirement system to provide benefits when they retire; and

"Whereas, many North Dakota residents are currently receiving benefits under the railroad retirement system and rely on those benefits to a large extent to meet their normal costs of living; and

"Whereas, any reduction in the amount of benefits received by beneficiaries under the railroad retirement system would have a drastic effect on the ability of these beneficiaries to meet their living expenses; and

"Whereas, projections of the financial condition of the railroad retirement system now show that unless corrective action is taken, monthly annuities will have to be reduced significantly beginning with the annuities to be sent out on October 1, 1983, with additional reductions probably required in the future; and

"Whereas, H.R. 1646, the Railroad Retirement Solvency Act of 1983, was introduced in the United States House of Representatives on February 24, 1983; and

"Whereas, H.R. 1646 would resolve the short-term and long-term financial problems of the railroad retirement system, through an even-handed approach of tax increases on railroad employers and employees and the adjustment of benefits to current and future beneficiaries, thereby preserving and protecting the rights and expectations of those currently receiving benefits and those who would receive those benefits in the future: Now, therefore, be it

"Resolved by the House of Representatives of the State of North Dakota, the Senate concurring therein, That members of the United States Congress are urged to actively support and vote favorably on H.R. 1646, the Railroad Retirement Solvency Act of 1983; and Be it further

Resolved, That copies of this resolution be presented to the Speaker and Clerk of the United States House of Representatives, the President and Secretary of the United States Senate, and to each member of the North Dakota Congressional Delegation."

POM-147. A resolution adopted by the House of Representatives of the State of Arizona; to the Committee on Foreign Relations:

"HOUSE MEMORIAL 2003

"Whereas, there are currently two thousand four hundred ninety-four Americans still missing and otherwise unaccounted for in Southeast Asia; and

"Whereas, the United States government has collected and analyzed information which clearly establishes that the governments of Indochina possess information regarding American prisoners of war (POW) and Americans missing in action (MIA); and

"Whereas, the defense intelligence agency is currently investigating more than four hundred sixty firsthand, live sighting reports of Americans in Southeast Asia, based on the assumption that at least some may still be held captive; and

"Whereas, the United States government obtained and substantiated information that the Socialist Republic of Vietnam has in its possession the remains of at least four hundred American personnel who were killed as the result of hostilities in Southeast Asia; and

"Whereas, the families of those American servicemen and civilians missing in Southeast Asia have suffered untold grief and uncertainty because the governments of Indochina have failed to provide an adequate accounting of those missing; and

"Whereas, the State of Arizona has an enduring interest in the welfare of Americans listed as missing or otherwise unaccounted for in Southeast Asia.

"Wherefore your memorialist, the House of Representatives of the State of Arizona prays:

"1. That the President and the Congress of the United States take all steps necessary, including calling upon the Socialist Republic of Vietnam and the Lao Peoples Democratic Republic, to end the years of uncertainty for American POW/MIA families by releasing all American prisoners still held, providing all information concerning the fate of American servicemen and civilians still missing and repatriating all American remains which are now in their possession or may subsequently be found.

"2. That the Secretary of State of the State of Arizona transmit copies of this Memorial to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives of the United States and to each Member of the Arizona Congressional Delegation."

POM-148. A resolution adopted by the House of Representatives of the Third Northern Marianas Commonwealth Legislature; to the Committee on Foreign Relations:

"H. RES. No. 128

"Whereas, the greatest challenge facing the earth is to prevent the occurrence of nuclear war by accident or design; and

"Whereas, the nuclear arms race is dangerously increasing the risk of a holocaust that would be humanity's final war; and

"Whereas, a freeze followed by a reduction in nuclear warheads, missiles, and other delivery systems is needed to halt the nuclear arms race and to reduce the risk of nuclear war: Now, therefore, be it

"Resolved by the House of Representatives of the Third Northern Marianas Commonwealth Legislature, Third Regular Session, 1983, That (1) as an immediate strategic arms control objective, the United States and the Soviet Union should: (a) pursue a complete halt to the nuclear arms race; (b) decide when and how to achieve a mutual and verifiable freeze on the testing, production, and further deployment of nuclear warheads, missiles, and other delivery systems; and (c) give special attention to destabilizing weapons whose deployment would make such a freeze more difficult to achieve, (2) proceeding from this freeze, the United States and the Soviet Union should pursue major mutual and verifiable reductions in nuclear warheads, missiles, and other delivery systems, through annual percentages or equally effective means, in a manner that enhances stability; and be it further

"Resolved, That the Speaker of the House of Representatives shall certify and the House Clerk shall attest to the adoption of this resolution and transmit copies of this resolution to the President of the U.S. Senate and Speaker of the U.S. House of Representatives; the Honorable Ronald Reagan, President of the United States of America; the Honorable Pedro P. Tenorio, Governor of the Commonwealth of the Northern Mariana Islands; to the Representative to the United States Edward Dlg. Pangelinan; and to his Holiness Pope John Paul II."

POM-149. A petition from a citizen of Middletown, Connecticut urging Congress to adopt an amendment to the Constitution concerning International Zionism and Jewry; to the Committee on the Judiciary.

POM-150. A resolution adopted by the General Council of the Assemblies of God commending the President and Congress for their action in proclaiming 1983 the year of the Bible; to the Committee on the Judiciary.

POM-151. A petition from a citizen of Fontana, California urging Congress to impeach two federal judges; to the Committee on the Judiciary.

POM-152. A resolution adopted by the International Association of Machinists and Aerospace Workers urging Qantas Airways to enter immediately into meaningful negotiations that will restore discharged former Qantas' employees who are citizens of California to their jobs; to the Committee on Labor and Human Resources.

POM-153. A resolution adopted by the American Personnel and Guidance Association opposing sex discrimination in education and insisting upon enforcement of Title IX in concurrence with the law; to the Committee on Labor and Human Resources.

POM-154. A petition from a citizen of Los Angeles, California urging Congress to reject "the Gay Bill of Rights" and reaffirm traditional God given morality; to the Committee on Labor and Human Resources.

POM-155. A resolution adopted by the Legislature of the Territory of Guam; ordered to lie on the table:

"RESOLUTION No. 123

"Whereas, Congressman Phillip Burton, Democratic Representative of San Francisco was born on June 1, 1926 and passed away on April 10, 1983; and

"Whereas, the Honorable Phillip Burton was a person who rightly deserves to be honored by the people of Guam; and

"Whereas, Congressman Burton has faithfully served the people of the United States of America since February 1964, as a member of the House of Representatives; and

"Whereas, Congressman Burton was chosen by his colleagues in the House of Representatives to chair the Subcommittee on Territories and Insular Affairs in 1971; and

"Whereas, Congressman Burton won approval of a new national park at Honokohau, Hawaii; and

"Whereas, Congressman Burton saw to it that his territories chairmanship was passed on to Delegate A. B. Won Pat on Guam—the first non-voting territorial delegate ever to chair a House subcommittee; and

"Whereas, Congressman Burton has supported major Federal legislation towards the political and economic development of Guam, including: an act providing for an elected Governorship; an act providing for a non-voting delegate to Congress; an act appropriating funds for the repayment of Guam's rehabilitation debt; an act authorizing Guam to write its own constitution; an act creating the War in the Pacific Park; was instrumental in continuing the operation of the Ship Repair Facility in Guam; and an act authorizing a review of lands claims in Guam; and

"Whereas, Congressman Burton has supported legislation to the benefit of the Northern Marianas, including the reunification of the Marianas, increase in the annual appropriations for the territories and various omnibus bills benefitting the territories; and

"Whereas, Congressman Burton also talked Guam Officials into keeping the Medical Center of the Marianas open after helping obtain a Federal grant; and

"Whereas, the United States Territories of the Pacific, located several thousand miles from the seat of government in Washington, D.C., have needed a loyal spokesman in Congress to support their cause; someone who took an active interest in the promotion of their social, economic, and political development; and

"Whereas, through a period of nearly two (2) decades, Congressman Phillip Burton has served as a spokesman for the people of Guam in Washington, D.C., and has been recognized as a champion of Human Rights; and

"Whereas, the University of Guam gave Congressman Burton an honorary doctor-of-law degree in the May 12, 1978 Commencement exercises; and

"Whereas, no matter how significant these heretofore listed accomplishments may be, they are overshadowed by his devotion to his family and his country: Now, therefore, be it

"Resolved, that the Seventeenth Guam Legislature does extend its condolences and heartfelt sympathy to his wife Sala, daughter Joy, and the Burton family upon the passing of this honorable man whose accom-

plishments have been an inspiration to all of us on this island; and be it further

"*Resolved*, that the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to Mrs. Phillip Burton; to the President of the United States; to the President of the United States Senate; to the Speaker of the United States House of Representatives; to Congressman Antonio B. Won Pat; to the Governor of California; to the Mayor of San Francisco; to the Senators and Representatives from California; and to the Governor of Guam."

POM-156. A joint resolution adopted by the General Assembly of the State of North Carolina; to the Committee on Finance:

"HOUSE JOINT RESOLUTION 280

"Whereas, escalating home prices have resulted in a significant increase in the down payment required to purchase a home; and

"Whereas, the lack of funds for a down payment has reduced the number of persons able to buy a home; and

"Whereas, the reduced volume of home purchases has impeded the improvement of housing and has had a regressive effect upon the economy; and

"Whereas, a tax deduction for money saved for a down payment would make the dream of homeownership a reality for people who would otherwise not be able to purchase a home; and

"Whereas, a greater number of home purchases will spur many sectors of our economy; and

"Whereas, a tax deduction for monies set aside for purchase of a principal residence will also help encourage the philosophy of savings; and

"Whereas, in the 97th Congress, bills such as H.R. 2033, H.R. 3061, H.R. 3785, H.R. 4752, H.R. 5926, and H.R. 7257 were introduced to allow Individual Housing Accounts; Now, therefore, be it resolved by the House of Representatives, the Senate concurring:

"Section 1. The North Carolina General Assembly urges the Congress of the United States to pass legislation allowing a tax deduction to encourage monies to be set aside for the first time purchase of a principal residence.

"Sec. 2. The Secretary of State shall send a certified copy of this resolution to the members of the United States Congress representing North Carolina and to the Clerk of the United States House of Representatives and the Secretary of the United States Senate.

"Sec. 3. This resolution is effective upon ratification."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources, with an amendment in the nature of a substitute:

S. 38. A bill entitled the "Longshoremen's and Harbor Workers' Compensation Act" (Rept. No. 98-81).

By Mr. PERCY, from the Committee on Foreign Relations, without amendment:

S. Res. 90. A resolution expressing the sense of the Senate that the Soviet Government should immediately release Anatoly Shcharansky and allow him to emigrate.

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. Con. Res. 24. A concurrent resolution expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as "Older Americans Month."

EXECUTIVE REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary: Moody R. Tidwell III, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years.

By Mr. PERCY, from the Committee on Foreign Relations: Malcolm R. Barnebey, of Texas, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Belize.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Malcolm R. Barnebey.

Post: Ambassador to Belize.

Contributions, amount, date, and donee.—

1. Self, none.
2. Spouse, $20, 1980, Anderson.
3. Children and spouses names: Mr. and Mrs. M. E. Barnebey, A. A. and W. A. Barnebey, none.
4. Parents names: Mr. and Mrs. W. H. Barnebey, none.
5. Grandparents names: Deceased.
6. Brothers and spouses names: Mr. and Mrs. W. J. Barnebey, none; Mr. and Mrs, L. R. Barnebey, $100, 1979, Reagan.
7. Sisters and spouses names: Dr. and Mrs. F. L. Bond, none.

Arthur Winston Lewis, of the District of Columbia, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Sierra Leone.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Arthur Winston Lewis.

Post: Ambassador to Sierra Leone.

Contributions and amount.—

1. Self: None.
2. Spouse: None.
3. Children and spouses names: None.
4. Parents names: None.
5. Grandparents names: None.
6. Brothers and spouses names: None.
7. Sisters and spouses names: None.

Richard Salisbury Williamson, of Virginia, to be the Representative of the United States of America to the Vienna Office of the United Nations and Deputy Representative of the United States of America to the International Atomic Energy Agency, with the rank of Ambassador.

Contributions are to be reported for the period beginning on the first day of the fourth calendar year preceding the calendar year of the nomination and ending on the date of the nomination.

Nominee: Richard Salisbury Williamson.

Post: Representative of the United States of America to the Vienna Office of the U.N. and Deputy Representative of the United States of America to IAEA, with rank of Ambassador.

Contributions and amount.—

1. Self: None.
2. Spouse: None.
3. Children and spouses names: None.
4. Parents names: None.
5. Grandparents names: None.
6. Brothers and spouses names: None.
7. Sisters and spouses names: None.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. TSONGAS:

S. 1242. A bill for the relief of Makoto Yabe and Yasuko Yabe; to the Committee on the Judiciary.

S. 1243. A bill for the relief of Andrew L. Lui and his wife, Julia Lui; to the Committee on the Judiciary.

By Mr. PACKWOOD (for himself, Mr. BRADLEY, Mr. HEINZ, Mr. MATSUNAGA, Mr. RIEGLE, Mr. MOYNIHAN, Mr. WALLOP, and Mr. COCHRAN):

S. 1244. A bill to amend title XVIII of the Social Security Act to provide for a program of health care for elderly individuals who require long-term care; to the Committee on Finance.

By Mr. THURMOND (for himself, Mr. PERCY, and Mr. JEPSEN):

S. 1245. A bill to amend chapter 157 of title 10, United States Code, to authorize the Secretary of Defense to provide transportation for next of kin of certain persons who are unaccounted for, to attend annual national meetings sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia; to the Committee on Armed Services.

By Mr. INOUYE:

S. 1246. A bill for the relief of Mrs. Wu Chih-Chu Liao and sons, Chung-Chi, Feng-Yi, and Chi-Hung; to the Committee on the Judiciary.

By Mr. HATFIELD (for himself and Mr. PACKWOOD):

S. 1247. A bill entitled the "Beverage Container Reuse and Recycling Act"; to the Committee on Commerce, Science, and Transportation.

By Mr. D'AMATO (for himself, Mrs. HAWKINS, Mr. TOWER, Mr. SPECTER, Mr. MOYNIHAN, and Mr. MURKOWSKI):

S. 1248. A bill to require the Federal Government to reimburse State governments for the cost of imprisoning aliens who commit felonies; to the Committee on the Judiciary.

By Mr. ANDREWS (for himself, Mr. MELCHER, Mr. DECONCINI, Mr. DOMENICI, Mr. INOUYE, Mr. HATFIELD, Mr. NICKLES, and Mr. BINGAMAN):

S. 1249. A bill to add a representative of Indian tribal governments to the membership of the Advisory Commission on Intergovernmental Relations; to the Select Committee on Indian Affairs.

By Mr. SYMMS (for himself, Mr. JEPSEN, Mr. HELMS, Mr. MCCLURE, and Mr. BOREN):

S. 1250. A bill to amend the Internal Revenue Code of 1954 to repeal the estate and gift taxes; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. MCCLURE, Mr. WALLOP, Mr. BOREN, Mr. GRASSLEY, Mr. HELMS, Mr. JEPSEN, and Mr. BENTSEN):

S. 1251. A bill to amend the Internal Revenue Code of 1954 to treat certain interests

as closely held businesses for estate tax purposes, to prevent the acceleration of estate tax installment payments in certain situations, and for other purposes; to the Committee on Finance.

By Mr. SYMMS (for himself, Mr. MCCLURE, Mr. ARMSTRONG, Mr. JEPSEN, Mr. BOREN, Mr. HELMS, Mr. GRASSLEY, Mr. WALLOP, Mr. TOWER, Mr. GARN, Mr. THURMOND, Mr. HEFLIN, Mr. PRYOR, and Mr. MURKOWSKI):

S. 1252. A bill to amend the Internal Revenue Code of 1954 to repeal the tax on generation-skipping transfers; to the Committee on Finance.

By Mr. HART (for himself, Mr. HEINZ, and Mr. CRANSTON):

S. 1253. A bill to authorize negotiations directed toward opening foreign markets to U.S. exports of high technology products and for other purposes; to the Committee on Finance.

By Mr. GORTON (for himself, Mr. JACKSON, and Mr. SYMMS):

S. 1254. A bill to authorize, within available funds, the construction of a bridge approach at Clarkston, Wash.; to the Committee on Environment and Public Works.

By Mr. SPECTER (for himself and Mr. RIEGLE):

S. 1255. A bill to establish the Northeast-Midwest States Federal Hydropower Financing Authority; to the Committee on Energy and Natural Resources.

By Mr. MOYNIHAN (for himself, Mr. EAGLETON, Mr. DANFORTH, Mr. TSONGAS, Mr. JACKSON, Mr. RIEGLE, Mr. LAUTENBERG, and Mr. BRADLEY):

S. 1256. A bill to authorize special assistance for desegregation activities; to the Committee on Labor and Human Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon); as indicated:

By Mr. KASTEN (for himself, Mr. INOUYE, Mr. GARN, Mr. MOYNIHAN, Mr. LUGAR, Mr. BOREN, Mr. DOLE, Mr. RANDOLPH, Mr. HEINZ, Mr. FORD, Mr. GOLDWATER, Mr. DECONCINI, Mr. RUDMAN, Mr. MCCLURE, Mr. DOMENICI, Mr. D'AMATO, Mr. ABDNOR, Mr. WALLOP, Mr. HECHT, and Mr. TRIBLE):

S. Res. 137. Resolution expressing the sense of the Senate that Taiwan should retain full membership in the Asian Development Bank, and that it should not be expelled as a precondition for membership in that body by the People's Republic of China; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PACKWOOD (for himself, Mr. BRADLEY, Mr. HEINZ, Mr. MATSUNAGA, Mr. RIEGLE, Mr. MOYNIHAN, Mr. WALLOP, and Mr. COCHRAN):

S. 1244. A bill to amend title XVIII of the Social Security Act to provide for a program of health care for elderly individuals who require long-term care; to the Committee on Finance.

SENIOR CITIZENS INDEPENDENT COMMUNITY CARE ACT

● Mr. PACKWOOD. Mr. President, today I rise to introduce the Packwood-Bradley-Heinz senior citizens independent community care bill. This legislation is designed to enable seniors, people 65 and over, to receive care in their homes thereby avoiding hospitals and nursing homes unless absolutely necessary.

During the last few years, along with Senators BRADLEY, HEINZ, and others, I have been striving to make programs like medicare and medicaid more effective. Although some changes have been made to the medicare program since 1965, no real attempt has been undertaken to address the issue of noninstitutional long-term care services. Medicare policy has focused almost exclusively on acute short-term care. The home health care benefits now available under medicare provide skilled services in the home rather than health-related social support services for the chronically ill. Services which assist individuals in the activities of daily living are specifically excluded from coverage. But many of our elderly face institutionalization not because of illness, but because functional disabilities do not allow them to cope with the activities of daily living. Until Congress addresses the issue of long-term noninstitutional care in the home and community, we will continue to see more and more elderly people and those with functional limitations—the disabled—placed into hospitals and nursing homes unnecessarily.

This institutionalization occurs for a variety of reasons. But the underlying causes are the unavailability of nonmedical community-based services to sustain these individuals in their homes, and Federal regulations which hamper their ability to receive these services and remain independent.

One example of this is the medicare home health skilled care requirement. Under current law, medicare provides the elderly with home health aid services to assist them with daily activities, only if they also require the services of either a skilled nurse, or a physical, speech or occupational therapist. In other words, today the medicare regulation often forces the patient to receive services they may not need in order to receive the ones they do need.

However, Mr. President, this is only one of a number of problems with the current medicare home care program. The bill we are introducing today is designed to eliminate these kinds of problems, and assess the most effective way of delivering community-based services to seniors who do not need to be placed in institutions but need some care.

Before I describe the components of the Packwood-Bradley-Heinz senior citizens independent community care bill, I think it is important to take a careful look at the aging of the U.S. population. According to a recent report prepared by the Senate Select Committee on Aging, the elderly population is expected to grow in the next few years in the following ways:

First, by 2050, 12 percent of the total population will be 75 and older, and more than 5 percent of the population will be age 85 and older.

Second, the number of individuals age 85 and up is expected to more than double to 6.8 million, or 2.4 percent of the population, by the year 2000. This number of octogenarians increased 165 percent between 1960 and 1982.

Third, finally, while individuals 65 and over now represent more than 11 percent of the population, by the year 2025 this age group will comprise 19 percent of the total population.

These statistics are important because they demonstrate how rapidly our population is aging, and particularly how many more people are going to live to be 65, 75, or 85 and older. Moreover, the one thing current research has told us is that once an individual reaches age 65, their chances are one in four of entering a nursing home. This increases to one in two at age 85. Therefore, if the population projections are correct, we face the grave possibility of thousands more seniors being placed in nursing homes or other institutions unless Congress moves quickly to provide alternatives. The Packwood-Bradley-Heinz bill is one such alternative. It helps us move one important step forward—and stops Congress from helping move this country two giant steps backward by not acting to address the need.

Mr. President, I ask unanimous consent that a copy of the bill and a summary of the bill be added at the end of my statement. I further ask that Senators MATSUNAGA, RIEGLE, MOYNIHAN, WALLOP, and COCHRAN be added as sponsors, and that a statement of Senator HEINZ in support of the bill be added following my statement.

There being no objection, the bill and summary were ordered to be printed in the RECORD, as follows:

S. 1244

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Senior Citizens Independent Community Care Act".

ESTABLISHMENT OF PROGRAM

SEC. 2. Title XVIII of the Social Security Act is amended by adding at the end thereof the following new part:

"PART D—LONG-TERM CARE PROGRAM

"ESTABLISHMENT OF PROGRAM

"SEC. 1890. (a)(1) Any State which is willing and able to do so may establish a statewide prepaid capitation program for provid-

ing acute and long-term care services for individuals aged 65 or older who require long-term care by reason of impairments which restrict daily living activities.

"(2) During the first four fiscal years in which this part is in effect, the Secretary shall limit the number of States which may establish such a program under paragraph (1) to four. The four States shall be selected by the Secretary, and shall include urban and rural areas which are representative of urban and rural areas throughout the United States.

"(3) Beginning with the fifth fiscal year in which this part is in effect, the Secretary may limit the number of additional States which may establish a program under paragraph (1) as may be necessary to insure that the establishment of such additional programs will not require payments from the Federal Hospital Insurance Trust Fund in excess of the amounts available in such Trust Fund.

"(b) It is the purpose of this part—

"(1) to ensure that individuals aged 65 or older, who have been determined to be in need of long-term care services, are assisted in remaining in their own homes or communities, and therefore avoid unnecessary placement of such individuals in institutional facilities, and, where possible, to allow individuals in such facilities to return to their communities;

"(2) to assess a prepaid capitation method of reimbursement in order to determine whether such method is a cost-effective and efficient way of providing the services available under this title;

"(3) to assess the impact of the services provided under this part in aiding families in caring for individuals eligible for benefits under this title, and, to the extent possible, to determine if the provision of such services has encouraged such families to continue care for such individuals at home, rather than in institutional facilities;

"(4) to assess how public and private programs serving the elderly can be coordinated to provide necessary support services;

"(5) to assess the effectiveness of implementing a system whereby a separate public or private sector entity would—

"(A) be solely responsible for the screening and assessment of all eligible individuals before they receive long-term care, to make sure that such care is needed;

"(B) have the responsibility of screening all individuals aged 65 or older, who are entitled to benefits under this title, prior to their entering skilled nursing facilities to make sure such institutional care is necessary, and that community-based care would not be more appropriate and cost-effective; and

"(C) collect data with respect to home health care as a cost-effective alternative to institutional care; and

"(6) to determine the demand for long-term home care provided under this part.

"SCOPE OF BENEFITS

"SEC. 1891. (a) Each eligible individual (as determined under section 1892) shall be entitled to the following benefits:

"(1) All services to which such individual would be entitled, or would be entitled to payment for, under part A and part B of this title.

"(2) Homemaker-home health aide services.

"(3) Adult day services.

"(4) Respite care services for up to 14 days, or 336 hours, in any calendar year.

"(5) Service coordination.

"(6) Preadmission screening and assessment.

"(7) Intermediate care facility services for up to 20 days in any calendar year, but the number of days of extended care services to which an individual would otherwise be entitled under this title for any spell of illness shall be reduced by the number of days of intermediate care facility services provided to such individual under this part during such spell of illness.

"(8) Other services which the Secretary determines may be of value to elderly individuals.

"(b) Services provided under this part shall be in lieu of any payments or services to which an individual would otherwise be entitled under part A or part B, or under any other program funded in whole or in part by Federal funds.

"(c) For purposes of this part:

"(1) Payment may be made for home health services without regard to the conditions (set forth in section 1814(a)(2)(D)) that the individual is or was confined to his home and needs or needed skilled nursing care or physical, speech, or occupational therapy.

"(2) Payment may be made for extended care services without regard to the condition (set forth in section 1812(a)(2)) that such services be post-hospital.

"(3)(A) The term "homemaker-home health aide services" means services provided by a homemaker-home health aide (as defined in subparagraph (B)) to an individual who would require institutionalization but for the provision of such services, which are designed to maintain or increase the personal care of such individual and his home (not including the structure of the home) in a manner which promotes the functional independence of the individual and to avoid the need for institutionalization. Such services shall include—

"(i) personal care services designed to assist such individual in the activities of daily living such as bathing, exercising, personal grooming, and getting in and out of bed; and

"(ii) household care services such as maintaining a safe living environment, light housekeeping, and ensuring good nutrition (including the purchase and preparation of food).

"(B) The term "homemaker-home health aide" means an individual who—

"(i)(I) has successfully completed a training program which extends for at least 40 hours, and consists of classroom instruction and at least 20 hours (in the aggregate) of supervised clinical instruction, and which is directed toward preparing students to deliver home health services; or

"(II) has demonstrated, pursuant to regulations promulgated by the Secretary, an equivalent amount of training by work experience, or through testing, licensure, or other means; and

"(ii) is under the supervision of a registered nurse or licensed practical nurse, or, in the case of a homemaker-home health aide providing services to an individual patient who is in need of physical, speech, or occupational therapy, is under the supervision of the qualified therapist who is providing such services to the individual patient.

"(4) The term 'adult day services' means services provided (other than care provided for the primary objective of providing medical services) on a regular basis, but less than 24 hours per day, in a multipurpose senior center or any other facility which meets guidelines specified by, and is approved by, the State, which are provided to an individual who is in need of social, training, or developmental activities during the daytime hours but does not require institutionalization, and which are provided for the purpose of assisting such individual to maintain a maximum level of independence. Such services may include (but are not limited to) provision of health care, recreation and educational activities, physical and vocational rehabilitation, and social, developmental, or independent living services.

"(5) The term 'respite care services' means services for an individual who is unable to care for himself on a full-time basis, which are provided on a temporary basis to such individual to provide relief for the person who normally cares for such individual. Such services shall be provided by persons who have met specific training guidelines specified by the Secretary, and who are employed by an agency or organization which meets guidelines specified by the State for agencies which provide services described in the preceding sentence. Such services shall, when necessary and appropriate, be provided in addition to other services under this part to ensure that such individual receives a coordinated system of services designed to help that individual reach a maximum level of independence and to lessen such individual's dependence upon the individual who normally cares for him.

"(6) The term 'service coordination' means services, provided to an individual who has a developmental or other disability, which will assist such individual in gaining access to necessary social, medical, health, educational, and other services, including—

"(A) follow-along services which insure, through a continuing relationship between an agency or provider and such individual and the individual's family or guardian, that the changing needs of such individual and family relating to such disability are recognized and appropriately met; and

"(B) services which provide support to such individual, access to and coordination with appropriate service providers, information relating to available programs and services, and monitoring of such individual's progress.

"(7) The term 'intermediate care facility services' has the same meaning as in section 1905(d) of this Act.

"ELIGIBILITY FOR BENEFITS

"SEC. 1892. (a) An eligible individual for purposes of this part is any individual who—

"(1) is entitled to benefits under part A and is enrolled under part B;

"(2) has attained age 65;

"(3) resides in a State in which a program under this part is in effect;

"(4) agrees to participate in the program established by the State under this part;

"(5) is not in an institution (but certification of eligibility, to begin on the date of discharge, may be made with respect to an individual who is in an institution but will be discharged within 90 days, as certified by a PAT);

"(6) is certified by a PAT to have an unmet need (for a period of at least six months) for two or more of the following services:

"(A) preparation of meals,

"(B) housework or shopping assistance,

"(C) administration of medication,

"(D) medical treatment at home, or

"(E) personal care; and

"(7) has a physical or mental impairment or combination of impairments which results in at least—

"(A) two moderate impairments of activities of daily living, as determined under subsection (b)(1), or

"(B) three severe impairments of instrumental activities of daily living, as determined under subsection (b)(2), or

"(C) one severe impairment of activities of daily living as determined under subsection (b)(1), and two severe impairments of instrumental activities of daily living as determined under subsection (b)(2).

"(b)(1) For purposes of this section, severe or moderate impairments of activities of daily living shall be determined in accordance with the following table:

Activity	Severe impairment	Moderate impairment
Eating	Unable to eat, or must be fed	Requires other human assistance.
Bed or chair transfer	Must be lifted	Requires other human assistance.
Dressing	Must be dressed	Requires other human assistance, other than shoe tying or grooming.
Bathing	Must be bathed in bed, or requires assistance in washing more than back, feet, or hair.	Requires other human assistance, other than supervision if institutionalized.
Toilet	Does not use toilet	Requires human assistance.
Continence	Incontinent at least once per week, or requires human assistance with equipment.	Requires equipment with self-care.

"(2) For purposes of this section, a severe impairment of an instrumental activity of daily living means any one of the following impairments:

"(A) inability to prepare a light meal,

"(B) inability to perform light work,

"(C) inability to shop for groceries with a companion,

"(D) inability to take premeasured medication,

"(E) inability to manage money for routine purchases, and

"(F) inability to answer a telephone and to dial a telephone for assistance.

"(c) Certification of eligibility under this section shall be made by the State, and a recertification shall be made on an annual basis.

"(d) In the case of an individual who is determined to be an eligible individual, and is subsequently determined to be in need of extended care services in a skilled nursing facility or intermediate care facility services, after the twentieth day of such services the individual shall cease to be an eligible individual under this part until such time as the individual is recertified to be an eligible individual in accordance with the criteria of subsection (a), and has been discharged from such facility.

"PREADMISSION SCREENING AND ASSESSMENT; SERVICE PROVIDERS

"SEC. 1893. (a)(1) No eligible individual as defined under section 1892 shall be eligible to receive any benefits under this part unless such individual has been screened and assessed in accordance with the provisions of this part, and has a plan of care (as defined in this section) under which the provision of such care or benefits is determined to be appropriate.

"(2) The purpose of such assessment and screening is to provide, through the use of a preadmission assessment and screening team (PAT), an evaluation of each individual's health status, functional capabilities, and, where appropriate, home and family environment, to determine the types and frequency of services required by such individual in order to assure the achievement of the maximum level of independence by such individual.

"(b)(1) The PAT services shall be provided to every eligible individual in cooperation with such individual's personal physician whenever possible, who shall be consulted with and kept informed by the PAT with respect to the plan of care developed for such individual, and with respect to the implementation of such plan. Such screenings and assessments shall be carried out as follows:

"(A) An initial screening shall be performed to determine the need for, and appropriateness of, any acute or long-term care provided for or reimbursed under this part that may be required by the individual at the time of initial referral. In the case of an individual who is hospitalized, the initial screening and preparation of the plan of care may be done by the discharge planning unit of the hospital, if such a unit is available, rather than by the PAT.

"(B) A plan of care shall be prepared for the individual based upon an assessment of the individual's health status and functional capabilities, which shall determine those acute and long-term care services (if any) which are most appropriate for the individual, and the frequency of such services. Any change in the type or frequency of the services provided under the plan must be approved by the PAT.

"(C) The individual's status shall be assessed on an ongoing basis, and the plan of care shall be appropriately updated. An initial review of the plan of care shall be made within 30 days after the initiation of the plan of care, and ongoing assessments shall be made at such times as the PAT determines to be necessary, but not less often than every three months for any individual.

"(D) In developing the plan of care, the PAT shall utilize, when possible and appropriate, services provided by volunteers, to ensure that such volunteer services are continued whenever possible.

"(E) The PAT shall refer the individual to any other appropriate services specifically designated for the elderly and available to such individual in his community, and shall provide for coordination with (but not reimbursement for) community mental health center services provided under the Mental Health Systems Act.

"(2) Such screenings and assessments shall be provided by a preadmission screening and assessment team (PAT) designated under subsection (c) without charge to the individual.

"(3) Such screenings and assessments may be provided in the individual's place of residence whenever possible.

"(c)(1) The Governor of each State having a program under this part shall designate the State agency or agencies which shall administer or supervise the administration of this part in such State, and if more than one agency is so designated, the Governor shall determine the components which each shall administer and shall ensure cooperation among such agencies. Agencies so designated may include the State's department of health (or equivalent agency), a State agency administering any program of medical assistance, the State's department on aging (or equivalent agency), or the State's department for social services.

"(2)(A) Such agency or agencies designated by the Governor under paragraph (1) shall coordinate the designation of entities which shall provide services under this part in as many areas of the State as such agency or agencies, and the Secretary, determine to be necessary. Such entities shall be responsible for establishing the PAT and providing (directly or through arrangements with other individuals or entities) all services under this part. Such entities may include a State agency administering any program of medical assistance, the State's department of social services, an area agency on aging, a hospital, a skilled nursing facility, a local government's department of health, a rural health clinic, a health maintenance organization (HMO), a home health agency, or any similar entity, if such entity meets the requirements of this part for a PAT and for providing all services under this part.

"(B) In the case of any entity designated under subparagraph (A) which is not a certified service provider under this title, a State plan approved under title XIX or XX, the Older Americans Act, or a Federal block grant program, the State shall establish standards (approved by the Secretary) which shall be applicable to such entity for the purpose of insuring financial viability, competence of personnel, and quality of management and health care.

"(C) The State shall carry out quarterly on-site financial audits and quality of care reviews of each entity designated under subparagraph (A), in accordance with a plan established by the State and approved by the Secretary. In the case of an entity which is a service provider under any provision of law described in subparagraph (B), the State shall provide for coordinated audits and reviews.

"(3)(A) The members of a preadmission screening and assessment team (PAT) may be full- or part-time employees of the entity establishing the PAT or may operate under contractual arrangements with the entity which will ensure the availability of appropriate personnel to conduct the required screenings and assessments.

"(B) The Secretary shall determine the compositions of the PAT in order to assess the effectiveness of different compositions. Each PAT shall consist of at least—

"(i) a physician (who may be the individual's personal physician or, if the individual has no personal physician or if such personal physician is unable or unwilling to participate in the PAT, shall be a physician designated by the entity establishing the PAT), a registered nurse or nurse practitioner, or a physician assistant, and

"(ii) a social services worker.

"(4) Each entity providing services under this part within a State shall collect data with respect to individuals receiving such services utilizing a statewide uniform assessment instrument. Each State shall determine the type of uniform instrument it will use, but such instrument must be approved by the Secretary.

"(5) The PAT shall collect relevant data at the time of such assessments and screenings with respect to individuals' functional ability at the start of care and functional ability after care, and, to the extent possible, with respect to the extent and time of involvement by family and friends in the case of such individual. Such data shall remain confidential and shall be used to make comparisons with respect to the average number of visits required, the average cost per visit, the average cost per individual, and other information deemed appropriate in assessing the economy and efficiency of various methods of providing long-term care.

"(d) The Secretary shall reimburse any State for the reasonable costs incurred by such State in carrying out its duties under this part.

"(e) If a State fails to carry out its duties under this part, the Secretary shall assume such duties and shall designate preadmission screening and assessment teams in such State.

"PAYMENT OF BENEFITS

"SEC. 1894. (a) The Secretary shall pay a fixed per capita fee to each entity, designated under section 1893(c)(2)(A), providing (directly or through arrangements with others) services for which payment may be made under this part, on behalf of each eligible individual which such entity agrees to provide services to under the program. The amount of such per capita fees shall be developed jointly by the Secretary and the appropriate State agencies as determined by the Governor, but may not exceed (on a monthly basis) an amount equal to 60 percent of the average monthly rate in such State for services provided in free-standing skilled nursing facilities. Such fee amounts shall reflect urban and rural differentials and shall be adjusted annually to reflect changes in costs. Proposed fee amounts shall be submitted to each unit of general purpose local government to allow providers and other persons providing such services in such area 30 days for comment. Such proposals shall be accompanied by an explanation of how the amounts were determined. The State shall issue final fee amounts within 60 days after reviewing and evaluating public comment received with respect to such amounts after they have been approved by the Secretary.

"(b) No payment shall be made to any entity under this part unless there has been furnished such information as may be necessary in order to determine the amounts due such entity under this part for the period with respect to which the amounts are being paid, or for any prior period.

"(c) No payment may be made under this part with respect to any individual unless the services provided to such individual are approved by a preadmission screening and assessment team in accordance with section 1893.

"(d) No payment shall be made to any entity under this part unless such entity agrees that the amount paid under this part and the copayments required under section 1895 shall be the full charge for services rendered under this part, and that the eligible individual shall not be required to make any payment to such entity for such service in excess of such copayments.

"(e) The entity shall retain any amounts paid under this section and section 1895 which may exceed amounts expended for services provided to individuals under this part.

"COPAYMENTS BY ELIGIBLE INDIVIDUALS

"SEC. 1895. (a) An individual receiving services under this part which are otherwise covered services under part A or part B shall pay to the entity providing such services a copayment equal to the amount which such individual would be required to pay under part A or part B for the same services.

"(b) An individual receiving homemaker-home health aide services, adult day services, respite care services, or other services referred to in section 1891(a)(6), shall pay to the entity providing such services a copayment amount equal to 20 percent of the reasonable charge for such services (as determined by the Secretary).

"(c)(1) No eligible individual shall be required to make copayments under subsection (b) in any calendar year which are in excess of the applicable percent of his income for the preceding calendar year as determined under the following table:

"Income:	*Applicable percent*
$0 to $3,500	0
$3,501 to $5,000	1
$5,001 to $8,500	2
$8,501 to $10,000	3
$10,001 to $15,000	4
$15,001 to $20,000	5
$20,001 to $30,000	6
$30,001 to $40,000	7
$40,001 or over	8

"(2) The amount (if any) by which the copayments allowed pursuant to subsection (a) exceed the copayments allowed to be paid by the eligible individual by reason of paragraph (1) of this subsection shall be borne by the entity providing the services.

"(3) For purposes of this subsection the term 'income' means income as determined under section 1612(a) of this Act.

"(4) All income determinations under this section shall be made by the State.

"ADMINISTRATIVE PROVISIONS

"SEC. 1896. Any individual or other person shall have the right to reasonable notice and opportunity for a hearing with respect to determinations made by the Secretary under this part in the same manner as under part A of this title.

"EFFECTIVE DATES; REPORTS

"SEC. 1897. (a) This part shall become effective on January 1, 1984.

"(b)(1) The Secretary shall monitor the effect of this part with respect to any changes in the utilization of inpatient services, any changes in the utilization of the various types of services provided under this part and other provisions of Federal and State law, and any other trends in costs or utilization rates of various services. The Secretary shall submit an interim report to the Congress with respect to such monitoring not later than January 1, 1986, and a final report with respect to the four initial State programs not later than January 1, 1988. The interim report shall include a study to determine the need for and cost of care provided under this title, and the use of skilled nursing facility services and intermediate care facility services, according to functional disability.

"(2) The reports submitted under paragraph (1) shall include a recommended strategy for implementing this part on a national basis, with particular emphasis on implementation at the State and local levels. Such reports shall include—

"(A) an analysis of potential obstacles to such implementation;

"(B) suggested legislative changes which may be necessary to ensure effective and efficient implementation; and

"(C) a detailed plan for such implementation.

"(3) The Office of Management and Budget shall prepare an analysis of the budgetary impact of the implementation of this part on a national basis, and shall submit an interim report to the Congress with respect to such analysis not later than January 1, 1986, and a final report not later than January 1, 1988.

"PAYMENTS AUTHORIZED FROM TRUST FUNDS

"SEC. 1898. Payments under this part shall be made from the Federal Hospital Insurance Trust Fund and the Federal Supplementary Medical Insurance Trust Fund, in such proportions as the Secretary determines to be appropriate based upon the types and amounts of services provided under this part. Payments related to services provided under this part which are not otherwise covered services under part A or part B shall be made from the Federal Hospital Insurance Trust Fund.".

STUDY RELATING TO PREPAID CAPITATION PLANS UNDER MEDICAID FOR INDIVIDUALS ELIGIBLE FOR BOTH MEDICARE AND MEDICAID

SEC. 3. The Secretary of Health and Human Resources shall conduct a study of the feasibility and desirability of establishing a program under which State medicaid programs would provide prepaid capitation plans for providing all medicare and medicaid services to those individuals eligible for both such programs. The study shall include an analysis of the possible mechanisms for funding such a program in order to best insure that such funding reflects the proper cost sharing among the Federal Hospital Insurance Trust Fund, the Federal Supplemental Medical Insurance Trust Fund, Federal funds available under title XIX of the Social Security Act, and State funds expended under the State's medicaid plan under such title. The Secretary shall report the results of the study to the Congress not later than June 30, 1984.

SUMMARY OF THE PACKWOOD-BRADLEY-HEINZ SENIOR CITIZENS INDEPENDENT COMMUNITY CARE ACT

PURPOSE

This legislation is designed to assist Medicare patients age 65 or older to avoid placement in a nursing home unless it is absolute necessary

BENEFITS

People eligible under this program would receive all Medicare Part A and B services and the following new services: Homemaker/home health aide; adult day care; respite care; individual assessment and treatment plan; service coordination; other services deemed necessary by the Secretary of Health and Human Services.

ELIGIBILITY

To participate in the program. individuals must meet a strict set of requirements. To be eligible an individual must:

(a) Be at least age 65;

(b) Not be in an institution, or if in an institution be scheduled for discharge within 90 days;

(c) Be certified to need at least six months of two of the following services: 1. meal preparation; 2. housework or shopping assistance; 3. administration of medication; 4. medical treatment at home; 5. personal care;

(d) Additionally, individuals must have a defined level of physical or mental disability that impairs activities or such as using the telephone or performing light work.

The Medicare Home Health skilled care and homebound requirements would be eliminated for the programs.

PATIENT EVALUATION AND SCREENING

Before participating in the program, each patient must receive an individual assessment and treatment plan. Then throughout their participation there will be ongoing evaluation of the individual's care needs. This will usually be done by a preadmission assessment and screening team (PAT) consisting of a physician, registered nurse, nurse practitioner, or physician's assistant and social worker.

COST SHARING

Copayments and deductibles will remain the same as under current law for Medicare Part A and B services. For the services

added under this bill, copayments will be indexed to income.

ADMINISTRATION

In participating states, the governor will assign a state agency or department to administer the program. The state through the designated agency will in turn be responsible for determining: Client eligibility for the program; provider designation; capitation rates for eligible providers; quality of care monitoring and necessary reporting.

Designated provider entities will be responsible for providing and coordinating all services under the bill.

PROVIDER PAYMENT

The payment mechanism for these projects would be in the form of a "capitation payment." This capitation would include both Medicare Part A and B services plus the services added in this bill. A competitive arrangement with respect to the program has been built into the legislation similar to an HMO arrangement. A provider administering the services covered under this bill will be held "at risk." This means the provider must provide all Part A and B services either directly or on a contractual basis as well as the new services covered in this legislation. The provider would receive a monthly capitation payment for each individual participating in the program. Under the Packwood-Bradley bill, the amount of the capitation cannot exceed 60 percent of the monthly skilled nursing facility rate under Medicare.

An example will show how the capitation payment works. Assume the patient capitation payment is $1,100 per month for the program. For instance, let's say Patient A requires $600 worth of services during the first month. The remainder of the capitation payment, $500, would be held by the provider (the entity at risk) as possible profit. However, during the next month Patient A requires $2,000 worth of services. The provider still receives the patient capitation payment of $1,100 for the second month, but is responsible to provide the full $2,000 worth of services. This system makes the provider an "entity at risk"—the provider gets the capitation payment, but no more. They make a profit if the services are less than the capitation payment but they must provide all the necessary and required services even if the cost exceeds the capitation payment.

This approach requires a provider to be a cost-effective and efficient provider and operator. It is to a provider's advantage to make sure the patient only receives those services necessary and appropriate, and does not receive services that are not. In addition, it encourages providers to better utilize volunteer services as well as the help of relatives wherever possible.

EFFECTIVE DATE

The program will become effective January 1, 1984 in not more than four states for four years.

REPORTS AND STUDIES

The bill directs the Secretary of Health and Human Services to submit an interim report on the utilization, trends and costs of this program no later than January 1, 1986 and a final report no later than January 1, 1988. The report will include a strategy and plan to implement a program nationwide.

The Office of Management and Budget will prepare an analysis of the budgetary impact of such a program nationwide with an interim report due January 1, 1986 and a final report on January 1, 1988.

Lastly, the bill directs the Secretary to conduct a study on the feasibility of establishing a prepaid capitation program for individuals dually eligible for both Medicare and Medicaid.●

● Mr. HEINZ. Mr. President, I am pleased to join my colleagues, Senator PACKWOOD and Senator BRADLEY, in sponsoring this legislation which would enable medicare to cover the services necessary to help frail older persons to remain in their homes and communities.

Currently, reimbursement under medicare and private health insurance is directed almost entirely toward acute care. These health plans provide practically no long-term home care for the over 1 million chronically ill, frail elderly who are trying to maintain an independent life.

Practically the only assistance available to them is through the medicaid program—which requires that they and their spouses first exhaust their financial and emotional resources before they can qualify for any benefits.

This legislation would allow medicare to begin to address, for the first time, the needs of the more than 1 million frail medicare beneficiaries who are living at home. Under a capitated plan, medicare home and community care services would be expanded to help medicare patients age 65 and older avoid unnecessary nursing home placement. The 4-year program in four States with a capitated payment rate provide a cost-effective approach for careful consideration and refinement of the program before it is fully implemented in 1988.

According to the Health Care Financing Administration, over $40 billion was spent in this country in 1982 for long-term care—approximately 15 percent of total national personal health care expenditures. These expenditures include: One, public and private expenditures for nursing homes; two, expenses for long-term hospitals and long-term care provided in short-term hospitals; three, medicare expenditures for home health care; and four, the cost of providing care to those who are inappropriately backed up in acute care hospital beds awaiting nursing home placement. Over two-thirds of these dollars—$27 billion—were spent for nursing home care alone.

The National Center for Health Statistics has projected that the nursing home population—approximately 1.3 million of whom are over age 65—will increase by 500,000 per decade in the coming years. At least 10 percent and possibly as many as 40 percent of this population could avoid nursing home placement if home care services were available for the chronically ill. It is time that we in Congress act to provide such services, realizing savings through the prevention of inappropriate hospital and nursing home care. The capitated benefit incorporated in this legislation, which encompasses acute and noninstitutional long-term care services, can help to achieve those savings.

At the same time, we need to do more. The chronically ill are a diverse population with a diversity of needs. While costs associated with caring for the chronically ill represent the fastest growing health care costs, long-term care is the most underresearched area in health care. There is no single best approach to long-term care.

That is why, in the next few weeks, I intend to introduce two additional pieces of long-term care legislation. The first, which I will introduce along with my colleagues Senator PACKWOOD and Senator BRADLEY, will allow States the option of pooling medicare and medicaid resources for the first time to allow dually eligible beneficiaries a choice between the regular medicare/medicaid benefits and an expanded benefit which will provide a coordinated continuum of care, and allow a capitated comprehensive health care benefit.

This benefit will include the whole range of health services from acute care services to community-based and institutional long-term care services. Current program restrictions under medicaid and medicare which place barriers to the use of the most appropriate and cost-effective services will be waived.

Medicare payments to the States for eligible individuals participating in this program will be equal to 95 percent of the noninstitutional AAPCC for the nonfrail—and 95 percent of the institutional AAPCC for those eligible individuals who are frail and residing in the community or who reside in skilled or intermediate care nursing facilities. Certain additional waivers will also be provided to encourage States to expand and take advantage of HMO's, preferred provider organizations and other capitated, competitive health care plans. This legislation, if enacted, would provide substantial reforms. It would better match services to needs, providing better health care for the chronically ill, and would save health care dollars as well.

The second piece of legislation that I plan to introduce would provide tax credits of up to $1,050 per year to families for the expenses they may incur in caring for an elderly family member. The tax credits would be targeted to those most in need since they would be refundable to those with lower incomes and would be based on a sliding income scale. The credit would be based upon actual expenses incurred for services and supplies associated with home care. Families with incomes of over $50,000 per year would be ineligible for this tax credit. This

legislation would recognize the critical role of the family in long-term care and the substantial expenses they face in providing such care, expenses that will remain even if the other legislation that my colleagues and I have described today were enacted.

These three pieces of legislation offer Congress the opportunity to take a major step forward in long-term care. Reforms put in place now not only can meet the current needs of the underserved chronically ill—but can also save billions of dollars in unnecessary hospital and nursing home care in the future. These programs offer a much needed, humane alternative to institutionalization. Limits would be placed on expenditures in all of these proposed programs to insure that they will be cost effective.

Mr. President, I hope my colleagues will seriously consider the legislation that Senators PACKWOOD, BRADLEY, and I are introducing today and the legislation that I will soon introduce. Together, these bills offer a comprehensive response to a longstanding problem—the overwhelming need for alternatives to institutional care for our Nation's chronically ill elderly and disabled. It can make the difference for millions of our Nation's most vulnerable citizens to remain in the best possible environment for their health and well-being—the home.●

Mr. BRADLEY. Mr. President, a woman in New Jersey recently wrote me a short letter about her struggle to provide loving care for her 91-year-old mother. She said her mother was "mentally alert but extremely feeble" and no longer able to pay for the constant assistance that she required.

"To have someone come once a week and give me a whole day to myself would give me a new lease on life," the woman added. "We thought about a nursing home, but just could not do it after examining a few. Even mother says she has lived too long, but there has to be another answer besides nursing homes."

Sad as that may seem, we all know that the problem she described has become increasingly common in this country. More and more, we hear people speak in almost desperate words about their responsibility for an elderly relative suffering from physical or psychological disabilities. As another letterwriter told me, "we want to be able to stay at home and help our loved ones there, but with soaring costs and ever tightening restrictions, we are reaching the point of having to hope for an early and painless death at the first sign of a debilitating illness."

Equally alarming is the plight of those elderly people who have no family to take care of them, or whose families are simply unable to help because of financial, social, or psychological strains. What happens to these older people? They find themselves trapped inside hospitals and nursing homes—isolated in a lonely, sterile environment and deprived of their personal independence and dignity.

There are no easy solutions. But I am convinced that, in many cases, life would be a lot better for elderly people and concerned families if this country developed a program to provide long-term medical and social services at home. Families could be kept intact. The elderly would no longer be forced into institutions, as they are now because medicare and medicaid do not pay for needed treatment unless provided in an institution.

In short, if we had a good long-term home care program, we could end a senseless waste of lives and dollars while helping the elderly to be as independent as possible and close to their loved ones instead of being shut away in a hospital or nursing home.

I believe we should go forward promptly. Direct family care is becoming less available than it used to be because of increased life expectancy, the dominance of chronic disability in elderly individuals, and the shrinking of families due to late marriages, fewer children, more workingwomen, and more divorces.

Long-term care also is frequently unavailable because of its cost. In 1982, out-of-pocket payments by the elderly amounted to almost half of the $24 billion spent on long-term care.

The elderly on fixed incomes are simply unable to pay those costs. The private insurance industry has not eased the burden of high direct patient payment. It generally totally excludes coverage for nursing home and home care, or it limits home care to full-time private duty nursing. In 1980, private insurance provided less than 1 percent of nursing home or home care expenditures.

Medicare has focused almost exclusively on institutional acute short-term care, specifically excluding any form of custodial care.

The only instance where medicare has provided some sensitivity to the growing needs of the chronically ill and disabled is in skilled nursing services. The 1982 tax bill, eliminated the prior hospitalization requirement for these services. However, limitations inherent in the eligibility for skilled nursing remain, and the weekly limit on home health aid has been cut from 20 hours to 9 hours. Regulatory limits have been tightened to the point that congressional efforts to liberalize benefits for noninstitutional care have been more than canceled out.

This leaves medicaid as the primary source of funding for long-term care. Problems and shortcomings are also inherent in this policy. First and foremost, the program covers only the very poor. In 1980, only 13 percent of the 25.7 million elderly people in this country were covered. Less than 6 percent of the elderly in New Jersey were covered. In addition, medicaid imposes a great financial burden on States, long-term care being the fastest growing part of that burden. There is a problem of continuity of care. Benefits—if they exist at all—are fragmented between medicare, medicaid, and those extraneous sources available to the 87 percent who do not qualify for medicaid.

Unfortunately the current medicaid program promotes dependency by limiting eligibility to those who are already financially destitute or those who make themselves destitute for this purpose. A 1974 survey by CBO found that nearly one-half of medicaid nursing home patients were not initially poor by State definitions but were forced to deplete their resources in order to qualify as medically needy. Given the rising costs of care, this percentage has most certainly increased since that time.

There are still other problems with the present medicaid program. Couples too frequently are forced to divorce so that one spouse can get a nursing home subsidy without impoverishing the other. The policy often results in covert violations of the law by families attempting to transfer their parents' assets before their admission to nursing homes.

It is also clear to me that we cannot finance a new medicare program as a cost reimbursed service. The perverse incentives within our health care system simply encourage providers to increase services rather than look for alternatives and efficiencies. Personally, I would hope that we can:

Move long-term care into the mainstream of the health care system.

Convert the health care system from cost based to a prospective-capitated base.

Promote the development of home care as an alternative to institutional or nursing home care.

In any proposal the coordination of services under one program is an essential cornerstone.

With these goals in mind, Senator PACKWOOD and I are proposing steps to fix the existing system and strike out in a new direction of providing community-based home health care. To that end we propose today the Senior Citizens Independent Community Care Act.

This legislation would amend title XVIII, medicare, of the Social Security Act to provide for a home health care program. It would assess the cost-effectiveness of prepaid capitation systems for providing acute and long-term care services for individuals aged 65 or older. It would provide home health services for elderly Americans in order to avoid unnecessary institutionalization, thus saving on the high

costs of these facilities and promote the maximum functional independence of individuals. It would coordinate public and private programs serving the elderly through an assessment process that determines the eligibility and the appropriate level of care needed by individuals to keep them in their community and homes.

Besides the service currently provided by medicare, the Bradley-Packwood bill would expand the scope of benefits to include homemaker-home health aid, adult day-care services, respite care services, service coordination to insure access and appropriate utilization without duplication, and individual assessment and treatment plans.

The program would be implemented initially in a maximum of four States. It would be open to all individuals who are entitled to medicare benefits under part A and enrolled under part B, who are age 65 or older, who reside in a State testing the program, and who have a defined level of physical or mental disability that requires help for a period of at least 6 months.

Preadmission assessment teams will evaluate each individual's health status, functional capabilities, home and family environment, in order to determine the type and frequency of services needed. Such evaluations will be conducted periodically to coordinate the optimum and appropriate utilization of services.

The payment of benefits will be based on a capitation method. The fixed per capita fee paid to each provider will be determined jointly by the Secretary of HHS and the participating State reflecting urban and rural differentials and adjusted to fit costs.

In addition, there would be a system of copayments by eligible individuals which would parallel the fees under part A or B for the same services. Those receiving homemaker-home health aid services, adult day services, and respite care services would pay a sliding fee indexed to their income.

The program would begin on January 1, 1984. The quality and utilization of services provided is to be monitored by the participating State, the Secretary of Health and Human Services and the Comptroller General (GAO). Several reports have been requested to include recommendations for implementing the program on a national basis, suggested legislative changes necessary to insure effective implementation, and a detailed plan for such implementation. Finally, the bill provides funding from the Federal hospital insurance trust fund and the Federal supplementary medical insurance trust fund.

This bill promotes what I believe are essential features to a long-term care policy. Foremost it provides home health care to maintain an individual within his or her own family and community. Second a capitation payment method is employed to provide incentives for alternative and innovative methods of health care delivery. The bill specifically targets the high risk elderly, those that need home services if they are to be kept out of nursing homes and functioning independently.

This legislation ties together acute and long-term care and asks providers to develop a coordinated approach to care of the elderly. Only by enlisting the medical community in addressing the problem of how to link long-term care with acute care and physician care will we achieve any meaningful solutions. This bill attempts to do just that.

During this past year, the medicaid program has undertaken some remarkable experiments in long-term care through its waiver authority. There are currently more than 40 such projects nationwide. In New Jersey the Health Department has recently announced a home care program for disability recipients and last year's TEFRA legislation provided limited home health services for those age 18 or under. Because of these newer developments in medicaid and disability programs, the Bradley-Packwood initiative focuses on medicare where the magnitude and need for a coordinated program remains paramount.

By Mr. THURMOND (for himself, Mr. PERCY, and Mr. JEPSEN):

S. 1245. A bill to amend chapter 157 of title 10, United States Code, to authorize the Secretary of Defense to provide transportation for next of kin of certain persons who are unaccounted for, to attend annual national meetings sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia; to the Committee on Armed Services.

MILITARY TRAVEL FOR MIA/POW FAMILIES

Mr. THURMOND. Mr. President, I am pleased to have my distinguished colleagues from Illinois and Iowa, Mr. PERCY and Mr. JEPSEN, respectively, join me in introducing, at the request of the administration, a bill to authorize the Secretary of Defense to provide air transportation to Washington, D.C., for the next of kin of American servicemen and civilians still missing, or otherwise unaccounted for, as a result of the Vietnam war. Transportation would be for the purpose of attending annual meetings of the National League of Prisoner of War and Missing-In-Action (POW/MIA) Families during 1983, 1984, and 1985. There is a precedent for this activity in that, from 1970 through 1976, the Government provided such transportation to POW/MIA families.

Mr. President, it has been 10 years since the war in Indochina ended. However, the families of our missing continue to wait for information concerning their loved ones. In January 1983, military transportation was provided for the next of kin to attend a special meeting held on the anniversary date of the signing of the Paris accords, which ended our Nation's active involvement in Vietnam.

During the meeting on January 27, 1983, briefings were provided to the families by responsible Government agencies. The Honorable William Clark, Assistant to the President for National Security Affairs, gave a comprehensive assessment of our current efforts to resolve this issue. President Reagan pledged "highest national priority," as well as the closest possible cooperation and a working "partnership" with the league, representing the families.

In keeping with this pledge and to insure that high Government priority is evident to the next-of-kin, Senator PERCY, Senator JEPSEN, and I believe it is most important that such visible support, as military air travel, be provided. The Defense Department advised that in justification of the military transportation provided this past January,

> Servicemen and women are by statute the direct responsibility of the Secretary of Defense and keeping the families apprised of current Government efforts, is inherent in this responsibility. The families of our unaccounted-for servicemen are directly represented on the POW/MIA Interagency Group through the National League of Families. This group is comprised of all interested agencies of the U.S. Government and initiates policy and recommendations on the POW/MIA issue. The league plays a vital and integral role in this function.

Mr. President, the Secretary of Defense, Hon. Caspar W. Weinberger, further stated:

> We Americans have a direct responsibility to our servicemen who have fought for the United States. It is imperative that we meet that responsibility, not only in the specific instance of accounting for servicemen still missing, but so that future generations of Americans can serve with the faith, should they be captured or listed as missing, we will do everything to support them in combat and return them to their homeland afterward.

Mr. President, the high priority now placed on resolution of this humanitarian issue by our Government includes the necessity of insuring that the families of our missing men are fully aware of what our Government is doing to account for their loved ones and end their uncertainty. The families deserve this support, as it will enable attendance at these annual meetings by those who otherwise might not be able to afford airfares.

The POW/MIA issue has languished far too long. We must let the Indochinese governments, as well as the POW/MIA families, know that this Nation will not forget or drop this matter and that we will continue to

seek answers to the fate of our missing servicemen and civilians.

Mr. President, in order to insure that there is adequate time for arrangements to be made by the Defense Department prior to this year's annual meeting, scheduled for July 14-17, 1983, Senators PERCY, JEPSEN, and I strongly recommend that this legislation receive prompt attention and quick passage. It has the full support of the administration.

Mr. President, I ask unanimous consent that this bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1245

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 157 of title 10, United States Code, relating to transportation, is amended by adding at the end thereof the following new section:

"§ 2636. Transportation to national meetings for next of kin of certain individuals who are unaccounted for.

"(a) The Secretary of Defense, under such terms and conditions as he considers appropriate, may transport by air to annual national meetings held within the continental United States and sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia the next of kin of—

"(1) a member of a uniformed service—

"(A) who, as a result of the conflict in Southeast Asia during the period beginning on January 1, 1961, and ending on December 31, 1975, is in a missing status within the meaning of section 551 of title 37;

"(E) with respect to whom, as a result of the conflict, a finding of death has been made under section 555 of title 37; or

"(C) with respect to whom, as a result of the conflict, a report of death has been made without repatriation of remains; and

"(2) a national of the United States who is not a member of a uniformed service and who is determined by the Secretary of Defense to be unaccounted for as a result of the conflict in Southeast Asia during the period specified in clause (1)(A).

"(b) The Secretary may provide the transportation in subsection (a) only to the extent feasible within existing airlift resources of the Department of Defense and only to the extent that the providing of such transportation does not interfere with the accomplishment of any mission of the Department of Defense.

"(c) No individual (nor the estate of an individual) who is authorized by the Department of Defense to perform services under subsection (a), and who is acting within the scope of his duties, shall be liable for injury to or loss of property, or personal injury or death that may be caused incident to providing such services.".

"(b) The table of sections at the beginning of chapter 157 of such title is amended by adding at the end thereof the following new item:

"2636. Transportation to national meetings for next of kin of certain individuals who are unaccounted for.".

SEC. 2. The authority contained in section 2636 of title 10, United States Code, as added by the first section of this Act shall terminate on December 31, 1985.

By Mr. HATFIELD (for himself and Mr. PACKWOOD):

S. 1247. A bill entitled the "Beverage Container Reuse and Recycling Act"; to the Committee on Commerce, Science, and Transportation.

BEVERAGE CONTAINER REUSE AND RECYCLING ACT

● Mr. HATFIELD. Mr. President, today I am introducing the Beverage Container Reuse and Recycling Act. The time has come for us to save precious energy and natural resources. We cannot afford to continue discarding nearly 100 billion beverage containers annually. These containers are reusable and recyclable. This bill will do a great deal to protect our environment and scarce natural resources.

Presently, nine States—Oregon, Michigan, Maine, New York, Massachusetts, Iowa, Connecticut, Delaware, and Vermont—have laws similar to the one I am introducing. Since the manufacture and bottling of beverages is done on a geographic basis, rather than a political one, there is a need for a uniform national law to assist in recovering beverage containers.

In 1980, the General Accounting Office reported on the effects of the beverage container laws in four of the nine States which have refund and recycling systems. The title of the report, "States' Experience With Beverage Container Deposit Laws Shows Positive Effects," speaks for itself. It states that there is an 80-percent reduction of beverage container waste, a 5-percent reduction of postconsumer solid waste, and a reduction in energy and raw material use. Additionally, GAO reported there would be a net increase of 57,000 jobs nationwide if national legislation were enacted.

Each year, over 300 trillion Btu's of energy is expended in the manufacturing of beverage containers in the United States. Under this legislation, 32 to 43 percent of that figure would be saved through the return of bottles and cans. By 1985, approximately 210 million tons of refuse will yearly fill our land. Under this bill, we will have the means to recycle approximately 10.5 million tons of refuse, through the simple device of a mandatory deposit on beverage containers.

This bill will not infringe on any citizen's convenience. He or she will still have the option of discarding beverage containers. It will only obligate each user who discards a bottle or can to pay something nearer to the true cost of that decision to discard. Conversely, it will provide an incentive to those who choose to participate in the cleanup of our land, the recovery of resources and the saving of scarce energy.

For centuries, we have had the luxury of living in a throwaway society. We can no longer afford to live that way. We must become stewards of the Earth. If our stewardship is to be wise rather than rapacious, we must give value for value. We must balance our consumption of the Earth's resources with renewal of those resources wherever possible. Where resources are not renewable, we must use no more than a reasonable share and reuse what we can. This bill is both a symbolic and substantive step in that direction. It will help signal an end to our flip-top, snap-tab throwaway society.

Oregonians were the pioneers in developing a workable beverage container law. The people of Oregon are proud of the active contribution we have made in trying to protect our living environment. I have introduced legislation similar to Oregon's beverage container law in Congress over the past 10 years. It is time for us to take action on a national level. We can no longer afford to continue our waste ethic. It is my hope that the 98th Congress will take positive action to pass this bill. I ask that the Beverage Container Reuse and Recycling Act appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1247

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Beverage Container Reuse and Recycling Act."

FINDINGS AND PURPOSES

SEC. 2. Congress finds and declares that—

(1) the failure to reuse and recycle empty beverage containers represents a significant and unnecessary waste of important national energy and material resources;

(2) the littering of empty beverage containers constitutes a public nuisance, safety hazard, and esthetic blight and imposes upon public and private agencies unnecessary costs for the collection and removal of such containers;

(3) empty beverage containers constitute a significant and rapidly growing proportion of municipal solid waste, disposal of which imposes a severe financial burden on local governments;

(4) the reuse and recycling of empty beverage containers would eliminate these unnecessary burdens on individuals, local governments, and the environment;

(5) a uniform national system for requiring a refund value on the sale of all beverage containers would result in a high level of reuse and recycling of such containers;

(6) a national system for requiring a refund value on the sale of all beverage containers would result in significant energy conservation and resource recovery;

(7) a national system for requiring a refund value on the sale of all beverage containers would be anti-inflationary and would help create jobs in areas of commerce; and

(8) a national system for requiring a refund value on the sale of all beverage containers would be inexpensive to administer because of its self-enforcing nature.

DEFINITIONS

SEC. 3. For the purposes of this Act, the term—

(1) "beverage" means beer or other malt beverage, mineral water, soda water, or a carbonated soft drink of any variety in liquid form and intended for human consumption;

(2) "beverage container" means a container designed to contain a beverage under pressure of carbonation;

(3) "refundable beverage container" means a beverage container which has clearly, prominently, and securely affixed to, or printed on, it (in accordance with Sec. 4) a statement of the amount of the refund value of the container;

(4) "consumer" means a person who purchases a beverage in a beverage container for any use other than resale;

(5) "distributor" means a person who sells or offers for sale in commerce beverages in beverage containers for resale;

(6) "retailer" means a person who purchases from a distributor beverages in beverage containers for sale to a consumer or who sells or offers to sell in commerce beverages in beverage containers under pressure of carbonation to a consumer. The Administrator shall prescribe such regulations as may be necessary to establish what person is a retailer with respect to the sale of beverages in beverage containers under pressure of carbonation to consumers through beverage vending machines;

(7) "Administrator" means the Administrator of the Environmental Protection Agency;

(8) "commerce" means trade, traffic or transportation—

(A) between a place in a State and any place outside thereof;

(B) within the District of Columbia or any territory of the United States; or

(C) which affects trade, traffic, commerce, or transportation described in Subparagraph (A) or (B); and

(9) "State" includes the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

REQUIRED BEVERAGE CONTAINER LABELING

SEC. 4. No distributor or retailer may sell or offer for sale a beverage in a beverage container under pressure of carbonation unless there is clearly, prominently, and securely affixed to, or printed on, it (in accordance with regulations prescribed by the Administrator) a statement of the amount of the refund value of the container, such amount being not less than 5 cents.

RETURN OF REFUND VALUE OF BEVERAGE CONTAINERS

SEC. 5. (a)(1) If a consumer tenders for refund an empty and unbroken refundable beverage container to a retailer or distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the retailer or distributor respectively shall promptly pay the consumer the amount of the refund value stated on the container.

(2) If a retailer tenders for refund an empty and unbroken refundable beverage container to a distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the distributor shall promptly pay the retailer—

(A) the amount of the refund value stated on the container, plus

(B) an amount equal to 2 cents per container to help defray the retailer's cost for handling.

The payment amount specified in clause (B) may be adjusted by the Administrator, following evaluation and public comment, to reflect the true cost of recycling beverage containers. This paragraph shall not preclude a retailer from tendering refundable beverage containers to persons other than distributors.

(b) The opening of a refundable beverage container in a manner in which it was designed to be opened and the compression of a metal refundable beverage container shall not, for the purposes of this section, constitute the breaking of the container if the statement of the amount of the refund value of the container is still readable.

RESTRICTIONS ON METAL BEVERAGE CONTAINERS WITH DETACHABLE OPENINGS

SEC. 6. No distributor or retailer may sell or offer for sale a beverage in a metal beverage container a part of which is designed to be detached in order to open such container.

PREEMPTION OF STATE AND LOCAL LAW

SEC. 7. (a) Except as otherwise provided in this section, no State or political subdivision thereof may establish or continue in effect any law respecting a refund value of beverage containers sold with a beverage under the pressure of carbonation to the extent the Administrator determines the law is inconsistent with this Act.

(b) No State or political subdivision thereof may, for the purposes of determining the amount of any tax imposed by such State or subdivision on the sale of any refundable beverage container, take into account any amount charged which is attributable to the refund value of such container.

(c) Subsection (a) does not prevent a State or political subdivision thereof from establishing or continuing in effect any law respecting a refund value on containers other than for beverages or from regulating redemption and other centers which purchase refundable beverage containers from retailers and consumers.

PENALTIES

SEC. 8. Whoever violates any provision of section 4, 5(a) or 6 shall be fined not more than $1,000 for each violation.

EFFECTIVE DATES

SEC. 9 (a) Except as otherwise provided in Subsections (b) and (c), this Act shall take effect on the date of its enactment.

(b) The provisions of sections 4, 5, and 7 shall apply with respect to beverage containers sold or offered for sale in interstate commerce on or after two years after the date of enactment of this Act.

(c) The provisions of section 6 shall apply with respect to beverages in beverage containers sold or offered for sale in interstate commerce on or after one year after the date of enactment of this Act.

(d) The provisions of section 7(a) shall preempt State and local laws to the extent to which they are inconsistent with the provisions of this Act only on and after the respective effective dates of such provisions.●

By Mr. D'AMATO (for himself, Mrs. HAWKINS, Mr. TOWER, Mr. SPECTER, Mr. MOYNIHAN, and Mr. MURKOWSKI):

S. 1248. A bill to require the Federal Government to reimburse State governments for the cost of imprisoning aliens who commit felonies; to the Committee on the Judiciary.

FEDERAL ALIEN INCARCERATION RESPONSIBILITY ACT

● Mr. D'AMATO. Mr. President, today I am introducing the Federal Alien Incarceration Responsibility (FAIR) Act. This legislation will require the Federal Government to reimburse States for the cost of imprisoning illegal aliens, aliens admitted in excess of normal quotas—particularly those entering on the Cuban and Haitian boatlifts—and aliens here on temporary visas, who have been convicted of a felony.

Hundreds of thousands of illegal immigrants now enter the United States annually. Some have estimated the yearly undetected inflow of illegal aliens at 500,000.

The Immigration and Naturalization Service apprehends nearly 1 million illegal aliens every year. Yet, there are at least 3.5 million, and possibly as many as 12 million, illegal aliens in the United States today.

Since World War II, 1½ million refugees have fled to this country. Hundreds of thousands of Indochinese, Cubans, and Haitians have also been permitted to enter the country in recent years in excess of normal quotas; 7 million nonimmigrant students, migrant workers, and other visitors enter this country on temporary visas every year.

It is important to understand why, under this legislation, some categories of aliens will trigger Federal reimbursement, while others will not. Simply stated, there will be Federal reimbursement for State expenditures in connection with alien felons in those cases in which there is no adequate Federal safeguard protecting the States from large influxes of potential criminals. When illegal aliens, refugees, migrant workers and others admitted on temporary visas are permitted to enter the country, they are admitted according to no set numerical quota. Their admission is essentially a matter of Department of State discretion. The decisionmaking process is one in which foreign policy considerations dominate over the need to safeguard and protect American citizens.

Federal reimbursement will not be required in cases of aliens admitted under numerical quotas because in such cases Immigration and Naturalization Service screening offers the States a substantial measure of protection. An adequate screening process and the very fact of family ties also can protect the States when relatives of American citizens are admitted. For this reason, this class of immigrants is also excluded from Federal reimbursement. Finally, this legislation excludes diplomats because diplomatic immunity prevents their incarceration in the United States.

The problem of prison overcrowding has assumed the dimensions of a national crisis. The pressures created by additional thousands of illegal aliens, asylees, and nonimmigrants threaten to overwhelm our State prison systems at the very moment that they are struggling to cope with the largest prisoner population increase in history.

A survey of State prison systems carried out by the New York Department of Corrections disclosed that approximately 1 percent of State prisoners are aliens. It is estimated that there are close to 24,000 aliens incarcerated for felony offenses in State prisons. The following is a list of States reporting significant numbers of aliens in prison:

Florida, 691.
Michigan, 38.
New Jersey, 259.
New York, 832.
Ohio, 28.
Pennsylvania, 200.
Texas, 627.
Arizona, 111.
Louisiana, 29.
New Mexico, 144.

No State, however, is untouched by this problem.

Florida, Wisconsin, Arkansas, and Pennsylvania, where Cuban refugee resettlement camps were located, experienced serious crime waves after opening of these camps. Detention centers are currently operating in New York, Florida, Texas, and California. More are planned. Every State has held deportable aliens in custody for the Immigration and Naturalization Service. Every State has incurred expenses for these criminals, which are rightfully a Federal responsibility.

The annual cost to the States of incarcerating the thousands of illegal aliens, asylees, and nonimmigrant entrants, is in excess of $25 million. As the number of illegal aliens, migrant workers, and asylees entering our country continues to escalate, the burden on our State prison systems can be expected to grow proportionately. There is no need, however, to belabor the point that our States simply cannot bear this excessive financial burden.

This is the second bill I have introduced in the last month to help our States deal with the many problems facing their overburdened prison systems. The first bill, the Correctional Facility Development Act (S. 1005), which would provide $1 billion per year for 3 years to the States on a matching basis for prison construction, is currently pending before the Judiciary Committee.

The large and growing number of criminal aliens in this country is the result of Federal action and inaction. It is simply not fair that the States should be required to assume the tremendous financial and logistical burdens resulting from policy decisions over which they have no control.

I believe the FAIR Act deserves immediate consideration by the Senate. The time for action has come. This problem can no longer be ignored.●

By Mr. ANDREWS (for himself, Mr. MELCHER, Mr. DECONCINI, Mr. DOMENICI, Mr. INOUYE, Mr. HATFIELD, Mr. NICKLES, and Mr. BINGAMAN):

S. 1249. A bill to add a representative of Indian tribal governments to the membership of the Advisory Commission on Intergovernmental Relations; to the Select Committee on Indian Affairs.

INDIAN TRIBAL GOVERNMENTS REPRESENTATIVE

● Mr. ANDREWS. Mr. President, I am today introducing legislation to amend subsection 3(a) of Public Law 86-380 (42 U.S.C. 4273) to include a representative of a federally recognized Indian tribal government in the membership of the Advisory Commission on Intergovernmental Relations.

In his January 24, 1983, statement on Indian policy, President Reagan reaffirmed the principle of dealing with tribal governments on a political or government-to-government basis. He identified several initiatives designed to strengthen and improve the government-to-government relationship between the United States and federally recognized Indian tribal governments.

This proposed amendment, requested by the administration, is such an initiative. The bipartisan Advisory Commission on Intergovernmental Affairs was established on September 24, 1959, to fill "* * * the need in a federal form of government for the fullest cooperation and coordination of activities between the levels of government * * *." and "* * * to give continuing attention to intergovernmental problems."

Mr. President, the Commission has been functioning for over 23 years with the present representation of 26 members from Federal, State, county, and local governments. The membership is now made up of three members from the executive branch and three private citizens appointed by the President. Three Members of the Senate are appointed by the President of the Senate and three Members of the House appointed by the Speaker. Four State Governors, three members of State legislative bodies, four mayors, and three elected county officers as appointed by the President.

Mr. President, the amendment we are proposing provides for two basic methods of selecting nominees. The National Congress of American Indians (NCAI) and the National Tribal Chairmen's Association (NTCA) may jointly submit names of elected tribal government officials. Since these national Indian organizations do not represent all federally recognized tribal governments, the proposal also makes provisions for any recognized tribal government to submit the names of tribal officials to the President. In the latter case, nominations submitted by tribal governments do not have to be elected tribal officials. This makes allowances for those tribal governments that do not select their leaders through the elective process. With passage of this amendment, the total membership of the Advisory Commission would increase from 26 to 27 and Indian tribal governments would be enhanced in their ability to serve the needs of their constituencies.

I ask that this bill be printed in full at the conclusion of these remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1249

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 3 of Public Law 86-380 (42 U.S.C. 4273) is amended—

(1) by striking out "twenty-six members" and inserting in lieu thereof "twenty-seven members",

(2) by striking out "and" at the end of paragraph (6),

(3) by striking out the period at the end of paragraph (7) and inserting in lieu thereof "; and", and

(4) by inserting after paragraph (7) the following new paragraph:

"(8) One appointed by the President either—

"(A) from a panel of at least two elected Indian tribal government officials submitted jointly by the National Congress of American Indians and the National Tribal Chairmen's Association, or

"(B) from among such other Indian tribal government officials as may be nominated by governing bodies of Indian tribes (as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450b))."●

By Mr. SYMMS (for himself, Mr. JEPSEN, Mr. HELMS, Mr. MCCLURE, and Mr. BOREN):

S. 1250. A bill to amend the Internal Revenue Code of 1954 to repeal the estate and gift taxes; to the Committee on Finance.

REPEAL OF ESTATE AND GIFT TAXES

Mr. SYMMS. Mr. President, today I am introducing legislation with some of my colleagues to abolish the so-called estate and gift tax, more popularly known in the farming areas of the United States as the "grave robbers and benevolence disincentive act."

While the Congress made significant gains in reducing the onerous burden of estate and gift taxes in the 1981 Economic Recovery Tax Act, we should continue to strive for total elimination of the "death tax."

It has become increasingly apparent that although wealth is only a relatively small multiple of annual income and turns over by death only once in a generation, estate and gift taxes continue to present complex legal, eco-

nomic, and social problems. The various provisions of the Federal estate and gift tax laws produce complexities in the estate planning; encourage disposition of assets contrary to the best interests of taxpayers, beneficiaries, and the economy; and work gross inequities among taxpayers.

It is clear that the estate and gift tax laws were never intended primarily to produce revenue, and this is in fact the case today since less than 1 percent of total revenues collected are derived from the estate and gift taxes. The fundamental purpose of the estate and gift tax laws were to tax the very wealthy, very heavily, to limit undue concentrations of wealth and power in a few, to break up those concentrations, and to enhance the equality of opportunity. It is still evident today, however, even after the passage of the 1981 Tax Act, that the fundamental purposes of the estate and gift tax laws are not being fulfilled.

Due to the fact that the unified estate and gift tax credit is a fixed dollar amount and because of the steeply graduated estate tax rates, the ravages of future inflation will increase the burden of estate taxes just as it would increase the burden of individual income taxes without indexation.

Even though the inflation rate has dropped significantly over the past 2 years, the value of farmland significantly increased during the inflationary years of the late 1970's. As a result, although death taxes generally absorb a relatively small part of the farm estate, given the inflated value of the farm's assets, the imposition of the taxes often necessitates the raising of more cash than many farm families are likely to have, particularly during the economically hard-pressed times when every business enterprise is experiencing a cash-flow crunch. Most farm estates do not have sufficient liquid assets to pay estate settlement costs and death taxes because most farm estates usually contain a higher proportion of fixed or illiquid assets.

I believe the same argument can be made for small businesses. In fact, the estate tax burden imposed on estates composed of illiquid business assets threatens the existence of small family enterprises. The burden of paying a tax when assets are illiquid may necessitate that the owner, or the executor of the estate, dispose of the business in order to generate the necessary cash to pay the tax. In some cases, the small family-owned enterprise is sold to, or merged with, a larger competitor, including domestic and foreign conglomerates. This has the consequence of not only eliminating the family business as a seperate entity but also of increasing business concentration and perhaps severely affecting the degree of interfirm competition in the product markets. This result has additional economic, political, and social consequences.

First, it adversely affects the goal of estate tax as a fiscal instrument to redistribute wealth; if the estate tax is increasing business concentration, then wealth becomes redistributed in the hands of the wealthier. It has rendered the estate tax and the overall tax structure less equitable.

Second, the destruction of small family business enterprises affects not only the family itself, but may be extremely disruptive to a local community. Such a community is better served by locally centered business than by a branch whose corporate headquarters is remote.

Third, society as a whole benefits from a perpetuation of the family as a basic social and economic entity. Experts are required to plan an estate properly before it goes through the process and to administer one properly during the process. The process not only requires IRS personnel and money but the estate also incurs considerable expense in the process, an expense which is comparatively greater to smaller estates or at least those estates with substantial illiquid assets. As a result, I simply do not believe that the process of planning and settling an estate does anything for the national good.

Furthermore, Americans who acquire and hold property express themselves in the way they deal with it: Using it, spending it, saving it, giving it away. The social order around us tends to honor our choices in the basic theory that private decisionmaking is better than public control. To hold property and to have wide discretion over it are closely associated with our concepts of freedom.

I do not believe that the right of succession and the freedom to dispose of property during life and at death should be limited by the State. The institution in succession serves a variety of values cherished by a free society. These include the reinforcement of family ties and responsibilities, economic and social pluralism, and encouragement of private philanthropy to improve the quality of life. At the most fundamental level, the institution of succession is a proper response of society to elemental motives, ranging from concern for one's immediate family to a desire to extend one's personality beyond death.

Examined from an economic perspective, the right to transfer wealth has the positive values of fostering incentives in the form of rewarding industry, ingenuity, and creativity, encouraging capital formation through saving and investment, permitting continuity of ongoing enterprise, and supporting diversity in priorities.

It is clearly evident that the estate and gift tax laws do not in any way accomplish the objectives for which they were initially implemented. And, in fact, the abolition of the estate and gift taxes would contribute greatly to the objectives of equity in our tax laws and to individual productivity in our society.

Mr. President, I would like to ask unanimous consent that the bill be printed in the RECORD for the perusal of my colleagues.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1250

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. REPEAL OF ESTATE AND GIFT TAXES.

(a) IN GENERAL.—The Internal Revenue Code of 1954 is amended by striking out subtitle B (relating to estate and gift taxes).

(b) CLERICAL AMENDMENT.—The analysis of subtitles contained in subsection (d) of the first section of such Code is amended by striking out the item relating to subtitle B.

SEC. 2. CONFORMING AMENDMENTS.

(a) AMENDMENTS OF SUBTITLE A.—

(1) Subsection (d) of section 213 of the Internal Revenue Code of 1954 (relating to special rule for decedents) is amended to read as follows:

"(d) SPECIAL RULE FOR DECEDENTS.—For purposes of subsection (a), expenses for the medical care of the taxpayer which are paid out of his estate during the 1-year period beginning with the day after the date of his death shall be treated as paid by the taxpayer at the time incurred.".

(2) Subpart A of part I of subchapter C of such Code (relating to effects of corporate distributions and adjustments on recipients) is amended—

(A) by striking out section 303 (relating to distributions and redemption of stock to pay death taxes), and

(B) by striking out the item relating to section 303 in the analysis of sections for such subpart.

(3) Subsection (e) of section 305 of such Code (relating to cross references) is amended by striking out paragraph (2) and by redesignating (3) as paragraph (2).

(4) Subsection (e) of section 351 of such Code (relating to cross references) is amended by striking out paragraph (3) and by redesignating paragraph (4) as paragraph (3).

(5) Subsection (f) of section 356 of such Code (relating to transactions involving gift or compensation) is amended to read as follows:

"(f) TRANSACTIONS INVOLVING COMPENSATION.—

"For special rules for a transaction described in section 354, 355, or this section, but which has the effect of the payment of compensation, see section 61(a)(1).".

(6) Subsection (e) of section 406 of such Code (relating to treatment as employee under related provisions) is amended by striking out paragraphs (4) and (5).

(7) Subsection (e) of section 407 of such Code (relating to treatment as employee under related provisions) is amended by striking out paragraphs (4) and (5).

(8) Subsection (d) of section 508 of such Code (relating to disallowance of certain charitable, etc., deductions) is amended by striking out "642(c), 2055, 2106(a)(2), or 2522," each place it appears and inserting in lieu thereof "or 642(c).".

(9) Section 642 of such Code (relating to special rules for credits and deductions) is amended by striking out subsection (g).

(10) Section 691 of such Code (relating to recipients of income in respect of decedents) is amended by striking out subsections (c) and (d).

(11) Paragraph (2) of section 996(e) of such code (relating to adjustment to basis) is amended by striking out the second sentence.

(12) Section 1014 of such Code (relating to basis of property acquired from a decedent) is amended—

(A) by striking out subsection (a) and inserting in lieu thereof the following:

"(a) IN GENERAL.—Except as otherwise provided in this section, the basis of property in the hands of a person acquiring the property from a decedent or to whom the property passed from a decedent shall, if not sold, exchanged, or otherwise disposed of before the decedent's death by such person, be the fair market value of the property at the date of the decedent's death.", and

(B) by striking out subsection (d) and inserting in lieu thereof the following:

"(d) DECEDENT'S DYING AFTER DECEMBER 31, 1982.—In the case of a decedent dying after December 31, 1982, the first sentence of paragraph (9) of subsection (b) shall not apply.".

(13) Section 1015 of such Code (relating to basis of property acquired by gifts and transfers in trust) is amended by striking out subsection (d).

(14) Section 1016 of such Code (relating to adjustments to basis) is amended by striking out subsection (c), and by redesignating subsections (d) and (e) as subsections (c) and (d).

(15) Part II of subchapter O of chapter 1 of such Code (relating to basis rules of general application) is amended—

(A) by striking out section 1023 and by redesignating section 1024 as 1023, and

(B) by striking out the last 3 items in the analysis of sections for such part and inserting in lieu thereof the following:

"Sec. 1023. Cross references.".

(16) Part III of subchapter O of chapter 1 of such Code (relating to common nontaxable exchanges) is amended—

(A) by striking out section 1040 (relating to use of farm, etc., real property to satisfy pecuniary bequest), and

(B) by striking out the item relating to section 1040 in the analysis of sections for such part.

(17) Section 1101 of such Code (relating to distributions pursuant to bank holding company act) is amended by striking out paragraph (5) of subsection (a) and paragraph (5) of subsection (b) and inserting in lieu thereof the following:

"(5) DISTRIBUTIONS INVOLVING COMPENSATION.—

"In the case of a distribution to which paragraph (1) or (2) applies, but which has the effect of the payment of compensation, see section 61.".

(b) AMENDMENTS OF SUBTITLE D.—

(1) Section 4947 of such Code (relating to application of taxes to certain nonexempt trusts) is amended—

(A) by striking out "642(c), 2055, 2106(a)(2) or 2522" each place it appears in such section and inserting in lieu thereof the following: "or 642(c)", and

(B) by striking out "2055(e)(2)(B), or 2522(c)(2)(B)," in subparagraph (A) of subsection (a)(2).

(2) Paragraph (4) of section 4948(c) of such Code (relating to disallowance of certain charitable deductions) is amended by striking out "642(c), 2055, 2106(a)(2), or 2522," and inserting in lieu thereof "or 642(c).".

(c) AMENDMENTS OF SUBTITLE F.—

(1) Part II of subchapter A of chapter 61 of such Code (relating to tax returns or statements) is amended—

(A) by striking out subpart C, and

(B) by striking out the item relating to subpart C in the analysis of subparts for such part.

(2) Subpart A of part III of subchapter A of chapter 61 of such Code (relating to information returns) is amended—

(A) by striking out "EXECUTOR OR" in the caption of section 6036,

(B) by striking out "and every executor (as defined in section 2203)," in section 6036,

(C) by striking out section 6039A,

(D) by striking out "executor or" in the item relating to section 6036 in the analysis of sections for such subpart, and

(E) by striking out the item relating to section 6039A in the analysis of sections for such subpart.

(3) Section 6040 of such Code (relating to cross references) is amended—

(A) by striking out paragraph (2) and

(B) by striking out "and 2016" in paragraph (3).

(4) Subchapter B of chapter 62 of such Code (relating to extensions of time for payment) is amended—

(A) by striking out sections 6163, 6166, and 6166A, and

(B) by striking out the items relating to sections 6163, 6166, and 6166A in the analysis of sections for such subchapter.

(5) Subchapter B of chapter 63 of such Code (relating to deficiency procedures in the case of income, estate, gift, and certain excise taxes) is amended—

(A) by striking out ", Estate, Gift," in the caption for such subchapter,

(B) by striking out "income, estate, and gift taxes imposed by subtitles A and B" in subsection (a) of section 6211 (relating to definition of a deficiency) and inserting in lieu thereof "income taxes imposed by subtitle A",

(C) by striking out "subtitle A or B" in sections 6211(b)(2), 6212(a), 6213(f) (1) and (2), and 6214(d) and inserting in lieu thereof "subtitle A",

(D) by striking out "AND GIFT" in the caption of section 6212(b)(1),

(E) by striking out paragraph (3) of section 6212(b),

(F) by striking out paragraph (2) of section 6213(g) and inserting in lieu thereof the following:

"(2) For assessments without regard to restrictions imposed by this section in the case of recovery of foreign income taxes, see section 905(c).",

(G) by striking out subsection (b) of section 6214 and inserting in lieu thereof the following:

"(b) JURISDICTION OVER OTHER YEARS.—The Tax Court in redetermining a deficiency of income tax for any taxable year shall consider such facts with relation to the taxes for other years as may be necessary correctly to redetermine the amount of such deficiency, but in so doing shall have no jurisdiction to determine whether or not the tax for any other year has been overpaid or underpaid.", and

(H) by striking out ", estate, gift," in the item relating to subchapter B in the analysis of subchapters for chapter 63 of such Code.

(6) Section 6314 of such Code (relating to receipt for taxes) is amended—

(A) by striking out subsection (b), and

(B) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) CROSS REFERENCES.—

"For a receipt required to be furnished by employer to employee with respect to employment taxes, see section 6051.".

(7) Subchapter C of chapter 64 of such Code (relating to lien for taxes) is amended—

(A) by striking out sections 6323, 6324, and 6324A, and

(B) by striking out the items relating to sections 6324, 6324A, and 6324B in the analysis of sections for such subchapter.

(8) Section 6325 of such Code (relating to release of lien or discharge of property) is amended—

(A) by striking out subsection (c), and

(B) by inserting "or" at the end of paragraph (1) of subsection (d),

(C) by striking out ", or" at the end of paragraph (2) of subsection (d) and inserting in lieu thereof a period, and

(D) by striking out paragraph (3) of subsection (d).

(9) Subsection (e) of section 6501 of such Code (relating to substantial omission of items) is amended by strking out paragraph (2) and by redesignating paragraph (3) as paragraph (2).

(10) Section 6503 of such Code (relating to suspension of running of period of limitations) is amended by striking out section (d).

(11) Section 6504 of such Code (relating to cross references) is amended by striking out paragraph (5).

(12) Subsection (h) of section 6511 of such Code (relating to cross references) is amended by striking out paragraph (2).

(13) Section 6601 of such Code (relating to interest on underpayment, nonpayment, or extensions of time for payment of tax) is amended—

(A) by striking out ", ESTATE, GIFT," in the caption of subsection (c), and

(B) by striking out subsection (j) and redesignating subsection (k) as subsection (j).

(14) Subsection (c) of section 6612 of such Code (relating to cross references) is amended by striking out "section 2011(c) (relating to refunds due to a credit for State taxes), 2014(e) (relating to refunds attributable to foreign tax credits), and inserting in lieu thereof "section".

SEC. 3. TECHNICAL CHANGES.

The Secretary of the Treasury shall, within 90 days after the date of enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives, and to the Committee on Finance of the Senate, a draft of any technical and conforming changes in the Internal Revenue Code of 1954 which are necessary to reflect throughout such Code the changes in the substantive provisions of law made by this Act.

SEC. 4. EFFECTIVE DATE.

The amendments made by this Act shall apply with respect to the estates of decedents dying after December 31, 1982, and with respect to gifts made after such date.

By Mr. SYMMS (for himself, Mr. MCCLURE, Mr. WALLOP, Mr. BOREN, Mr. GRASSLEY, Mr. HELMS, Mr. JEPSEN, and Mr. BENTSEN):

S. 1251. A bill to amend the Internal Revenue Code of 1954 to treat certain interests as closely held businesses for estate tax purposes, to prevent the ac-

celeration of estate tax installment payments in certain situations, and for other purposes; to the Committee on Finance.

SECTION 6166 TECHNICAL REVISION ACT OF 1983

Mr. SYMMS. Mr. President, today I am introducing legislation, along with some of my colleagues, which will correct technical deficiencies in section 6166 and the redemption rules under section 303.[1]

Section 6166 [2] of the Internal Revenue Code permits an executor to extend the time of payment of the estate tax attributable to closely held business interests, including farms. The deferral provision, which was implemented by Congress in 1958, does not reduce taxes but only extends the period of payment for estates that qualify as being illiquid.

Often when Congress passes tax legislation it unfortunately cannot foresee all of the technical problems that might arise from the passage of a particular provision. As a result, technical revisions are normally necessary so that the full intent of Congress can be implemented with the greatest possible ease.

As presently written, section 6166 contains a number of intricate rules that frequently operate as traps for the unwary and cause many deserving estates to lose the relief extended by the statute because of inadvertent errors.

The purpose of the legislation being introduced today is to make only technical, clarifying changes in the law, not to change past or present policy on section 6166.

A tremendous amount of effort has been made to review this section of the Internal Revenue Code. Last year, a Task Force on Technical Revision of Section 6166 was formed to lend their expertise in recommending the needed technical revisions so that the full intent of Congress could be executed.

A. NECESSITY FOR JUDICIAL REVIEW

An overriding problem in this entire area is the fact that any dispute which arises under section 6166 cannot be resolved in court, thereby making the Revenue Service the sole arbiter of all controversies. This unintended imbalance between the taxpayer and the Revenue Service needs to be remedied at the earliest possible time through the creation of a judicial forum for the resolution of all qualification and acceleration disputes arising under section 6166.[3]

The declaratory judgment provision contained in the House-passed version of the Economic Recovery Tax Act of 1981 can serve as a model for legislation. However, decisions of the Tax Court should be reviewable by the circuit courts, as is the case with all other decisions of the Tax Court. Sufficient statutory safeguards are available to penalize taxpayers whose appeals from the Tax Court to the Circuit Courts are instituted or maintained merely for delay or where the appeals are frivolous or groundless.[4] Moreover, in order to appeal to a circuit court, the taxpayer must pay the amount of tax in dispute at the outset of the appeal or comply with the complex and expensive bonding procedures which are very rarely utilized.[5] Accordingly, the task force endorses S. 1733 because it would provide a reviewable Tax Court judicial forum.

B. CLARIFICATION OF STATUS OF CORPORATE AND PARTNERSHIP HOLDING COMPANIES

In order to reflect present business practices which oftentimes utilize corporate and partnership holding company structures, section 6166 should be clarified to permit a decedent to own either a direct or indirect interest in a corporation or partnership carrying on a trade or business. In other words, if a decedent's interest is in a holding company and the holding company owns a subsidiary which is engaged in a trade or business, the decedent's estate should have the benefits of section 6166, assuming that other requirements of the section are met.[6]

There is no justifiable reason for the Internal Revenue Code to exclude partnership and corporate holding companies from the benefits of section 6166. The congressional purpose underlying section 6166—to provide a long-term payout to estates with liquidity problems in order to prevent a forced sale to larger publicly owned companies—should apply equally to holding companies and to entities without corporate or partnership subsidiaries.[7]

C. CLOSELY HELD BUSINESS INTEREST SHOULD INCLUDE INDEBTEDNESS

Section 6166 should be amended to permit indebtedness to qualify for deferral benefits if the decedent's equity interest in the partnership or corporation, standing alone, would constitute a closely held business interest for purposes of section 6166. Section 6166 should not contain a bias in favor of equity over indebtedness.

In addition, section 6166 should be amended to enable buyouts to occur prior to the death of one of the owners, if such person has been an owner for at least one year prior to the buyout.[8] Thus, a note receivable from a corporation or partnership would be eligible for the deferral privilege if the note, at the time of the decedent's death, represents 20 percent or more of the total value of the business [9] or the corporation or partnership has 25 or fewer owners.

D. INDIVIDUALS ENGAGED IN OIL AND GAS BUSINESS AS SOLE PROPRIETORS

Under the vast sweep of section 3797(a)(2) of the Internal Revenue Code of 1939, coownership and operation of oil and gas leases was held to be a partnership for Federal tax purposes. This was true even though each co-owner marketed his own share of the production and hence there was no joint profit. (I.T. 3930, 1948-2 C.B. 126; I.T. 2948, 1949-1 C.B. 161; Bentex Oil Corp., 20 T.C. 565 (1953))

In the Internal Revenue Code of 1954, Congress recognized that to require a partnership for general income tax purposes was inconvenient for the Internal Revenue Service and unjust to the taxpayer. Hence, after reiterating the same broad definition of partnership in section 7701, Congress permitted in section 761 an election out of the partnership category for such types of partnerships. The election, however, is only for purposes of subchapter K, dealing with partners and partnerships under chapter 1 of subtitle A; this subtitle concerns only income taxation.

Section 6166, however, is part of subchapter B of chapter 62 of subtitle F dealing with procedure and administration of the Internal Revenue Code. Therefore, in its use of the term "partnership," section 6166 is controlled by the definition in section 7701 without any provision for election out of the partnership category. (*Bryant* v. *Commissioner*, 339 F.2d 800 (5th Cir., 1968); Unpublished Letter Ruling No. 8042011, July 1, 1980).

The unjustness of the resulting situation is readily apparent to those operating today in the oil and gas business. Section 6166 permits the installment payment of Federal estate taxes if, among other qualifications, the decedent's interest in a single closely held business exceeds 35 percent of the adjusted gross estate. If a decedent has an interest in more than one closely held business and each such interest is 20 percent or more of the total value of such business, then such interests may be aggregated in reaching the 35-percent plateau. While the Internal Revenue Service has long recognized that operating and developing interests in oil and gas leases is a business (Rev. Rul. 61-55, 1961-1 C.B. 713), recently it became the position of the Internal Revenue Service that each coowned oil and gas lease is a separate and distinct partnership; hence, the decedent must have a 20-percent or greater interest in the total value of such partnership business, that is, each oil and gas lease in which he has an interest for the requisite aggregation. (Unpublished Letter Ruling No. 8042011, July 1, 1980)

As a practical matter this eliminates most individual oil and gas operators from utilization of the relief of section 6166. With the present days costs of oil and gas exploration and development, most individuals cannot take, or retain, 20 percent of each lease for exploration. Even if one could, such per-

Footnotes at end of article.

centage aggregation requirement is especially difficult to meet when modern methods of conservation, such as unitization, are required. For example, if an individual has 25 percent in value of a producing lease to maintain qualification for the aggregation threshold, he would have to resist a unitization that potentially requires his interest in the unitized leasehold to be reduced to a small percentage, such as 2 or 3 percent, a not uncommon situation.

The fair solution to this inequitable and undesirable result is to treat all coownership of oil and gas leases as being one business for the purposes of section 6166, just as was done consistently in practice prior to 1980. The requisite business type of ownership is assured by the reference to the ability to elect out of the partnership category for purposes of such partnership under section 761(a)(2). Thus, this ability to elect out is not present in a limited partnership. It is only present when one has a direct operating ability and liability. Accordingly, the proposed amendment would not benefit syndicated oil and gas tax shelters. Moreover, the proprietorship still must satisfy the other statutory requirements of section 6166, including the trade or business test, before it can be classified as an interest in a closely held business.

E. THE "POOL OF CAPITAL" DOCTRINE

All over the country there are independent persons who make their living by locating, identifying, or acquiring mineral rights or leases on behalf of or for sale to others who will attempt to explore and develop such properties. Typically, these independent professionals receive for their services, or for their interest in minerals, an overriding royalty interest, net profits interest, or other nonoperating interest in the minerals which have been located, identified, or acquired, plus in some cases reimbursement of the out-of-pocket costs. At death they typically hold a substantial number of such interests in various mineral properties, each much smaller than 20 percent of the total leasehold interest. Although these numerous small interests are nonoperating interests, they represent the business assets of the decedent and the value of these interests reflect in part the personal efforts of these individuals.

The facts surrounding these independent professionals are unique for two reasons. First, in the natural resources field, and in oil and gas in particular, there is the "pool of capital" doctrine which runs counter to the general rule that the receipt of an interest in property for services is taxable. A contributor to the pool of capital whose contribution of materials, services, or a mineral interest, enables a particular well to be drilled; that is, enables the capital to be provided to drill that particular well, receives an interest in the well, and its acreage without recognition of income because Congress and the Internal Revenue Service have long recognized that such contributions are necessary in order to have the natural resources developed.

Second, all or virtually all of the independent professional's profit from his business comes from these property interests received as a result of his contributions to the pool of capital, so that he is indeed only in the business of providing services or mineral interests as contributions to pools of capital. By contrast, attorneys, real estate brokers, and others who provide services are usually remunerated for their services in cash, and only take interests in particular transactions from time to time and as incidental to their normal business of deriving cash profits for their services.

Taken together, these interests of a professional represent a closely held business, and their heirs should be entitled to the benefits of section 6166 despite the fact that each business asset, taken separately, is a nonoperating interest.

F. ASSETS LEASED TO CLOSELY HELD BUSINESS

Under present law, if a decedent directly or indirectly owns assets which are leased to a closely held business and the lease can be characterized as a net lease, the leased assets do not qualify for purposes of section 6166. However, if those assets were owned directly by the closely held business, section 6166 would be available with respect to them.

Section 6166 should apply to the assets used by the closely held business whether such assets are directly owned by that business or leased to the business by a partner or stockholder.[10] Accordingly, corrective legislation should provide that assets directly or indirectly owned by the decedent that are leased to a closely held business should qualify for purposes of section 6166 if such assets are used by the closely held business in carrying on a trade or business, throughout the 1-year period ending on the date of the decedent's death, and the decedent's stock or partnership interest in such closely held business qualifies for purposes of section 6166.[11]

By contrast, where money or other property is contributed or loaned to a closely held business but is not used in carrying on the trade or business during the 1-year period prior to death, section 6166 should not be available with respect to such money or other property.

G. ELIMINATION OF DISTINCTION BETWEEN CAPITAL AND PROFITS INTEREST IN A PARTNERSHIP

Under present law, if a partnership has more than 15 partners, determined by taking into account all of the attribution rules, the decedent must own 20 percent or more of the total capital interest in such partnership in order to qualify for section 6166. There are several reasons to amend section 6166(b)(1)(B)(i) to eliminate the distinction between an interest in partnership capital and an interest in partnership profits.

First, if the partnership has 15 or fewer partners, the decedent's partnership interest can qualify even if such interest is limited to partnership profits. Second, for purposes of the aggregation rule in section 6166(c), the decedent must own 20 percent or more of the total value of each business without regard to whether the decedent's partnership interest relates to capital or profits. Finally, numerous sections of the Revenue Code provide for attribution between a partner and a partnership where the partner owns a prescribed interest in either partnership profits or partnership capital.[12]

H. ELIMINATION OF DISTINCTION BETWEEN VOTING AND NONVOTING STOCK

Under present law, if a corporation has more than 15 shareholders, determined by applying all of the attribution rules, the decedent must own 20 percent or more in value of the voting stock of such corporation in order to qualify for section 6166. There are several reasons section 6166(b)(1)(C)(i) should be amended to eliminate the distinction between voting and nonvoting stock.

First, if the corporation has 15 or fewer shareholders, the decedent's stock interest can qualify even if such interest is comprised solely of nonvoting stock. Second, for purposes of the aggregation rule in section 6166(c), the decedent must own 20 percent or more of the total value of each business without regard to whether the decedent's stock is voting or nonvoting. Finally, several provisions of the Revenue Code provide for attribution between a shareholder and a corporation where the shareholder owns a certain minimum percentage of the value of the outstanding stock including both voting and nonvoting stock.[13]

I. COORDINATION WITH SUBCHAPTER S PROVISIONS

In order to preserve the historic relationship between the subchapter S provisions and the estate tax deferral provisions, dating back to 1958, a decedent's interest in a corporation should qualify under section 6166 if such entity has 25 or fewer stockholders.[14] In order to achieve additional coordination between the two provisions, the spousal attribution rules in section 6166(b)(2)(B) and section 6166(c) should be revised to eliminate the common ownership requirement and to include estates of deceased spouses.

J. SIMPLIFICATION OF ATTRIBUTION RULES

Under present law, in determining whether the 15-person numerical test is satisfied, three complex and at times overlapping attribution rules are applicable: spousal, family and entity. By

contrast, in determining whether the percentage ownership test is satisified, the executor can elect to apply these attribution rules, but only by giving up the 4-percent interest rate and the 5-year interest only provisions. In the case of a husband and wife where one of the spouses is the decedent, both spousal and family attribution would be applicable, although spousal attribution is limited to situations in which the closely held business interest is jointly or commonly owned. Finally, attribution does not extend to estates of family members.

Present law should be amended to combine the spousal and family attribution rules into a single provision applicable, without any penalties, to both the percentage and numerical qualification tests. In addition, in order to preserve the current interaction between family and spousal attribution, the definition of family should be amended to include spouses of an owner's brothers and sisters as well as spouses of such owner's lineal descendants. Finally, estates of family members should be included for purposes of attribution.

K. EXPANSION OF AGGREGATION RULE TO INCLUDE NUMERICAL TEST

Aggregation under section 6166(c) should be permitted for each of the decedent's interests which satisfy either the numerical or percentage qualification tests. Since modern business practices often favor the creation of multiple entities, section 6166 should not impose a stiffer requirement in the case of two or more entities, but, at the same time, provide a more lenient qualification standard where the decedent dies owning a single closely held business interest.[15] In effect, all closely held business interests qualifying under section 6166(b)(1) should be eligible for aggregation.

However, in order to assure that section 6166 is not available to estates which are comprised of a multitude of small interests, aggregation only should be available if each interest equals 5 percent or more of the adjusted gross estate, except that interests which are sole proprietorships or which meet the percentage tests would be eligible for aggregation in all events as under present law.

L. EXPANSION OF ACCELERATION EXCEPTIONS

Since buy out agreements often are an essential element in the continuation of a closely held business after the death of one of the owners, section 6166 should be amended to permit an estate to sell its stock or partnership interest to the company or an existing owner or employee[16] in exchange for a note without resulting in acceleration. The American Bar Association has recommended a similar change.[17]

Second, the acceleration exception for section 303 redemptions should be expanded to permit the proceeds of such redemption to be used for any of the purposes enumerated in section 303(a). Under current law, a section 303 redemption can include amounts sufficient to cover Federal and State death taxes, interest on such death taxes, and funeral and administration expenses under section 2053, whereas section 6166(g)(1)(B) is limited to Federal estate taxes. In addition, corrective legislation should provide that for redemptions occurring during the 5-year interest only period, such proceeds must be utilized for the enumerated purposes by the end of such period; for redemptions occurring after such period, the proceeds must be so utilized within 1 year of the redemption.

Third, the acceleration exception for section 303 redemptions should be expanded to provide equivalent treatment for partnerships and proprietorships. There is no justification for permitting an estate to receive funds from a closely held corporation to pay enumerated expenses without causing acceleration, but to deny that right to partnerships and proprietorships. Acceleration is not justified in either case because the estate must pay such expenses—or reimburse itself—with the funds it receives from the closely held business. This exception also should be expanded to apply to the extent amounts are received from the business for the designated purposes, whether by way of dividends, redemption proceeds, or principal payments on indebtedness which qualifies as a closely held business interest. However, interest on such indebtedness would not be counted for acceleration purposes. In addition, this exception should be available whether the funds received reimburse the estate for the designated purposes or such funds are used for the designated purposes within prescribed time periods after the funds are received.

Fourth, the acceleration exception in section 6166(g)(1)(C) should be expanded to include all reorganizations under section 368 if the stock received by the decedent's estate (or heirs) would have qualified as a closely held business interest if owned by the decedent on the date of his death. In effect, closely held businesses should be allowed to be acquired in tax-free transactions by unrelated closely held businesses without causing acceleration.[18]

For similar reasons, a disposition of a closely held business interest should not result in acceleration to the extent no gain is recognized pursuant to the like kind exchange provisions of section 1031 or the involuntary conversion provisions of section 1033.

Finally, the acceleration exception for subsequent death-related transfers should be amended to repeal the family limitation. When the original decedent dies, section 6166 is available whether or not the decedent leaves any portion of the estate to nonfamily members. However, on the death of an heir of the original decedent, the acceleration exception only is available if the subsequent transferee is a member of the transferor's family. There are many situations in which business associates—including employees—and charitable organizations are beneficiaries of an estate. In effect, under present law, an heir of the original decedent is penalized if the closely held business interest is left, in whole or in part, to such business colleagues or charitable organizations. The goal of section 6166—to preserve closely held businesses after the death of one of the owners—is enhanced if such owner is free to determine the beneficiaries of the business interest. The task force supports S. 1734 because it repeals the family limitation.

M. SOLUTION TO INTEREST AS AN ADMINISTRATION EXPENSE

An extremely complicated situation is presented because interest throughout the 14-year period is deductible as an administration expense under section 2053. However, according to the Revenue Service, a deduction only can be claimed when the interest is actually paid or accrued. One method of eliminating the complex procedures prescribed by the Revenue Service, while retaining the economic benefit of the deduction, would be to amend section 2053 to exclude interest as a deduction but to reduce the interest rate by 50 percent to compensate for such elimination.[19]

The task force recommends that the interest attributable to the section 6166 deferral period should continue to be deductible as an administration expense under section 2053. The interest rate would be fixed for the entire deferral period, geared to the then prevailing yield on Treasury obligations of comparable maturity. All of the interest attributable to the payout period, including interest imposed by a State, would be deductible when the estate tax return was filed. In the event an estate terminated the deferral privilege prematurely, one recalculation procedure would be required at that time; otherwise no recalculations would be necessary. This approach preserves the legal principles presently operating, but drastically simplifies the current situation by eliminating the now complex and prolonged administrative procedures.

N. EFFECTIVE DATES

The proposed legislative changes described in sections B, C, D, E, F, G, H, I, J, and K, all of which relate to changes in qualification requirements under section 6166, would apply to estates of decedents dying after December 31, 1982.

The changes in the acceleration rules, section L, would apply to dispo-

sitions and withdrawals made after December 31, 1982, even if the election under section 6166 or section 6166A applied to decedents dying before January 1, 1983.

The provisions relating to judicial review, section A, generally would apply to estates of decedents dying after December 31, 1982, except that controversies involving dispositions and withdrawals made after December 31, 1982, would be subject to judicial review even if the election under section 6166 or section 6166A applied to decedents dying before January 1, 1983.

Finally, the proposed change involving the deductibility of interest as an administration expense, section M, generally would apply to decedents dying after December 31, 1982. However, in order to eliminate the complex procedures prescribed by the Revenue Service with respect to the deductibility of interest for decedents dying before January 1, 1983, a transitional rule would permit such estates to elect to utilize the new interest deduction provision for the post-1982 term of the section 6166 or section 6166A payout period.

FOOTNOTES

[1]Unless otherwise indicated, all references are to the Internal Revenue Code of 1954, as amended, and the Treasury Regulations promulgated thereunder.

[2]A recent report by the Comptroller General of the United States recommended that section 6166 should be utilized exclusively if a tax preference for farm estates is to be preserved. "Special Estate Tax Provisions For Farmers Should Be Simplified To Achieve Fair Distribution of Benefits." General Accounting Office, September 30, 1981.

[3]Congress acted expeditiously in an analogous situation involving the jurisdiction of the Tax Court. See Public Law 96-596, "Chapter 42 Second Tier Tax Correction Act of 1980."

[4]Section 7482(c)(4); 28 U.S.C. section 1912; Rule 38 of the Federal Rules of Appellate Procedure. In addition, the Internal Revenue Service could impose penalties pursuant to section 6653 in the event an underpayment of taxes was due to negligence, intentional disregard of rules and regulations (but without intent to defraud), or fraud. The underpayment would be equal to the total amount of taxes which the taxpayer defers in the case of a qualification dispute and the unpaid balance of deferred taxes in the case of an acceleration dispute.

[5]Section 7485(a); rule 192 and forms 9-12 of the Rules of Practice and Procedure of the United Tax Court. By comparison, prior to the time the Tax Court reaches its decision, the taxpayer must continue to make installment payments under section 6166.

[6]Thus, there would be a disposition for acceleration purposes where the estate disposed of the stock in the holding company or the holding company disposed of the stock of the active subsidiary.

[7]This proposal would not expand or contract the investment asset exception contained in the regulations (Treas. Regs. § 20.6166A-2(c)); the exception would not apply at the holding company level but would apply at the active subsidiary level. However, the exception would be modified, as described in section F, to deny its application to capital contributions which are not used by the partnership or corporation in carrying on the trade or business of such entity.

[8]To prevent deathbed transactions, the indebtedness would have to have been in existence for at least 1 year prior to death or the date of the buyout. In addition, under the acceleration provisions, the note would no longer qualify as a closely held business interest as follows: (i) at such time as the stock or partner relationship was completely terminated; (ii) at such time as the note became readily tradable within the meaning of section 453(f)(5); or (iii) at such time as the closely held business was acquired by a corporation, such corporation assumed or guaranteed the note, and the stock of such corporation was readily tradable.

[9]The total value of the business would be determined by treating the note as a liability of the corporation or partnership.

[10]This result already prevails under section 2032A, where special use valuation is available for assets leased to a related partnership or corporation carrying on a trade or business. See section 2032A(g) and Unpublished Letter Ruling No. 8206009 (May 21, 1980).

[11]Thus, under the acceleration provisions, the leased assets would no longer qualify as a closely held business interest at such time as the stock or partner relationship was terminated.

[12]See sections 318(a)(2)(A) and (3)(A); 554(a)(1) and (2); 707(b)(1) and (2); 1239(c)(1)(B); and 1563(e)(2).

[13]See sections 267(b)(2); 318(a)(2)(C) and (3)(C); 554(a)(1); 1239(c)(1)(A); and 1563(e)(4).

[14]If this change is made, a corresponding change in the numerical test for partnerships would be necessary. In addition, if the permitted number of shareholders for a subchapter S corporation is increased to 35 as recently proposed by S. 2350 and H.R. 6055, similar changes should be made to section 6166.

[15]The numerical qualification test contains safeguards (specifically in the entity attribution rule) to assure that the total number of direct and indirect owners of a corporation or partnership are taken into account. Accordingly, no additional safeguards are needed in this area when the aggregation rule is expanded to include the numerical qualification test.

[16]An existing owner or employee would be defined as a person who was an owner or employee during the period beginning 1 year prior to the decedent's death and ending on the date of the buyout. In addition, in order to assure that the decedent has a continuing relationship to the closely held business, a note received pursuant to a "cross purchase" agreement only would qualify for the acceleration exception if the business guaranteed the note.

[17]If a closely held business is acquired by a corporation after the buyout agreement is implemented, such corporation assumes or guarantees the buyout note, and the stock of such corporation is readily tradable, acceleration then would be proper. Acceleration also would occur if the buyout note itself becomes readily tradable for any reason within the meaning of section 453(f)(5). With respect to a predeath buyout arrangement as well as indebtedness combined with the appropriate equity position, acceleration also should apply in the same circumstances.

[18]Section 303(c) applies to all reorganizations. (See Treas. Reg. §1.303-2(d)). Moreover, section 303 was amended by section 422(b) of the Economic Recovery Tax Act of 1981 (Public Law 97-34) in order to coordinate those provisions with section 6166. H.R. Rep. No. 201, 97th Cong., 1st Sess. 181 (1981).

[19]The executor could retain the option to treat the interest expense as an income tax deduction, in which event the interest rate would not be reduced because the interest still would be deductible for income tax purposes. Alternatively, no income or estate tax deduction could be available and the reduced interest rate therefore would be mandatory.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1251

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Section 6166 Technical Revision Act of 1983".

SEC. 2. INTEREST IN A CLOSELY HELD BUSINESS.

(a) IN GENERAL.—Paragraph (1) of section 6166(b) of the Internal Revenue Code of 1954 (relating to interest in a closely held business) is amended—

(1) by inserting "or profits interest" after "capital interest" in subparagraph (B)(i),

(2) by striking out "voting" in subparagraph (C)(i),

(3) by striking out "15" in subparagraphs (B)(ii) and (C)(ii) and inserting in lieu thereof "35",

(4) by striking out "or" at the end of subparagraph (B)(ii),

(5) by striking out the period at the end of subparagraph (C)(ii) and inserting in lieu thereof a semicolon, and

(6) by adding at the end thereof the following new subparagraphs:

"(D) that portion of an interest as a partner in a partnership, or of stock in a corporation, included in determining the gross estate of a decedent which bears the same relationship to such partnership interest or stock as the value of any interest in another partnership, stock in another corporation, or interest in minerals which—

"(i) is owned by (or is treated by the application of paragraph (2)(C) as owned by) such partnership or corporation,

"(ii) is treated (by the application of paragraph (2)(C)) as owned by the decedent, and

"(iii) is described in subparagraph (B), (C), (E), or (I),

bears to the value of all assets of such partnership or corporation which are treated (by the application of paragraph (2)(C)) as owned by the decedent;

"(E) an interest in an unincorporated organization described in section 761(a)(2) which is carrying on a trade or business;

"(F) an interest in a note or other evidence of indebtedness issued by a corporation or partnership carrying on a trade or business if—

"(i) such interest had been acquired by the decedent in an exchange of—

"(I) stock of such corporation with such corporation, or

"(II) an interest in such partnership with such partnership,

"(ii) the decedent had been a shareholder in such corporation, or a partner in such partnership, at all times during the 1-year period ending on the date of such exchange, and

"(iii) either—

"(I) the value of the interest in such note or evidence of indebtedness is equal to 20 percent or more of the value of such corporation or partnership (determined by treating the interest in such note or evidence of indebtedness as a liability of such corporation or partnership), or

"(II) such corporation or partnership is described in subparagraph (B)(ii), (C)(ii), or (E);

"(G) in the case of a note or other evidence of indebtedness which meets the requirements of paragraph (2)(F), that portion of an interest in such note or evidence of indebtedness issued by a corporation or partnership which bears the same relationship to the interest in such note or evidence of indebtedness included in the estate of the decedent as the value of any interest in another partnership or stock in another corporation which—

"(i) was owned by (or treated by the application of paragraph (2)(C) as owned by) such partnership or corporation on the day before the date on which the decedent acquired such note from such partnership or corporation, and

"(ii) was treated by the application of paragraph (2)(C) as owned by the decedent on the day before the date of such acquisition,

bears to the value of all assets of such partnership or corporation which the decedent was treated as owning (by the application of paragraph (2)(C)) on the day before the date of such acquisition;

"(H) an interest in a note or other evidence of indebtedness issued by a corporation or partnership before the date which is 1 year prior to the date of death of the decedent, but only if—

"(i) such note or evidence of indebtedness is acquired by the decedent in an exchange of money or other property with such partnership or corporation (other than an exchange described in subparagraph (F)(i) or paragraph (2)(F)(ii)),

"(ii) an interest in such partnership or corporation—

"(I) is described in subparagraph (B), (C), (D), or (E) and included in determining the gross estate of the decedent, or

"(II) is described in clauses (i), (ii), and (iii) of subparagraph (D), and

"(iii) such money or other property is used—

"(I) in the case of a note or evidence of indebtedness issued by any partnership or corporation described in subparagraph (B), (C), or (E), by the partnership or corporation described in such subparagraph in carrying on its trade or business, or

"(II) in the case of a note or evidence of indebtedness issued by any partnership or corporation described in subparagraph (D), by the partnership or corporation described in clauses (i), (ii), and (iii) of subparagraph (D) in carrying on its trade or business;

"(I) an overriding royalty interest, a net profits interest, or other nonoperating interest in minerals which was acquired by the decedent in exchange for—

"(i) services rendered by the decedent in determining the location of such minerals, in acquiring such minerals, or in acquiring a lease of such minerals, or

"(ii) an operating interest in such minerals; or

"(J) an interest in an asset which—

"(i) is leased to, or used by, a corporation or partnership described in subparagraph (B), (C), or (E) or clauses (i), (ii), and (iii) of subparagraph (D), and

"(ii) is used by such corporation or partnership in carrying on the trade or business of such corporation or partnership throughout the 1-year period ending on the date of death of the decedent.".

(b) ATTRIBUTION RULES AND OTHER SPECIAL RULES.—

(1) ATTRIBUTION RULES.—Paragraph (2) of section 6166 of such Code (relating to rules for applying paragraph (1)) is amended to read as follows:

"(2) RULES FOR APPLYING PARAGRAPH (1).—For purposes of paragraph (1)—

"(A) TIME FOR DETERMINATIONS.—Except as otherwise provided in paragraph (1), determinations shall be made as of the time immediately before the death of the decedent.

"(B) NUMERICAL REQUIREMENTS FOR PARTNERSHIPS AND CORPORATIONS.—For purposes of subparagraphs (B)(ii) and (C)(ii) of paragraph (1), all stock and partnership interests held by or (after application of subparagraph (C)) treated as held by—

"(i) an individual,

"(ii) a member of the family of such individual (within the meaning of section 267(c)(4)),

"(iii) the spouse or surviving spouse of an individual described in clause (ii), or

"(iv) the estate of an individual described in clause (ii) or (iii),

shall be treated as owned by one shareholder or one partner, as the case may be.

"(C) INDIRECT OWNERSHIP.—

"(i) IN GENERAL.—Property owned, directly or indirectly, by or for a corporation, partnership, estate, or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries.

"(ii) SUCCESSIVE APPLICATION.—Property treated as owned by a person by reason of the application of clause (i) shall be treated as owned by such person for purposes of again applying clause (i) in order to treat another person as the owner of such property.

"(iii) BENEFICIARY.—For purposes of this subparagraph, a person shall be treated as a beneficiary of any trust only if such person has a present interest in the trust.

"(D) PERCENTAGE OWNERSHIP REQUIREMENTS FOR PARTNERSHIPS AND CORPORATIONS.—For purposes of subparagraphs (B)(i) and (C)(i) of paragraph (1), all stock and all partnership interests held by or (after the application of subparagraph (C)) treated as held by—

"(i) the decedent,

"(ii) a member of the family of the decedent (within the meaning of section 267(c)(4)),

"(iii) the spouse or surviving spouse of an individual described in clause (ii), or

"(iv) the estate of an individual described in clause (ii) or (iii),

shall be treated as owned by the decedent.

"(E) INTERESTS ATTRIBUTED TO DECEDENT INCLUDED IN GROSS ESTATE.—For purposes of subparagraph (B)(i) and (C)(i) of paragraph (1), any interest treated as owned by the decedent by reason of this paragraph shall be treated as included in determining the gross estate of such decedent.

"(F) REQUIREMENTS FOR HOLDING COMPANY BUY-OUT NOTES.—A note or other evidence of indebtedness meets the requirements of this subparagraph if—

"(i) such note or evidence of indebtedness was issued by a partnership or corporation,

"(ii) such note or evidence of indebtedness had been acquired by the decedent in an exchange of—

"(I) stock of such corporation with such corporation, or

"(II) an interest in such partnership with such partnership,

"(iii) the decedent had been a shareholder in such corporation, or a partner in such partnership, at all times during the 1-year period ending on the date of such exchange, and

"(iv) either—

"(I) the value of the interest of the decedent in such note or evidence of indebtedness is equal to 20 percent or more of the value (determined at the time of decedent's death) of the partnership or corporation described in clauses (i) and (ii) of paragraph (1)(G), or

"(II) the partnership or corporation described in clauses (i) and (ii) of paragraph (1)(G) is described in subparagraph (B)(ii), (C)(ii), or (E) at the time of decedent's death.".

(2) CERTAIN ITEMS FOR WHICH MARITAL DEDUCTION WAS ALLOWED; CERTAIN CONTRIBUTIONS.—Subsection (b) of section 6166 of such Code (relating to definitions and special rules) is amended by striking out paragraph (7) and inserting in lieu thereof the following new paragraphs:

"(7) CERTAIN ITEMS FOR WHICH MARITAL DEDUCTION PREVIOUSLY ALLOWED.—Any item included in the value of the gross estate of the decedent under section 2044 shall be treated as included in determining the gross estate of the decedent for purposes of this section.

"(8) CERTAIN CONTRIBUTIONS NOT USED IN CLOSELY HELD BUSINESS.—For purposes of this section, the value of an interest in a closely held business described in subparagraph (B), (C), (D), or (E) of paragraph (1) shall not include the value of any property or money which—

"(A) is contributed—

"(i) in the case of an interest in a closely held business described in subparagraph (B), (C), or (E) of paragraph (1), to the corporation or partnership described in such subparagraph by or on behalf of the decedent, or

"(ii) in the case of an interest in a closely held business described in paragraph (1)(D), to the corporation or partnership described in clauses (i), (ii), and (iii) of paragraph (1)(D) by or on behalf of—

"(I) the decedent, or

"(II) the corporation or partnership described in subsection (b)(1)(D) (any interest in or stock of which is included in determining the gross estate of the decedent), and

"(B) is not used by the recipient corporation or partnership in carrying on the trade or business of such corporation or partnership throughout the 1-year period ending on the date of death of the decedent.".

(c) INTERESTS IN 2 OR MORE CLOSELY HELD BUSINESSES.—Subsection (c) of section 6166 of such Code (relating to special rule for interests in 2 or more closely held businesses) is amended to read as follows:

"(c) SPECIAL RULE FOR INTERESTS IN 2 OR MORE CLOSELY HELD BUSINESSES.—For purposes of this section, interests in 2 or more closely held businesses included in determining the gross estate of the decedent, each of which—

"(1) has a value which equals or exceeds 5 percent of the adjusted gross estate of the decedent,

"(2) is described in subparagraph (A), (B)(i), (C)(i), or (E) of subsection (b)(1), or

"(3) is described in subsection (b)(1)(D), but only if the interest or stock described in clauses (i) and (ii) of subsection (b)(1)(D) is also described in subparagraph (B)(i), (C)(i), or (E) of subsection (b)(1),

shall be treated as an interest in a single closely held business.".

(d) TECHNICAL AMENDMENT.—Paragraph (3) of section 6166(b) of such Code is amended by striking out "65-percent" and inserting in lieu thereof "35-percent".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to the estates of decedents dying after December 31, 1981.

SEC. 3. ELIMINATION OF THE ACCELERATION OF ESTATE TAX PAYMENTS IN CERTAIN SITUATIONS.

(a) DISPOSITION OR WITHDRAWAL TO PAY CERTAIN DEATH TAXES AND EXPENSES.—Subparagraph (B) of section 6166(g)(1) of the Internal Revenue Code of 1954 (relating to disposition of interest) is amended to read as follows:

"(B) PAYMENT OF CERTAIN DEATH TAXES AND EXPENSES.—

"(i) IN GENERAL.—In the case of any disposition of a portion of an interest in a closely held business, or a withdrawal from such a business of money or other property attributable to such an interest, only the excess of—

"(I) the sum of the amount realized from such disposition (or the amount of money and the fair market value of other property so withdrawn) and the amount by which

such interest in the closely held business has been reduced by previous application of clause (iii), over

"(II) the aggregate amount of any taxes, interest, or expenses described in paragraph (1) or (2) of section 303(a) which are paid on or before the final date on which such payment may be made under clause (ii),

shall be treated for purposes of subparagraph (A) as disposed of or withdrawn.

"(ii) PAYMENT PERIOD.—For purposes of clause (i), the payment of any tax, interest, or expense described in paragraph (1) or (2) of section 303(a) may be made at any time prior to the date of the disposition or withdrawal described in clause (i), or after such date, but in no event shall such payment be made after the later of—

"(I) the date prescribed by subsection (a)(3) for the payment of the first installment which becomes due after the date of such disposition or withdrawal, or

"(II) the date which is 1 year after the date of such disposition or withdrawal.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition of a portion of an interest in a closely held business or withdrawal from such closely held business occurring after the disposition or withdrawal described in clause (i), the interest in such closely held business shall be considered to be such interest reduced by—

"(I) the amount realized from the disposition described in clause (i), or

"(II) the amount of money and the value of other property withdrawn in the withdrawal described in clause (i),

which is not treated as disposed of or withdrawn for purposes of subparagraph (A) by reason of clause (i).".

(b) REORGANIZATIONS.—Subparagraph (C) of section 6166(g)(1) of such Code is amended to read as follows:

"(C) REORGANIZATIONS.—

"(i) IN GENERAL.—In the case of an exchange of shares of stock described in clause (ii), only that portion of the value of the shares of stock exchanged which is equal to the excess, if any, of—

"(I) the fair market value at the time of such exchange of the shares of stock exchanged, over

"(II) the fair market value at the time of such exchange of the shares of stock received in such exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(ii) APPLICABLE EXCHANGES.—An exchange of shares of stock is described in this clause if such exchange is an exchange of stock—

"(I) to which section 355 (or so much of section 356 as relates to section 355) applies,

"(II) pursuant to a plan of reorganization described in section 368(a)(1) if the stock received would have qualified as a closely held business interest if owned by the decedent on the date of decedent's death, or

"(III) is described in section 1036.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition or withdrawal occurring after the exchange of stock to which clause (i) applies, any shares of stock received in such an exchange shall be treated as an interest qualifying under subsection (a)(1).".

(c) NO DISQUALIFICATION IN CASE OF SUBSEQUENT DEATHS.—Subparagraph (D) of section 6166(g)(1) of such Code is amended—

(1) by striking out "Subparagraph (A)(i)" and inserting in lieu thereof "SUBSEQUENT TRANSFERS BY REASON OF DEATH.—Subparagraph (A)", and

(2) by striking out the second sentence thereof and inserting in lieu thereof the following new sentence: "A similar rule shall apply in the case of subsequent transfers of the property by reason of the death of such person or of a subsequent transferee.".

(d) BUY OUTS AND OTHER SPECIAL RULES.—Paragraph (1) of section 6166(g) of such Code (relating to disposition of interest) is amended by adding at the end thereof the following new subparagraphs:

"(E) CERTAIN BUY OUTS.—

"(i) IN GENERAL.—In the case of a limited exchange of shares of stock of a corporation, or of an interest in a partnership, for a note or other evidence of indebtedness, only that portion of the value of such shares of stock, or of such partnership interest, which is equal to the excess, if any, of—

"(I) the fair market value at the time of such limited exchange of such shares of stock or partnership interest, over

"(II) the face value of any note or other evidence of indebtedness issued by such corporation or partnership which is received in such limited exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(ii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition or withdrawal occurring after the limited exchange described in clause (i), any note or other evidence of indebtedness received in such a limited exchange shall be treated as an interest qualifying under subsection (a)(1).

"(F) LIMITED EXCHANGE.—For purposes of this paragraph, the term 'limited exchange' means an exchange of—

"(i) shares of stock of a corporation with—

"(I) such corporation, or

"(II) if such corporation guarantees any note or evidence of indebtedness received in such exchange, any shareholder or employee of such corporation who was a shareholder or employee of such corporation at all times during the period beginning 1 year prior to the date of death of the decedent and ending on the date of such exchange, or

"(ii) an interest in a partnership with—

"(I) such partnership, or

"(II) if such partnership guarantees any note or evidence of indebtedness received in such exchange, any partner in, or employee of, such partnership who was a partner in, or employee of, such partnership at all times during the period beginning 1 year prior to the date of death of the decedent and ending on the date of such exchange.

For purposes of this subparagraph, the term 'employee' has the meaning given such term in paragraph (1) or (2) of section 3121(d).

"(G) SPECIAL RULES FOR NOTES.—For purposes of this paragraph—

"(i) PAYMENT OF INTEREST.—The payment of interest on any note or evidence of indebtedness described in subparagraph (F), (G), or (H) of subsection (b)(1) or subparagraph (E) of this paragraph shall not be treated as a withdrawal from a closely held business or a disposition of an interest in a closely held business.

"(ii) PAYMENT OF PRINCIPAL.—The payment of any portion of the principal on any note or evidence of indebtedness described in subparagraph (F) or (H) of subsection (b)(1) or subparagraph (E) of this paragraph shall be treated as a withdrawal from a closely held business.

"(iii) DISPOSITION OF HOLDING COMPANY BUYOUT NOTE.—If any portion of an interest in a note or other evidence of indebtedness which is described in subsection (b)(1)(G) qualifies under subsection (a)(1)—

"(I) a disposition of any interest in such note or evidence of indebtedness which was included in determining the gross estate of the decedent, or

"(II) any payment of principal attributable to an interest in such note or evidence of indebtedness included in determining the gross estate of the decedent,

shall be treated for purposes of this paragraph as a disposition of (or a withdrawal with respect to) the portion of such interest qualifying under subsection (a)(1) in an amount equal to that portion of the amount realized from such disposition (or of the amount of such payment of principal) which bears the same relationship to the amount so realized (or the amount of such payment of principal) as the relationship described in subsection (b)(1)(G).

"(iv) READILY TRADABLE NOTES.—If any note or other evidence of indebtedness described in subparagraph (F), (G), or (H) of subsection (b)(1) or subparagraph (E) of this paragraph becomes readily tradable (within the meaning of section 453(f)(5)), the entire interest qualifying under subsection (a)(1) in such note or evidence of indebtedness shall be treated as having been disposed of on the first day such note or evidence of indebtedness becomes readily tradable.

"(v) DISPOSITION BY HOLDING COMPANY OF CERTAIN ENTITY ACTIVELY CARRYING ON TRADE OR BUSINESS.—In the case of any interest in a note or other evidence of indebtedness issued by a partnership or corporation which is described in subsection (b)(1)(G) and which qualifies under subsection (a)(1)—

"(I) any disposition of any portion of the interest or the stock described in clauses (i) and (ii) of subsection (b)(1)(G) by such partnership or corporation or by any other partnership, corporation, estate, or trust through which such partnership or corporation was treated (by the application of subsection (b)(2)(C)) as owning the interest or stock described in clauses (i) and (ii) of subsection (b)(1)(G), or

"(II) any withdrawal with respect to the interest or stock described in clauses (i) and (ii) of subsection (b)(1)(G) by such partnership or corporation or by such other partnership, corporation, estate, or trust,

shall be treated for purposes of subparagraph (A) as a disposition of that portion of such note or evidence of indebtedness qualifying under subsection (a)(1) which bears the same relationship to such note or evidence of indebtedness qualifying under subsection (a)(1) as the amount realized from the disposition of such portion of the interest or stock described in clauses (i) and (ii) of subsection (b)(1)(G) (or the amount of money and the value of other property so withdrawn) bears to the fair market value (at the time immediately before such disposition or withdrawal) of the entire interest or stock described in such clauses.

"(vi) ACQUISITION OF THE ISSUER OR GUARANTOR OF A NOTE.—In the case of a note or other evidence of indebtedness which—

"(I) was acquired in an exchange of stock of a corporation, or of an interest in a partnership, described in paragraph (1)(F) or (2)(F) of subsection (b) or subparagraph (E) of this paragraph, or

"(II) was issued to the decedent by a corporation or partnership described in subsection (b)(1)(H),

the qualified acquisition of such corporation or partnership by another corporation whose stock is readily tradable and which guarantees or assumes liability on such note or evidence of indebtedness shall be treated as a disposition of the entire interest in such note or evidence of indebtedness which qualifies under subsection (a)(1).

"(vii) QUALIFIED ACQUISITION.—The term 'qualified acquisition of a corporation' means an acquisition of at least 50 percent of—

"(I) the total combined voting power of all classes of stock of such corporation which are entitled to vote,

"(II) the total value of shares of all classes of stock of such corporation, or

"(III) the fair market value (determined at the time of such acquisition) of all assets of such corporation used in carrying on the trade or business of such corporation.

"(viii) READILY TRADABLE STOCK.—Stock is readily tradable if, at the time of a qualified acquisition, there is a market for such stock on any stock exchange or in any over-the-counter market.

"(H) NOTE ISSUED BY AND ASSETS USED BY A DISPOSED CLOSELY HELD BUSINESS.—If the entire interest in a partnership, or all the stock in a corporation, described in subparagraph (B), (C), (D), or (E) of subsection (b)(1) which qualifies under subsection (a)(1) is treated under subparagraph (A) as having been disposed of (or an amount of money and other property attributable to such interest or stock and equal in value to such interest or stock is treated under subparagraph (A) as having been withdrawn from the closely held business), the entire interest in—

"(i) any note or evidence of indebtedness described in subsection (b)(1)(H) which is issued by such partnership or corporation (or by a partnership or corporation described in clauses (i), (ii), and (iii) of subsection (b)(1)(D)), and

"(ii) any asset described in subsection (b)(1)(J) which is leased to, or used by, such partnership or corporation (or the partnership or corporation described in clauses (i), (ii), and (iii) of subsection (b)(1)(D)),

shall be treated, for purposes of this paragraph, as having been disposed of or exchanged on the date on which such disposal or withdrawal of the interest in such partnership or the stock in such corporation is treated under subparagraph (A) as occurring.

"(I) INVOLUNTARY CONVERSIONS.—

"(i) CONVERSION INTO SIMILAR PROPERTY.—Subparagraph (A) shall not apply to any involuntary conversion of a portion of an interest in a closely held business which is described in section 1033(a)(1). For purposes of applying subparagraph (A) to subsequent dispositions or withdrawals, any interest in the property into which an interest in a closely held business was so converted shall be treated as an interest qualifying under subsection (a)(1).

"(ii) CONVERSION INTO OTHER PROPERTY.—In the case of an involuntary conversion of any portion of an interest in a closely held business which is described in section 1033(a)(2), only the excess, if any, of—

"(I) the amount realized on the conversion of such interest, over

"(II) the cost of qualified replacement property,

shall be treated, for purposes of subparagraph (A), as disposed of, withdrawn, or exchanged. For purposes of subsequent application of subparagraph (A), any interest in qualified replacement property shall be treated as an interest qualifying under subsection (a)(1).

"(iii) QUALIFIED REPLACEMENT PROPERTY.—For purposes of this subparagraph, the term 'qualified replacement property' means any property similar or related in service or use to the converted property which is acquired for the purpose of replacing the converted property by the executor of the estate of the decedent during the period which begins on the earliest date of the threat or imminence of requisition or condemnation and ends on the date which is 1 year after the date on which any part of the gain upon the conversion is realized.

"(J) LIKE KIND EXCHANGES.—

"(i) EXCHANGES SOLELY IN LIKE KIND.—Subparagraph (A) shall not apply to any exchange described in section 1031(a) in which an interest in a closely held business is exchanged for qualified exchange property.

"(ii) EXCHANGES NOT SOLELY IN LIKE KIND.—In the case of an exchange described in section 1031(b) in which an interest in a closely held business is exchanged, only that portion of such interest which is equal to the excess, if any, of—

"(I) the fair market value of such interest at the time of such exchange, over

"(II) the fair market value of qualified exchange property received in such exchange at the time of such exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to subsequent dispositions or withdrawals, any interest in qualified exchange property shall be treated as an interest qualifying under subsection (a)(1).

"(iv) QUALIFIED EXCHANGE PROPERTY.—For purposes of this subparagraph, the term 'qualified exchange property' means property received in an exchange which, if it were the only property received in such exchange, would result in nonrecognition of gain or loss under section 1031(a).

"(K) DISPOSITION OF HOLDING COMPANY INTEREST.—If any portion of an interest in a partnership, or of stock in a corporation, which is described in subsection (b)(1)(D) qualifies under subsection (a)(1)—

"(i) a disposition of any interest in such partnership, or stock in such corporation, which was included in determining the gross estate of the decedent, or

"(ii) a withdrawal of any money or other property from such partnership or corporation attributable to any interest included in determining the gross estate of the decedent,

shall be treated for purposes of this paragraph as a disposition of (or a withdrawal with respect to) the portion of such interest or stock qualifying under subsection (a)(1) in an amount equal to that portion of the amount realized from such disposition (or of the amount of money and the value of other property so withdrawn) which bears the same relationship to the amount so realized (or so withdrawn) as the relationship described in subsection (b)(1)(D).

"(L) DISPOSITION BY HOLDING COMPANY OF CERTAIN ENTITY ACTIVELY CARRYING ON TRADE OR BUSINESS.—In the case of any interest in a partnership, or stock in a corporation, which is described in subsection (b)(1)(D) and which qualifies under subsection (a)(1)—

"(i) any disposition of any portion of an interest or of stock described in clauses (i), (ii), and (iii) of subsection (b)(1)(D) by such partnership or corporation or by any other partnership, corporation, estate, or trust through which such partnership or corporation was treated (by the application of subsection (b)(2)(C)) as owning such interest or stock described in clauses (i), (ii), and (iii) of subsection (b)(1)(D), or

"(ii) any withdrawal with respect to the interest or stock described in clauses (i), (ii), and (iii) of subsection (b)(1)(D) by such partnership or corporation or by such other partnership, corporation, estate, or trust,

shall be treated for purposes of subparagraph (A) as a disposition of that portion of such interest or stock qualifying under subsection (a)(1) which bears the same relationship to such interest or stock qualifying under subsection (a)(1) as the amount realized from the disposition of such portion of the interest or stock described in clauses (i), (ii), and (iii) of subsection (b)(1)(D) (or the amount of money and the value of other property so withdrawn) bears to the fair market value (at the time immediately before such disposition or withdrawal) of the entire interest or stock described in such clauses.".

(e) CONFORMING AMENDMENTS.—

(1) Subparagraph (A) of section 6166(g)(1) of such Code (relating to dispositions and withdrawals) is amended by striking out "(A) If" and inserting in lieu thereof "(A) IN GENERAL.—If".

(2) Paragraph (2) of section 6166(g) of such Code (relating to undistributed income of estate) is amended—

(A) by striking out "(A) If" in subparagraph (A) and inserting in lieu thereof "(A) IN GENERAL.—If", and

(B) by striking out "(B) For" in subparagraph (B) and inserting in lieu thereof "(B) UNDISTRIBUTED NET INCOME.—For".

(f) COORDINATION WITH SECTION 6166A.—

(1) DISPOSITION OR WITHDRAWAL TO PAY CERTAIN DEATH TAX AND EXPENSES.—Subparagraph (B) of section 6166A(h)(1) of such Code (relating to disposition of interest), as in effect on the day before the date of enactment of the Economic Recovery Tax Act of 1981, is amended to read as follows:

"(B) PAYMENT OF CERTAIN DEATH TAXES AND EXPENSES.—

"(i) IN GENERAL.—In the case of any disposition of a portion of an interest in a closely held business, or a withdrawal from such a business of money or other property attributable to such an interest, only the excess of—

"(I) the sum of the amount realized from such disposition (or the amount of money and the fair market value of other property so withdrawn) and the amount by which such interest in the closely held business has been reduced by previous application of clause (iii), over

"(II) the aggregate amount of any taxes, interest, or expenses described in paragraph (1) or (2) of section 303(a) which are paid on or before the final date on which such payment may be made under clause (ii),

shall be treated for purposes of subparagraph (A) as disposed of or withdrawn.

"(ii) PAYMENT PERIOD.—For purposes of clause (i), the payment of any tax, interest, or expense described in paragraph (1) or (2) of section 303(a) may be made at any time prior to the date of the disposition or withdrawal described in clause (i), or after such date, but in no event shall such payment be made after the later of—

"(I) the date prescribed by subsection (a)(3) for the payment of the first installment which becomes due after the date of such disposition or withdrawal, or

"(II) the date which is 1 year after the date of such disposition or withdrawal.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition of a portion of an interest in a closely held business or withdrawal from such closely held business occurring after the disposition or withdrawal described in clause (i), the interest in such closely held business shall be considered to be such interest reduced by—

"(I) the amount realized from the disposition described in clause (i), or

"(II) the amount of money and the value of other property withdrawn in the withdrawal described in clause (i),

which is not treated as disposed of or withdrawn for purposes of subparagraph (A) by reason of clause (i).".

(2) REORGANIZATIONS.—Subparagraph (C) of section 6166A(h)(1) of such Code, as in effect on the day before the date of enactment of the Economic Recovery Tax Act of 1981, is amended to read as follows:

"(C) REORGANIZATIONS.—

"(i) IN GENERAL.—In the case of an exchange of shares of stock described in clause (ii), only that portion of the value of the shares of stock exchanged which is equal to the excess, if any, of—

"(I) the fair market value at the time of such exchange of the shares of stock exchanged, over

"(II) the fair market value at the time of such exchange of the shares of stock received in such exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(ii) APPLICABLE EXCHANGES.—An exchange of shares of stock is described in this clause if such exchange is an exchange of stock—

"(I) to which section 355 (or so much of section 356 as relates to section 355) applies,

"(II) pursuant to a plan of reorganization described in section 368(a)(1) if the stock received would have qualified as a closely held business interest if owned by the decedent on the date of decedent's death, or

"(III) is described in section 1036.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition or withdrawal occurring after the exchange of stock to which clause (i) applies, any shares of stock received in such an exchange shall be treated as an interest qualifying under subsection (a)(1).".

(3) NO DISQUALIFICATION IN CASE OF SUBSEQUENT DEATHS.—Subparagraph (D) of section 6166A(h)(1) of such Code, as in effect on the day before the date of enactment of the Economic Recovery Tax Act of 1981, is amended—

(A) by striking out "Subparagraph (A)(ii)" and inserting in lieu thereof "SUBSEQUENT TRANSFERS BY REASON OF DEATH.—Subparagraph (A)", and

(B) by adding at the end thereof the following new sentence: "A similar rule shall apply in the case of subsequent transfers of the property by reason of the death of such person or of a subsequent transferee.".

(4) BUY OUTS AND OTHER SPECIAL RULES.—Paragraph (1) of section 6166A(h) of such Code (relating to disposition of interest), as in effect on the day before the date of enactment of the Economic Recovery Tax Act of 1981, is amended by adding at the end thereof the following new subparagraphs:

"(E) CERTAIN BUY OUTS.—

"(i) IN GENERAL.—In the case of a limited exchange of shares of stock of a corporation, or of an interest in a partnership, for a note or other evidence of indebtedness, only that portion of the value of such shares of stock, or of such partnership interest, which is equal to the excess, if any, of—

"(I) the fair market value at the time of such limited exchange of such shares of stock or partnership interest, over

"(II) the face value of any note or other evidence of indebtedness issued by such corporation or partnership which is received in such limited exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(ii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to any disposition or withdrawal occurring after the limited exchange described in clause (i), any note or other evidence of indebtedness received in such a limited exchange shall be treated as an interest qualifying under subsection (a)(1).

"(F) LIMITED EXCHANGE.—For purposes of this paragraph, the term 'limited exchange' means an exchange of—

"(i) shares of stock of a corporation with—

"(I) such corporation, or

"(II) if such corporation guarantees any note or evidence of indebtedness received in such exchange, any shareholder or employee of such corporation who was a shareholder or employee of such corporation at all times during the period beginning 1 year prior to the date of death of the decedent and ending on the date of such exchange, or

"(ii) an interest in a partnership with—

"(I) such partnership, or

"(II) if such partnership guarantees any note or evidence of indebtedness received in such exchange, any partner in, or employee of, such partnership who was a partner in, or employee of, such partnership at all times during the period beginning 1 year prior to the date of death of the decedent and ending on the date of such exchange.

For purposes of this subparagraph, the term 'employee' has the meaning given such term in paragraph (1) or (2) of section 3121(d).

"(G) SPECIAL RULES FOR BUY OUT NOTES.—For purposes of this paragraph—

"(i) PAYMENT OF INTEREST.—The payment of interest on any note or evidence of indebtedness described in subparagraph (E) shall not be treated as a withdrawal from a closely held business or a disposition of an interest in a closely held business.

"(ii) PAYMENT OF PRINCIPAL.—The payment of any portion of the principal on any note or evidence of indebtedness described in subparagraph (E) shall be treated as a withdrawal from a closely held business.

"(iii) READILY TRADABLE NOTES.—If any note or other evidence of indebtedness described in subparagraph (E) of this paragraph becomes readily tradable (within the meaning of section 453(f)(5)), the entire interest qualifying under subsection (a)(1) in such note or evidence of indebtedness shall be treated as having been disposed of on the first day such note or evidence of indebtedness becomes readily tradable.

"(iv) ACQUISITION OF ISSUER OR GUARANTOR OF NOTE.—In the case of a note or other evidence of indebtedness which was acquired in an exchange of stock of a corporation, or of an interest in a partnership, described in subparagraph (E), the qualified acquisition of such corporation or partnership by another corporation whose stock is readily tradable and which guarantees or assumes liability on such note or evidence of indebtedness shall be treated as a disposition of the entire interest in such note or evidence of indebtedness.

"(v) QUALIFIED ACQUISITION.—The term 'qualified acquisition of a corporation' means an acquisition of at least 50 percent of—

"(I) the total combined voting power of all classes of stock of such corporation which are entitled to vote,

"(II) the total value of shares of all classes of stock of such corporation, or

"(III) the fair market value (determined at the time of such acquisition) of all assets of such corporation used in carrying on the trade or business of such corporation.

"(vi) READILY TRADABLE STOCK.—Stock is readily tradable if, at the time of a qualified acquisition, there is a market for such stock on any stock exchange or in any over-the-counter market.

"(H) INVOLUNTARY CONVERSIONS.—

"(i) CONVERSION INTO SIMILAR PROPERTY.—Subparagraph (A) shall not apply to any involuntary conversion of a portion of an interest in a closely held business which is described in section 1033(a)(1). For purposes of applying subparagraph (A) to subsequent dispositions or withdrawals, any interest in the property into which an interest in a closely held business was so converted shall be treated as an interest qualifying under subsection (a)(1).

"(ii) CONVERSION INTO OTHER PROPERTY.—In the case of an involuntary conversion of any portion of an interest in a closely held business which is described in section 1033(a)(2), only the excess, if any, of—

"(I) the amount realized on the conversion of such interest, over

"(II) the cost of qualified replacement property,

shall be treated, for purposes of subparagraph (A), as disposed of, withdrawn, or exchanged. For purposes of subsequent application of subparagraph (A), any interest in qualified replacement property shall be treated as an interest qualifying under subsection (a)(1).

"(iii) QUALIFIED REPLACEMENT PROPERTY.—For purposes of this subparagraph, the term 'qualified replacement property' means any property similar or related in service or use to the property converted which is acquired for the purpose of replacing the converted property by the executor of the estate of the decedent during the period which begins on the earliest date of the threat or imminence of requisition or condemnation and ends on the date which is 1 year after the date on which any part of the gain upon the conversion is realized.

"(I) LIKE KIND EXCHANGES.—

"(i) EXCHANGES SOLELY IN LIKE KIND.—Subparagraph (A) shall not apply to any exchange described in section 1031(a) in which an interest in a closely held business is exchanged for qualified exchange property.

"(ii) EXCHANGES NOT SOLELY IN LIKE KIND.—In the case of an exchange described in section 1031(b) in which an interest in a closely held business is exchanged, only that portion of such interest which is equal to the excess, if any, of—

"(I) the fair market value of such interest at the time of such exchange, over

"(II) the fair market value of qualified exchange property received in such exchange at the time of such exchange,

shall be treated for purposes of subparagraph (A) as disposed of, withdrawn, or exchanged.

"(iii) SUBSEQUENT DISPOSITIONS AND WITHDRAWALS.—For purposes of applying subparagraph (A) to subsequent dispositions or withdrawals, any interest in qualified ex-

change property shall be treated as an interest qualifying under subsection (a)(1).

"(iv) QUALIFIED EXCHANGE PROPERTY.—For purposes of this subparagraph, the term 'qualified exchange property' means property received in an exchange which if it were the only property received in such exchange would result in nonrecognition of gain or loss under section 1031(a).".

(5) FAILURE TO MAKE PAYMENTS.—Paragraph (3) of section 6166A(h) of such Code (relating to failure to pay installments), as in effect on the day before the enactment of the Economic Recovery Tax Act of 1981, is amended to read as follows:

"(3) FAILURE TO MAKE PAYMENT OF PRINCIPAL OR INTEREST.—

"(A) IN GENERAL.—Except as provided in subparagraph (B), if any payment of principal or interest under this section is not paid on or before the date fixed for its payment by this section (including any extension of time), the unpaid portion of the tax payable in installments shall be paid upon notice and demand from the Secretary.

"(B) PAYMENT WITHIN 6 MONTHS.—If any payment of principal or interest under this section is not paid on or before the date determined under subparagraph (A) but is paid within 6 months of such date—

"(i) the provisions of subparagraph (A) shall not apply with respect to such payment,

"(ii) the provisions of section 6601(j) shall not apply with respect to the determination of interest on such payment, and

"(iii) there is imposed a penalty in an amount equal to the product of—

"(I) 5 percent of the amount of such payment, multiplied by

"(II) the number of months (or fractions thereof) after such date and before payment is made.

The penalty imposed under clause (iii) shall be treated in the same manner as a penalty imposed under subchapter B of chapter 68.".

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply with respect to dispositions and withdrawals made after December 31, 1981.

(2) SECTION 6166A.—The amendments made by subsection (e) shall apply to estates of decedents dying before January 1, 1982, with respect to dispositions and withdrawals made after December 31, 1981.

SEC. 4. INTEREST ON ESTATE TAX FOR WHICH PAYMENT IS EXTENDED UNDER SECTION 6166.

(a) FIXED RATE OF INTEREST.—

(1) IN GENERAL.—Paragraph (1) of section 6601(j) of the Internal Revenue Code of 1954 (relating to the 4-percent rate on certain portion of estate tax) is amended to read as follows:

"(1) IN GENERAL.—If the time for payment of an amount of tax imposed by chapter 11 is extended under section 6166, interest shall be paid (in lieu of the annual rate under subsection (a))—

"(A) at a rate of 4 percent on the 4-percent portion of such amount, and

"(B) at the qualified rate on the portion of such amount which is in excess of the 4-percent portion.".

(2) QUALIFIED RATE DEFINED.—Subsection (j) of section 6601 of such Code is amended—

(A) by striking out "4-PERCENT RATE ON CERTAIN PORTION OF" in the caption thereof and inserting in lieu thereof "INTEREST RATE ON", and

(B) by adding at the end thereof the following new paragraphs:

"(4) QUALIFIED RATE.—

"(A) IN GENERAL.—For purposes of this subsection, the term 'qualified rate' means the rate which is equal to the average yield to maturity (as determined by the Secretary) during the month of December in the calendar year preceding the calendar year in which the decedent died on all outstanding obligations of the United States that mature during the month of December in the calendar year which is 13 years after the calendar year in which the decedent died, rounded to the nearest full percentage point.

"(B) DETERMINATION OF AVERAGE YIELD.—The Secretary shall determine the average yield to maturity on obligations described in subparagraph (A) for the month of December 1971, and for each month of December thereafter. Such average yield to maturity for each month of December in the years 1971 through 1981 shall be published in the Federal Register no later than by October 1, 1982, and such average yield to maturity for the month of December 1982, and for each month of December thereafter, shall be so published no later than by March 1 of the succeeding calendar year.

"(5) DEFICIENCIES.—For purposes of this subsection, the amount of any deficiency which is prorated to installments payable under section 6166 shall be treated as an amount of tax payable in installments under such section.".

(b) ESTATE TAX DEDUCTION FOR INTEREST ON ESTATE TAXES.—

(1) IN GENERAL.—Section 2053 of such Code (relating to expenses, indebtedness, and taxes) is amended by redesignating subsection (e) as subsection (f) and inserting after subsection (d) the following new subsection:

"(e) INTEREST ON CERTAIN TAXES.—In the case of an estate which elects to pay any portion of the tax imposed by section 2001 in installments under section 6166—

"(1) IN GENERAL.—For purposes of this section, there shall be treated as an administration expense an amount of interest which the executor of such estate estimates (at such time as the Secretary shall by regulations prescribe) will be paid or will accrue on—

"(A) any portion of the tax imposed by section 2001 on such estate for which the time of payment is extended under section 6166, or

"(B) any estate, succession, legacy, or inheritance tax imposed by a State on such estate,

during the period of the extension of time for payment provided under section 6166.

"(2) ADJUSTMENT TO TAXABLE ESTATE.—Proper adjustments in the taxable estate shall be made, under regulations prescribed by the Secretary, to take into account any difference between the estimate made under paragraph (1) and the actual amount of interest paid or accrued on the taxes described in paragraph (1) during the period of the extension of time for payment provided under section 6166.".

(2) SUSPENSION OF PERIOD OF LIMITATIONS ON ASSESSMENT.—Subsection (d) of section 6503 of such Code (relating to extensions of time for payment of estate tax) is amended to read as follows:

"(d) EXTENSIONS OF TIME FOR PAYMENT OF ESTATE TAX.—

"(1) ASSESSMENTS.—The running of the period of limitations under section 6501 on the making of assessments with respect to any tax imposed by chapter 11 which are due to adjustments in the taxable estate made under section 2053(e)(2) shall be suspended for the period of any extension of time for payment granted under section 6166.

"(2) COLLECTIONS.—The running of the period of limitations under sections 6501 and 6502 for collection of any tax imposed by chapter 11 shall be suspended for the period of any extension of time for payment granted under the provisions of subsection (a)(2) or (b)(2) of section 6161 or under the provisions of section 6163 or 6166.".

(c) EFFECTIVE DATES AND SPECIAL RULES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to the estates of decedents dying after December 31, 1981.

(2) CERTAIN ESTATES.—

(A) INTEREST RATE.—The amendments made by subsection (a) shall apply to estates described in subparagraph (D) with respect to amounts outstanding on January 1, 1982, or arising after such date.

(B) DEDUCTION FOR INTEREST.—The amendment made by subsection (b)(1) shall apply to estates described in subparagraph (D) with respect to estimates of interest which will accrue or be paid after December 31, 1981.

(C) ASSESSMENTS.—The amendment made by subsection (b)(2) shall apply to estates described in subparagraph (D).

(D) REQUIREMENTS.—The estate of a decedent is described in this subparagraph if—

(i) the decedent died before January 1, 1982,

(ii) the time for payment of any portion of the tax imposed by section 2001 of the Internal Revenue Code of 1954 on such estate is extended, or may be extended, under section 6166 of such Code or section 6166A of such Code (as in effect with respect to estates of decedents dying before January 1, 1982), and

(iii) the executor of such estate elects to have this paragraph apply to such estate (at such time and in such manner as the Secretary of the Treasury shall prescribe by regulations).

The executor of an estate otherwise eligible under this subparagraph to elect the application of this paragraph may elect the application of this paragraph regardless of whether such estate was allowed a deduction under subtitle A of such Code for administration expenses paid or accrued prior to January 1, 1982.

(3) EXTENSIONS UNDER SECTION 6166A.—

(A) IN GENERAL.—Except as otherwise provided in subparagraph (B), for purposes of applying sections 2053(e), 6601(j), and 6503(d) of such Code with respect to an estate described in paragraph (2)(D)—

(i) any extension of the time for payment of the tax imposed by chapter 11 of such Code under section 6166A of such Code (as in effect with respect to estates of decedents dying before January 1, 1982) shall be treated as an extension of the time for payment of such tax under section 6166 of such Code, and

(ii) any election under section 6166A of such Code shall be treated as an election under section 6166 of such Code.

(B) SPECIAL RULE FOR INTEREST RATE.—For purposes of applying subsection (j) of section 6601 of such Code with respect to an estate described in paragraph (2)(D) whose executor elected the application of section 6166A of such Code, the 4-percent portion shall be zero.

SEC. 5. DECLARATORY JUDGMENTS RELATING TO SECTION 6166.

(a) IN GENERAL.—Part IV of subchapter C of chapter 76 of the Internal Revenue Code of 1954 (relating to declaratory judgments) is amended by adding at the end thereof the following new section:

"SEC. 7479. DECLARATORY JUDGMENTS RELATING TO SECTION 6166.

"(a) IN GENERAL.—In the case of an actual controversy involving—

"(1) the extent, if any, to which an estate is eligible for the extension of time for payment of the estate tax provided by section 6166, or

"(2) whether there is an acceleration of the time for payment under section 6166(g),

upon the filing of an appropriate pleading, the Tax Court may make a declaration with respect to such issue. Any such declaration shall have the force and effect of a decision of the Tax Court and shall be reviewable as such.

"(b) LIMITATIONS.—

"(1) PETITIONER.—A pleading may be filed under this section only by the executor of the decedent's estate.

"(2) EXHAUSTION OF ADMINISTRATIVE REMEDIES.—The court shall not issue a declaratory judgment under this section unless it determines that the petitioner has exhausted all available administrative remedies within the Internal Revenue Service.

"(3) TIME FOR BRINGING ACTION.—If the Secretary sends by certified or registered mail notice of his determination of an issue described in subsection (a), no proceeding may be initiated under this section with respect to such issue unless the pleading is filed before the 91st day after the date of such mailing.

"(c) RESTRICTION ON COLLECTION AND LEVY OF ESTATE TAX.—

"(1) IN GENERAL.—Except as provided in subchapter A of chapter 70, if the executor of an estate files a petition with the Tax Court under subsection (a), no levy or proceeding in court for the collection of the tax imposed by chapter 11 on such estate shall be made, begun, or prosecuted until the decision of the Tax Court has become final (within the meaning of section 7481).

"(2) PAYMENTS UNDER SECTION 6166.—This subsection shall not apply with respect to an estate if the executor of such estate fails to make any payment of principal or interest under section 6166 on or before the date which is six months after the date on which such payment would be required under section 6166 (as determined under section 6166(g)(3)(A)) if—

"(A) in the case of a controversy involving eligibility under section 6166, such estate were eligible for the extension of time for payment under section 6166, or

"(B) in the case of a controversy involving acceleration, such acceleration did not apply to such estate.".

(b) PENALTY FOR FRIVOLOUS OR GROUNDLESS PROCEEDINGS OR PROCEEDINGS FOR DELAY.—

(1) TAX COURT.—The first sentence of section 6673 of such Code (relating to damages assessable by instituting proceedings before the Tax Court merely for delay) is amended to read as follows: "Whenever it appears to the Tax Court that proceedings before it have been instituted or maintained by the taxpayer primarily for delay or that the taxpayer's position in such proceedings is frivolous or groundless, damages in an amount not in excess of $2,500 shall be awarded to the United States by the Tax Court in its decision.".

(2) APPEALS.—Paragraph (4) of section 7482 (c) of such Code (relating to imposition of damages) is amended to read as follows:

"(4) TO IMPOSE DAMAGES.—The United States Court of Appeals and the Supreme Court shall have the power to impose damages in any case in which the decision of the Tax Court is affirmed and it appears that the notice of appeal was filed primarily for delay or that the taxpayer's position in such appeal was frivolous or groundless.".

(c) ADDITION TO ESTATE TAX FOR AMOUNT OF PAYMENT WHICH TAX COURT DETERMINES IS NOT EXTENDED OR IS ACCELERATED UNDER SECTION 6166.—

(1) NEGLIGENCE OR INTENTIONAL DISREGARD OF RULES AND REGULATIONS.—Paragraph (1) of section 6653(a) of such Code (relating to negligence or intentional disregard of rules and regulations) is amended to read as follows:

"(1) IN GENERAL.—If any part of—

"(A) any underpayment (as defined in subsection (c)(1)(A)) of any tax imposed by subtitle A, by chapter 12, or by chapter 45, or

"(B) any underpayment (as defined in subsection (c)(1)(B)) of any tax imposed under chapter 11,

is due to negligence or intentional disregard of rules or regulations (but without intent to defraud), there shall be added to the tax an amount equal to 5 percent of the underpayment.".

(2) UNDERPAYMENT DEFINED.—Paragraph (1) of section 6653(c) of such Code (relating to underpayment) is amended to read as follows:

"(1) INCOME, ESTATE, GIFT, AND CERTAIN EXCISE TAXES.—

"(A) DEFICIENCY.—In the case of a tax to which section 6211 (relating to income, estate, gift, and certain excise taxes) is applicable, a deficiency as defined in that section (except that, for this purpose, the tax shown on a return referred to in section 6211(a)(1)(A) shall be taken into account only if such return was filed on or before the last day prescribed for the filing of such return, determined with regard to any extension of time for such filing), and

"(B) PAYMENT OF ESTATE TAX.—That portion of the tax imposed under chapter 11—

"(i) which is not paid on the date prescribed by section 6151(a) for the payment of such tax (including any extensions of time granted by the Secretary), and

"(ii) with respect to which there is a determination in a decision of the Tax Court under section 7479 which has become final (within the meaning of section 7481) that the time for payment of such portion—

"(I) is not extended under section 6166(a), or

"(II) is accelerated under section 6166(g), and".

(d) CONFORMING AMENDMENTS.—

(1) Subsection (c) of section 7456 of such Code (relating to Tax Court commissioners) is amended by striking out "and 7478" and inserting in lieu thereof "7478, and 7479".

(2) Paragraph (1) of section 7482(b) of such Code (relating to venue) is amended—

(A) by striking out "or" at the end of subparagraph (D),

(B) by striking out the period at the end of subparagraph (E) and inserting in lieu thereof ", or",

(C) by inserting after subparagraph (E) the following new subparagraph:

"(F) in the case of an executor of the estate of a decedent seeking a declaratory decision under section 7479, the legal residence of the decedent.", and

(D) by striking out "or 7477" in the last sentence thereof and inserting in lieu thereof "7477, or 7479".

(3) Subsection (a) of section 7485 (relating to bond to stay assessment and collection) is amended to read as follows:

"(a) UPON NOTICE OF APPEAL.—Notwithstanding any provision of law imposing restrictions on the assessment and collection of taxes, the review under section 7483 shall not operate as a stay of assessment or collection of any portion of the amount of the deficiency determined by the Tax Court (or of any portion of estate tax for which the Tax Court determines the time for payment is not extended under section 6166 or is accelerated under section 6166(g)) unless a notice of appeal in respect of such portion is duly filed by the taxpayer, and then only if the taxpayer—

"(1) on or before the time his notice of appeal is filed, has filed with the Tax Court a bond in a sum fixed by the Tax Court not exceeding double the amount of such portion in respect of which the notice of appeal is filed, and with surety approved by the Tax Court, conditioned upon the payment of the deficiency (or of such portion of estate tax) as finally determined, together with any interest, additional amounts, or additions to the tax provided for by law, or

"(2) has filed a jeopardy bond under the income or estate tax laws.

If as a result of a waiver of the restrictions on the assessment and collection of a deficiency (or of such portion of estate tax) any part of the amount determined by the Tax Court is paid after the filing of the appeal bond, such bond shall, at the request of the taxpayer, be proportionately reduced.".

(4) Paragraph (1) of section 6503(d) of such Code (relating to extensions of time for payment of estate tax), as amended by section 4(b)(2) of this Act, is amended to read as follows:

"(1) ASSESSMENTS.—The running of the period of limitations under section 6501 on the making of assessments with respect to any tax imposed by chapter 11 which are due to—

"(A) adjustments in the taxable estate made under section 2053(e)(2), or

"(B) additions to tax made under section 6653 with respect to an underpayment (within the meaning of section 6653(c)(1)(B)(ii)(II)),

shall be suspended for the period of any extension of time for payment granted under section 6166.".

(5) Subsection (a) of section 6653 of such Code (relating to failure to pay tax) is amended by striking out "Income, Gift, or Windfall Profit" in the caption thereof and inserting in lieu thereof "Certain".

(6) The table of sections for part IV of subchapter C of chapter 76 of such Code is amended by adding at the end thereof the following new item:

"Sec. 7479. Declaratory judgments relating to section 6166.".

(e) EFFECTIVE DATES AND SPECIAL RULE.—

(1) DECLARATORY JUDGMENT.—

(A) IN GENERAL.—Except as provided in subparagraph (B), the amendment made by subsection (a) shall apply with respect to the estates of decedents dying after December 31, 1982.

(B) ACCELERATION.—In the case of an actual controversy with respect to whether there is acceleration under section 6166(g) or 6166A(h) of such Code, the amendment made by subsection (a) shall apply with re-

spect to dispositions and withdrawals made after December 31, 1982.

(2) TAX COURT PENALTY.—The amendment made by subsection (b)(1) shall apply to pleadings filed with the Tax Court after the date of enactment of this Act.

(3) APPEALS FROM TAX COURT.—The amendments made by subsection (b)(2) and paragraphs (2) and (3) of subsection (d) shall apply with respect to notices of appeal filed after the date of enactment of this Act.

(4) ADDITION TO ESTATE TAX; CERTAIN CONFORMING AMENDMENTS.—The amendments made by subsection (c) and paragraphs (1) and (4) of subsection (d) shall take effect on the date of enactment of this Act.

(5) EXTENSIONS UNDER SECTION 6166A.—For purposes of applying sections 6653, 7479, and 7485 of such Code, an actual controversy involving acceleration of the time for payment under section 6166A(h) of such Code (as in effect with respect to estates of decedents dying before January 1, 1983) shall be treated as an actual controversy involving acceleration of the time for payment under section 6166(g) of such Code.

By Mr. SYMMS (for himself, Mr. MCCLURE, Mr. ARMSTRONG, Mr. JEPSEN, Mr. BOREN, Mr. HELMS, Mr. GRASSLEY, Mr. WALLOP, Mr. TOWER, Mr. GARN, Mr. THURMOND, Mr. HEFLIN, Mr. PRYOR, and Mr. MURKOWSKI):

S. 1252. A bill to amend the Internal Revenue Code of 1954 to repeal the tax on generation-skipping transfers; to the Committee on Finance.

REPEAL OF TAX ON GENERATION-SKIPPING TRANSFERS

Mr. SYMMS. Mr. President, could you imagine a tax being imposed that nobody could understand; that costs the private sector hundreds of thousands of dollars to try to understand and implement; for which the IRS has not yet published key regulations which are essential to understanding and implementing the law; which costs the Government more to administer than it is supposed to collect; which has not yet collected one red cent; and which the Department of the Treasury now admits is totally unworkable? Does this sound like a tax that would be imposed by the Duchy of Fenwick? No, it is a tax that is supposed to be imposed by the U.S. Department of the Treasury and which has been on the books since it was thrown into the 1976 Tax Reform Act during a 2 a.m. conference session.

What is this tax? It is the generation-skipping transfer tax, and it is time for it to be repealed.

The generation-skipping transfer tax is extremely complex and costly to administer. It is, in fact, so complex that even the most knowledgeable individual or corporate fiduciaries, insurance people, accountants, and attorneys, all of whom are affected by this tax, are finding it extremely difficult to interpret or apply.

The generation-skipping transfer tax can never be defended on revenue grounds. According to the Joint Tax Committee, this tax is projected to have no revenue effect in its early years and they hope to generate $400 million of revenue to the Treasury in its 20th year. However, the private sector has spent hundreds of thousands of dollars in attempting to understand and implement the law and to no avail. Two volumes, each the size of the yellow pages, have been published in an attempt to comprehend the law. Clearly, the tax is regressive since it does not collect any revenue but is costing the private sector significant sums of money to try and comply with the law.

While the generation-skipping transfer tax cannot be defended on revenue grounds, neither can it be defended on the ground that the statute can be made to work. There are numerous, complicated, analytical steps that must be followed in order to determine whether any amounts are held in trust that will be subject to the generation-skipping transfer tax. This analytical process often results in an unexpected and inequitable application of the tax.

There are at least 14 key defined terms to master under chapter 13, as well as a handful of other terms not actually defined, but nevertheless, essential to the operation of the statute. As if this were not enough the generation-skipping transfer tax has no antecedent in prior law, meaning that an estate planner's comprehension of Federal estate and gift tax concepts is of little value when grappling with chapter 13.

Furthermore, significant portions of the tax relating to generation-skipping transfer taxation are not in the statute and remain to be written. In particular, there are eight places on the face of chapter 13 where important rulemaking authority is delegated to the Secretary and, for good measure, there is a ninth resort to the Secretary, this one for information as opposed to rulemaking. None of these nine delegations has been discharged by issuance of final regulations, even though the first date upon which a taxable generation-skipping transfer may have occurred was June 12, 1976.

There are many complex provisions in the Internal Revenue Code, but perhaps none of such wide-ranging application as those relating to the generation-skipping transfer tax. Even to the few attorneys who enjoy the status of expert in estate planning affairs, chapter 13 presents difficulties which are insurmountable.

As an example, according to a survey done at an American Bar Association nationwide meeting, only one attorney thought he comprehended most of the statute. Furthermore, the American Bar Association recently endorsed repeal of the generation-skipping transfer tax at their 1981 annual meeting.

It is important to note that the question of complexity extends far beyond wills and trusts and those who prepare and sign them. Chapter 13 applies also to a broad range of so-called trust equivalents, arrangements which, while not generation-skipping trusts, are deemed to have substantially the same effect as a generation-skipping trust. (IRC S2611(d)(1).)

Practitioners were surprised to learn that in recently issued proposed regulations both estates and custodianships under Uniform Gifts to Minors Acts are considered by the Treasury Department to be among the trust equivalent arrangements to which chapter 13 applies. These arrangements are so commonplace, so fixed in character, so finite in duration, and so far removed from the sort of conduct to which chapter 13 is directed that extension of the generation-skipping transfer tax rules to these devices is sure to result in the uninformed failure to comply with chapter 13 on a grand scale.

The foregoing indicates to many a clear and present danger to this country's voluntary compliance tax system. On the one hand, many will fail to comply with the requirements of chapter 13 simply out of ignorance. On the other hand, some will be encouraged to ignore chapter 13 in the belief that it is impossible for the Government to effectively enforce the tax and that, even in the event that a failure to comply is discovered, a plea of ignorance may appear to have sufficient validity to forestall the application of the penalty provisions.

If the Federal Government is to police the tax effectively, it must devise a system to keep track of all trust beneficiaries and all trustees under the hundreds of thousands of generation-skipping trusts in existence. It must know when and how much property is added to all preexisting trusts in order to determine the extent to which existing trusts have become subject under chapter 13. It must know when and in what fashion powers of appointment are exercised under generation-skipping trusts, and when interests or powers under such trusts are disclaimed or assigned.

In addition, the Federal Government must stockpile similar information as to the multiple of trust equivalent arrangements subject to the tax. Moreover, the Federal Government must acquire and store gift and estate tax information as to every person classified as a deemed transfer with respect to any generation-skipping transfer and must be prepared to supply that information to each form 706-B tax return preparer upon request.

The incredible amount of information that is required would seem to be beyond the storage capacity of any known computer. Even with active help from the taxpaying community, the collection and constant updating

of the required data is an exercise the magnitude of which boggles the mind. Proper staffing to administer and collect the generation-skipping transfer tax would have to be immense. Given the complexity of chapter 13, the training process alone seems overwhelming, and the number of civil servants needed to receive, analyze, store, sort, and respond to the required chapter 13 information would have to be staggering.

Clearly, the generation-skipping transfer tax reinforces the notion that the Government not only wants to collect revenue but that the Government is trying to punish the taxpayers in the process. And, in this case, no revenues have yet been collected.

The only time that the tax might work is if every individual in the estate plan dies in order. If an individual dies out of order, then the wrong generation might be taxed. I know in the years that I have served as a Member of Congress, that the Congress has been able to do many things but there is one thing I am sure of and that is that Congress will never be able to make individuals understand or comply with this law, and more important, I do not believe that we will ever be able to make people die in order.

Mr. President, I would like to ask unanimous consent that the bill be reprinted in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

SECTION 1. REPEAL OF CHAPTER 13.

(a) IN GENERAL.—Subtitle B of the Internal Revenue Code of 1954 is amended by striking out chapter 13 (relating to tax on certain generation-skipping transfers).

(b) CONFORMING CHANGES.—

(1) Section 303 of such Code (relating to distribution or redemption of stock to pay death tax) is amended by striking out subsection (c).

(2) Subsection (c) of section 691 of such Code (relating to deduction for estate tax) is amended by striking out paragraph (3) and by redesignating paragraphs (4) and (5) as (3) and (4), respectively.

(3) Section 2013 of such Code (relating to credit for tax on prior transfers) is amended by striking out subsection (g).

(4) Section 667 of such Code (relating to tax on accumulation distribution) is amended by striking out paragraph (6) of subsection (b).

(5) The analysis chapters for subtitle B of the Internal Revenue Code of 1954 is amended by striking out the item relating to Chapter 13.

(6) The first sentence of subsection (a) of section 7517 of such Code (relating to furnishing on request of statement explaining estate or gift tax valuation) is amended to read as follows: "If the Secretary makes a determination or a proposed determination of the value of an item of property for purposes of the tax imposed under chapter 11 or 12, he shall furnish the written request of the executor or donor (as the case may be) a written statement containing the material required by subsection (b) to such excutor or donor.".

(c) ADDITIONAL TECHNICAL AND CONFORMING CHANGES.—The Secretary of the Treasury shall, within 90 days after the date of enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives, and to the Committee on Finance of the Senate, a draft of any technical and conforming changes in the Internal Revenue Code of 1954 which are necessary to reflect throughout such Code the changes in the substantive provisions of law made by this Act.

SEC. 2. EFFECTIVE DATE.

The amendments made by section 1 shall take effect on October 4, 1976, but apply to any generation-skipping transfer (within the meaning of section 2611(a) of the Internal Revenue Code of 1954) made after June 11, 1976 and refund claims with respect to such transfers filed within two years after the date of enactment of this Act shall be allowed with interest.

By Mr. HART (for himself, Mr. HEINZ, and Mr. CRANSTON):

S. 1253. A bill to authorize negotiations directed toward opening foreign markets to U.S. exports of high-technology products and for other purposes; to the Committee on Finance.

HIGH TECHNOLOGY TRADE ACT OF 1983

● Mr. HART. Mr. President, I am today introducing the High Technology Trade Act of 1983. This legislation addresses an issue of paramount importance to America's economic future—the strength and international competitiveness of our high technology industries. This bill focuses on high technology for a simple, yet profound, reason: High technology today, like steel before it, is seminal—it will provide the key technological infrastructure on which our future economy will be built.

I introduced this bill 1 year ago, in April 1982, and was gratified to see that its major provisions were incorporated into the Reciprocal Trade and Investment Act both last year and this year. I am reintroducing it because the need to deal constructively and head-on with the problems and challenges confronting our high-technology industries are, if anything, greater today than they were 1 year ago.

The bill has three major provisions. First, it authorizes the President to negotiate bilaterally or multilaterally, on high-technology trade and investment issues. Second, it affirms our commitment to national treatment in trade and investment. And third, it establishes a system to monitor and report on practices which distort trade and investment flows and to offer proposed remedies.

Before discussing the specific provisions of the bill in more detail, I would like to make two general points about it:

First, this bill seeks across-the-board elimination of barriers for a broad range of high-technology products. It tells the President to use the trade tools at his disposal to resolve disputes, rather than to close markets which exacerbate them. And it is farsighted; negotiating from today's leadership position will be much less costly than more intrusive Government intervention should we fall behind.

Second, the bill, by itself, will not insure the future health and growth of our high-technology industries. Important as international issues are, our responses to these industries' domestic needs—for increased capital formation, adequate R&D channels and opportunities, and adequate numbers of trained scientists and engineers—will be vitally important as well.

NEED FOR THE BILL

America is engaged in a global economic contest of great risk but high promise. The arena is trade. In it, our major commercial rivals are also our most important political allies. From it can come either prosperity for all participants or failure and global depression. America's choice of policies will be crucial to the outcome.

Over two centuries ago. Tom Paine could exult that America was remote "from all the wrangling world." In place of that isolation, we are now inextricably engaged in the international economy. We are the strongest competitor, but that position is being fiercely challenged. We can no longer produce all that we need nor absorb at home all that we produce. We must have other markets and other suppliers, and we must have a strategy to insure a growing global marketplace and an expanding American portion of the commerce in it.

We need this bill now because: First, high-technology industries are critical to our economy's future; second, their growth is hindered by restrictive trade and investment barriers abroad; and third, the Special Trade Representative must have negotiating authority to insure that GATT provisions keep pace with rapid developments in this area.

As I have repeatedly emphasized, most recently in my book, "A New Democracy," high technology is transforming our economy—bringing a depth, scope, and magnitude of structural change comparable to the change brought by the industrial revolution.

The high-technology sector itself will grow tremendously in the next decade. Even more important, however, is the role high-technology products—semiconductors, robots, microchips, computer-aided manufacturing systems—will play in revitalizing our traditional manufacturing industries. By greatly boosting productivity, high-technology products can transform manufacturing industries into modern, efficient, international competitors.

But our high-technology industries will not survive, let alone thrive, if they are unable to compete effectively in a free, open, international trading

environment. Today, restrictions on U.S. access to foreign markets and other forms of intervention by foreign governments reduce our ability to compete.

The bill's focus on high technology is not at odds with the GATT framework. The civil aircraft case provides a strong precedent of multilateral agreement on a sectoral issue achieved within GATT. That agreement was directed at eliminating the adverse effects of a myriad of trade-distorting measures, encouraging continual worldwide innovation, and insuring that producers of all signatory nations are provided fair and equal competitive opportunities. The high-technology sector is an even stronger candidate for international negotiation and agreement.

Thus, although I believe a sectoral approach to most international trade problems is neither necessary nor appropriate, a sectoral focus is the most effective approach to current high-technology trade issues.

PROVISIONS OF THE BILL

First, the bill authorizes a mandate for major new international negotiations to open markets for U.S. high-technology trade and investment, and provides the means for implementing any agreement. In short, new tariff negotiating authority is granted with respect to high-technology products. Existing trade laws provide a range of remedies to deal with unreasonable or unjustifiable foreign practices. However, the bill adds important flexibility to amicable and prompt international settlement of trade distortions that result from foreign governments' industrial policies. The bill also covers investment-related issues not covered by existing law, and should help avoid the need to take ill-advised trade actions in response to investment restrictions abroad.

Specifically, the bill authorizes the President to enter into bilateral or multilateral agreements to address specific problem areas: Discriminatory public and private procurement; reduction and elimination of tariffs; national treatment of investment; access to joint research opportunities and results; the free flow of nonstrategic technology; and the monitoring of trade and investment activities. To carry out these agreements, the President may modify tariff treatment or submit proposed changes in U.S. laws to Congress.

By expanding the scope of Presidential response and allowing the President to address a wider range of unfair market barriers, such agreements should help insure the maintenance of the consensus achieved through mutual concessions which forms the foundation of GATT. Such bilateral agreements should be the stepping stone to establishment of a comprehensive multilateral framework for dealing with high-technology issues.

The second major provision—"national treatment"—essentially provides for U.S. firms operating in a foreign country to receive treatment equivalent to domestic firms. This is a widely advocated objective. The report of the Japan-United States Economic Relations Group recommended that U.S. production affiliates in Japan should "* * * be allowed by the respective governments to participate in government research and development and procurements on the basis of equal national treatment." National treatment extends to all areas, including access to capital markets and ability to recruit engineering talent. The joint economic semiconductor study stated forcefully: "In electronics, open trade will require open borders and national treatment for foreign companies. The alternative is, simply, a fruitless segmentation of world markets and endless international trade conflict."

Finally, the bill contains a number of monitoring and reporting requirements. The Secretary of Commerce is directed to report annually to Congress, describing any policies of developed or advanced developing countries that significantly distort trade and investment flows and harm U.S. high-technology industries. It would also describe steps the administration proposes to take to remedy the adverse effects of those measures and of dumping or subsidization. The act's implementation will be monitored by the Secretary of Commerce who will report to the President on trade and investment levels and conditions of competition and market conditions. Such monitoring is strongly recommended in the 1982 Annual Report of the Joint Economic Committee: "* * * it is vital that the U.S. Government * * * become fully equipped to monitor developments in world semiconductor markets, especially Japan."

The bill in no respect requires the U.S. Government to depart from strict adherence to international obligations of the United States. U.S. trade laws provide the domestic means for the President to take action pursuant to U.S. rights under international agreements. While these rights do not always provide the means to solve international disputes, the measures authorized under the bill are discretionary and can be used solely in conformity with international agreements.

It is clear that the strength and vitality of the U.S. economy will depend significantly on the health of our high-technology industries. We must move toward an international trade and investment system that provides them the maximum opportunity for continued innovation and growth. This bill will help provide such a system, thereby meeting the dual objectives of helping to insure the continued health of high-technology industries and helping to strengthen and protect the multilateral GATT trading system.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1253

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "High Technology Trade Act of 1982".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the growth and maintenance of an open world economy for trade and investment is in the national interest and in the interest of the United States high technology industries;

(2) international competition in high technology products is increasingly characterized by a high degree of government intervention through central planning joint establishment of industrial objectives, subsidization, anticompetitive practices tolerated or fostered by government policy, denial of national treatment, nontariff and tariff barriers, investment performance requirements, access to preferential financing, and sponsorship of limited-access joint research projects;

(3) the strength, vitality, and innovativeness of United States high technology industries are essential to the national security and the national defense, the future development of the United States, economy, and the competitiveness of United States industry in international trade; and

(4) domestic policies play a critical role in determining the international competitiveness of United States high technology companies, and therefore the United States should take into account the importance of providing a favorable domestic economic environment for United States high technology industries in order to preserve United States international competitiveness.

(b) PURPOSES.—The purposes of this Act are—

(1) to obtain and preserve the maximum openness with respect to international trade and investment in high technology, and

(2) to strengthen the international trading system as embodied in the General Agreement on Tariffs and Trade and related agreements.

SEC. 3. NEGOTIATING MANDATE.

(a) PRESIDENTIAL AUTHORITY.—The President is authorized to enter into such bilateral or multilateral agreements as may be necessary or appropriate to achieve the purposes of this Act.

(b) AGREEMENTS.—Agreements under this Act may include, but need not be limited to—

(1) a commitment that official policy of signatory countries will not discourage government or private procurement of foreign high technology products or services;

(2) the reduction and elimination of all tariffs on, and other barriers to, imports of high technology products, including, but not limited to—

(A) the acceleration of the full concession tariff rates on high technology products agreed to during the Tokyo Round of trade negotiations; and

(B) the elimination of any tariff which on the date of enactment of this Act is 5 percent ad valorem (or ad valorem equivalent) or less;

(3) a commitment to provide national treatment;

(4) a commitment to foster the pursuit of joint sceintific cooperation by companies of signatory countries through such measures as financial participation, and technical and personnel exchanges, in areas of mutual interest; and

(5) a commitment—

(A) to guarantee participation by business entities of signatory countries in industry or industry and government-sponsored cooperative research and development projects and access to the results of such projects, and

(B) not to interfere with the outward flow of nonstrategic technology.

(c) ACTIONS BY PRESIDENT TO CARRY OUT AGREEMENTS.—In order to carry out any agreement concluded under this Act, the President is authorized with respect to products which he deems to be high technology products—

(1) to proclaim, pursuant to the procedures governing tariff agreements in title I of the Trade Act of 1974, such modification of continuance of any existing duty-free or excise treatment, or such additional duties, as he determines to be required or appropriate; and

(2) to utilize the procedures contained in sections 102 and 151 of the Trade Act of 1974 (and corresponding provisions of law) in the event that changes in United States laws are required or appropriate.

(d) CHANGES IN LAW.—The President is authorized to include in any agreement concluded under this Act commitments to make changes in United States laws, regulations, and policies that are considered necessary and appropriate to ensure the continued competitiveness in open international markets of the United States high technology industries. Such changes shall be considered by Congress as provided in subsection (c)(2) of this section.

SEC. 4. ADDITIONAL ACTIONS TO OBTAIN FOREIGN MARKET ACCESS.

(a) DETERMINATIONS BY PRESIDENT REGARDING NATIONAL TREATMENT.—

(1) IN GENERAL.—In order to ensure that national treatment is accorded by a key country to—

(A) United States high technology companies for sales in such country, and

(B) United States persons for investments in high technology industries in such country,

the President shall, on a continuing basis, determine whether such country is taking actions sufficient to provide national treatment in such country for United States exports of high technology products and United States investments in high technology industries.

(2) BASIS OF DETERMINATIONS.—The President shall base the determinations under paragraph (1) of such product categories as are deemed appropriate in accordance with the procedures established under such paragraph.

(b) ACTIONS INVOLVING NEGATIVE DETERMINATIONS.—If the President determines under subsection (a) that a key country is not providing national treatment, the President shall promptly enter into consultations with such country with a view to establishing national treatment in such country and achieving the purposes of this Act. If such consultations do not provide the means to obtain this objective, the President shall promptly consider taking such actions within his power as he deems necessary or appropriate under trade agreements to which the United States is a party and under provisions of United States law.

SEC. 5. EFFECTS OF FOREIGN INDUSTRIAL POLICY.

(a) REPORT BY SECRETARY OF COMMERCE.—The Secretary of Commerce, in consultation with the United States Trade Representative and the High Technology Industry Advisory Committee established under section 6(c), shall analyze and report annually to the Congress—

(1) the extent to which any key country utilizes industrial policies or measures which significantly distort international trade or investment flows and which have or may have substantial adverse effects on any United States high technology industry; and

(2) the steps which the President is taking or proposes to take domestically and internationally to remedy any adverse effects determined under paragraph (1), including any adverse effect arising out of any action which results in the subsidization of articles imported into the United States or the sale of such articles at less than fair value in the United States market.

(b) SCOPE OF ANALYSIS.—The analysis under subsection (a) shall include an analysis of—

(1) any foreign government industrial policies and measures—

(A) which are designed to enhance, or having the effect of enhancing, the international competitiveness of a foreign high technology industry, or

(B) which increase the rate of savings and investment, decrease consumption, channel private or public financial or other resources to favored industries, or otherwise have the effect of increasing high technology exports, and

(2) specific foreign government industrial policies and measures such as—

(A) subsidies,

(B) toleration of cooperation among firms, or

(C) other anticompetitive activities, including allocation of product or geographic markets, exclusive of nonstrategic joint research and development activities, and other export-enhancing or import-inhibiting practices.

(c) OTHER PRESIDENTIAL ACTIONS.—If the President determines under subsection (a) that a foreign country has foreign industrial policies on measures which—

(1) significantly distort international trade or investment to the detriment of any United States high technology industry; or

(2) may result in sales of articles at less than fair market value in the United States market or subsidization of articles imported into the United States and cause, or threaten to cause, material injury to any United States high technology industry,

the President shall take whatever steps within his power that he deems are necessary or appropriate (including entering into agreements) to obtain the elimination of such practices or offset their adverse effects.

(d) DEFINITIONS.—For purposes of this section, the terms "less than fair value" and "material injury" have the same meaning as in title VII of the Tariff Act of 1930 (19 U.S.C. 1671 et seq.).

SEC. 6. MONITORING OF KEY COUNTRIES; REPORTS.

(a) ANALYSIS OF COMPETITIVE OPPORTUNITIES.—The Secretary of Commerce shall establish a mechanism to analyze high technology trade and investment patterns in key countries to evaluate competitive opportunities offered in foreign markets, and to futher the objectives of this Act. The Secretary of Commerce shall prepare and publish annually a report to the President containing the results of his analysis which shall include, but not be limited to, information with respect to—

(1) United States exports and imports of high technology products to and from such key countries;

(2) direct and indirect investment flows;

(3) the conditions of competition in such countries, including the nature and extent of intercompany cooperation and coordination in joint research and development, market allocation, and the development and implementation of industrial objectives; and

(4) the nature and extent of government intervention, including the development of industrial objectives, the financing of research and development, the providing of financial, tax, and other incentives, and the directing of procurement.

(b) REPORT TO THE PRESIDENT.—

(1) REPORT.—The United States Trade Representative and the Secretary of Commerce shall, after consultation with the Advisory Committee established under subsection (c), report annually to the President with respect to measures enumerated in the report submitted under subsection (a)—

(A) which they consider to be a violation of United States international agreements, or

(B) which are unjustifiable, unreasonable, or discriminatory and a burden or restriction on United States high technology products, services, or investments.

(2) ACTION BY PRESIDENT.—The President shall consider what action may be taken under the laws of the United States and trade agreements to obtain the reduction or elimination of such measures.

(c) ADVISORY COMMITTEE.—The Secretary of Commerce and the United States Trade Representative shall—

(1) establish a High Technology Industry Advisory Committee comprised of representatives of interested high technology industries, and

(2) fully consult with the Committee with respect to actions under this Act relating to—

(A) the preparation of negotiating positions,

(B) the conclusion of any agreement,

(C) the imposition of any restriction, and

(D) the monitoring of the results of any such agreement or restriction.

The provisions of section 135 (f) of the Trade Act of 1974 shall apply to the Committee.

SEC. 7. DEFINITIONS.

(a) OPENNESS OF FOREIGN MARKETS.—For the purpose of this Act, openness of international trade and investment shall be measured by reference to—

(1) the existence of structural barriers to United States trade and investment;

(2) structural advantages enjoyed by foreign companies by virtue of an absence of fully competitive market conditions in their home markets;

(3) the extend to which national treatment is afforded United States investments to produce and sell high technology prod-

ucts and services for sale in the local market of a major developed country;

(4) in the case of key commodity components (for example, random access memories (RAMs)), the extent to which sales in a major developed country of such products manufactured by United States companies in the United States or abroad, taking into account the relative size of markets, are less than sales of those products in other international markets where more open conditions of competition prevail; and

(5) such other factors as the United States Trade Representative and the Secretary of Commerce shall prescribe.

(b) NATIONAL TREATMENT.—The term "national treatment" shall include, but not be limited to, treatment not less favorable than that accorded to any national with respect to—

(1) the freedom of establishment of a market,

(2) taxation and financial incentives,

(3) nonstrategic government purchasing and public contracts,

(4) internal regulations and practices, and

(5) freedom to participate in joint research and development activities and in other national programs designed to foster the growth of high technology industries.

(c) KEY COUNTRY, ETC.—For the purpose of this Act—

(1) the term "key country" means Japan, the European Economic Community, any individual member country of the European Economic Community, Canada, and any foreign country (including any newly industrialized country) designated by the President as a key country for any purpose of this Act, and

(2) the term "newly industrialized country" means Korea, Taiwan, Malaysia, Brazil, Argentina, Hong Kong, Singapore, Spain, Mexico, and Israel.●

By Mr. GORTON (for himself and Mr. JACKSON):

S. 1254. A bill to authorize, within available funds, the construction of a bridge approach at Clarkston, Wash.; to the Committee on Environment and Public Works.

BRIDGE APPROACH AT CLARKSTON, WASH.

Mr. GORTON. Mr. President, today I am pleased to introduce with Senator JACKSON legislation which would authorize, within available funds, the construction of a bridge approach at Clarkston, Wash.

Senator JACKSON and I introduced similar legislation during the last session of Congress but, unfortunately, the bill was not acted upon before adjournment.

The U.S. Army Corps of Engineers has recently constructed a bridge over the Snake River from Clarkston, Wash., to Lewiston, Idaho. The legislation authorizing the construction of this bridge did not include an authorization for construction of this necessary approach ramp. This bridge approach connection is essential to the bridge access plan, and will assure a good and orderly flow of traffic in Clarkston.

The approach can be built within the spending limit which was authorized for the bridge alone, because it was not necessary to obligate the total authorization to complete the bridge. The legislation we are introducing today will not result in an outlay in excess of that already contemplated. It simply redefines the bridge project limits to include the approach ramp, thereby allowing the expenditure of authorized funds for this purpose.

I believe this legislation will accomplish what is necessary to aid in the completion of the bridge access plan and I urge my colleagues to join me today in supporting the prompt enactment of this legislation so that this project can be brought to a successful conclusion.

Mr. JACKSON. Mr. President, I am pleased to join Senator GORTON in introducing legislation which would redefine the limits of the original Lewiston-Clarkston Bridge project.

This legislation is required to permit the U.S. Army Corps of Engineers to construct a 1,600-foot segment of road to connect the Lewiston-Clarkston Bridge with 16th Avenue in Clarkston, Wash.

I understand that this legislation will require no additional appropriations and I am hopeful that the Senate Public Works Committee will move quickly on this measure.

Mr. President, I ask unanimous consent that the text of the bill, together with letters from Charles Collins, an Asotin County commissioner, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1254

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 164 of Public Law 94-587 (90 Stat. 2917 et seq.), as amended, is amended further by adding at the end of such section the following sentence: "Within sums available under this section, the Secretary is authorized to construct an approach roadway from the end of the Washington State Route 129 overpass of the bridge authorized by this section to Sixteenth Avenue in the city of Clarkston, Washington."

ASOTIN COUNTY,
Asotin, Wash., June 1, 1982.

Re Lewiston-Clarkston Bridge.
Hon. HENRY JACKSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR JACKSON: Again we find we must seek your help in obtaining an acceptable finished bridge project. On March 15, 1982, after being advised that at least $750,000 of the $23.2 million authorized for the design and construction of the new Lewiston-Clarkston Bridge would not be spent, Asotin County and the city of Clarkston made a request to the U.S. Army, Corps of Engineers to utilize the excess funds for the design and construction of an extension of the bridge centerline. The extension would follow the bridge centerline Westerly approximately 1,600 feet to an intersection with 16th Avenue, an existing County Road. The present project terminates at SR 129, a State Highway, and does not accommodate thru-traffic movements nor does it connect directly to the local street system. A copy of the Clarkston Urban Area map which shows the requested extension in red is attached for your reference.

Our request was flatly denied by the Corps of Engineers because it was their opinion that the extension was beyond the legislative intent. After meeting with the Corps representatives concerning their opinion, we were advsied that the legislative intent was defined by Design Memorandum No. 41 dated October, 1978 and said document was approved by all local agencies. Although we did approve the Design Memorandum, we were not aware that such approval would prevent the construction of this approach extension if funds were available. Prior to our approval we objected strenuously to the omission of tis approach and approved of the document only after cost estimates were presented which indicated the basic project cost would exceed the authorized spending limit. The approach extension was and still is a vital link in the bridge access scheme.

Now we seem to be in a Catch-22 situation i.e., we need the approach connection but have no local funds for construction, and the Corps of Engineers has spending authority, but cannot perform work beyond the project limits set by Design Memorandum No. 41. Therefore, your assistance is requested in supplying a solution to the dilemma.

It is our understanding that new legislation is necessary to re-define the scope of the project. The Corps of Engineers has volunteered to draft the necessary legislation but we have not received a copy to date. Your inquiry as to the status of the draft legislation and sponsorship of said legislation will be greatly appreciated.

Very truly yours,
CHARLES S. COLLINS,
Chairman, Asotin
County Commissioners.

ASOTIN COUNTY,
Asotin, Wash., July 26, 1982.

Re Lewiston-Clarkston Bridge, 16th Avenue Approach Extension.
Hon. HENRY JACKSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR JACKSON: Enclosed for your review and use is a copy of the cost estimate, prepared for this Board by the County Engineer, for extending the Lewiston-Clarkston (Southway) Bridge centerline westerly approximately 1,600 feet to an intersection with 16th Avenue. The enclosed estimate indicates the cost for two (2) alternatives. Alternate No. 1 is for a four (4) lane roadway whereas Alternate No. 2 is for a two (2) lane roadway. Due to compatibility with the present four (4) lane bridge and the longevity of the completed facility, Alternate No. 1 is the preferred option.

Hopefully this information will prove useful should a question arise concerning the cost of the extension. Your continued efforts in our behalf to allow the construction of this needed approach extension to commence are appreciated.

Very truly yours,
CHARLES S. COLLINS,
Chairman, Asotin
County Commissioner.

COUNTY OF ASOTIN,
OFFICE OF COUNTY ENGINEER,
Asotin, Wash., July 26, 1982.

Subject: Southway Bridge, 16th Avenue Connection.

To Board of County Commissioners.

As per your request this office has attempted to estimate the cost of extending the Southway Bridge centerline, westerly approximately 1600 feet, to an intersection with 16th Avenue. Since no roadway designs have been completed the estimates should be considered rough and are presented as lump sum costs only.

Alternate No. 1—Approach extension to consist of four (4) travelled lanes with ten (10) foot shoulders, and left turn channelization at SR 129 overpass and 16th Avenue intersection. Estimated cost to include 48" diameter storm drain, catch basins, asphaltic curb, asphaltic concrete pavement 0.25 feet, 0.67 feet base course, 0.25 feet top course, additional street lighting at 16th Avenue, and other minor items.

Preliminary engineering	$40,000
Contract construction	400,000
Construction engineering and contract at 10 percent	40,000
Estimated total cost	480,000

Alternate No. 2—Approach extension to consist of two (2) travelled lanes with eight (8) foot shoulders and left turn channelization at SR 129 overpass. Estimated cost to include bituminous surface treatment, 0.67 feet base course, 0.33 feet top course, and other minor items.

Preliminary engineering	$40,000
Contract construction	175,000
Construction engineering and contract at 10 percent	17,500
Estimated total cost	232,500

Alternate No. 1 is obviously the preferred option because it will provide a completed facility with at least a 20 year design life and lower annual maintenance costs. Alternate No. 2 would provide a functional facility for the next 10 years but would require periodic sealing to maintain the surface.

MICHAEL A. MURRAY.

By Mr. SPECTER (for himself and Mr. RIEGLE):

S. 1255. A bill to establish the Northeast-Midwest States Federal Hydropower Financing Authority; to the Committee on Energy and Natural Resources.

NORTHEAST-MIDWEST STATES FEDERAL HYDROPOWER FINANCING AUTHORITY ACT

Mr. SPECTER. Mr. President, today with Senator RIEGLE, I am introducing the Northeast-Midwest States Federal Hydropower Financing Authority Act. This legislation was the subject of hearings held last year by the Subcommittee on Water and Power of the Committee on Energy and Natural Resources. The testimony at the hearing clearly established two basic points which underscore the need for this legislation. First, that there is a real potential for hydropower in the Northeastern-Midwestern States that is both economically feasible and environmentally sound, and second, that lack of financing is the major impediment to the development of this old-new energy source.

The debate over natural gas has served to heighten my concern that we have failed to harness effectively and fully the Northeast-Midwest regions indigenous energy resources, notably water power and coal. The last decade was witness to a quadrupling of national expenditures for energy, rising from $83 billion in 1970 to $378 billion in 1980. While prices rose everywhere, the gap in energy costs between regions widened dramatically, compounding the severe economic problems of the older, industrialized States of the Northeast and Midwest. During that period, household energy bills in the Northeast-Midwest region jumped from an average of $362 to $1,191 while residential costs to consumers in the South increased from $286 to $896, and in the West, from $263 to only $676.

The fact is the Northeast-Midwest has an abundant, but largely unused, source of energy in its waterpower. The Army Corps of Engineers estimates that the States of the Northeast and Midwest contain half of the feasible hydro sites and 20 percent of the potential hydro-generating capacity. A 1981 study by the U.S. Department of Energy concluded that—

Development of this renewable energy resource could help reduce the energy needs of the Great Lakes area and significantly reduce the Nation's dependency on foreign oil—up to 20 million barrels of oil per year.

The Congressional Research Service concluded in a recent study that the States of the Pacific Northwest and Northeast have the greatest installed capacity, the greatest potential capacity, and the greatest potential for future developments of small-scale hydropower. Yet, despite convincing evidence of the capacity of small-scale hydropower to reduce high energy costs and our dependence on foreign oil, it remains a largely untapped resource in our region.

At the hearing, a succession of witnesses testified that financing remains the chief obstacle to hydropower development in our region. It is more than a matter of coincidence that, with the exception of Hawaii, only the Northeastern and Midwestern States lack access to Federal support for hydropower development via one of the five Federal power marketing authorities.

To correct this oversight, we are introducing the Northeast-Midwest States Hydropower Financing Authority Act. Under this legislation, States in the Northeast and Midwest will have the option of joining this regional financing authority, thereby becoming eligible to apply for lower cost loans and loan guarantees to cover up to 70 percent of the costs associated with hydropower development. Interest rates on loans would reflect the Government's cost of borrowing. State and municipal power authorities, interstate river commissions, and consumer and stockholder-owned electric utilities located in member States would have access to financing through the new authority. Congress will have two opportunities to review projects before funds can be committed, during the authorizations and appropriations process. In addition, this bill directs the U.S. Army Corps of Engineers, in coordination with the Power Marketing Administration, to complete for each member State a review of available hydropower sites, incorporating data from the Army Corps' recently completed national hydroelectric power resources study.

Some may argue that sufficient financial incentives are already in place to encourage the development of hydropower and this legislation, therefore, may be unnecessary. In response I want to point out that the loan and loan guarantee program authorized under title IV of PUPA terminated last year, the tax credits for small scale hydro are scheduled to be phased out in 1985, and the advantageous provision requiring utilities to purchase hydropower at avoided cost is under court challenge. In short, all those incentives may shortly evaporate. Furthermore, the end of this fiscal year will see the closeout of the Department of Energy's small-scale hydro office.

Mr. President, the Federal Government, through the creation of the Tennessee Valley Authority and the five Federal power marketing authorities in other sections of the country, has recognized its role in promoting regional economic development by helping to promote inexpensive energy. Last year I joined my colleagues in supporting S. 306, which authorized the $312 million in outlays for hydropower development in four Western States. The Congress had clearly responded to the energy needs of the rest of the Nation and I believe the Federal Government has the responsibility to do no less for the economically depressed Northeast-Midwest region.

For the energy-consuming States of the Northeast and Midwest, economic necessity dictates that we pursue all available and feasible options. Given the opportunities presented by hydropower development, I urge my colleagues to join me in supporting the Northeast-Midwest States Hydropower Financing Authority Act.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1255

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a)

this Act may be cited as the "Northeast-Midwest States Federal Hydropower Financing Authority Act".

(b) The Congress finds and declares that (1) the northeast-midwest States are encumbered by high energy costs, (2) it is in the national interest to initiate a national strategic hydropower capacity, (3) there is an untapped capacity for hydropower in many of the northeast and midwest States, and (4) regional coordination and planning of hydropower development in the northeast-midwest States is desirable.

SEC. 2. (a) Subject to the provisions of subsection (b) of this section there is created a body corporate by the name of the "Northeast-Midwest States Federal Hydropower Financing Authority" (hereinafter referred to as the "Corporation" and the "Authority"). The board of directors first appointed shall be deemed the incorporators.

(b) The incorporation shall be held to have been effected upon the Secretary of Energy, or his successor, having been notified in writing, by the Governors of not less than four eligible northeast-midwest States, of the desire of such States to acquire membership in the Northeast-Midwest States Federal Hydropower Financing Authority. Such notification shall contain such information, and be in such form as the Secretary shall by regulation prescribe. No State shall be eligible to participate in the Authority established by this Act if such State is geographically located outside of the midwestern or northeastern part of the United States and is situated wholly within the boundaries of a Federal power marketing authority. In any case in which only a part of a State is situated within a Federal power marketing authority, the board of directors of the Corporation shall establish such regulations as may be necessary to determine the allocation of assistance under this Act to such State for use by it in connection with projects to serve that part of such State not served by a Federal power marketing authority.

SEC. 3. (a) The board of directors of the Corporation (hereinafter referred to as the "board") shall consist of each Governor of a member State or his delegate, and one member, to be appointed by the President, by and with the advice and consent of the Senate, who shall be Chairman.

(b) The term of office of the member appointed by the President shall be four years.

(c) Any member appointed by the President to fill a vacancy in the position of Chairman occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(d) Vacancies in the board, so long as there shall be two members in office, shall not impair the powers of the board to execute the functions of the Corporation, and two of the members in office shall constitute a quorum for the transaction of the business of the board.

(e) Members of the board shall be reimbursed by the Corporation for actual expenses (including traveling and subsistence expenses) incurred by them in the performance of the duties vested in the board by this Act.

(f) No director shall have financial interest in any public-utility corporation engaged in the business of distributing and selling power to the public.

(g) The board shall direct the exercise of all the powers of the Corporation.

SEC. 4. The board shall appoint a president of the Corporation and such other officers as the board shall determine necessary. The president of the Corporation shall appoint such managers, assistant managers, employees, attorneys, and agents as are necessary for the transaction of the business of the Corporation, fix their compensation, define their duties, and provide a system of organization to fix responsibility and promote efficiency. The president of the Corporation may be removed in the discretion of the board.

SEC. 5. Except as otherwise specifically provided in this Act, the Corporation—

(1) shall have succession in its corporate name;

(2) may sue and be sued in its corporate name;

(3) may adopt and use a corporate seal, which shall be judicially noticed;

(4) may make contracts, as herein authorized;

(5) may adopt, amend, and repeal bylaws;

(6) may purchase or lease and hold such real and personal property as it deems necessary or convenient in the transaction of its business, and may dispose of any such personal property held by it;

(7) shall have such powers as may be necessary or appropriate for the exercise of the powers herein specifically conferred upon the Corporation; and

(8) may accept appropriations from the United States and reimburse the United States in accordance with agreements entered into between the United States and the Corporation.

SEC. 6. (a) Subject to the provisions of subsection (b), the Corporation is authorized, on such terms and conditions as the board of directors may prescribe, to make loans to member States, including political subdivisions thereof which are engaged in retail electric services, and power authorities of member States, rural electric cooperatives, interstate compact river commissions, and consumer-owned and stockholder-owned electric utilities which provide retail electric service, located within any State which is a member of the Authority for the purpose of enabling such State, subdivision, cooperative, commission, or utility to carry out hydropower development.

(b) Loans under this section shall not exceed 70 per centum of the initial total estimated costs of such hydropower development, as estimated by the Corporation as of the date of the loan or commitment to loan.

(c) Each loan made under this section shall bear interest at such rate as the Corporation may determine, giving consideration to the needs and capacities of the recipient and the prevailing rates of interest (public and private). Notwithstanding the preceding sentence, such rate shall not be less than a rate determined by the Secretary of the Treasury, for the Corporation, taking into consideration the current average yield on outstanding marketable obligations of the United States with remaining periods of maturity comparable to the average maturities of such loans. No loan shall be made unless the Corporation shall have determined that there is a reasonable prospect of repayment or that successful completion and operation of the hydropower development project will have a substantial value in helping to meet the energy needs of the northeast and midwest States.

(d) Loans made under this section may be made either directly or in cooperation or participation with banks or other lenders. Loans may be made directly upon promissory notes or other evidence of indebtedness or by way of discount or rediscount of obligations tendered for the purpose.

(e) If the board of directors determines that the borrower is unable to meet payments under a loan agreement and is not in default, it is in the public interest to permit the borrower to continue to pursue the purposes of the project, and the probable net benefit to the Corporation in forbearing from exercising its rights under a loan agreement will be greater than that which would result in the event of a default, and if the borrower agrees to make such payments to the Corporation on terms and conditions, including interest, which are satisfactory to the Corporation, then the Corporation may forbear from exercising its rights under the loan agreement.

(f) No loan under this section shall have a maturity date of more than 30 years or the useful life of the project involved, whichever is less.

SEC. 7. (a)(1) Subject to the limitations set forth in paragraph (2), the Corporation is authorized, on such terms and conditions (including the right of subrogation) as the Board of Directors may prescribe, to commit to, or enter into loan guarantees against loss of principal and interest on bonds, notes, or other obligations (including refinancing thereof) issued solely to provide funds to any member State, including political subdivisions thereof which are engaged in retail electrical services, and to any power authorities of member States, rural electric cooperatives, interstate compact river commissions, and consumer-owned and stockholder-owned electric utilities which provide retail electric services, located within any State which is eligible to participate in the Authority for the purpose of enabling such State, subdivision, cooperative, commission, or utility to carry out hydropower development projects.

(2) Loan guarantees under this section shall not exceed 70 per centum of the initial total estimated cost of any such project, as estimated by the Corporation as of the date of the guarantee or commitment to guarantee.

(3) The Corporation, in reviewing the need for financial assistance pursuant to application for loan guarantees, shall consider whether the concern or concerns making such application otherwise would be unable, exercising prudent business judgment, as determined by the board of directors, to finance the project, taking into account among other factors, the availability of debt financing under normal lending criteria based on the assets associated with the project.

(4) Any loan guarantee made by the Corporation under this section shall not be terminated, canceled, or otherwise revoked, except in accordance with the terms thereof, and shall be conclusive evidence that such loan guarantee complies fully with the provisions of this section and of the approval and legality of the principal amount, interest rate, and all other terms of the securities, obligations, or loans and of the guarantee.

(b) If the board of directors determines that—

(1) the borrower is unable to meet payments and is not in default, it is in the public interest to permit the borrower to continue to pursue the purposes of such project, and the probable net benefit to the Corporation in paying principal and interest due under a loan guarantee agreement will be greater than that which would result in the event of a default;

(2) the amount of any payment which the Corporation would be required to pay shall

be no greater than the amount of principal and interest which the borrower is obligated to pay at that time; and

(3) the borrower agrees to reimburse the Corporation for such payment on terms and conditions, including interest, which are satisfactory to the Corporation,

then the Corporation is authorized to pay the lender under a loan guarantee agreement, an amount not greater than the principal and interest which the borrower is obligated to pay and which the Corporation has guaranteed under such agreement.

(c) No loan guaranteed under this section shall have a maturity date of more than 30 years or the useful life of the project involved, whichever is less.

SEC. 8. (a) The Corporation shall maintain its principal office in the immediate vicinity of Pittsburgh, Pennsylvania. The Corporation shall be held to be an inhabitant and resident of the western judicial district of Pennsylvania within the meaning of the laws of the United States relating to the venue of civil suits.

(h) The Corporation shall at all times maintain complete and accurate books of accounts.

(c) Each member of the board, before entering upon the duties of his office, shall subscribe to an oath (or affirmation) to support the Constitution of the United States and to faithfully and impartially perform the duties imposed upon him by this Act.

SEC. 9. (a) The board shall file with the President and with the Congress, in December of each year, a financial statement and a complete report as to the business of the Corporation covering the preceding governmental fiscal year.

(b) The Comptroller General of the United States shall audit the transactions of the Corporation at such times as he shall determine, but not less frequently than once each governmental fiscal year, with personnel of his selection. In such connection he and his representatives shall have free and open access to all papers, books, records, files, accounts, plants, warehouses, offices, and all other things, property, and places belonging to or under the control of or used or employed by the Corporation, and shall be afforded full facilities for counting all cash and verifying transactions with and balances in depositories. He shall make a report of each such audit in quadruplicate, one copy for the President of the United States, one for the chairman of the board, one for public inspection at the principal office of the Corporation, and the other to be retained by him for the uses of the Congress. Such report shall not be made until the Corporation shall have had reasonable opportunity to examine the exceptions and criticisms of the Comptroller General or the General Accounting Office, to point out errors therein, explain or answer the same, and to file a statement which shall be submitted by the Comptroller General with his report. The expenses for each such audit shall be paid from any appropriation or appropriations for the General Accounting Office. Nothing in this Act shall be construed to relieve the Treasurer or other accountable officers or employees of the Corporation from compliance with the provisions of existing law requiring the rendition of accounts for adjustment and settlement pursuant to section 236 of the Revised Statutes of the United States, and accounts for all receipts and disbursements by or for the Corporation shall be rendered accordingly. Subject only to the provisions of this Act, the Corporation is authorized to make such expenditures and to enter into such contracts, agreements, and arrangements, upon such terms and conditions and in such manner as it may deem necessary, including the final settlement of all claims and litigation by or against the Corporation; and, notwithstanding the provisions of any other law governing the expenditure of public funds, the General Accounting Office, in the settlement of the accounts of the Treasurer or other accountable officer or employee of the Corporation, shall not disallow credit for, nor withhold funds because of, any expenditure which the board shall determine to have been necessary to carry out the provisions of this Act.

(c) The Corporation shall determine its own system of administrative accounts and the forms and contents of its contracts and other business documents except as otherwise provided in this Act.

SEC. 10. Within one hundred and eighty days following the effective date of the Corporation as provided in section 2(b), or as soon thereafter as may be feasible, the United States Corps of Engineers, in coordination with the Power Marketing Administration of the Department of Energy, shall complete for each of the member States a study of hydroelectric power potential in the State with emphasis on priorities for those projects with the highest cost-benefit ratios. Such study shall include a review of the environmental consequences of each such project with the Environmental Protection Agency and the findings and recommendations of the Agency shall be included as a part of such study. In conducting each such study, the Corps of Engineers shall use, to the extent feasible, existing studies of Federal and State agencies, including but not limited to, the National Hydroelectric Power Resource Study. In conducting such study, the Corps of Engineers shall consult with each State agency designated by the appropriate Governor and with the interstate water resource commissions.

SEC. 11. No application for a loan under this Act shall be approved unless the Governor of the State in which the project to be developed by the proceeds of such loan has been notified in writing of the request for such loan, and then only if within the sixty-day period following the date of such notification, the Governor has not notified the Corporation, in writing, that he or she disapproves of such project within his or her State.

SEC. 12. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

ADDITIONAL COSPONSORS

S. 11

At the request of Mr. CRANSTON, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 11, a bill to amend title 38, United States Code, to establish a Veterans' Administration Advisory Committee on Women Veterans; to improve various aspects of Veterans' Administration health-care programs; to extend the period for Vietnam-era veterans to request counseling under the Veterans' Administration readjustment counseling program; to promote the recruitment and retention of certain health-care personnel in the Veterans' Administration's Department of Medicine and Surgery; to express the sense of the Congress with respect to the role of the Administrator of Veterans' Affairs; to require the Administrator of Veterans' Affairs to conduct an epidemiological study of long-term health effects in veterans of exposure to ionizing radiation from nuclear test detonations; and for other purposes.

S. 40

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 40, a bill to require the divorcement of motor fuel service stations from operation by certain producers and refiners of motor fuels, and for other purposes.

S. 49

At the request of Mr. STEVENS, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 49, a bill to reopen hunting and trapping lands in Alaska.

S. 52

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 52, a bill to combat violent and major crime by establishing a Federal offense for continuing a career of robberies or burglaries while armed, and providing a mandatory sentence of life imprisonment.

S. 208

At the request of Mr. INOUYE, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 208, a bill to amend the Hazardous Materials Transportation Act to prohibit the transportation of hazardous waste for the purposes of disposal abroad.

S. 337

At the request of Mr. PACKWOOD, the name of the Senator from Iowa (Mr. JEPSEN) was added as a cosponsor of S. 337, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 551

At the request of Mr. ROTH, the name of the Senator from Hawaii (Mr. INOUYE) was added as a cosponsor of S. 551, a bill to amend the Tax Reform Act of 1976 to extend, for an additional 4 years, the exclusion from gross income of the cancellation of certain student loans.

S. 566

At the request of Mr. HOLLINGS, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 566, a bill to direct the Secretary of Agriculture to release on behalf of the United States a reversionary interest in certain land conveyed to the South Carolina State Commission of Forestry, and to direct the Secretary of the Interior to convey certain mineral interests of the United States in such land to such commission.

S. 591

At the request of Mr. INOUYE, the names of the Senator from Connecticut (Mr. WEICKER), the Senator from New Hampshire (Mr. RUDMAN), and the Senator from Montana (Mr. BAUCUS) were added as cosponsors of S. 591, a bill to amend the Internal Revenue Code of 1954 to provide a mechanism for taxpayers to designate $1 of any overpayment of income tax, and to contribute other amounts, for use by the U.S. Olympic Committee.

S. 619

At the request of Mr. TSONGAS, the names of the Senator from Michigan (Mr. RIEGLE), the Senator from Alaska (Mr. STEVENS), the Senator from Rhode Island (Mr. PELL), and the Senator from Vermont, (Mr. STAFFORD) were added as cosponsors of S. 619, a bill to reauthorize, extend, and enhance existing Federal programs to encourage conservation and the use of renewable energy by this Nation's consumers.

S. 631

At the request of Mr. TSONGAS, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 631, a bill to establish a national technology education grants program to provide matching Federal assistance to joint initiatives by private industry, educational institutions, and State government to strengthen science, engineering, and technical education, and for other purposes.

S. 772

At the request of Mr. HATCH, the names of the Senator from Utah (Mr. GARN), the Senator from North Dakota (Mr. BURDICK), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 772, a bill to promote public health by improving public awareness of the health consequences of smoking and to increase the effectiveness of Federal health officials in investigating and communicating to the public necessary health information, and for other purposes.

S. 800

At the request of Mr. STEVENS, the name of the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 800, a bill to establish an Ocean and Coastal Development Impact Assistance Fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the fund, and for other purposes.

S. 986

At the request of Mr. PRESSLER, the name of the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 986, a bill to repeal employer reporting requirements with respect to tips.

S. 991

At the request of Mr. CRANSTON, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of S. 991, a bill to amend title 38, United States Code, to require regulations providing for the resolution of Veterans' Administration benefits claims based on certain exposures to herbicides containing dioxin, to ionizing radiation from detonations of nuclear devices, and to certain other hazardous substances and for other purposes.

S. 1006

At the request of Mr. SPECTER, the names of the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of S. 1006, a bill to amend the Internal Revenue Code of 1954 to repeal the 15-percent reduction in percentage depletion for iron ore and coal.

S. 1120

At the request of Mr. GARN, the name of the Senator from Virginia (Mr. TRIBLE) was added as a cosponsor of S. 1120, a bill to authorize printing of the back side of U.S. paper money of the denomination of $1 by a method other than the intaglio process.

S. 1225

At the request of Mr. MATHIAS, the name of the Senator from Texas (Mr. TOWER) was added as a cosponsor of S. 1225, a bill to amend the Internal Revenue Code of 1954 to clarify the extent to which a State, or political subdivision, may tax certain income from sources outside the United States.

SENATE JOINT RESOLUTION 28

At the request of Mr. TSONGAS, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of Senate Joint Resolution 28, a joint resolution calling for immediate negotiations for a ban on weapons of any kind in space.

SENATE JOINT RESOLUTION 55

At the request of Mr. MATHIAS, the names of the Senator from Florida (Mr. CHILES), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Nebraska (Mr. ZORINSKY), the Senator from Alabama (Mr. HEFLIN), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Wyoming (Mr. SIMPSON), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of Senate Joint Resolution 55, a joint resolution to recognize the pause for the "Pledge of Allegiance" as part of National Flag Day activities.

SENATE JOINT RESOLUTION 78

At the request of Mr. GORTON, the name of the Senator from Kansas (Mr. DOLE) was added as a cosponsor of Senate Joint Resolution 78, a joint resolution to authorize and request the President to issue a proclamation designating April 24 through April 30, 1983, as "National Organ Donation Awareness Week."

SENATE JOINT RESOLUTION 85

At the request of Mr. THURMOND, the names of the Senator from Mississippi (Mr. COCHRAN), the Senator from Alabama (Mr. HEFLIN), and the Senator from North Dakota (Mr. BURDICK) were added as cosponsors of Senate Joint Resolution 85, a joint resolution to designate September 21, 1983, as "National Historically Black Colleges Day."

SENATE JOINT RESOLUTION 96

At the request of Mr. DECONCINI, the name of the Senator from Ohio (Mr. METZENBAUM) was added as a cosponsor of Senate Joint Resolution 96, a joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

SENATE CONCURRENT RESOLUTION 22

At the request of Mr. DOLE, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of Senate Concurrent Resolution 22, a concurrent resolution expressing the sense of the Congress with respect to implementing the objectives of the United States Decade of Disabled Persons (1983-1992).

SENATE CONCURRENT RESOLUTION 24

At the request of Mrs. HAWKINS, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Concurrent Resolution 24, a concurrent resolution expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as "Older Americans Month."

SENATE RESOLUTION 137—RELATING TO TAIWAN'S MEMBERSHIP IN THE ASIAN DEVELOPMENT BANK

Mr. KASTEN (for himself, Mr. INOUYE, Mr. GARN, Mr. MOYNIHAN, Mr. LUGAR, Mr. BOREN, Mr. DOLE, Mr. RANDOLPH, Mr. HEINZ, Mr. FORD, Mr. GOLDWATER, Mr. DECONCINI, Mr. RUDMAN, Mr. MCCLURE, Mr. DOMENICI, Mr. D'AMATO, Mr. ABDNOR, Mr. WALLOP, Mr. HECHT, Mr. TRIBLE, and Mr. SYMMS) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 137

Whereas the People's Republic of China is seeking to apply for admission to the Asian Development Bank, conditioning its application upon the prior expulsion of Taiwan from that body;

Whereas Taiwan is a founding member of the Asian Development Bank, actively participating in the Bank's activities and faithfully fulfilling its obligations since the Bank's establishment in December 1966;

Whereas Taiwan's subscription to the initial capital stock of the Bank was determined on the basis of the area, population, and economic conditions of Taiwan;

Whereas neither the relationship between Taiwan and the Bank, nor the circumstances under which these relations were established, have changed since 1966;

Whereas the Asian Development Bank agreement specifically prohibits the Bank from being influenced in its decision by politics;

Whereas it was the strong conviction of the founders of the Asian Development Bank that the introduction of political considerations would undermine the ability of the Bank to carry out its mission, namely to further economic growth and cooperation in the region;

Whereas Taiwan has assisted in carrying out the mission of the Asian Development Bank over the years, moving from borrower to donor; now therefore, be it *Resolved*, that it is the sense of the Senate that—

(1) Taiwan, ROC should remain a full member of the Asian Development Bank, and that its status within that body should remain unaltered no matter how the issue of the People's Republic of China's application for membership is disposed of; and

(2) the President and the Secretary of State should express support for Taiwan, making it clear that the United States will not countenance attempts to expel Tawian, ROC from the Asian Development Bank.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he transmit such copy to the Board of Governors of the Asian Development Bank.

Mr. KASTEN. Mr. President, today I am submitting a resolution expressing the sense of the Senate that Taiwan should retain full membership in the Asian Development Bank, and should not be expelled as a precondition for membership in that body by the People's Republic of China (P.R.C.).

Over a decade ago, the United States and the P.R.C. began the process of normalizing political and economic ties. This process culminated in the U.S. recognition of the P.R.C. in 1979. There are excellent strategic and political reasons for this normalization process to continue. But in our effort to establish new friends, we should not abandon old ones. We should never allow those old friends to be sacrificed for political reasons, no matter what the short-term advantage may be.

But this is precisely the issue that faces us now as the P.R.C. seeks to join the Asian Development Bank. On the one hand, the administration has expressed its support for the P.R.C.'s membership in the Asian Development Bank. This support can be seen as a part of the process of normalization, leading to better relations. On the other hand, the P.R.C. has demanded that, as a precondition for its membership in the Asian Development Bank, Taiwan must be expelled. Regardless of whether or not one believes the P.R.C. ought to be allowed to join this body, there is no justification at all for expelling Taiwan.

The argument put forward by the P.R.C. in the past, to the effect that there cannot be two governments claiming to represent the Chinese people, does not apply in this case. This argument has allowed the P.R.C. to replace Taiwan in the United Nations, the International Monetary Fund, and the World Bank.

But when Taiwan helped to found the Asian Development Bank in 1966, it was not in control of the Chinese mainland and did not claim to represent all the people of China in the Asian Development Bank. Taiwan's subscription to the initial capital stock of the Bank was determined on the basis of the area, population, and economic conditions of Taiwan alone. Neither the relationship between Taiwan and the Bank, nor the circumstances under which these relations were established, have changed since 1966. Therefore, the question of who is the sole, legal government of China and the representative of the Chinese people in international organizations cannot provide any basis for action here. And even if there were merit to the P.R.C.'s claim, there is no provision within the Asian Development Bank charter for expelling a country which is already a member in good standing.

The Asian Development Bank is a nonpolitical regional financial organization. Its sole purpose is to provide the developing member countries with financial and technical assistance for their economic development. Article 36 of the Asian Development Bank Agreement specifically prohibits the influence of political considerations on the decisions of the Bank: "Only economic considerations shall be relevant to their decisions—in order to achieve and carry out the purpose and functions of the Bank." Political influences, of the sort being brought to bear by the P.R.C. undermine the ability of the Asian Development Bank to carry out its mission, namely, to foster economic growth and cooperation in the region.

In conclusion, let me reemphasize that improved relations with the P.R.C. should not be sought at the price of abandoning our oldest Asian ally. No matter how strongly we desire to normalize our relations with the P.R.C., the United States is morally obligated, at a minumum, to insure that Taiwan is not sacrificed. This is certainly the case with respect to Taiwan's position in the Asian Development Bank. I ask that all my colleagues join me in this effort to protect the status of Taiwan in the Asian Development Bank.

AMENDMENTS SUBMITTED

FIRST CONCURRENT RESOLUTION ON THE BUDGET

MELCHER AMENDMENT No. 1252

Mr. MELCHER proposed an amendment to the concurrent resolution (S. Con. Res. 27) revising and replacing the congressional budget for the U.S. Government for the fiscal year 1983, and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986; as follows:

On page 10, line 9, strike $12,000,000,000 and insert in lieu thereof $12,200,000,000.

On page 10, line 10, strike $12,500,000,000 and insert in lieu thereof $12,600,000,000.

On page 7, line 6, strike $18,200,000,000 and insert in lieu thereof $18,000,000,000.

On page 7, line 7, strike $12,700,000,000 and insert in lieu thereof $12,600,000,000.

CRANSTON AMENDMENT NO. 1253

Mr. CRANSTON (for himself, Mr. HATFIELD, Mr. HOLLINGS, Mr. MOYNIHAN, Mr. METZENBAUM, Mr. RIEGLE, Mr. MATSUNAGA, Mr. INOUYE, Mr. LEVIN, Mr. TSONGAS, Mr. DODD, Mr. KENNEDY, Mr. SARBANES, Mr. BRADLEY, and Mr. BUMPERS) proposed (and subsequently modified) an amendment to the concurrent resolution Senate Concurrent Resolution 27, supra; as follows:

On page 3, line 13, increase the figure by $49,000,000.

On page 3, line 14, increase the figure by $49,000,000.

On page 3, line 15, increase the figure by $49,000,000.

On page 3, line 19, increase the figure by $49,000,000.

On page 3, line 20, increase the figure by $49,000,000.

On page 3, line 21, increase the figure by $49,000,000.

On page 4, line 1, increase the figure by $49,000,000.

On page 4, line 2, increase the figure by $49,000,000.

On page 4, line 3, increase the figure by $49,000,000.

On page 4, line 7, increase the figure by $49,000,000.

On page 4, line 8, increase the figure by $98,000,000.

On page 4, line 9, increase the figure by $147,000,000.

On page 4, line 14, increase the figure by $49,000,000.

On page 4, line 15, increase the figure by $49,000,000.

On page 4, line 16, increase the figure by $49,000,000.

On page 17, line 8, increase the figure by $49,000,000.

On page 17, line 9, increase the figure by $49,000,000.

On page 17, line 15, increase the figure by $49,000,000.

On page 17, line 16, increase the figure by $49,000,000.

On page 17, line 22, increase the figure by $49,000,000.

On page 17, line 23, increase the figure by $49,000,000.

NOTICES OF HEARINGS

SUBCOMMITTEE ON CONSUMER AFFAIRS

Mrs. HAWKINS. Mr. President, the Subcommittee on Consumer Affairs will hold a hearing on May 18, 1983, at 10 a.m., in room SD-538 of the Dirksen Senate Office Building to discuss credit card fraud. The purpose of the

hearing is to determine whether the Truth in Lending Act and the Electronic Fund Transfer Act adequately protect the consumer and credit and debit card issuers from various forms of fraud and abuse. The subcommittee will be looking at the magnitude of credit and debit card fraud and its impact on the cost and availability of consumer credit. The subcommittee will also investigate the fradulent use of credit card lists and account numbers.

If you have questions concerning the hearing, please contact Beth Climo at 224-1565.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, May 11, at 10 a.m., to continue hearings on trade reorganization legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SMALL BUSINESS WEEK

● Mr. SASSER. Mr. President, this week we take time out to salute our Nation's small businesses and the vital role they play in our economy. As a member of the Senate Small Business Committee I am constantly reminded of the important contributions small business makes to our economy. Indeed, as I have pointed out in the past, small businesses are the economic backbone of America.

In this period when we are beginning at long last to see some indication of economic recovery it is fitting that we honor a group that can do much to further economic revival across our country. As many of my colleagues know, small businesses create a significant proportion of the new jobs created in the United States each year. In addition, small businesses are responsible for the lion's share of technological innovations and advances made in industry.

This past year has been a difficult one in the small business sector as it has throughout our economy. Small firms continued to be rocked by high-interest rates and other factors which resulted in decreased sales, receipts, profits, and employment; 1982 witnessed the greatest number of business failures since the Great Depression era. Yet, as bad as the economic climate was, small businesses continued to show their resilience. Indeed, small businesses may have performed better than larger businesses during this recession, according to the President's Report on the State of Small Business.

Mr. President, I am keenly aware of the significant role small business has played in the economy of my home State. In Tennessee, there are approximately 83,000 business establishments. About 79,000 of these employ less than 100 employees; 58,922 of these firms employ fewer than 10 persons. Quite clearly, Mr. President, small business is very big in Tennessee.

The dominance of small business in the Tennessee economy is illustrated in many ways. Small firms produce roughly half of the Tennessee's goods and services. Firms with less than 100 employees constitutes 80 percent of the manufacturing companies in the State, 99 percent of the construction companies in the State, 61 percent of the State's wholesale and retail operations, 98 percent of Tennessee's service companies and 99 percent of the finance insurance and real estate business in the State.

Tennessee's small business community has proved to be a steady source of growth in the State's economy. The period from 1979-81 was not considered one of great growth in the marketplace. Indeed, in terms of employment most Tennessee enterprises experienced negative growth during these years. However, the small business community continued to grow despite the perilous state of the economy. As the chart below illustrates, where most segments of the Tennessee economy were letting employees go from 1979-81, small businesses employing 1 to 4 persons increased employment by 16.8 percent.

TENNESSEE EMPLOYMENT, 1979-81

	1979	1981	Percent change
Size class of establishment:			
1-4	58,300	68,100	16.8
5-9	116,200	114,200	-1.7
10-19	116,800	115,000	-1.5
20-49	175,600	172,500	-1.8
50-99	134,100	140,900	5.1
100-249	203,800	207,800	2.0
250-499	151,400	149,400	-1.3
500-999	138,200	129,500	-6.7
1000 plus	222,100	215,800	-2.8
Total	1,316,500	1,313,300	-0.2

Source: Small Business Data Base, based upon the Unemployment Insurance System of the Department of Labor, Bureau of Labor Statistics.

As a member of the Senate Small Business Committee, I am constantly reminded of the vital role small firms play both at the State and local level. My tenure on the Small Business Committee has shown how those of us in Congress can drastically effect the day-to-day operations of our Nation's small businesses with the legislation we enact. My colleagues and I have and will continue to use the committee as a forum to discuss and address the major issues facing small business while striving to further the advancement of this sector of the economy.

It is fitting that we take time this week to honor the men and women who make up the small business community. These entrepreneurs, these risk takers, are our future, Mr. President. I am proud of my connections and associations with America's small businesses, and applaud the unfailing efforts of this remarkable group of business persons.●

EL SALVADOR—THE CONFLICT AND THE MYTHS

● Mr. DOLE. Mr. President, I rise today to call the attention of the Senate again to the tragedy that is unfolding in Central America, and most particularly to the greater tragedy that will take place if the United States turns aside from that region.

El Salvador is now the focus of that struggle. We have heard President Reagan's address, that set forth in stirring fashion our national interest in a peaceful and determined resolution of that conflict. We have also heard the view that our policies in El Salvador, and in Central America generally, are misconceived. Let us take a closer look at these views.

Mr. President, I take it as given that no thinking American wants Central America to fall under Marxist sway. The creation of a series of Communist satellites would worsen our regional relations and indeed, given the Panama Canal and the regional transit of so many of our shipments of strategic material, would threaten our national security itself. Who amongst us would really want to see the proliferation of more Cubas from the present independent states of Central America? Who amongst us would greet with equanimity the establishment of Soviet offensive missiles in the region, as has been hinted? And who amongst us—given the proximity of the region—would want another flood of tragic refugees, not far away this time, but on our own doorstep? Not, Mr. President, the Senator from Kansas, for I believe that our strategic interests in the region are clear, our alternatives few, and our policies worth supporting.

It has been said, Mr. President, that we are myopically supporting military solutions to complex problems. The Senator from Kansas does not find that to be the case. Fully two-thirds of the assistance that the administration has requested is for economic and social programs. Of course we all recognize that the root causes of problems in the region are povery, historic injustice, disease, illiteracy, and lack of opportunity. That is why the bulk of requested funds will go toward fighting not the military adversary—and make no mistake about it, the military adversary is real and our adversary as well—but the economic and

socially dislocating sources of rebellion.

President Reagan rightly noted the difficulties of waging peace through such help when he observed that "No amount of economic help will suffice if guerrilla units can destroy roads, bridges, power stations, and crops again and again with impunity." But we are right to keep trying, and to offer the people of El Salvador a better future than the Marxist guerrillas will allow them if they are successful.

Much has also been said, Mr. President, about the quality of the army of El Salvador. It is said that they are unwilling to fight. Well, the Senator from Kansas has heard that the Salvadoran military has actually suffered a 12-percent casualty rate—much higher than any U.S. Army has sustained except in the Civil War. They need training. At present, 1 out of 16 Salvadoran soldiers—not 1 out of 5, as has been stated—has been trained in the United States. At that we are not talking about some vast military juggernaut. Mr. President, out of a total of some 23,000 in the Salvadoran Armed Forces, only 1,434 men have been trained in the United States. When you add in those trained in-country by our trainers, and at the Panama Canal schools, then the ratio rises, as President Reagan said, to 1 out of 10.

Has land reform been abandoned? Mr. President, over 475,000 Salvadoran peasants have already received land under the agrarian reform program. That program is being broadened and extended. Just what sort of program would be enacted, Mr. President, if the Marxist guerrillas prevail? Does anybody really doubt that over the long run we would see yet again—for those who cared to look—another dreary series of forced collectivizations, with land being taken from the people. And then the dreary cycle would be perpetuated and magnified in our region, for what collectivized system of agriculture has ever produced any bumper crop other than human misery and dislocation?

Mr. President, the specter of Vietnam has been mentioned in connection with El Salvador. The President was roundly applauded when he noted that there would be no Vietnam there. I fervently hope that he is right in that assessment. For I share the assessment of Morton M. Kondracke that was given in an April 28 column in the Wall Street Journal. He noted that "Central America is more ethnically homogenous than Indochina, so the dominoes there may fall faster." As Mr. Kondracke notes, there have been "Three million murders in Cambodia, total deprivation of human rights in Vietnam—and corruption at least as bad as in President Thieu's time—and a falling of dominoes. North Vietnam has taken over South Vietnam, Laos, and Cambodia: Now it is shelling Thailand."

Mr. President, unlike in Indochina, the final chapter for Central America remains to be written. This time, I am convinced, the forces of freedom will staunchly support the evolution of those peoples for a better life. And the Senator from Kansas knows that his colleagues will be proud to ally themselves ultimately to that just goal.●

THE THIRD YEAR OF THE TAX CUT

● Mr. BIDEN. Mr. President, as we proceed with Senate consideration of a budget resolution for fiscal year 1984, much of our attention is now focusing on the third segment of the 1981 tax reductions, scheduled to become effective on July 1 of this year. As we seek a middle course budget that a majority of the Senate can support, it is appropriate that we consider a middle course for that tax cut also.

For some time there have been proposals advanced to cap the third year of the tax cut at some figure ranging between $300 and $700. Such an action would restore some balance in the treatment of the wealthy versus the less wealthy and would be the most cost-effective way of stimulating consumer spending.

As Lawrence Chimerine said in an article in last Sunday's New York Times:

> Such an adjustment would not only provide the needed increase in consumer spending to continue the recovery, it would enhance the recovery by reducing the budget deficit. Moreover, a cap would begin to reverse the process that in recent years has shifted a much larger part of the nation's tax burden onto middle- and lower-income families.

Mr. President, the whole article, entitled "But Let's Limit the Break" sets forth the rationale, economic and social, for placing a top limit on the size of the tax cut more clearly and concisely than any other article I have seen. Its author, Lawrence Chimerine, is the chairman and chief economist of Chase Econometrics. He has testified before the Senate Budget Committee.

I believe that this article, which appeared in the New York Times on Sunday, May 8, 1983, is a valuable contribution to the debate that now ranges over next year's budget. It is, without question, leading us in the right direction.

For that reason, Mr. President, I ask that this useful article be printed in the RECORD for the use of my colleagues.

The article follows:

BUT LET'S LIMIT THE BREAK

(By Lawrence Chimerine)

While I agree with both the Keynesian and supply-side economists that the scheduled tax cut is needed to sustain the recovery. I believe that a modest adjustment can be made that will make it both more effective and more equitable. Let's place an upper limit of $500 on the size of the tax cut, so that people with very high incomes will not get inordinate tax reductions, while those at middle or lower income levels will get the full 10 percent reduction.

Such an adjustment would not only provide the needed increase in consumer spending to continue the recovery, it would enhance the recovery by reducing the budget defict. Moreover, a cap would begin to reverse the process that in recent years has shifted a much larger part of the nation's tax burden onto middle- and lower-income families.

Several recent studies have shown this dramatic shift in the distribution of income in this country. The President's personal tax cuts already in place have reduced tax burdens more sharply for those with higher incomes, even when measured in percentage terms. And the interaction of inflation with our progressive tax system has further shifted the income tax burden in this direction.

Recent sharp increases in the Social Security tax rate (and additional increases soon to occur) are regressive, as are many of the Federal tax increases enacted in 1982 and the recent increase in the gasoline tax. Increases in excise taxes by state and local governments, partly a result of lost Federal aid, are also regressive. Finally, additional increases in excise and energy taxes, and the President's contingent surtax on incomes would overly burden the lower wage earners and move us further away from a tax structure based on ability to pay.

Moreover, cuts in spending for various social programs that benefit the poor, as well as the sharp growth in personal interest income in recent years caused by policies that create high interest rates, have also caused greater income inequality.

In my view, the net effect of these tax measures and other changes is very unfair and a $500 cap on the tax cut would at least begin to restore more equity to the system.

It is now generally accepted that the Federal deficit will rise to very high levels in the years ahead unless new deficit-reducing actions are implemented. Given our need to reduce interest rates further, these future deficits must be sharply reduced. Otherwise, the large increase in Treasury borrowing to finance deficits will collide with rising private credit demands, pushing up interest rates and sparking a new recession.

The main reason for the bleak budget outlook is that the 1981 tax cuts were too large in view of the enormous military buildup and continued growth in Federal entitlements. And while some spending cuts are desirable, these would be nowhere sufficient to come even close to reducing future deficits to acceptable levels. The expected revenue loss from the 1981 tax cut will have to be reduced, and capping the tax cut will rather painlessly begin that process.

At the same time, capping the third year of the tax cut will not prevent the recovery from continuing. In fact, it could strengthen it. First capping would reduce the magnitude of the July tax cut by only about $8 billion; nearly 75 percent of the tax reduction would still occur. This, combined with the military buildup would provide ample fiscal stimulus for a recovery.

Second, depending on how the withholding tables are adjusted in July, some or all of the "increased" tax liabilities resulting from capping the tax cut would be pushed into the spring of 1984. Last July 1, withholding reductions were limited to incomes

below $35,000—a repeat would mean that virtually all the added revenues from capping would come from smaller refunds or larger payments when 1984 tax returns are filed, and that income flows and purchasing power during the critical second half of this year would be relatively unaffected.

Finally, the tax cut on higher incomes will increase savings more than comsumer spending. While this may be desirable from a long-term standpoint, the economy is currently suffering from a lack of spending rather than inadequate savings. Thus, scaling back the tax cuts on upper incomes will likely have little adverse effect on consumer spending.

The net effect on economic activity could in fact be positive if some of the increased revenues associated with capping are used to finance jobs programs or transfer payments aimed at people with a higher propensity to spend. Stimulus from these programs will outweigh the lost spending from scaling back the tax cut. And, to the extent that capping helps reduce expected deficits and eases concerns in financial markets, lower interest rates that may result would further stimulate the recovery.●

RHODE ISLAND'S SMALL BUSINESSMAN OF THE YEAR

● Mr. PELL. Mr. President, I am extremely pleased to inform my colleagues that Mr. Arpad J. Merva of Providence, R.I., has been named Rhode Island's "State Small Business Person of the Year."

Mr. Merva was born in Budapest, Hungary, in 1925. He graduated from the University of Hungary with a degree as a chemical engineer and was associated with the Budapest Research Institute as a chemist until 1956. The Hungarian Revolution against the Communist government began at that time. In the midst of the chaos, he was able to escape from his native land and migrated to the United States. He settled first in Cleveland, Ohio, and later moved to Providence, R.I., where he established Astro Plating Co.

Astro Plating Co. operates in a unique field in the automotive industry. There are roughly 150 firms of this type throughout the country. The primary function of this type of firm is the recycling of damaged and cast off automobile and truck bumpers of both domestic and foreign vehicles into shiny replacements for parts damaged in accidents. In this recycling process, Mr. Merva uses a special triple rinse to minimize the pollutants and byproducts resulting from the removal of chrome and replating of the finished product with chrome and nickel. As a result of this innovative recycling process Mr. Merva's plant contributes to a pollution-free environment.

Astro Plating Co. started in 1967 in a rented building with 100 square feet of floor space. As the business activities progressed, the original building was purchased and expanded in 1970 with the assistance of a Small Business Administration loan of $85,000. The present facilities constitutes the only fully integrated plant of this type in the United States with over 100,000 square feet of production space under one roof.

When the firm started, there were 14 employees. Presently, the employment roles have risen to approximately 200. Immigrants from several countries make up a sizable portion of the work force.

Mr. Merva is a fine example of the type of individual deserving recognition as a small-business person. The Astro Plating Co. has demonstrated innovation and the ability to respond to adversity by profitably recycling a product which for many years was routinely consigned to the junkpile. The use of the modern recycling system is an excellent example of his commitment to environmental improvement and innovation.

It is therefore a privilege for me to commend Arpad J. Merva for his designation as "Rhode Island Small Business Person of the Year."●

BANK SECRECY ACT MUST BE AMENDED

● Mr. ROTH. Mr. President, on March 23, 1983, I introduced S. 902, a bill to amend the Bank Secrecy Act, most of the provisions of which passed the Senate last year.

Since then the type of activity which is meant to be controlled by the provisions of the act has continued. For example, in a dramatic action on May 4, the U.S. Customs Service, working together with the IRS, stopped a Lear jet as it taxied down the runway at Fort Lauderdale-Hollywood Airport en route to Panama with $5,477,959 on board—none of which had been declared on the U.S. Treasury form which must be filed when transporting currency in or out of the country.

This action was another in the string of important successes of Operation Greenback in Florida. I want to congratulate special agent-in-charge of U.S. customs, Miami, Leon Guinn. Operation Greenback supervisors Dennis Fagan of Customs, and Peter Lindsay of IRS, together with agents and customs patrol officers succeeded in making the largest cash seizure in the history of Operation Greenback. These people, working under the leadership of William Van Raab, Commissioner of Customs and IRS Enforcement Chief Richard Wassenaur, have sent a message to those who would move bulk currency out of the country.

The case is indeed an impressive one. After extensive investigation, at 7:15 on May 4, 10 agents in their vehicles surrounded a Lear jet as it was actually moving toward takeoff. In a later search of the office and residence of one of the occupants of the aircraft, agents seized 62 pounds of cocaine with a value of $18.5 million, 15 weapons including a Uzi submachine gun, $40,000 in counterfeit dollar bills, together with various automobiles and computer equipment. The court set bail at $25 million for the owner of the aircraft who was on board at the time.

This case is a vivid example of the need to clarify the outbound search authority of the U.S. Customs Service which S. 902 does.

Why were these people carrying currency out of the country? That remains to be determined. It is an inescapable conclusion, however, that the vigilance of the Customs Service and the IRS in monitoring the currency transactions at Florida banks has tended to disrupt what was an enormous flow of business in illegally derived currency. Hearings before the Permanent Subcommittee on Investigations demonstrated this.

I intend to continue the work of the subcommittee in the area of the use of offshore banks and companies to facilitate criminal activity in the United States. We began these hearings in March and expect to hold another round later this month. In the meantime, I have urged the Justice and Treasury Departments to work with so-called tax haven countries like Panama, the Cayman Islands, and the Bahamas in an effort to prevent the use of banks and companies in those locations to commit crimes in the United States.●

TAXING HEALTH BENEFITS

● Mr. PACKWOOD. Mr. President, I am delighted to report today that a vast array of groups, representing all sectors of our society, have signed a resolution opposing the taxation of employer provided benefits. Among these groups are representatives of labor, industry, consumers, businesses, insurers, and professional associations.

Mr. President, over the last 40 years we have made great progress in expanding health coverage provided by employers. One important reason employers have been able to take this costly step is that benefits provided to employees have been tax free. Current proposals to tax health benefits provided by employers jeopardize the progress we have made in this area.

Taxing health benefits is unfair to workers. It would expose workers and their families to unanticipated and sometimes disastrous health expenses, forcing many of them to do without adequate health care. In addition, limits on health insurance provided by employers would discriminate against certain groups or workers who have high health costs. For example, a health insurance cap would hurt older workers, women, workers in high risk occupations, and workers who live in

areas with a relatively high cost of living.

Mr. President, I ask that a copy of the resolution and a supporting letter from the AFL-CIO be included in the RECORD.

The material follows:

RESOLUTION

Whereas a tax on employee health benefit plans would be discriminatory and unfair in application and ineffective as a means of slowing the rising cost of hospital care, we urge the Congress to reject any tax on employee health benefits.

AMERICAN FEDERATION OF LABOR & CONGRESS OF INDUSTRIAL ORGANIZATIONS,
Washington, D.C., May 9, 1983.

Senator ROBERT PACKWOOD,
Russell Building, U.S. Senate, Washington, D.C.

DEAR SENATOR PACKWOOD: The AFL-CIO joins with the coalition of business and insurers in opposing efforts by the Reagan Administration to place an arbitrary limit on tax free employer contributions to employee health benefits. We believe that this is an inequitable way to raise revenues, will do nothing to control soaring medical costs and represents unnecessary government intrusion into the collective bargaining process.

Under current law health insurance premium payments by employers are not considered income to employees. If Congress agrees to limit tax free employer contributions to health insurance and employers make payments above this ceiling, the difference would be added to the employee's gross taxable income. This change would disrupt labor-management negotiations by forcing existing collective bargaining agreements to be reopened and unduly influence future negotiations.

The proposed cap will also reduce coverage for preventive care, outpatient diagnostic services and other benefits which save money. It would leave intact coverage for hospital and surgical benefits, which have been the chief source of health cost inflation and over which patients have little control. The proposed cap would also penalize older workers, workers in high cost areas and those who select more comprehensive benefit plans, such as health maintenance organizations.

Organized labor hopes that Congress will not accept a proposal which increases the taxes of working Americans and penalizes them for negotiating adequate health insurance protection. The AFL-CIO urges the Congress, therefore, to reject any and all proposals to place an arbitrary tax ceiling on the amount of employer contributions to employee health insurance benefits.

Sincerely,

RAY DENISON,
Director,
Department of Legislation.●

AMERICAN POW'S AND MIA'S

● Mr. GOLDWATER. Mr. President, this year marked the 10th anniversary of the signing of the Paris peace accords in 1973. Unfortunately, the end of American involvement in the military conflict in Southeast Asia did not bring about the release of all Americans who remain officially listed as prisoners of war or missing in action. Nor did it bring about the return of the remains of more than 1,000 American servicemen and civilians who are listed as killed in action.

The real blame, of course, lies on Hanoi. But the Congress must share a part of the that blame. It was Congress that passed laws prohibiting any further American military operations in or over Indochina and thus announced to Hanoi that we would stand idly by if it engaged in massive violations of the Paris agreement. It was Congress who removed the threat of American retaliation which was the essential deterrent to the resumption of all-out war by North Vietnam.

When Congress prohibited a military response to Communist violations of the agreement and walked away from Indochina, it also withdrew any ability of the United States to enforce the aspects of the agreement with respect to American servicemen held prisoner or missing in action in Indochina.

Mr. President, it is important that we not allow American MIA's/POW's to be forgotten. In this connection, I am honored to present today to the Senate a memorial which passed the Arizona House of Representatives by unanimous vote on April 13, urging the U.S. Government to take all steps necessary to obtain release of Americans still missing in Southeast Asia and to seek the return of any American remains in that area. I ask that the memorial may appear in the RECORD.

The memorial follows:

HOUSE MEMORIAL 2003

Whereas there are currently two thousand four hundred ninety-four Americans still missing and otherwise unaccounted for in Southeast Asia; and

Whereas the United States government has collected and analyzed information which clearly establishes that the governments of Indochina possess information regarding American prisoners of war (POW) and Americans missing in action (MIA); and

Whereas the defense intelligence agency is currently investigating more than four hundred sixty firsthand, live sighting reports of Americans in Southeast Asia, based on the assumption that at least some may still be held captive; and

Whereas the United States government obtained and substantiated information that the Socialist Republic of Vietnam has in its possession the remains of at least four hundred American personnel who were killed as the result of hostilities in Southeast Asia; and

Whereas the families of those American servicemen and civilians missing in Southeast Asia have suffered untold grief and uncertainty because the governments of Indochina have failed to provide an adequate accounting of those missing; and

Whereas the State of Arizona has an enduring interest in the welfare of Americans listed as missing or otherwise unaccounted for in Southeast Asia.●

QUALITY PERFORMANCE IN MEMPHIS

● Mr. SASSER. Mr. President, in these troubling economic times we seem to hear nothing but bad news from the marketplace. We are bombarded with facts and figures on interest rates, unemployment rates, business failures and other indicia of our current fiscal crisis. And while this is as it should be for us to do our jobs well, we must not lose sight of the evidence that all is not lost in the American economy.

Recently, the Wall Street Journal ran an article on the operations of the Sharp Corp.'s Memphis, Tenn., plant. The article pointed out that even with a troubled history the Memphis labor force at Sharp has proven to be a model of efficient, quality manufacturing. I take great pride in the fact that my fellow Tennesseans are setting new standards for excellence in the marketplace during these hard times.

The success achieved in Memphis is the combination of Japanese management techniques utilized by Sharp executives and the caliber of the Memphis area labor force. I think this case

is a good example of the type of international cooperation we are seeing more and more of. I applaud the success of Sharp Corp. in Memphis, Tenn., and feel that my colleagues would benefit from reading about this distinct workplace. Mr. President, I ask that the contents of the Wall Street Journal article on the Sharp plant in Memphis be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Apr. 29, 1983]

FACTORY MAGIC: IN A PLANT IN MEMPHIS, JAPANESE FIRM SHOWS HOW TO ATTAIN QUALITY

(By L. Erik Calonius)

MEMPHIS, TENN.—When word spread that Sharp Corp. of Japan was planning to build an electronics factory here, a lot of people thought the Japanese were making a big mistake.

After all, RCA Corp. had built a TV plant in Memphis in 1966—and shut it down five years later. That facility had suffered just about every labor and management affliction imaginable: wildcat strikes, union-authorized strikes, apparent sabotage of the product and a series of layoffs that took the payroll from a peak of 4,200 workers down to 1,600. At times, so many hundreds of defective TV sets clogged the assembly-line aisles that technicians had difficulty repairing them. Finally, RCA pulled the plug, shipped most of the machinery and work off to Taiwan and left the Memphis labor force with a black eye.

Yet Sharp came here anyway. "People said it was labor problems that caused RCA to close," says Paul Hagusa, the president of Sharp Manufacturing Co. of America, "but we didn't think so. We felt it was RCA's lack of quality in the product."

SUCCESS STORY

Sharp not only has proved the skeptics wrong but also has vindicated the city's work force. Despite some problems with labor unions, its 500,000-square-foot plant has, in the past four years, rolled out a million color-televison sets and a million microwave ovens. It has done so with U.S. labor (all the assembly-line workers and 85% of the managers are American) and with mostly American components (U.S. companies supply 70% of the TV parts and 75% of the microwave parts). Productivity has reached 90% of that in Sharp's Japanese plants, and the defect level is low. The plant has toughed out the recession without reducing its output of about 30,000 TV sets and 30,000 ovens a month (except for a slight dip in 1981), without layoffs and without losing its profitability.

Best of all, the Sharp products shipped from Memphis get high marks for quality and durability from consumer groups.

The Japanese company's remarkable success—on the banks of the Mississippi River—can't be attributed to special machinery or automation; American competitors use the same equipment. Nor can it be attributed to employees who sing the company song every morning, dress neatly in company garb, exercise in unison or eat sushi; they don't.

So, what's Sharp's secret?

The assembly-line workers themselves credit the Japanese style of management. At its core, it demands very hard work and an obsession with quality, an obsession with making every seam weld and switch of the product perfect. A Sharp manager agrees, saying: "It's not what we do, but how well we do it. It's the constant striving for excellence."

TWIST OF FATE

The leader in that drive for excellence, Mr. Hagusa (pronounced huh-GOO-sah), came to his position in Memphis through a full twist of fate. A teen-ager during World War II, he worked in an aircraft plant in Osaka, his hometown, and once, running to work during an air raid, barely escaped death as an American bomb glanced off a trolley-car cable and bounced to a harmless stop just yards away from him. After the war, he became a houseboy to an American Army officer and converted to Catholicism, taking the Christian name Paul. Later, he graduated from engineering school and began his lifelong career with Sharp.

Now, Mr. Hagusa, a small man whose feet just reach the floor as he settles into an American-sized chair, considers his job "a great mission," one that he hopes will ease trade tensions between the U.S. and Japan. And he clearly is presiding at a junction of two cultures.

His office is decorated with a vase of silk cherry blossoms, an ornate samurai helmet and a glowering portrait of Tokuji Hayakawa, the company's founder. But despite his weak English, Mr. Hagusa has learned to live with American customs. ("Shake hand is not so bad, but hug?" he says, wrinkling his face in distaste.) At the height of last year's Christmas party, Mr. Hagusa raised cheers among the employees by declaring, "There are two things I've learned since coming to America: how to wreck cars and how to drink Jack Daniel's."

LABOR LESSONS

He also has learned about American labor unions. In October 1980, the National Labor Relations Board charged Sharp with interrogating employees about their union sentiments, threatening to move the plant if employees voted union, suggesting that certain employees quit rather than support a union, telling employees they could be "nailed to the wall" for distributing union literature, and other offenses, In a settlement in August 1981, the company agreed to post in the plant notices promising not to harass employees involved with the union. Last month, Sharp and the International Brotherhood of Electrical Workers, which the employees had voted to represent them, agreed on a contract.

Michael D. Lucas, a union organizer, doesn't place full blame for the contention on the Japanese management. "They aren't any more familiar with American labor law than you or I am familiar with Japanese labor law," he says, adding that the company was led into the litigation by its law firm. "Japanese management is finally getting the idea that we aren't the devils in disguise they were led to believe we were," he remarks.

But the most important lesson learned by Mr. Hagusa has been how little most American companies know about achieving quality. "The most important path to quality," he says through an interpreter, "is that employees feel that they are of one family, playing an important role in the company."

How is a familial feeling instilled? "There must be a change in the way that management in the U.S. treats its employees," he says. "Otherwise, it is difficult for employees to respond" as the Japanese do.

"In America, when sales drop, the first thing American management in general thinks of is laying off employees. In Japan, it is the last resort," he says. Japanese companies cut costs elsewhere, he adds, or temporarily shift production employees into sales even though "they may not be as efficient as experienced sales people."●

With their jobs assured, workers—in Japan, at least—feel a responsibility to put the company before all else. "In Japan, an employee tries to work his lifetime with the company he chooses. So he does not put much importance in his personal interests," Mr. Hagusa says. "In Japan, they say, 'Job first, family life comes second.' "

For himself, he says, "I don't work to live; I live to work."

This strong work ethic is apparent at the Sharp plant in Memphis. "The Japanese work much more than we do—telexing home to Japan, checking up on us," says Kevin Hignight, an engineer at the plant. "They work to seven or eight every night and on Saturday mornings. They seem to like it."

And they push the U.S. workers relentlessly. "You won't see people sitting around on the loading docks," says Milton Kee, the company's American manager of quality control. "Everyone here has a job, and they're expected to do it. There are no excuses." He adds.

"I've never worked so hard in my life. It's been hard on me, it's been hard on the other employees, and it probably always will be hard. But I've had 17 years in manufacturing, and the last three have taught me more than all the previous 14."

THEY ARE TRAINING ME

Fred Haynes, another engineer, agrees. "It's a tough place to work," he says. "They keep trying to get a little more out of you. They keep going deeper, demanding better quality from you. They're training me. . . . In a way, I'm a Japanese engineer, learning to relate to American companies." Then he concedes. "I think it's real good."

However, not everyone is willing to live under Sharp's ever-tightening standards. When Sharp first asked American suppliers to submit their materials to Sharp engineers in Japan for inspection, almost all failed. Some vendors, exasperated, quit the bidding.

During Sharp's first year here, the Japanese dominance stirred up tension in the plant, too. "They were here to duplicate the plant in Japan," one worker says, "and there was only one way to do things—their way." Especially during that first year, there were some difficult meetings between the Japanese and Americans. With American suggestions carrying little weight with Japanese management, "it was sometimes humiliating," one American manager recalls.

Much of that has passed. "They had to learn about us as people first, before they could trust us," one worker says. "Now, I feel they trust us."

The Americans, in turn, express respect for the Japanese, especially for their attention to detail. Although many of the Japanese didn't know English when they arrived four years ago, "they're even starting to correct our grammar and spelling," one American worker boasts.

GOING BY THE BOOK

In the Spartan concrete-block office of Joe Scott, the production manager for Sharp's microwave ovens, a sign on the wall reads, "Do it right—the first time." But good intentions and hard work alone don't account for Sharp's quality. Another factor

is found in a thick book on Mr. Scott's desk. In the book are line graphs that meticulously track the pulse of the assembly lines through information collected from a data sheet attached to each oven. "We let the data tell us what we need to know to correct a problem," he explains. "We don't use personal opinions or emotions."

Although Sharp has been able to track and improve the level of quality in its own plant, it has found it much more difficult to persuade its 70 U.S. suppliers to do so, too. "We're trying to convince vendors that quality actually reduces their costs," Mr. Scott says.

At a recent meeting of vendors, Edward Cox, Sharp's TV-set production manager, explained "Practice Sincerity and Creativeity," Sharp's off-repeated business creed. "As for sincerity, we expect you to send us 100% quality parts," and precisely on schedule, he said. "As for creativity, we expect you to participate in quality improvements."

REPORT CARDS

Suppliers got "report cards" evaluating the quality of their materials, their prices, promptness of delivery and other factors. Sixteen vendors received a 100% quality rating; 15 others also got A's with 95% to 99%; 18 got B's with 85% to 94%; nine got C's with 75% to 84%; and three got D's with 65% to 74%. There weren't any F's.

"We did about as well as I always did in school, a strong C," says Jeff Talbot, vice president of Talbot Industries Inc., a Neosho, Mo., supplier of wire racks for Sharp's microwave ovens. Mr. Talbot blames his 84% rating on a few bad shipments when Talbot Industries started its first run eight months ago. "Sharp does a first-piece inspection with every shipment, and if it doesn't measure out exactly, then the whole shipment is no good," he says. "Other companies would say, 'Well, it doesn't exactly meet our tolerances, but we can use it.' But at Sharp, if it's wrong, it's wrong."

Next year, he says, with a bit of disbelief in his voice, Sharp expects his company to reach 97%. "It's not going to be easy," he concedes. "If we can cut our in-house rejection down from a high of 12% to 1% or 2% and then make sure we don't send them over 1% defects, that will be the proof of the pudding."

At the head of the class with a 100% rating was, not surprisingly, Tabuchi Electric Co. of America, a Japanese supplier of transformers that followed Sharp to America and set up a plant employing 150 persons in Jackson, Tenn. "We are of the same mind," says Itaru Nakagawa, the director of sales and planning. "Not only with Sharp but with our other customers, we have very eager communications. Even if the customer hasn't rejected this time, even if there is but a little possibility of rejection, we will know at the meeting and correct it."

However, Mr. Nakagawa says his performance must be improved. "Their (Sharp's) objective is that they don't need to inspect our product at all," he says. "It's an objective that is very hard to approach."

Being tough is only half the formula for getting quality. The other half is making suppliers also feel a part of the family, Mr. Hagusa says. Indeed, once a supplier begins working with Sharp and shows willingness to improve, the relationship can last a long time.

"We'd really have to step all over our toes to get thrown out of here," says Mr. Talbot, the maker of microwave wire racks. "They'd give us every consideration under the sun because we have done a good job." Adds Mr. Hignight, the Sharp engineer, "If the company has a problem, we can telex Japan to see if they've solved that problem in the past. Our job actually is to help the vendors get their rejection rates down so they can make some money."

Richard Hollington, vice president of Bryan Custom Plastics Inc., which sells about half a million plastic pieces for Sharp TVs each year, says, "They demand jewelry. There just is not any comparison between the quality Sharp demands and that demanded by RCA and Zenith."

But at the same time, "they helped us with our quality-control layout and training," Mr. Hollington says. "They developed hourly audits of our assembly line to isolate problems sooner."

Like a score of other vendors, Mr. Hollington has been called before Sharp's quality-improvement committee, a body formed two years ago to help vendors. "It's not a hell-raising session at all," he says. "They are providing us with the expertise of their top management. At American companies, if they find a problem in your product, it's your problem. At Sharp, we work it out together."

On a recent day, one of Sharp's "quality circles" is meeting. Led by a trained leader, Sharp's quality circles "brainstorm" ideas, select a problem to be solved and then collect data on the problem. Later, the problem and possibly a solution are presented to Mr. Hagusa and other members of management.

TWO INNOVATIONS

At one table, five microwave assembly workers are discussing one workers' innovation: a metal dowel that fits into the center hole of a five-hole microwave-oven bracket. "I saw that people were having trouble lining up the holes," says Randy Howle, "but if someone before them had put in the center screw, the person didn't have a problem." So Mr. Howle developed a metal dowel, which, when slipped into the middle hole, aligns the bracket while the other four holes are screwed down.

At another table, a group of employees are discussing a second innovation: a plastic table top with countersunk holes in which to stand screws. The device makes the screws simple to pick up and keeps them from rolling off the table and onto the floor. As a result, productivity has improved by seven units a day, the circle says.

However, Sharp doesn't expect a dollar payback from the circles, which meet on company time. Instead, a manager explains, the circles are a "human-relations program."

That comment harks back to a remark by Mr. Hagusa:

"Once there was a time when the Americans had very efficient machines and equipment, Japan did not. At that time—regardless of the workers—those with the most modern machines had the competitive advantage." But now, he says, one country soon has the same machinery as another. "So, what makes the difference today," he says, is "the quality of the people."●

THE 40TH ANNIVERSARY OF THE MANHATTAN PROJECT

● Mr. HART. Mr. President, in mid-April of this year, the founding members of the Manhattan project met for the 40th anniversary of the inception of the project. Although the reunion was primarily a professional conference, some of the members saw this anniversary as an opportunity to reflect on the necessity of reducing and ultimately eliminating the threat of nuclear war, and of the special responsibility of the United States and the Soviet Union in that endeavor.

The development of the atomic bomb, viewed in the context of history, was a vital part of our Nation's role in defending herself and her allies against wartime Japan and Hitler's Germany. As Manhattan project participant Dr. Victor Weisskopf puts it, "We served our country and we thought that such powerful weapons will make wars between great powers unthinkable. Some of us thought that the existence of these dangerous sources of destructive power will lead to an international administration of military and peaceful applications and will end an age-old tradition of organized mutual mass murder."

Dr. Weisskopf calls our present confrontation with the Soviet Union "the craziest arms race in history, where each side has more than a hundred times what is needed to destroy all of us, knowing full well—and this is the difference with all previous arms races—that any actual use of these weapons means the annihilation of both sides."

I think it is vital that we, as a body, publicly recognize the significance of this anniversary—even 1 month late—and of the statement of the Manhattan project participants that accompanies it. I ask that the statement of the 40th reunion of the Manhattan project be printed in the RECORD.

The statement follows:

THE 40TH ANNIVERSARY OF THE MANHATTAN PROJECT

The signers of this statement are scientists who came to the Manhattan Project at Los Alamos in its earliest days and who are now gathered to observe the fortieth anniversary of the opening of the Laboratory. We write this because we worked on the creation of the first nuclear bomb and therefore, even though the consequences and the concerns must be the same for all people equally, we feel a special sense of responsibility. We are appalled at the present level of the nuclear armaments of the nations of the world and we are profoundly frightened for the future of humanity.

The single crucial fact is that the two major world powers now possess a sufficiency of nuclear warheads and delivery systems to destroy each other and a significant part of the rest of the world many times over. Furthermore, in view of the massive overkill potential already achieved, the mobility of many launching systems, and the absence, after many years of research, of any credible defense, we see no conceivable probability of preventing, by any military action that could be taken, such total or near total destruction. This being so, considerations of possible comparative advantage to one side or the other in numbers of warheads or in megatonnage become irrelevant.

Our one hope is that both the United States and the Soviet Union will recognize the futility of trying to outbuild the other

in nuclear strength and also the cataclysmic danger inherent in the effort to do so. We urge upon the leaders of both countries that this recognition be made a cornerstone of national policy and that it lead to the beginning of a mutually agreed upon reduction of nuclear armaments and, for all nations, to the ultimate goal of the total elimination of such weapons.

SENATE RESOLUTION 52—OPPOSITION TO TAX OR FEE ON OIL

● Mr. D'AMATO. Mr. President, I cosponsor Senate Resolution 52, which expresses the sense of the Senate in opposition to a tax or fee on oil. I believe any tax on oil to be an improper course of action for a number of reasons. Foremost among my concerns is the effect such an action would have upon the nascent economic recovery. Oil continues to be the lifeblood of our industrial base. The recent fall in its price augurs well for the prospects of a vigorous economic upturn. It would be most foolish to take an action which would directly impact upon our ability to produce the goods and services that will be the backbone of any real, sustained recovery.

Additionally, I represent a State which is highly dependent upon oil for the necessities of life. New York City and the surrounding 26 counties consume 70 percent of the oil imported into this Nation. A tax solely upon that oil would place New York, a State with an aging industrial base, at a huge competitive advantage. Mass transit, the artery of any true urban existence is almost entirely reliant upon petroleum. Any tax aimed solely at that resource would poison the trough from which our great cities drink.

Along with these admittedly parochial interests, I wish to bring to the attention of my colleagues the fact that any tax on oil is essentially a regressive tax. Those in our society who are at the greatest economic disadvantage, the poor, the underfed, would be forced to bear a disproportionate share of the burden any such tax would impose. As those who have borne the weight of the recession in terms of lost jobs, reduced incomes, and great personal travails, we should not again ask them to shoulder the responsibility for the deficits that recession has caused.

It may, indeed, be the sense of this Congress that an energy tax must be adopted. If so, I suggest that no one form of energy become the focus of attention. An equitable avenue for exploration would be to tax at equal rates all forms of energy. This would insure that no sector of the Nation or its population is forced to assume a disproportionate share of the burden. I believe that the actions being urged upon this body by many who have not fully investigated the ramifications, both social and economic, of a tax solely on oil need to be reconsidered. I urge my colleagues to adopt this resolution forthwith and make clear our resolve to adopt no inequitable tax on energy.●

NATIONAL COAL ASSOCIATION ADVOCATES INCREASED FEDERAL FUNDING FOR COAL R&D

● Mr. RANDOLPH. Mr. President, in January I wrote to Carl Bagge urging the National Coal Association (NCA) to take a more active role in seeking proper Federal support for coal research and development (R&D). The shortsighted planning effort of this administration in their redirection of fossil fuel research moneys is unwise. During the last 3 years we have seen coal R&D funding go from 22 percent of the total energy technology budget to a mere 7-percent request for fiscal 1984. We have had to witness forceful domestic coal policy abandoned in favor of an unrealistic slant toward nuclear power. No longer is there a commitment to push for accelerated conversions to use more abundant and less expensive coal. These actions were accentuated by the lack of attention such policy positions were receiving from the National Coal Association's membership.

Mr. President, I am happy to report that Mr. Bagge, for the National Coal Association, has responded with a strong and positive statement in favor of meaningful increases in coal R&D funding before the Subcommittee on Energy, Research and Development delivered on May 3. Through such an effort the NCA assumes its responsibility of assuring coal is the cornerstone for a secure domestic energy future.

Mr. President, I request Mr. Bagge's complete statement be inserted in the RECORD.

The statement follows:

STATEMENT OF CARL E. BAGGE, PRESIDENT, NATIONAL COAL ASSOCIATION

Mr. Chairman, I am Carl Bagge, President of the National Coal Association.

NCA represents coal producers, sellers and other organizations associated with the coal industry.

It's a privilege to appear before this Subcommittee and to present NCA's views about coal research and development.

Mr. Chairman, this Subcommittee needs no reminders about coal's vital role in the American economy. Coal is America's lowest-cost fuel, one third the cost of oil, and half the cost of natural gas.

Today, 53 percent of America's electricity is generated from coal. By the end of the decade it will be nearing 60 percent. Coal exports are also increasingly important. Each of the past two years, the United States exported 100 million tons of coal, adding $6 billion annually to the Nation's balance of trade.

These exports could easily double by the year 2000, and account for more than $15 billion each year to the country's trading balance.

As we look to the future, it's likely that conservation of energy in homes and commercial buildings will continue, and there is every likelihood factories will produce more goods and services using less energy.

But despite these gains, far more energy will be required to keep the economy growing, and to make sure new workers have jobs. We believe that coal is the logical choice to serve the lion's share of those energy demands.

Its sheer abundance makes it a worthy candidate.

However, by tapping these huge reserves, and by taking advantage of coal's low and stable costs, this nation can move steadily toward the goal of energy sufficiency and energy-pricing stability—both of which are essential to economic growth and development.

We view coal research and development as an important part of making sure coal reaches its fullest potential.

In that vein, Mr. Chairman, I was privileged to deliver a paper last year to the sixth Congress of the International Committee on Coal Research, a committee which I had the privilege of getting started in 1973. Ironically, the first ICCR meeting occurred shortly before the Yom Kippur War, which, as you know, led to the Arab oil embargo.

With your permission, Mr. Chairman, I should like to insert a copy of that paper into the record, so the Committee will know of the American coal industry's keen interest in continuing coal research worldwide.

Any discussion of coal research must also consider the budgetary limitations facing the Federal Government.

The coal industry long has supported fiscal responsibility, and we are ever-mindful that the wise allocation of limited resources continues as a priority today.

With this in mind, I should like to talk about two general research areas of which

the coal industry has a direct and abiding interest.

First, is research geared to improve the production and mining of coal—getting coal to market in the most effective and efficient manner.

Second, is research targeted to improve direct and indirect use of coal, also efficiently, but more important, consistent with environmental quality.

There is also a related concern, which the coal industry wishes to address: That is the research and development of new, potentially-beneficial coal-use technologies, which are not in commercial use.

COAL PRODUCTION TECHNOLOGY

The American coal industry has the most efficient and advanced mining system in all the world, and we are proud of this achievement.

In the past ten years, the coal industry has benefitted from investments amounting to hundreds of millions of dollars for new mines and the training of its quarter-million strong workforce.

It has paid off handsomely.

In the past five years, coal prices at the mine have been stable in real terms, even as oil and gas prices went up.

Just as significant, the coal industry has increased its productivity an average of eight percent each year in underground mines and four percent in surface mines, setting the pace among all American industries.

The fact is, the coal industry has the capacity to exceed present deliveries by at least 150 million tons a year, and we can do it with the very latest technology and top notch skills of our workers.

This doesn't imply that we can rest on our laurels.

Far from it.

But the primary responsibility for research and technological development to improve our mining efficiency and productivity lies outside the DOE Budget.

Research funding to promote more efficient and effective coal production is centered in the Bureau of Mines budget, and is also enhanced by the coal industry and equipment supplier's efforts.

In summary, the coal industry's most urgent challenge, now and in the future, is to increase coal demand, and to find the technology which will lead to much greater coal use in support of the American economy.

RESEARCH ON IMPROVED COAL USE

Coal use in the future will depend in large measure on the pace of economic growth, but it also will hinge on the ability of coal to be used in an environmentally-acceptable manner.

There are a host of effective technologies which remove impurities and pollutants before and after coal combustion. But these technologies are expensive, and they are difficult to apply to existing power plants and other facilities.

In comparison to production methods and technologies, the coal industry does not have the resources to carry out the basic research needed to develop some of the more advanced pollution control technologies.

Development of more advanced combustion systems which are environmentally-sound and economically-feasible are essential to the expanded use of coal.

Despite much progress, new, more effective pollution-control technology is needed—technology which also could cut the present high costs of refurbishing coal-fired power plants.

Mr. Chairman, I do not have the expertise to advise the Committee precisely how federal research dollars should be allocated. However, it appears to us that the proposed budget for fossil-fuel research does not include significant funding for research in some of the promising coal-related technologies.

In this, the coal industry supports continued research for coal preparation, flue-gas cleaning, advanced fluid-bed combustion, combined cycle technology, and post waste disposal. In addition, we support stepped up coordination of this research among DOE, EPA and the Bureau of Mines.

We urge the Committee to consider funding these important coal technologies at the highest feasible levels. For they can lead to the reduction of coal burning costs, and also improve environmental quality.

RESEARCH OF NEW TECHNOLOGIES

Finally, let me turn to the more advanced coal uses. They fall into two categories: Mid-term and Long-term.

In the Mid-term synthetic fuels are of obvious research and development interest.

As the Committee may know, the coal industry has looked with disfavor on a large synfuels program carried out by the Federal Government. We still oppose such a policy.

But we believe Government has a limited role, particularly with the private sector to enhance research of synthetic fuels technologies, which are not ready for commercial operation.

Mr. Chairman, as you are aware, indirect coal liquefaction already has been demonstrated by other nations. We believe, however, that direct coal liquefaction offers far more promise in this country, although it is not ready for commercial use.

The coal industry would urge continued government efforts to improve its prospects.

We would also urge continued support for Magnetohydrodynamics (MHD) which holds promise for the long-term future, but which also requires a consistent and steady level of research and development.

Let me again point out that the coal industry seeks increased government involvement in the basic research and development—not the commercialization—of these technologies.

For we believe that these research efforts will pay rich dividends for our country by allowing this country to use its most abundant and lowest-cost fuel, coal.

In summary, Mr. Chairman, we want to see this nation benefit from more coal use. We want to see our mines operating at full capacity, and thousands more miners on the job.

The coal industry is ready and able to get on with this job.

But we need the tools of research to help make sure that the job is done.

This concludes my testimony.

I would be glad to answer any questions.

World Coal Research: The Need for a Recommitment

(An address by Carl E. Bagge, President, National Coal Association)

A decade ago this month, I had the high honor of convening this body on behalf of the American coal industry for the first time in Washington. Thus began an uncommon and historic commitment by international friends to lift coal's standing in the community of free nations. And, as we said then, to "restore our national Western heritage of coal."

As we meet for the sixth time, to share ideas, fellowship, and to reflect on the future of world coal and global coal research, we might be guided by John Galbraith's observation in his book, The Affluent Society. He said: "The enemy of conventional wisdom, is not ideas, but the march of events."

The worldwide economic recession, coupled with an oil glut and relative oil-price stability, is affecting conventional wisdom about coal's future. Uncertainty again looms on the horizon, and we in coal are no strangers to uncertainty. We coal people—the international coal community—have no reason to hang our head in despair.

Winston Churchill once said that the farther backward he looked, the farther forward he could see. Likewise, we in the world coal community need to look at our future, not in the darkness of present events, but in the light of how far we've travelled since our first gathering in Washington.

Today, I want to take you on a brief journey into the past—to look at the events and ideas surrounding the creation of the ICCR. By so doing, I believe it's possible to put the present in proper perspective, and to gain clearer view of the changes in direction that are needed for our member nations to keep moving along the long, difficult road of human progress.

As we gathered for the first time in 1973, the Yom Kippur War raged in the Middle East. In a sense, the conflict provided an appropriate setting for the already-growing frustration about the world's failing energy condition.

Energy and political leaders alike had good reasons to fear that the worldwide economic machine would sputter as the supply of precious oil-energy was rationed at the whim of a few Mideastern landlords.

We, the world's consuming nations, were vulnerable to serious injury, because of our ever-growing oil-dependence and the clear lack of feasible national energy alternatives in the face of a worldwide energy crisis.

Even the earth's most abundant and versatile energy resource, coal, seemed to offer a "Hobson's choice." Despite its massive reserve strength, coal was in no condition then to do battle in the energy fray. Coal's vitality had been sapped by falling worker productivity and the steady inroads on coal markets by "cheap" oil and gas, a mining system of another era, and a total lack of public awareness of coal's potential. What's more, coal's potential to supply more energy for world economic growth was further compromised by increasing environmental concerns about fossil fuels in general and coal in particular.

These realities sent a clear signal to the newly organized ICCR. Coal production had to be brought into balance with expected rising energy demands. For coal to compete successfully with oil and gas, research was needed to develop new combustion technologies, to find ways of dealing with the by-products of coal burning, and more importantly, to improve productivity in the mines.

Then, there seemed to be a way to short-cut the long, laborious process of putting the world coal industry back together. The United States had just ended a decade of space achievements—a glittering example of what basic research supported by generous amounts of public funds could get done.

Converting massive amounts of coal to oil and gas would fit nicely into such a grand scheme of unified energy efforts. A large scale synfuels industry, we believed, also could effectively cap world oil-prices—insulating consuming nations from OPEC's pricing and production decisions.

The vast amount of capital necessary for such a venture was ready for the taking. Our Congress was already considering energy research legislation. The only issue then, was whether to allocate $10 billion or $20 billion over the next five years, and what share coal could win.

But it was the political uncertainties in the Middle East that added the proper ingredient of urgency. Most political leaders, if not the public, understood the implications of rising oil prices set by a few nations.

In my speech to the first ICCR meeting, I warned that the oil price dike was about to break. World oil prices already had reached $5.75 per barrel. What's more, we were shocked when the Ambassador to Saudi Arabia, Jim Akins, predicted world oil prices of $10 per barrel by 1980 and an annual cost of $13 billion to the United States.

On October 20, four days after my keynote speech, the Organization of Arab Exporting Countries placed the United States under an oil embargo. By the end of the month, the posted price of OPEC crude had nearly doubled. By 1980, oil prices were nearly three times higher than Ambassador Akins had envisioned, and American consumers were sending $80 billion each year to pay for imported oil.

The price increase in 1973 set in motion what is perhaps the most cataclysmic energy and economic decade in history. The so-called energy crisis of the early 1970's continues even today as an oil crisis.

Yet, I'm reminded that the Chinese use two distinct characters to fashion the word crisis. One means danger. The other means opportunity. The dangers—the trials and tribulations for all the world's consuming nations—continue to dominate recent history. But from these dangers have sprung great opportunities for expanding world coal markets.

We need to take stock of what rising oil prices did for coal's fortunes—how the events of the Seventies helped to galvanize our nations into action, and elevated coal to a new, prominent and respectable position in the world community.

First, the coal industry's ability to meet worldwide demand is no longer in question. Through public recognition, research and a massive infusion of capital, the world's coal mining system has been rejuvenated as never before.

The enthusiasm with which investors rushed to coal's side is testimony to a brighter future. Investors of all our free nations will act in their own economic self-interest. Just as important, the priority given to expanding coal markets by our governments at the highest level is an iron-clad endorsement of more coal use in the years to come. This was confirmed at the economic Summit meetings at Tokyo and Vienna by our economic ministers and heads of state.

The symbiosis of self-improvement and greater investment has caused a radical shift in the public's attitudes about coal. Less than ten years ago, the question was whether world coal could contribute to world energy sufficiency and price stability.

That concern was answered by the World Coal Study and the President's Commission on Coal, among others. But more to the point, the answer is clear from coal's performance—not the political rhetoric of the 70s.

Ten years ago, the world's free nations were at the mercy of OPEC, because there were to few economically-feasible energy alternatives. Now, OPEC is in trouble because of the international coal alternative.

Coal's share of the American electric utility market, now more than 53 percent, is expected to reach nearly 60 percent in a decade. Despite present market conditions, we expect growth in production of four percent each year. This is short of the seven percent once predicted, but nonetheless a sign of sound industry and market strength.

The reasons are obvious. No new oil and gas plants are planned in the United States, and nuclear power is still beset with financial and regulatory problems. What's more, since 1978 the real price of coal at the mine has remained stable or even declined. Oil and gas prices have risen.

The outlook for coal is also excellent among the OECD nations and in the Pacific Rim.

Recent reports indicate that the OECD countries will invest as much as $200 billion over the next 20 years in new coal-burning utility plants, other coal-fired facilities, and transportation to match supply with demand.

The Pacific Rim nations, especially Japan, have made a solid commitment to coal. And even though the worldwide recession has led to some reevaluation of Japan's needs, there is no indication that the Japanese are any less determined to diversify their energy base.

This doesn't imply that the battle is won. To the contrary, large gains in mining productivity are still needed, particularly in those nations where deep mining supplies the lion's share of domestic energy.

Today, better coal combustion technologies are essential to assure coal's continued competitiveness and environmental acceptance around the world.

Yet—and I want to reemphasize this crucial point—improved coal mining and production technologies today are well within our grasp. Now, the job is to build on what we've already achieved during this past decade.

Second, the events of the past several years have forced a rethinking of the coal research process, especially with synthetic fuels.

If we are honest with ourselves, we have to admit that there was too much overlapping of synfuels research—too many dollars spent for the results achieved.

This doesn't mean that synfuels production isn't important, or that the ICCR shouldn't welcome more opportunities to move ahead with synfuels research on a more selective basis. But selectivity, rather than a so-called "moon shot" effort, is the politically and economically sound alternative today. In this, the coal industry continues to oppose a synthetic fuels program financed and carried out by the Federal Government. But we believe the government has a role in enhancing research, particularly with the private sector into synfuels technologies yet to reach commercial use.

We know now that no one technology can put a lid on world oil prices. Rather, increasing coal conversion and new coal-fired plants already affecting OPEC's markets, as well as its pricing and production decisions.

In 1981, Sheik Yamani predicted that the world coal price would rise to the world oil price. It hasn't happened precisely because coal prices are set by worldwide competition within our industry—a plus for us and world coal consumers. And to the extent that the world coal producing nations work together to improve the mine-to-market system, coal's ability to compete with OPEC oil will continue to be enhanced.

There's another good reason why attitudes about coal research are changing. Unlike the halcyon days of the early 1970's when our nations could rely on booming economies to increase the flow of research dollars, a worldwide recession is cutting research funds to a relative trickle.

In the United States, Congress and the President are still trying to cope with record federal budget deficits, and to forge a new agenda of priorities.

Virtually every program in the federal budget is affected, including energy research. The American coal industry is resolved to live with these reductions in the national interest. Meanwhile, we are urging Congress and this Administration to bring more equity in the allocation of available research monies.

While we support the President and his efforts to turn the economy around, we are no less determined to make certain the administration lives up to its commitment to expand coal markets domestically and internationally by providing enough research dollars to help make this goal a reality.

More important, to improve American coal's competitive edge—at home and abroad—we are turning our attention to increasing competition in the coal transportation system, and to streamline existing regulations.

All our member nations are facing the same dilemma, and we must make the most of these opportunities. But there is a caveat for the ICCR: As we face a loss of world coal research funds, and as we are required to live within our national fiscal means, our coal-research capability must be safeguarded. For the richness of expertise in coal research is the world coal industry's inner strength.

Despite unprecedented progress, despite all we've accomplished, the coal industry is facing a new kind of energy war, one which demands research soldiers of the highest ability and dedication.

I'm talking about the challenge of worldwide public acceptance of coal—the "new frontier" for coal research.

When the ICCR was born, we pledged to support research that would help to use more coal, while also protecting the environment and public health.

Initially, our attention was wisely focused on recovery efficiencies. To stimulate coal production was the appropriate challenge of the 70s. But coal production is no longer our most pressing problem. I submit, that the research of sulfur and nitrogen oxides and trace element emissions—despite the quantum leaps already made—is the foremost challenge in coal's new research frontier.

We are headed into the "twilight zone" of acid rain, the "greenhouse effect," and most probably other phenomena. These concerns will continue to weigh heavily on the minds of energy planners and political leaders as they shape future energy policy.

For example, almost overnight acid rain has emerged as an international political and scientific issue. In the United States, Congress is considering acid rain control legislation, which if passed, would cost electric consumers in a few Midwestern and Southern states more than $150 billion, while throwing thousands of miners out of work and savaging some coal markets.

This would be done, despite the obvious unanswered scientific questions about acid rain's causes and effects. And for this reason, the American Coal Industry and—I'm gratified to say—the Reagan administration are fighting this proposal.

As with past environmental issues, the coal industry again finds itself in the posi-

tion of having to prove its inculpability. The calls by the coal industry for more research before launching such a damaging and costly regulatory program are seen by its critics as a delaying tactic—an attempt to hide until the acid rain debate runs its course.

This is not only dead wrong, it flies in the face of the superlative record of environmental improvement achieved by the world coal industry, the users of coal, and the United States Government over the past ten years.

We know that the acid rain issue isn't going away. What's more, we also know that acid rain isn't solely an American issue, but one which is likely to face coal producers all over the world.

As a body representing the world's leading coal producers and consumers, the ICCR has a duty to help find the causes and effects of acid rain—to stay in the lead in environmental and public health research.

For whether its acid rain, the "greenhouse effect" or some other unresolved scientific issue, the results of inaction are potentially the same: A clear and present danger to continued worldwide acceptance of coal, and to our future markets.

This, I submit to you, is not a self-serving exercise. Expanding coal markets to provide an ample supply of lower-cost energy, to fuel economic growth and development, is no longer an option. It is a world imperative, now and in the years to come.

Therefore, I ask, the ICCR on this historic occasion to recommit itself—as a decade ago—to a new, exciting and promising agenda for the decade ahead—to meet this challenge head on.

In ten short years, with the efforts of this Committee, we have helped to heal a broken and battered world-coal industry. We have emerged healthy, strong and confident and, more importantly, with a degree of public awareness we have never known before.

As we face new challenges on a new coal research frontier, we know what needs to be done. Two years ago, at our meeting in Dusseldorf, my good friend and our first chairman Erwin Anderheggen said: "It is no longer necessary to talk on the necessity of international cooperation in coal research and development. Without such cooperation, the ambitious targets set for coal production and consumption . . . simply cannot be reached." Let me close with a thought from one of America's greatest Presidents, Abraham Lincoln. He said:

"The dogmas of the quiet past are inadequate to the stormy present. The occasion is piled high with difficulty, and we must rise with the occasion. As our case is new, so we must think anew and act anew."

Let us in the international coal community ask not if we should proceed, but rather how. And let us get on with the unfinished job of helping all the world's people achieve a better life for themselves and for future generations—with low cost energy through coal and coal research. As we did a decade ago to the new challenge of the decade of the 80s. I ask you to rise to the challenge. Let us recommit ourselves in behalf of the world community.●

THE U.N.: A BUREAUCRAT'S LAND OF MILK AND HONEY

● Mr. LAXALT. Mr. President, recently the so-called Third World nonalined nations met and in a series of resolutions once again made a mockery of the meaning of the term "non-alinement." After a predictable diatribe by Fidel Castro, the Third World representatives settled down to business and passed resolutions denouncing the United States and Israel but virtually ignoring the existence of over 100,000 Soviet troops in Afghanistan in a brutal war of aggression that has featured the use of biological and chemical warfare against Afghan freedom fighters.

We are by now inured to the hypocritical double standard employed by the so-called Third World countries on the international stage, and nowhere is this double standard more frequently applied, to the detriment of the United States and its allies, than in the United Nations.

In past years, I have, time and again, questioned the level of American financial support to the United Nations and its satellite agencies, dominated as they are by anti-American Third World countries. For example, on September 16, 1980, I raised the question of the U.N.'s hypocritical disregard of Soviet aggression against Afghanistan and, quoting Phillip Geyelin in the Washington Post, asked why 30 practicing democracies should provide two-thirds of the financial support for 153 General Assembly votes that represent less than 10 percent of the world's population—particularly when this global paternalism embraces an ever-expanding area of political, economic and social activity, one outstanding example, now pending action by the U.N. Economic and Social Council, being the enactment of international consumer protection guidelines based on the socialist bureaucratic principles predominant in the Third World countries.

Mr. President, as chairman of the Appropriations Subcommittee which oversees American contributions to the U.N. and its satellite agencies, and as a citizen, I believe the time is long overdue for this country to scrutinize more closely the way in which our money is being used by those international bodies. This is especially true at a time when the American people have mandated and are getting closer scrutiny of the fiscal expenditures made by our Government in conducting its domestic as well as its international affairs.

I note that Senator LARRY PRESSLER, of South Dakota, shares my concern and will be conducting hearings before his Foreign Relations Subcommittee on Arms Control, Oceans, International Operations, and Environment on this very topic.

An article appearing in the February 21, 1983, edition of U.S. News & World Report, titled "The U.N.: A Bureaucrat's Land of Milk and Honey" sheds considerable light on these matters. I ask that this article, written by Jeff Trimble, be printed in the RECORD.

The article follows:

[From U.S. News & World Report, Feb. 21, 1983]

THE U.N.: A BUREAUCRAT'S LAND OF MILK AND HONEY

UNITED NATIONS.—Here is a place where foreign workers often earn many times what they would be worth in their own countries, pay low taxes, do jobs of dubious value and do not worry about being fired.

By their own accounts, it amounts to an unrivaled international boondoggle—and one-fourth of the money that sustains it comes out of the pockets of American taxpayers.

The good life of the United Nations bureaucrat is a civil servant's dream that shows no signs of ending.

Outvoted by a majority of tiny nations that pay only a fraction of the U.N. bills, top contributors such as the United States and the Soviet Union are powerless to stop lavish spending.

The U.N. employs 46,000 people in 24 nations in jobs that range from guiding tourists to keeping peace in war zones. The largest concentration is at U.N. headquarters in Manhattan, home to 6,000 employes of the Secretariat, or administrative arm.

Original goals. Founders of the U.N. tried to model its administration after the U.S. civil service—the most highly paid government service in the world. It was to be a corps of dedicated professionals from around the globe who would set aside national differences in the interests of world peace. Pay was to be comparable to that of U.S. government workers, with extra benefits to entice foreign workers to live abroad.

It hasn't worked out that way.

Today's U.N. bureaucrats are paid 35 percent more than U.S. civil servants. Yet this premium has not bought efficiency. The corps is riddled by charges of political partisanship, and U.N. diplomats complain of inefficiency and an avalanche of useless reports.

Most of the U.N. employees are supplied by governments of the 157 member nations to fill slots according to geographical quota. Others are hired after passing tests for specialized work such as translation. Those who get top positions usually are political appointees.

Says an assistant secretary-general: "Many foreign governments regard the Secretariat as a dumping ground for officials unwanted at home."

An impartiality gap. U.N. staffers are supposed to sever ties with their native governments and work impartially in the international community. Many say that rule is ignored, especially by Communist-bloc staffers. An American U.N. official notes: "I have several Russians working for me who make no bones about stopping by the Soviet U.N. mission at least once a week." In fact, Soviet employees of the U.N. live in the U.S.S.R. compound in the Bronx.

Gross staff pay in New York ranges from $13,000 a year for starting messengers to almost $125,000 for an under secretary-general, the second-highest rank. Secretary-General Javier Pérez de Cuéllar earns $163,695, plus a $22,500 annual expense account and free lodging. More than 30 U.N. officers earn over $100,000 a year.

That means President Reagan is the only U.S. official who is higher paid than dozens of U.N. administrators.

Members of the U.N. staff pay no national income taxes, but a portion of their salaries is deducted in a "staff assessment." In the case of American employees, these funds are

used to pay U.S. taxes. But the assessment falls short of the tax levy—$7,000 in one instance. The U.N. makes up the difference.

The U.N. is a bonanza for Third World employees. Says an Egyptian staffer: "My take-home pay is $2,600 a month at the U.N. As a government worker in Egypt, I would get about $375 for the same work."

To soften the blow of New York City expenses, U.N. employees get cost-of-living adjustments as often as three times a year to make their salaries virtually immune to inflation. Similar bonuses go to U.N. workers worldwide.

In addition, they receive substantial perquisites:

Moving expenses to New York City, a bonus to cover initial costs and a grant for moving home when they quit.

Sales-tax exemption at restaurants and stores in the U.S. for top officials with limited diplomatic immunity.

Early retirement at age 55 and mandatory retirement at 60, with pensions averaging one-third more than those of their counterparts in the U.S. civil service.

Yearly allowances of up to $850 for a dependent spouse and $700 for each dependent child, plus education grants worth $2,250 and up for families of foreign workers to subsidize costs of schools abroad or private U.S. schools.

Six weeks a year of paid vacation and free travel to their homelands every two years for foreign workers and their families.

In the spacious employe cafeteria overlooking the East River, workers can buy a cheeseburger, French fries and coffee for $2. At a nearby New York City coffee shop, the same meal costs more than $5. For top officials, there is the Delegates Dining Room, where on a recent day the chef's special was *côte de veau fines herbes* for $8.50. Similar meals in fine local restaurants cost up to $25.

Also, because the U.S. complex is considered international territory, New York City's 8.25 percent sales tax is not added to food prices or to purchases in the building's several gift shops.

Low turnover. With such luxuries, it is not surprising that staff turnover at the U.N. is less than 10 percent a year. Most who leave were hired on fixed-term contracts—an arrangement favored especially by the Soviet bloc, which does not like the idea of its citizens staying permanently abroad.

U.N. employes are hired on two-year probation. After evaluation, they are given lifetime contracts subject to occasional review—a procedure insiders say is more formality than substance.

Says one Western European U.N. worker: "Short of killing my boss, there is virtually nothing I could do that would get me fired."

Yet coddling workers does not insure ideal job performance. In a recent U.N. survey, 69 percent of the diplomats responding said the overall quality of the staff had "declined substantially" in recent years. Two-thirds of the diplomats said many candidates recommended by governments lack needed job skills and experience. Three fourths complained that the U.N. produces too much paper.

The chief reason for the bureaucracy's problems, according to the survey: Political interference by governments that demand their U.N. employes put national interests first. In a clearly political stand meant to embarrass the West, bureaucrats released a report in October claiming the Western press had a negative influence on the world. A redfaced Pérez de Cuéllar termed that report "unfortunate and ill-considered."

In a soon-to-be-released study of the U.N. staff by the Heritage Foundation, a conservative research institute in Washington, D.C., Assistant U.N. Secretary-General James Jonah is quoted as saying: "Few governments truly take seriously the independence of the international civil service."

It is common knowledge that some staff members provide advance information or give warning to their governments of action contemplated by the Secretariat.

Politics plays a major role in filling staff vacancies, as powerful appointees pack the Secretariat with chosen underlings.

U.N. documents reveal that India has 54 representatives in professional-quota Secretariat jobs, although guidelines call for a maximum of 25 in such slots. Ethiopia has 25 workers, while guidelines specify no more than 14. The U.S. has 504 professional workers in the Secretariat, well within guidelines of up to 553 posts for Americans.

U.N. administrators say some countries take advantage of technicalities to stack the payroll. For instance, many workers are hired in far-flung U.N. offices for low-ranking jobs not subject to quotas, and then they are promoted into the professional ranks.

Soaring costs. Growth of the U.N. bureaucracy is reflected in skyrocketing spending, up 80 percent in the last five years. According to one study, U.N. salaries and other staff costs in New York City increased 96 percent, to 230 million dollars a year, from 1977 to 1980. During the same period, the report says, money spent on furniture and equipment rose 70 percent, to 2 million dollars a year.

The U.S., which pays 25 percent of the cost of supporting the U.N. system, and other major contributors have little control over the expansion of the bureaucracy. In an unlikely alliance, representatives of the U.S., the Soviet Union and Britain, speaking for the 10 nations that provide 85 percent of U.N. funds, met with Pérez de Cuéllar last November to urge spending reductions.

But when votes were counted during December budget meetings, these powers found themselves overwhelmingly defeated by a bloc of Third World and other nations that contribute only a minute portion.

Such budgeting means there is little chance U.N. bureaucrats will be prodded into fiscal austerity. Comments one Western representative at the United Nations: "Without responsible oversight, the system will continue to grow out of control."●

PATENT TERM RESTORATION FOR FORANE

● Mr. LAUTENBERG. Mr. President, I wish to express my support for an amendment to the Anti-Tampering Act, offered by Senator EAST and approved by the Senate yesterday, to extend the patent life of a new anesthetic, isoflurane, called Forane. Events surrounding the approval process for the drug application filed by the manufacturers of Forane clearly makes the case for this amendment.

Forane was first synthesized in 1965, and patents were issued in 1970. After going through developmental steps, filing necessary forms, and undertaking clinical tests, the manufacturer filed a new drug application with the Food and Drug Administration in 1974. By early 1976, the manufacturer expected to receive final FDA approval. Instead, the FDA required a new health effects test to evaluate the carcinogenic potential of Forane as a result of questions raised in a study by an independent doctor. The manufacturer conducted the new tests and finally received new drug approval in December 1979.

Mr. President, nearly 2 years later the FDA published a notice that the independent doctor's study, which had resulted in the additional series of tests, had been deficient. In effect, the delay in approving a new drug application for Forane had been unnecessary.

The East amendment is intended to restore part of the time that was lost because the FDA required the additional and unnecessary testing to the period that Forane has patent protection. The patent extension will be equivalent to the time between February 1976, when the FDA required additional tests in order to approve the application, and May 1981 when it approved the manufacturing plant for Forane.

Mr. President, the parent company of the manufacturer of Forane is Airco, Inc., which is a valued New Jersey company. I am pleased that the Senator from North Carolina, Mr. EAST, a member of the Judiciary Committee, recognized the validity of Airco's concern about the unnecessary requirement for additional testing which delayed their marketing of an important new anesthetic agent. This amendment at least partially corrects the problems caused by the delay, acknowledged by FDA to be unnecessary, restoring part of the patent life of Forane.●

SMALL BUSINESS MOTOR FUEL MARKETER PRESERVATION ACT—S. 40

● Mr. D'AMATO. Mr. President, I rise to cosponsor a vital piece of legislation, S. 40, the Small Business Motor Fuel Marketer Preservation Act. I urge my colleagues to adopt it immediately. This bill is vital to the continued viability of the neighborhood service station. It will prevent the major oil companies from engaging in the blatantly anticompetitive practices that have all too often characterized their actions at the retail level.

Over the past decade, we have witnessed the disappearance of many of the service stations that once served America. While there are other contributing factors that helped cause this phenomenon, such as shifting populations and increased mileage of recent make automobiles, the main reason for this unparalled loss of small businesses is their inability to compete with service stations owned by the major oil companies—an inability caused by the pricing strategy of the

oil companies themselves. It is a well-documented fact that the great majority of the profits realized from the sale of gasoline are made at the wholesale level. This enables company-operated stations to effectively undercut dealer-operated stations by selling gasoline at the retail level at prices that the dealer-operated stations pays at wholesale.

A ban on the retail efforts of wholesalers and the crucial open supply provision of this legislation will address this serious problem. When the State of Maryland enacted divorcement legislation, it realized the lowest rate of station closings in the Nation. If we move swiftly to enact this legislation, thousands of small businessmen will survive who might otherwise fall victim to these anticompetitive practices. We must act now or face the situation where the major oil companies will have instituted a monopoly that can only lead to inefficient and noncompetitive pricing to the consumer. The need is now. I urge my colleagues to act while there is still an independent service station industry left to save.●

PLO PRESENCE IN WEST BEIRUT

● Mr. LEVIN. Mr. President, I am entering into the RECORD today copies of correspondence that I have been conducting since last September with Lawrence S. Eagleburger, Under Secretary of State for Political Affairs. In his latest letter, Mr. Eagleburger acknowledged that the State Department was remiss in not releasing to the public, through the news media, information about the presence of Palestine Liberation Organization fighters in West Beirut at the time that Israel moved into the city.

Mr. Eagleburger acknowledged to me and other Senators in September that the Department knew the PLO had left behind as many as 600 fighters in Beirut, in violation of the Habib agreement that was in effect prior to the time Israel moved into West Beirut. Disclosure of this knowledge at the time would have buttressed the justification for—if not the wisdom of—Israel's move into Beirut. Mr. Eagleburger promised me and my colleagues that the State Department would release the information to the media at that time. But the Department did not release it, nor has it done so yet. I find rather disturbing Mr. Eagleburger's explanation that the information has not been released because the media have not asked for it, when the media have not even known about it.

Mr. President, I believe the way the State Department has conducted itself in this matter is further evidence of a tilt by the administration away from Israel.

Other evidence includes:

First. The administration's treatment of Israel as an enemy in Lebanon, by refusing to permit on-the-ground communication between our forces and the Israelis, which other members of the peacekeeping force do permit and maintain.

Second. The administration's delay of the F-16 sale to Israel while the Soviets are building SAM-5 missile sites in Syria and are manning them with uniformed personnel.

Third. The administration's shelving of the agreement on strategic cooperation with Israel.

Fourth. The administration's undermining of Camp David by appearing to dictate the final status of the West Bank, rather than concentrating on getting the parties to the dispute together to resolve the relevant issues.

Fifth. The unwillingness of the administration to strongly prod Saudi Arabia and Jordan to recognize Israel's existence and to join the peace process.

I hope, Mr. President, that the correspondence which I ask to be printed in the RECORD today will set the historical record straight with regard to what the State Department knew about the PLO presence in West Beirut when Israel moved in, and how it distorted public perceptions at the time and since then by its failure to make the information known.

The correspondence follows:

SEPTEMBER 24, 1982.

Hon. LAWRENCE S. EAGLEBURGER,
Under Secretary for Political Affairs, Department of State, Washington, D.C.

DEAR LARRY: Last Friday at the briefing in the Foreign Relations Committee Room, you assured me and us that, if the State Department had not that day already stated that the PLO kept 300-600 armed personnel in Beirut and that such action was a violation of the Habib agreement, the State Department would do so promptly.

Was that done? If not, why not? And when will it be done?

Many thanks.

Sincerely,

CARL LEVIN.

U.S. SENATE,
Washington, D.C., January 11, 1983.

Hon. LAWRENCE EAGLEBURGER,
Under Secretary for Political Affairs, Department of State, Washington, D.C.

DEAR LARRY: On September 24, 1982, I wrote you a letter asking if the Department of State had publicly confirmed the fact that armed PLO personnel remained in West Beirut after the evacuation of the PLO had supposedly been completed, in violation of the Habib accord. You will recall, and I am sure the transcript of the briefing confirms, that you assured us in a Committee on Foreign Relations briefing that you would issue such a statement.

I have not received a reply to my letter and to my knowledge no such statement has been issued. My chief of staff discussed this matter with a member of your staff and was told that this matter is classified and you didn't want to speak to this issue publicly. However, Senator Pell stated after the briefing at a press conference that you had said armed PLO fighters remained in Beirut after the supposed evacuation, and I have also made public statements to the same effect. Therefore, I can see no justification for refusing to confirm this fact publicly.

I am asking you again to publicly confirm the fact of this PLO violation of the Habib accord before Israel's move into Beirut. Thank you.

Sincerely,

CARL LEVIN.

U.S. DEPARTMENT OF STATE,
Washington, D.C., February 4, 1983.

Hon. CARL LEVIN,
U.S. Senate.

DEAR SENATOR LEVIN: Thank you for your letter of January 11 to Undersecretary Eagleburger regarding the presence in Beirut of Palestinian combatants in violation of the agreement for the departure of all Palestinian armed personnel from Beirut negotiated by Ambassador Philip Habib.

As you point out, combatants of the Palestine Liberation Organization (PLO) were all to have departed Beirut in accordance with arrangements negotiated by Ambassador Habib. All parties to the agreement were aware that any lingering presence or re-infiltration of such personnel into Beirut would have been a violation of the agreement. Furthermore, it was also our position that any re-entry of those personnel evacuated from Beirut into other parts of Lebanon would also be a violation of the agreement. Finally, a key element of the departure agreement was a ceasefire in place by all parties.

Subsequent to the conclusion of the evacuation on September 1, 1982, there was evidence that some PLO fighters and leaders evacuated from Beirut had reinfiltrated into Lebanon. The U.S. made known its view that this was a serious violation of the Habib plan and an affront to Lebanese sovereignty. We called on all governments enjoying influence with the PLO to discourage such activity. In addition, there were also reports—generally coming from the Government of Israel—which alleged that large numbers of PLO combatants either remained in Beirut or were re-infiltrating into the city. The figure of 2,000 PLO personnel remaining after the evacuation was cited frequently in such reports. For example, on September 17, two days after the beginning of Israeli military movement into West Beirut, the government of Israel announced in a Cabinet statement that "Following the assassination of President-elect Bashir al-Jumayyil, the IDF took positions in west Beirut in order to prevent the danger of violence, bloodshed and anarchy while about 2,000 terrorists, equipped with modern and heavy weapons remained in west Beirut, thus blatantly violating the departure agreement."

I would note, however, that in the aftermath of the Israeli takeover of Beirut, in violation of assurances received by the U.S., no evidence emerged to substantiate the reports that such a large number of PLO combatants remained in Beirut. For example, resistance to the Israeli operation was light and mostly from Lebanese militia in West Beirut. Furthermore, the Government of Israel informed us in late September that fewer than 20 persons were arrested by the Israeli forces during the Beirut operation. Most of the Palestinians subsequently arrested by the Lebanese authorities, after the withdrawal of the Israelis from Beirut, were apprehended as illegal aliens and criminals, not as PLO combatants.

In sum, while some PLO personnel evacuated from Beirut did go back to Lebanon in violation of the agreement, the Government of Israel was also in violation of the agreement, which contained an injunction for all parties to maintain a ceasefire in place. Following the Israeli entry into West Beirut, the circumstances would have made possible but did not in fact lead to the apprehension of any significant number of PLO personnel.

I hope this information clarifies the matter.

With cordial regards,

Sincerely,

POWELL A. MOORE,
Assistant Secretary for Congressional Relations.

MARCH 1, 1983.

Hon. LAWRENCE EAGLEBURGER,
Under Secretary for Political Affairs, Department of State, Washington, D.C.

DEAR LARRY: I am in receipt of Powell Moore's February 4 letter in response to my January 11 letter to you relative to the allegation that armed PLO personnel remained in West Beirut, in violation of the Habib accord, after the evacuation of the PLO had supposedly been completed.

In briefing to me and my colleagues, you indicated that U.S. Intelligence confirmed same and that we could so state publicly.

Mr. Moore's letter does not confirm this allegation, nor does it deny same. Rather, it describes some PLO "reinfiltration" into "Lebanon."

I would appreciate your responding to my question. Did you inform us in that September 17 briefing that U.S. Intelligence believed that hundreds of PLO fighters remained in West Beirut in violation of the Habib accord and that the State Department would promptly so state?

I would appreciate a responsive letter. Thank you very much.

Sincerely,

CARL LEVIN.

U.S. DEPARTMENT OF STATE,
UNDER SECRETARY OF STATE
FOR POLITICAL AFFAIRS,
Washington, D.C., March 22, 1983.

Hon. CARL LEVIN,
U.S. Senate, Washington, D.C.

DEAR CARL: Thank you for your letter of March 1 regarding my testimony on PLO fighters who remained in Beirut following the cease-fire. I am sorry that this issue has dragged on for so long. Let me set the record straight.

Last September 17, I informed you and your colleagues that, according to U.S. intelligence estimates, 300–600 armed PLO fighters remained in Beirut in violation of the agreement negotiated by Ambassador Habib. I indicated that the State Department would soon make this information public, and noted that I had authorized our spokesman to do so if queried by the press.

The press did not however, ever raise the question of PLO fighters in Beirut, and hence, the information was not released as I had anticipated.

The Department was remiss in not taking direct steps to make our assessment public immediately following my testimony. It is only fair to point out though, that the officers who should have arranged to release the information on PLO fighters were also responsible for tracking and responding to fast breaking developments in Beirut. The issue of PLO fighters remaining in Beirut was soon eclipsed in the public eye by other developments. That is not an excuse, just an explanation.

I respect your perseverance in pursuing this issue and thank you for making sure that the matter came to my attention.

Sincerely,

LAWRENCE S. EAGLEBURGER.●

THE APPOINTMENT OF EDWARD DENNIS AS NEW U.S. ATTORNEY

● Mr. SPECTER. Mr. President, I would like to take this opportunity to recognize Hon. Edward S. G. Dennis, Jr., who, on May 9, 1983, was sworn in as U.S. attorney for the eastern district of Pennsylvania. Mr. Dennis comes to this high post with outstanding credentials. His schooling at Pennsylvania State University, Kings Point Merchant Marine Academy, and the University of Pennsylvania Law School provides an excellent academic base. His clerkship with Hon. Leon Higginbotham on the U.S. Court of Appeals for the Third Circuit gives him special insight into the quasi-judicial aspects of the prosecutor's role. Mr. Dennis' 5 years' experience as assistant U.S. attorney in Pennsylvania provides a firm foundation for criminal prosecutions of violent crime and white-collar crime, grand jury investigations and the civil functions of the office. His 3 years as chief of narcotic and dangerous drug section for the Criminal Division of the U.S. Department of Justice round out a wealth of invaluable experience.

Beyond this record of achievement and experience, Mr. Dennis brings a special background and perspective for other vital facets of this most crucial position. In addition to the customary criminal and civil actions, the U.S. attorney has the power to enforce vigorously the laws of the United States which prohibit discrimination in employment, housing, and educational opportunity because of race, color, creed, or national origin. A creative U.S. attorney can be a powerful force to guarantee equality of opportunity, improve the quality of living for those who reside in his jurisdiction, and secure justice for all.●

S. 996—EXPORTATION OF ALASKAN OIL

● Mr. D'AMATO. Mr. President, I rise in support of S. 996, a bill which would extend the current restrictions on the exportation of Alaskan oil. This is a vital piece of legislation, one whose adoption I urge upon my colleagues. When Congress passed legislation to spur the construction of the trans-Alaska pipeline, a stipulation was placed upon the producers of the oil to the effect that they must not export that oil. This was a wise and prudent decision. The United States underwent many shocking changes when the price of oil on the international markets rose dramatically during the 1970's. In order to protect ourselves from the possible recurrence of such an event, we must maintain for our domestic use the oil we would have to rely upon in any future crisis.

The reliance of my State upon uncertain sources of imported oil has driven home to me the inherent flaws of any agreement that we can depend on OPEC to continue to supply our country in times of need. In order to lessen the shock of any future cutoff of oil, we must vigorously protect our domestic supplies. The argument that we ought to change this ban in order to lessen our trade deficit with Japan is facetious. Any lessening of this deficit would be offset by the increase in our imports of oil from other sources. Additionally, vast sums of money have been spent to construct a pipeline across the Isthmus of Panama in order to ship this oil to the east coast at a reasonable cost. These funds would be wasted if the oil was sent to Japan. American businessmen who invested in the pipeline would suffer great financial hardships. Mr. President, I believe that any benefit from such an act would be illusory and any drawback would prove all too real. I urge my colleagues to reaffirm the intent of Congress that this oil is best used when used at home. I ask my colleagues to support this vital legislation and statement of national principles.●

CHEMICAL AND TOXIN WEAPONS

● Mr. QUAYLE. Mr. President, today the Wall Street Journal's lead editorial is on a subject that I have spoken about on several occasions and will continue to speak out on: yellow rain.

At this point, I do want to commend the Wall Street Journal for being the one major media outlet to continually keep the story of the illegal and inhumane use of chemical and toxin weapons in the forefront of the news.

For those who still confuse yellow rain with acid rain, I will just briefly explain exactly what yellow rain is not. It is not what some call the pollution caused by the burning of coal and the subsequent particles that go into the atmosphere.

Rather, it is chemical toxin agents that are spread by helicopters, planes, artillery shells or mortar rounds on unsuspecting, innocent and defenseless men, women, and children.

These agents may cause an agonizing death or a painful illness. Repeated attacks force people to flee their homeland and sometimes cause long lasting contamination to the vegetation and the water. Their use spreads terror, death, and illness. And, there is little or no defense for the innocents against these dreadful weapons of war.

The use of these weapons were first reported back in 1976 by the H'Mong,

a tribal people from the highlands of Laos. Since then, evidence has continually mounted that chemical and toxin weapons have been used by the Soviet Union and its allies in Afghanistan, Kampuchea, and Laos.

Our intelligence is that during February and March, these attacks took place almost daily inside Kampuchea.

Yet as the editorial points out, there are still some who doubt that chemical and toxin weapons are being used in Afghanistan and Southeast Asia.

These doubters remind me of the ostriches who stick their heads in the sand and miss all that passes them by. In the ensuing years since the reports of chemical attacks first surfaced in Laos, the evidence that has been amassed is staggering. Yet those that refute it still want to see the "smoking gun."

These people refuse to accept evidence that comes from credible sources that include: the testimony of civilian victims who have suffered from these attacks or witnessed them; testimony of doctors, refugee workers, journalists, and others who have questioned and or examined survivors of these attacks; analysis of physical and biological samples; and documentary evidence from open sources and intelligence from "National Technical Means."

Quite frankly, I think the only way these doubters would be satisfied would be if they themselves were victims of an attack. Even then they probably would say that the one attack is not sufficient proof.

Mr. President, I have talked with our intelligence people, I have read the reports and I recently spoke with a reporter who returned from the Thai-Kampuchean border this last month.

I am convinced beyond a doubt that chemical and toxin weapons are being used in blatant violation of two international treaties: the Geneva Protocol of 1925 and the Biological and Toxin Weapons Convention of 1972; customary international law and basic human rights.

I ask that the editorial be printed in the RECORD and that my colleagues take the time to read it.

The editorial follows:

THE INTRACTABLE DOUBTERS

Out in Southeast Asia, people are still being killed by "yellow rain." Chemical attacks took place almost daily in Cambodia during February and March, and U.S. officials report they were able to collect a "tremendous number" of samples, along with blood and urine tests from victims. The State Department will shortly issue another report confirming the presence of trichothecene mycotoxins in other samples collected last October and November.

Here in the U.S., though, the remaining doubters have recently reentered the public arena. They had been silent since last November, when Secretary of State Shultz's report on chemical and biological warfare, including a Soviet gas mask collected in Afghanistan and contaminated with trichothecenes, drew assent from editorialists from a range of publications, including the Washington Post, the Christian Science Monitor and the St. Louis Post Dispatch. By now, agreement that the Soviets are using toxin weapons in violation of the 1972 Biological Weapons Convention and the 1925 Geneva Protocol stretches over most of the ideological spectrum.

Two of the Congressmen most vociferous about "yellow rain," for example, are Jim Leach of Iowa and Stephen Solarz of New York, neither of them usually thought of as Cold Warriors. Then there is the recent report by the Carnegie Endowment for International Peace, saying that "The evidence of Soviet violations is persuasive, if not absolutely conclusive," and made more persuasive by Soviet unwillingness to deal with the issue except through "angry denials." While the Carnegie group said this does not mean any agreement is unverifiable, it said the biological weapons issue is "a political time bomb under all future arms control agreements." Members of the panel issuing this statement ranged from the likes of Gens. Brent Scowcroft and Andrew Goodpaster on leftward to Richard L. Garwin, Stanley Hoffmann, Jan Lodal, Walter Slocombe, Strobe Talbott and Richard H. Ullman.

With names like these among the believers, who are the doubters? The chief doubter is Matthew Meselson of Harvard, one of the authors of the treaty the attacks shatter. He recently startled a group of scientists meeting on the issue by declaring he entered an "agnostic" and left an "atheist." Nicholas Wade, currently of the New York Times and late of Science magazine (which turned around on the issue when he left), echoed some of Mr. Meselson's remarks in a byline article. And Peter Pringle, a Washington correspondent for the London Observer, raised doubts and new theories in both his newspaper and the Washington Post.

The intractable doubters have fastened single-minded attention on one word in an Australian study of some possible "yellow rain" samples. The Australian laboratory concluded the samples it analyzed were "fake." Somehow in the logic of the doubters this means that all samples are fakes, and presumably brings the corpses back to life.

It is, then, worth reading the rest of the Australian report by H. D. Crone, a chemist with Australia's department of defense support. Lab tests of leaves and pebbles passed along to Australian officials in northern Laos in early 1982, purportedly as samples from a yellow rain attack, showed no presence of trichothecene mycotoxins or any other chemical warfare agent. The report concluded the samples were not toxic and in fact were "composed of yellow pollen grains, probably with a small amount of binder."

The one thing clear, the Australian scientists continued, was that the sample was not a natural phenomenon. No natural substance would have caused the pollen grains to stick so stubbornly to the leaves and pebbles. "The conclusion is therefore that the yellow spots were deliberately applied, either by brush or by a spraying process."

While the Australians found these samples "obvious fakes," they warned twice in their report that their analysis "sheds no light at all on the main question as to whether mycotoxins have been used as warfare agents in Laos or Kampuchea." The Australian report added, "The reasons for their fabrication can only be guessed at: monetary gain, desire to ingratiate oneself with authority, or as a disinformation campaign."

In deciding among the alternatives listed by the Australian scientists, it is useful to consider another report from a Canadian epidemiological investigating team, led by Lt. Col. G. R. Humphreys of the Canadian defense department. The main conclusion of the report is blunt, that chemical/biological warfare "agents are being used in SE Asia." But along the way, the Canadian investigators reported a very curious attack on Feb. 19, 1982, by a single-engine aircraft dropping a yellow substance on the Thai village of Ban Sa Tong, about 10 kilometers from the border with Cambodia. Six houses in the village were "literally covered with a yellow powder which stuck to roofs, walls, foliage and ground." No one died, and Thai authorities thought the attack might be a "ruse" by the Communists, possibly dispensing only pollen or crushed flowers to look like yellow rain.

However, the Canadian team found at least 21 villagers who became ill after the attack with respiratory and gastro-intestinal symptoms the Canadians said resembled a "mild manifestation" of those the H'Mong described as resulting from chemical/biological attacks. They added that the only apparent cause was the yellow substance dropped on the village by the aircraft. This incident has led some U.S. government experts to speculate about the use of pollen as a carrying mechanism; one such hunch is that when the Vietnamese decided to spook the Thais with pollen, they neglected to clean the tanks of their previous contents.

If the Canadian and Australian studies prove anything, it's that Western scientists aren't so easily fooled, and by now of course there is a body of refugee testimony and lab findings far beyond refutation by one mistaken report. We ourselves have steered clear of some of the reports coming out of Asia, for it is of course possible some evidence may be concocted to curry favor or get money from Western sources. Perhaps this is what happened in the Australian case, but more likely both it and the Canadian report depict Communist disinformation efforts, serving to sow just enough confusion to keep a few pockets of doubt alive back in America.●

EDUCATION FOR THE NATION'S FUTURE

● Mr. LAUTENBERG Mr. President, the recent report by the National Commission on Excellence in Education likened the situation in American education today to unthinking, unilateral education disarmament. If such an indictment had been leveled at the Defense Establishment in this country, the cries of dismay from the White House and the Congress would have been loud and instantaneous. No doubt calls would have poured forth for immediate and large expenditures for new crash programs and for speeding up existing ones.

The reaction to the harsh assessment of the Education Commission has been more temperate. Nevertheless, Mr. President, I, for one, must express my deep chagrin over the state into which our educational system has

fallen. As the Commission report rightly notes, citizens must hold educators and elected officials responsible for providing the leadership to make the changes necessary to correct the course of education in this country.

Providing more money for education is by no means the only answer to the difficulties in education today. However, Congress can accomplish several purposes by approving increased education expenditures: It can give encouragement and moral support to educators who are doing their best under difficult circumstances in the Nation's classrooms, it can provide increased resources for existing programs, and it can help initiate new programs. The Senate has signaled its support for the improvement of education: It has approved an amendment to the budget resolution for 1984 for $1 billion for elementary, secondary, and higher education. I was pleased to join as a cosponsor of that amendment.

Much of the money allocated for education in the budget resolution is intended for current programs. But, a portion of it is intended for a new mathematics and science education improvement program. The House of Representatives has already passed a math-science bill and the Senate Labor and Human Resources Committee is working on a similar measure. These bills deal with the vital and immediate need for teacher training.

The teacher shortage in the fields of math and science is easy to document. In my own State of New Jersey, every county reports a shortage in both fields. State certifications of math and science teachers dropped by over 60 percent in the last 10 years. Substandard certificates, which are issued to teachers either lacking academic work in their teaching field, or lacking teaching methods courses, rose alarmingly from 3 percent in 1973 to 25 percent last year. By contrast, in fields like English, in which three is an abundance of teaching candidates, substandard certificates are not granted. At the same time that the supply of fully qualified new math and science teachers is dropping, the number of teachers leaving the profession is increasing. In my State in 1980, over 20 percent of the math and science teachers leaving their jobs moved to nonteaching occupations, while only about 13 percent of the teachers in other fields moved out of teaching. Statistics like these multiplied many times over across the country spell trouble for the very fields in which our need for quality instruction, as preparation for complex and technical occupations, is growing. The current alarm over this situation is fully warranted.

Mr. President, once a beginning is made to increase teacher training, I believe that a Federal initiative will be needed to help improve instructional programs in mathematics and science. Such a long range effort is offered by the American Defense Education Act. To achieve this goal, the bill authorizes a program for the improvement of instruction and student achievement in mathematics and science, as well as communication skills, foreign languages, technology and guidance and counselling programs. Provisions are made for public participation and for evaluation of progress made in meeting locally established goals. Other sections of the bill authorize teacher training programs at institutions of higher education and research programs for the improvement of instruction. This comprehensive package is necessary to help local school districts provide better programs in fields in which achievement is currently falling short of what this country needs and expects. I am cosponsoring the American Defense Education Act to lend support for these goals.

The present unhappy state of American education has not developed overnight, nor will it be improved immediately. But there must be a starting point on the road to recovery. Such efforts as increased funding in the 1984 budget for education and the math and science education improvement bills are steps in the right direction. While the amounts of money involved are not trivial, they are minimal compared to the cost of proposed defense increases.

We must not fail our children by refusing to heed the harsh message of "the Nation at Risk" report. We owe them the bright promise of a good education. We owe their teachers our strong support. And we owe the Nation an adequate investment in our educational system if we hope to prosper and maintain U.S. leadership in the world economy.●

BRAZIL AND THE IMF

● Mr. HUMPHREY. Mr. President, yesterday, I inserted in the RECORD a copy of a New York Times article reporting that Chile would be forced to seek new concessions from private bankers and the International Monetary Fund in order to bear its tremendous debt burden. In today's edition of the Washington Post, it is reported that the Government of Brazil faces exactly the same predicament.

The terms of an IMF aid program established just 2 months ago have already proven too difficult to meet. As the article indicates, private bankers have expressed fears about having to expose their assets further in Brazil. In the absence of any other alternatives, Brazil will ask the IMF membership to carry it over this latest liquidity squeeze. Unfortunately, Mr. President, IMF acquiescence to this request will only serve to disguise more deeply the underlying question of the capacity of the Brazilians to fully service their debt at its current level, and of the responsibility that private bankers must bear for having loaned such vast sums in the first place.

I ask that the article appear in the RECORD.

The article follows:

[From the Washington Post, May 10, 1983]

BRAZIL SEEKS EASING OF IMF TERMS

(By Caroline Atkinson)

Brazil's central bank governor, Carlos Langoni, will come to Washington next week to ask the International Monetary Fund for more time to meet some of the economic conditions laid down in the IMF aid program arranged just over two months ago, sources said yesterday.

Brazil is still suffering an acute cash crisis, as commercial banks have failed to come up with all the money that they promised as part of a financial rescue package orchestrated by the IMF. The nation—which has more then $80 billion of foreign debts—has already fallen behind on about $800 million of payments and is likely to build up even larger arrears in coming weeks, sources said.

Its major creditors met in New York yesterday in an attempt to come up with a more "leak-proof" system of providing cash to Brazil, another source said. The nation's liquidity problem has arisen because smaller banks in the United States and elsewhere have failed to lend all the money that was originally promised in the two categories of trade credits and loans to overseas branches of Brazilian banks.

Also, some experts believe that Brazil did not originally ask for enough money to make it comfortably through this year. Some bankers believe Brazil will be forced to ask for a new medium-term loan to cover a financing gap this year of between $2 billion to $4 billion. Brazilian officials have denied this, however.

Bankers are extremely nervous about lending more to the troubled nation, and are worried at the still precarious position of many other Latin American borrowers, including Chile and Venezuela.

Langoni is expected to ask the IMF to allow Brazil to exceed the tight ceilings on public spending and borrowing for the early part of this year, while leaving the annual totals unchanged, a foreign observer in Brazil said. The government has failed to cut the borrowings of Brazil's large state enterprises in line with the original IMF targets, sources say. This has pushed public sector borrowing above the path agreed upon with the fund.

Brazil is due to make the next drawing on its IMF loan at the end of this month. Since it is unlikely to be back in compliance with the IMF targets by then, sources said, it would need special dispensation to get the much-needed money.

Formal approval from the IMF board would be needed for any such modification of the terms of the credit, an international financier said. The key to this approval is likely to be whether the nation can show that it is moving toward compliance and making some progress in cutting the deficit and boosting its trade position.

Brazil has so far been more successful than was widely expected in meeting its targets for trade. It is aiming for a $6 billion trade surplus this year and, after dismal

performance in January and February, did much better in March and April.

However, the improvement has not yet translated into increased confidence among bankers, and some bankers are skeptical that it will.●

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate recesses this evening it recess until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM FOR WEDNESDAY

ORDER FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that, following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business tomorrow not to extend past the hour of 10:30 a.m. with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BUDGET RESOLUTION

Mr. STEVENS. Mr. President, it would be my understanding that following that routine morning business the Senate would resume the consideration of the budget resolution; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. Mr. President, let me announce that we do expect a late session tomorrow evening with votes extending well beyond the dinner hour. The leadership hopes to reach final disposition of the budget resolution tomorrow. Pursuant to a unanimous-consent agreement, the immigration bill, S. 529, will follow the final disposition of the budget resolution.

RECESS UNTIL 10 A.M. TOMORROW

Mr. STEVENS. Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 6:35 p.m. the Senate recessed until Wednesday, May 11, 1983, at 10 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 10, 1983:

IN THE ARMY

The following-named officer, under the provisions of title 10, United States Code, section 3034, to be Chief of Staff, U.S. Army:

To be Chief of Staff, U.S. Army

Gen. John A. Wickham, Jr. [redacted], U.S. Army.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Kenneth L. Peek, Jr., [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601.

To be lieutenant general

Lt. Gen. Winfield W. Scott, Jr., [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John L. Pickitt, [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert E. Kelley, [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Robert W. Bazley, [redacted]FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Carl H. Cathey, Jr., [redacted]FR, U.S. Air Force.

The following-named officer for appointment to the grade of lieutenant general on the retired list pursuant to the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Hans H. Driessnack, [redacted]FR, U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Harry A. Griffith [redacted], (age 58), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Arthur E. Brown, Jr., [redacted], U.S. Army.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Robert J. Lunn [redacted], (age 55), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Robert L. Moore, [redacted], U.S. Army.

The following officers for appointment as Reserve commissioned officers in the Adjutant Generals Corps, Army National Guard of the United States, Reserve of the Army, under the provisions of title 10, United States Code, sections 593(a) and 3392:

To be major general

Brig. Gen. Donald E. Edwards, [redacted] Army National Guard of the United States.

To be brigadier general

Col. Raymond R. Galloway, [redacted], Army National Guard of the United States.

Col. William A. Hornsby, [redacted], Army National Guard of the United States.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. John R. Galvin [redacted], U.S. Army.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be vice admiral

Vice Adm. Lando W. Zech, Jr., [redacted]/1110, U.S. Navy.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. William P. Lawrence, [redacted]/1310, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 5141, for appointment as chief of naval personnel for a term of 4 years:

To be chief of naval personnel

Vice Adm. William P. Lawrence, [redacted]/1310, U.S. Navy.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. Robert R. Monroe, [redacted]/1110, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. William J. Cowhill, [redacted]/1129, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code,

section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Rear Adm. Carol C. Smith, Jr., xxx-xx-xx... xxx-.../1310, U.S. Navy.

IN THE MARINE CORPS

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. D'Wayne Gray xxx-xx-xxxx, U.S. Marine Corps.

IN THE AIR FORCE

Air Force nominations beginning William P. Abraham, and ending Jane B. Ward, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

Air Force nominations beginning Ray S. Adkins, and ending John B. Wissler, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

IN THE MARINE CORPS

Marine Corps nominations beginning Richard M. Ahlers, and ending Kenneth W. Zitz, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 18, 1983.

IN THE NAVY

Navy nominations beginning Brandon O. Clarke, and ending Mark C. Wilson, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 15, 1983.

Navy nominations beginning James William Arvin, and ending William John Zuchero, Jr., which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 18, 1983.

Navy nominations beginning Thomas N. Cheamitru, and ending Joseph J. Tepas, III, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 26, 1983.

EXTENSIONS OF REMARKS

GREAT LAKES POLICY ISSUES

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. EDGAR. Mr. Speaker, I wish to share with my colleagues a report prepared by Margaret Downs of the Northeast Midwest Institute on Great Lakes Policy Issues. It is hoped that this will help to shape our concern during the 98th Congress for the Great Lakes Region.

GREAT LAKES POLICY ISSUES

Water resources will play a dominant role in defining the characteristics and growth of the Great Lakes region to the year 2000. Extensive discussion and planning among the region's policy makers are essential if the full promise of this resource's economic opportunity is to be realized. The April 27 meeting of members of the House and Senate and board members of the Center for the Great Lakes will help set priorities and strategies for the careful use of an incomparable natural asset.

The Great Lakes hold one-fifth of the world's surface fresh water supply. Lake Superior is the world's largest fresh water lake, Lake Huron is the fifth largest, Lake Michigan the sixth, Lake Erie the 12th, and Lake Ontario the 14th. Yet some federal officials refuse to recognize the Great Lakes as a special resource at all, and federal budget decisions often have reflected that attitude.

This memorandum addresses Great Lakes policy issues and potential federal action in three different areas: water transportation, water quality, and lake levels. All three are integrally related to the future vitality of the Great Lakes region.

I. WATER TRANSPORTATION

Shipping activity in the Great Lakes continues to be depressed. Though much of the downturn can be traced to the recession, the figures remain startling—a 23.7 percent decrease between 1979 and 1981 in grain shipments, a decline of 18.0 percent in iron ore traffic, and a 12.7 percent decline in coal movements. For the first four months of 1982, total iron ore, grain, and coal traffic was down 57.3 percent compared to the same period in 1980.

Although the opening of the St. Lawrence Seaway in 1959 held great promise for Great Lakes ports and shippers, the actual record of shipments during the past two decades has been mixed. Bulk cargos passing through the Montreal-Lake Ontario section of the Seaway tripled between 1959 and 1980. In 1977, the Seaway set a record 57.4 million tons of cargo. Shipments then declined over a three-year period, reaching a low point of 49.5 million metric tons in 1980, followed by a 1.1 million metric ton upturn in 1981.

A major victory in enhancing the system was gained in December as Congress, at the urging of the Great Lakes governors, "forgave" the existing $110 million Seaway capital construction debt owed to the federal government. Since debt retirement has been a major element in Seaway tolls, this action will help the Seaway Development Corporation hold the line on shipping costs.

Containerized cargo ships now dominate the international shipping industry. Yet because of the size of these vessels, many of the Seaway's locks and canals, such as the Welland Canal, are not capable of handling them. To improve the entire system's capacity and reliability, the Corps of Engineers is conducting a preliminary feasibility study of the Great Lakes Connecting Channels and Harbors. This report is studying lock improvements, examining the need for a second modern lock at the Soo to handle larger bulk cargo vessels, and recommending optimum dimensions for future lake vessels. Besides this report, the Corps is exploring the need for additional locks on the St. Lawrence Seaway and alternative means of moving cargo to and from the Great Lakes region.

Soo Locks—Connecting channels and harbors

The Corps of Engineers has studied the connecting channels and harbors in the Great Lakes for more than ten years. The study is now in the final stages with the Corps evaluating several recommendations. One recommendation would involve duplicating the Poe Lock at Sault Ste. Marie. The Poe is the only Soo lock capable of handling 1,000 foot carriers that transport ore and fossil fuels from Lake Superior to the lower lakes. Duplication of the Poe would increase the efficiency of the Soo system, and would provide a contingency in the event of mechanical failure or sabotage of the Poe. This year, vessel traffic waited nine hours while a valve failure prevented the Poe from opening at the beginning of the navigation season.

The Great Lakes Governors endorsed duplication of the Poe Lock at a summit on Mackinac Island in June of 1982. According to the current study schedule, a final transmittal from the Corps to Congress is not likely to take place until 1988 or 1989. The Great Lakes Task Force and the Great Lakes Commission have urged an expedited study process. The Commission has suggested including a provision directing the Corps to expedite its evaluation of the Soo Locks in the omnibus water resources bill scheduled for House Public Works Committee's consideration.

St. Lawrence Seaway improvements

Although the opening of the Seaway in 1959 began a new phase in U.S. water commerce, the system already was out of date at the time of completion. Even then, its locks system was too small to allow for the most efficient use of the Seaway. The Seaway can accept vessels no larger than 726 feet, with drafts of no more than 26 feet, precluding use by most modern ships. These circumstances, unfortunate in 1959, present far greater difficulties in the 1980s.

The Corps of Engineers has spent several years studying possible improvements to the St. Lawrence Seaway lock system. Similar action has been undertaken by Canada. The Corps has made two preliminary recommendations:

Construction of a locks system parallel to present U.S. locks and capable of providing simultaneous two-way access. This option contemplates no increase in lock capacity.

Construction of a new locks system capable of accommodating 1,000 foot vessels. This proposal would retain existing locks and greatly increase the potential of shipping on the Seaway.

The Corps anticipates completion of the study by 1986, assuming congressional support of $956,000. Representative Carl Pursell (R-Michigan) is preparing a modernization strategy for the Seaway with assistance from the St. Lawrence Seaway Development Corporation and the Corps of Engineers. The first component of this strategy includes accelerated completion of the Corps' study and a fiscal 1984 appropriation of $200,000.

User fees—Seaway toll reduction/elimination

The St. Lawrence Seaway is the only federal navigation project ever to charge a user fee. To reach the political compromise necessary to insure Seaway construction, a user fee system was established to recover the costs of construction (principal and interest) and the cost of operating and maintaining the system. It is important to note that, since the Seaway was built, navigation projects that benefit other port regions have been, and continue to be, constructed without a user fee requirement.

In the last seven years, Congress has not approved any significant new navigation projects. The administration wants to recover part of the cost of any new construction and operation and maintenance through a user fee system. Many ports view the institution of user charges as the only realistic prospect for funding new navigation projects. Most of the proposed projects involve channel deepening to allow for the use of larger, deeper-draft ships at coal and grain ports.

Although the 97th Congress did not approve port user fee legislation, the administration and several members of the Senate and House have launched another effort this year to institute a cost recovery system. Navigation interests in the Great Lakes presently are divided in their approach to user fee proposals. A majority of the Lakes' port directors have taken the position that the institution of a national, uniform user charge could improve their competitive posture, if it would also eliminate the cost of tolls on the U.S. portion of the St. Lawrence Seaway and set up a forum for negotiating elimination of the Canadian tolls as well. The International Association of Great Lakes Ports views Seaway tolls as a major obstacle to efforts to increase the amount of cargo moving into the Lakes. The Port of Cleveland and some representatives of the steel industry in the Lakes take an opposing view. Steel interests object to measures that would have the effect of reducing charges currently applied to steel imports. (It should be noted that a value-based user fee

would be significantly lower than current U.S. Seaway tolls on a ton of imported steel.) The Great Lakes Commission has contracted with Data Resources, Inc. for an analysis of the economic impact of Corps user fees on the Great Lakes. This analysis should be available by June 1, 1983.

The two major categories of user fee legislation now pending in Congress—Senator Mark Hatfield's (R-Oregon) (S. 865) and Representative Robert T. Matsui's (D-California) proposals and Senator Daniel P. Moynihan's (D-New York) proposal (S. 970)—both contain a national, uniform fee structure. The Hatfield bill would recover up to 40 percent of operation and maintenance costs. The charges would be phased in over a three-year period through a fee schedule based on the value of the cargo handled. Senator Moynihan's bill would recover 50 percent of operation and maintenance costs through fees based on the volume of cargo tonnage. Finally, the Hatfield bill would eliminate 100 percent of the cost of U.S. Seaway tolls, while the Moynihan bill would eliminate 50 percent of that portion.

Cargo preference

Only one U.S. flag operator currently provides direct line service between the Great Lakes and Western Europe, the area identified by the Maritime Administration as offering the greatest potential for increased Midwest cargo exports. The lack of U.S. flag vessels on the Great Lakes has had a negative impact on the Midwest's ability to capture government controlled cargo. The "cargo preference" language in P.L. 480 requires at least 50 percent of military and U.S. Department of Agriculture cargo, such as Food for Peace shipments, to be transported by subsidized American carriers. The absence of U.S. vessels in the Midwest has resulted in the shipment of this cargo via the tidewater ports. Unless this policy is revised, a good portion of the agricultural cargo produced in the Midwest will exit the country through coastal ports. Federal agencies have the authority to waive U.S.-flag carriage requirements in many cases, but Great Lakes shipping and port interests argue that federal agencies often have not exercised this option.

Several alternatives have been proposed in connection with the treatment of federal preference cargo. In May 1982, Senator Alan Dixon (D-Illinois) introduced S. 2511, a bill to require all federal agencies to adopt the "lowest landed cost" standard now used by the Department of Agriculture (USDA) in determining cargo allocation. The "lowest landed cost" method of determining the most efficient shipping route for federal cargo has resulted in a more equitable share of USDA PL 480-Title II cargo for Great Lakes ports. This year, Senator Dixon is considering the option of adding to the "lowest landed cost" provision a requirement that all federal agencies without transportation bidding systems institute a competitive bidding system similar to the one used by the Military Sealift Command. In addition, Senator Dixon may add a section authorizing cargo preference treatment for U.S. flag vessels not currently eligible for such treatment, provided that those vessels are brought into full conformity with U.S. maritime standards. Other alternatives include allocating a specified share of preference cargo shipments to the Great Lakes system, or exempting the Lakes from cargo preference requirements. In March 1983, Senator Rudy Boschwitz (R-Minnesota) offered an amendment to the Agricultural Export Act that would exempt from cargo preference requirements the new "payment-in-kind" and "blended credit" export subsidies offered by USDA. The Senate Agriculture Committee has adopted this amendment.

Winter navigation

Navigation on the Great Lakes and St Lawrence Seaway historically has been suspended during the winter months, usually from mid-December to early April, primarily because of icing conditions. Proposals to extend the navigation season in the Great Lakes have created considerable controversy. Among the problems raised by this project are potential environmental damage, potential conflict between power and navigation interests, and legal and diplomatic complications with Canada.

In 1979, the Army Corps of Engineers completed a field study and demonstration project that concluded that positive net economic benefits would result from season extension. The report is under review by the Chief of Engineers. In essence, the Corps recommends adoption of a 12-month navigation season on the upper four Great Lakes, and a 10-month season on the Welland Canal, Lake Ontario, and the St. Lawrence Seaway. This position is strongly supported by the Great Lakes Task Force, which represents shipping interests. It is opposed by several environmental and conservation groups in the region.

With the submission of a final report on the demonstration program from the Winter Navigation Board to Congress and to governors of the Great Lakes states in December 1979, and upon completion of the Washington level review of the survey report, any implementation of the season extension program would depend upon additional congressional authorizations. Several states and the Great Lakes Commission have suggested that to avoid significant delays in extending the season, when and if the need arises or agreement is reached, appropriate environment studies should be initiated now.

Coast Guard user fees

The Coast Guard has developed a schedule of user fees to recover the costs of operations and programs attributable to commercial vessels. The proposed schedule calls for a Great Lakes icebreaking surcharge applicable to commercial vessel operations during the period January 16 through March 31. Under this proposal, a 1,000-ton lake vessel would be charged over $24,000 for a one-day assist by the Great Lakes icebreaker Mackinaw, a cost to the vessel of about 50 cents per ton per day. Vessels with lesser capacities would incur substantially higher charges on a per-ton basis. These fees might discourage any winter shipping activities on the Great Lakes. Congress has not moved to authorize the administration's Coast Guard user fee proposals.

Water resource development projects

The Great Lakes Commission has conducted a review of Corps of Engineers activity in the Great Lakes region. The Commission found that the distribution of Corps projects in the Great Lakes area is heavily skewed toward operations and maintenance. Nationally, general investigations make up 4.9 percent of the proposed fiscal 1984 budget, construction accounts for 44 percent, and operations and maintenance represents 51.1 percent. In the Great Lakes states, general investigations equal 5.4 percent, construction takes up 5.5 percent, and operations and maintenance consumes 89.1 percent of the total budget. Attached is a listing of water resource development projects that were named as priority projects by the Great Lakes states, as well as a breakdown of fiscal 1983 and fiscal 1984 spending categories for the Corps.

Corps dredging fleet

The Great Lakes Commission has raised concern that the Army Corps of Engineers' program of decommissioning dredges may impact Great Lakes operations and maintenance activities. According to the Commission, the Corps dredges *Markum* and *Heinz* are scheduled for decommissioning. These two vessels are self-propelled suction dredges. Great Lakes port interests have indicated that they support the concept of transferring Corps dredging activities to private operators, but caution that private operators must exist to fill the need. The Commission urges that any decommissioning activity, especially of unique equipment, should be conditioned by the proven availability of private operators willing to perform the functions previously performed by the Corps of Engineers. The Commission's executive director, James Fish, has suggested that if the Corps maintains the decommissioned dredges as part of the reserve fleet, it should continue to base the vessels in the Great Lakes.

II. WATER QUALITY

The quality of water in the Great Lakes has improved markedly over the last decade. Water quality improvements help safeguard the health of people who use the Lakes as a drinking water source, increase the enjoyment of those who pursue recreational opportunities on the Lakes, and enhance the attractiveness of the region as a place to live and visit. Clean water also offers important economic opportunities for the Great Lakes states. For example, the direct and indirect value of tourism trade in Michigan alone reached $9 billion in 1980; approximately 60 percent of all vacation trips to the state involve water-related activities.

The United States has treaty obligations with Canada relating to the quality of Great Lakes water. To fulfill these obligations, to protect public health, and to realize the economic potential, water quality-related activities in the Great Lakes region need to become a higher priority with the Environmental Protection Agency, the State Department, and other responsible federal agencies. In addition to providing adequate funds for ongoing efforts to control major point sources of pollution, water quality officials need to develop better strategies for cleaning up toxic waste contamination and controlling nonpoint pollution sources.

Clean Water Act

Some of the issues raised above are likely to be addressed this year in amendments to the Clean Water Act. The House Public Works and Transportation Committee and the Senate Environment and Public Works Committee are expected to consider changes to industrial pretreatment standards and extend the deadline by which pollution dischargers must comply with EPA's "best available technology" standards. Senator John Chafee's (R-Rhode Island) Subcommittee on Environmental Pollution currently is exploring ways to place controls on nonpoint pollution sources and put tighter discharge restrictions on toxic "hot spots." In addition, both committees will address new EPA regulations concerning water quality standards.

Implementation of water quality agreement with Canada

The General Accounting Office (GAO) has found that the U.S. is having difficulty meeting the terms of the 1978 water quality agreement with Canada, and recommends that Congress consult with the Secretary of State and the Administrator of EPA to determine whether sufficient funding is available to meet the agreement, or whether the agreement objectives are overly ambitious. A June 1982 GAO report stated that 32 percent of municipal discharges on Lake Ontario and 31 percent of those on Lake Erie would not comply with the agreement goal of December 31, 1982. GAO also has recommended that the Administrator of EPA direct the Great Lakes National Program Office (GLNPO) to develop a comprehensive plan and strategy to address the problems of phosphorus, nonpoint, and toxic pollution. According to GAO, the agency must give GLNPO greater authority and visibility so that it can serve as a center for coordinating Great Lakes activities. (GLNPO currently is located within EPA's Region V office in Chicago and its director reports to the Region V administrator). GAO also stated that EPA needs to better administer its fish monitoring program and determine the effectiveness of present programs for controlling known toxicants.

A resolution adopted by the Great Lakes governors and Canadian premiers at the Mackinac conference called for the establishment of a formal arrangement between the U.S. government and the states to meet the terms of the International Water Quality Agreement. EPA has taken some preliminary action through a special task force to improve program and funding coordination for Great Lakes water quality activities. Nevertheless, the president's fiscal 1984 budget recommends a $1.1 million cut in the GLNPO fiscal 1983 funding level of $3.7 million. This recommended 30 percent reduction in funds contrasts with the president's overall request for EPA operations, which includes a 9 percent reduction.

Environmental research

There are a number of federally-funded environmental research programs located in the Great Lakes region. In the 97th Congress, the House passed legislation sponsored by former Representative James Blanchard to establish a Great Lakes Research Office within the National Oceanic and Atmospheric Administration (NOAA). The Great Lakes Office would have coordinated various ongoing research efforts relating to the Lakes. Although the Senate never took final action on this proposal, Congress did approve a $750,000 set-aside for the Great Lakes Office in the fiscal year 1983 continuing appropriations for NOAA. However, there is no indication that NOAA plans to use these funds to set up a Great Lakes Research Office in fiscal 1983.

The Great Lakes Environmental Research Laboratory (GLERL), a unit of NOAA located in Ann Arbor, Michigan, conducts basic scientific research and monitors pollution threats to the entire Great Lakes Basin. Research has focused on water levels, particle dynamics, the transport of organic contaminants, nutrient cycling, ice flow predictions, and trends in Great Lakes biota. GLERL scientists have developed an improved method of predicting storm surges and shoreline flooding. GLERL also carries out transboundary pollution monitoring activities that are required by the International Water Quality Treaty. The Great Lakes Governors and GAO have urged an adequate funding level for the laboratory. The administration has recommended termination of the laboratory's activities.

EPA's Large Lakes Research Station, located in Grosse Ile, Michigan, specializes in Great Lakes pollution problems. This facility is the only large lakes research center outside the Soviet Union. The station has conducted research in a variety of areas, including monitoring air and water pollutants, developing predictive models, and assessing the effectiveness of nutrient reduction programs. Gross Ile scientists now are studying the effects of toxic substances on the Great Lakes ecosystem. Governor James Blanchard of Michigan has proposed that a portion of Gross Ile's budget be earmarked for a study of dioxin contamination in the Great Lakes Basin. A broader review of dioxin contamination is now in the planning stages at EPA. (The administration has requested no fiscal 1984 funding for the Large Lakes Research Station).

The National Sea Grant College Program funds a network of college or university affiliated centers. Sea Grant researchers conduct studies that have practical applications in a number of areas, including fisheries, toxic substances, public education, recreation, and water safety. There are active Sea Grant programs in the states of Indiana, Illinois, Michigan, Minnesota, New York, Ohio, and Wisconsin. The administration seeks to terminate the National Sea Grant College Program.

Disposal of dredged material

Periodic dredging of river and harbor sediment currently is required to maintain navigation channels for commercial and recreation purposes. This dredged material may contain a number of contaminants that have been identified as harmful by the Environmental Protection Agency. A significant area of federal involvement in dredged materials disposal is the Corps of Engineers' Confined Diked Disposal Program on the Great Lakes, which was authorized in 1970. Prior to 1970, this dredged material was dumped in open water in the Great Lakes. Of the 40 sites that are proposed to serve 56 locations, 20 have been completed. Approximately $23 million in fiscal 1983 funds is available to the diked disposal program. Recently, a major project servicing the Detroit River was completed at Point Mouille. Another important project currently is under construction at Calumet Harbor in Chicago.

III. LAKE LEVELS AND COASTAL RESOURCES

Diversion of Great Lakes water

At the present time, there is no active proposal to divert Great Lakes water to the South or West. Such projects have been discussed, however, in connection with energy development in Western coal fields and substitutes for the declining Ogallala aquifer. Two Michigan economists have conducted a study of possible interbasin transfers from the Great Lakes, suggesting that such projects are not likely to be economically feasible in the near future. However, many officials believe that now is the time to develop policies governing interbasin transfers, before pressure builds for a Great Lakes diversion to water-poor areas.

At the Great Lakes Water Resources Conference on Mackinac Island in June 1982, the governors of the Great Lakes states and premiers of three Canadian provinces passed a resolution objecting to any new diversions of Great Lakes water. The resolution stated that "lowered lake levels and reduction of flows in connecting channels could result in serious losses in water supply, navigation, and recreation values." The governors and premiers also resolved that any future decision regarding Great Lakes diversion be made only with the concurrence of the Great Lakes states and provinces and the federal governments of Canada and the United States.

Two recent federal court decisions, *Sporhase v. Nebraska* in the Supreme Court and *El Paso v. Reynolds* in the New Mexico District Court, have raised questions in the minds of state officials about the degree of control they can exert over water supplies located within state boundaries. In *Sporhase* and *El Paso*, certain prohibitions on water exports were ruled illegal by the courts on the grounds that they interfered with interstate commerce. The *Sporhase* decision also raises uncertainty about the fate of interstate compacts that include provisions restricting diversion of water supplies.

Two legislative proposals—H.R. 1749 by Representative Berkley Bedell (D-Iowa) and H.R. 1207 by Representative Ralph Regula (R-Ohio)—relating to diversion have been introduced in the House; they are intended to clarify state and federal jurisdiction over water resources. Representative Bedell's legislation was prompted by the state of South Dakota's proposal to transfer Missouri River Basin water for use in a Wyoming coal slurry pipeline, among other proposals. H.R. 1749 stipulates that no state can sell part of a shared water resource for use outside its boundaries unless all of the affected states approve the sale. Representative Regula's bill specifically authorizes states to regulate the transfer of water.

Consumptive uses of Great Lakes water

The International Great Lakes Diversions and Consumptive Uses Study Board of the International Joint Commission has projected that consumptive use of Great Lakes water will increase from the 1975 rate of 4,900 cubic feet per second (cfs) to an amount that would range from approximately 16,000 cfs to 37,000 cfs by the year 2035. Such levels of consumptive use would reduce the net water supply of the Lakes, thereby lowering lake levels in the unregulated lakes of Michigan, Huron, and Erie anywhere from 0.4 feet to as much as 1.13 feet. Such a lowering of lake levels would cause substantial losses to navigation and power interests in the Lakes.

The Great Lakes governors and premiers resolved at the Mackinac Conference to request that the governments of the United States and Canada send a reference to the International Joint Commission directing the commission to monitor consumptive use of Great Lakes water and study possible control measures (along with their impacts) for managing such uses.

Coastal resources

A number of bills have been presented in both the House and Senate in the past few months proposing methods of providing funds for coastal development from the revenues to be generated by the Outer Continental Shelf leasing program. Great Lakes states are eligible for funds under each of the pending proposals.

Senator Ted Stevens (R-Alaska) has introduced S. 800, which would target 5 percent of the OCS leasing program's annual revenues, averaged over a three-year period, to an entitlement fund for states and localities. Senator Ernest F. Hollings (D-South Carolina) has sponsored S. 872, which earmarks some of the funds specifically for coastal management programs, and makes the state grants subject to the appropriations process.

A compromise recently has been worked out between these two bills, which subjects the bulk of the funds to the appropriations process but gives states extensive flexibility in the use of the funds for a variety of coastal projects. The Senate Commerce Committee approved this compromise and reported an amended version of S. 800 to the full Senate on April 21.

Under the compromise Senate proposal, the total amount available is expected to be approximately $350-$400 million. Of this amount, 0.5 percent would be available to any coastal state (including those on the Great Lakes), with an additional 1 percent for any state with an approved coastal zone management plan. The remainder of the money would be allocated to those states with approved plans on the basis of a formula that takes into account population, the amount of shoreline, the number of energy-related facilities located within the state, and the amount of offshore oil and gas produced in the state.

H.R. 5, the Ocean and Coastal Resources Management and Development Block Grant Act, introduced by Congressman Walter B. Jones (D-North Carolina), is similar to the Senate proposal with a few exceptions. It requires that no less than 25 percent of the money allocated be spent on coastal management programs. Furthermore, while the Senate proposal requires states to "pass through" 30 percent of the allocation to localities, the Jones bill requires a 35 percent pass-through. The House Merchant Marine Committee plans to "mark up" H.R. 5 on April 27.●

NUTRITION FOR SENIORS PROGRAM—OVER 2½ MILLION SERVED WITH CARE

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, the nutrition for seniors program (NFS), administered by the community services department of San Bernardino County, will exceed the 2½ million mark with respect to meals served to senior citizens this program year. Since February 1974, the nutrition for seniors program has been providing hot, nutritious meals to senior citizens through strategically located nutrition sites and a homebound meals program. Mr. Speaker, I would like to take this opportunity to commend the nutrition for seniors program for its excellent work.

I would like to congratulate the members of the Nutrition for Seniors Project Council for their dedicated service over the years. They are: Eugene Hickie, president; Mable Jones, past president; Bertha Ortiz, past president; Lynn Cogswell, Gladys Cunningham, Harry "Scotty" Marshall, Dee Rawson, Roy Hazen, Laura Thurmond, Mary Payan, Mildred Corbin, and Severo Valdez.

I would like to express my appreciation to the over 400 volunteers who make the program work on a daily basis, and I specifically commend: Dorothy Sherman, Lucile Williamson, Katherine Wagner, Evelyn Henry, Ralph Crowley, Roberta Miller, Tanya Monsanto; Rose Bertrand, Iola Wesley, Jeweline Newton, Wanda Bethel, Claude Lewis, and Enrique Vasquez. Of course, these are but a few of the many individuals who deserve recognition for the operation of this worthwhile program.

Finally, I would like to congratulate and thank the administrative and program staff for their work and dedication. They are: Rodolfo H. Castro, CSD executive director; Patricia Nickols, director of program operations; Elaine Moran, nutrition for seniors program manager; Mildred Gillette, Bertha Bridgeman, Martha Prater, Claire Herry, Lucille Beavers, Jeanette Donsbach, Lorraine Rayburn, Ana Callicott, Alta Armstrong, Howard Leibley, Elizabeth Roberts, Phyllis Cooper, Stella Delgado, Marylou Morales, Edyth Oliver, Debby Hall, Rosita Zuniga, Alan Champion, Dorothy Allen, Ofelia Lopez, Donna Labarre, Joyce Matlock, Maria Atilano, Hortense Eichinger, Mary Ortega, Betty Young, Erlinda Kates, John Cook, Louis Galindo, Carrie Isaac, and Bertha Leon.

I would also like to give a special acknowledgement to Vicente Rodriguez, who was the first manager of this outstanding program and who laid the administrative/programmatic framework for NFS's track record of successful performance.●

THE BEVERAGE CONTAINER REUSE AND RECYCLING ACT

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. JEFFORDS. Mr. Speaker, today I am introducing the Beverage Container Reuse and Recycling Act, legislation to require a refund value of not less than 5 cents on all containers for beverages under the pressure of carbonation. The text of the bill is reprinted below.

This year marks the 10th anniversary of the deposit law in Vermont, which was the second State—after Oregon—to enact such a law. During this time, the deposit law has become so popular that in response to a recent questionnaire returned by 10,000 Vermonters, 94 percent indicated their support. The deposit law has ceased to be an issue in Vermont as our citizens enjoy cleaner highways, less pressure on landfills and the development of a sound ethic of the reuse of resources.

Over the last 10 years, seven other States have joined Vermont and Oregon with deposit laws. This year, New York, Massachusetts, and Delaware will implement these laws.

Mr. Speaker, many opponents of deposit laws have made outrageous contentions about the refund system, claiming massive price increases, sanitary problems, job loss, no reductions in litter and other problems. While implementation has not always been smooth, we now have sufficient experience with deposit laws in urban and rural States to draw the unmistakable conclusion that a national deposit law would be popular and effective.

In addition to the States already mentioned, Maine, Iowa, Connecticut, and Michigan have implemented deposit laws. It seems clear that it is only a matter of time until the opponents of this law reverse their position, if only to have uniform standards nationwide. The first indication of such a shift is the recent announcement by Anheuser-Busch that its New Hampshire plant will be retooled to produce only refillable bottles.

I urge my colleagues to examine this bill and to consult with those who are familiar with the experience of States which have deposit laws. You will find without exception that these laws are more popular now than when they were first implemented.

The bill referred to follows:

H.R. 2960

To require a refund value for certain beverage containers, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Beverage Container Reuse and Recycling Act".

FINDINGS AND PURPOSES

SEC. 2. Congress finds and declares that—

(1) the failure to reuse and recycle empty beverage containers represents a significant and unnecessary waste of important national energy and material resources:

(2) the littering of empty beverage containers constitutes a public nuisance, safety hazard, and esthetic blight and imposes upon public and private agencies unnecessary costs for the collection and removal of such containers;

(3) empty beverage containers constitute a significant and rapidly growing proportion of municipal solid waste, disposal of which imposes a severe financial burden on local governments;

(4) the reuse and recycling of empty beverage containers would eliminate these unnecessary burdens on individuals, local governments, and the environment;

(5) a uniform national system for requiring a refund value on the sale of all beverage containers would result in a high level of reuse and recycling of such containers;

(6) a national system for requiring a refund value on the sale of all beverage containers would result in significant energy conservation and resource recovery;

(7) a national system for requiring a refund value on the sale of all beverage containers would be anti-inflationary and help create jobs in areas of commerce; and

(8) a national system for requiring a refund value on the sale of all beverage containers would be inexpensive to administer because of its self-enforcing nature.

DEFINITIONS

SEC. 3. For the purposes of this Act the term—

(1) "beverage" means beer or other malt beverage, mineral water, soda water, or a carbonated soft drink of any variety in liquid form and intended for human consumption;

(2) "beverage container" means a container designed to contain a beverage under pressure of carbonation;

(3) "refundable beverage container" means a beverage container which has clearly, prominently, and securely affixed to, or printed on, it (in accordance with section 4) a statement of the amount of the refund value of the container;

(4) "consumer" means a person who purchases a beverage in a beverage container for any use other than resale;

(5) "distributor" means a person who sells or offers for sale in commerce beverages in beverage containers for resale;

(6) "retailer" means a person who purchases from a distributor beverages in beverage containers for sale to a consumer or who sells of offers to sell in commerce beverages in beverage containers under pressure of carbonation to a consumer. The Administrator shall prescribe such regulations as may be necessary to establish what person is a retailer with respect to the sale of beverages in beverage containers under pressure of carbonation to consumers through beverage vending machines;

(7) "Administrator" means the Administrator of the Environmental Protection Agency;

(8) "commerce" means trade, traffic or transportation—

(A) between a place in a State and any place outside, thereof,

(B) within the District of Columbia or any territory of the United States, or

(C) which affects trade, traffic, commerce, or transportation described in subparagraph (A) or (B); and

(9) "State" means a State, the District of Columbia, the Commonwealth of Puerto Rico, or any territory or possession of the United States.

REQUIRED BEVERAGE CONTAINER LABELING

SEC. 4. No distributor or retailer may sell or offer for sale a beverage in a beverage container under pressure of carbonation unless there is clearly, prominently and securely affixed to, or printed on, it (in accordance with regulations prescribed by the Administrator) a statement of the amount of the refund value of the container, such amount being not less that 5 cents.

RETURN OF REFUND VALUE OF BEVERAGE CONTAINERS

SEC. 5. (a)(1) If a consumer tenders for refund an empty and unbroken refundable beverage container to a retailer or distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the retailer or distributor respectively shall promptly pay the consumer the amount of the refund value stated on the container.

(2) If a retailer tenders for refund an empty and unbroken refundable beverage container to a distributor who sells (or has sold at any time during the period of three months ending on the date of such tender) a brand of beverage which was contained in the container, the distributor shall promptly pay the retailer (A) the amount of the refund value stated on the container, plus (B) an amount equal to 2 cents per container to help defray the retailer's cost for handling. The payment may amount specified in clause (B) be adjusted by the Administrator, following evaluation and public comment, to reflect the true cost of handling beverage containers. This paragraph shall not preclude a retailer from tendering refundable beverage containers to persons other than distributors.

(b) The opening of a refundable beverage container in a manner in which it was designed to be opened and the compression of a metal refundable beverage container shall not, for the purposes of this section, constitute the breaking of the container if the statement of the amount of the refund value of the container is still readable.

RESTRICTION ON METAL BEVERAGE CONTAINERS WITH DETACHABLE OPENINGS

SEC. 6. No distributor or retailer may sell or offer for sale a beverage in a metal beverage container a part of which is designed to be detached in order to open such container.

PREEMPTION OF STATE AND LOCAL LAW

SEC. 7. (a) Except as otherwise provided in this section, no State or political subdivision thereof may establish or continue in effect any law respecting a refund value of beverage containers sold with a beverage under the pressure of carbonation to the extent the Administrator determines the law is inconsistent with this Act.

(b) No State or political subdivision thereof may, for the purposes of determining the amount of any tax imposed by such State or subdivision on the sale of any refundable beverage container, take into account any amount charged which is attributable to the refund value of such container.

(c) Subsection (a) does not prevent a State or political subdivision thereof from establishing or continuing in effect any law respecting a refund value on containers other than for beverages or from regulating redemption and other centers which purchase refundable beverage containers from retailers and consumers.

PENALTIES

SEC. 8. Whoever violates any provision of section 4, 5(a), or 6 shall be fined not more than $1,000 for each violation.

EFFECTIVE DATES

SEC. 9. (a) Except as otherwise provided in subsections (b) and (c), this Act shall take effect on the date of its enactment.

(b) The provisions of sections 4, 5, and 7 shall apply with respect to beverage containers sold or offered for sale in interstate commerce on or after two years after the date of enactment of this Act.

(c) The provisions of section 6 shall apply with respect to beverages in beverage containers sold or offered for sale in interstate commerce on or after one year after the date of enactment of this Act.

(d) The provisions of section 7(a) shall preempt State and local laws to the extent to which they are inconsistent with the provisions of this Act only on and after the respective effective dates of such provisions.●

RESOLUTION ON TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mrs. SCHNEIDER. Mr. Speaker, today I am introducing legislation which reaffirms support for title IX of the Education Amendments of 1972. Since its enactment, title IX has proven successful in rectifying discriminatory practices in educational institutions receiving Federal funds.

Over the past decade, title IX can be credited in large part with many of the gains made by women in the areas of technical and vocational education, professional degree programs, and school athletics. For instance, in 1972, women comprised 43 percent of the total enrollment in 4-year colleges. In 1981, that figure rose to 52 percent. In fact, today there are more women than men in our Nation's institutions of higher learning. In addition, by 1980, the percentage of female students in federally funded agriculture, technical trade, and industrial programs had risen from 8 percent in 1972 to 28 percent.

Despite the proven effectiveness of title IX, recent court rulings have sought to restrict the scope of title IX coverage. For example, in North Haven Board of Education against Bell, title IX was held to be "program specific," meaning that coverage of title IX no longer pertained to the entire institution. Despite this narrow interpretation, which ignored the broad purposes of title IX, those agencies designed to oversee title IX enforcement did not contest the decision.

Litigation involving title IX has in fact been placed on the Supreme Court calendar for review. In the Grove City College against Bell case, the court of appeals held that the entire college is "the education program" since Federal student aid moneys may be used for any purpose. Grove City has appealed the decision, and the Supreme Court has agreed to hear the case later in the year.

In light of these conflicting judicial interpretations, I feel it is of prime importance for the Congress to reaffirm its support for the comprehensive coverage originally intended by title IX of the Education Amendments of 1972. Title IX is the only Federal statute on the books designed to prohibit gender discrimination in education. Without it, some of the horrible inequities of the past would be allowed to resurface. For instance, in the early 1970's, the New York State College of Agriculture at Cornell University admitted women only if they had SAT scores 30 to 40 points higher than entering men. In

fact, at one time, a male applicant to Penn State was five times more likely to be accepted than a female.

There is no doubt, then, about the need for title IX to identify and help to eliminate sex discrimination in educational institutions. However, let there be no mistake about the fact that title IX does much more than focus on inequities in collegiate athletics. Instead, title IX offers equal opportunity in admissions, employment, degree programs, and all the benefits and services available at the institution.

As I introduce this resolution with 57 other concerned colleagues, I ask each Member to join in restating support for this valuable existing law. Title IX must continue to provide broad and comprehensive coverage to educational institutions in order for equal access in education to become a reality.●

EMPLOYING THE OLDER WORKER

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. PEPPER. Mr. Speaker, Drs. Labe Scheinberg, Donna Cohen, and Carl Eisdorfer of the Albert Einstein College of Medicine, Yeshiva University and the Montefiore Hospital Medical Center in the Bronx, N.Y., have prepared a perceptive, informative paper on employing the older and disabled worker. I had the opportunity to hear this outstanding paper eloquently presented by Dr. Scheinberg at the Older Worker Seminar, March 11, 1983, in Hollywood, Fla.

As Dr. Scheinberg so rightly pointed out, there is no biological basis for mandatory retirement at a certain age. It is productivity, not gray hair and wrinkles, that should determine one's employment status. Older people are a valuable, and often neglected, human resources and he calls upon industry and other employers to reevaluate their positions in that regard.

I insert the thoughtful and learned paper of Drs. Scheinberg, Cohen, and Eisdorfer into the CONGRESSIONAL RECORD so that others may be able to share in the benefits of their able research:

The paper on older workers follows:

EMPLOYING THE OLDER WORKER

(By Labe Scheinberg, M.D., Donna Cohen, Ph. D.; Carl Eisdorfer, Ph. D., M.D.; from Yeshiva University)

EMPLOYING THE OLDER WORKER

It is a pleasure to be here today and to share with you my experiences with issues of employment of the older and the disabled worker.

My experience is that of a neurologist and I am involved with the neurologically disabled and their employment. I am working primarily with the disease model.

The relationships between employment, health and well being are of extreme importance. If one is in poor health it may lead to temporary of permanent unemployment. Similarly employment is important to the well being or health of the individual. Unemployment may lead to poor health and loss of self esteem. Sigmund Freud, when asked to define emotional maturity and good health, replied it is the ability to work and to love. The relationship of work to well being and vice versa are undisputed.

Today I plan to speak of the relationship of employment to good health and also I plan to discuss the importance of maintaining the good health of individuals, especially the elderly, by maintaining their employment; also I plan to discuss some ways how this might be accomplished.

The relationship between employment and well being is important to a broad group of individuals. It has major sociological, psychological, economic, and political implications.

Indeed, the "world of work" is a critical function for men and women, for young and old, for the able and the disabled. I think it is important to recognize this generic importance of employment in order to mobilize as wide a political base for essential institutional changes in employment practices.

To illustrate the potential for a broad political base, I will quote from a recent New York Times article. "Someone is going to have to do battle in a new and serious way . . . Imaginative thinking should be done about . . . reduced schedules, flextime, (and) job sharing . . . But who will take up this battle, and how, in a time where jobs themselves are so scarce that people must take what they can get, when budgets for social programs that already exist are being cut down?" This quote is from an article by Betty Friedan addressed to issues confronting the working women.[1]

Contrary to what might be supposed, the relationship between health and retirement lends itself to no easy description. At the outset, it is important to recognize that health changes may be a cause as well as a result of retirement, that age of retirement is more flexible than often suspected, and that beliefs about health may be more important to functioning that are objective indices of health.

Age of retirement, usually an individual's 65th birthday, has been changing dramatically. At the turn of the century, retirement as we know it, did not exist in the United States. Two out of three men aged 65 and older worked compared to one in five by today. In 1950, almost one half of men aged 65 and older were in the labor force. Private pensions and social security benefits had made retirement possible for most people. However, a long period of relatively stable prices and increased levels of post-retirement support under the Social Security Act and broader pension plan provisions began to encourage the exit of working people at age 65 and earlier. In the period 1950 to 1980 labor force participation of men 65 or older dropped from 45 percent to 19.1 percent. From 1960 to 1980 labor force participation of men 55 to 64 dropped from 86.9 percent to 72.3 percent. For women the reverse trend has been occurring, with participation of those aged 55 to 64 rising from 37 percent to 43 percent during 1960's. (Kieffer, 1982; Robinson, 1982).

Modern research is demolishing many myths about aging—that the abilities of older people invariably are in serious decline, that older workers are slow learners, that their minds do not function well, that they are disengaged and apathetic, that they are frail and unable to stand stress, that they "cause problems" for employers and are no longer productive. These generalizations are harmful and counterproductive. New knowledge about this very rapidly growing segment of the population suggests that all American institutions, government, business and labor, should re-examine many traditional attitudes and beliefs. The growing body of evidence indicates that, far from presenting a "problem" for the nation, the elderly present the nation with a golden opportunity. Instead of being a liability, older people are a valuable human resource that America can no longer afford to waste. Age is the only condition toward which we are bigoted yet to which we all desperately aspire.

The predominant myth that old age is nothing more that a period of functional loss is bolstered by a misinterpretation of the fundamental biological fact that aging is accompanied by the loss of body cells. It is known, for example, that the number of cells in the brain does decrease with age. What is all too often ignored, however, is the great redundancy of brain cells. There is an over-supply of billions of nerve cells so that their loss through life is not at all synonymous with a loss of mental ability. Furthermore, experience is a major offset even to physiologic loss, e.g., consider the use of older astronauts in this regard. What is more important in determining the functional ability of an older person is not how many cells a person has lost over a lifetime, but rather what is functionally present. Since individuals vary greatly in the rate at which they lose this normal function, it is simply inaccurate to regard all old people as being in a process of rapid decline and diminishing usefulness.

An especially pernicious myth is that senile dementia and other diseases are inevitable if one lives long enough, for it implies that older workers must be taken out of the labor force before they "make a mess of things." It is true that many diseases are more common among older people, but these are by no means inevitable for the majority of older workers and it must be recognized that a strong tendency exists for older workers to select themselves for retirement when they do not feel well, provided they can afford to retire. There simply is no biological basis for mandating retirement for all who reach a certain age. It is productivity, not gray hair and wrinkles, that needs to be examined.

Another myth is that old people are unable to handle stress. It is important for managers to remember that older people are survivors, indeed their survival attests to their ability to manage stress successfully. Their experience, in many ways, allows them to deal more successfully with the stresses of life than younger persons.

If the nation persists in believing old myths, seeing older people in a negative light, not using them productively, and putting them "on the shelf" merely because of age, nearly one in five Americans will be dependent, or close to it, in a few decades, and a major shift of resources will be required to care for them. Already, health care costs in the United States are over 10 percent of the

[1] Betty Friedan, "Twenty Years After the Feminine Mystique," New York Times Magazine, page 35, February 27, 1983.

gross national product (most of the costs are for hospital care), and the elderly account for a disproportionate share.

It is, therefore, naive for corporations which are contributing vast sums directly to health benefits and to other human services through taxation, to think they do not have a stake in the costs of maintaining the health and productivity of an aging population. Industry can either develop plans to make productive use of older people, or pay more taxes so that governments can care for them. In either case, the corporation has to pay.

Traditions of the private sector that are barriers to the effective use of older people must be examined. One such tradition is the view of corporate life as a "ladder" to climb: early in life one gets onto the bottom rung and moves upward, only to fall off when the top is reached and never to be heard from again. A "lattice" might be considered as a more appropriate model for an aging workforce. A lattice, by allowing movement in all directions on the basis of an individual's changing interests, abilities, and talents, would allow maximum individual growth and contribution while minimizing the impact of negative stereotypes.

Another important role of the older worker in the corporate setting that can be enhanced is that of teacher and role model for younger workers. A thorny question is involved in using an older worker; however, can a worker whose primary loyalty may be to a union also function comfortably in the role of socializing younger workers to the values and needs of the corporation? The answer depends on how well management and labor can cooperate in dealing with the issue of loyalty to whom and for what purpose.

Older workers need continuing education and training to stay productive. Though they are a repository of vast experience and talent, we concentrate all of our education and training resources on the young. In doing so, we push older people out of the central information pool and, thereby, create a kink of forced obsolescence. This pattern is as wasteful as buying a new car, filling the tank with gasoline, then abandoning the car when it is "broken in."

Another important task corporations should consider is preserving older workers' identification with the corporation after retirement—by preparing them for retirement, even offering them training for other occupations and then using this talent pool on a fee-for-service basis.

Negative stereotypes about older workers, our American "youth culture," and traditional hiring practices that discriminate against the elderly are among the major forces that tip the scale toward restraining the extension of working life. However, several powerful forces are at work that are likely to alter the balance in the other direction. These include the rapidly rising cost of Social Security, and the need for corporations to retain the talents of older workers by keeping them on the job.

The cultural sterotype of the older person as helpless, hopeless, and decrepit is a form of bigotry. As with the racism, the damage arises not only from what the majority feel about the minority, but from what the minority are made to feel about themselves.

The stereotype is self-fullfiling: Older people accept the prevailing myths that they are infirm, that they can only deal with their problems medically, that they have to function in ways that make them seem old. Corporate leaders have bought the myths of "agism" too although the psychological mechanisms of denial usually prevent individuals from applying such beliefs to themselves ("everybody is alike except I'm different"). We must all realize that by perpetuating "agism" we, too, are likely to become its victims, if we live too long.

This approach should not be considered "pie in the sky." The demographic and economic changes are highly predictable, at least for the next three or four decades. The data are there, and the alternatives may be readily ascertained by anyone with wisdom to address the issues. We either face the significant personal and social problems of a burdensome and dependent older population or we alter our way of doing business to position ourselves to deal with the changing population and the opportunities it presents. Once again, the choice is in our hands.

Our propensity to label things is an example of such a tendency. Thus, we use sex, race, and age as convenient tags for certain situations but often these get involved in regulations or particular styles of operation. We then look at any deficits of the individual and we label him or her on the basis of the deficit, thus somebody is blind, deaf, paralyzed, mentally retarded, old.

The problem is, of course, that the overattentiveness to the disability as often as not obscures the person's ability. A man or a woman in a wheelchair can be a most effective worker if we can slightly alter the environment to give them access to the job, for example, to the worktable, desk or machine. While different sites may prevent a specific individual from performing certain activities of daily living that individual is not impaired so far as other work functions may be concerned. I am raising this point because I think functional age is an important approach to a problem but I would like to take it even a step further and ask how old is old for what purposes?

Thus, greater specificity and a better fit between the functional ability and the specific needs to be addressed is a very salient point and become more and more important as we begin to look at this ageless society.

The concept of age itself is modifiable by recognizing that nearness to death is another way to look at the problem. Thus, two individuals at the same age, for example 35, may vary in nearness to death by a factor of severalfold. For one, their cardiovascular state may lead to death within just a few years, for another an additional half century of productive life may be more possible.

This idea of judging a person by health, ability, experience, and productivity, not the age, must pervade our society. It should become a major priority for research particularly as we address the notion of age as being irrelevant in the workplace.

The requirements of the job and the effects of needs are also subjects to be considered in asking the question how old is old for what purpose?

Morgan Lyons, the director of the California Research Center has spoken of the Opportunities and Challenges of employing the older worker.

For employers, in employing the elderly the opportunities are:

(1) A more efficient and productive workforce;

(2) Higher employee morale and loyalty among all workers;

(3) Less turnover, and more worker reliability; and

(4) More workforce stability and continuity.

For the older worker the opportunities are:

(1) Economic well-being;

(2) Enhanced sense of self-esteem and purpose;

(3) Creativity and sense of accomplishment;

(4) Contribution to family community, and society;

For society the opportunities are:

(1) More appreciation of the contributions of older citizens, both workers and nonworkers;

(2) Less conflict between young and old, in and outside the workplace; and

(3) More self-sufficiency of the "dependent" population.

In employing the older worker the challenges for the employer are:

(1) Institute age bias-free personnel practices in retaining, hiring, assessing or assigning employees;

(2) Design just and flexible health and pension benefits packages;

(3) Expand work options for all employees to include part-time, shared jobs, flex-time, job re-design, reassignment and phased retirement;

(4) Use older workers to train and as role models for other workers;

(5) Offer retirement counseling that stresses pay options, and disadvantages of retirement; and

(6) Increase employer's responsibility to their retirees.

For the older worker the challenges are:

(1) Keep skills and knowledge current;

(2) Rethink the balance between work "retirement" and other pursuits so they are seen as more compatible;

(3) Advocate for more options in work and leisure activity; and

(4) Take fuller advantage of available work and other options.

For society the challenges are:

(1) Enact and enforce age-neutral laws and regulations;

(2) Re-educate ourselves about aging, work, and the contributions and needs of the older populations; and

(3) Encourage information, compassion and action to serve the mutual needs of all groups seeking employment.

Now that we have discussed employing the older worker in general terms, it is important to comment on what each individual can do to maintain or attain the "employed status."

There are two guidelines. Education is extremely important at all stages and it is never too early to begin.

Not enough importance can be placed on education at all ages as factor in employment. With the increased level of technology, computers, and robots, getting and retaining a job is directly proportioned to the level of education. In all age groups over 25 through 65 years, the employee with at least one year of college education has almost double the chance of employment compared to those with only a grade school education. From age 65, it is a threefold advantage.

Looking at educational advantages another way, in the male 58 through 64 year age group, 90% of the professional occupations are still in the work force while only 70% of the unskilled labor occupations are in the work force. These statistics reflect the importance of education before entry into the labor force.

What can the employee do after entry into the labor force to prepare for that critical period when options are job retention,

part-time work through job sharing or flextime, or retirement.

The first and perhaps most important task is health maintenance. The worker should strive for good health habits with limited use of alcohol, tobacco, or drugs, regular exercise, weight control, and proper diet. Regular health checkups and treatment of chronic illnesses such a hypertension, diabetes, emphysema, obestiy, arthritis, and heart disease. These measures should begin as early as possible.

Counseling programs for emotional problems and stress should be available and utilized. Corporations should provide this to assist in worker adjustment and satisfaction with the job. There is no need as Thoreau stated for one to live a life of quiet desperation. The employee who enjoys his task obviously performs better whereas the dissatisfied worker who can't wait to retire and whom the employer looks forward to this date even more so often has a career long history of adjustment problems. Off job marital stresses, etc. also cause poor performance and bad work habits and counselling should be available, even obligatory.

The second task is career maintenance. As technology advances, the worker should have continuing education to keep abreast to avoid obsolescence. Training the proven, experienced worker is as important as that of the potential worker. Corporations should consider investment in worker improvement more valuable than capital improvements, and it should be mandatory that this be supplied. For the new worker and those seeking re-entry, government should provide.

Counselling and training for lateral movement should be provided by employers. As the worker changes interests and abilities, the job must be changed and the worker prepared for this. Even post-time employment later in a different area may be considered with workers forming a pool of talent of the corporation to be used on a fee for service basis.

Finally if retirement is the choice, then planning is essential to ease the adjustment. One must prepare the workers and their families for the economic, social, and psychological impact. Retirement may be more stressful than the job ever was.

In conclusion, I would like to suggest that preparation for gainful employment of retirement begins in childhood. As Wadsworth stated beautifully:

My heart leaps up when I behold
A rainbow in the sky:
So was it when my life began;
So be it now I am a man,
So be it when I shall grow old or let me die.
The child is the father of the man
And I could wish my days to be
Bound each to each by natural piety.●

DO WE NEED AN INDUSTRIAL POLICY?

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, the Washington Post last week carried an excellent series, titled "High-Tech: Leaving Home," that looked at the international challenge our industries are now facing in high technology. The author, Dan Morgan, spent almost half a year researching the series and talking with a wide range of experts. The concluding article of the six-part series is especially instructive, and I reprint it here for my colleagues. It lists some of the roots of the problem and suggests the need for a more coherent industrial policy.

As illustrated in the following article, there is a wide range of causes underlying our decline in the international marketplace of high technology. Some of the blame can be assigned to policies of foreign nations, some which are worthy of our imitation and some which are more questionable. However, a large part of the blame lies in our own backyard. Our Government, businesses, and educational institutions have adopted policies, some consciously and some inadvertently, which are not in the long term, in the best interest of our national economy.

There is a growing recognition in Congress of the need to chart a new direction and reverse a number of the negative trends. The House recently passed a bill to renew our Nation's science and math teaching capability. The budget for basic scientific research and development, after suffering through 2 years of budget cuts, is once again looking healthy in many areas. Nevertheless, more needs to be done to upgrade the outdated condition of our university laboratories. There is discussion of the need to redefine the role of the Department of Commerce and the Office of the U.S. Trade Representative. A number of bills have been introduced clarifying the antitrust laws to permit joint research and development ventures.

During the coming months, we can expect to take up a number of these and other related issues. The following article offers a good introduction to the complexity of the problem and makes a convincing case for the urgent need for a congressional response. I commend it to my colleagues.

The article follows:

[From the Washington Post, May 6, 1983]

HIGH-TECH: LEAVING HOME—FOR INDUSTRIAL HEALTH, FIRST, A SELF-EXAMINATION

(By Dan Morgan)

In a laboratory at Genentech, the south San Francisco genetic engineering company, bearded biologists in white gowns hover over trays of purple-colored cultures of interferon that someday may fight human viruses from colds to herpes.

Across the country, in Short Hills, N.J., Martin Lepselter of Bell Laboratory's advanced microelectronics division proudly displays a snapshot of something that looks like a row of fences across a sandy desert. Actually, the picture shows parts of an electronic circuit narrower than a human hair, etched by an X-ray machine on a tiny silicon chip.

Reassuring as those glimpses of the nation's high-technology resources may be, they are not an automatic guarantee of America's economic future. As examples used in this series show, innovations produced in U.S. laboratories frequently have resulted in products made in Japan.

This phenomenon has evoked an angry reaction from U.S. politicians and the public.

Protectionist sentiment is running high on Capitol Hill, and Congress has taken up one of the most restrictive pieces of legislation since World War II: the "domestic content bill," which would require that foreign automobiles sold here include an arbitrarily established percentage of U.S. components.

The Reagan administration opposes the measure but has taken a tough approach in negotiations with Japan aimed at breaking down Japanese barriers to U.S. trade and investment.

"The time has come to act. . . . We're already 10 years too late," said William C. Norris, the outspoken chairman of Control Data Corp., who has suggested "kicking out" all Japanese working in U.S. research facilities as a warning shot across Tokyo's bow.

Such suggestions are indicative of a mood of rising anger at Japan. Whether the steps contemplated so far will change the Japanese-American technological equation is moot.

Trade restrictions certainly would invite retaliation not only from Japan but also perhaps from countries such as France, where U.S. companies fare well. Moreover, in today's interconnected global economy, technology has become increasingly internationalized. Ideas travel with jet speed across borders, not only from America to Japan but also in return. Science is universal.

What distinguishes economies today often is not who is first with the technology but who first uses it effectively.

This is more than a technical problem. It involves organization, availability of capital and such subtle factors as motivation, determination and national will. These are not easily quantified or readily fitted into theories of "scientific management" that have prevailed in the United States since the 1950s.

Japanese companies already are shifting their strategies in anticipation of more antagonistic U.S. policies, forming joint ventures with U.S. companies and investing in U.S. industry.

But for the United States to think in terms of retaliation alone, warned Robert B. Reich of Harvard University's Kennedy School of Government, would be to miss an unprecedented opportunity for national self-examination. This is a process that he and other experts say must take place before American industry can return to full health.

The problem, as Reich sees it, is that politicians and their policies are lagging far behind changes reshaping the world economy.

As this series has suggested, the fragmented U.S. business community has often sold technology to Japan too cheaply and with too little consideration of its long-range impact on U.S. competitiveness. Washington has contributed to the problem by aggressively promoting sale of U.S. technology abroad as part of weapons co-production programs.

By contrast, Japan controls export of technologies developed with government support and is tightening copyright laws on computer software as Japanese industry improves its skills in this area.

But in talks with more than 150 businessmen, government officials, scientists, researchers and economists, many other ex-

planations for flagging U.S. competitiveness were given. Prominent among them:

The U.S. research and development effort, the world's second largest after that of the Soviet Union, has suffered from its emphasis on defense. Half of all research and development dollars spent in America are from the federal government, and more than half of those are defense-related.

While much of the Defense Department's support for research on computers, microelectronics, lasers and aerospace has potential commercial spinoffs, the U.S. government lacks effective procedures for getting it quickly into commercial channels.

By contrast, Japan's New Technology Development Agency provides financial assistance to private firms to help them convert work done at government laboratories into products.

Big corporations and government alike tend to overemphasize research on basic science and underemphasize research on less exotic but important technologies. One example cited was robotics.

U.S. research stresses vision systems but, according to one senior executive, American robots are in urgent need of improved ability to grip objects, a mundane but crucial part of a robot's work. Although the payoff presumably would be enormous, no company has found a way to reduce drastically the time required to wash and dry clothing by machine.

In Japan, government-supported research and development often goes to less exotic "medium-tech" projects with immediate commercial potential. In the United States, "nobody wants to do the routine stuff," said Rustom Roy, a fellow at the Brookings Institution.

JAPAN HELPS WITH TRADITION OF COOPERATION

The federal government is "spending more but getting less" for its research dollars, according to S. J. Buchsbaum, Bell Labs' executive vice president for research. The more than 700 government research laboratories are "diffused" and lack well-defined goals. Materials research, which "underlies everything," is especially splintered, he said.

The United States does not pay enough attention to foreign technological developments. Only 20 percent of Japanese technical publications are translated into English, according to John A. Alic of Congress' Office of Technology Assessment.

"The [cooperative] Japanese system stands in stark contrast to the adversary relationship that typically prevails between U.S. industry and government," according to Washington consultants Harald B. Malmgren and Jack Baranson.

Robert M. Price, president of Control Data, said the most important difference between the two countries is "development of a Japanese tradition of cooperation in developing and exploiting base technologies."

U.S. antitrust laws are ambiguous and outdated. Japan helps establish research cartels while seeing to it that companies compete vigorously in marketing products resulting from the research. But U.S. industrialists said U.S. antitrust laws make forming such research consortiums here risky.

Unlike Tokyo, Washington lacks "anti-cyclical" policies to keep emerging industries growing and developing during recessions. As a result, Japanese companies have been able to exploit periods of slack business activity to catch up with U.S. competitors squeezed for capital and customers during these periods.

With some notable exceptions, such as IBM, Texas Instruments and American Telephone & Telegraph, managements of large U.S. corporations pose major stumbling blocks to the exploitation of new technologies.

Prof. Leslie Eric Cross, acting director of the materials research laboratory at Pennsylvania State University, noted that large U.S. corporations often leave development of new technologies to smaller companies "to which they can dictate terms." Large Japanese companies, however, are "technology driven," and take the lead in new areas.

"Takeover fever" and "paper entrepreneurialism" distract U.S. management from production problems. RCA announced in 1979 that it lacked the $200 million needed to develop an American video recorder, the fastest selling appliance of the decade. But in the same year it spent $1.2 billion to acquire a finance company.

Large U.S. corporations, which depend on the stock market to raise much of their capital, are much more concerned with impressing potential investors with short-term profits than are Japanese firms, which tend to borrow from banks with which they have close and longstanding associations.

The net result is that Japanese companies feel freer to spend capital on long-range goals, including development of new products.

U.S. corporate managements are more removed from the production process than are their Japanese counterparts. Until recently, Ford Motor Co. had five more layers of management between the factory floor and chairman of the board than Toyota had.

U.S. management has devoted fewer of its research and development efforts to quality control than has Japan, and Japanese quality has consistently been superior to that of America.

The U.S. public education system has fallen far behind Japan, West Germany and the Soviet Union in math and science preparation. Half of the engineering graduate students in the United States are foreigners because Americans either are not applying or are not qualified.

The American Association for the Advancement of Science has said that "far too many students . . . lack motivation to study science and mathematics" because of "boring" teaching and a school climate "unfavorable to the pursuit of excellence."

Whether all or some of these reasons can explain Japan's successes in its technology race with the United States, they suggest the myriad factors that influence it.

Much has been made of the government-industry cooperation that foreigners nickname "Japan Inc." and there is no doubt that the Japanese government has made a difference.

Current government-backed efforts involving tax breaks, research funding and pooling of research information and other subsidies are under way in genetic engineering, automated manufacturing, superspeed computers, optical communication and measurement, manganese nodule exploitation and subsea oil exploration.

An example of how the Japanese government nudges an emerging industry forward was its establishment of Nihon Aeroplane Manufacturing Co., a special corporation. Government and private firms invested in NAMCO, but the government bore the main financial risk. NAMCO developed the 64-seat YS11 civilian plane, not a great success, but the work helped companies acquire experience.

Subsequently, Japan set up the Civil Transport Development Corp., a consortium of three large aircraft companies established to coordinate Japan's work in building part of Boeing's new 767 jetliner. However, at that point direct government financial support was reduced because the companies were deemed strong enough to shoulder more of the financial risk.

Meanwhile, Japan's Ministry of International Trade and Industry (MITI) has sponsored another consortium to enable the nation to be a 50-50 partner with Britain's Rolls-Royce in construction of a new turbo engine for the next generation of international airliner, the 150-seater.

Several experts warn against placing too much importance on the government role in Japan's success. The U.S. government pumps far more money into the American scientific and industrial community for research and development than does Japan. The Tokyo government supplies only 30 percent of the total of such funds in Japan, while Washington supplies more than 50 percent in this country.

Japan's success also clearly owes much to the ingenuity, determination and flexibility of private industry.

William J. Abernathy and Richard S. Rosenbloom of the Harvard Business School, who studied the way Japan captured the U.S. video recorder market, cited "the element of persistence" in Japanese companies.

Betamax, they noted, was the fourth generation of video recorder developed by Sony and the first that succeeded with U.S. consumers. With no assurance of success, Matsushita established an entire department of 1,200 employes to develop a video recorder for the commercial marketplace.

Little things, rather than big, often make a crucial difference, according to Americans who have studied Japanese industry.

Toyota and other auto makers save warehouse space and cash by using a "just-in-time" delivery system for components. Parts arrive only when they are ready to be installed, sometimes with less than an hour to spare. Working with tiny inventories, the auto makers can adjust quickly to ups and downs of demand.

In at least one key technological area, auto design methods, the United States is superior to Japan, according to a detailed comparison published last August by Japan's Society of Science, Technology and Economics.

While Congress' Office of Technology Assessment does not discount the importance of Japan's lower wage rates in the auto makers' success, it said recently that another key element was the Japanese refusal "to quit the American market when their first offerings proved unappealing; they persisted and steadily improved their sales."

U.S. businessmen speak almost with awe of the speed with which Japanese companies master new technologies and make high-quality products.

"Every time they do something, they do it better [than the last time]," said former Boeing vice president William Beeby, who worked on development of the Boeing 767, parts of which are manufactured in Japan. "The quality coming back [from Japan] is better. We saw that."

"The Japanese have been organized to tap the pool of science in this country," said Dan Burg of Carnegie-Mellon University. "They send teams here, and it's done in an organized fashion. They'll send post-doctoral students to spend time at our locations,

but its rare for U.S. students to go to a Japanese university."

Whether the United States should, or could, respond to the Japanese challenge by adopting some of Japan's methods is an open question among politicians, industrialists and economic experts.

The Office of Technology Assessment has described the fragmented U.S. industrial policy as a "potential strength."

"Our pluralistic system, which is responsible for so much of the ad hoc character of U.S. policies toward industry, creates an environment where flexible and innovative responses are sometimes possible," the OTA said.

Nevertheless, there is a growing sense in industry and academia that government needs to provide more consistent direction.

WASHINGTON HINDERS WITH STOP-AND-GO POLICIES

An example of Washington's stop-and-go tendencies are Reagan administration proposals to curtail energy research just as it has made progress after the 1973-74 oil-price scare.

"Science isn't run on a six-month basis," Brookings' Roy said. 'You have to wait 10 years for results."

While the Japanese ministry has announced a seven-year, $140 million research effort involving 10 private companies to develop "intelligent" robots capable of assembling dozens of different products, including an entire automobile, the U.S. government's main robotics research program, at Wright-Patterson Air Force Base in Dayton, is geared primarily to making defense contractors more efficient.

"U.S. industrial policy is a mess," a congressional aide said. "It doesn't add up. It's little bits and pieces. The political element is always dominant here. The kind of political system we have just isn't conducive to coherent policies."

In a highly significant move, the Justice Department's Antitrust Division has allowed 10 competing U.S. computer companies to establish a joint research company, Microelectronics and Computer Technology Corp. No Japanese companies are members, and Japanese firms seeking access to MCC's technologies must deal with the consortium, not a single company.

Some have described this project as "America Inc."

In 1981, Congress passed the research and development tax credit, enabling companies to accelerate their depreciation on R&D equipment. It is credited with spurring a dramatic increase in the amount invested in new, "High-tech" ventures, from $58 million in 1978 to $1.7 billion in 1982. And California, under then-Gov. Edmund G. (Jerry) Brown Jr., established the first Commission on Industrial Innovation to recommend state policies that would help "high-tech" industries.

These steps have the advantage of not requiring a political confrontation with Japan. For, in the heat of the present, it is easy to forget that Japan is actually a great American success story.

It has reached its position of near technological parity through American aid, open market and technical prowess. Now, Japan is forcing the United States to take stock of its own economic performance and is becoming a teacher to its own postwar teacher.

But, as Undersecretary of Commerce Lionel H. Olmer has said, "Japan is not yet a technological giant."

The United States is still bigger and richer. Japan's labor productivity, the measure of the man-hours required to turn out products of a certain value and indirectly a measure of technological prowess, still lags behind that of the United States, although the difference is narrowing and Japan is an equal or ahead in some key industries such as automobiles.

The $15 billion spent by Japan annually on civilian research and development is only half the amount spent by the United States. The Japanese government's annual spending for research on supercomputers is less than that of IBM.

Japan's vaunted system of national planning is not infallible. It has made serious miscalculations, such as promoting growth of an aluminum industry now on the brink of bankruptcy.

Some even think that Japan's success in international trade may be exposing its companies to forces that will weaken its society's traditional discipline and unity of purpose that has characterized Japanese industry.

"The rapid evolution of Japan's economy toward the creation of a 'knowledge intensive' society carries with it enormous potential opportunities," Olmer said. ". . . The technological race does not need to be a zero sum game. Both sides can win, and the results will be of enormous benefit to all."●

FOREIGN LANGUAGE STUDY NEEDS EMPHASIS

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. SIMON. Mr. Speaker, before too long this House will be taking up a proposal to do more to stimulate foreign language study in this country.

President Reagan's National Commission on Excellence in Education stressed over and over again in its report that we have to do more on foreign language education.

I thought it might be of interest to our colleagues to know that every other nation, so far as I am able to determine, is ahead of the United States in terms of foreign language study.

The information I am inserting in the RECORD at this point is a couple of years old, but to my knowledge there has been no change in the status. What I am inserting in the RECORD comes from the book which I authored titled, "The Tongue-Tied American." We remain the only Nation on the face of the Earth where you can go through grade school, high school, college, get a Ph. D., and never have a year of a foreign language. That clearly must change.

LANGUAGE EDUCATION IN FOREIGN NATIONS

AFGHANISTAN

English, French, and German are required, starting in elementary school.

ARAB EMIRATES

English is required from fifth through twelfth grades. The last two years of high school are divided into two streams, literary and scientific. Those who are in the literary stream must take another foreign language, usually French.

ARGENTINA

Elementary system is divided into two categories, and in one, a foreign language is required, starting in the third grade. High schools require a foreign language all five years, three years of French and two of English, or three of English and two of French.

AUSTRALIA

Some public schools have foreign language requirements, most do not. Where there is no requirements for foreign languages, the states provide training availability at the elementary and secondary level, including Indonesian, Japanese, Chinese, Dutch, Spanish, French, Greek, German, Hebrew, Latin, Czech, Hungarian, Latvian, Lithuanian, Polish, Serbo-Croatian, Turkish, Ukrainian, Italian, Malay, and in the state of Tasmania, Esperanto is also available! Enrollment percentages are more than double those of the United States.

AUSTRIA

For admittance to a university, eight years of a living foreign language plus four years of Latin are required. Before age ten, there is no requirement for a foreign language but courses are "very popular." Of children ten to fourteen, 75 percent receive instruction all four years in at least one foreign language. For ages fourteen to eighteen, about 25 pecent receive four years of instruction in at least one living foreign language and, in most instances, Latin also.

BAHAMAS

Spanish and/or French is required during the first three years of high school.

BARBADOS

Spanish is actively promoted by the government as a second language.

BELGIUM

Foreign languages are compulsory in some areas from third grade on, throughout the country from fifth grade on. Foreign language is compulsory throughout secondary school (ages twelve to eighteen). A second foreign language is available from third grade on, a third foreign language available from fourth grade on.

BENIN

There is no foreign language requirement in elementary schools. Two foreign languages (English and a choice of Spanish or German) are required in the secondary schools.

BOTSWANA

Setswana, the national language, is used for the first four grades, and English is taught. From grade five on, English is used as the medium of instruction.

BRAZIL

There are almost no foreign languages taught in the elementary schools. English is taught in all three years of secondary school. University entrance examinations require the knowledge of foreign languages.

BULGARIA

From fourth grade through high school, Russian is taught; from eighth grade on, English, French, or German. Students graduate from high school with two foreign languages.

BURUNDI

French is required in elementary schools. French and English are required in secondary schools and at the university level.

CAMEROON

French and English are required from elementary school through the university level. Faculty of the university are obliged to be bilingual and deliver lectures in either of the two languages. Medical school graduates are expected to present their final dissertations to an international jury in their first language, a summary in the other, and answer questions from the jury in the language in which it is asked.

CANADA

An important post in Canada is Commissioner of Official Languages. Because of the language question in Canada, stress is placed on learning French in English-speaking areas and English in French-speaking areas. Immersion is gaining in emphasis. Not only is language training stressed in the schools, but also for adults.

CENTRAL AFRICAN REPUBLIC

Sango and French are taught in elementary schools. In the secondary schools and universities, French, English, German, Spanish, and Russian are available.

CHAD

French and Arabic are taught in grade schools. German, Spanish, and English are taught in high schools and universities. Russian is optional.

CHINA

Foreign languages are stressed. In urban areas, three years of primary instruction and five years of middle school are provided, fewer in rural areas. Radio broadcasts are used extensively for foreign language instruction.

CYPRUS

English is required both in elementary and secondary schools.

DENMARK

Starting in the fifth grade, six years of a foreign language are required, a second is optional.

EGYPT

Starting in the sixth grade, six years of English are required; in the tenth grade, three years of French.

EL SALVADOR

A foreign language is required in secondary schools. In order to graduate from a college or university, students are required to show proficiency in a foreign language.

FIJI

English is required both in the elementary and secondary schools.

FINLAND

In the comprehensive schools (ages seven through fifteen), the first foreign language starts in the third grade and the second starts in the seventh grade, both required. Sixteen hours per week are spent on the first, seven hours per week on the second. It is possible to study two additional foreign languages before graduation from high school.

FRANCE

Sixth grade through secondary school, one foreign language is required. Ninth grade on, a second foreign language is required. For entrance into college, students must pass at least one foreign language examination.

GERMANY (EAST)

From grade five on, for six years, Russian is required. From grades seven through ten, a second language (usually English or French) is optional.

GERMANY (WEST)

One or more foreign languages is generally required at some point in what would be the equivalent of our elementary or high school.

GREAT BRITAIN

About 5 percent study a foreign language in elementary schools. From age eleven, 85 percent study for three years, 40 percent, four years or more.

GREECE

It is common to study a foreign language at elementary level but not required; one foreign language is required at secondary level.

GUATEMALA

Foreign language study is voluntary at elementary level, required at secondary level.

GUINEA-BISSAU

Potuguese is required in elementary schools. Both French and English are required in secondary schools so that, by graduation from high school, all students have had three foreign languages.

HAITI

English and Spanish are required in secondary schools.

HONDURAS

Five years of a foreign language are required.

HUNGARY

In grades five through eight, Russian is compulsory, another language optional. In high school, Russian and one more foreign language are required, a third optional. They also have a series of specialized foreign language high schools. At the university level, two years of Russian and two years of another language are required. Fluency in another language is required for Ph. D.

ICELAND

Danish is required from age ten for six years. English is required from age twelve for four years. In Menntaskoli (last two years of high school, first two years of college), Danish is required for two years, English for four, and either French or German is also required. Other languages can also be taken.

INDIA

All students are required to study two languages other than the mother tongue.

INDONESIA

One foreign language is required in elementary school, one in junior high school, two in high school, two in university.

IRAN

Seven years of foreign language are required, starting in the sixth grade. At the university level, six "units" out of 120 needed for graduation must be in a foreign language.

IRELAND

It is not required but "the majority of students do study a foreign language during the course of their education." French is optional in elementary schools.

ISRAEL

English is required from grades four or five, through twelve. Arabic is being encouraged as a second foreign language. All schools in the Arabic section learn Hebrew from grade three. English is required in the university unless the student passes an English proficiency test.

ITALY

Foreign languages are required in high school, optional at elementary and university levels. Most popular language is French, followed by English.

JAMAICA

Foreign language study is limited at elementary level, "fairly universal" at secondary level. Students must pass a foreign language examination to be admitted to study humanities at university.

JAPAN

Although foreign language study is technically not required, more than 80 percent of Japanese students take foreign languages starting at the age of twelve. Two foreign languages are required for university graduation.

JORDAN

English study is required from the fifth grade through university.

KUWAIT

In grades five through ten, eight forty-minute classes a week in English are required. Grades eleven and twelve are divided by course; either English or French is required.

LEBANON

One foreign language is required in elementary school and secondary school. Two foreign languages are needed before graduation from college.

LESOTHO

The government requires that classes be held in English, so that all students learn at least one foreign language.

LIBERIA

Knowledge of French is required for high school graduation, and is taught in grades eight through twelve.

LUXEMBOURG

In elementary schools, German and French are required. In secondary schools, English and either Latin, Italian, Spanish or Russian are required.

MADAGASCAR

French is required at elementary and secondary level. For university graduation, written and oral tests must be passed in English, German, or Spanish.

MALAWI

English is required from third grade to university.

MALAYSIA

Foreign language is required either from first grade or fourth grade, depending on the area, through twelfth grade.

MALI

Foreign language is required in secondary schools.

MALTA

Maltese and English are taught from first grade. In secondary schools, students must study Arabic and one other foreign language. Proficiency in English and one other foreign language is required for university admission.

MAURITANIA

Students start studying French in second grade. English is compulsory in secondary school.

MAURITIUS

English is compulsory at elementary, secondary, and university levels. It is the official language, though the population is largely French-speaking. Other languages are available as electives.

MEXICO

Primary schools generally offer a foreign language. Study is required in secondary schools. Student must pass a foreign language examination to get a university diploma.

NEW ZEALAND

At the secondary level, those who take the pre-university courses usually take two or three years of a foreign language. Those who attend vocational schools are much less likely to.

NIGER

Two foreign languages are required in secondary school. Before entering university, students must pass examinations showing an ability to read and understand two foreign languages.

SOUTH AFRICA

Every elementary school child is required to learn at least two languages. Two foreign languages are required in secondary schools, a third is optional.

SOUTH KOREA

In grades seven through twelve, English is required; in grades ten through twelve, another language is also required. At university level, English is required all four years.

SPAIN

Foreign language is required in elementary and secondary schools.

SRI LANKA

Foreign languages are required from grade one.

SUDAN

There is no elementary instruction, but English and French are required for three years in secondary schools.

SWEDEN

By graduation from secondary school, students have nine years of English, and two-thirds of the students have either French of German from grade seven on.

SWITZERLAND

A second Swiss national language must be started in the fifth or sixth grade. A foreign language (or a second language) must be begun in the seventh or eighth grade and continued through secondary school and university.

SYRIA

In intermediate and secondary schools, all students must take five to seven hours a week in a foreign language, usually French or English.

TAIWAN (REPUBLIC OF CHINA)

English is required from seventh grade on. A second foreign language is required in college.

TOGO

Two foreign languages are required at the secondary level.

TUNISIA

French is required in elementary school, and a second foreign language is required in high school.

UGANDA

English is the official language while Swahili is the National language. Mastering English is stressed and required.

U.S.S.R.

In a ten-year school system, almost all take at least one foreign language in high school; one foreign language is required in university; a second or third foreign language is required in graduate school.

YEMEN

Foreign language study is required in secondary schools. Knowledge of a foreign language is required for college or university graduation.

YUGOSLAVIA

From fifth grade through high school, a foreign language is required. A language examination must be passed for university graduation.

ZAIRE

French is required in elementary and secondary schools. Other languages are optional at secondary school and university levels.●

TRIBUTE TO HENRY B. GONZALEZ

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. FORD of Michigan. Mr. Speaker, it gives me great pleasure to extend belated birthday greetings to my distinguished colleague and good friend, HENRY B. GONZALEZ. I also would like to commend him for his 30 years of public service; 22 of which have been in the U.S. House of Representatives.

HENRY is a Member who has served his party and his district well. His concern over social injustice and his desire to eliminate it have been an intrinsic part of his career. During his first term on San Antonio's city council he sponsored the ordinance which ended segregation in the city's recreational facilities. There are many other examples to prove this point.

On a national level, HENRY has made significant contributions. He is greatly admired for his outstanding work on the Committee on Banking, Finance and Urban Affairs. He plays a very important role as the chairman of the Housing and Community Development Subcommittee, where, among other things, he has fought for equitable treatment of families displaced from their homes.

HENRY B. GONZALEZ's commitment to his constituents and the working people of America are an inspiration to us all. This has been especially important during the last 2 years when the problems of the needy have not received the kind of attention they deserve from Congress.

HENRY B. GONZALEZ is a most effective, creative, and dedicated Member of Congress. I am pleased to honor him for his impressive record of public service to the city of San Antonio, to the State of Texas, and to the citizens of the 21st District.●

ARMENIAN GENOCIDE

HON. ROBERT J. MRAZEK

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, April 21, 1983

● Mr. MRAZEK. Mr. Speaker, I am deeply honored to join with my colleagues in solemn remembrance of one of the most brutal episodes to occur in the 20th century.

This week we commemorate the 68th anniversary of an infamous and officially sanctioned genocidal campaign against the Armenian people. During a 30-year period of terror, nearly 2 million Armenians perished and more than 500,000 were banished from their homeland in a systematic campaign of annihilation perpetrated by the Ottoman Government. Men, women, children, and the elderly were either gathered up and slaughtered or forced to participate in death marches across the Ottoman Empire to the Syrian Desert. Most were massacred along the way; others died of starvation and disease.

The Armenian holocaust is one of the tragic events of the 20th century. Yet, the Turkish Government continues to deny that the massacre ever occurred and refuses even to teach of the Armenian genocide to its own people. While no one can condone the acts of terrorism committed by Armenian extremists against Turkish diplomats and their families, neither can we accept the insensitivity and intolerance which leads the Turkish Government to perpetuate this lie. We can only hope that our actions here in remembrance of the Armenian martyrs will serve as a small example to those Turkish leaders who would prefer to deny the truth about this deplorable episode.

As Americans, we must also accept the responsibility of keeping the memory of the Armenian holocaust alive. To those Armenian Americans whose parents and grandparents perished, the memory and the suffering can never be erased. Yet, most Americans are not even aware that a genocide was committed against the Armenian people and for many years the massacre was virtually forgotten in history books. If the Armenian genocide is to have some significance for our generation and future generations, we must insure that the memory and the meaning of this event is rekindled in the minds of the American people.

The tragedy which befell the Armenian people must take its place in history beside such atrocities as the Jewish Holocaust and the autogenocide of the Cambodian people. In this regard, I am particularly pleased that the Armenian massacre will occupy a place of prominence in the U.S. Holocaust Museum. In so remembering this

deplorable event, we take an important step toward opposing the forces of tyranny and genocide wherever they occur.●

STILL NO PROGRESS ON FARMLAND PRESERVATION

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, the Farmland Protection Policy Act became the law of land on December 22, 1981, when President Reagan signed the Agriculture and Food Act of 1981—Public Law 97-98. This act directs the U.S. Department of Agriculture to lead a modest effort to reduce the impact of Federal programs and expenditures on the conversion of agricultural land to nonagricultural uses. In passing this act, the Congress recognized the vital importance of protecting farmland for farming, and asserted that tax dollars should not subsidize projects which needlessly lead to the loss of productive cropland.

Section 1547(a) of the Farmland Protection Policy Act (FPPA) states: "This subtitle does not authorize the Federal Government in any way to regulate the use of private or non-Federal land, or in any way affect the property rights of owners of such land." According to a June 1, 1982, draft guidance document prepared by the Department of Agriculture explaining the purpose of the FPPA and USDA's plans for implementing it, "There is nothing in the act nor in these criteria—promulgated pursuant to section 154(a)—to prevent landowners from converting farmland to other uses, so long as it is done without Federal subsidization or assistance * * *."

A second, or perhaps third rule implementing the FPPA is still under review by the administration. Deadlines imposed in the FPPA have been regularly missed, and the Department of Agriculture officials have candidly admitted the administration opposes both the philosophy and substance of the FPPA. It is clearly within the prerogative of the executive branch to move deliberately in implementing this, or any other statute. I am concerned, however, with the future consequences of this administration's aversion to helping minimize agricultural land conversion. I also believe that the administration is legally bound to follow and enforce all the laws of the land, not just the ones viewed by them as morally, ethically, and politically justified or expedient.

I intend to vigorously pursue in every way I can, as chairman of the subcommittee with oversight jurisdiction on the programs and policies of the USDA, the reasons for the Department of Agriculture's inability to implement this relatively simple statute.

I would like to share pertinent excerpts from a transcript of a presentation on this issue made on March 9, 1982, by Mr. Frank Schnidman, a land use expert who has actively followed for several years the issue of agricultural land conversion. Mr. Schnidman opposes public efforts to protect agricultural land, and has worked within the political process to discourage adoption of the Farmland Protection Policy Act, and other local or State initiatives to protect agricultural land from conversion to other uses. Mr. Schnidman's opposition stems, in part, from his belief that concern over the loss of agricultural land has been unjustifiably inflated by inaccurate statistics and biased analysis. In particular, he takes exception to the statistics on the annual loss of agricultural land to nonagricultural uses that have been reported widely, and at times, erroneously, in press reports and during debates on the issue of protecting farmland. Analysts who have argued that there is no reason to be concerned about agricultural land loss repeatedly point to erroneous and misleading statements on the issue as evidence that there is no reason to be concerned with the conversion of agricultural land to other uses. Mr. Schnidman and others argue that uncertainty in, and the shortcomings of, national agricultural land base statistics make it impossible to determine whether there is a problem with conversion and hence meaningful public policies obviously cannot, and should not, be fashioned to mitigate the impacts of conversion at this time.

Public policies and program expenditures are often advanced with far less than perfect knowledge regarding the problems being addressed or the likely outcome of the proposed actions. Notwithstanding the legitimate and well-grounded concerns of some economists, demographers, and others, our understanding of the extent, causes, and consequences of agricultural land conversion is sufficiently refined to support current efforts to protect agricultural land, including the FPPA. Even though available statistics are flawed in many respects, the Congress and most citizens recognize that protecting agricultural land from conversion, soil erosion, and other natural hazards is essential and prudent in order to sustain the Nation's agricultural productivity. Most people fortunately recognize there is little to gain from a preoccupation with statistical anomalies and uncertainties when the basic facts are relatively clear.

Mr. Schnidman views the issue differently, and has advanced his views widely within the administration. In Mr. Schnidman's March 9, 1982 speech, he stated that:

> Everybody said when the Reagan administration came in, "don't worry, they'll dump this study" [the National Agricultural Lands Study]. Well, believe it or not, the House Republican House members using the statistics from the Carter administration study which stated that there was a crisis and Congress had to act and, believe it or not, it was the recommendation of the staff of the President that he sign an Executive Order on farmland preservation!
>
> It was only through the efforts of myself and Billie [Bowles] and other people like us lobbying with the Cabinet Council on Food and Agriculture and the Council of Economic Advisers that prevented President Reagan's staff from presenting him with an Executive Order, for his signature, requiring federal agencies to take into account farmland preservation as a priority aspect in all of their decisions! The correspondence I got back from the White House on this was crazy. They said, "Well, we're still thinking about it but we're not going to do anything now. We're going to defer to the intent of Congress and let them deal with it."

To the chagrin of the administration, Congress passed the FPPA as part of the 1981 farm bill, and the President was forced to accept it in order to enact other basic farm program legislation so vital to the agricultural spector. It is instructive to review the basis for Mr. Schnidman's opposition to the FPPA:

> I get livid with anger when I read this stuff. I began seriously in this whole thing because of Exxon. I had been involved with the Secretary of Agriculture and the Administrator of EPA in trying to bring some rationality to their policies because the Secretary of Agriculture in 1978 amended the Land Use Statement of his department to include a farmland preservation concern, and EPA in 1979 promulgated its own in-house policy to protect environmentally significant farmland. In 1980, the Environmental Impact Statement requirements under EPA were revised to require all federal EIS statements to review the impact on farmland preservation. If you want to read ridiculous regulations, read the August 11, 1980 EIS regulations on integrating farmland preservation into all federal agency decision-making!

Over the last few years, the basic purposes of many Government programs have been questioned in the name of "getting government off the backs of the people," or because of budgetary pressures aggravated by the administration's misplaced faith in supply-side economics. It appears clear that Mr. Schnidman and others felt that the public's role in agricultural land protection should be among the programs targeted for elimination, and that public concern on the issue would disappear as a result of the dissemination of new information and alternative views on the issue expected to emerge in 1982. In this context, Mr. Schnidman said:

> However, by the end of this year [1982] there will be enough published information to challenge the validity of any statistic which claims there is a conversion problem. Resources for the Future in Washington, D.C. is coming out with a book called "The

Cropland Crisis—Myth or Reality" and they've decided that it's a myth. Erosion and water are the big problems in farmland in this country. The only real problem with agricultural land is at a very local level—"whether or not certain areas lose their production of specialty crops." Soil experts assume that we cannot feed the whole world, and shouldn't try.

The interesting thing is that this "Resources for the Future" organization is Rockefeller Foundation funded also [in addition to the American Farmland Trust—an organization advocating protection of farmland], and for them [RFF] to come out with this report lends a tremendous amount of credibility to it.

I think that you're going to see the farmland preservation movement react to the fact that their data has been totally discredited by saving, "Still, we have to preserve our options and it's best to keep the land open because who knows what might happen". It's like when Congressman McCloskey said, "That to save us against the Russians, in 50 years it's not going to be defense hardware, it's going to be food." And my response is, "If it's food they want, they'll be here—Russians will just come over and get it!

And talk about being killed by your own party. The House Republican Study Committee gave McCloskey the information he uses. He got the information from the Republicans! Their agricultural land document takes in whole sections of the Carter Administration report as gospel, just because it was printed by the U.S. Government Printing Office, "it's got to be true," and they gave their report to all Republican Congressmen with the recommendation that Congress has to act in 1981 to do something about the "crisis in conversion!"

The executive director of the Concerned Citizens Coalition of the American Land Alliance, Ms. Billie Bowles, also spoke at the March 9, 1982 meeting where Mr. Schnidman presented the views quoted above. Ms. Bowles explained the position and activities of different officials in the administration on the FPPA and on the advisability of President Reagan issuing an Executive order directing Federal agencies to minimize the impact of Federal projects on the conversion of agricultural land to nonagircultural uses. The Department of Agriculture and certain members of the White House staff who were advocating issuance of such an Executive order apparently encountered strong opposition within and outside Government agencies. Ms. Bowles said:

Bill Niskanen, who is on the Council of Economic Advisers, . . . is the person who alerted me to the federal ag bill. He is really worried about it! CEA is different from the White Hose staff who were trying to get Reagan to sign an Executive Order. Bill Niskanen did an economic analysis on the proposed Executive order and just went through the roof! So he, at the Cabinet level, was the person who was the most instrumental in killing the Executive order. Niskanen says it was not Block, but underlings who have been in USDA through other administrations, who are behind this bill. However, as you just heard, Frank is not certain that Block is not sympathetic!

Bill Niskanen will be our "point man" in trying to "contain" the implementation regulations [of the EPA] and/or repeal them. I spent an hour with Niskanen on this, and Frank [Schnidman] will make an appointment to talk to him soon.

I also talked to Secretary Pierce of HUD, who already recognized the problems and worked to stop the Act. Secretary Pierce had me spend 2 hours with his special project assistant, David Karnes (who also reports to Under Secretary Don Hovde, a friend of the builders). Hovde apparently got HUD to intervene on the Executive Order.

Congressman and Senators whom I've talked [to] tell me that if we can put together the agency forces "to contain" that we can use those same agency forces "to repeal," particularly with the President's Housing Commission having come out against the Act.

EPA is also on board via 2 close friends of mine: Paul Cahill who is Director of Federal Activities—interfacing at a sub-cabinet level with other agencies to try to keep their legislation from countering EPA's; and Rita LaVelle, who is up for confirmation to head Superfund (as Assistant Administrator of EPA). They are 2 beautiful people!

Frank [Schnidman] wrote a memo for Paul [Cahill] to give to Anne Gorsuch, and Anne was prepared to intercede with the President to ask him not to sign the Farm Subsidy Bill, however, when Congress accepted Reagan's compromise pricing package on the subsidies, Reagan had to accept the bill en toto—(There is no line item veto at the federal level—so the Farmland Protection Policy Act became law).

I also spoke to Secretary Watt and told him that Secretaries Gorsuch and Pierce and the Council of Economic Advisers were opposed to this Act and were going to work for repeal. I asked if we could count on his help. He said: "If this act is as bad as you say, we certainly will be in opposition, but I don't presently know one thing about it."

Watt asked me to see Ray Arnett, his Undersecretary, which I did—and he likewise had known nothing about the Act.

The Nation has already paid a heavy price in human suffering and lost opportunities as a result of misguided policies and misplaced priorities adopted in the last 2 years. The recent disintegration of the administration's economic and environmental initiatives are tragic examples of the price we all must pay, now and into the future, for this administration's flare for applying simplistic ideological interpretations to complex public policy issues. This penchant for ideology is particularly dangerous when combined with the administration's difficulty in recognizing what can and cannot be inferred from objective analysis of facts.

Like all public officials actively involved in issues of importance to the agricultural sector and rural America, I have encountered, and probably have made myself some technically inaccurate statements regarding the rate, causes, and consequences of agricultural land conversion. I do not, however, attribute misstatements on agricultural land statistics to an orchestrated campaign to create public concern over a nonexistent problem.

The facts about agricultural land conversion, the limitations of available data on this diffuse national phenomenon, and prudent public policy recommendations to help minimize the loss of agricultural production capacity to conversion are spelled out clearly in detail, and unsensationally, in the final report of the national agricultural lands study (NALS). In addition, sound analyses are presented in the infamous House Republican Study Committee report on agricultural land, and in numerous other books, reports, and articles. For anyone interested in the issue, facts about conversion and reasonable analyses of the consequences of conversion are readily available.

I think it is appropriate at this point to recall some of the basic conclusions in the NALS final report:

A FINAL WORD

As a resource problem, the conversion of agricultural land does not constitute a present-day "crisis," and hence it lacks the equivalent of, say, a gasoline line for concentrating national attention. Nonetheless, it does pose some very serious long-term risks for the United States. In a sense, the issue of protecting agricultural and today is analagous to the energy conservation issue 10 years ago. Looking ahead, we can see a resource problem developing but the immediate incentives for conserving the resource are weak. NALS recommends that the federal government make the protection of good agricultural land a national policy.

BENEFITS FROM RETAILING AGRICULTURAL LAND IN FARM AND RANCH USE

Conversion of agricultural land to nonagricultural uses between now and 2000 will require additional adjustments within agriculture. For whatever level of demand and rate of gain in agricultural production that materializes, the effects of conversion over time will depend both on the acreage and the productivity of land converted to nonagricultural uses each year. The public and private costs of conversion are cumulative and will persist unless there are significant changes in the demand for U.S. agricultural products or in the rate of gain in average crop yields attained in America and around the world.

A number of benefits from retaining agricultural land for agricultural uses can be anticipated. Preserving productive cropland that otherwise would be converted will help mitigate upward pressure on production costs, and indirectly, consumer food prices. Protecting high quality cropland will also provide farmers and ranchers greater flexibility in conserving soil fertility, strengthen the nation's economy and international standing, and provide greater stability to the annual level of production in the U.S. agricultural sector. Moreover, these benefits will grow as farmers and ranchers move closer toward full utilization of agricultural resources. All things considered, agricultural land protection can be thought of as an insurance policy, one that will provide American farmers and ranchers—and the nation—with broader options to respond to an uncertain future.

Mr. Speaker, this Congress authorizes and appropriates billions of dollars annually for programs addressing poorly defined and inherently uncer-

tain objectives. In the areas of defense, education, research, and environmental regulation, to name a few, it is often very difficult, if not impossible, either to prove what will happen in the absence of Federal activities, or to reliably predict what will happen as a result of a given program initiative. We try to collectively make reasoned judgments regarding our Nation's needs and priorities, and pursue these through equitable and cost-effective programs.

My colleagues know all too well that we are not always able to correctly anticipate future needs, conflicts, and opportunities. A pertinent example is the fact that we continue to spend millions of Federal tax dollars to subsidize development projects on prime farmland, when other land not suited to agriculture is available nearby. We are paying twice for a lack of foresight and prudent planning, once with tax dollars and again in the rising economic costs of producing food, fiber, and other agricultural commodities. Congress responded to this problem by passing the Farmland Protection Policy Act, and I promise to provide the administration with a public forum and ample time to explain the problems it has encountered in its implementation.●

THE TELECOMMUNICATIONS FOR THE DISABLED ACT OF 1982

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. LONG of Maryland. Mr. Speaker, during the 97th Congress, I was pleased to join my colleague Representative TIM WIRTH in sponsoring the Telecommunications for the Disabled Act of 1982, to insure that hearing-impaired Americans can enjoy greater access to the telephone network in our Nation.

This bill, now Public Law 97-410, recognizes and begins to address a problem I have been pressing for years—the discrimination that hearing-impaired people suffer in the delivery of telephone services. It is the first step in eliminating this discrimination. My bill, H.R. 210, is the second step.

The critical need for my bill is cogently expressed by David Saks in his article, "Telephones for Hearing-Impaired Americans: The Second Step." I would like to share Mr. Saks' article with my colleagues:

TELEPHONES FOR HEARING-IMPAIRED AMERICANS: THE SECOND STEP

The 97th Congress enacted the first legislation in U.S. history to resolve some of the telecommunications problems of hearing-impaired people. PL 97-410 directs the FCC to assure that three categories of telephones are made compatible with hearing aids: coin-operated phones, phones for emergency use, and phones frequently needed by persons using hearing aids.

This contribution to the well-being of hearing-impaired people is enormous and will be remembered with gratitude. Hearing-impaired people now look to the current Congress to continue this course and take the second step toward eradicating discrimination in telephone service.

Hearing-impaired people, just as surely as non-impaired people, need the universal access to telephone service that is mandated by the Communications Act of 1934. The Act (PL 73-416—47 U.S. Code) declares as its purpose "to make available, so far as possible, to *all the people* of the United States a . . . communication service with adequate facilities at reasonable charges. . . ." In contrast, PL 97-410 requires only "reasonable access" for those using hearing aids. Is it necessary to argue the point that hearing-impaired people are among "all the people"?

In recognition of this intolerable inconsistency, and in recognition of the need to extend the coverage of PL 97-410, Congressman Clarence Long has introduced H.R. 210. This bill, if enacted into law, will build upon the foundation laid by PL 97-410. It will add one more category to the three that are required to be made accessible. H.R. 210 also answers the major concern expressed by industry: it leaves optional with industry the choice of technologies to be used, so long as the chosen method is equal to today's technology in benefits to hearing aid users.

For years Congressman Long has championed the cause of hearing-impaired people. He has sponsored legislation to make all *new* telephones usable with hearing aids—everywhere. Hundreds of thousands of hearing-impaired people lead limited lives because they reside in areas where all phones are hearing aid-*in*compatible. They must live without telephone service. Their lives are unnecessarily restricted—due to the failure of telephone companies in those areas to provide them with usable instruments.

Hearing aid compatible telephones in the United States number 135 to 140 million—living, ringing, communicating proof that telephone/hearing aid compatibility is technically feasible and economically profitable. Testimony by industry and consumer representatives before both House and Senate subcommittees on communications attest to the practicality and desirability of making all telephones hearing aid-compatible at the manufacturing stage—to technical standards that are to be adopted by the FCC under Public Law 97-410.

If H.R. 210 can be enacted during the 98th Congress, the 40 million or more hearing aid-incompatible telephones in our national network gradually will disappear—through attrition and through voluntary modifications by telephone operating companies. H.R. 210 involves no government expenditure; it requires no regulatory intervention; it satisfies the main concern of industry; it promises to bring a new, fuller life to hearing aid users.

If H.R. 210 can be enacted, hearing-impaired people will begin to share the precious freedom of communication now enjoyed by their nonimpaired neighbors.

The Organization for Use of the Telephone (OUT) urges it friends, and all friends of hearing-impaired people, to support Congressman Long's bill. Make H.R. 210 the second step on the road to equal access to our telecommunications network!●

MANHATTAN PROJECT SCIENTISTS ON NUCLEAR ARMAMENTS

HON. PAT WILLIAMS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. WILLIAMS of Montana. Mr. Speaker, not long ago I came across the following statement which was written and signed by scientists who, 40 years ago, worked on the Manhattan project.

These 70 people, 5 among them Nobel Prize winners, correctly understand that because they were present at the genesis of nuclear unleashing they bear a special responsibility to express their stark concern about the level and proliferation of nuclear armaments.

Their statements follow:

STATEMENT OF MANHATTAN PROJECT SCIENTISTS

The signers of this statement are scientists who came to the Manhattan Project at Los Alamos in its earliest days and who are now gathered to observe the fortieth anniversary of the opening of the Laboratory. We write this because we worked on the creation of the first nuclear bomb and therefore, even though the consequences and the concerns must be the same for all people equally, we feel a special sense of responsibility. We are appalled at the present level of the nuclear armaments of the nations of the world and we are profoundly frightened for the future of humanity.

The single crucial fact is that the two major world powers now possess a sufficiency of nuclear warheads and delivery systems to destroy each other and a significant part of the rest of the world many times over. Furthermore, in view of the massive overkill potential already achieved, the mobility of many launching systems, and the absence, after many years of research, of any credible defense, we see no conceivable probability of preventing, by any military action that could be taken, such total or near total destruction. This being so, considerations of possible comparative advantage to one side or the other in numbers of warheads or in megatonnage become irrelevant.

Our one hope is that both the United States and the Soviet Union will recognize the futility of trying to outbuild the other in nuclear strength and also the cataclysmic danger inherent in the effort to do so. We urge upon the leaders of both countries that this recognition be made a cornerstone of national policy and that it lead to the beginning of a mutually agreed upon reduction of nuclear armaments and, for all nations, to the ultimate goal of the total elimination of such weapons.

BLUEPRINT FOR CENSORSHIP

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. EDWARDS of California. Mr. Speaker, on March 11, 1983, the President issued a directive on safeguarding national security information. The directive will, among other things, greatly expand the use of polygraph tests by the Federal Government and increase the number of current and former employees compelled—for the rest of their lives, apparently—to submit writings or speeches to the Government for prior approval; that is, prepublication review, even if the subject matter is not classified. The House Judiciary Subcommittee on Civil and Constitutional Rights, which I chair, held two joint hearings with the House Post Office and Civil Service Subcommittee on Civil Service, chaired by Congresswoman PATRICIA SCHROEDER, on the implications of the directive. All of the nonadministration witnesses who testified at our hearings expressed concern regarding the scope of the directive. They were equally concerned about the thrust of the directive which taken in the context of other administration actions, is clearly aimed at stemming the free flow of information in this country.

The rationale given for the broad requirements of the directive is the claim that there has been a tremendous increase in leaks of classified information which has damaged the national security. However, the administration has yet to provide evidence of leaks which have caused such damage. Similarly, they have failed to demonstrate how the increased use of polygraphs and prepublication review will effectively decrease leaks of classified information.

I would like to share with my colleagues two editorials by the Washington Post, followed by an op-ed piece by David Broder, all of which capture the essence of the directive. The articles follow:

[From the Washington Post, Mar. 22, 1983]

BLUEPRINT FOR CENSORSHIP

The President has issued a new directive on "safeguarding national security information." The new rules purport "to reduce the frequency and seriousness of unlawful disclosures of classified information," but the manner in which this objective is to be achieved is startling in its sweep.

The directive is essentially in two parts. The first applies to all the tens of thousands of government employees who have security clearances that authorize them to see and use classified information. Divulging such information is already a crime, but prosecution is impractical, since it would necessarily involve discussing the secret information in open court, and no one has ever been successfully prosecuted. The administration now proposes to enforce the law another way. All federal employees having access to classified information must now sign a non-disclosure agreement as a condition of access. In investigating unauthorized disclosures, agencies may require anyone with access to such material to submit to a lie detector test. Refusal to take a polygraph test will result in sanctions which, at a minimum, permit the agency to deny future access to classified information to the employee in question, and may also include firing him.

Polygraph tests are thought by legal experts to be so unreliable that they are not admitted as evidence in federal courts. Under these new regulations, not only could flunking the test lead to dismissal, but refusing to submit to one could cost an employee his job. This is a significant expansion of a policy that now applies only to employees of the CIA and NSA and some in the departments of Justice and Defense.

The second part of the directive is even more astonishing. Federal employees with the highest level of clearance—those who are allowed access to "sensitive compartmented information" (SCI)—will be required to sign an agreement that includes a provision for prepublication review of any books, reports, studies, articles, lecture notes, even novels that they produce for the rest of their lives. All such material will have to be submitted in advance for clearance by the agency of agencies involved. Justice Department officials would not reveal the number of people who have SCI clearance, but they include thousands of the highest officials of the government. The sweep of this directive and the potential for censorship and abuse are appalling. Under the new regulations, many political figures will be subjected to censorship by those who succeed them in office. Pre-publication clearance of ordinary memoirs could take years; it covers all written material, whether or not classified information is involved. What devastating harm to the national security has been done to prompt such harsh proposals for controls? Why isn't Congress yelling its head off?

[From the Washington Post, May 3, 1983]

LIE DETECTOR MADNESS

It wasn't exactly surprising to learn that Dr. John F. Beary has reported that lie detector tests aren't a good way to determine whether someone is telling the truth: Dr. Beary is far from being the first eminent professional to make that judgment, and he won't be the last. His finding is noteworthy because it came in a report he made, as the acting assistant secretary of defense for health affairs, to Secretary of Defense Caspar Weinberger. Mr. Weinberger has before him two proposals for wider use of polygraph, or lie detector, testing, one initiated by the Pentagon itself and the other coming last month from President Reagan.

What's wrong with lie detector tests? What's wrong, as Dr. Beary explains, is that they measure stress rather than prevarication. So polygraph tests often misclassify truth-tellers as liars, and liars as truth-tellers. That's because some people show signs of stress even when they're telling the truth, while some cool-as-a-cucumber subjects can lie without skipping a heartbeat. That's why lie detector tests aren't admissible as evidence in court.

Despite all this, the president on March 11 ordered departments to draft regulations enabling them to require polygraph tests and to punish employees who refuse to submit to them. This goes far beyond even what the Pentagon has been considering since last fall; under its proposal, tests were still supposed to be voluntary, and adverse inferences were not supposed to be drawn against employees solely because of polygraph evidence. The argument is made that polygraph evidence is sometimes accurate. So is evidence obtained by voodoo, but that doesn't make it reliable enough for government to use.

Why is the Reagan administration ordering such widespread use of such an unreliable device? The aim, it is said, is to plug leaks. We'll stipulate that leaks are a serious problem, not only for an administration's political standing but occasionally for the national security as well. But we note that the government official in charge of these matters, director Steven Garfinkel of the Information Security Oversight Office, testified that only "half a dozen" leaks had been reported to his agency in the past three years, and that some of those did not result in stories in the press. And the head of the intergovernmental panel which recommended that the president order the measures that he did testified that "we have never suggested that it's a problem that has increased greatly in severity in recent years." So why this departure from longstanding practice? Why this reliance on an inherently faulty means of determining the truth?

Congress is looking into the matter, and perhaps the White House will have second thoughts. This is one issue on which we hope Mr. Weinberger and his colleagues will engage in a little constructive foot-dragging, in the hope that the White House comes to its senses.

[From the Washington Post, Mar. 16, 1983]

ONLY SOME LEAKS BUG PRESIDENTS

(By David S. Broder)

Nothing better illustrates the surrealistic, cracked-mirror character of government secrecy edicts than a pair of actions by President Reagan last week.

The president signed an executive order on Friday requiring all federal employees with security clearances—a number reaching into the hundreds of thousands—to submit to lie-detector tests in any investigation of leaked information, or suffer "adverse consequences" for refusing. On the very same day, he stonewalled a press conference question about leaks from his own senior staff that undermined the position of Environmental Protection Agency head Anne M. Burford in the days before her res-

ignation. "I don't know of anything of that kind," Reagan said.

As an example of high comedy, you could hardly improve on that script.

Every reporter in town knows that Reagan did not have to walk more than 50 feet from the Oval Office to find people in his employ who were leaking like crazy that Burford would have to go. "I know that you were all citing these unnamed White House sources that thought she would resign," he told reporters. "I still would like to find them out and identify them."

But he has not. Instead, he has issued the most sweeping secrecy edict in the history of the civil service. The seemingly misplaced emphasis reveals what no government—at least as long as I have worked in Washington—has ever wanted to acknowledge: what bugs a president is not leaks, but leaks from people who may disagree with him.

Time after time, in administration after administration, colleagues and I have sat in the office of some senior official who, promised anonymity, has divulged the substance of, or even read from, highly classified documents. The purpose, in almost every case, was to advance the president's policy line—in Vietnam, in some international negotiation, in some domestic political fight.

No, it's not the leaks that infuriate them. It's the leaks they don't control: the logs of private meetings with interested parties in regulatory matters, or evaluations of weapons systems that cast doubt on a multi-billion-dollar boondoggle. Those leaks, they say, are dangerous.

So be aware, dear reader, of what is really going to happen if Reagan is allowed to tie a lie-detector threat to the tail of every candid official of any standing. It will not stop the leaks. The president or his people will no more play by the rules of the executive order than the Reagan aides obeyed his supposedly serious order to stand by the embattled Burford. What the executive order will do is shut down your access to information that may contradict or cause you to question the policy judgments of the president and his aides.

It will increase substantially the risks for anyone—bureaucrat or journalist—who wants you to hear the other side of the policy argument from the one the president is peddling. And, while it lasts, it will increase the odds that the policy adopted will be worse than it would have been had the rules of debate—or leaking—been applied evenhandedly to friends and foes of the president's policy.●

COMMON SECURITY—A BLUEPRINT FOR SURVIVAL

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, periodically there have been moments of optimism, energetic endeavors, and success in our arms reduction history. Last week's House vote on the freeze was one such moment. But more often there have been frustration and disillusionment because we have only really been tinkering at the fringes of an insane and deadly situation. After almost every successful arms control agreement there is a renewed outburst of arms expenditures elsewhere. There has never been a time when successful arms control did not result in an increase in expenditures for arms—and that is suicide.

The philosopher, Albert Camus, understood this propensity toward suicide when he said:

> Probably every generation sees itself as charged with remaking the world. Mine, however, knows it will not remake the world. Its task is even greater; to keep the world from destroying itself.

I am convinced that the survival of the world depends a great deal upon our ability to formulate a multilateral, comprehensive approach to arms reduction—not just control. As a result, today I am reintroducing my bill, the common security resolution, which is based upon the joint statement of agreed principles for disarmament negotiations. Also known as the McCloy-Zorin agreement, this statement was initiated under President Eisenhower and negotiated successfully during the tenure of President Kennedy and two respected Republicans, John J. McCloy and Arther Dean. In December 1961, the U.N. General Assembly unanimously endorsed the statement.

This multilateral, comprehensive approach, endorsed by the United States, the U.S.S.R., and the United Nations, was the outcome of over 15 long and frustrating years of arms talks. The international climate following World War II was not nearly as favorable to arms control as that following World War I. After World War I, there was a deep disillusionment with war. Most members of the League of Nations—whose covenant included provisions strongly supporting disarmament—believed that the maintenance of peace required the reduction of national armaments to the lowest point consistent with national safety. This belief was supported by the belief that World War I was partly caused by a prior arms race between the participants.

Conversely, after World War II, weapons were widely regarded as necessary to prevent war. The proponents of this view argued that had the Western powers been strong enough to oppose Hitler early on, he would not have built up his armies, and peace would have been preserved. Force would control force. This emphasis on the use of force to prevent agression was soon intensified by the cold war, and is again being strongly promoted.

Throughout the late 1940's and 1950's, a propaganda war was waged while nuclear and conventional arms grew on both sides, heightening the danger. Proposals were bantered back and forth, yet little was accomplished except increased tensions. The Berlin crisis, the Bay of Pigs adventure, and a massive U.S. missile deployment program to counterbalance what was erroneously believed to be a large-scale Soviet ICBM deployment effort, all contributed to the increased East-West tensions in the early 1960's.

Nevertheless, the troubles of the 1960's also improved the climate for arms control. The Cuban missile crisis in particular made both sides realize the dangers of nuclear war and the difficulty of communication in such moments. This led to a series of individual steps. There emerged such measures as the hot line, the limited test ban, the Nonproliferation Treaty, and the Outer Space Treaty.

While some may consider selected negotiations to be successful, a price has been paid. Multilateral, comprehensive disarmament talks have been forestalled, and last summer came to a complete halt. Moreover, the individual negotiations have failed to come to grips with the control of new armaments as they were being built. Critical decisions, such as the H-bomb decision of 1950, the missile programs of the 1950's, and the MIRV program of the late 1960's, were hardly discussed at the arms control negotiations.

I do not want us to face relearning the bitter and disastrous lesson of an arms race propelling us toward war—perhaps truly a war to end all wars. Therefore my resolution calls for secure disarmament and a framework for the peaceful settlement of disputes. This resolution works in concern with other peace initiatives and encourages a multilateral disarmament agreement, binding upon all nations, and verified by an international body. Disarmament would proceed in phases, insuring that no country secures a military advantage over another.

I have incorporated into my proposal concepts from a May 1982 report by the Independent Commission on Disarmament and Security Issues entitled, "Common Security—a Blueprint for Survival." This report looks beyond superpower confrontations to the need to hold multilateral negotiations on nuclear arms reductions, the need to limit nonnuclear weapons of mass destruction, and the need to be concerned about the international buildup in conventional weapons. This report proposes concrete, constructive remedies, and I recommend it to anyone interested in what more can be done to achieve worldwide disarmament.

The significant contributions—including the name of this resolution—made by the Commission should be a starting point in the process of achieving true international security and genuine disarmament. The Chairman of the Commission, Olaf Palme, former Prime Minister of Sweden, deserves much credit. Other notables include Cyrus Vance, former Secretary of State of the United States, George

Arbatov, member of the Soviet Central Committee and Deputy of the Supreme Soviet, David Owen, former Secretary of State for Great Britain, and many other experts.

The common security resolution would require verification of disarmament, promote institutions dedicated to peaceful resolutions of disputes, and require the peaceful development of space. Initiatives of this type are not utopian dreams but constructive proposals to insure common security and our very survival. Of course passage of the common security resolution cannot, by itself, bring peace or remove the threat of nuclear war. We can and we must develop the means to halt the global arms race, defuse political crises, and insure the peaceful resolution of conflicts. The technology of global destruction is with us and the alleviation of that technology can only occur through social technology—learning to trust and understand each other for our mutual benefit and that of future generations.

As Jonathan Schell explained in his book, "The Fate of the Earth":

> Nuclear peril threatens life, above all, not at the level of individuals, who already live under the sway of death, but at the level of everything that individuals hold in common. Death cuts off life; extinction cuts off birth . . . In extinction, a darkness falls over the world not because the lights have gone out but because the eyes that behold the light have been closed.

Let us not wait for the political and military tensions to mount beyond our grasp. Let us begin to develop the new social technologies we will need for our, and our children's, survival. Let us permit future eyes to behold the light—and the promise of lasting peace. I encourage my colleagues to join me, along with 26 cosponsors, in this significant first step toward peace.●

POLISH CONSTITUTION

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 3, 1983

● Mr. SIMON. Mr. Speaker, I am pleased that our colleague, Representative BILL LIPINSKI, is calling the Nation's attention to Polish Constitutional Day. It is also a good time to note that our new colleague, who previously had service in the Chicago City Council, is off to a good, solid start in the House, and we have every reason to believe that he is going to be contributing significantly, not only to the people of his district, but to the Nation.

Polish Constitutional Day is good day to remind ourselves of the great contribution that the Polish people have made to world culture and also to remind ourselves of the problems that continue to plague the people of Poland. They do not have the freedom that we would like to see them have, and the tragic difficulties of the Solidarity group are a good illustration of that.

The nation which has given us Chopin, Paderewski, and Pope John Paul II, has contributed immensely in other ways far too significant to be outlined in a few remarks here on the floor of the House. But we should note on this anniversary of the Polish Constitution that contribution and also note with sadness of heart that freedom is not now one of the possessions of the Polish people.●

"THE CRISCO KID: HE'LL STEAL YOUR HEART"

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. FUQUA. Mr. Speaker:

> There are a few books everyone should read, a few poems everyone should know by heart, a handful of songs we all should sing. And, on rare occasions, along comes an inspiring television show everyone should watch.

Those words written by Frederick Burger of the Miami Herald in November 1981 express the thoughts of so many of us who have been privileged to view the award winning 30-minute documentary; "The Crisco Kid: He'll Steal Your Heart."

Burger said:

> It is a deceptively complex story, even though most of us have either known or read about such courageous and delightful children as Michael Ray Hammond, who was born with a rare crippling disease and lived only 10 years.
>
> Much of the time we manage to ignore their plight, just as we overlook the pain and suffering and starvation that is endured by so many helpless people . . .
>
> In its way, the story of this little boy is a dramatic unsettling reminder of these shortcomings.

When I determined to bring this marvelous film to the attention of my colleagues in Congress, I wanted to say three things.

The first is to pay tribute to a brave little boy who never knew much joy, suffered incredible pain, and yet his indomitable spirit has and is raising the hearts and spirits of tens upon tens of thousands of people who never knew him personally.

Second, this is television at its best, this powerful documentary demonstrates better than any film I have ever seen how much power this medium has to inspire and inform.

And, finally, I think the severity of Michael's affliction will touch the hearts of millions at the plight of the afflicted and the handicapped—pointing out vividly how much needs to be done to see that others do not have to suffer as Michael did.

Michael Hammond was born 10 days before Christmas in 1970 with a severe case of epidermolysis bullosos, an incurable disease. It occurs in 1 in 50,000 births. He died Feburary 14, 1981.

The disease—referred to as EB—raises external and internal blisters and running sores for which medical science has no known cure. Because of the sores, the skin has no defense against infection.

Michael had one of the most severe cases. The blisters and sores on his body were with him always, hardly an hour of his life was spent without excruciating pain. With this disease, the sufferer suffers agony with the slightest bump or jolt. The blisters caused scarring, which webbed Michael's hands and feet.

This was a little boy who loved a great deal but who could not be hugged by those who loved him the most—two brothers, a sister, and his mother.

Michael was so badly afflicted that he was thought to be mentally handicapped. He wasn't, but the early diagnosis did slow down his normal development so that by the time he was 3, he had the physical and mental abilities of a 6-month-old.

This caused him to be admitted to Sunland Training Center in Gainesville, Fla., then in my district, one of the six State facilities designed to care for the mentally handicapped. It was here that nurses and doctors discovered that Michael's pain could be soothed by caking Crisco on the bandages that wrapped his tiny body.

As has been reported, but is not part of the show, Michael qualified for State care primarily because of the incorrect diagnosis of his mental abilities.

"Crisco Kid" gives us an intimate and moving look at the joy and pain of Michael's life and personality. We see him being tenderly bathed, crying out in agony even when water is gently passed on his ravaged body, we see him cheerfully touring the hospital in his electric wheelchair, checking in on other patients. We see him listening to records sent by his idol, Johnny Cash, whose ballads beautifully punctuate the show, and we see Cash talking about how inspiring the little fellow was.

We see Dr. Charles Williams, the hospital's medical director, discussing the effect that Michael's life had on millions of people, many of whom wrote letters telling him so.

Jeanne Wolf of Pentacom Productions in Miami, Fla., produced this program. She told us in a letter that:

> Like thousands of others, I read in the newspapers about Michael's valiant attempt to fight his rare disease. The Crisco Kid is a program I just had to make—I felt it was important to share the story of this little

boy who had never really been able to be hugged. Michael touched the lives of everyone who worked on the project.

And when you are privileged to see the film you know the meaning of the word "love."

Producing the show, like the subject, was a matter of faith and perseverence. When Wolf began trying to raise money for the production, she was turned down by 50 corporations which are usually anxious to underwrite public broadcasting station programs. The Corporation for Public Broadcasting ultimately gave Wolf a $15,000 grant. South Carolina Educational Television defrayed the other expenses.

And it is my considered opinion that future generations will thank them for their efforts. This program will never be a blockbuster on the screen; it is too sensitive and it hurts too much to see the suffering in this little boy's eyes. But, because of those efforts, and because of this one short life, millions for time to come are going to be uplifted and inspired.

It is fitting that the premiere should have been held at the White House. It was. Michael Hammond moved a packed house to tears in the President's private theater when it was first shown in October 1981.

The showing was a moving public television contribution to the "International Year of the Disabled."

Don Meiklejohn, who reports from Washington for a group of New York Times' Florida newspapers, including the Lake City Reporter in my district was there. He wrote a moving column. I would like to share a bit of what he said:

It is an unsettling experience, even second-hand, to gaze through a teary eye and see immortality in the sore-scarred face of a 10-year-old boy who is about to die.

But that's what happened to a roomful of people in the White House film room Monday. Some had shared that experience first-hand as they watched a tenacious little Florida boy named Michael Ray Hammond fight for life for 10 years before his heart gave out. Others were exposed for the first time through a film, "The Crisco Kid: He'll Steal Your Heart."

On film or in person, the impact was the same: The steady uncompromising gaze of a little boy, as portrayed in still pictures by Gainesville Sun photographer Carla Hotvedt-Horne and in moving pictures filmed for a South Carolina Educational TV documentary. It is a gaze that seemed to speak a universal truth.

Three Gainesville nurses, who were closest to the boy during his ordeal, were there and tried to put it into words.

Carolyn Steadham, chief nurse at Gainesville's Sunland Training Center, said, "He gave us an appreciation for what we have in life and often overlook . . . He is the elephant man of our time."

Ollie Morris, one of his nurses, told how Michael liked her to smoke cigarettes so he could smell the smoke. It was his way of being a little naughty like other 10-year-old boys. "He made me a better person," she said.

Florence Strickland said, after nursing Michael and watching him confront pain, "I'll never complain anymore."

The documentary was previewed in the White House film room, where the president and friends watch their favorite movies, and when it ended there was silence, perhaps the perfect tribute.

The story that originally introduced Michael to the outside world appeared in the Gainesville Sun and was written by Maryfran Johnson. It included the haunting photography of Hotvedt-Horne. The portrait shows Michael staring into the camera and his body covered with blisters and sores.

The medical staff found that the pain could be relieved by the application of bandages smothered in Crisco shortening, a home remedy suggested by a person who had heard about the boy. His tiny body, the size of a 3- or 4-year old, was coated twice daily and wrapped in gauze.

The story is told in the words of people closest to Michael, particularly his mother, Doris Guy of Jasper. In moving interviews, this brave lady points out the long path she traveled as she refused to accept hopelessness or despair.

In the film opening, Johnny Cash, famed country music singer, says, "Michael makes me feel better."

The nurses who cared for Michael would tell him he looked like his idol, Cash, when they combed his hair. It made him happy.

Cash had called Michael after reading about him in the newspapers:

Despite the pain, Michael, whose feet and hands were almost club-like because of the disease, maintained a remarkably cheerful attitude. In his last year, he drove about the hospital in a motorized wheelchair, purchased with donations that came pouring in after his story appeared on TV and in newspapers around the world.

Besides being honored with the special preview at the White House, the film has won numerous honors. It was cited for merit by the Chicago Film Festival and won a gold medal in the International Film and TV Festival of New York.

In every festival in which the program has been entered, it has been in the network documentary category, which means this simply told story has been judged along with programs created by national network news and documentary departments.

I am particularly proud to report that the film was honored at the Alfred I. duPont-Columbia University awards program this year. Along with the George Foster Peabody Awards, they are the most prestigious in the field.

The film was selected among the 33 finalists and was awarded a citation. This is a remarkable tribute when one realizes that these finalists were selected from among the 1,100 submissions from radio and television news directors and producers from across the country.

As the film nears its conclusion, we see Michael praying:

Now I lay me down to sleep. I pray the Lord my soul to keep. If I should die before I wake, I pray the Lord my soul to take. God Bless . . .

And then we hear:

On Valentine's Day, Michael's mother came to deliver a card from his little sister. He seemed to be waiting for her. He was exceptionally quiet. A short while later, he breathed his last breaths. The doctors felt it was heart failure, but Doris said, "I guess it was finally too much for him. At least he's not hurting anymore."

And Michael concludes his prayer:

And God bless Brian for coming. And Roger Wilchock's sores get well, Michael's sores get well. And all the sick children in the world. Amen.

Michael will live on because of this film. Because of his life, others are going to be moved to help others. In 10 short years, he moved thousands who heard about his courage and determination. Now that he has slipped from our midst, he still inspires and encourages tens of thousands.

It seems fitting that we remember the words of the Wizard of Oz in another memorable film when he said,

It is not so much how much we love, but how much we are loved.

Michael, you were, and you continue to be loved.●

U.S. POLICY IN CENTRAL AMERICA

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. JEFFORDS. Mr. Speaker, the debate over U.S. policy in Central America continues to be on the front pages of our newspapers every day. I am extremely proud of the fact that my State of Vermont has played an active role in this debate.

I am reprinting below for the benefit of my colleagues and editorial from the Burlington Free Press which is indicative of the level of concern in Vermont on this issue. As the editorial points out, our policy must take into account the domestic causes for instability in Central America while not ignoring the importance of outside influences.

UNITED STATES SHOULD STAY OUT OF NICARAGUA'S AFFAIRS

U.S. diplomacy in Latin America has for years been victim of the belief that countries in the region whose governments do not conform to Washington's standards should be regarded as hostile and subjected to pressures to change.

It is a vestige of this country's colonial era in the late 19th and early 20th century when Presidents and lawmakers thought that nations south of the border were mere

U.S. fiefdoms to be controlled and manipulated to serve the best interests of their large northern neighbor. Somehow the mistaken notion that Latin Americans are this country's children apparently still persists among many policymakers in Washington. It is a dangerous policy which can antagonize friends and foes in the region.

It is ironic too that those who zealously defend the rights of nations in other parts of the world to chart their destinies suddenly develop a severe case of myopia when it comes to conceding the nations of Latin America the same right of self-determination.

To prove that the failure of U.S. foreign policy in Latin America is not a recent phenomenon, it is only necessary to recall the abortive Bay of Pigs episode in Cuba over two decades ago. That fiasco, orchestrated with the covert support of Washington, was a classic example of muddled thinking and planning which could only result in a heightening of tensions between this country and Cuba. And it sent an unmistakable message to other nations in the region about U.S. intentions.

Now attention is focused on Nicaragua. Charges have been made that the Reagan administration is providing covert support for anti-Sandinista guerrillas in their attempt to overthrow the Nicaraguan government. There are persistent reports that U.S. military advisers are training the insurgents and are using U.S. weapons.

Sens. Patrick Moynihan, New York, vice chairman of the Senate Intelligence Committee, and Patrick J. Leahy, Vermont, a committee member, have said the Reagan administration may be violating U.S. law and a 1948 pact by supporting the guerrillas in the guise of intellgence activities. Under the Boland amendment, passed by Congress last September, money appropriated for intelligence work may not be used "for the purpose of overthrowing the government of Nicaragua or provoking a military exchange between Nicaragua and Honduras." Signatories to the pact which established the Organization of American States in 1948 agreed not to interfere in each other's internal affairs.

"If one is to believe the detailed accounts seen in the press in recent days, the administration is actively supporting, and perhaps even guiding, a large-scale anti-Sandinista guerrilla movement now involved in open combat inside Nicaragua," Leahy said.

While Moynihan acknowledged that the Sandinista regime in Nicaragua was going the way of other totalitarian regimes, he said, "Nevertheless, the law is the law."

"You may not like the law," Leahy said. "You may not agree with the law. But it is the duty of the executive to enforce it, and the duty of Congress to see that it is being enforced."

Sen. Howard H. Baker, Jr., Tenn., Senate majority leader, said many of his colleagues are deeply worried about reports that the Reagan administration is actively supporting the guerrilla movement in Nicaragua. He said he planned to go over the reports with the bipartisan leadership of the intelligence committee.

The White House has refused to discuss the nature of U.S. involvement and has maintained it is "complying with the law."

If reports of U.S. activity are verified, however, Congress must take immediate steps to stop the intervention and draw up stronger legislation designed to prevent such conduct in other Latin American nations.

President Reagan should not be allowed to decide which laws he will obey and which ones he will disregard.

More importantly, however, U.S. foreign policy toward Latin America should be scrutinized with an eye to a shift away from the interventionist diplomacy of the past to a hands-off approach which will allow the people of the region to map their own destinies.

This country should no longer play the role of big daddy by deciding the types of governments it wants in Latin America.●

TO HONOR RABBI HILLEL COHN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, I rise to join my friends and constituents in honoring one of San Bernardino's most respected and civic-minded citizens, Rabbi Hillel Cohn.

For 20 years Rabbi Cohn has not only ministered to the needs of his congregation, but has turned good words into deeds by involving himself in a wide variety of civic and social organizations.

He has been a board member on the San Bernardino Area Mental Health Association and Family Service Agency. The Inland Area Urban League-Planned Parenthood, San Bernardino Community Hospital, and the American Red Cross. To just name a few.

The Rabbi is a noted and sought after speaker. His sermons have been published and he is a frequent participant on local religious radio programs.

His enthusiasm for good works is matched by education and dedication. While at UCLA Rabbi Cohn received his degree in political science. He received not only rabbinical training at Hebrew Union College in Cincinnati, but a master of arts and bachelor of Hebrew letters as well. In his spare time he served his congregation as well as the Jewish inmates at the Marion Correctional Institution of the Ohio State Prison system. Today Hillel Cohn is a doctoral candidate at the School of Theology at Claremont.

He has received a variety of awards and honors in his lifetime—from outstanding Young Man of the Year for San Bernardino by the jaycees, to recognition from the National Association of Temple Educators for the best religious school curriculum design in the country.

It is indeed a pleasure for me to join with his wife and children Elana and Marc and the congregation of Emanu El to recognize his sensitivity and awareness of community needs and to thank him for 20 years of dedicated service to others.●

VFW VOICE OF DEMOCRACY CONTEST WINNER

HON. HARLEY O. STAGGERS, JR.

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. STAGGERS. Mr. Speaker, it is with a sincere feeling of pride that I address you today. I have the pleasure of entering into the CONGRESSIONAL RECORD the winning speech in the West Virginia Veterans of Foreign Wars Voice of Democracy Contest. This speech is the work of Ms. Brenda Sue Curry of Neola, W. Va.

As you know, Mr. Speaker, we continually strive to involve young people in the workings of our Government. I believe that Ms. Curry is a fine example of our Nation's youth and what they can and will accomplish.

In this light and in the proud West Virginia spirit, I offer to you the speech of Ms. Brenda Sue Curry.

WEST VIRGINIA WINNER

It seems everyone has an opinion as to where the strength of America lies. Some would have us believe it is its military might, others its electoral process, or its judicial system, or its technology, or its industrial complex; and still others would suggest it is its free enterprise. But in reality the root difference between totalitarianism and democracy is the role of the individual. In the former there are no individuals; in a democracy, there can be no substitute—and therein lies America's strength.

Benjamin Franklin was just one person; but he gave us electricity. Alexander Bell was just one person; but he gave us the telephone. Thomas Edison, just one person, gave us light. Albert Einstein, one person, opened to the world the universe. Abraham Lincoln was just one person; but he gave us an ethic. In today's youth lie the Bells, the Edisons, the Einsteins, and the Lincolns of tomorrow.

If one person can change the world around him, then many can be an overwhelming force for positive growth. A force needs direction and harnessing; education gives that direction. To be educated is to understand the democratic ideal, and our country provides unparallel opportunities for learning. When joined with the vision and vitality of youth, America will make immeasurable strides in all fields, but this must also be the "result of a long sequence of shared experiences, efforts, and endeavors" [1] with adults. For as the "young . . . shall see visions" [2] they must in turn look to the adults for guidance and leadership, for "no man is an island . . ., (we are all) part of the main" [3]. However, adults find themselves caught in the vortex of a technology and a technological revolution that makes the complexities of the Industrial Revolution pale in comparison—and massive retraining is seldom a workable solution, so they must turn to the youth.

Youth are prepared to accept their future responsibilities. High school graduations are

[1] Napoleon Bonapart (1803) as quoted in J. Christopher Herold, The Mind of Napoleon (1955).

[2] Joel 2:28.

[3] John Donne, "Meditation XVII", in his Devotions upon Emergent Occasions (1624).

increasing; college and technological school enrollments are at peak levels. A familiarity with computers and complex equipment is becoming evident in all grades of the school systems, and because of mass media, youth are more aware of the political intricacies of world peoples and cultures than their counterparts of twenty years ago.

Youth have faith in America and are excited about its future. America needs their skills and dedication to continue its tradition of progress; and so, coupled together—the vision of youth and the leadership of adults—lies the impregnable bond that gives America its strength.●

U.S. POLICY IN CENTRAL AMERICA

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. OTTINGER. Mr. Speaker, I would like to take this opportunity to share with my colleagues two articles on U.S. policy in Central America. I strongly agree with the statements of both Robert White, in "Perilous Latin Policy," and Tom Wicker, in "Weighing the Threat," and I encourage my colleagues to seriously consider these articles.

[From the New York Times, May 2, 1983]

PERILOUS LATIN POLICY

(By Robert E. White)

WASHINGTON.—President Reagan's speech to congress last Wednesday signals his determination to pursue the course—based on a disastrous self-fulfilling prophecy—he has followed in Central America since coming to office. Instead of trying to contrain unrest in Nicaragua and El Salvador, the Administration is apparently going to continue to spread unpheaval throughout the region.

The Administration has made a definitive break with the diplomatic principles of respect for sovereignty, territorial integrity and nonintervention. Instead, it has directed its resources toward strengthening the Central American military and fighting an ill-defined "Communist threat" with huge Central Intelligence Agency stations and large numbers of military advisers. The result has been to encourage precisely the threat that the President hoped to stop.

To grasp why the Administration sponsored an invasion of Nicaragua from Honduras, look to El Salvador. Many key foregin policy aides understand that the brutal and corrupt Salvadoran Government is falling apart and that no amount of military assistance will enable it to contain the revolutionaries. Yet the White House firmly rejects any direct parleys with guerrillas. Instead, Washington is determined to create an ill-starred region-wide military battle—hoping in the end to negotiate a region-wide solution on its own terms.

The campaign began in earnest this spring when the Pentagon conducted joint military exercises with Honduras along the Honduran-Nicaraguan frontier and the Honduran military strongman, Gen. Gustavo Alvarez Martinez, announced that co-existence with Nicaragua was no longer possible. By that time, several thousand Nicaraguan counter-revolutionaries, trained, armed and funded by the C.I.A., occupied camps on the Honduran side of the border. In early March, these forces, known as *contras*, invaded Nicaragua.

The true intent of the Administration, in supporting the *contras*, may have been neither to overthrow the Sandinists nor, as Mr. Reagan claimed, to interdict the negligible trickle of arms from Nicaragua to El Salvador. Rather, I believe, the invasion was part of a systematic plan to provoke the Sandinists to cross the Honduran border and attack the counter-revolutionaries' base camps. Honduran troops were poised to repel the invaders and enter Nicaragua in hot pursuit—creating a border war. But even the hot-headed and inexperienced Sandinists refused to fall into so obvious a trap. They ordered their troops to stay well clear of the Honduran border and reiterated their offer to negotiate with Honduras or the United States. Neither country has taken up the offer—and instead both have continued to aid the *contras*.

It is in Honduras, the poorest country in the region, that the worst effects of the Reagan policy may be seen. In the face of widespread misery and despair, many Hondurans oppose their Government's militaristic policies, demanding deep political, economic and social changes. These dissidents are now treated as subversives, and, for the first time in its history, the Honduran military has begun to abduct and kill labor union leaders, intellectuals and others who dissent from official policy. This is the way revolution took hold in El Salvador—with popular outrage against officially sponsored disappearances.

The Administration accuses Nicaragua of exporting revolution to Honduras. In fact, the exact opposite is true. In obedience to our policy, Honduras has become embroiled in militaristic counter-revolution—and is attempting to export it.

The Administration must learn that counter-revolution is precisely the wrong response to a people determined to take power and transform their countries. Our policy toward the region must take into account the security interests of the United States. But where is it written that the people of Central America must remain in bondage so that the United States can remain free?

Do the Reagan policy-makers truly fear that Nicaragua will end up identified with the Soviet Union and Cuba? Or do they fear precisely the opposite—that if we pursued a less aggressive policy, Nicaragua might emerge not as a Soviet lackey but as a nonaligned country? Do we reject negotiations in El Salvador because our policy is based on continued military domination of that country? Do we perhaps reject the consistent offers of good offices from Latin American democratic leaders to help bring peace to Central America because we seek primarily military solutions to political, economic and social problems?

As we examine our actions in Central America, we should recall Florence Nightingale's words: "The first responsibility of a hospital is not to spread disease."

[From the New York Times, Apr. 29, 1983]

WEIGHING THE THREAT

(By Tom Wicker)

WASHINGTON.—The man who led the opposition to returning the Panama Canal Zone to the people of Panama has now urged other Americans to recognize the importance of Central America and to accept the "moral responsibility" of supporting the independence and freedom of its peoples.

If Ronald Reagan's position on the Canal treaties had prevailed, Panama might well be added today to the list of Central American nations torn by strife and insurgency, and the United States' position in the Caribbean and Latin America would be far less favorable than it is.

Mr. Reagan's concern, therefore, seems to be less for the rights of *campesinos* or for territorial integrity than for the Marxist threat to the security of the United States that he has suddenly discerned in El Salvador and Nicaragua. But this was not the only contradiction or confusion in his speech on the subject to a joint session of Congress.

He suggested, for example, that "democracy is beginning to take root" in El Salvador, citing last year's elections and the beginning of a land reform program. But he devoted only one sentence to El Salvador's "major problems regarding human rights, the criminal justice system and the violence against noncombatants." Other competent observers see these as primary reasons why the government has been unable to establish control of the countryside.

Ambassador Deane R. Hinton, on the day before Mr. Reagan's speech, told The Washington Post that putting an end to the human rights abuses of the Salvadoran military is "a question, in my view, of years," perhaps a decade, until "generational change" makes over the officer corps.

As for last year's elections, Mr. Hinton acknowledged that only the influence of the military had caused the elected assembly to reject the right-wing leader, Roberto D'Aubuisson, and to choose the centrist Alvaro Magaña as president. The military forced the choice of Mr. Magaña only because the United States threatened to cut off aid if they did not.

The rooting of democracy in El Salvador does not seem, therefore quite as certain as Mr. Reagan pictured it; but on good authority, the violence and human rights abuses he barely mentioned seem likely to continue for some time. Nor did he have much to say, or any new proposals, on the subjects of poverty and injustice—without which, as Senator Dodd pointed out in the Democrats response, "There would be nothing for the Soviets to exploit" in Central America.

Turning to Nicaragua, Mr. Reagan presented what sounded like nothing so much as a bill of particulars for a declaration of war. But instead of asking for such a declaration, he conceded that the United States was waging covert war against Nicaragua to "prevent the flow of arms" to El Salvador and to stop "the export of subversion and violence."

Whatever Nicaragua's sins, such a covert war is in violation of international law and regional agreements—perhaps also of U.S. law. And wherever the Salvadoran insurgents get their arms—Drew Middleton, The New York Times' military correspondent, recently wrote from El Salvador that they capture most of them from Government forces—a covert war in Nicaragua is not likely to put an end to a civil war in El Salvador.

Mr. Reagan also permitted himself some devious polemical flourishes, to wit:

"Must we accept the destabilization of an entire region from the Panama Canal to Mexico on our Southern border?

"Must we sit by while independent nations of this hemisphere are integrated into the most aggressive empire the modern world has ever seen?"

Of course not. But Americans who are just beginning to focus on Central America should be advised that these are not clear and present dangers; they are Mr. Reagan's nightmares. Increased military aid may not be the only or the best way to stop them from coming true.

The deepest contradiction in the President's televised address, however, arose from his declaration that "there is no thought of sending American combat troops to Central America." If "the national security of all the Americas," including the United States, is "at stake in Central America," if "we cannot expect to prevail elsewhere" if we're unable to "defend ourselves" in Central America, if failure to keep that region from falling to Communism would destroy United States credibility and threaten United States alliances including NATO, then how can Mr. Reagan pledge not to send troops to fight in Central America?

That's the Vietnam trap all over again. If the nation's vital interests are so deeply threatened, no responsible President can rely on a weak and uncertain ally to defend them, or exclude the use of U.S. forces in extremity. In weighing the true gravity of the threat in Central America, Congress must not lose sight of that truth.●

THE WING FAMILY

HON. CHARLES PASHAYAN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. PASHAYAN. Mr. Speaker, the United States has been called, correctly, a nation of immigrants.

Over 100 years ago people from mainland China began to settle in the city of Hanford, Calif., bringing with them the rich heritage of their culture, and adding their skills and talents to the task of building this Nation.

Exactly 100 years ago one of these Chinese immigrants, Gong Shu Wing, opened in Hanford a restaurant that was the forerunner of an establishment that in the same city and operated by his son, Richard Wing, has gained an international reputation for gourmet food.

As Gong Shu Wing's family grew up, his sons gained skills and knowledge that today give their restaurant, the Imperial Dynasty, its international reputation.

Richard Wing, who served as a special security officer to Gen. George C. Marshall during World War II, took advantage of his service in Europe and the Far East to meet famous chefs and to hone his culinary skills.

Richard Wing's late brother built the restaurant's famous wine cellar, studying with Italian families in California's Napa Valley.

Richard Wing has been singled out for culinary honors by such prestigious organizations as the American Academy of Chefs, the Chevaliers Du Tastevin, the Chefs de Cuisine Association of California, and the California Wine Patrons. He has received two separate Cordon Bleu Awards for best dinner from the International Wine and Food Society, and was one of the first four chefs in the United States—and the only one from the west coast—named to the exclusive Black Hat Society.

The Escargot Society recently informed Mr. Wing that the Imperial Dynasty has served more gourmet snails than any other restaurant in the United States.

The world class reputation of the Imperial Dynasty has made it the top reason to visit the city of Hanford, according to that city's chamber of commerce. Those visitors have included many notables, gourmets, and lovers of fine food.

Other members of the Wing family help in the effort to make the family business a success and to contribute to the rich cultural mix of the city of Hanford.●

DOES EL SALVADOR DESERVE MORE MILITARY AID?

HON. ROBERT W. KASTENMEIER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. KASTENMEIER. Mr. Speaker, as we consider the President's request for additional military assistance for El Salvador, I recommend that our colleagues take the time to read the report appearing in the April 28, 1983, New England Journal of Medicine on the campaign of persecution and terrorism waged by Salvadoran security forces against those in the health professions in El Salvador.

SPECIAL REPORT—MEDICAL MISSION REPORT ON EL SALVADOR

Alarmed by reports of the harassment, murder, and disappearance of doctors, dentists, nurses, members of the medical faculty, social and physical scientists, and members of related health professions, the National Academy of Sciences, the Institute of Medicine, the American Association for the Advancement of Science, the New York Academy of Sciences, and the International League for Human Rights cosponsored a medical mission* to San Salvador. The mission's purpose was to determine the fate of those professionals and to assess the impact of conditions in El Salvador on medical institutions and on the health of the people.

From January 11 through January 15, 1983, we spoke with people from a wide range of backgrounds: government officials, the archbishop and others in the Catholic Church, members of the International Committee of the Red Cross, officials in the Ministry of Health, members of nongovernmental human-rights organizations, political prisoners, and numerous private citizens, including the families of victims. We also visited four places of detention for political prisoners, two refugee camps and the public maternity hospital (Maternidad). Wherever we turned we found the chilling effects of the ever-widening devastation to health and health care that has been caused by the breakdown of education, the slashing of budgets for national health programs, and the repression of humans beings by the systematic use of terror in ways that are hideous and frightful.

The persecution of health personnel is real. It began in 1979 and intensified through 1981, when a group of doctors, nurses, and medical students protested the killing and kidnapping of patients and doctors in hospitals—sometimes even during surgery. Retaliation against this group by death squads, suspected of being government forces, was swift and brutal. The group's members "disappeared," or fled to avoid death, or were killed.

We came to El Salvador with a list of 20 health workers and scientists who had disappeared in the previous 12 months. Our investigation revealed that only seven could be accounted for: four were in prison, two had been freed, and one was confined to a mental hospital outside the country. There was no trace of the other 13. Moreover, while in San Salvador we were given documentation on the disappearance of 20 additional health workers during 1982. From frightened families and colleagues we also learned of a number of other physicians, nurses, and paramedics who had disappeared or been killed. Since merely notifying the Church and independent human-rights groups of a relative's disappearance can jeopardize the whole family, statistics on disappearances are minimal.

Early in our visit we interviewed the colonels who command the two branches of the security forces—the National Police and the Treasury Police—and the information we gained was unsettling. We learned that there was no central registry of arrests or of the disposition of those who were arrested and no sharing of information between the two armed police forces; they therefore had no knowledge of the persons whose names we gave them. At our request we were shown the detention facilities where political prisoners, including the four medical students on our list, are held for up to 15 days or longer. At the National Police headquarters we walked along a row of foul, pitch-black, steel-barred cells furnished with only a concrete bench and a hole in the floor for a latrine. Led by Colonel Lopez Nuila, the commander of the National Police, and followed closely by two guards with M-16 rifles, we were forbidden to speak with or examine the dirty, haggard political prisoners.

In July 1982, the International Committee of the Red Cross threatened to leave El Salvador because of its growing concern over human-rights abuses by the Salvadoran armed forces—particularly their practice of not taking prisoners alive. Officials of the International Red Cross told us that, although these problems have not been resolved, they have decided to remain in the country because, on balance, they believe they are a force for decent human behavior.

Health and health care in El Salvador have suffered since 1979 even more than would have been expected in a poor developing country. The rate of endemic diseases is rising dramatically, as social programs are sacrificed so that funds can be allocated to

*The participants were Alfred Gellhorn, M.D., visiting professor, Harvard School of Public Health; Robert Lawrence, M.D., director, Department of Medicine, Cambridge Hospital; Kathie McCleskey, American Association for the Advancement of Science; and Nina Shea, J.D., International League for Human Rights.

the military. Infant mortality is climbing, the rate of suspected tuberculosis (unverifiable because of a shortage of x-ray film and equipment) is increasing, and there is a high prevalence of measles, diphtheria, and polio because there are no toxoids or vaccines. Malnutrition and skin and intestinal-tract parasites add to the toll.

The Ministry of Health has suffered a 50 per cent reduction in its budget during each of the past two years and is finding it difficult if not impossible to provide adequate staff and medical services for the 6000 beds under its jurisdiction. We visited the only public maternity hospital in San Salvador, a facility that has 75 deliveries each day but only 263 beds. The patient turnover is very rapid, but even so, up to three women are assigned to a single bed. Premature births are common, but none of the bassinets for premature babies is functional. The x-ray equipment is obsolete, there is no x-ray film, and the pharmacy shelves are thinly supplied; the anesthesia equipment is outdated and unsafe, but it is used for the 5 to 10 cesarean sections that are performed daily. Dr. Roberto Rivera Martelli, a senior obstetrician who was our host at the hospital, and a man deeply committed to the care of the poor, was taken from this clinic on February 10 (less than a month after our visit with him) by three armed men in civilian clothes and has not been heard from since. Since then, cables have been sent to our embassy in San Salvador and to the colonels who head the National and Treasury Police by our sponsoring organizations, members of the U.S. Senate, the Human Rights Division of the State Department, and individual U.S. citizens, but Dr. Rivera Martelli remains "disappeared."

The public educational system in San Salvador is in disarray. The large number of schoolteachers and members of the university faculty (including medical school professors) who have disappeared, been imprisoned as political prisoners, or fled the country has depleted the educational establishment. No professors of basic medical science remain. All entrances to the National University have been sealed for the past two years, and the principal laboratory building located outside the university grounds has been gutted by the military so that only external walls remain. No students have been admitted since the closing of the university. In the past semester, medical students in the last two years of the six-year course have been taught in storefronts and private homes by a few intrepid professors, but the complete absence of equipment, books, medical journals, and demonstration materials makes this valiant effort doomed. The devastation is both physical and intellectual.

Our group visited two facilities for political prisoners that are operated by the Ministry of Justice: Ilopango for women and Mariona for men. We were permitted to interview the inmates alone and without time restriction. Medical care in the women's prison is provided by a recent graduate of medical school who devotes a few hours a week to the prison as just one of his four jobs. Medical records are inadequate and incomplete. Prescriptions for medications are usually not available in the prison medical facility, so they are disregarded; if the prisoner is fortunate, her family may obtain the medicine. In both prisons the political prisoners have established their own health facility using minimal supplies of drugs and first-aid materials.

Few prisoners have been tried and convicted. The medical students we saw in Mariona, the men's prison, had been there for two years—and others had been there for as long as four years—without appearing before a judge. However, the prisoners told us that they were the lucky ones. They were alive and probably would not disappear—no matter that they were being held indefinitely without due process.

In summary, we found direct and indirect evidence of frightful violations of human rights, and we found fear among private citizens who feel unprotected in a lawless society. We found that the health of the public has suffered, that medical education, medical care, and medical facilities have been desperately depressed. How can one account for the willful dismantling of the university, including the imprisonment (or worse) of medical professors and practicing physicians and the physical destruction or sealing up of university buildings and the medical school? University personnel with whom we spoke ascribed it to the political liberalism or radicalism that is characteristic of a university campus, to the outspoken indignation of the medical profession at the atrocities and wanton killing of noncombatants and alleged subversives, and to the fear among those in power of middle-class intellectuals. Doctors and other health professionals meet many of the criteria for "disappearing."

We have returned to our affluent country shaken but eager to inform our colleagues, sponsors, and all who will listen that we can save many thousands of lives by protesting to the Salvadoran authorities disappearances and other human-rights violations. Physicians and other concerned persons can help privately by donating equipment and funds through such international relief agencies as the International Committee of the Red Cross and Catholic Relief Services. U.S. foreign aid must make abundant provision for such essentials as food, medicine, vaccines, medical equipment, teaching materials for students, and other forms of economic assistance. Aid to this war-torn country should emphasize life-giving sustenance rather than arms and military equipment.

ALFRED GELLHORN, M.D.,
Harvard School of Public Health.●

THE SOVIETS REALLY NEED THEIR NUKES

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. GOODLING. Mr. Speaker, in this Sunday's Washington Post, I came across an editorial which is very timely; coming as it does, just as the House concluded its "Great Freeze Debate." The article, written by Prof. Seweryn Bialer of Columbia University, argues that the Soviet Union depends on its nuclear arsenal for its superposer status, and that the unusability of the weapons is what makes them so very useful to the Soviets. For these reasons, Professor Bialer concludes that the total elimination of nuclear weapons is an unattainable goal, and even a reduction will be difficult to obtain. Because of the valuable insights offered by Professor Bialer, I think it fitting to include his May 8 article in the RECORD.

THE SOVIETS REALLY NEED THEIR NUKES

(By Seweryn Bialer)

In the great debate over nuclear weapons and how to control them, one key fact gets too little attention: The Soviet Union depends on its nuclear arsenal not only to protect itself and to threaten others, but for its very status as a great power. Without nuclear weapons, the Soviet Union would not be a superpower.

Perhaps we shy away from this fact because its implications are so depressing. Obviously, if the Soviet leaders believe that they depend on nuclear weapons for their international status, they are unlikely to consider giving them up. This state of affairs cannot be wished way.

More depressing still, the nuclear revolution that has transformed international politics gives the Soviet Union considerable advantages over the West in the competition for global influence. The very "unusability" of nuclear weapons makes them more useful to the Soviets than they can ever be to us.

Nuclear weapons are much more than weapons. They are the overriding political and psychological factor in Soviet-American relations, and in today's global politics generally. The fact that nuclear weapons exist has created an international situation without precedent in history.

The existence of nuclear weapons has also given the United States and the Soviet Union a set of compelling common interests, beginning, of course, with their mutual need to avoid a nuclear war. But common interests are far from either superpower's only interests.

If avoiding a nuclear war and the confrontations that could lead to one was both superpowers' fundamental goal, their chances for success would be very high.

Even if the nuclear arms race continues indefinitely, one can argue—however ironically—that both sides believe they are accumulating new weapons to avoid the sort of strategic imbalance that could tempt one superpower to attack the other.

But the prevention of a nuclear holocaust and the survival of humanity is not the only fundamental goal of either America or of Russia. Both have other international ambitions, and the Soviet Union has an unsatisfied hunger for global influence that pushes it toward a highly activist foreign policy.

It's no use shying away from this uncomfortable fact. Soviet nationalism and pride, history and ideology, its military might combined with the docility of its population, its late arrival on the superpower stage all encourage this activism. The Soviet Union is still in the ascending stage of its international ambitions.

In this stage the Soviet leadership is hoping it will be able to turn Western Europe away from its alliance with the United States. The Soviets are committed to support radical changes in the Third World, even if this involves direct and indirect Soviet military engagement. While the overriding Soviet goal is to protect its own Russion-Soviet system and its "internal" and "external" multinational empire, its key tactical aims as a latecomer to the "game" of global politics are offensive.

For the United States, this is clearly the descending stage of political, economic and military ambitions. America now views the international system with the attitude of a status-quo power. Its long-term policy direction is best expressed in "containment"—a

concept with basically defensive connotations.

Americans key goals are the preservation of the independent industrial democracies, which requires a balance of at least strategic parity with the Soviet Union; the defense of vital economic and strategic American and allied interests in such areas as the Persian Gulf, which requires the preservation or creation of a conventional Soviet-American balance in some regions of the world; and finally, the preservation—at best—of the existing configuration of forces in the Third World. Where change cannot be avoided, the U.S. wants gradual evolution, not revolutionary upheavals.

This is a dangerous situation. Although each superpower wants to achieve its goals without using nuclear weapons—that is, in a rational way—this may not prove to be so easy. The asymmetry of goals which each superpower pursues and the fact that one is still ascendant while the other is retrenching increases the perils of an unintended escalation of their conflict to the threshold of nuclear war.

To put it simply, the nuclear revolution in weaponry and warfare and its military, political and psychological consequences give the Soviet Union a better opportunity than the United States to achieve its international goals without a nuclear war. This is true for four reasons:

First, nuclear weapons act as a great equalizer of the actual, conventional military potential of the Western and Soviet alliances, and therefore are a guarantor of the security of the Soviet Union. Far from being an equal, the Soviet Union and its bloc are far behind the Western alliance in conventional military potential.

At the beginning of the 1980s the combined gross national product (GNP) of the industrial democracies was more than three times larger than the combined GNP of the Warsaw Pact countries. (This is about the same relationship that existed between the West European and Soviet economic military potential on the eve of World War II, and is only marginally different than the comparative potential of NATO and the Warsaw Pact in the 1950s). Technologically, recent studies have shown that the lopsided superiority of the West is at least as great today as it was in 1953, the year when Stalin died.

But nuclear weapons—strategic, theater, and tactical—act as a great equalizer of the military potential and actual strength of the competing blocs, who without them are not equal at all. Once strategic parity has been achieved, it provides a degree of security to the Soviet Union that it never enjoyed in the past.

And of course, nuclear weapons enhance the psychological-political effectiveness of any threat from Soviet conventional forces on Soviet borders or in remote corners of the globe.

Second, the nuclear revolution led to the the once-justified but now pernicious concept of an American nuclear umbrella over Western Europe, and the "bigger bang for the buck" military policy of the United States. The idea of an American umbrella led to much lower levels of conventional military spending by the industrial democracies than at any time in their 20th-century history. The idea of "more bang," and the attendant American preoccupation with the nuclear balance, led to a deterioration of conventional U.S. forces and to the dissipation of the American military-industrial base. And of course, these changes occurred at a time when Soviet conventional forces were growing steadily. The resulting superiority of mobilized conventional strength gave the Soviets freedom of military action below the level of nuclear war.

Third, the Soviet leadership is able to exploit the balance of terror more effectively that the United States can because of the nature of the Soviet political system. Soviet leaders do not feel great pressure from public opinion in formulating their military and foreign policies and calibrating their use of military threats toward their opponents. At the same time, Soviet leaders can manipulate the legitimate fear of nuclear weapons in the populations of the industrial democracies. This asymmetry lets the Soviet leadership reap the political rewards of nuclear parity and leaves them freer to employ military threat or actual military forces.

Fourth, the nature of Third World conflicts and of popular aspirations in the developing countries favors military conflicts and revolutions—best suited to Soviet purposes—rather than gradualism and the evolution of democratic institutions that America would prefer. When nuclear parity eliminates the danger of retribution to thier own homeland and empire, the Soviets can engage in low-risk and low-cost adventures to help accelerate the "historical process" in the Third World.

On the other hand, any American attempts to intervene to preserve the status quo are likely to require large-scale involvement at a high cost. The unpopularity of such interventions, the difficulties of making them work, and the danger of their escalation into confrontations with the Soviet Union makes them extremely difficult for the United States to undertake.

So nuclear weapons give the Soviets clear advantages. Of course the present balance of nuclear terror also presents the Soviet Union with terrible dangers. But it would be foolish to ignore the fact that the same balance of terror also gives the Soviet leaders opportunities for global assertiveness that are unprecedented in the entire history of the Soviet Union.

On the other hand, the advantages created for the Soviet Union by the nuclear revolution do not assure the success of Soviet policies. Those advantages may well be balanced by the Soviets' inside the East European empire, and the Soviets' inability to match their military capabilities with the political, economic and cultural power that could produce practical advantages for the U.S.S.R. around the world. The restoration of an effective American-West European alliance could also help frustrate Soviet ambitions.

In the area of strategic weapons, the Soviet leadership's oft-proclaimed desire for arms control and stability is at least as sincere as President Reagan's repeated statements of interest in nuclear arms reduction. But if nuclear weapons were ever abolished or decisively reduced in number, it is the Soviet Union that would really suffer—militarily, politically and psychologically. This is an important reason why the total elimination of nuclear weapons is an unattainable goal, and why even their substantial reduction will be very difficult to achieve, though we must strive to achieve it.●

NUTRITION RESEARCH: WE HAVE A LOT TO LEARN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BROWN of California. Mr. Speaker, the rising cost of health care is one of the greatest budgetary dilemmas we in Congress face. The prospect of billions upon billions of dollars going to treat diseases that could be avoided is a powerful incentive to find ways to prevent illness. There is little doubt that improper nutrition is a contributor to many of the diseases that are most difficult and expensive to treat, and in the past few years we have invested heavily in basic research on nutrition.

An article just published in Science magazine shows how recent nutrition research has led to the overthrow of concepts that seemed beyond doubt. The practical consequences of the discoveries reported here may well be enormous; further studies will no doubt provide additional surprises. Scientists, of course, have long recognized that our knowledge is always provisional at best. It is only when researchers challenge accepted dogma that they discover new truths. The challenge for us, the supporters of this effort, is to keep encouraging new approaches and fresh looks, as well as to insist that research discoveries be applied to the development of usable results. Whether we are concerned about nutrition, or the environmental fate of chemicals, or the causes of chronic disease, we must continue to question old beliefs, to test and experiment, and to develop new understanding. I commend this report to my colleagues.

[From Science, Apr. 29, 1983]

DIETARY DOGMA DISPROVED

(By Gina Kolata)

For years, diabetologists and nutritionists have taught that there are two major classes of carbohydrates: simple and complex. Simple carbohydrates, which are the sugars like glucose, sucrose, and fructose, are immediately absorbed by the gut and cause a rapid rise in blood sugar and blood insulin. Complex carbohydrates, such as the starches found in rice and potatoes, take longer to be absorbed and so result in a slower and more moderate rise in blood glucose and blood insulin.

Or so the dogma goes. But it turns out that the dogma is incorrect. The problems, says Jesse Roth, a diabetes specialist at the National Institutes of Health, is that "I believed it. Everyone believed it. But no one ever tested it."

When Phyllis Crapo of the University of Colorado Health Sciences Center in Denver thought to test the dogma, she was astonished to find just how wrong it is. Crapo and other researchers are learning, for example, that a bowl of ice cream does almost nothing to blood glucose. Nor does a sweet potato. But a white potato or a slice of whole wheat or white bread sends blood glu-

cose soaring. To further compound the matter, the effects of carbohydrates on blood glucose are unpredictable. The only way to learn what a particular food's effect is is to test it on volunteers.

These discoveries are of major consequence for diabetics, who must avoid large swings in blood glucose. They also may be important for nondiabetics since, at the very least, large amounts of glucose in the blood make people sleepy.

Other effects are more speculative, but some medical researchers now suggest that the reason people develop adult-onset diabetes may be because they eat the wrong kind of carbohydrates, meaning those that give rapid rises in blood sugar, rather than simply too many carbohydrates. In more primitive societies, David Jenkins of the University of Toronto points out, people tend to eat the carbohydrates that give slow glucose rises and tend also to have little diabetes and heart disease.

Crapo first thought of testing the conventional wisdom about the effects of simple and complex carbohydrates when she visited Stanford University several years ago. She was sitting in on a physicology class when the lecturer remarked that the traditional advice to diabetics that they eat complex rather than simple carbohydrates really makes no sense. People have so many amylases—enzymes that break down starches into sugar—in their gut that starches are converted to glucose almost immediately.

Crapo was skeptical. As a nutritionist, she had been advising diabetic patients to concentrate on complex carbohydrates and she found it hard to believe that they are no different from simple sugars as far as blood glucose is concerned. So she, together with Stanford diabetologist Gerald Reaven and her husband, diabetologist Jerrold Olefsky, also of the University of Colorado, decided to feed volunteers pure uncooked starch and see what happened. Just as she suspected, there was virtually no rise in blood glucose.

But, these investigators reasoned, pure uncooked starch is hardly a typical food. Perhaps the result would be different if they tried cooked starches of the sort people normally eat. They then fed volunteers potatoes and rice. To their amazement, says Crapo, "We found a dramatic difference between the two. Rice gave a flat glucose response and potatoes gave a rapid response that was the same as you would expect if you gave people pure glucose." Olefsky adds, "Potatoes are like candy as far as a diabetic is concerned."

They went on to test corn and bread because rice, potatoes, corn, and bread are the four major starches eaten in this country. The glucose responses, in increasing order, were rice, bread, corn, potatoes.

They tried the experiments in people with impaired glucose tolerance and with diabetes. The results were the same. They tried similar experiments using simple sugars because, Olefsky explains, "We always were taught that a simple sugar is a simple sugar. But it turns out that simple sugars are as different as potatoes and rice." Lactose and fructose have little effect on blood glucose. Sucrose has a moderate effect. Glucose and maltose give immediate and pronounced effects.

Olefsky believes that one reason for these differences is that there are differences in the accessibility of the starch or sugar molecules in various foods. The more homogenized the food, the more rapid the rise in blood glucose. A rice slurry gives a more rapid rise than rice grains. Apple puree gives a more rapid rise than a whole apple. But the biochemistry of food digestion and absorption is so poorly understood, he says, that each food has to be analyzed separately.

The most extensive list of the glucose responses of foods has been prepared by Jenkins and his associates in Toronto working with Thomas Wolever and his associates at Oxford University.

Jenkins says his studies of the glucose response to various foods are a constant revelation. "We never cease to be amazed. We are unable to predict and we are still trying to explain what we find. We thought we would find most of the foods not too dissimilar. We expected some differences but not massive differences. A second surprise—and this was quite, quite remarkable—was that the legumes had blood glucose rises half those of their cereal counterparts."

Pasta products are much lower in their blood glucose effects than cereals. "In the West, we've been getting hooked on whole meal products rather than white. But there is no difference in blood glucose levels with white or whole wheat pasta, white or whole wheat bread, or white or brown rice," Jenkins remarks. He stresses, however, that whole wheat products still may be beneficial since they improve colonic function.

Jenkins and Wolever also have tested combinations of foods. For example, they gave volunteers cheese and bread. Dairy products in general give a very slow glucose rise but the cheese-bread combination, unexpectedly, gives the rapid glucose rise characteristic of bread. Bread and beans, in contrast, resulted in a slow rise in blood sugar more characteristic of beans than bread.

One immediate consequence of these results for diabetics is that the starch exchange lists of their diets, which are choices of equal carbohydrate portions of bread, rice, potatoes, or corn, are called into question. In addition, Olefsky points out, diabetics may want to know that some foods that they frequently avoid, such as ice cream, are fine as far as blood glucose is concerned. Olefsky remarks that he recently saw a new ice cream sweetened with sorbitol and labeled "not a low calorie food." The ice cream was aimed at diabetics. But regular ice cream gives a very flat glucose response. Marveling at the very existence of this dietetic dessert, Olefsky says, "Some major food company developed this product on the assumption that ice cream is bad for diabetics. Better they should go out and find a better potato."

Roth says it is his impression that the work of Crapo and Jenkins "is not widely known" and that "it is time for it to be considered" by diabetologists. Irving Spratt of the Spratt Diabetes Medical Clinic in San Bernadino, who is president of the American Diabetes Association, says the Diabetes Association is concerned about the possibility that the starch exchange lists may be misleading, that "we are considering changing the exchange lists and we will take appropriate action as all the evidence comes in." Crapo, he adds, is a member of the professional education committee of the American Diabetes Association. "We are in constant communication with Phyllis Crapo," Spratt says.

Studies of carbohydrates and their effects on blood glucose may help nutritionists understand public health issues as well as diabetes diets. Jenkins says he wonders whether the wholesale change in industrialized societies from foods like pasta, beans, and sweet potatoes to foods like bread, cereals, and white potatoes might be related to the prevalence of diabetes, heart disease, and some forms of cancer. He himself has begun eating pasta and beans since he discovered their effects on blood glucose. "It's a marvelous food anyway," he remarks.

Olefsky wonders whether there will be any large-scale health effects as food manufacturers switch from using sucrose as a sweetener to using corn syrup, which is less expensive. Corn syrup, which is mostly fructose, gives a very slow blood glucose response whereas sucrose gives a more rapid one.

The whole process of studying the blood glucose response of foods has been an eye-opener for nutritionists. They learned, says Crapo, that "What happens when we eat food is much more complex than anyone thought." Now that researchers are starting to look more carefully at their untested assumptions about food, Crapo predicts, "I think at last we will pull nutrition out of the dark ages."●

NATIONAL ASSOCIATION OF REAL ESTATE EXCHANGES

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. FORD of Tennessee. Mr. Speaker, it is a great pleasure for me to recognize and salute the National Association of Realtors as they celebrate the organization's 75th anniversary Diamond Jubilee.

Since the realtors founding in 1908 as the National Association of Real Estate Exchanges, the organization has represented the highest standards of professional ethics. Realtors have provided competent, unbiased service to both buyers and sellers over the past 75 years, assisting in the largest investment most Americans make in a lifetime. Realtors have introduced many innovative programs to improve and enhance the accessibility of the American dream of owning a home to everyone.

Realtors are known for contributing countless hours to their communities, dedicating time and energy to civic betterment. For the past 75 years, realtors have played an important role in the growth and development of the cities and towns across the United States. For this reason, they have become one of the most important forces in American business.

I would like to offer the following history of the National Association of Realtors as a tribute to the outstanding accomplishments of the organization over the past 75 years, and to recognize the integrity and dedication the profession represents.

A BRIEF HISTORY OF THE NATIONAL ASSOCIATION OF REALTORS

(Written by Joan Mauch; research by Linda Lipman)

The National Association of Realtors,[1] the nation's largest trade association, was founded in 1908 as the "National Association of Real Estate Exchanges."

Three earlier attempts to organize a national real estate group had met with failure. The first effort in 1891, resulted in the formation of the National Real Estate Association, which survived only 19 months. Two subsequent efforts also were without success.

On May 12, 1908, 120 men representing 18 boards from 13 states and one state association met in Chicago to try again. Their stated objective was "to unite the real estate men of America for the purpose of effectively exerting a combined influence upon matters affecting real estate interests."

The group authorized employment of an executive secretary, general counsel and "such other assistance as may be necessary" and also provided for an office for association work. Standing committees, demonstrating the founders' intended fields of activity, were formed and included: Code of Ethics, taxation, state and municipal legislation, and the organization of local exchanges.

In 1916, the organization's name was changed to the "National Association of Real Estate Boards," and in 1972 it became the "National Association of Realtors" and its present logo was adopted.

Throughout its history, the National Association has been working for America's property owners, exerting pressure on government for better housing, improved home financing, the prevention of real estate fraud, community revitalization, fair taxation and encouraging property beautification and protection.

As the Association celebrates its 75th anniversary, its members can be proud of the many key accomplishments along with achievements at every level—national, state, and local. Some of the Association's major achievements include:

Making use of the "Golden Rule" as its theme, the Realtor's adopted a strict Code of Ethics in 1913. The National Association was only the second business group in the nation to follow the professions of medicine, law and engineering in the formation and enforcement of a code for its members.

In 1916, Charles N. Chadbourne, a Minneapolis Realtor, devised the term "Realtor" to identify real estate agents who are members of the National Association of Realtors and subscribe to its strict Code of Ethics. The patent office registration of the servicemark, "Realtor" and the Realtor emblem were approved in 1949. Courts have upheld this designation in every case brought before them.

The principal of "exclusive agency" was established about 1910 and meant that every seller could make exclusive use of a single broker. This concept led to cooperative selling practices and the establishment of multiple listing services. The public benefits from exclusive agency because only a single fee is due upon the sale of a property, regardless of the number of agents involved in its sale.

After the Great Depression, Realtors worked to prevent urban blight from destroying good neighborhoods. In 1939, the Urban Land Institute was formed to concentrate on the problems of urban decentralization and redevelopment. Realtors suggested a program of large scale redevelopment by private enterprise. In 1941, major proposals on rebuilding cities were coordinated by the National Association.

The Realtors' "Build America Better" program was introduced in 1952 to promote neighborhood conservation. Realtors provided expert counseling and helped cities in their efforts to rid neighborhoods of slums. The program was cited in the 1954 Municipal Yearbook of the International City Managers Association, as a major development in the field of housing conservation.

In 1956, "Realtor Week" was introduced. Now known as "Private Property Week," it provides an annual reminder to the public of their constitutionally-protected rights to own, use and transfer private property.

Improvement in the flow of mortgage money has always been a major objective of the National Association. In this respect, Realtors provided leadership in the development of the Home Owners Loan Corporation, the Federal Home Loan Bank System, Federal Housing Administration and the Federal National Mortgage Association. Throughout the 1950s, Realtors supported credit efforts to help additional families afford housing. They also were involved in liberalizing FHA requirements to make FHA loans available to more people.

Realtors have supported floating FHA and VA interest rates since the 1950s. A floating rate would make more funds available for government-backed mortgages and result in more equitable closing charges. In 1980, a law was passed with Realtor support requiring 10 percent of all FHA loans to have a floating interest rate.

Since its founding, the National Association has opposed excessive government spending and unfair taxation, and remains heavily involved in political affairs to this day.

Expansion of tax relief to the elderly in home sales also was widely promoted by Realtors. In 1962, persons 65 years and over were allowed to exclude the first $30,000 of the profit from the sale of their home from capital gains taxes. This amount was increased to $100,000 in 1978 and the age limit was lowered to 55 years. In 1982, the amount was increased to $125,000.

Realtors helped defeat efforts to limit deductions for mortgage interest payments in 1976. They continue to lobby against this limitation whenever it is proposed as a means of raising additional tax revenues.

In 1943, the Realtors Washington Committee, later named the Realtors Political Action Committee (RPAC), was formed. RPAC currently is the largest PAC of any trade association in the nation. In 1982, it raised some $2.5 million in contributions. Citizens benefit from this program by the election of legislators who support the principals of private property ownership and the free enterprise system.

The National Association's nonpartisan voter registration campaign in 1980 resulted in more than 4 million additional voters going to the polls in the 1980 elections and was the first such program by a national trade association to be approved by the Federal Election Commission.

The federal government in World War II imposed rent control. Although Realtors abided by the law, they worked for its repeal. Realtor research has demonstrated that rent control adds to the shortage of apartments and prevents the renovation of units.

In some areas, this fight continues today. Realtors participate in task force teams to assist localities in defeating rent control initiatives. Realtors also assisted in the creation of the Rental Housing Industry Coalition, consisting of national organizations with similar concerns regarding rent control and the rental housing industry.

With the addition of 400,000 sales associates in 1972, the National Association of Realtors became the largest trade association in the country. Today, membership is composed of more than 600,000 Realtors who are brokers or salespeople, and Realtor-Associates, a membership category for salespeople. Members belong to one or more of the 1,864 local boards of Realtors located in all 50 states, Guam, Puerto Rico, the Virgin Islands and the District of Columbia.

The Association continues providing a facility for education, research and exchange of information among its members and to the public and government for the purpose of preserving the free enterprise system and the right of free people to own and use real property.

According to Harley W. Snyder, 1983 president of the National Association, "Members of the Congress and the Executive Branch of the federal government today recognize the National Association of Realtors as a major spokesman for the vital housing industry. They acknowledge that we not only represent our own members, but that Realtors nationwide are working for America's property owners as well."●

[1] Realtor is a registered collective membership mark of the National Association of Realtors.

THE RECENT MURDER OF THE TURKISH AMBASSADOR TO YUGOSLAVIA

HON. MARK D. SILJANDER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. SILJANDER. Mr. Speaker, Armenian gunmen shot and fatally wounded the Turkish Ambassador to Yugoslavia Galip Balkar. This is the 26th time they succeeded in killing members of the Turkish diplomatic corps or their families in the last decade.

While we feel a deep outrage about the killings of innocent diplomats of our NATO ally, Turkey, it must be stated that the killings are not only a Turkish concern, but an American one, as well.

To cite the terrorist occurrences sponsored by ASALA—Secret Army for the Liberation of Armenian—and the Justice Commandos for the Armenian Genocide in the United States:

1973: Murder of the Turkish Consul and Consul General in Los Angeles.

October 1980: Bombing of the home of the Turkish Consul General in Los Angeles.

October 1980: Car bomb explosion in front of the Turkish Mission in Los Angeles.

June 1981: Bombing of the Swiss Bank Corp. offices in Los Angeles.

November 1981: Bomb explosion at the Turkish Consulate in Los Angeles.

January 1982: Murder of Kemal Arikan, Turkish Consul General in Los Angeles.

March 1982: Bombing of the office of the Honorary Consul General of Turkey in Boston.

May 1982: Murder of Orhan Gonduz, Turkish Consul General, Boston.

June 1982: Arrest of three Armenians after they allegedly put bombs in the Canadian Airlines cargo terminal at Los Angeles.

October 1982: Arrest of five Armenians allegedly preparing to bomb the office of the Honorary Turkish Consul General in Philadelphia.

Mr. Speaker, we must put a stop to the criminal activities of the Armenian terrorist groups. The 600,000 members of the American Armenian community condemns strongly these acts. The agents of the terrorist groups are usually Armenians from Lebanon who had arrived in this country during the 1970's as legal immigrants and then are used as assassins and bombers. We must also take adequate steps to insure that the infiltration of ASALA and Justice Commandos agents can no longer enter under the guise of refugees from Lebanon.

On September 2, 1982, Dr. Z. Michael Szaz, current director of the Armenian Foreign Policy Institute wrote an article in the Washington Times about these two terrorist organizations that are operating in the United States.

The text follows:

[From the Washington Times, Sept. 2, 1982]

ARMENIAN TERRORIST IRONIES

(By Michael Szaz)

It is a curious phenomenon of news coverage that while certain groups within the Byzantine labyrinth of international terrorism have attained infamy, two of the most active have escaped the worldwide condemnation they so richly deserve—their names are: the Secret Army for the Liberation of Armenia (ASALA), and The Justice Commandos of Armenian Genocide.

Major American, French, Italian, Spanish, Swiss, Portuguese, Canadian and Australian cities have been the sites of bombings and assassinations aimed at Turkish diplomats often injuring scores of innocent bystanders.

The ideological orientations of these groups differ, yet their tactics are identical.

ASALA is Marxist, Third World-oriented and pro-Soviet. It operates on the premise that the Soviet Union provided an Armenian homeland. ASALA hopes to detach vast areas from eastern Turkey and unite them with Soviet Armenia.

ASALA, with roots in Lebanon where a sizable Armenian population resides, has close ties with the radical PLO faction led by George Habash. Israeli sources report that documents confiscated from PLO offices in Lebanon confirm the ASALA/PLO connection.

These terrorists specialize in bombing attacks, but also claim credit for assassination of Turkish diplomats. Their bombing campaign has targeted French and Swiss government facilities as well as Turkish property.

The Justice Commandos are the radical offshoot of the conservative national Armenian party in exile. Its roots are among young Armenian immigrants from Lebanon to the United States, Canada and Australia.

At this writing, 23 Turkish diplomats have been assassinated since 1973. Four of the killings were done in the United States: three in Los Angeles (1973 and 1982), and one in Boston (1982). The remainder of the assassinations occurred in Western Europe, Canada and Australia. Over 70 bombings have resulted in injuries to innocent bystanders, the last one in Paris just 10 days ago wounded 16 people. The increased activity has produced conflicting sentiments in the American Armenian community on the terrorism issue although all major organizations have officially condemned them.

Last year, a bombing at the Anaheim Convention Center led to the cancellation of performances of the Turkish Folklore Group as authorities could not provide security in face of further terrorists threats. Apparently inspired by the rising tide of violence, other Armenian militants disrupted a cultural meeting of the American-Turkish Assembly in Houston and provoked cancellations of a documentary film on Turkey at the Los Angeles Music Center and at the University of California Berkeley campus. Stink bombs were the weapons of choice.

Recently a threat on the life of UCLA Professor Stanford Shaw forced him to flee his teaching post and go into hiding. His disagreement with allegations that Turks massacred nearly all Armenians during World War I was the cause of the death threat.

The pretext for Armenian terrorism stems from the alleged 1915 massacres. The assassination of Turkish diplomats are to force Turkey to admit that an organized slaughter occurred costing the lives of 1.5 million Armenians. The Turkish government has denied these charges and, to prove the invalidity of such rhetoric, points out that there were only 1,240,000 Armenians in the Ottoman Empire and many later emigrated to Soviet Armenia, Lebanon and the West. It is, however, also a matter of record that the Armenians collaborated with the Russian Empire during the war in order to establish an Armenian state on Ottoman territory.

No one disputes that starvation, deprivation, and epidemics decimated the Armenians after their 1915 uprising which also resulted in the death of many thousands of Turks. It is a sad fact, however, that Europe is filled with memories of massacres that occurred in most countries. If every ethnic group took revenge upon diplomats of other countries against whom they nurse grievances over long-ago events, all of Europe would be drenched in blood. This is not to say that tragedies should be forgotten, but rather that there is a lesson to learn: never to allow nationalist and ethnic passions to get out of hand.

The Ottoman Empire had a record of tolerance for minorities. The Empire gave haven to the Jews, among others, during the Spanish Inquisition. Perhaps this record of tolerance explains an especially unique quality of the Armenian terrorist phenomenon. It has not expressed itself within Turkey despite amply opportunity between 1976 and 1980, when Turkey was faced with national disaster brought on by rampant left- and right-wing terrorism.

Public security was sufficiently weakened to permit the emergence of a terrorist campaign from within the Armenian community in Turkey. No such terrorism occurred. Armenians in Turkey did not launch attacks on Turks nor did they support such attacks by other groups.

The recent bombing and machine-gun attack by Armenian terrorists at the Ankara airport does not negate the above conclusions. They all possessed foreign passports and came to Turkey only to create the incident. They were not Turkish Armenians.

It is ironic, but perhaps predictable that, the Armenian terrorists direct their assault on Turkey while disregarding the very real religious persecution and limitations on national expression imposed upon their kinsmen in the Soviet Union where the absence of human rights is manifested daily.●

THE FIFTH ANNUAL BLACK HERITAGE DAY PARADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. RODINO. Mr. Speaker, I ask my colleagues to join me in paying tribute to the Fifth Annual Black Heritage Day Parade, which will be held in Newark this Sunday, May 15.

The parade has as its theme for this year: "The African Family: Struggling for Survival." It will be an opportunity for all of us to recognize the achievements as well as the struggles of black Americans over the years to gain full and equal participation in our society.

The parade committee works exceptionally hard all year not only on this annual event, but on other community activities as well. The committee provides educational and cultural seminars aimed at highlighting the contributions of black Americans in all areas.

This day will be a celebration of those contributions, and a time for all people, regardless of race, to salute and recognize the pride of black Americans in their heritage. In these times it is especially important for us to reflect on this and to rededicate ourselves to that struggle for equality.

Mr. Speaker, there are many people involved in the parade committee who are too numerous to name individually. However, I do wish to single out Kurt Culbreath, the chairman of the Black Heritage Day Parade Committee, who has given so much of himself to this effort. In addition, there are three individuals being recognized at the parade with the honor of serving as grand marshals. They are the Honorable Ambassador Paul Rupia, of the Republic of Tanzania; Mr. William Ogden Layton, a World War I veteran of distinguished service who is the chief grand marshal; and Mr. Leon Moore, the principal and founder of the Chad School in Newark. I wish these people and all the others involved in Sunday's parade my best

wishes and my full support and encouragement.●

TANDEM TRUCKS—A STATE DECISION

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. McKINNEY. Mr. Speaker, on April 7, I introduced H.R. 2438, a bill to return to the States the right to decide whether their highways are safe for tandem-trailer trucks. Fifteen States have prohibited the giant trucks from using their highways in the past, and the fact that twin trailers are involved in twice as many fatal accidents as single-unit trucks was doubtless a factor in those decisions. However, the Federal Highway Administration is now implementing regulations to override any State ban of these dangerous trucks. I urge you to join me in returning to the States the right to insure safety on their highways by prohibiting tandem trucks if they so desire.

My legislation is direct and uncomplicated: It would simply remove a short section of the Surface Transportation Assistance Act of 1982 (Public Law 97-424) that prohibits States from banning tandem-trailer trucks. It would not necessarily remove tandems from any State in the Nation that wants them; rather, I merely propose to leave that determination to the individual States. Other length, weight, and width provisions, as well as a study of the feasibility and safety of tandem trailers, would remain as passed in the 1982 bill. However, the provision permitting the operation of twin trailers in all States this year, which was added in committee as a concession to truckers, was not subject to full House approval in a separate vote. In addition, DOT Secretary Elizabeth Dole recently stated that, even with the new taxes on truckers in effect, the trucking industry will still be paying 25 percent less than its fair share of road upkeep. Although some savings in transportation costs may be realized through the use of twin trailers, I believe the increased wear and tear on our highways, and the dangerous potential for loss of life vastly outweigh any possible benefits.

Let us look at some of the facts, according to the National Highway Traffic Safety Administration (NHTSA):

In 1981, there were 12.2 fatalities per 100 million miles traveled by tandem trailers, compared to 5.6 fatalities for single-unit trucks;

Tandem trailers have four times as many accidents as regular passenger vehicles, and over three times as many accidents as single-trailer trucks; and

One out of every three tandem trucks is involved in an accident each year.

Clearly, these vehicles, which can be 75 feet long, and weigh as much as 40 tons when fully loaded, should not be indiscriminately allowed on our highways. Many interstate roads have interchanges every few miles, and run through hilly or congested areas, increasing the possibility of mishap. The individual States are best equipped to determine whether the particular design or construction limitations of their roads, combined with safety factors, warrant partial or total restrictions on tandem trailers.

In fact, in the wake of substantial State concerns over safety, DOT has recently withdrawn many of the routes originally designated as safe for tandem-trailer traffic. Secretary Dole has indicated that, while the Department will work with State officials on the tandem-truck rules, it will go to court to ultimately force acceptance of the final regulations. It is clear that this safety issue, which was hastily conceived and implemented, deserves further careful study before Federal mandates are laid down.●

PERSONAL EXPLANATION

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BORSKI. Mr. Speaker, I want to offer an explanation of my vote on rollcall 57 of April 20, 1983. The vote occurred on the amendment offered by the gentleman from New York (Mr. STRATTON) as modified by the gentleman from Wisconsin (Mr. ZABLOCKI) to House Joint Resolution 13, calling for a mutual and verifiable freeze on nuclear weapons.

I had intended to vote "aye" for the Stratton amendment but I made an error when I recorded my vote on the electronic voting device. Consequently, I was recorded "no." I regret the error and want to make it clear that I support the Stratton amendment as modified. I believe that the United States should maintain a vigorous program of research, development, and safety-related improvements to assure that we are not limited to levels of nuclear deterrent forces inferior to the force levels of the Soviet Union.●

FIXED EXCHANGE RATES AND A NEW INTERNATIONAL GOLD STANDARD

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. PAUL. Mr. Speaker, the international monetary system is something that concerns us today, not only because of the proposed increase in quotas for the International Monetary Fund but because there is mounting evidence that fluctuating exchange rates among national currencies is a barrier to the international movement of capital investment. In the jargon of economics, the risk of adverse movement in exchange rates imposes transactions costs due to risk, and with costs thereby increased, the markets are less efficient than they could otherwise be.

In the past century, the world enjoyed an international monetary system that permitted the growth and development of Western Europe and North America. This was the period of the international gold standard. There is much misunderstanding about the functioning of the international gold standard. One of the most common mistakes is the belief that there were fixed exchange rates under the gold standard, because there was a determinate ratio between the various monetary units of different nations—U.S. dollars, British pounds, French francs, and so forth.

I think it is a serious misstatement to refer to the international gold standard as a system of fixed exchange rates. What all of the gold standard nations had in common was the public policy to make payment in gold for all public and private debts, financial instruments, and international payments. It was not the fact that dollars were fixed to pounds and francs that made the international gold standard function so successfully, but that fact that payments were to be made in gold. There was one international currency—metallic gold—and many different, anachronistic national names for the international currency.

The First World War changed the perspective of economists, who were myopically fascinated by issues about the purchasing power of money. The new, pseudoscientific view was that money is just what money will buy; and that government should manipulate its money to achieve a wide range of impossible goals, like full employment, price stability, and so forth. Perhaps worst of all the fallacies that were adopted by economists is the belief that we do not need gold as the international form of money—rather that we can have a pretense of the former system by merely fixing exchange rates among otherwise purely fiat monetary units.

The central banks of the world were structured following the Genoa Conference of 1922 according to something called the gold exchange standard, in which large bars of bullion would from time to time be shipped among central banks for settlement of adverse payments balances, but the monetary system was to be purely one of fictional currency names at fixed prices, subject, of course, to periodic

devaluation as the politics of inflation would dictate.

Let me make it very clear to my colleagues that I am opposed to any short-range attempts to resurrect the Bretton Woods system of an international cartel of central banks: The gold exchange and dollar exchange standard. This kind of cartel is just as unstable as the OPEC cartel, and just as dangerous. What we need is the kind of monetary reform that was discussed at the international monetary conferences of the 1890's—where gold itself, denominated by units of weight, is the universally accepted form of money.●

PERSONAL EXPLANATION

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. LONG of Maryland. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Monday, May 9, 1983, for the vote on H.R. 2174, the Federal Antitampering Act.

Had I been present, I would have voted for this bill to make tampering with a product, such as Tylenol, a Federal crime, punishable by up to 20 years in prison and a $100,000 fine.●

GAMING LEGISLATION LONG OVERDUE

HON. BARBARA F. VUCANOVICH

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mrs. VUCANOVICH. Mr. Speaker, my distinguished colleague, Mr. REID, and I have introduced legislation, H.R. 2730 and H.R. 2731, to bring equity to the tax treatment of patrons of the legal gaming industry.

The first is a measure to exclude legal gaming payouts from gross income. The United States is the only country which taxes payouts from legal wagering as income. Foreign officials have prudently deemed such taxation to be of minimal gain, particularly considering the likelihood of stimulating illegal operations. In short, taxation of legal winnings creates an advantage for the illegal operator, and thus serves only as a detriment to legal revenue efforts.

H.R. 2731, an alternative reform to H.R. 2730, simplifies IRS treatment of certain gaming winnings and corrects inequities regarding carryover of losses. This legislation enjoys a broad base of support, reaching far beyond patrons of the legal casino establishments in my State to those of parimutuel racing in 30 States, and of the State lotteries operating in over 15 States and jurisdictions.

Both of these measures address erroneous Federal policy in a legitimate industry.

Mr. Speaker, at a time when individual States are assuming more responsibility for providing services to their citizens, I find it disturbing that the Federal Government continues to impede such efforts by encouraging illegal gambling outside the economy, and depriving States of scarce revenue dollars. The individual States authorize and oversee legal gaming operations in order to reduce the burden on their taxpayers. Federal tax policy in this area is regressive.

It should be noted that all of these changes were urged by the Federal Commission on the Review of the National Policy Toward Gambling in 1976, which concluded that withholding generates nominal revenues to the Federal Government, while encouraging an estimated $12 to $15 billion per year in illegal wagers.

In most States, gaming is a legitimate form of revenue. This legislation would significantly increase State gambling revenues and reduce illegal gambling without adversely affecting Federal tax collection. These measures provide a crucial step in efforts to thwart illegal gaming operations and help States bolster revenue goals.

I hope my colleagues will support these efforts to rectify tax treatment of law-abiding citizens who patronize legal gaming operations, and I urge the prompt consideration of these measures.●

CENTENNIAL ANNIVERSARY

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mrs. COLLINS. Mr. Speaker, for 100 years the citizens of our State and Nation have benefited from the professional dental training offered by Loyola University School of Dentistry/Chicago College of Dental Surgery.

The school of dentistry has consistently kept the good dental health and well-being of our citizens foremost in its planning and development by maintaining high educational standards for its predoctoral students.

This same concern has also been extended to the development of ongoing post graduate educational programs to assist thousands of practicing dentists in maintaining their level of expertise and to assure the best dental care possible for the prevention of dental disease.

I, on behalf of the Congress of the United States, would like to recognize Loyola University, Chicago School of Dentistry/Chicago College of Dental Surgery on its centennial anniversary and I wish the school continued success in the future.●

TRIBUTE TO JERRY AND EDITH OBERMAN

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. McGRATH. Mr. Speaker, on Saturday, May 14, Temple Emanuel in Long Beach, N.Y., will honor Dr. Jerry Oberman and his wife, Edith, at its 38th annual dinner-dance. I am pleased to join with the members of Temple Emanuel in paying tribute to these two individuals, who have given so much of themselves to the Long Beach community.

Jerry Oberman has been an active part of community life since moving to Long Beach in 1948. He was a founder and first president of the Long Beach Mental Health Association, and a founding member of Temple Emanuel.

Dr. Oberman's greatest distinctions have been in the education field. As a teacher, principal, assistant superintendent, and then superintendent of Long Beach public schools, he has shown that innovative approaches to education can turn our schools around. He introduced Head Start to Long Beach—2 years before the Federal Government adopted the program. He was the force behind the development of a program for gifted and talented children—years before most other communities developed similar programs. He was the architect of "Program Options for Pupils," which brings positive publicity, recognition, and many admiring observers to Long Beach schools.

Edith Oberman has been far from a silent partner in her husband's endeavors. She has demonstrated the same kind of community involvement which has helped to bring new life to Long Beach. Together, Edith and Jerry have given of their time, money, and energy to every phase of community activity. There are few people in Long Beach whose lives have not been touched in a positive way by the Obermans.●

WELCOME, ROY ROGERS

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BARNES. Mr. Speaker, I am pleased to have this opportunity to welcome to Washington the "King of the Cowboys," Roy Rogers, in town to help raise funds to insure that the athletes participating in the Special

Olympics will continue to have a year-round sports program and, especially, that they can take part in the International Summer Games in July.

Roy Rogers is well known to all of us for the great pleasure and entertainment that he has brought to millions of children over the years, along with his wife and leading lady, Dale Evans, and his golden palomino Trigger. He is equally admired for his tremendous humanitarian contributions to his country.

Roy Rogers and Dale Evans have been given the USO Liberty Bell Award, the Kiwanis Decency Award, the Humanitarian Award from the National Film Society, and the National Amvets Auxiliary Award for their many appearances for American veterans of World War II, Korea, and Vietnam. The Rogers family is well known for their adoption of orphans and for their more than 6,000 charitable appearances. In addition, they are the only show business couple to receive a national citation from the American Legion, and in 1980 were named co-chairmen of the National Committee for Prevention of Child Abuse.

It is in keeping with his dedication to such causes that Roy Rogers is appearing in the Washington area on behalf of our special athletes, and it is appropriate that we take a moment to honor him for his long and devoted career helping children and young people.●

CONTRAS BACKED BY THE PEASANTS IN NICARAGUA?

HON. VIN WEBER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. WEBER. Mr. Speaker, on May 8, 1983, the Washington Post carried a story on the op-ed page which I was shocked to read. It was a column written by Jack Anderson on the Contras fighting the Nicaragua Government.

I would commend this article to my colleagues.

A POPULAR FORCE

(By Jack Anderson)

While Congress debates the Reagan administration's clandestine operations in Nicaragua, the American public is beset by conflicting information about exactly what is going on there.

Are the CIA-supported anti-Sandinista guerillas a truly popular movement or merely ex-National guardsman of the hated Somoza regime attempting a comeback? Are the "contras"—the anti-government rebels effective freedom fighters?

To get some reliable, firsthand answers to these crucial questions, I sent my associate, Jon Lee Anderson, to the troubled region. He has just returned from a week-long foray into northern Nicaragua with anti-Sandinista guerillas. They belong to the Nicaraguan Democratic Forces (FDN), the major group of U.S.-supported insurgents.

He traveled with a well-armed, 50-member guerrilla band led by a commander whose nom de guerre is El Corrion—The Sparrow. Their base camp was deep in the rugged mountains of Nicargaua's Nueva Segovia province, near the Honduran border.

It quickly became obvious that the guerrillas had the support of the populace. They were fed and protected by local peasants at every step. Travelling on foot, and only at night, to avoid detection by government troops, the guerrillas spent the days hiding out in "safe houses," often within shouting distance of government-held towns. If the peasants had wanted to betray them, it would have been a simple matter to tip off the Sandinista militia to their hiding places.

The peasants also provided The Sparrow with up-to-the-minute intelligence on the whereabouts, movement and strength of the Sandinista forces.

The anti-Sandinista guerrillas' military prowess is not so clear-cut. My associate discovered this to his dismay when he accompanied The Sparrow's band on a planned pre-dawn ambush of government troop carriers along a country road.

Instead of surprising the Sandinistas, the guerrillas were themselves surprised by sniper fire from hilltop positions above them and were forced to pull out. The retreat was carried out skillfully, however, and two nights later the guerrillas avenged their defeat with an attack on the hilltop snipers' nests. The FDN commandos treated the snipers to a half-hour barrage of rockets, grenades and machine-gun fire, before returning satisfied to their base camp.

Most of the FDN guerrillas were local peasants, not Somocista exiles. But there were also former National Guardsmen, and they tend to be in positions of command because of their military experience.

Still, the core of The Sparrow's group consisted of locally recruited peasants. In fact, on my associate's last day with the rebel band, he witnessed the arrival of 50 new recruits, all of them peasants from the neighboring province of Madriz.

One of the new recruits was a defecting Sandinista army instructor. There were other ex-Sandinistas in the guerrilla troop. One was Dunia, a star graduate of the Sandinistas' post-revolution literacy campaign begun in 1980. Dunia did so well she was rewarded with a junket to Cuba. she is now the camp medic for The Sparrow's band.

The rebels and their noncombatant collaborators cited a variety of reasons for their disenchantment with the Sandinistas: enforced food rationing, expropriation of the farmers' markets, enforced organization of peasant co-ops, the Sandinistas' anti-religious policies and harassment of the Catholic Church.

The Sandinistas themselves indirectly aided the guerrillas' recruitment of at least a dozen of the new arrivals. The said they had been under increasing pressure to join the militia. Forced to take sides, they chose the "contras."

Still, it was not an easy choice for many. They expressed genuine anguish at being forced—one way or another—to fight against fellow Nicaraguans.

"We don't want to fight our Nicaraguan brothers," they said. The ones they're after are the Sandinista leaders and their Cuban, East German, Bulgarian and other foreign advisers.

The guerrilla war in Nicaragua is still in rather primitive stages militarily. But in the next month, guerrilla leaders promised, they will undertake more ambitious operations, such as the temporary capture of small towns and segments of highways. The idea is to gain credibility for the FDN forces while simultaneously demoralizing the Sandinista troops and encouraging defections.

With their popular support reportedly growing daily, and U.S. backing continuing, the guerrillas' covert operations in Nicaragua promise to develop shortly into full-scale insurrection and civil war.●

PERSONAL EXPLANATION

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. DAUB. Mr. Speaker, because of official business in Omaha on Monday, May 9, 1983, I was unable to cast votes on the rollcall votes taken. I would like the record to show that, had I been present, I would have voted "yea" on rollcall vote No. 90; "yea" on rollcall vote No. 91; "yea" on rollcall vote No. 92, as I was a consponsor of similar legislation to provide Federal penalties for tampering with products; "yea" on rollcall vote No. 93; and "yea" on rollcall vote No. 94.●

VFW SCHOLARSHIP PROGRAM

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. OXLEY. Mr. Speaker, "Youth, America's Strength," was the theme this year for the Veterans of Foreign Wars voice of democracy scholarship program. A young woman from Lima, Ohio, wrote the winning essay for our State. Elizabeth Heath's achievement in this program is certainly deserving of recognition.

I would also commend the Veterans of Foreign Wars for generously supporting students' higher education while encouraging the scholarship and patriotism of all participants. Like the selfless activities of youth Elizabeth cites in her essay, the scholarship program is evidence that the VFW is willing to act on its beliefs.

For the benefit of my colleagues, I am inserting Elizabeth's fine essay in the RECORD:

ELIZABETH HEATH'S WINNING ESSAY

Our country is one of vast resources. From the coal mines in the hills to the wheat fields of the plains, to the many lakes and streams, America is bountiful, and reaps of her treasures. Yet, the strength of America lies not in the coal fields, not in the wheat fields, nor even in the depths of the clear waters. The strength of America lies in her youth.

It is the spirit of the youth that represents the true patriotism upon which our country is based. Countless acts of the younger generation prove and reprove the clear hope that lies in them. Such an act is

the incident in the spring of 1982 in Fort Wayne, Indiana. Heavy rains flooded the streets and the homes of the city, leaving many stranded and helpless to the elements. Many more were threatened by the constantly rising flood waters. In desperation, the city of Fort Wayne asked for assistance to help block the waters from the remainder of the city. The response coming from within the youth of the city resounded from school to school and from area to area. Bonded together in body and in spirit, the students—college, high school, junior high and even elementary age performed the remarkable job of preparing the block of sandbags that was effective in protecting many of the remaining threatened areas of the city. These youth demonstrated a quality that is sometimes neglected to be recognized in American youth today. That is, that every person, young or old, has a genuine concern for human welfare and willingness to back and support one another in times of great need. There are many more examples of the strength of our country can depend on from the American youth. For instance, many schools are hard pressed for operating funds and rely on the vast amounts of publicity to convince the people to support a school levy. Although not of age to vote, many students sacrifice hours of effort to door-to-door advertisement and campaigning for the upcoming elections by carrying signs and bulletins and literary publications. Such students show a genuine caring for fellow man and for the welfare of classmates. These students are helping, by their contribution, to promote better education and in turn helping to make our country the democratic place that it is to live. Yet there are examples around us every day of the strength in America's youth. The only thing necessary is to look closely for the little things enacted everyday by people and youth around the nation. That strength is found in the little boy who donates a penny to charity at Christmas-time, and that strength is found in the child from a poor family who graduates from a top university. Strength is the large number of youth that volunteer in hospitals and nursing homes to help care for the needy. And strength is the young men and women who proclaim their loyalty and give thanks to a nation by helping it reach its quota in the volunteer armed forces. These young adults still believe in the preservation of freedom and will gladly lay down their lives for the love of their country like those who have gone before them. At the heart, strength is patriotism at its fullest. For patriotism, the genuine love for one's country, is alive and growing in the souls of American youth and is demonstrated not only by acts of sacrifice, but by the everyday things that young American citizens do simply out of love for their country and love for mankind.●

ON THE YATRON AMENDMENT TO RESOLVE THE CYPRIOT ISSUE

HON. JAMES FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. FLORIO. Mr. Speaker, I would like to congratulate my colleagues on the House Foreign Affairs Committee who today passed the Yatron amendment to the committee print of the foreign aid package.

This amendment sends a message of support to the Cypriot people, while at the same time putting the Turkish Government on notice as to the sentiments of this Congress and the American people, wishing them to remove their military forces from Cyprus.

The amendment calls for the amount of military assistance provided to both Turkey and Greece for the next 2 fiscal years not to exceed the amount of military assistance requested for 1984, so long as the military forces of both countries occupying Cyprus does not exceed the number agreed to by both Greece and Turkey in the 1959 Treaty of Alliance; these troop levels being 950 and 650 respectively. Today Turkey has well over 20,000 troops occupying Cyprus, and would therefore be encouraged to remove their troops from the island. While this amendment is substantially softer in dealing with the Cypriot issue than legislation I introduced earlier this year, I feel it is a significant step in the correct direction.●

CENTRAL U.S. COURT DIVISION FOR NORTHERN OHIO IS NEEDED

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. SEIBERLING. Mr. Speaker, on April 20, I introduced H.R. 2665, a bill to establish a new central division of the U.S. District Court for the Northern District of Ohio. The new division would be comprised of 14 counties which are currently part of the eastern division. The western division would not be affected by this bill.

H.R. 2665 would also require that the court for the new central division be held in Akron and Youngstown, with two active judges sitting full-time in Akron and one active judge sitting full-time in Youngstown. The bill retains flexibility in assigning judges, however, by providing the authority in the chief judge to assign judges to try cases in other divisions to the end that cases be tried and motions heard, as far as possible, in the court where the case originates.

I am happy to report that 15 other Members of Congress have joined in cosponsoring this bill including LYLE WILLIAMS, EDWARD FEIGHAN, and RALPH REGULA, all of Ohio, as well as Judiciary Committee members PAT SCHROEDER, HAMILTON FISH, DON EDWARDS, ROMANO MAZZOLI, WILLIAM HUGHES, JACK BROOKS, JOHN CONYERS, HENRY HYDE, MIKE SYNAR, HAROLD SAWYER, BARNEY FRANK, and HOWARD BERMAN.

Enactment of H.R. 2665 is necessary because a crucial need exists for at least one additional district judge to sit in the Akron court. Since 1979, just over 25 percent of all civil cases filed in the eastern division have been filed in Akron. Around 15 percent of all such cases have been filed in Youngstown. Yet only one judge sits in Akron and none in Youngstown, while nine sit in Cleveland where only 60 percent of the cases have been filed since 1979.

In the late 1970's, in an attempt to retain as many Akron-based cases in Akron as possible, Akron's district judge at the time, Judge Leroy Contie, entered into exchange agreements with the other judges in the eastern division. As a result, in 1980, 314 of the 621 Akron cases were retained by Judge Contie; in 1981, 363 of the 637 Akron cases were retained by Judge Contie. In 1982, because of delays having to do with the appointment and confirmation of a new district court judge, only 220 of the 966 Akron cases were retained in Akron. In sum, for that 3-year period, 897 of 2,224 Akron-based cases, or 40 percent, were retained in Akron.

I introduced legislation identical to this proposal in the 96th Congress in an effort to bring about a resolution. However, in lieu of solving the problem legislatively, a plan was implemented whereby judges sitting in Cleveland who were assigned Akron-filed cases would agree to try those cases in Akron unless the parties and counsel preferred to try the cases in Cleveland. Unfortunately, however, this plan has not been fully put into practice. In 1981, only one trial was conducted by a Cleveland-based judge in Akron. However, 19 Akron-filed cases were tried in Cleveland. In 1982, no Akron trials were conducted by Cleveland-based judges in Akron, but 18 Akron-filed cases were tried in Cleveland. Furthermore, even if the plan were working as hoped, it could be canceled at any time.

In the years 1980, 1981, and 1982, 122 trials were conducted in Akron of Akron-based cases. Of those 122 cases, 121 were tried by either Judge Contie, who was appointed to the sixth circuit in 1982, or by his successor, Judge David Dowd. Fifty-six Akron-filed cases were tried in Cleveland during those same years.

It was hoped that the need for additional judges in the Akron area would be partially filled in late 1982 when Judge Sam Bell, who resides in the Akron area and had designated his official station as Akron, joined the bench. However, a majority of the eastern division judges recently voted to designate Judge Bell's official station as Cleveland, despite Judge Bell's desire to sit in Akron.

Akron needs the additional judge that would be assigned as a result of this legislation. The area serves as headquarters for four large multina-

tional rubber companies—Goodyear, Firestone, B. F. Goodrich, and General—and for Mohawk Tire & Rubber, as well.

The proposed central division also serves as the home for a wide variety of other corporate headquarters or large industrial plants, including Roadway Express; Goodyear Airspace Corp.; the Hoover Co.; the Timken Co.; Diebold Inc.; GM-Lordstown; Chrysler-Twinsburg; the McNeil Corp.; PPG; Babcock & Wilcox; Ohio Edison, and Terex Corp. It is also the headquarters of two major labor unions—the United Rubber Workers and the International Chemical Workers. Also located there are two large Federal enclaves—the Cuyahoga Valley National Recreation Area and the Berlin Reservoir.

Such a concentration of industry and population guarantees that there will continue to be produced a great deal of Federal litigation. But without this legislation, those cases are far less likely to gain the attention they deserve because of the time, distance and extra costs involved in traveling to Cleveland for every motion or status call. The expense and inconvenience involved are more than just a burden to lawyers and litigants. Indeed, the situation imposes a real barrier to the delivery of justice. Courts exist to serve the public, but the public in Akron and Youngstown and many other parts of northern Ohio are surely being disserved by the current arrangement. H.R. 2665 would rectify this imbalance of justice and passage would be a positive change.●

TRIBUTE TO THE BOYS IN THE BAND

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. RAHALL. Mr. Speaker, I rise today to call the attention of the Congress to a group of immensely talented and dedicated individuals who have made and continue to make significant and substantial contributions to our Nation's culture and entertainment.

I refer to the artists who are the members of the American Federation of Musicians. Regardless of one's musical preference, ranging from the classics to pop music, each and every one of us has enjoyed the performance of musicians. Our lives have been touched, in one way or another by musicians, whether they are a jazz trio, a big band, a rock band, a 100-member symphony orchestra, or a country music group.

These remarks are intended as a tribute to those men and women who have, ever since 1896, when the American Federation of Musicians was founded, been so important not only to the arts in our country, but also to the American labor movement, although they may be a very special and different segment of the work force.

My thoughts today have been prompted by the recent release of a recording by Frank Sinatra, titled "Here's to the Band." The song is a salute to all musicians everywhere and it reflects Mr. Sinatra's high esteem for the musicians who have worked with him during his long career and also for every musician who has ever blown a horn, plucked or bowed the strings, struck notes on a keyboard, or played any kind of musical instrument. To quote the song's lyrics:

Many became famous, most of them go nameless, But I dedicate this song to all of them.

Coming from a family with an extensive broadcasting background, I would like to extend my full congressional recognition to the men and women of the American Federation of Musicians. I can think of no honor that would be more fitting and proper than to salute them through the title of this song. As the closing lyrics say:

Here's to those ladies and gentlemen, Here's to the American Federation of Musicians, I wouldn't have made it without them, Here's to the Band, Here's to the Band.●

D'AMOURS' PETITION PROVIDES OPPORTUNITY TO REPEAL WITHHOLDING OF DIVIDENDS AND INTEREST

HON. TOM LEWIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. LEWIS of Florida. Mr. Speaker, as a signatory of discharge petition No. 1, I would like to applaud the work done by my distinguished colleague from New Hampshire, Mr. D'AMOURS, for his leadership and tenacity.

It is imperative that we act on H.R. 500, which seeks to repeal the onerous withholding on interest and dividends, before millions of dollars are needlessly wasted by Government and commercial institutions preparing to implement this costly and unnecessary procedure to withhold the earnings of American taxpayers on July 1.

Americans nationwide overwhelmingly support the repeal of this intrusion by Government. They have flooded our offices with mail to that effect.

It is in the best interest of the American people that we bring H.R. 500 to the floor for full and open debate.●

KHRUSHCHEV'S PROPHECY

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. GOODLING. Mr. Speaker, in speaking of the United States, Khrushchev once said that the Soviets would bury us. Over the years, we have seen the truthfulness of this statement: The Soviets are succeeding in their goal of world domination, and with exception to Afghanistan, they are firing very few shots. In the past decade, working through proxies, the Soviets have been responsible for the vast numbers of people who have become displaced throughout the world, seeking refuge from tyranny at home. This in turn has helped to destabilize the economic and ethnic structures of the receiving countries. Since the fall of Indochina, some 1.5 millions have fled Vietnam, Laos, and Kampuchea. This in addition to the hundreds of thousands that have sought refuge from the Soviet-backed Vietnamese along the Thai-Kampuchean border. In Africa, Somalia has taken in over a million refugees that have been displaced because of Soviet-sponsored turmoil in Ethiopia; in Angola, some half million people have been displaced because of the Angolan civil war to which the Cubans have contributed not a little. Here in the United States, we have been able to absorb with little difficulty the 800,000 Cubans who fled the Castro regime, and are currently being flooded by vast numbers of illegal aliens from Central America, fleeing violence in El Salvador and Nicaragua. The numbers will surely increase tenfold or twentyfold with each Central and Latin American country which falls to Soviet-sponsored destabilization. Imagine what the impact will be and remember Khrushchev's words.

Underscoring this point, is a recent editorial from the Wall Street Journal entitled "The Durenberger-Mazzoli Act." For the edification and interest of my colleagues in the House, I submit the May 6 editorial for inclusion in the RECORD.

[From the Wall Street Journal, May 6, 1983]

THE DURENBERGER-MAZZOLI ACT

Tip Central America on its side and everything that isn't communist will roll into the U.S. Consider what is rolling out of El Salvador. The immigration service in 1980 caught almost 12,000 Salvadorans entering the U.S. illegally, caught 16,000 in '81 and 14,000 last year. No one knows, of course, how many weren't caught.

Central America is not yet completely up on its side, but Congress is working on it. Earlier this week, the House Intelligence Subcommittee voted 9-5 (nine Democrats, five Republicans) to end "covert" aid to the

Nicaraguan contras fighting that country's Sandinista dictatorship.

We don't want to get involved, the committee seems to be saying. Well, perhaps that's an unfair characterization of the committee's intentions. Perhaps we should be involved and "concerned" with Marxist destabilization efforts throughout Central America, but not deeply involved. Sort of involved. Or something.

Many Americans tend to get upset when they read that tens of thousands of Salvadorans have dumped themselves illegally in the U.S. But what would you do if you were a Salvadoran? You knew what had happened in Cuba and Nicaragua once the communists took over there, and you knew that in the face of a guerrilla insurgency obviously supported by the Marxist world, your future depended in great part on the attitudes of America's congressmen, who spend weeks arguing over whether to send your government $30 million or $60 million. It's not too surprising that under these circumstances, a lot of Salvadorans have decided to head north.

Actually it's only the Salvadorans who think of it as the "north." According to the immigration service nearly all the illegal Salvadorans enter through Texas, and they either stay there or go to California. Just like the Mexicans. This got us to thinking that most of the senators and representatives screaming the loudest about our "involvement" in Central America don't seem to be from Texas or California or New Mexico or any of those other places that are going to catch Central America's population if the communists get the region high enough up on its side.

Sen. Dodd is from Connecticut. Sen. Tsongas, Rep. Boland (the intelligence committee chairman) and Rep. Studds are from Massachusetts. Reps. Long and Barnes are from Maryland. And of course let us not forget Sen. Dave Durenberger, Republican of Minnesota and beneficiary of a lot of help from the administration in a tight election against a wealthy opponent, who is agitating inside the Senate Intelligence Committee for a covert-aid cutoff, and who has sent the president a letter saying he will not support requests for more Salvadoran aid unless there is progress on a negotiated settlement.

Somehow we don't suspect this group of congressmen lies awake at night worrying so much about the destabilization of Canada. And we guess we can see why they're so skeptical of the administration's argument that if we don't put the Marxists completely out of business down there, we're eventually going to have to come to terms with the tipping of Mexico, pop. 75 million and growing fast.

Mr. Reagan's view of Central America is that its future lies in an association with our system, not Cuba's or Nicaragua's or the Soviet Union's. And that it is in our interest to help these countries resist that system so they can get on with the hard business of democratic nation-building. And the sad truth is that that means giving them money and guns.

But perhaps Mr. Reagan's views really are out of step with the sense of Congress or even the American people. If Congress will not allow him to carry out his views, then he has an obligation to prepare to meet this country's traditional obligation to welcome people fleeing political oppression. If Congress wants to tie his hands, he should not accept some queasy compromise that allows him to do something but not enough, and saddles him with the blame for the eventual failure. Instead, he should give Congress its way, pulling all our military advisers and aid out of the entire region. Then he should withdraw his support for the Simpson-Mazzoli bill to control illegal immigration from the region, and instead announce the Caribbean Boat People's Act of 1983. It's the least we can do.

Alternatively, of course, we could face up to our inextricable involvement in the future of Central America, and help the nations there resist the attempts to turn them into places from which people flee.●

1983 AAA SCHOOL SAFETY PATROL LIFESAVING MEDAL AWARD RECIPIENTS

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. WOLF. Mr. Speaker, this month the American Automobile Association is presenting five young people the highest award given to members of school safety patrols throughout the United States, the AAA School Safety Patrol Lifesaving Medal Award.

The five recipients, credited with having saved a life while on duty at their school patrol posts, will join a list of 256 youths from 28 States and the District of Columbia who have been honored since the program began in 1949.

AAA has sponsored school safety patrols nationwide since 1920. Today the program includes more than 1 million children at 50,000 schools throughout the country.

An award review board composed of representatives from active national organizations in the fields of education, law enforcement and safety, selects deserving medal award recipients from those candidates who have been officially nominated for consideration.

The 1983 recipients of the AAA School Safety Patrol Lifesaving Medal Award are: Barry Lynn Bingham, 14, Second Street School, Frankfort, Ky.; Scott A. Jenkins, 10, Shaw Elementary, Tampa, Fla.; George Mershon, 10, Public School 19, Corona (Queens), N.Y.; Joelle L. Patton, 12, Beltsville Adventist School, Beltsville, Md.; Bobby Wilson, 12, Culver School, Millville, N.J.

These young people should be recognized for their exceptional judgment and courage in dangerous traffic situations.●

A TRIBUTE TO PETER J. SWOBODA

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. YATRON. Mr. Speaker, on May 22, the ASUR Club of Schuylkill County will honor Peter J. Swoboda of Frackville, Pa.; international vice president of the Amalgamated Clothing & Textile Workers Union and manager of the Pennsylvania Joint Board of the Union, as ASUR Man of the Year. The testimonial dinner will be held at St. Mary's Center in Mahanoy City, Pa.

Pete Swoboda is a well-known and widely respected figure in the Sixth Congressional District of Pennsylvania. In a recent newspaper article in the Pottsville Republican, Pete was described by officers of the American-Slovak-Ukrainian-Russian Club (ASUR) as "a man whose labor, civic, and political activities have contributed to the enhancement of the quality of life for the people he has been privileged to serve."

Peter J. Swoboda was born in Lykens, Pa., one of seven children of Joseph and Domenica Swoboda. He has served as an advisory board member of the Department of Public Welfare of northeastern Pennsylvania, is a former trustee of the Locust Mountain and Ashland State general hospitals, a former director of the March of Dimes Foundation, United Fund, and Schuylkill County Economic Opportunity Cabinet. Currently, he is a trustee of the Holy Ascension Orthodox Church, a member of the executive committee of ASUR, Frackville Elks Lodge 1533, Pottsville Club, Penn State Nittany Lion Club, and the Jerry Wolman Chapter of the Pennsylvania Hall of Fame.

He began his service with the Amalgamated Clothing Workers of America in 1933 and is a charter member of Lykens Local 317. From 1935 to 1938 he was a national organizer for the Amalgamated Clothing Workers of America. In 1938, he became the business agent of the Pennsylvania Joint Board of the Amalgamated Clothing Workers of America. In 1948 he was selected to be the assistant to the manager of the Pennsylvania Joint Board and in 1968, he was elected manager of the board, a position he holds today. In this position he represents more than 10,000 members employed in the apparel industry in eastern Pennsylvania. In 1960 he was elected international vice president of the Amalgamated Clothing Workers of America.

Pete, in addition to his other outstanding achievements serves as vice president of the Pennsylvania State

AFL-CIO Council, director of the Amalgamated Bank of New York, director of the Amalgamated Life Insurance Co., Inc., of New York, and trustee of the Amalgamated Cotton Garment and Allied Industries Fund.

Mr. Peter J. Swoboda, has continually strived to assist and to improve the lives of the members of the Amalgamated Clothing Workers of America. His dedication to his work and his community is an inspiration to us all. I know that all my colleagues will wish to join me in congratulating my good friend, Peter Swoboda, on being named ASUR Man of the Year, as well as for his many other outstanding achievements and contributions.

I am honored to know a man of his stature and I offer my sincere wishes to him, his wife Anna, and their two children, David and Nina. We can all rest secure in the knowledge that Pete will continue to be a most important member of our community.●

THE 100TH ANNIVERSARY OF ELKS LODGE No. 21

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. RODINO. Mr. Speaker, it is with great pleasure that I recognize Newark Lodge No. 21 of the Benevolent and Protective Order of Elks, which this year marks its 100th Anniversary.

Chartered on April 8, 1883, the lodge has made numerous contributions to the community and to society for the past century. On May 15, the lodge will hold its official anniversary celebration. I salute the lodge members on this very special occasion.

I am doubly honored to recognize the achievements of this lodge, not only as a Congressman who has seen their outstanding work but also as a member of lodge No. 21 myself.

Perhaps most noteworthy is the excellent work of lodge members in helping crippled children, including the assistance they gave in building one of the first schools designed specifically to meet the needs of handicapped children which was built in Newark many years ago. Other endeavors on behalf of blind children, destitute children, and handicapped children are too numerous to name here. Lodge No. 21 has always been there, however, to reach out a helping hand to those in need.

Mr. Speaker, I know my colleagues will join me in wishing sincere congratulations to lodge No. 21 as they commemorate 100 years of service to the community. I know that the next century will see the continuation of this tradition of excellence, of community service, and of humanitarian activities.●

"LOW-PROFILE" GIANTS: WITT AND JACK STEPHENS

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. ALEXANDER. Mr. Speaker, we have a lot of serious arguments on this floor about economics, but, when it comes to fundamentals, there are many more points of agreement between Members—even between Democratic and Republican Members—than there are disagreements.

We would agree, for example, that if you wish to be truly literate on either the subject of business or that of economics, you have to be somewhat conversant with the Wall Street Journal. Day after day, week after week, year after year, the Journal keeps to a high standard, both in style and in content. And I say this even though the Journal has taken out after my positions once or twice.

A recent issue of the Journal highlighted the success and contributions to investment banking of the firm of Stephens, Inc. of Little Rock, Ark. Among other facts, the article by staff reporter David Stipp pointed out that Stephens has become the Nation's 12th largest investment banking house with only about 150 employees. This compares to the 2,300 employees of a well-known New York firm only slightly larger in capital terms.

But it is not only in business acumen or contributions to the field of finance that the two owners of this remarkable home-State enterprise excel. Both W. R. Stephens and Jackson Stephens, the brothers who developed the company from a shoestring into the monolith that it is today, are good friends of mine. Sometimes we agree on politics, and sometimes we do not, but there is one subject on which all politicians and voters in Arkansas would agree. And that is that the Stephens brothers, Witt and Jack, are an integral part of the process in our State—good citizens whose support for grassroots democracy has shown itself in a variety of projects.

I do not want to make them sound like old folks, because they are both vigorous men, still in their prime at the ages of 75 and 59 respectively, but the fact is that, over the last several decades, they have served as godparents to more than one Arkansas public servant who went from local obscurity to a distinguished and nationally recognized career. Their influence has been both positive and progressive, and many a civic improvement got accomplished when it might not have been because the Stephens brothers put their shoulders to the wheel. And it is fair to say that both the brothers and their company have accounted for much of the economic progress which our State has registered on the path of industrialization.

So I am pleased to call the saga of Witt and Jack Stephens, the low-profile giants of Stephens, Inc., to your attention, and I congratulate the Wall Street Journal for providing yet one more example of what folks in Arkansas are made of.

The article follows:

[From the Wall Street Journal, Apr. 26, 1983]

QUIET APPROACH: DESPITE A LOW PROFILE, STEPHENS, INC., THRIVES AS INVESTMENT BANKER

(By David Stipp)

LITTLE ROCK, ARK.—When Stephens Inc. talks, people listen—here in Arkansas.

But even though Stephens is the nation's biggest investment banker off Wall Street, it sometimes gets scant attention from out-of-staters. For example, Gordon Smale, the president of Denver-based Atlantic Oil Corp., told Stephens he didn't have time to talk when the Arkansas company called him in January about a possible tender offer by Stephens itself for Atlantic. "I pictured a small brokerage house with a staff of two," he explains.

A few days later, Stephens called him again with a plan to buy all of the oil and gas concern's common stock outstanding for about $37 million. This time Mr. Smale had time to talk. Afterward, he scurried to find out more about his Arkansas suitor from contacts in the financial community but could learn only that Stephens is long on capital and short on renown.

Stephens's low profile is partly the result of its location in this Southern state's government seat where capital business is usually of more concern than business capital. Probably more important, however, is the business style of its owners, brothers W. R. "Witt" and Jackson T. "Jack" Stephens. During the company's 50-year history, 75-year-old Witt, Stephens's founder and now one of its directors, and Jack, the company's 59-year old chief executive, have quietly made Stephens into the Southern gentleman of investment bankers by catering to government, corporate and high-toned private customers.

Though Stephens underwrites stock offerings, places municipal bonds and invests its own money like any Wall Street investment banker, it offers few of the consumer services, such as money-market funds, that have helped inspire the ad splashes of some of its New York competitors. And though Stephens is gradually enlarging its sphere of operations, it hasn't needed a high profile because much of its business is generated through high-placed friends.

Indeed, the brothers' power behind the scenes in politics and business has made operating outside the public arena almost second nature for them. Moreover, Jack Stephens says, many of the company's clients prize confidentiality and are attracted to Stephens's quiet ways.

Atlantic Oil's Mr. Smale says Stephens's "laid-back, family-oriented" way of doing business made possible a friendly merger between his company and Stephens. "New York investment bankers usually treat us like we're just hicks from the sticks," he says, adding that several such forms offered to help him fight off Stephens's takeover bid "for a mere million dollars." But during negotiations with Stephens, which included

family-sized lunches in the company's baronial dining room and drinks in the company's in-house bar, Mr. Smale began to see the Arkansas company as more friend than foe. After dickering with Stephens for a few weeks, Atlantic agreed to a sweetened acquisition offer of $44 million.

Mr. Smale, whom Stephens plans to retain to help run the small, but oil-rich, Denver concern, says that as negotiations progressed with Stephens, he became increasingly impressed with the reverse side of its congenial style. "You have a tendency to think that since they're folksy, they're sort of loosely run, but that's misleading," he says. "When they focus on something, they're really hard-hitting."

Stephens, Mr. Smale says, apparently did "very good homework" in sizing up Atlantic before making its tender offer and seemed aware that several of Atlantic's biggest holders needed cash and were willing to sell their shares. Moreover, he says, Stephens paid for tendered Atlantic shares with "surprising" speed, sometimes wiring millions of dollars only hours after the shares were tendered. "This made a tremendous impression on the brokerage community in Denver," he adds. "Wall Street brokers tend to drag their feet on payments."

Stephen's ability to swoop down with breathtaking speed on acquisition prospects such as Atlantic Oil has been honed on many such purchases. Buying and selling companies is more "fun", and often more profitable, than most traditional investment-banking activities, Jack Stephens says. Under his management, the company has owned everything from a nursing/home chain to a small airline. Currently it has 123 operating units, the largest of which is Stephens Production Co., whose chief business is producing natural gas.

But the company's major enterprise, Jack Stephens says, has always been investment banking. And in that line, Stephens has enough financial weight to swing substantial acquisitions without straining. The company reported assets of $239 million as of May 31, 1982, but that is a considerable understatement of its size, say Little Rock businessmen familiar with Stephens. The Stephens empire, including companies owned personally by the brothers, is probably worth more than $1 billion, they say. Part of the understatement, one businessman says, is that Stephens values its natural-gas reserves, totaling about 600 billion cubic feet, at original rather than market value.

Despite the company's size, Stephens's investment/banking staff of about 150 is housed in a decidedly plain, gray building that might be mistaken for the quarters of a small-town newspaper. (Inside, however, are all the signs of wealth, including enough art objects to fill a small museum.) Stephens, ranked as the 12th-largest U.S. investment banker in terms of capital by Institutional Investor magazine, is sparsely staffed compared with its New York bretheren, Morgan Stanley & Co., which is only slightly larger than Stephens in terms of capital but which provides a greater variety of consumer services than the Arkansas concern, has a staff of about 2,300 to handle its investment-banking operations. Stephens's small staff means hard work for its employees, who handle some 7,940 accounts. One employee recalls he worked for 63 consecutive days, including Saturdays and Sundays, immediately after joining the company.

The company's sometimes demanding pace reflects the philosophy of founder Witt Stephens, who once wrote a "book" about salesmanship that contained only the word "work" repeated on every page. The more colorful of the two brothers, Witt was reared on a farm about 40 miles south of Little Rock and left home during the Depression to sell belt buckles for a jewelry company. A few years later, he borrowed $15,000 to start Stephens, whose initial successes came quickly as he bought municipal bonds at Depression-produced prices of 25 cents on the dollar and sold them later for nearly face value. He soon branched into real-estate, oil and gas investments.

A large man with an ever-present cigar and a voice one acqaintance says sounds like "peas pouring onto a dry cowhide," Witt Stephens proved adept at combining his sometimes ruthless business tactics with country charm. In 1945, he was questioned at a hearing in Philadelphia by a Securities and Exchange Commission lawyer about his proposed purchase of a Fort Smith, Ark., gas utility. "This nice young fellow from Harvard was questioning me awful hard about where I was going to get the cash for the deal," Mr. Stephens recalls. After letting the lawyer seem to back him into a corner, Mr. Stephens says he looked at the judge and, tongue in cheek, drawled, "I brung it with me" while reaching into his pocket for a cashier's check for the required amount. The acquisition was approved. "We had a lot of fun in those day," he says.

In 1954, Mr. Stephens bought a controlling interest in Arkla, Inc., an ailing Little Rock-based gas utility. Shortly after that, he became Arkla's chief executive and turned over most of Stephens's business chores to his younger brother, who had joined the company in 1946.

The utility regained its financial health under Witt Stephens's management, which, Mr. Stephens concedes, included "drastic" measures such as cutting Arkla's staff by 500 employees, or 22 percent of its work force. He made every Arkla employee, including himself, responsible for sales and was occasionally seen going door-to-door selling the company's gas-powered air conditioners.

POLITICAL INFLUENCE

Witt Stephens isn't averse to using his considerable political influence in Arkansas as a business tool. In 1957, for example, he persuaded the state's Public Service Commission to adopt a new rate-making rule that would have allowed Arkla to pass through more cost to consumers that it had in the past. Industrial consumers objected, and the rule was eventually struck down by the state supreme court. Then Mr. Stephens's political machine went into high gear; and within a week of the court ruling, a bill incorporating the new rule was passed by the state legislature and signed into law by Gov. Orval Faubus.

Mr. Faubus, the six-time Arkansas governor best remembered for his segregationist stance, says the Stephenses are still Arkansas's "most powerful single political force" and can "dry up" funds for candidates they oppose. But in last year's governor's race, the brothers supported opposing candidates, some say to cover their bases in an election whose outcome was uncertain. The brothers, however, say the split resulted from ideological differences. Witt, a rock-ribbed Democrat who helped Bill Clinton win against incumbent Republican Frank White, says opposing his brother's candidate took all the "fun" out of the race Mr. White now works for Stephens.

Working for the various Stephens enterprises can require fortitude as well as stamina. After Witt stepped down from his Arkla post in 1973, he was irked by a series of new policies instituted by his hand-picked successor, Sheffield Nelson. Among the policies were salary increases for Arkla employees, some of whom had qualified for food stamps while working for the lean operation run by Mr. Stephens. A bitter feud between the two ensued.

In the course of the fight, Mr. Stephens tried to have Mr. Nelson fired. However, Mr. Nelson eventually prevailed as Arkla's profits rose under his management. Looking back on the experience, Mr. Nelson expresses respect for his old mentor but says Witt Stephens "can be quite unreasonable and mean." Mr. Stephens, whose company no longer controls Arkla, declines comment on the former feud but adds, "I don't want to say one thing against (Mr. Nelson)."

BITTER PILLS

In recent years, changes of the guard in Arkansas power circles and stricter regulation of business and political activities have sometimes proved bitter pills for the Stephens brothers. In 1978, for example, both Stephenses were in hot water with regulatory agencies. The SEC accused Jack, along with his friend T. Bert Lance, the budget director under President Carter, and other defendants, of violating federal disclosure requirements in an attempt to take over Financial General Bankshares Inc., a Washington bank-holding company. Mr. Stephens signed a consent order, without admitting or denying guilt, agreeing not to commit future violations of securities laws.

About the same time, the Arkansas Public Service Commission took Witt's Arkansas Oklahoma Gas Corp., a gas utility, to task for buying gas at a higher rate from Stephens Production Co. than from other gas suppliers. The controversy involved a contract negotiated in the early '70s allowing Stephens to increase its prices to Arkansas Oklahoma in return for an unwritten promise by Stephens to make greater gas reserves available to the utility. The commission eventually upheld the contract but admonished the utility to be less chummy in the future with its affiliated gas supplier. N. M. Norton, former chairman of the state's utility commission, says that under modern regulation, Stephens's informal arrangement with Arkansas Oklahoma wouldn't have been allowed.

Witt Stephens asserts he has never taken advantage of the less-than-arms-length relationships between Stephens Inc. and the gas utilities he has controlled. He claims that the long-term contracts Stephens Inc. signed when he was Arkla's chairman to sell Arkla gas at low prices have cost him $75 million through the years and were "the biggest mistake" of his life.

CUTTING LOSSES

Jack Stephens acknowledges that he has had to use his imagination on occasion to cut losses on experiments that fizzled. But, he says, Stephen's entrepreneurial posture has been necessary for it "to stay out of the way" of New York investment bankers. Stephens has sought its own "niches," he says, tailored to its location and abilities, such as its specializing in agricultural investments. And "if we can't stay out of (New York competitors') way, we try to join them" as part of underwriting teams, he says.

One of Stephen's biggest problems these days, Jack Stephens says, is convincing potential customers with widespread interests

that Stephens is more than just a regional investment banker. He notes that besides the company's recently acquired presence in Denver, Stephens not long ago added an overseas office in Hong Kong and changed its outside auditor to a national firm from one in Little Rock to accommodate its expanding business. He adds that other moves to give Stephens more nationally competitive operations are in the works, but he declines to discuss them.

Signs of Stephens's increasingly cosmopolitan profile extend to a room at the company where "Mr. Witt," as Stephens's employees call the founder, formerly kept a large portrait of Will Rogers, one of his heroes. The portrait was recently removed by a New York interior decorator in favor of pictures more in tune with Stephens's new image. However, as he looks at the demoted portrait, resting on the floor, Witt Stephens isn't too disturbed. He laughs and says, "I'll have it put back up when the decorator goes back to New York."●

FATHER EDWARD KACZOROWSKI CELEBRATES 25TH ANNIVERSARY AS PRIEST

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. DYSON. Mr. Speaker, it is with a deep sense of pride that I call the attention of the U.S. Congress to Father Edward Kaczorowski. As the pastor of Our Lady of Good Counsel Church in Secretary, Md., Father Kaczorowski will be celebrating the 25th anniversary of his ordination to the priesthood on Sunday, May 15, 1983, which is also his birthday.

Father Kaczorowski was born in Hanover Township, Pa., on May 15, 1928, the son of Maryanna and Thomas Kaczorowski. He attended the public schools of Hanover Township, and began his studies for the priesthood at Kings College in Wilkes-Barre, Pa. Father Kaczorowski enrolled in the seminary at Seton Hall University in South Orange, N.J., and finished his training at St. Charles Borromeo Seminary in Overbrook, Pa.

He was ordained on May 15, 1958, by His Eminence John Cardinal O'Hara at the Cathedral of Sts. Peter and Paul in Philadelphia. Following his ordination, Father Kaczorowski was first assigned to St. Hedwig's Church in Wilmington, Del., and later served at St. Thomas Apostle Church in Wilmington. His first pastor assignment was at St. Stanislaus Kosta, also in Wilmington, where he served for 11 years.

In 1979, the parishioners of Our Lady of Good Counsel Church in Secretary, Md., were fortunate to have Father Kaczorowski come and join them as their pastor. He has been pastor of Our Lady of Good Counsel for the past 4 years, and has distinguished himself there by his exemplary record of fine and faithful service to his parish.●

HELPING OUT THE SPECIAL OLYMPICS

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. HOYER. Mr. Speaker, I would like to take this opportunity to commend the efforts of Roy Rogers, who has taken an active role in fundraising efforts for the Special Olympics chapters of the District of Columbia, Maryland, and Virginia. The moneys raised from these efforts will insure that our special athletes have a year-round sports program, and will be able to participate in the International Summer Games in Baton Rouge, La., in July.

Mr. Rogers has long been a favorite with Americans. As a country western singer and a member of the Sons of the Pioneers, the young man named Leonard Slye brought joy to millions who heard his songs on radio programs and recordings. Then in 1937, he began making movies for Republic Pictures, and, as Roy Rogers, he embarked on his career as "King of the Cowboys." With his wife, Dale Evans, and his golden palomino Trigger, he appeared in films, television specials and finally on his own television show. In 1975, Mr. Rogers was the recipient of the first annual Thomas Edison Great American Award. He received the Pioneer Award of the Academy of Country Music in 1976, and, as a member of the Choctaw Tribe, he was named Honorary American Indian of the Year by the American Indian Exposition.

Both Roy and Dale have greatly contributed to many humanitarian causes, performing for American veterans of World War II, Korea, and Vietnam; chairing the National Committee for Prevention of Child Abuse; and appearing at more than 6,000 charitable events.

Most of us have a special place in our hearts for Roy Rogers and Dale Evans. Throughout the last four decades, they have played a unique role in our culture, offering an oasis of calm, decency, joy, and caring for many to emulate.

Mr. Speaker, I am pleased to honor today this man who continues to do so much for our young people, and I would like to express the thanks of our community for his efforts on behalf of the Special Olympics.●

NEW ENGLAND COUNCIL ADOPTS POLICY POSITIONS

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mrs. SCHNEIDER. Mr. Speaker, the New England Council is unique in its role as the only regional trade association representing a wide range of business interests. The council's membership roster lists over 1,200 top businesses in New England. Collectively, the council members employ more than one-sixth of the working population of New England.

The council has been in existence almost 60 years and 2 years ago opened its Washington office. The chairman of its board of directors, Bruce Sundlun, chief executive officer and president of the Outlet Co. in Providence, R.I., has done an outstanding job in heightening the visibility of New England's business interests in the political arena of Washington. Mr. Sundlun recently conducted the council's board of directors meeting in Washington. At this meeting, the council adopted many policy positions designed to assist in the economic growth of New England and the Nation. Policies were adopted in many areas including high technology and taxation. Among the positions adopted was one relating to the Federal deficit.

Mr. Speaker, I would like to place into the RECORD the council's position on several current issues. While none of us can give our unqualified endorsement to each of these proposals, I firmly believe that the private sector plays a crucial role in the democratic process by working with elected officials. The New England Council, Inc., is a superb example of an association that seeks to bring the message of regional business interests to the forefront in Washington.

Thank you, Mr. Speaker.

NEW ENGLAND COUNCIL'S POLICY POSITIONS

1. REDUCTION IN THE FEDERAL DEFICIT

Sound fiscal policy is a keystone to the strength of the United States economy. Substantial deficit reduction is, therefore, necessary to reduce interest rates and stimulate the forces of growth in the economy.

The New England Council supports sound fiscal behavior by the federal government. No effort to reduce deficits can succeed without substantial reductions in spending for entitlement and discretionary programs, including defense and non-defense items.

In addition to cuts in spending, the Council would favor additional examination of the revenue system. Potential measures for examination include the value added tax and consumption-based taxes.

The Council supports such measures with the provision that revenue raising and reductions in expenditures be broad-based and impact upon the regions of the nation in an equitable manner. An additional import fee on oil cannot, therefore, be supported.

Further, the Reagan Administration's contingency plan, with a reliance upon corporate income surcharges, does not adequately address the basic structural causes of future deficits.

2. BASIC AND APPLIED RESEARCH

Research performed by universities is a significant source of support for the nation's professorial and doctoral candidate teaching staff. Recent declines in basic research funding will ultimately result, therefore, in a diminished national scientific educational capacity. The Council supports the following legislative program to strengthen our national scientific educational institutions while adding to our nation's scientific knowledge and improving its research productivity.

Encourage corporations to do more applied research through universities.

(a) Amend the 25% Incremental R&D tax credit to allow companies a 12.5% noncremental credit for all R&D expenditures through universities.

Company-financed applied research that is conducted in-house serves only the research ends of the individual company. The education enhancing benefits of university performance of such research are not obtained. Amendments to the R&D Tax Credit can be enacted to encourage industry to obtain both the ends of the research and the education enhancing benefits of its performance by universities.

Encourage corporations to donate research and teaching equipment to universities.

(a) Increase allowances for deductions for equipment donations to universities to the full fair market value of the equipment when the donor contributes an additional 25% thereof in cash or services for user training, maintenance or software.

Provide for Expanded Future Government Funding of Basic Research.

(a) Create a Basic Research Trust Fund to become effective in 1985.

To help reverse the real decline in basic research spending, a Basic Research Trust Fund, analogous to the Highway Trust Fund, should be created and funded from an identifiable source of revenue. The proceeds of this fund would be allocated by an organization like the National Science Foundation, which is wholly devoted to managing funds allocated for basic research.

3. TAXATION

Sound fiscal policy is a keystone to the strength of the United States economy. Substantial deficit reduction is, therefore, necessary to reduce interest rates and stimulate the forces of growth in the economy.

The New England Council supports sound fiscal behavior by the federal government; to reduce sharply escalating federal deficits it is, therefore, necessary to substantially decrease expenditures.

If such measures are insufficient to maintain the integrity of the federal budget, additional examination of the revenue system will have to be undertaken. Potential measures for examination include:

Value added tax, and

Consumption-based tax.

The Council supports such measures with the provision that revenue raising and reductions in expenditures be broad-based and impact upon the regions of the nation in an equitable manner. An additional import fee on oil cannot, therefore, be supported.

Further, the Reagan Administration's contingency plan, with a reliance upon corporate income surcharges, does not adequately address the basic structural causes of future deficits. If necessary, The Council would instead recommend:

Deferral of income tax indexing scheduled for 1985, except in the case of capital gains and capital assets.

4. SCIENCE AND TECHNOLOGY EDUCATION

The New England Council endorses the need for major federal legislation that addresses the national need to improve our science and technology education system. The economic vitality of the New England region depends in large part on the continued growth of the knowledge intensive industries that predominate here. Knowledge intensive industries, if they are to remain competitive in the world economy, require a quantitatively-oriented, technically-proficient workforce.

Several members of The New England Congressional delegation including Senators Tsongas, Stafford, Pell, and Dodd, have introduced legislation to improve the quality and quantity of the nation's science, math, and engineering education. Initiatives such as these are necessary if the United States is to maintain its scientific and technological leadership.●

EXPLANATION OF MISSED VOTES

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Ms. FERRARO. Mr. Speaker, because of business commitments in my New York office, I was unavoidably absent from the House during the session of Monday, May 9. Had I been present, I would have voted as follows on the issues considered that day.

Rollcall No. 90: To suspend the rules and pass H.R. 2357, to provide for an increase in the number of members of the Congressional Award Board. "Yea."

Rollcall No. 91: To suspend the rules and pass H.R. 2173, to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to authorize additional appropriations. "Yea."

Rollcall No. 92: To suspend the rules and pass H.R. 2174, to amend title 18 of the United States Code to prohibit certain tampering with consumer products. "Yea."

Rollcall No. 93: To suspend the rules and pass S. 653, to amend title 10, United States Code, to establish a Foundation for the Advancement of Military Medicine. "Yea."

Rollcall No. 94: To approve House Resolution 184, the rule making in order consideration of H.R. 2175, the Justice Assistance Act. "Yea."●

PERSONAL EXPLANATION

HON. ESTEBAN EDWARD TORRES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. TORRES. Mr. Speaker, I was not present for House proceedings on Monday, May 9, 1983, due to official business I conducted in my district. Had I been present on the House floor, I would have cast my votes in the following manner:

Rollcall No. 90: H.R. 2357 to provide for an increase in the number of members of the Congressional Award Board (275 to 2) "aye."

Rollcall No. 91: H.R. 2173 to authorize additional appropriations to carry out the Drug Dependent Federal Offenders Act (275 to 8) "aye."

Rollcall No. 92: H.R. 2174 to prohibit certain tampering with consumer products (292 to 0) "aye."

Rollcall No. 93: S. 653 to establish a Foundation for the Advancement of Military Medicine (295 to 0) "aye."

Rollcall No. 94: House Resolution 184 the rule under which the bill H.R. 2175 is being considered (267 to 32) "aye."●

PERSONAL EXPLANATION

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. OXLEY. Mr. Speaker, I was absent on official business during yesterday's proceedings due to the President being in Ohio to pay tribute to our former colleague John Ashbrook. I was proud to accompany the President on this important occasion and to welcome him to my district and my State.

Had I been present yesterday I would have voted: "yea" on rollcall 90, "yea" on rollcall 91, "yea" on rollcall 92, "yea" on rollcall 93, and "yea" on rollcall 94.●

A TRIBUTE TO THREE MAINE BOY SCOUTS

HON. JOHN R. McKERNAN, JR.

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. McKERNAN. Mr. Speaker, I ask my colleagues to join me today in honoring three Boy Scouts from North Berwick in the First District of Maine, which it is my privilege to represent. On May 15, these Scouts will receive the highest award in Scouting: The coveted "Eagle Scout Award."

In order to attain the rank of Eagle Scout, a boy must demonstrate unusual leadership ability, earning at least

21 merit badges, and organizing, financing, and seeing through a service project for the community. The qualifications for an Eagle Scout are so rigorous that only 1 Scout in 500 is able to attain that rank; these young men are worthy of our highest praise.

Andrew Merrill, 14, the son of Mr. and Mrs. Jay Merrill, is a freshman at Noble High School. He is on the soccer and track teams, is interested in history, and has already won the Scouts' Arrow of Light Award. His service project involved building habitats for wood ducks in a North Berwick conservation area.

Michael Budd, 14, the son of Mr. and Mrs. John Budd, attends Noble Junior High School. He is a member of the drama club, and he plays Babe Ruth League baseball. His fellow Scouts have elected him senior patrol leader. His service project involved updating the veterans' service plaque located in the North Berwick Commons to include Vietnam war veterans' names.

Scott Normandeau is also 14, and is the son of Mr. and Mrs. Robert Normandeau. His is a member of the Honor Society and the drama club, and plays both junior high and Babe Ruth league baseball. Scott is a patrol leader, and has won the Scout's Arrow of Light Award. His service project was to build a ramp for the handicapped at the Mary Hurd Hospital in North Berwick.

I join parents, friends, and Scouts in congratulating these young men on their achievements, and in wishing them success in their future endeavors.●

TRIBUTE TO HERMAN BERMAN

HON. HOWARD L. BERMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 10, 1983

● Mr. BERMAN. Mr. Speaker, I rise today to pay tribute to Mr. Herman Berman, who has been selected by the State of Israel to receive the prestigious Jerusalem Award. He will be honored at the annual Israel Dinner of State on Sunday, May 15, at Temple Adat Ari El in North Hollywood, at which the Consul General of Israel, Mr. Benyamin Navon, will appear as the guest speaker. I think it is highly appropriate that Israel has chosen to honor Mr. Berman with the Jerusalem Award for his tireless work on behalf of the State of Israel and his fellow Jews.

Herman Berman has been devoting his time and efforts to the cause of the poor and the downtrodden since the time of World War II, when he worked to raise funds to send food, medical supplies, and clothing to the victims of the war. In 1950, he volunteered as a fundraiser for the United Jewish Welfare Fund. Eventually, he assumed greater responsibilities, becoming UJWF chairman for all of the outlying areas of Greater Los Angeles. During the Six-Day War, as Israel chairman of the District Grand Lodge of B'nai B'rith, he spurred lodges in seven Western States and British Columbia to a national record in bond purchases. Throughout that time, he worked around the clock to obtain money for the Israel Emergency Fund, addressing as many as 10 meetings a day of concerned friends of Israel in the San Fernando Valley. Simultaneously, for many years he served as chairman of the San Fernando Valley campaign of Israel bonds and president of the valley area council of the Jewish Federation Council. Most recently he served as Israel bond chairman of Adat Ari El, and he continues to be one of the most sought-after speakers in the bond speakers bureau.

Herman Berman and his wife, Annie, have inspired in their daughter, Tara Kaiserman, and are inspiring in their three grandchildren, Dafna, Mya, and Elon, the same values that have made their lives meaningful. He personifies the highest level of achievement on behalf of his fellow man, his fellow Jew, and the State of Israel.

Mr. Speaker, I take pride in being able to join with all those who will come together on May 15 to honor Herman Berman. I congratulate him for his years of service and dedication to our community, and extend my best wishes to him and his family on this very happy occasion.●

SENATE—*Wednesday, May 11, 1983*

(Legislative day of Monday, May 9, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

In a moment of silence, our Father, we commend Mrs. Baker to Thy loving care for her complete restoration while she is in the hospital, and pray for Thy peace to fill Senator BAKER's heart.

The fear of the Lord is the beginning of knowledge.—Proverbs 1: 7.

*If any of you lacks wisdom, let him ask of God * * * and it will be given him.*—James 1: 5.

It would be simple, Heavenly Father, if some were wrong and some were right, but what is the remedy when everyone is right and disagreement persists? The strength of democracy is its weakness. How is disagreement resolved when all are right? The answer is in Thy promise, dear Lord, "I have counsel and sound wisdom * * * by me kings reign and rulers decree what is just; by me princes rule and nobles govern the earth."—Proverbs 8: 14-16.

Gracious God, give divine wisdom to Thy servants as they struggle with imponderables and lead them to compromise which is just and righteous. We pray in the name of Him who is the Truth that frees. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE BUDGET RESOLUTION

Mr. BAKER. Mr. President, when we resume consideration of the budget resolution, I am told that we will have 14 hours and 36 minutes remaining: Senator DOMENICI has 6 hours and 49 minutes remaining and Senator CHILES has 7 hours and 47 minutes remaining. We are a little behind schedule on where I had hoped we would be at this point in the consideration of the budget resolution. But I would think, after looking over the situation last evening and this morning, that it is possible—perhaps not likely, but possible—that we could finish that resolution today, particularly if we stay late this evening.

I wish to advise the Senate, Mr. President, that it is the intention of the leadership on this side to ask the Senate to remain in tonight past the dinner hour, perhaps substantially beyond the dinner hour, in order to either finish this resolution or to consume a substantial part of the 14½ hours remaining. We will soon have been on this resolution for 2 weeks.

If we cannot finish tonight, Mr. President, and I do not plan to ask the Senate to stay extremely late, if it is clear we cannot finish tonight, then I hope we can finish in the course of the day tomorrow. If we cannot, of course, we would be in on Friday on the resolution as well, but I think it is possible to finish tonight.

When we finish, Mr. President, the next order of business will be the resumption of the consideration of the immigration bill. I think we can finish that item this week as well. I will confer with the minority leader on the remainder of the schedule of the Senate so that we can try to arrange it to suit the convenience of most Senators.

We have a lot of work to do, Mr. President, and I think we ought to just get on with it.

I would like to explore with the minority leader and the managers the possibility of a time to vote on the remaining principal issues. I have an idea the Chafee amendment will be offered on this side, and I hope that will be early today. As I understand, it will be an amendment to the Domenici substitute.

After that, as far as we are concerned on this side, I think any time of the day we will be ready to go to a vote on the Domenici substitute. After that, it is a short distance, I would assume, to the question of final passage of the joint resolution, as amended, if it is amended.

I will consult with the minority leader and we will try to have another announcement to make during the course of the day. How late we stay and our schedule on tomorrow and Friday will depend on how well we can dispatch the pending business.

PUBLIC FINANCIAL DISCLOSURE REPORTS DUE MONDAY, MAY 16, 1983

Mr. BAKER. Mr. President, public financial disclosure reports required by Senate rule 34 and the Ethics in Government Act of 1978, as amended, must be filed no later than Monday, May 16, 1983. These reports should be submitted to the Senate Office of Public Records, 119 D Street NE., room A-623, Washington, D.C. 20510. That office will be open Saturday, May 14, from 9 a.m. until 12 noon; Sunday, May 15, from 12 noon until 3 p.m.; and Monday, May 16, from 9 a.m. until 5 p.m. Questions should be directed to the Select Committee on Ethics at 224-2981 or the Senate Office of Public Records at 224-0322.

Mr. President, I have no further need for my time under the standing order. I am prepared to yield it to the minority leader if he wishes it.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. BYRD. I thank the majority leader.

THE BUDGET RESOLUTION

Mr. BYRD. Did I understand the majority leader to say that the Senate may very well approach a vote on the Baker-Domenici substitute today?

Mr. BAKER. Yes, I would hope so. I suspect we have to deal with the Chafee amendment first. Then after that, as far as we are concerned on this side, I think we are within range of a vote today. I would think it is entirely likely.

Mr. BYRD. Is the Chafee amendment an amendment to the Baker-Domenici amendment?

Mr. BAKER. I understand it is. I have not seen it. Indeed, it may not yet be drafted, but I understand it is an amendment to the Baker-Domenici substitute.

Mr. BYRD. The distinguished majority leader has said he has not seen it. Does he have any idea what it encompasses?

Mr. BAKER. The Chafee amendment?

Mr. BYRD. Yes.

Mr. BAKER. I have talked to the Senator from Rhode Island and others about it. In only the roughest terms, I think it would provide for $12 to $14 billion in additional revenue in the first year and probably having a 6-percent defense growth in real numbers. I think those are the principal features, though I am not certain.

Mr. BYRD. Mr. President, I yield back the remainder of my time.

Mr. BAKER. I yield back the remainder of my time.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

11-059 O-87-20 (Pt. 9)

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10:30 a.m. with statements therein limited to 5 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WILSON). Without objection, it is so ordered.

HOW CAN WE STOP A NUCLEAR WAR? IT IS UP TO US

Mr. PROXMIRE. Mr. President, one of the most useful new books in helping us understand our responsibilities as U.S. Senators for national policy on nuclear arms is "Living With Nuclear Weapons." Under the sponsorship of the president of Harvard University, Derek Bok, a group of six Harvard scholars has compiled a brief, highly readable fact book on nuclear weapons. The book is no polemic. It takes no position on the nuclear arms race or arms control. It strives hard for objectivity. It succeeds. Over the next several days, I intend to call to the attention of this body some of the most critical, but most widely neglected or misunderstood problems for nuclear weapons policy.

For example, the book deals with a series of "half-truths" about arms control. The first half-truth this book discusses is that arms control cannot work because technology has a kind of life of its own. The old "you can't put the genie back in the bottle" argument. The Harvard study group exposes the fallacy of this argument by calling attention to the following examples:

One. The technologies needed to station nuclear weapons in space are available, but the Outer Space Treaty (1967) prohibits such action.

It has worked.

Two. The technologies needed to emplace nuclear weapons on the bottom of the world's oceans are available, but the Seabed Arms Control Treaty (1971) prohibits such action.

That has worked.

Three. The technologies needed to build extensive (if not effective) defenses against ballistic missiles are available but the ABM Treaty (1972) prohibits such action.

Of course, we all know that has worked.

The study goes on to argue that :

The notion that arms control cannot constrain technology is imperfect but it is not entirely wrong. That some technologies have been constrained through negotiated arms control agreements does not mean that all technologies could be constrained in this way, or that they should be. Such judgments on the feasibility and desirability of constraining specific technologies must be case by case.

Mr. President, the Federal Government has accomplished much through arms control and we should not forget it or lose heart. The worst mistake we can make is to assume we are somehow in the grip of a technological momentum that must inevitably carry us onward toward ever more destructive weapons until, some day, we do what mankind has always done with his military weapons. We use them. Somehow, some way, we must find the will to restrain ourselves. It will not be easy. But it will not be impossible, either. We must try with all our heart.

ARMS CONTROL AS A MILITARY STRATEGY

Mr. PROXMIRE. Mr. President, yesterday, the Defense Appropriations Subcommittee took testimony on the subject of the utility of arms control as a military strategy. Uniformly, this testimony was excellent in content. Richard Perle, the Assistant Secretary of Defense for International Security Policy, was the leadoff witness, followed that morning by Gen. David Jones, the former Chairman of the Joint Chiefs of Staff, and Raymond Garthoff, a senior fellow at the Brookings Institution.

In the afternoon, the subcommittee heard Kenneth Adelman, the Director of the Arms Control and Disarmament Agency, William Colby, the former Director of the Central Intelligence Agency, and William Kincade, the executive director of the Arms Control Association.

While all the testimony was outstanding, in particular I was struck by the precise and clear logic of William Colby. His explanation of the mutual and verifiable freeze concept is one of the most compelling statements on record.

He presents the propositions which underlie the freeze concept. He argues that the freeze would contribute not only to our strategic security but also to our conventional security.

And he presents an overall concept of linking the freeze to our foreign policy in the rest of the world—particularly the Third World.

Mr. President, I highly recommend Mr. Colby's testimony and ask unanimous consent that it be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF WILLIAM E. COLBY

Mr. Chairman, thank you for inviting me to communicate with this Committee on the issue of arms control and its implications for our military strategy. Two examples, I believe, demonstrate the potential for contribution to our safety and the danger of missed opportunities.

The ABM Treaty was adopted in 1972 with the commitment of both the Soviet Union and the United States not to develop a nationwide antiballistic missile system. This followed considerable debate as to the desirability of developing such a defensive system, but agreement was eventually reached that this kind of system could be dangerous for both sides. If one side achieved defendability against the other's nuclear missiles, it could be tempted to utilize the apparent superiority. Instead, reliance was placed upon the concept of mutual retaliation if the other side ever utilized such weapons first.

This has effectively stalemated the use of nuclear weapons in the years since. It has incidentally provided the side benefit of obviating the necessity for an expenditure by the United States generally estimated as something in the neighborhood of $100 billion to produce such a system. This money would have been wasted if the other side had produced an equal system, and the mutual stalemate continued at a higher level. That $100 billion has been available for other purposes during these last ten years, rather than being used on something which would not have improved our security.

The other example was the advent of the multiple independently targeted reentry vehicle (MIRV) in the late 1960's and early 1970's. Senator Edward Brooke led an effort to ensure that the first SALT agreement, finally adopted in 1972, contain a bar against such multiple reentry vehicles, limiting both sides to single warheads. The United States was well ahead on the technology of this device and saw little reason to restrain itself from something the Soviets did not have. Thus, the subject was not included in the first SALT agreement. In the years since that time, of course, the Soviets have worked very hard on the subject of MIRVs, using their ability to concentrate their talent and resources as well as such espionage assistance as they could arrange. Today the Soviet MIRV capability is the single most dangerous aspect of the nuclear equation between us, as multiple warheads on newer Soviet weapons have raised the specter of the so-called first strike against our land based weapons.

The recent Presidential Commission on Strategic Forces has now attempted to put this genie back in the bottle by moving toward a single warhead Midgetman in the future. This would, of course, require Soviet agreement to phase out the multiple warhead in favor of single warheads. This is a case in which our strategic position would have been very substantially improved had we followed Senator Brooke's recommendation and barred the development of MIRVs on both sides.

It is from this history, Mr. Chairman, that I come to the conclusion that the strategic position of the United States would be better off if we were to reach a mutual and verifiable freeze on the production, testing and deployment of nuclear weapons and their delivery systems at this time. This stems from several simple propositions.

1. Nuclear weapons are unusable by any responsible and rational government. The certainty of retaliation, the indiscriminate nature of the weapon and its fall-out, and the inconclusiveness of the result of using these weapons makes it almost impossible to contemplate their conscious use.

2. The arms race in these weapons is unwinnable. While one nation might be a bit ahead on one aspect, such as Soviet throw weight, the other will very quickly match this and probably develop an advantage in another field. The result is a continued balance of terror at steadily rising numbers of weapons and danger of their inadvertent use.

3. Unilateral restraint is unworkable, as the Soviets would not exercise self-restraint based on U.S. unilateral restraint. Only mutual agreement can prevent the Soviets from steadily building more of these weapons and more dangerous models in the future.

4. The resulting world will be unlivable, as it will rest upon the hair-trigger situation that technology is taking us into. We are on the verge of accidental or mistaken release of these weapons, based on technological indicators, which could only be tragic in their consequences.

A conscious application of arms control as a part of our strategic approach to our relationship with the Soviets would focus on the desirability of limiting the further growth of Soviet nuclear weaponry. It makes much more sense to convince the Soviets not to build some new weapon than it does to have to wrestle with defensive or retaliatory weapons on our side to deal with them.

Freezing the present arsenals and moving toward reducing them would not only give us protection against new levels of danger and threat. It would also give us resources which could be spent more effectively in the fields of real contest between ourselves and the Soviets. In the conventional military field, there are substantial imbalances in land forces. A proper strategy should also be developed to meet the low risk operations the Soviets have relied upon in recent years through proxies, subversives and political manipulation. A strategy to handle the kind of threat presented from Cuba and Nicaragua would focus on strengthening the societies threatened, a far more appropriate strategic response than building some new nuclear weapon.

The real answer to Soviet exploitation of the social, political and economic weaknesses of the less developed world, including some nations near our borders, would better come from vigorous and dynamic programs of political, social and economic development than by purely military buildups in nuclear or conventional military forces. We need to expand our awareness of the direct contribution to our safety which can come from dynamic growth in the Third World, not defeating Soviet maneuvers there, but making them irrelevant, as the peoples of those nations look toward the betterment that active association with programs of ours will bring.

Pragmatism in the Third World has created real results in areas as far afield as East Asia and Latin America, while ideological conformity to Communist doctrine or Socialist panaceas has resulted in stagnation and frustration in many nations. We have the resources, we have the wit and the will to develop strategies to meet these fundamental problems of humankind in a fashion better than anything the Soviets could offer. Arms control with the Soviets can enable us to focus our efforts on the strategies that are needed and avoid wasting our efforts on useless programs. We need to recruit, not combat, hostile guerrillas in programs to better their societies with our help, not against our opposition.

The French, between the two World Wars, expended a great deal of treasure and effort on the development of the Maginot Line and thought themselves safe behind it. That safety was breached and circumvented within a matter of weeks and the French discovered that the German tactics that had been developed made that expensive Line useless to protect France in 1940. We must focus our efforts on the correct strategies, correct programs and the correct forces and not believe that cement and steel in a modern day nuclear Maginot Line will protect our country.

One last point, Mr. Chairman. You asked how arms control can improve the ability of the United States to monitor Soviet military activities. The answer is that our intelligence will monitor such activities whether there is an arms control agreement between us or not, because we must do so to protect our security. Our literally fantastic intelligence capabilities provide this function today, and the recent Defense Department brochure on Soviet Military Forces shows their comprehensive coverage. But an arms control agreement makes the process easier, both because of the numerical limits or prohibitions it sets (making it easier to focus on and identify exceptional conduct) and because of the numerous provisions incorporated in recent arms control agreements, such as non-concealment, non-interference, test notifications, declarations of forces, sensors, inspection teams and the Special Consultative Commission for the resolution of ambiguities. While the Soviet Union will never be an open society like ours, arms control agreements and the improvement of intelligence technologies are gradually making it more visible from the outside.

GENOCIDE CONVENTION: CAMBODIA WITNESS EXHIBIT

Mr. PROXMIRE. Mr. President, in a previous speech to the Senate, I gave the details of an Amnesty International exhibit entitled, "Cambodia Witness." This display consisted of 52 photographs that together told the grim story of a Cambodia brutalized by the reign of Pol Pot from 1975 to 1979.

Reporter Karen DeWitt attended the exhibition and observed the reactions of those passerbys who found themselves halted from their ordinary concerns and immersed in the dark world of the Khmer Rouge killings.

In a recent article for USA Today, Ms. DeWitt described those reactions, which ranged from quiet horror to outright shock and rage. For instance, Minnesota photographer Tom Ramsey stumbled upon the display as he strolled through the Cannon House Office Building. Standing in front of a photograph of a mountain of 8,000 human skulls exhumed from a mass grave, Ramsey said:

It is difficult to take it all in. I have gone through every emotion from horror to tears. I just cannot believe this could happen today. And I think, not only about the thousands who died, but about the living who are left.

Tourist Don Walker was also caught by the pictures of mass gravesites and piles of blindfolded human skulls. Walker commented:

It is horrible, but I think we should see more of this so we know what is going on. That one particular picture, that simple black and white picture of those thousands of skulls tells of the horror that is going on somewhere even now.

A common sentiment of disbelief was apparent in the comments of those who perused the exhibit. Obviously, for those of us living in the comfortable security of America, it is almost incomprehensible to imagine that atrocities of this magnitude have occurred so recently. Yet, the evidence reads clearly: Through systematic purges, massacres, and random executions, nearly 2 million Cambodian citizens were eliminated.

Pat Rengel, director of Amnesty International's Washington office underscored the depth of the problem:

Political murders, massacres, the violations of human rights, singly or in thousands, are a modern phenomenon. People often think such practices are historic, something that disappeared with Hitler and Stalin. But during the last decade, political killings by governments have occurred in countries from Argentina to India

Exhibits like "Cambodia Witness" help us to remember the countless victims and survivors of massive government murders. We should also remember that the Cambodian Government under Khmer Rouge was not and still is not the only government that terrorizes its people. Perhaps when we understand this sad fact, we will be motivated to upgrade our international efforts toward defending human rights.

One way to affirm our commitment to the prevention of human rights violations is to ratify the Genocide Convention, which outlaws the extermination or intent to exterminate any racial, national, ethnic, or religious group. This treaty relies on public and international conscience through a code of conduct outlawing genocide, and offers an international basis for nations to stand together against this heinous crime.

Let us not stand by in disbelief while atrocities like the Cambodian massacre continue all over the world. I strongly urge my colleagues to ratify this important treaty.

THE HATCH AMENDMENT TO THE FIRST BUDGET RESOLUTION FOR FISCAL YEAR 1984

Mr. WILSON. Mr. President, we face no greater challenge today than our task to bring the Federal budget under control, to bring it into balance so that we may continue on our way to economic recovery. Only a continuation of fiscal restraint can promise a continuation of economic recovery. Our work here is the key to putting Americans back to work again.

In that spirit, Mr. President, I recall the remark made by President Reagan, which very much has application to what today we are trying to accomplish in the Senate Chamber. He said: "The people are watching and waiting. They don't demand miracles, but they do expect us to act. Let us act together."

The prevailing principle in our deliberation on the budget ought to be simply this: The people can be entrusted to make perfectly good decisions about their own money. I would rather have more in their pockets to spend than in the treasury of too many Federal agencies. It is also fundamental to my belief that it will be the reduction in the amount of money we take from the people—money they will be able to spend as consumers and investors—which will be the fuel for the economic engines of our country.

There is ample evidence that the program of tax cuts and reduced spending is already working. Confidence is being restored. Consumers are beginning to spend once more. Inflation is at a rate lower than anything we have seen since World War II. Housing starts are up. Inventories are going down. There is every hope that unemployment reductions would not be far behind.

The recovery has been slow and painful. But it is at hand, nevertheless. I do not need to remind you, Mr. President, how much better we are situated today than we were just 2 years ago when we were confronted with stagflation fueled by record spending and taxing, with small businesses closing daily, with senior citizens forced out of their homes, with young people unable to afford a new home and absolutely no end in sight for the economic mess we are in.

Today, Mr. President, we stand at a crossroads. Our choices are to go back to the course that we are finally distancing ourselves from, the course of wild spending and taxing, of economic chaos, of stagnation, of inflation, of utter failure. Or, we can take the necessary and forthright steps of continuing on a road of less spending, of reduced taxes, of reduced inflation, of new hope and new opportunities.

That is why I believe we must remain committed to the principle of reduced taxes, including the third year of the tax cut. We must have the will and ability to say "Yes" to the principle of a reduction of the tax burden and "No" to the idea that Federal spending cannot be reduced. I cannot believe there is anyone in this distinguished body who thinks that Federal spending cannot be reduced. For, if we do not reduce spending, the inevitable price is a significantly slower economic recovery.

My distinguished colleague, the Senator from Utah, has, I believe, best articulated the needs for the country in his proposal to balance the Federal budget by the year 1989. It is a principle to which I am committed and an idea which I have long espoused.

The average American family is expected to live within a balanced budget and does. My home State, California, has a constitutional requirement to live within a balanced budget and, although at times it is tough, it does, too. My home city, San Diego, which I had the pleasure of serving as mayor for 11 years, has a constitutional requirement to balance the budget and does without sacrificing one iota in quality services. In fact, Mr. President, my city went one step further and pioneered an actual constitutional spending limit, an idea which deserves strong consideration here in our midst.

It is this kind of fiscal discipline, this kind of budgetary regimen, this kind of sound policy, which will keep us on the right path to the health and prosperity this country needs and deserves.

The Hatch amendment not only keeps intact the third year of the tax cut, but preserves tax indexing, a very strong necessity as an incentive to young wage earners to do better, to be motivated to improve their lots, to save and invest, to take risks, and to create new opportunities. That is how we build confidence and commitment back into our economy.

The Hatch amendment responsibly calls for some increases in revenues. One such increase is in the form of user fees. This rests on the proven theory that those who benefit should, indeed, pay for the benefits they receive from the Government. I support this approach with some reluctance, because I recognize that these costs will be passed on to customers for the cost of doing business. But, it seems to be the most equitable way to proceed.

The other major element of the Hatch plan is the difficult but necessary duty we have as Members of the Senate to cut the budget. The amendment includes about $75 billion in new cuts over the next 3 years. In essence, the plan provides for a modified freeze of all Federal departments, with discretionary programs frozen at their fiscal 1983 level while entitlement programs are permitted to grow by the increase in inflation.

For the purposes of national security and defense—truly the first priority of our Nation—defense spending is allowed to increase in a necessary and reasonable fashion.

And, yes, Mr. President, there are some cuts, careful cuts which will permit services to those truly in need to continue but which are in keeping with the utter necessity of cutting the budget. Only by cutting Federal spending can we bring down huge deficits estimated at $200 billion per year which threaten to undermine all we have achieved in these past few years and mire us in the economic chaos from which we are now trying to extricate ourselves.

It is important to note that the proposed savings in the Hatch amendment apply not to individual programs, but to broad budget categories. The actual program spending priorities are set by the authorizing committees within the overall limits set in the budget resolution. Those who claim that the Hatch amendment would cut this program or that program are confusing the debate and misleading the public.

Mr. President, I will leave it to each authorizing committee to provide, in greater detail, the specific spending allocations within the limits of the Hatch amendment. But, let me say that the plan does make sense. It bites the bullet. It balances the budget. It keeps us secure. It keeps money in the pockets of the people where it belongs. And, it further tightens the reins on the budget, for this is truly the way to keep our economy on the straight and narrow.

Mr. President, our challenge is clear. As I have said, we are at the crossroads. We must have the courage of our convictions to proceed. We must have the faith and commitment to take that course of fiscal prudency which holds the promise of economic recovery—jobs. We must remain committed to make America work again, and work again it will if we have the courage and wisdom to proceed.

PREVENTING CHILD ABUSE—THE NEED TO DO MORE

Mr. CRANSTON. Mr. President, although the month of April, designated as National Child Abuse Prevention Month has come and gone, unfortunately the problem of child abuse remains with us. It is important that we continue to seek ways to prevent these tragic situations from occurring.

It is a common misperception that child abuse is a problem which afflicts only poor and underprivileged families. However, there is widespread evidence that child abuse constitutes a nationwide problem affecting all levels and all segments of our society and that it is a problem that takes an enormous toll on our society in both human and economic terms.

Each year, an estimated 1 million children suffer abuse at the hands of their parents or others. Between 2,000 and 5,000 of these children die as a result. One expert has estimated that as many as 10,000 children are severely battered each year and between 50,000 to 70,000 are sexually abused. Some researchers suggest that the toll may be much higher.

Many of these children are scarred for life. Studies show that many adult criminals, juvenile delinquents, and other troubled individuals are likely to

have suffered from child abuse. In turn, those individuals who were abused as children are more likely to become child abusers. This is a sad and insidious cycle that must be broken.

Mr. President, child abuse is a problem we cannot ignore. As the Senate author of the 1978 Child Abuse Prevention and Treatment and Adoption Reform Act, enacted as Public Law 95-266, I have long been involved in efforts to help prevent and reduce child abuse. This program, which must be reauthorized this year, is an important part of our overall efforts to deal with this troubling problem.

PUBLIC AWARENESS

Mr. President, I also cosponsored the resolution to designate April of this year as National Child Abuse Prevention Month in an effort to increase public awareness and knowledge about the problems of child abuse. But clearly, if this month has made us aware of anything, it has certainly been that more than ever now, we need to do more to prevent child abuse in our society.

Mr. President, public awareness of the problems of child abuse can also play an important role in helping to identify and prevent such violence. I want to extend my special thanks to the many organizations who organized the activities and public education problems during National Child Abuse Prevention Month for their interest and dedication to helping children. In particular, I would like to recognize the effort made by Tandem Productions, through its popular television series "Diff'rent Strokes," to bring to the public's attention the problems of child sexual molestation. In a two-part episode entitled "The Bicycle Man" aired February 5 and 12 of this year, the series showed children how to recognize enticement and to avoid entrapment, helped parents to believe in their children when they report such incidents, and hopefully helped many families to be able to identify and prevent these tragic situations from occurring and thus spare them the emotional agony that comes with child sexual abuse. The producers of this series, one of the most popular primetime network programs among 6- to 12-year-olds, provided an important public service by their skillful handling of this sensitive issue.

Mr. President, the "Diff'rent Strokes" episode of "The Bicycle Man" will be shown again on May 21, 1983, at 8 p.m. in a 1-hour special on NBC. I hope that many families will take the time to watch this show.

Efforts like this contribute significantly to increasing public awareness of the very serious problem of child sexual abuse and helping to prevent it from occurring.

Mr. President, I ask unanimous consent that an article from the February 12, 1983, Washington Post describing the "Diff'rent Strokes" episode on child molestation be printed in the RECORD, and that following that article there be printed two articles from the March 2, 1983, and March 14, 1983, Long Beach Press Telegram describing how the "Diff'rent Strokes" show led to the arrest of an alleged child molester.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 12, 1983]

A BOLD SHOW TREATED WITH CARE—"DIFF'RENT STROKES" TACKLES CHILD MOLESTING

(By Tom Shales)

Gary Coleman Meets a child Molester? It doesn't sound like a very promising prospect, and viewers of last week's installment of the NBC family comedy "Diff'rent Strokes" may have been shocked to see the subject brought up, especially when it involved one of the nation's most beloved tots. But the conclusion of this two-part special episode, tonight at 8 on Channel 4, reveals it to be a calm, careful and intelligent treatment of a difficult and potentially traumatizing subject.

There seems little possibility that watching this program would do children harm, and considerable likelihood it could do them good. As with last week's show, actor Conrad Bain is seen out of character in a preface advising that families watch the program together, then discuss it afterward.

As skillfully written and directed by Blake Hunter and Gerren Keith, "The Bicycle Man" finds little Arnold (Coleman) and his pal Dudley (well-played by Shavar Ross) all but in the clutches of Mr. Horton (Gordon Jump), on the surface a jolly old sport, beneath the surface a disturbed and conceivably injurious man. The script is written so as to show him some compassion but portray him as a clear and present danger.

Tonight's episode begins exactly where last week's ended, with Arnold and Dudley being entertained by Mr. Horton in the back room at his bicycle shop. He's a little too friendly. He plies the boys with wine, Boston cream pie and dirty cartoons. Arnold has the good sense to run home, but Dudley hangs around, and Arnold's adopted millionaire father (Bain) calls the police.

In the denouement, a police detective doles out the hard information about child molesters. "In their own strange way they actually love children," he tells the assembled household. He also notes that some parents, wrongly in most cases, "actually blame the children for what happened." Arnold asks, "What is this world coming to?"—a question that's never out of line—and says, "Look, I'm only 11 years old. Should I be hearing all of this?"

Yes, Arnold is told, he and, by implication, the children who watch this extremely popular show, should. It can be argued that situation comedy is not the place for such topics, but that argument doesn't hold up very well after the precedent set in the '70s by Norman Lear, whose Tandem Productions makes this show. "Diff'rent Strokes" has previously dealt with such topics as teenage drinking, sex and female independence. On March 19, Nancy Reagan will appear as herself on a "Diff'rent Strokes" episode about teen-age drug abuse.

And earlier this season, Gary Coleman proved yet again what a trouper he is with an outstanding performance in a touching episode in which Arnold visited the grave of his mother. Coleman is a natural wonder, but the time seems propitious to note that the cast of "Diff'rent Strokes" (Bain, Coleman, Todd Bridges and Dana Plato) has made itself one of the most appealing and human families in contemporary fictional television. A very good show appears to be getting even better.

[From the Long Beach Press Telegram, Mar. 2, 1983]

TV SHOW HELPS NAB SUSPECTED CHILD MOLESTER

(By Charles Sutton)

A two-part segment of TV's "Different Strokes," the popular situation comedy starring Gary Coleman, was credited by Long Beach police Tuesday with leading to the arrest of a 54-year-old Long Beach man on child molestation charges.

Detective Jerry Gadbaw said the arrest came about after a 9-year-old boy who had seen the show told his parents that he had gone through an experience similar to the one depicted on the show. The parents, in turn, got in touch with police.

The two segments, which dealt with the dangers of child molestation, aired on NBC-TV on Feb. 5 and 12. Six days after the second segment, officers armed with a search warrant arrested Daniel Bendit of 1068 E. Artesia Boulevard, Apt. 5.

Bendit, charged with nine felony sex counts, is being held in Long Beach City Jail on $25,000 bond pending a preliminary hearing scheduled for March 8. Gadbaw said Bendit was not in his apartment when detectives first knocked on his door. But as they were searching the flat he showed up with a 10-year-old boy whom police believe may have been a victim in the case.

Gadbaw added that detectives have also linked him to alleged acts involving three other boys between the ages of 9 and 11. The boys were traced through sex photos and address books that were confiscated from Bendit's apartment, he said.

Gadbaw said the suspect allegedly met the youngsters through babysitting chores or in bowling alleys and game arcades.

The detective added that the 9-year-old who talked to his parents "didn't know any better" until he saw the television show. He told police the suspect gave him beer, cigarettes and narcotics. All the while, "the parents didn't know anything about it," Gadbaw said.

In some cases, the detective said, the suspect allegedly handcuffed the youngsters to his bed while performing sex acts with them.

He also allegedly had them watch adult films on a pay TV channel, Gadbaw said.

The "Different Strokes" segment was written by Blake Hunter, one of the two executive producers of the show.

Hunter said Monday he was pleased that the show had been of value. He said he drew most of his material for the story from Los Angeles juvenile detective Gary Lyon.

Helen Hernandez, public affairs director of Tandem Productions, which produces "Different Strokes" for NBC, said reaction to the two-parter has been "gratifying."

Hunter's script deals with Arnold's (Gary Coleman's) expectations of receiving a bicycle for his 12th birthday. In the course of the show, he and a school chum, Dudley, played by Shavar Ross, are befriended by a bicycle store owner (Gordon Jump), who becomes interested in Dudley.

Dudley is given wine and drugs by the store owner, but in the end he's rescued from his malefactor before anything more serious happens.

[From the Long Beach Press Telegram, Mar. 14, 1983]

MAN PLEADS GUILTY TO CHILD MOLESTING

(By Kathleen Cairns)

A 54-year-old man who was arrested last month after a youngster he babysat viewed a television show dealing with child molestation, pleaded guilty in Long Beach Municipal Court Tuesday to nine counts of oral copulation and molestation involving two young boys.

Judge Eugene Long set April 7 as the sentencing date for Daniel Bendit, who now faces a maximum prison term of 16 years.

Bendit was arrested at his Long Beach home last Feb. 18 after the parents of one of the children he babysat called police.

According to police, the child had watched a two-part segment of the television program "Different Strokes," which showed how child molesters prey on unsuspecting victims, and informed his parents about his own experiences.

The boy "didn't know any better" until he saw the program, which aired Feb. 5 and Feb. 12, said Long Beach Detective Jerry Gadbaw. The parents were unaware of the situation, he added.

According to documents filed with the court, Bendit allegedly was involved in approximately 20 incidents of oral copulation and sodomy, which took place between September 1982 and February 1983.

Although the charges against Bendit involved only two children, police have linked him to alleged acts involving three other boys between the ages of 9 and 11.

The boys were traced through photographs and address books that were confiscated from Bendit's apartment, said Gadbaw.

Included in the court documents was a report of the statement given police by one of the victims, who said he had been given alcoholic beverages, marijuana cigarettes and, in one case, a tranquilizer, by Bendit.

At one point, the victim told police, Bendit had tied him to the bed and told him he had handcuffs, which he used on "bad children."

According to the affidavit in support of a search warrant, the defendant kept nude pictures and pornographic publications in his apartment.

Shortly after his court appearance Tuesday, the bearded and mustachioed Bendit was transferred from Long Beach City Jail to Los Angeles County Jail, where he remains in lieu of $25,000 bail.

MX MISSILE

Mr. SASSER. Mr. President, on Thursday the Committee on Appropriations will vote on Senate Concurrent Resolution 26 to approve or disapprove funding for MX missile procurement and full-scale engineering development of the basing mode proposed by the Scowcroft Commission and the Reagan administration.

Today, I want to briefly discuss my views on this administration's proposal to build 100 MX missiles and base them in existing Minuteman silos.

Throughout my career in the Senate I have supported research and development on the MX missile system. I supported the contention by this administration and the previous administration that a new heavy, accurate, hard-target missile might be necessary to reduce the perceived vulnerability of the U.S. land-based intercontinental ballistic missiles. I supported the multiple protective shelters basing mode in 1980 because I felt that such a basing mode provided the necessary survivability for the MX. Last year I voted against the Dense Pack basing mode because survivability of the MX could not be guaranteed.

It is my firm belief that in order for the MX to be a viable weapons system—one that is worthy of $16 billion dollars in Federal investment—it must be survivable. The MX will lower that "window of vulnerability" only if it can be deployed in a survivable basing mode—one that can withstand a Soviet first strike.

The administration has endorsed the Scowcroft Commission's proposal to base the MX in Minuteman silos, a mode that has been clearly documented to be vulnerable to Soviet attack.

I would like to call the Senate's attention to a document entitled "MX Permanent Basing, 15 September 1982, Draft." This report which was provided by the Air Force to Members of the Senate during the consideration of the Dense Pack proposal is classified secret, but substantial portions of the report are unclassified.

The report reviewed several MX basing alternatives, such as placing the MX in Minuteman silos as the commission and the administration have recommended.

Much of the section of Minuteman silo basing is unclassified and can be discussed in the RECORD. This section of the report makes it clear that it was the position of the Air Force late last year that placing the MX in Minuteman silos would not enhance the U.S. strategic deterrent.

Mr. President, I ask unanimous consent that those unclassfied excerpts of the September 15 report relating to MX basing in Minuteman silos be included in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

(Certain charts in the material are not reproducible in the RECORD.)

4. (U) *M-X permanent basing alternatives.*

4.1 (U) *Introduction.* A number of potential basing modes have been studied since the decision to proceed with development of the M-X missile. The majority of these have been eliminated from further consideration due to a variety of operational, technical, and political shortcomings. The need to deploy M-X in 1986 further limits those alternatives available. Basing alternatives evaluated consistent with current program guidance and system requirements are limited to current Minuteman silos; new hardened capsules with wide spacing; new hardened capsules with close spacing; and Ballistic Missile Defense in conjunction with each of these three options. Deep Basing, while a longer-term option, is also given full consideration since it is identified in the basic program guidance as an alternative for further research and development. This section describes each of these alternatives.

4.2 (U) *Minuteman Silos.* M-X could be based in Minuteman silos and use most of the existing support equipment and facilities with only minor modifications. The existing system and these required modifications are discussed below.

4.2.1 (U) *Current Configuration.*

4.2.1.1 (U) Minuteman missiles are currently deployed in the six deployment areas shown in Figure 4-1. They are deployed in wings of 150 or 200 missiles, which are divided into squadrons of 50 and flights of 10 missiles each, with three to five miles separating silos. (Five flights comprise a squadron.) Each Minuteman flight is controlled by a ground launch control center that has primary responsibility for its own flight, but is also capable of controlling and monitoring any missile in its squadron. All Minuteman silos also have provisions for airborne launch command and control if ground systems are incapacitated.

4.2.1.2 (U) A missile silo and its launch support building together make up a Minuteman launch facility. The silo houses missile launch support equipment, while other equipment for power generation and distribution, physical security, environmental control, and communications and control are located in the reinforced concrete, surface-flush launch support building. A typical Minuteman site layout is shown in Figure 4-2.

4.2.2 (U) *Adaptation for M-X.*

4.2.2.1 (U) To accommodate the large M-X missile, the existing Minuteman silo structure would require some changes as shown in Figure 4-3. The concrete and steel structure, its conductive penetrations, the closure, all closure removal equipment, and the personnel access hatch would be utilized without modification. Launch tube attachments for the vertical shock isolation system would need to be modified and the interior of the launch tube would have to be adapted to interface with the lateral shock isolation system. Internal launch tube protuberances would be removed as would the upper portion of the Minuteman launch tube to allow maintenance access and to aid in debris management. These changes would constitute a minimum modification program for M-X in Minuteman silos.

4.2.2.2 (U) With respect to siting, M-X missiles would be deployed in the Minuteman wing that is most suitable from a combined military and environmental perspective. A major factor to be considered in the selection process would be geology to ensure the choice of the Minuteman site that would provide optimum inherent silo hardness against nuclear effects. Selection of silos with acceptable geology and depth will ensure that silo-based M-X missiles are not rendered overly vulnerable to additional threats, such as less accurate Soviet Submarine Launched Ballistic Missiles (SLBMs). It also preserves the option to increase hardness, should this prove viable at a later time. Other important factors in the selection of a specific silo basing site would be cost, schedule, operational and technical considerations, arms control commitments, and possible later deployments of ballistic missile defense. While much work has already been accomplished in these areas during FY 1982, the choice of the specific wing that would host M-X missiles would be

made following further study in the preceding areas if this option were directed.

4.2.3 (U) *Hardness.*

4.2.3.1 (S) [Deleted].

4.2.3.2 (U) The changes needed to accommodate the M-X would result in a system that is about the same hardness level as the current Minuteman System. To achieve greater hardness levels, the silo would actually have to be expanded in size by a considerable amount in order to provide increased rattle space for the larger M-X missile, enhanced-shock isolation systems, and other design changes to produce maximum hardness.

4.2.4 (U) *Concept of Operations.*

4.2.4.1 (U) The M-X Weapon System, comprised of the missile and its associated support equipment, would be integrated into the existing Minuteman Weapon System. M-X missiles, deployed in Minuteman silos, would be collocated with Minuteman Launch Facilities (LF) and integrated into the existing hardened intersite cable system. Control of the M-X missile would be via Minuteman Launch Control Centers (LCC) structured to accommodate the mixed systems. Also, the system would have a link to the Airborne LCC (ALCC). This would provide the capability, as in Minuteman, for the ALCC to assume command and control responsibilities for the missile force and initiate targeting and launch operations in the event of the loss of the LCCs.

4.2.4.2 (U) Communications for control of the weapon system would be compatible with Worldwide Military Command and Control System (WWMCCS) elements and provide control for as long as either the LCC or ALCC survives. Communications for both Higher Authority (HA) and the Strategic Air Command (SAC) are direct to the ALCC, and either directly to the LCCs or to the LCCs via the ALCC as a relay. Communications between the LCCs and the LFs are via a redundant cable network. Communications from the ALCC to the LFs are via a UHF downlink.

4.2.4.3 (U) The physical security concept for protecting the M-X LFs would be equivalent to the existing Minuteman security concept. Security is provided by sensors that detect intrusions when the LF is unmanned and by security police at other times. Eight security guards are required at or near the site when the silo closure is opened; whereas only a two-man security team is needed when only the personnel access hatch is opened. No guards are required during authorized access into the Launch Support Building (LSB). Additionally, for transporting nuclear weapons, a 21-man security team is required in the convoy.

4.2.5 (U) *Cost and Schedule.* M-X could be placed in Minuteman silos, meeting IOC in 1986 with little schedule risk. As described above, the modifications necessary for Minuteman silos to accommodate M-X are minimal and do not involve any new technology. This minimum modification program is straightforward from an engineering standpoint, and is relatively inexpensive. Current cost estimates for this alternative indicate that $16.1 billion (FY82 $) would be sufficient to deploy 100 M-X in existing Minuteman silos.

4.3 (U) *Hardened Capsules.* Revolutionary strides have been made in hardness technology (see Section 6.6) that make new hardened missile facilities a viable option. (The term capsule is used to describe these facilities). A critical factor for deploying M-X in new hardened capsules is the spacing between capsules. In current U.S. ICBM deployments, relatively large spacings have been used (3 to 5 miles for Minuteman, 8 to 12 for Titan) to ensure that one Soviet weapon cannot destroy two missiles. Greater hardness permits closer spacing while still meeting this requirement. With very close spacing, the phenomenon of fratricide comes into play. That is, the nuclear environment from one attacking Soviet weapon could render other attacking Soviet weapons ineffective before they can inflict damage to targets.

4.3.1 (U) *Spacing Options.* There are two basic options for M-X deployment in new hardened capsules: wide spacing and close spacing. Wide spacing would be similar to that which currently exists for existing ICBM deployments. Close spacing would take advantage of the severe nuclear effects that would occur during an attack. In either case, the M-X deployment would be similar to the current Minuteman system in terms of support facilities and base operations. A major difference is that Minuteman is deployed in silos that contain all equipment necessary to launch a missile, whereas new capsules would effectively be protective facilities without launch equipment. The M-X would be integrated with a separate mobile launcher.

4.3.1.1 (U) Widely spaced capsules would have separation distances such that the nuclear effects from an attack on nearby capsules would not interfere with launch of surviving missiles. Although specific trade studies would need to be conducted to determine this spacing, distances on the order of current Minuteman spacing appear appropriate. With a 3-mile separation distance, 100 M-X in widely spaced capsules would circumscribe an area of about 1,500 square miles. The actual land area required would be much less, about 4 acres around each capsule.

4.3.1.2 (U) Closely spaced capsules would be placed at distances that maximize fratricide while still negating the possibility of two capsules being destroyed by one weapon. Additional study is needed to determine optimal spacing, but it appears that it will be approximately 1,800 feet. This spacing is close enough so that early arriving warheads will disable those that follow, causing a phenomenon known as "fratricide." This happens because of the effects that are produced by the nuclear detonations of early arriving warheads.

4.3.1.2.1 (U) There are four major nuclear effects that would combine to make an attack on closely spaced capsules difficult. These are prompt nuclear effects, such as radiation, airblast, and fireball, which degrade weapon performance, and longer-term effects, such as dust and debris, which limit the ability to reattack quickly.

4.3.1.2.2 (U) *Nuclear Radiation.* Neutron and gamma rays produced as a direct and unavoidable consequence of a nuclear explosion constitute the most rapidly propagating fratricide effect. Gamma rays move about 1,000 feet per microsecond, neutrons from the explosion itself at one-sixth this velocity or less. Although these radiations constitute only a small portion of the total yield, they penetrate the air and would penetrate deeply into the interior of any enemy warhead approaching nearby capsules. (Qualitative estimate of these radiation effects are given in Section 8.3.) The qualitative aspects include direct heating, degradation of high explosive and electronic components, melting of nuclear components and premature/over initiation of the nuclear explosive (resulting in a fizzled explosion).

4.3.1.2.3 (U) *Airblast.* Most of the explosion energy goes into a high pressure shock wave. This effect (for a 1 Mt weapon) arrives at adjacent capsules in tens of milliseconds. The shock front is of sufficient intensity to damage the shell of reentry vehicles that experience this environment. Sudden acceleration and deceleration loads (100s of gs) are also produced that can disconnect and fracture internal reentry vehicle components. Quantitative estimates of those effects are discussed in Section 8.2.

4.3.1.2.4 (U) *Fireball.* The fireball refers to the volume of atmosphere surrounding a detonation in which the radiation and energy from a weapon have been absorbed. The fireball is extremely hot and, for the large yields that might be employed to attack closely spaced capsules, will rapidly engulf the area covering adjacent capsules. The interior of the fireball will become a near vacuum. The fireball can cause failure of the heatshield and destroy reentry vehicles, reduce overpressure on the target, or cause premature fuzing. These fireball characteristics can significantly degrade the effectiveness of airburst type attacks.

4.3.1.2.5 (U) Further, nearby detonations in a multi-burst environment would push fireballs over other silos not normally within single-burst fireball radius. Multiple fireballs from new simultaneous detonations would "sit" on the ground longer than single-burst fireballs. The attacker is faced with several problems in attempting to detonate a weapon inside a fireball. First, there is insufficient air to form an effective shock front. The lethal neutron fratricide radius will also be increased. High-confidence fuzing, especially airbursting, would be a difficult challenge. Each of these problems degrades one's ability to attack closely spaced capsules using an airburst.

4.3.1.2.6 (U) *Debris.* Debris is solid material from the ground that is ejected up into the atmosphere by a nuclear detonation. As a reentry vehicle traverses the volume of air containing debris, collisions with larger particles would destroy the weapon. Collisions with smaller sized particles (that is, dust) will cause ablation of the nose cone and heatshield, which also leads to destruction of the vehicle or degradation of its accuracy.

4.3.1.2.7 (U) For a 1 Mt ground burst, the short-term debris consists of large chunks of soil and rock thrown up into the air, starting 1 to 2 seconds after a burst and remaining aloft for minutes. The longer-term debris consists of pebbles and dust. Both ground and air burst detonations of a nuclear weapon will throw up a great deal of small particles that can remain suspended in the air for many tens of minutes. The amount of pebbles and dust thrown up is a great deal larger for a ground burst, and, consequently, debris fratricide effects are much more severe for a ground burst attack. Subsequent attack on closely spaced capsules can be closed out for extended periods of time as a result of debris. The duration and spatial extent of dust and debris impacts are much greater than those of all other fratricide effects.

4.3.2 (U) *Hardness.*

4.3.2.1 (S) [Deleted].

4.3.2.2 (U) Additional hardness is possible using new construction techniques. This concept involves the addition of slip liners and crushable zones to absorb a portion of the blast. An even more advanced concept would incorporate a blast deflector installed over a silo buried up to 40 feet below the ground surface. Details on various hardness designs are given in Section 6.6.

4.3.3 (U) *Concept of Operations.*

4.3.3.1 (U) The concept of operations for new hardened capsules would be similar to that for the current ICBM force. The concept architecture provides a layered command and control structure, employing underground launch control centers, airborne launch control centers, and Higher Authority (HA) command processing. This multiple element approach would ensure continuity of control throughout the pre/trans/post-attack periods, presenting the adversary little alternative other than endeavoring to destroy the individual missile launchers. In addition, the approach provides redundancy of communications (fiber optics and HF radio) to ensure that surviving missiles are capable of being launched. The HF radio also provides the connectivity to HA. In addition, each mobile launcher also hosts a VLF receiver for HA command processing.

4.3.3.2 (U) Pre-attack operations would be accomplished at an Operational Support Center (OSC) and an LCC primarily employing high data-rate fiber optics. The OSC hosts the support elements of the launch control system (e.g., Code Processing Station) and the terminal equipments for HA radios and land lines. Communications between the OSC and the LCC would be via a fiber optics link.

4.3.3.3 (U) As previously mentioned, hardened capsules would not house stationary launch equipment. Rather, a mobile launcher will be used. A mobile launcher operational support equipment consists of the processing modems, cryptos, and radios required to communicate with the LCC, ALCC, and HA. The capsule and mobile launcher operational support equipment, with its cable and radio connectivity to the LCC, would provide a "gateway" function for two-way HA communications, employing the buried antennas located at each launch facility.

4.3.4 (U) *Cost and Schedule.* M-X in new hardened capsules can be deployed with a late 1981 IOC. System acquisition cost in 1982 dollars is estimated at $24.0 billion for widely spaced capsules and $23.4 billion for closely spaced capsules. (These figures represent investment required in FY 1983 and beyond.) There would be greater schedule risk with widely spaced capsules due to the larger land area that would be impacted and construction logistics over this wide area.

4.4 (U) *Ballistic Missile Defense (BMD).*

4.4.1 (U) *Introduction.* Ballistic Missile Defense (BMD) offers several alternatives to enhance ICBM effectiveness. This section will address the options available for BMD of M-X in conjunction with Minuteman silo deployment, widely spaced capsules, or closely spaced capsules. Both near-term (late 1980s) and far-term (1990s) technologies are considered. Specific options for near-term defense of closely spaced capsules and silos are presented.

4.4.1.1 (U) *Nature of BMD.* BMD is not a single defense option for M-X, but a family of options applicable to either closely spaced or conventionally spaced capsules. BMD could either be designed into the ICBM system and deployed at or near M-X IOC, or be added subsequent to M-X deployment, in response to threat growth or changing requirements provided provisions are made during initial deployment. BMD systems can be structured for broad effectiveness against many types of Soviet attack weapons and tactics, or be narrowly designed to deny or offset a particular Soviet weapon system or tactic. We consider herein only broadly capable BMD concepts, and leave the discussion of highly-specific BMD systems employed as countermeasures to some specific Soviet threats to Section 9.

4.4.1.1.1 (U) BMD systems considered here are the product of a long standing R&D program and SAFEGUARD operational experience. In the SAFEGUARD ABM system deployed in 1974 to defend Minuteman at Grand Forks, North Dakota, we developed, tested, and deployed a two-tiered BMD system consisting of long-range SPARTAN exoatmospheric interceptors backed by short-range SPRINT interceptors. The Perimeter Acquisition Radar and Control System (PARCS) provided long-range radar warning; multiple short-range battle management radars and computers directed SPRINT interceptor engagements.

5. (U) *M-X Basing Assessment.*

5.1 (U) *Introduction.* In Section 4, M-X permanent basing alternatives were identified and discussed. This section defines M-X system requirements that the basing mode selected must satisfy, and evaluates the alternatives versus these requirements. For the purposes of this evaluation, the basic alternatives of current Minuteman silos, hardened capsules, Ballistic Missile Defense (BMD), and deep basing have been combined into the following basing options:

a. Current Minuteman—M-X deployed in existing Minuteman silos.

b. Widely Spaced Capsules—M-X deployed in hardened capsules with spacing similar to current ICBM deployments.

c. Closely Spaced Capsules—M-X deployed in hardened capsules with spacing to maximize fratricide effects.

d. Current Minuteman with BMD.

e. Widely Spaced Capsules with BMD.

f. Closely Spaced Capsules with BMD.

g. Deep Basing—M-X deployed deep underground.

5.2 (U) *M-X System Requirements.*

5.2.1 (U) Based on the program guidance described in Section 1 and ICBM missions and requirements discussed in Section 2, basic requirements have been established that the M-X permanent basing mode must meet. These are in the areas of

a. Offensive Effectiveness.

b. Prompt Response.

c. Survivability.

d. Strategic Stability.

e. Operability.

f. Resilience.

g. Arms Control/Reduction.

h. Land Requirements.

i. Schedule.

An additional concern, although a specific requirement has not been defined, is cost.

5.2.2 (U) *Offensive Effectiveness.* Offensive effectiveness of an ICBM is largely determined by hard-target-kill capability and targeting efficiency. Hard-target-kill capability is a function of weapon yield and accuracy. These are missile-specific requirements that were established as part of the M-X missile development program and were discussed in Section 3. Targeting efficiency refers to the percentage of reentry vehicles that can be effectively placed on required targets. It depends on the range of the missile and the RV footprint given by the post-boost vehicle, and is determined by the distance between the missile silo and the desired targets. M-X must be capable of targeting Soviet high-value hard targets.

5.2.3 (U) *Prompt Response.* The high accuracy and short delivery time of ICBMs make them ideally suited for attacking high-value, time-urgent hard targets. Also, since they can be retargeted quickly, they are ideal for responding quickly to a changing target base. The basing mode selected for M-X must preserve this unique prompt-response characteristic, which requires quick egress and launch during available launch windows.

5.2.4 (U) *Survivability.* The M-X missile provides improved accuracy and throw-weight capability, but depends on the basing mode for enhanced survivability. The mode selected must have survivability, both to extract from the Soviets a high price for each M-X lost (see Strategic Stability) and to ensure that enough RVs remain after a Soviet first strike to threaten high-value, hardened Soviet targets.

5.2.5 (U) *Strategic Stability.* This requirement relates to the changing balance of U.S. and Soviet strategic forces. To encourage strategic stability, the M-X basing mode must ensure a worsening of the relative Soviet position following an exchange. Stability is also aided if the basing mode cannot be overwhelmed by simply increasing the number of weapons, but rather stresses Soviet technology.

5.2.6 (U) *Operability.* Once it survives, to perform its mission, M-X must be capable of launch and retargeting. This requires the ability to communicate with the National Command Authority, hardware and software for remote retargeting, and high survivability of critical subsystems and components. Retargeting is largely a function of the missile, while reliability and communications may be affected by the basing mode.

5.2.7 (U) *Resilience.* The basing mode selected must redress the immediate vulnerability of U.S. ICBMs to the projected level of Soviet forces in the near term. In addition, the mode selected must provide a permanent foundation for responding to increased threats in the long term. If the Soviets choose to continue development of a first strike capability. System enhancements or augmentations must be available that can be deployed with confidence, at an affordable cost, and in time to prevent system vulnerability.

5.2.8 (U) *Arms Control/Reduction.* The system deployed must support U.S. goals for strategic arms reductions. It must be consistent with existing treaties and agreements, as well as support evolving START negotiations.

5.2.9 (U) *Land Requirements.* Land Requirements must be minimized in order to enhance public and political acceptability.

5.2.10 (U) *Schedule.* The system selected must be able to meet the scheduled IOC of 1986 with acceptable technical risks.

5.2.11 (U) *Cost.* Although a specific requirement has not been established for cost, the basing mode selected must meet all system requirements at the least possible cost.

5.3 (U) *Evaluation of Alternatives.* The following subsections discuss each requirement defined above and the ability of the various basing options to satisfy them.

5.3.1 (S) [Deleted].

5.3.3. (U) *Survivability.*

5.3.3.1 (U) The Soviets' strategic arsenal is sufficient to destroy the majority of the present Minuteman forces, while expending a relatively small proportion of their force in the process. If M-X is based in Minuteman silos, the incentive for a Soviet first strike and the survivability from a first strike remain the same. The Soviets could attack M-X in Minuteman silos in the same manner as they can our present Minuteman force and, consequently, the M-X missile would be at risk.

5.3.3.2 (U) The greatly enhanced hardness achievable in widely spaced capsules requires such large increases in the yield of attacking weapons that the fractionation of Soviets weapons would be capped, and reverse fractionation would be required. While greater hardness makes individual capsules more difficult to attack, the Sovets are projected to achieve sufficient accuracy to conduct an effective attack. However, the sensitivity of attack success to small degradations in accuracy is greatly increased. Some increases in first strike survivability would result, but not enough to make a significant difference. Further, wide spacing of capsules does not deter the Soviets from using the same type attack strategies that would be used against the present Minuteman system.

5.3.3.3 (U) Close spacing of hardened capsules greatly enhances the survivability of M-X. The direct benefits of hardening are retained. In addition, the high level of hardness allows close spacing while preventing two M-X kills from a single attacking Soviet weapon. The spacing causes fratricide among Soviet RVs, which enhances the survivability of M-X and limits the size and pace of a Soviet attack.

[Deleted].

5.3.3.5 (U) For current Minuteman silos, a treaty compatible BMD of 100 launchers does not significantly increase survivability. The profusion of highly accurate Soviet MIRVs could be used to saturate a BMD of these deployments at a small cost to the Soviets. Even for an unconstrained BMD deployment, it is easier and less expensive for the Soviets to deploy more RVs than for the U.S. to deploy additional BMD missiles.

5.3.3.6 (U) BMD of widely spaced hardened capsules extracts a greater price from the Soviets because of the greater yield weapons required to attack these capsules. However, a treaty-constrained deployment of 100 missiles could still be overwhelmed.

5.3.3.7 (U) The addition of BMD further enhances survivability of closely spaced capsules by raising the attack price to the Soviets and stretching out the attack. A corresponding increase is gained in deterrence and warfighting capability. BMD is more effective and less complex operationally for the closely spaced targets of this option, which are easier to defend and require fewer BMD resources for effective defenses. Although arms control compatibility would have to be addressed for any BMD deployment, the greater effectiveness of fewer BMD assets with close spacing is appealing since it could allow deployment of an effective BMD within the 100-interceptor limit of the current ABM Treaty.

5.3.3.8 (U) Deep basing would provide excellent survivability for M-X due to the imposed miss-distance. First strike survivability would be high, as well as survivability over time.

5.3.4 (U) *Strategic Stability.*

5.3.4.1 (S) [Deleted].

5.3.4.3 (U) A treaty-constrained BMD of a deployment of M-X in current Minuteman silos would not significantly improve survivability or strategic stability. Additional improvements in survivability could be realized for widely spaced capsules, where the combination of forcing the Soviets to use large-yield weapons and improving the exchange ratios with BMD could discourage Soviet attack. There are, though, the added difficulties of deploying an effective BMD system over a wide area, especially with the treaty constraints. Closely spaced capsules, as evaluated above, would enhance strategic stability.

5.3.5 (U) *Operability.* The only basing option that could exhibit operability problems is deep basing. That is due to some questions about egress technology. All basing modes provide for retargeting, a survivable C^3 system, and a maintenance plan to achieve high reliability.

5.3.6. (U) *Resilience.*

5.3.6.1 (U) The ability of current Minuteman basing to respond to the Soviet threat is poor. First, the Soviets are not driven by this basing option to make any type of technological countermoves, save perhaps improving missile accuracy. Second, the effectiveness of technological improvements that can be made, such as additional hardening or BMD, is diluted by the wide spacing.

5.3.6.2 (U) Responsiveness to the Soviet threat is improved for widely spaced hardened capsules, compared to Minuteman basing, but not by a significant margin. The Soviets are not driven to develop or consider new attack strategies. Instead, they are driven to make technological improvements or proliferate existing hardware. These include using larger weapons, improving accuracy, and building additional boosters. This set of responses does stress Soviet capabilities, but in time the challenge can be met. This basing option is more robust than Minuteman basing, since enhancements such as concealment and mobility are available.

5.3.6.3 (U) Responsiveness to the Soviet threat is extremely good for closely spaced capsules. Consequently, the system is very robust and can be expected to be survivable for many years regardless of increases in threat. This comes about for two reasons. First, Soviet technology is greatly stressed in developing a response. Both new attack strategies and new hardware must be developed. Second, there are several growth options that can be added at reasonable cost to meet any threat the Soviets might attempt to develop. An expanded discussion of growth options for closely spaced capsules is given in Section 9.

5.3.6.4 (U) The addition of a treaty-constrained BMD does little to improve the resilience of Minuteman or widely spaced capsules, since there is no ability to enhance the system through proliferation of interceptors. An expanded BMD as described in Section 4.4 could more than double the Soviet attack required to destroy Minuteman and M-X in widely spaced capsules, enhancing their resilience to Soviet threat growth. Both closely spaced, hardened capsules and deep basing have good resilience without BMD. BMD as a growth option is most effective when deployed with closely spaced capsules.

5.3.6.5 (U) Deep Basing, due to its inherent survivability, has good responsiveness to the Soviet threat, and would stress Soviet technology.

5.3.7 (U) *Arms Control.*

5.3.7.1 (U) The basing options presented, with the exception of BMD, can be made compatible with current arms control agreements. In addition, the basing options fully support the current evolving START negotiations.

5.3.7.2 (U) A major issue with BMD is its compatibility with existing arms control agreements, specifically, the ABM Treaty. The United States is currently restricted to a single ABM site with 100 defense missiles and 18 radars located at Grand Forks, North Dakota. The addition of BMD to any of the options would require a location designation change. While deployment of an effective BMD for Minuteman or widely spaced capsules would require considerably more than 100 missiles, an effective BMD system for closely spaced capsules could be deployed within the 100-missile and 18 radar limit of the current ABM Treaty. Details on arms control are provided in Annex IV.

5.3.8 (U) *Land Requirements.* Table 5-1 summarizes the land area needed for M-X basing in Minuteman silos, widely spaced capsules, and closely spaced basing, with and without BMD. Deep basing would require 5 to 12 square miles. Both the dedicated land area needed (within the fence) and the area that would be circumscribed by the deployment are shown. This latter item is important since it determines the area over which M-X may have an impact. Moreover, some of the restrictions on land use and activities in this area could be more offensive to certain groups than additional land acquisition. It can be seen that although M-X in widely spaced capsules would require little dedicated land, it could impact a large area. Minuteman requires negligible additional land without BMD, and a small increment of dedicated land if BMD is added. The land requirements for closely spaced capsules without BMD are consistent with the size of Air Force bases in general. Land for deep basing also would be small in size.

5.3.9 (U) *Schedule.* The 1986 IOC can be met for all basing options without BMD except deep basing. Deep basing cannot be available until the early 1990s. BMD, using existing SPARTAN interceptors, could be available in 1986. Other BMD systems, such as SENTRY, can be available in 1988-1989.

TABLE 5-1.—LAND AREA REQUIREMENTS FOR M-X BASING ALTERNATIVES

Basing alternative	Land area (square miles)			
	Without BMD		With BMD	
	Dedicated	Circumscribed	Dedicated	Circumscribed
Current Minuteman	[1]	[2]	[3] 5.5	[2]
Widely spaced capsules	1	1,500	2.0	1,500
Closely spaced capsules	15	15	16.0	125

[1] Negligible.
[2] No additional.
[3] Additional.

5.3.10 (U) *Cost.* Although not used as an evaluation factor, preliminary costs for the various options are shown in Table 5-2. The values in the table represent acquisition and R&D costs for the complete M-X system in the basing modes shown, including costs of the missiles.

TABLE 5-2.—COST COMPARISON

[In billions of dollars]

Fiscal year 1982	Cost without BMD	Cost with BMD
Current Minuteman	16.1	36.1
Widely spaced capsules	24.0	44.0
Closely spaced capsules	23.4	33.6
Deep basing	NA	NA

5.4 (U) *Summary.*

5.4.1 (U) Figure 5-2 shows an overall evaluation of the M-X basing options using the requirements just developed. The effect of adding BMD to M-X based Minuteman silos, widely spaced capsules, or closely spaced capsules is summarized in the column entitled BMD Effectiveness. All options provide increased offensive effectiveness by the deployment of the M-X missile.

5.4.2 (U) The use of current Minuteman silos has obvious advantages in environmental and programmatic areas since existing land and facilities would be used. This option would be least costly and cause the least schedule risk. However, it does not provide the required prelaunch survivability to withstand a Soviet first strike and promote strategic stability. It is also not resilient to future threats.

5.4.3 (U) Widely spaced capsules do result in decreased probability of damage from a Soviet weapon on an individual capsule, but the wide spacing leaves the capsules vulnerable to unrestricted application of Soviet weapons to obtain high damage probabilities. The resilience of this mode is questionable since it does not force the Soviets to develop new technologies or to devise new attacks. The wider spacing greatly increases the amount of land required, and the acquisition of new land introduces programmatic issues.

5.4.4 (U) Closely spaced capsules, combining very high hardness levels with close spacing, offer an attractive combination of features. Close spacing requires incoming Soviet weapons to penetrate the nuclear effects of preceding Soviet detonations. Operational and technological limitations prevent the Soviets from effectively accomplishing attacks in this way. Therefore, substantial survivability of the M-X force is assured. This contributes to deterrence and strategic stability. It is the most resilient option considered, since it does provide a strong counter to current Soviet threat trends, and both stresses Soviet threat technology and requires them to develop innovative attacks. This is the option most compatible with a treaty-constrained BMD deployment, and supports U.S. arms reduction strategies. It is attractive from an environmental standpoint as well. Closely spaced capsules can be deployed by the scheduled IOC and meet all requirements at a reasonable cost.

5.4.5 (U) The integration of a 2,000-interceptor BMD system with M-X in current Minuteman silos serves to more than double the Soviet RV requirement to destroy both M-X and Minuteman in silos, but the Soviets are forecasted to have sufficient RVs to overcome such a system. The growth capacity of this system is also limited, leading to little resilience to further threat growth. The introduction of BMD also creates arms reduction problems, will increase the costs of this option, and may delay IOC by about 2 years. There are also developmental risks in deploying this type of BMD system.

5.4.6 (U) Hardened capsules, even widely spaced, provide better survivability than a Minuteman deployment. The integration of BMD carries the same limitations as for Minuteman deployment.

5.4.7 (U) Combining BMD with closely spaced, hardened capsules provides a system that is very resistant to a first strike attack as well as survivable over time. Because of the aggregation of the targets, closely spaced capsules are easier to defend than the other options. A less complex BMD system is required and fewer BMD missiles could provide comparable defense of the closely spaced capsules. BMD of this option would also pose less of an arms control problem than the BMD of other options since an effective system could be deployed within the 100-missile limit of the ABM Treaty. The smaller area required for BMD deployment would reduce the environmental and schedule problems associated with land acquisition.

5.4.8 (U) Deep basing offers a secure reserve force with the enduring survivability to encourage stability, but a concept to provide high confidence in quick egress is yet to be demonstrated. Resiliency is excellent and arms control requirements can be met. Deep basing cannot meet the required basing IOC, since it cannot be deployed until late 1989 or the early 1990s.

5.5 (U) *Conclusions.*

5.5.1 (U) Deployment of M-X in closely spaced hardened capsules is the only permanent basing alternative that meets all M-X system requirements. The close spacing allowed by the high hardness levels achievable will cause fratricide among Soviet RVs. The stringent requirements on Soviet accuracy and timing to avoid fratricide limit the size and pace of a Soviet attack, providing closely spaced capsules good survivability over time. The aggregation of hardened capsules gives the U.S. good flexibility for system enhancements (including the deployment of an effective BMD within the 100-launcher limit of the current ABM Treaty) to provide the M-X with good resiliency to future Soviet threats. The smaller area required by the close spacing minimizes environmental impacts and public interface. M-X can be deployed in closely spaced, hardened capsules with a late 1986 IOC, at a reasonable cost.

Mr. SASSER. Mr. President, I would like to quote from unclassified excerpts of the report:

The Soviets could attack MX in Minuteman silos in the same manner as they can our present Minuteman force and consequently, the MX missile would be at risk. * * * The ability of current Minuteman basing to respond to the Soviet threat is poor. * * * The use of current Minuteman silos * * * does not provide the required prelaunch survivability to withstand a Soviet first strike and promote strategic stability. It is not resilient to future threats.

Mr. President, placing the MX in Minuteman silos is not a secure basing mode. It leaves the MX vulnerable to a potential Soviet attack. This Nation needs a survivable land-based ICBM system not a vulnerable MX. Therefore, I will vote against the administration's recommendation for basing the MX in Minuteman silos.

Mr. President, Senate Concurrent Resolution 26 would also permit the initiation of procurement of the MX missile. If the Congress approves the resolution, the administration will be allowed to utilize almost $1 billion in fiscal year 1983 funds to place the missile into production.

The administration insists that the MX must go into production as soon as possible in order to meet the initial operating capability in 1986. But a review of the MX test schedule reveals that certain aspects of missile development are seriously behind schedule.

Air Force officials have indicated that the first test flight can occur by mid-June if Congress approves the concurrent resolution. If, however, the MX is test flown in June it will be attempted without a number of preflight test objectives having been accomplished.

I have reviewed the flight proof test schedule for the four stages of the MX and have found that the Air Force plans to fly and initiate procurement of the missile although stage II has met only one-third of the flight proof test objectives. For each of the MX stages the Air Force had previously planned three flight proof tests of flight configured engines to be successfully accomplished prior to first flight. The three flight proof tests for state I, stage III, and stage IV have all been accomplished.

Mr. President, I ask unanimous consent to place a summary of the flight proof tests for stages I, III, and IV at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

PEACEKEEPER PROPULSION TEST SUMMARY

STAGE I

Date: 7 Oct 82, 18 Nov 82, 7 Apr 83.

Designation: FP-03, FP-04, FP-01.

Location: Thiokol Corporation, Brigham City Utah.

Differences from flight configuration: Flightweight configuration.

Test conditions: Sea level, ambient; sea level, 45° F; and sea level, 100° F.

Test objectives: Demonstrate adequacy of flight design.

Results: Successful.

STAGE III

Date: FPT-2, 25 Sep 82; FPT-3, 5 Jan 83; FPT-5, 10 Feb 83.

Designation: FPT-2, FPT-3, and FPT-5.

Location: AEDC, Tullahoma, Tn., J-5 Cell.

Differences from flight configuration: All flight weight except FPT-2, cork insulation in nozzle; FPT-3, silica phenolic insulation in nozzle; FPT-5, carbon phenolic nozzle.

Test conditions: FPT-2, 50°F, simulated altitude (100,000 ft); FPT-3, 72°F, simulated altitude (100,000 ft); FPT-5, 50°F, simulated altitude (100,000 ft).

Test objectives: Demonstrate adequacy of flight design.

Results: Cork insulation was found to be unacceptable. Alternate nozzles are acceptable and will be tested in the flight program.

STAGE IV

Date: (1) 15 Oct 82; (2) 10 Nov 82; (3) 16 Dec 82.

Designation: (1) FPT-1; (2) FPT-2; (3) FPT-3.

Location: AEDC, Tullahoma, Tn.

Differences from flight configuration: None.

Test conditions: Test altitude >85,000 Ft; cell temperature: (1) 53°F; (2) 70°F; (3) 100°F.

Test Objectives: After dynamic testing—

Operation of stage III/IV separation ring.

Axial engine (AXE) and attitude control engine (ACE) performance.

Pressurization system and propellant storage assembly system enabling.

Nominal Mission duty cycle at temperature: 20 axe burns, duration time 0.3 to 164 sec; 2090 ACE burns, duration time 0.007 to 13 sec; total elapsed MDC time 748 sec.

Results: All successful.

Mr. SASSER. Mr. President, successful flight proof tests of flight configured engines were conducted on stage I on October 7, 1982, November 18,

1982, and April 7, 1983. Stage I is presently scheduled for critical design review on June 1, 1983.

Stage III was flight proof tested on September 25, 1983, January 5, 1983, and February 10, 1983. Critical design review of stage III will be conducted on June 8, 1983.

Flight proof tests were conducted on stage IV on October 15, 1982, November 10, 1982, and December 16, 1982. Stage IV is scheduled for critical design review next week.

Mr. President, three flight configured stages of the MX have received a complete series of flight proof tests and critical design reviews will be completed on these three stages prior to first flight and prior to a production decision.

Testing of a flight, configured stage II engine, however, is seriously behind schedule. Stage II has only received one successful flight proof test on October 21, 1982. Stage II was again tested in a flight configured mode on November 17, 1982, however, this test ended in case rupture and failure.

Mr. President, I ask unanimous consent that a summary of the flight proof test program for stage II be included at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

PEACEKEEPER PROPULSION TEST SUMMARY

STAGE II

Date: 21 Oct 82 and 17 Nov 82.

Designation: FPT-1 and FPT-3.

Location: AEDC Tullahoma, Tn; J-4 Cell.

Differences from flight configuration: None.

Test Conditions: FPT-1, ambient altitude; FPT-3, hot (97°F).

Test Objectives: Demonstrate adequacy of flight design.

Results: FPT-1, All test objectives achieved except roll control. FPT-3, motor failed at 0.260 sec after ignition test. Objectives not achieved (see following charts).

FPT-3 FAILURE SEQUENCE

Summary

Motor failed at 0.260 sec after ignition.

Motor ignition and pressurization appeared normal for first 0.120 sec.

Chamber pressure deviation begins at 0.140 sec.: Forward boot restricts gas flow from chamber around igniter to behind the forward boot; forward fin grain cracking and/or peeling of boot extension nipple causes large increase in propellant surface burn area resulting in pressure increase; and forward boot unzips further exposing propellant burn surface down case side wall finally breaking through aft fin web.

Motor case fails due to overpressurization of the case at 0.260 sec.

Corrective action

Both trimmed and redesigned motors: Open up bore around igniter; eliminate bonded boot extensions; and strengthen aft fin web.

Mr. SASSER. Mr. President, flight-proof testing for stages II, III, and IV are conducted at Arnold Engineering Development Center, Tullahoma, Tenn. Stage II was scheduled for testing in the J-4 test cell which had been refurbished under the military construction program to accommodate specific stage II testing. Following the stage II test failure on November 17, 1982, a subsequent accident a week later rendered the J-4 unable for further flight-proof testing of the engine until later in 1983.

Mr. President, at this stage of development only one of three planned flight-proof tests has been conducted on stage II. In addition, critical design review on stage II is not scheduled until October 18, 1983.

All stages except stage II have successfully accomplished three flight-proof tests and will receive critical design review prior to first flight and prior to a production decision. The failure to complete the full range of flight-proof tests planned for stage II raises legitimate questions regarding the advisability of proceeding with first flight and certainly argues against a decision to release funding for missile production at the present time.

I have discussed these issues with senior Air Force officials and discussions on the staff level are continuing. The Air Force, subsequent to the test failure on November 17 of last year, has conducted two additional sea-level tests on stage II for the purpose of checking out the redesign of the solid fuel propellant as a consequence of the November 17 accident. However, these two sea-level tests were not conducted on flight configured engines in an altitude chamber to simulate the extreme conditions of flight. The Air Force, while admitting that flight-proof test objectives have not been accomplished, indicates that enough data should be available to commit to first flight and seek approval from Congress of production funds.

Mr. President, I would like to quote from page 147 of the congressional budget justification data sheet on the MX missile. "The flight proof test program is designed to qualify the full-up flight configuration * * * completion of the flight proof test program will support first flight." In other words, flight-proof tests on flight-configured engines are deemed necessary prior to first flight according to the Department of Defense's own budget justifications. But as I have pointed out, the Air Force presently plans to proceed to first flight and secure a production fund decision from the Congress even though two of the three flight-proof tests on stage II have not been successfully accomplished.

Mr. President, this raises doubts concerning the advisability of approving production funds for the MX. Failure to complete a full series of flight-proof tests seems to raise new questions concerning the performance of the missile. The administration appears to be "leap-frogging" development of the MX by rushing into first flight and seeking approval of production funds without completing all planned preflight tests and conducting the critical design review on stage II.

Under these circumstances I shall urge my colleagues to vote against Senate Concurrent Resolution 26. The administration has stated that the MX is necessary as a bargaining chip to get the Soviets to the negotiating table. But the MX will not be a very effective bargaining chip if tests continue to end in failure. The administration is running a grave risk by linking a negotiating posture to an untested missile.

Mr. President, the administration's most recent MX proposal calls for the ultimate expenditure of $16 billion. I cannot support such an expenditure in the face of so many uncertainties regarding the MX.

The Scowcroft Commission also recommended advanced research and development on a smaller, more accurate single warhead missile. This appears to most observers to be an appropriate direction for the U.S. strategic nuclear modernization program. In addition, the Trident II missile, the D-5, which will be just as accurate and effective against hard targets as the MX will enter the inventory just 2 to 3 years later than the MX peacekeeper missile. This Nation will therefore have a continued credible deterrent with the mix of Minuteman, manned bombers, submarine-launched ballistic missiles, and cruise missiles.

A vulnerable MX does not strengthen the U.S. nuclear force. I therefore urge my colleagues to vote against Senate Concurrent Resolution 26.

A PERSPECTIVE ON THE NUCLEAR FREEZE

Mr. McCLURE. Mr. President, I have received a copy of an article by R. D. Woodruff, associate director, nuclear design, Lawrence Livermore National Laboratory. Mr. Woodruff presents a view of the nuclear freeze that is cast with an eye to history and founded in an understanding of weapons technology. His article presents information that is important to us all. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A PERSPECTIVE ON THE NUCLEAR FREEZE

(By R. D. Woodruff)

The concept of an immediate nuclear freeze has been receiving support from many concerned and well-intentioned citizens and members of Congress. Acceptance of such a proposal would be both dangerous and counterproductive. We all share the same goal—to minimize the likelihood of nuclear war. But the nuclear freeze would not reduce that possibility.

Thoughtful arms control proposals which are considered in the context of improving

national security and world stability are definitely needed, but they will not replace a strong U.S. nuclear weapons force that has been and remains the foundation for stability and freedom in the world. It has deterred communism from using, and threatening to use, its superior armed forces for aggression against the West for many years. Aware of this powerful restraint, the Soviets began in 1974 the deployment of large numbers of missiles carrying multiple, accurate nuclear warheads of high yield until they have reached such an advantage over the U.S. that Harold Brown in his report to Congress in 1980 said, ". . . The Soviets will have at least the theoretical capability in the early to mid-1980's to destroy a large percentage of our ICBM silos . . ."

These sobering facts of Soviet ICBM strength emphasize the necessity for maintaining the long term survivability of our sea-based and airborne nuclear forces and to improve the survivability of the ICBM's, if possible. Continuing improvements in nonnuclear technology (e.g., sonar, radar, computer signal processing, etc.) will make these systems increasingly vulnerable and have the potential of eventually destroying their deterrent credibility. Therefore the option to modernize these strategic systems must be retained. The Soviet ASW warfare threat to Poseidon is large, varied and growing in sophistication. The Freeze concept would do nothing to stop further developments in those areas that will further negate our retaliatory capabilities, but it would deny us the right to test and deploy new ballistic submarine systems. The new Trident submarine is to replace older missile submarines exactly because of such a threat and not to increase the number of our SLBMs.

The B52 bombers are a very important part of our deterrent, and they clearly offer only a retaliatory second strike capability. Without the cruise missile together with the proposed B1 bomber, this leg of the Triad may not be able to penetrate the massive and sophisticated Soviet air defenses, nor escape an SLBM barrage attack against their bases.

The argument is advanced that these detailed improvements of our nuclear deterrent are unnecessary because at least one or two Poseidon submarines will survive and each can place as many as 160 warheads on Soviet targets. But this would not be a balance of deterrent power. The American President, in order to threaten 25 million Russians in a second strike, would risk losing 100 million of his countrymen in a Soviet response. He would surely be obligated to capitulate in any confrontation in which there were explicit or implicit threats of a Soviet nuclear strike—or go to a very destabilizing launch-on-warning strategy.

The Soviet Union's growing nuclear arsenal has already caused discomfort in Western circles. And as U.S. power to protect the interest of its allies and friends declines, the incentive to build their own nuclear deterrent would increase. France constructed their "force de frappe" out of apprehension of the prospect that we would not be steadfast in our defense efforts. Other countries may do the same. Thus, the nuclear freeze by halting U.S. efforts to overcome nuclear inferiority, and making it worse in the future, might promote nuclear proliferation.

As cogent as these reasons are for opposition to most of the freeze initiatives, there is another, perhaps equally compelling, problem. It is simply that a freeze must be verifiable. Freeze proponents argue that it "can be verified by our own intelligence capability." This is certainly not true for the production of nuclear warheads and probably not true for missiles. We do not know with any accuracy how many nuclear warheads or ICBM back-ups the Soviets have produced. The previous SALT negotiations have tacitly acknowledged this inability by agreeing to "count" only launchers.

On-site, on-demand inspection is essential, yet the Soviet Union has never been willing to allow it. The concepts of "immediate" and "verifiable" freeze are incompatible. It is deceptive advertising. A "verifiable" freeze would take several years to negotiate. It is not a short-cut to arms stability as its proponents argue.

Without adequate verfication, we must trust the other side—as in the nuclear test moratorium of 1958–1961. On September 1, 1961, the Soviets broke this "agreement" abruptly, and without any announcement resumed nuclear testing with the most massive test series since nuclear weapons were developed. Adhering to the spirit of the moratorium, we were caught totally unprepared. Regarding these events, President John F. Kennedy said, "We know enough about broken negotiations, secret preparation, and the advantage gained from a long test series never to offer again an uninspected moratorium. Some urge us to try it again . . . we have explored this alternative thoroughly and found it impossible of execution."

The nuclear freeze discussion focuses our attention on a sober issue. The United States can best avoid a nuclear war while preserving its own and its allies independence by thinking seriously about a nuclear war and then taking prudent and timely action to forestall it. The quality of deterrence is determined by how effectively we prepare for the eventuality that deterrence may fail. In recent times, we have neglected our nuclear retaliatory capability and we must now respond by making a nuclear deterrent with assured survivability. The nuclear freeze, despite its good intentions, would allow the strategic Triad to remain vulnerable and become even more so in the future. It would impede real arms reductions. These consequences will not improve our chances for peace and security, nor free us from the threat of nuclear war.

PURCHASER ROAD CREDIT ISSUE DISCUSSED AT HEARING

Mr. McCLURE. Mr. President, on April 22, the Public Lands and Reserved Water Subcommittee of the Energy and Natural Resources Committee held a hearing on S. 916, the timber purchaser contract relief legislation which I have joined Senator HATFIELD and many others in sponsoring.

Two of the witnesses at the April 22 hearing traveled from Idaho to explain an issue which is of great concern to forest products companies throughout the Western United States. The two witnesses, Robert Hitchcock of Evergreen Forest Products and R. Kirk Ewart of Boise Cascade Corp., directed their testimony to the so-called purchaser road credit problem.

The purchaser road credit problem arises from the current process by which timber purchasers are reimbursed for the permanent roads they build under U.S. Forest Service timber sale contracts. The current road construction reimbursement system is inequitable since timber buyers are not always fairly and quickly repaid for the long-term public access roads they construct for the Federal Government.

Section 6 of S. 916 would solve the purchaser road credit problem by amending the statute governing the Forest Service road construction reimbursement process. The current process limits the recovery of roadbuilding costs to the end-product value of the timber on the sale under which the road is built. Section 6 would change the process to allow all road construction costs to be recovered up to the full Forest Service road cost estimate. In addition, the current process allows unused purchaser credits to be applied to another timber sale bought by the same purchaser on the same national forest. Section 6 would allow earned purchaser credits to be transferred among different timber purchasers and applied toward the purchase of timber either on the national forest in which they were earned or in another national forest in the same section of the country.

Mr. President, the statements made by Mr. Hitchcock and Mr. Ewart fully explain the purchaser road credit process and why the changes to the process that are contained in S. 916 are fair and reasonable. So that this information might be more widely available, I ask unanimous consent that the two statements be printed in the RECORD.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF ROBERT T. HITCHCOCK

Mr. Chairman and Members of the Committee, I am Robert T. Hitchcock, President, Evergreen Forest Products, Inc., of Tamarack, Idaho. Evergreen Forest Products is a small privately-held business with approximately 100 employees. I am also President of Wallowa Lake Forest Industries of Joseph, Oregon, which has 55 employees. Together, these two companies will produce approximately 60 million board feet of dimension lumber this year. Both mills are heavily dependent upon Forest Service timber.

I appreciate the opportunity to appear before you today to present my views on the two timber contract relief bills pending before this committee.

The two companies that I represent and, in my opinion, a majority of the forest products companies operating in the Intermountain region support S. 916 as introduced by Senators Hatfield and McClure. We support the bill because it would make all ineffective purchaser road credits effective. Such a change in the law would ensure that all federal timber purchasers are promptly and fairly reimbursed for the costs they incur when building permanent public access roads under Forest Service timber sale contracts. Under the present system of reim-

bursement, timber buyers are not always repaid in full for the road building services they perform. We oppose S. 848, Senator Cranston's bill, because it would leave the current flawed reimbursement system intact.

Mr. Chairman, the purposes of my statement before this committee are to: (1) explain how the existing purchaser road credit system operates; (2) describe why the system is often unfair, especially in periods of extreme market decline; (3) outline the changes to the road credit system which we favor (and which are included in S. 916 as Section 6); and (4) respond to some of the objections which have been raised to the proposal to eliminate ineffective purchaser road credits.

BACKGROUND

Permanent National Forest System roads are constructed to provide access to federal forest resources, both by the government and the general public. The roads are needed for proper administration, protection, management, and use of the national forests.

All permanent roads are planned, designed, and engineered by the Forest Service. Many are actually constructed by that agency. Others are built by private companies which purchase federal timber for use in manufacturing various wood products.

Like any forest landowner, the Forest Service can finance road building through one of two methods: it can use cash (appropriated funds) to pay for a road, or it can finance road construction by trading timber resources for road building services. The vast majority of National Forest System roads are constructed by timber buyers under provisions of timber sale contracts.

Although timber purchasers are not in business to build federal roads, we have accepted road construction clauses in Forest Service timber sale contracts as a required part of doing business with the government. All that we ask now is to be fairly and quickly reimbursed for the costs we incur in building public access roads for the Forest Service.

PURCHASER ROAD CREDITS

Before each timber sale is sold, the Forest Service prepares an estimate of all required road construction. When the roads are actually built, the timber buyer receives a "purchaser road credit" equal in amount to the Forest Service road cost estimate. For example, if the road estimate is $500,000, then the purchaser credit earned once the roads are built is also $500,000. The credit can be applied to the amount owed the government for the timber cut on the sale under which the road was built. The credit can also be used to pay for timber on another sale bought by the same purchaser on the same national forest. The credit cannot be converted to cash.

Purchaser road credits are "effective" when the value of the finished products to be made from the wood in a timber sale is greater than the cost of making those products (including the cost of road construction). Conversely, purchaser credits become "ineffective" when the finished product value of the timber is less than the cost of making the products. Three hypothetical examples illustrate the difference between effective and ineffective purchaser road credits:

Sale 1:

Finished product value of timber	$1,000,000
Costs of production [1]	500,000
Permanent road construction costs	500,000

[1] Manufacturing costs, logging costs, transportation costs, and profit and risk.

Subtracting the non-road building costs of production from the finished product value of the timber ($1,000,000—$500,000), leaves $500,000 for road construction reimbursement. Since all of the road building costs can be recovered, 100% ($500,000) of the purchaser credits are effective.

Sale 2:

Finished product value of timber	$750,000
Costs of production [1]	500,000
Permanent road construction costs	500,000

[1] Manufacturing costs, logging costs, transportation costs, and profit and risk.

Subtracting the non-road building costs of production from the finished product value of the timber ($750,000—$500,000), leaves $250,000 for road construction reimbursement. Since half of the road construction costs can be recovered, 50% ($250,000) of the purchaser road credits are effective and 50% are ineffective.

Sale 3:

Finished product value of timber	$500,000
Costs of production	500,000
Permanent road construction costs	500,000

Subtracting the non-road building costs of production from the finished product value of the timber ($500,000—$500,000), leaves absolutely nothing for road construction reimbursement. Since none of the road construction costs are recovered, 100% of the purchaser road credits are ineffective.

In the three examples I have just described, a permanent asset—a $500,000 road—is constructed for the federal government. While the government is treated identically in all three instances, the timber purchasers are not. The buyer of the first sale is fully repaid for the road he builds, but the buyers of the second and third sales do not receive full repayment for the roads they construct, since all or part of their purchaser road credits are ineffective.

DEFICIT SALES

Forest Service timber sales for which the production and road costs exceed the end-product value of the timber (such as in examples 2 and 3) are often referred to as "deficit" sales. A sale may be deficit because of any or all of the following "design" factors: (1) the required roads under the sale include an expensive "mainline" road to be used to access many future timber sales in the same vicinity; (2) the road is unnecessarily over-designed for the purposes for which it is intended; (3) the costs of logging the sale and hauling out the timber are unusually high, as is the case where extremely steep terrain must be logged by helicopter or other similar low-impact methods; and (4) expensive fish and wildlife habitat protection measures are required, such as smaller cutting units to protect elk habitat or high-standard roads to protect salmon spawning beds.

In addition to "design" factors, market conditions can also contribute to or cause deficit sales. For instance, the three sales I described earlier can also be viewed as the same sale in which the end-product value of the timber decreases over time. In a declining market, a sale will "go deficit" (and make some or all of the purchaser road credits for the sale ineffective) when the finished product value of the timber falls below the level necessary to absorb the road construction costs and the costs of production. This situation, unfortunately, exists on many uncompleted Forest Service timber sales; that is why there is such a large amount of ineffective purchaser credit at present.

It is a fair question to ask, at this point, why timber purchasers would buy deficit sales and risk losing substantial sums of money when the timber is eventually harvested.

Many forest products companies operating in the western United States are highly dependent upon national forest timber as a source of raw material. If a company has no alternative timber supply, it may buy deficit sales for a time in order to remain in business. Such a company will hope for an upward turn in lumber prices so that its deficit sales become ones which, in the end, at least cover the costs of production. However, a company cannot buy only deficit sales if it expects to remain economically competitive.

It is because we desire to see a reduction in the number of deficit sales, through the elimination of ineffective purchaser road credits, that we are supporting S. 916.

SECTION 6 OF S. 916, A SOLUTION TO THE PURCHASER ROAD CREDIT PROBLEM

As the sponsors of S. 916 have stated, regardless of economic conditions, all purchasers of national forest timber ought to receive fair reimbursement for the costs they incur in building permanent public access roads under Forest Service timber sale contracts. We strongly support the provisions of Section 6 of S. 916 which would accomplish that objective by making all purchaser road credits effective, both on existing and future sales. In order to make sure that timber purchasers receive prompt reimbursement for road building services, we support the changes to existing law which are included in Section 6 to allow unused purchased credits to be transferable among timber purchasers and applied toward the purchase of timber either on the national forest in which they were earned, or in another national forest in the same section of the country.

RESPONSE TO OBJECTIONS ABOUT THE PURCHASER ROAD CREDIT PROPOSAL

Mr. Chairman, before concluding my testimony, I want to take a few minutes to respond to some of the objections raised about the purchaser credit proposal embodied in Section 6 of S. 916.

First, it has been argued that it is not appropriate to make permanent changes to the statute governing the recovery of purchaser road credits within an "emergency" relief bill. I'm not sure I understand the logic behind this argument. If a proposed change in the law is in the public interest—as we believe the purchaser credit provisions to be—why should it not be approved without worrying about where it is attached?

Beyond that point, there are good reasons why the purchaser credit proposal should be part of any timber contract relief bill. For example, the termination provisions of the pending legislation will improve the competitive position of West Coast operators for many years into the future. Companies operating in the Rocky Mountain region will be forced into a position of long-term disadvantage unless the contract termination provisions are balanced with changes to the purchaser credit process. In addition, the ineffective road credit problem is clearly retarding the economic recovery of

mills in our region. The termination provisions of S. 916 or S. 848 will not help us out of the current slump, nor protect us from future market downturns, but the purchaser credit provisions of S. 916 will help meet both objectives.

Second, objections have been raised to the purchaser credit proposal on the grounds that it would reduce total Treasury receipts from timber sales. (The precise effect of the proposal is difficult to estimate because the relative percentages of effective and ineffective purchaser credits change as wood product prices rise and fall.) Obviously, a change such as the one we seek is not without its costs. However, we believe that the benefits of such a change—including increased employment and a more stable employment base—far outweigh the costs. Furthermore, focusing only on "revenues lost" obscures the basic policy question at the heart of the purchaser credit issue: should all federal timber buyers be fairly reimbursed for the costs they incur when building permanent public roads for the government?

Third, some people have argued that making ineffective purchaser road credits effective would grant new authority to the Forest Service to allow the sale of timber in areas where the costs of building the roads to reach the timber exceed the value of the products to be made from the trees. These same individuals contend that the National Forest Management Act of 1976 prohibits such sales. Neither argument is accurate.

A careful review of the 1976 Act reveals that Congress did not intend to prohibit development where *immediate* costs are greater than *immediate* benefits. Instead, Congress intended a long-term accounting. The purchaser credit proposal fits into that statutory framework. It does not change the current rules that allow timber harvesting and road building only where long-term benefits exceed long-term costs.

Fourth, and finally, it has been stated that the purchaser credit proposal would increase the rate of road building and timber harvesting within national forest roadless areas. That statement is false. Road construction and timber sale activities are strictly controlled by the land management planning process and regulated by the Congressional appropriation process. Approval of the purchaser credit proposal will neither increase nor decrease the rate of such activities.

CONCLUSION

In closing, Mr. Chairman, I would like to thank you and other Senators for your sustained support of S. 916 and your interest in the problems facing the forest products industry. I urge you to continue to do everything possible to secure prompt and favorable approval of S. 916.

STATEMENT OF R. KIRK EWART

I am R. Kirk Ewart, Director of Regulatory Affairs for the Boise Cascade Corporation, Boise, Idaho. I want to thank you for holding these hearings and for the opportunity to testify on the critical subject of Federal timber contract revision legislation. I appear here today in support of S. 916 which we believe provides the necessary mechanism for remedying the economic situation in which our industry finds itself.

It is a long outstanding practice for the owner of timber to bear the cost of road construction necessary to support the sale of the owner's timber cutting rights. This practice is common to all classes of timber owners: industrial, non-industrial, private and all classes of governments owning and managing timber resources. The method of bearing road costs varies by class of landowner, but the underlying principal is the same.

Some timber owners elect to use their cash to build roads necessary for harvest and then recover road costs through higher timber prices at time of sale. Another practice is to reduce the price of timber sold then require the purchaser to use his cash to build needed roads. In this case the purchaser recovers his road building costs by paying less for the timber. There are variations of these basic methods of paying for roads needed for timber harvest, but the end result is the same—the timber landowner pays for roads needed to harvest his timber.

Because Forest Service timber sale activity take years of presale work and because it must depend upon annual appropriations from Congress to support its activities, this timber owner has never been able to depend upon a predictable flow of cash to support a significant internal road construction program. Therefore, the Forest Service has used timber receipts to finance road development needed to support its timber sale programs.

The method used to compensate Forest Service timber sale purchasers for road construction has evolved through several systems over the past twenty years. First, the total estimated road cost was amortized over the total estimated volume of timber included in the timber sale. This system failed because the volume estimates used at the time of sale preparation often proved to be in excess of that actually harvested resulting in the purchaser failing to recover the full estimated cost of road construction. To remedy this problem the amortization formula was revised to use only 80 percent of the timber volume estimate as a basis for road cost amortization. This change greatly improved road cost amortization, but failed to deal with a situation which became more noticable as the cost of roads became a more significant portion of the total cost of timber sale operations.

As the cost of road construction escalated, most purchasers would not incur road construction costs until immediately before timber harvest was planned thereby allowing rapid road cost recovery via the amortization process. This procedure resulted in purchasers attempting to use partially completed roads, and using roads which had been completed but not seasoned. Wet weather and green roads generate road surface failure which may diminish the roads ability to perform to design standards. Also the possibility of water quality damage from road construction increases from the practice of construction just prior to harvest.

The operational problems associated with the road amortization system encouraged a new look at the process which resulted in transferable purchaser credit.

As a purchaser constructs roads necessary to harvest timber included in a timber sale, he earns purchaser credit. Once earned, the purchaser credit can be used to pay for timber harvested on the sale generating the purchaser credit, or timber harvested from any other sale on the same National Forest held by the purchaser who earned the purchaser credit. By creating a system which permits timber sale purchasers to recover road construction costs very soon after expenditure, purchasers are then encouraged to build roads as soon as possible after purchase of a timber sale even though logging may not be planned for several years. Therefore, most environmental problems associated with operating over new roads are eliminated or greatly reduced.

The existing purchaser credit system has evolved over a long period during which the Forest Service has attempted to recognize its obligation to compensate timber sale purchasers for roads constructed. This evolutionary process is not yet complete. Purchaser credit must be changed to improve the process of timber purchaser compensation for road construction.

The existing purchaser credit procedure permits timber sale purchasers to use only that purchaser credit which is "effective" for the payment for timber harvested on the same National Forest upon which the effective purchaser credit was earned.

"Effective purchaser credit" is best understood by defining ineffective purchaser credit. Ineffective purchaser credit arises when the cost of necessary road construction exceeds the timber value above timber sale contract base rates. That portion of road construction cost which exceeds timber value above base rates may be earned, but is not effective, so cannot be used by the purchaser to pay for timber harvested. Under circumstances which lead to earning ineffective purchaser credit, the Forest Service has received a road which the purchaser must build, but has not compensated that purchaser for creating the road asset for the United States.

Timber sales which generate ineffective purchaser credit result from several factors. Timber sales which contain contract provisions which adjust stumpage price to reflect the quarterly change in value of the products estimated to be produced from the timber included in the timber sale (escalation) may have had sufficient timber value above base rates to lead the purchaser to believe at the time of sale that all earned purchaser credit would be effective. However, if a market decline occurs after purchase, which happened in 1979, previously anticipated purchaser credits could, at no fault of the purchaser, become ineffective. Under these circumstances the purchaser must still build the roads, but the United States will fail to provide compensation for the road credit received.

In some cases timber sales are offered which at the time of sale do not have enough appraised cash value above base rates to make all or any purchaser credit effective. Under the existing purchaser credit system, the only way a purchaser of such a sale could be compensated for road constuction are: (1) if the sale contract contained stumpate rate adjustment procedures (escalation) and there was a major product market increase during the life of the sale; and (2) if, during the auction of the timber sale, competition resulted in stumpage values being increased to the point that purchaser credit which was ineffective at offering became effective after bidding.

Timber sales which do not contain one hundred percent effective purchaser credit at time of offering are not desirable and should be avoided, but are not, under some circumstances, a poor public management practice. Escalating road costs resulting from inflation and more sophisticated and expensive road construction standards; less timber being available for harvest at the time of construction per mile of road constructed as a result of the Forest Service response to wildlife habitat needs, scenic preservation, maximum harvest unit size, water quality and fish habitat; and less appropriated funds available for access road con-

struction from the major public highway system to the timber harvest areas, have all resulted in more sales with less than total effective purchaser credit. In these cases, the United States fails to compensate the purchaser/road builder, but has in place a valuable road which makes future timber sold tributary to such a road very valuable because of the implace road. The public has gained access to the area for all manner of recreational activities and the Forest Service has vehicular administrative opportunities to control fire, insects and disease. All this without full payment.

Purchasers who buy timber sales which result in ineffective purchaser credit often do so without choice. A mill without timber supply has only scrap iron value. If only ineffective purchaser credit sales are offered, the mill owner has the choice of attempting to purchase such sales or closing his mill. Such is a difficult choice and forces speculation, an aspect of Forest Service timber sale conduct being discouraged by the Forest Service and the Administration.

By limiting the transferability of purchaser credit to the same National Forest upon which it was earned, an unfortunate and at times anticompetitive circumstances have developed. A purchaser may be a major Forest Service timber sale opeator, but may have only one active timber sale on a specific National Forest. Because transfers are limited such a purchaser is unable to use the credit earned in a timely fashion and is thus denied rapid recovery of road construction costs. This situation must be remedied to assure the deservable objective of treating all Forest Service purchasers the same.

Many timber sales are now under contract which were sold in the prerecession era which include large value in ineffective purchaser credit. Some of these sales were purchased with all or part of purchaser credit being effective, but the recession pulled product prices down thus triggering downward stumpage rate adjustment, therefore making purchaser credit ineffective. This situation could and should be remedied by making all purchaser credit included in existing timber sales effective on a retroactive basis.

In closing, Mr. Chairman, I want to thank you for the opportunity to present our views on S. 916. We look forward to working closely with the Committee as this legislation is developed. I would be happy to answer any questions which you may have.

LEWIS LEHRMAN AND THE WILLIAMSBURG SUMMIT

Mr. PERCY. Mr. President, it was with great interest that I opened this morning's Wall Street Journal editorial page to see a prominent article by Lewis Lehrman.

Mr. Lehrman is a man of ideas and a candidate who came within a whisker of winning the New York gubernatorial race last year.

In today's article, Mr. Lehrman calls on the Western nations to raise the need for monetary reform at the Williamsburg summit at the end of this month. Mr. Lehrman makes an excellent case for discussing currency alinements and monetary policies at the summit. He states at one point in his piece that "there is no major country yet willing to look at the fundamental flaw of the international economic system: The notion of political leaders that national economic and monetary policy can be made independent of the world economy."

Mr. Lehrman continues, "The truth is that there is only one economy. It is the integrated world economy. Therefore national economies need a monetary coordinating mechanism."

Mr. Lehrman's view is that gold will supply the best uniform international standard and "coordinating device", as he calls it. That may be so. Other economists believe there are other ways to reach the same point of a more coordinated international economic mechanism.

In any case, I agree completely with Mr. Lehrman that the summit is the appropriate place to broach this subject. It is an important element in the trade positions of all the Western countries. And given the protectionist sentiments raising in many countries, it is most appropriate to begin an earnest dialog on currency alinments.

I have not had a chance to talk with Mr. Lehrman about the resolution that I introduced last week (S. Res. 135) with a bipartisan group of Senators. Our resolution calls for the very kind of summit discussions that Mr. Lehrman calls for in his article. I believe he would support our resolution. I know American exporters support it, because they are head to head with the competition and know the cost of currencies askew.

Mr. President, I ask unanimous consent that the text of our resolution on the Williamsburg summit be printed in the RECORD at this point, following Mr. Lehrman's column.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, May 11, 1983]

LET'S TALK MONEY AT WILLIAMSBURG

(By Lewis E. Lehrman)

Williamsburg is an economic summit without an agenda. That shouldn't be surprising, for the West today has no coherent economic order—unless you count austerity and sacrifice.

Recently, I returned from a trip to European capitals. Central-bank officials and ministers of trade did acknowledge the profound problems of monetary disorder, exchange-rate fluctuations and their protectionist effects. Yet, while the French government now calls for a return to the Bretton Woods system—profoundly flawed itself but certainly more effective than the present float—no minister with whom I spoke believed international monetary problems would be formally discussed at Williamsburg. This pessimism about the possibilities of reform is striking, coming only six months after Treasury Secretary Regan called for a monetary conference.

The issue of international monetary reform and the new arguments for different systems of fixed exchange rates arise from the failures of the managed currency float of the past 10 years. During this period, economies of the West declined and protectionism intensified. Ideas of reform originated in the 1960s, with the purpose of curing the primary defect of Bretton Woods—the reserve currency status of the dollar, which led to a permanent balance-of-payments deficit in the U.S. These ideas have not yet been sufficiently considered. Now is the time to do so.

The evidence is compelling that reconsideration of the world monetary system is overdue. One need only review the history of the last few years in America, Britain, Germany and France, as their economies declined under the weight of the monetary and interest rate disorders engendered by central bank money market manipulation.

In Britain in 1979, Margaret Thatcher's Conservatives campaigned against the Keynesian credit policy of the Bank of England and the sterling depreciations of the Labor government. Mrs. Thatcher's campaign called for a stable currency, economic growth, low interest rates and financial order. After nearly four years of austerity and an unapologetically monetarist central banking policy, Britain still has 13% unemployment. Output is no higher than four years ago. Meanwhile, the pound's value fell from $2.50 to $1.45—beneath the lowest level under the Labor. The cost of credit, the touchstone of economic growth, hovers at real rates of 8% to 10%, depending on the quality of the borrower, even as the public-sector borrowing requirement has diminished as a percentage of GNP.

FRANCE'S CURRENCY COLLAPSED

In France, Francois Mitterrand's Socialists campaigned in 1981 against the credit and budget austerity of President Giscard. They promised a statist industrial program of economic expansion. However, Mr. Mitterrand's conventional neo-Keynesian policies of government spending and credit expansion led to the collapse of France's currency. The trade deficit grew to $14 billion a year and domestic inflation intensified. Now, the new Mitterrand policy of austerity, designed to deal with the crisis is, of all things, Thatcherite monetary targeting joined to the most draconian inequity of all—wage and price controls aimed at lowering real wages. Despite the stringency of the Mitterrand austerity, interest rates have risen and unemployment is over 9%. He has repudiated the very goals of economic expansion and job growth for which his government was elected.

In Germany in 1982, Helmut Schmidt's Social Democrats also presided over rapidly rising unemployment occasioned by the government-sponsored Bundesbank policy of credit austerity, monetary targeting and high interest rates. By the summer of 1982, Mr. Schmidt's coalition fell apart as his Free Democrat allies, sensing repudiation, switched affiliation to the Christian Democrats. What made Hans Dietrich Genscher and his Free Democrats jump ship was massive defections from the Schmidt economic policy, as measured by opinion polls. Germans of both parties rejected the policies of austerity.

Capitalizing on discontent with austerity, Helmut Kohl's CDU negotiated a deal with the FDP and shrewdly called for early elections in March 1983. They won those elections by a decisive margin, campaigning for a program of economic recovery.

In the U.S., President Reagan came to office in 1980 after a brilliantly successful campaign based on job creation, new investment, stable money, lower interest rates and economic growth. It is true that inflation has come down. And it is true that, unlike

most of his Western European counterparts, Mr. Reagan has significantly reduced marginal tax rates. But the real cost of credit for homes and business is still unacceptably high. Industrial production does not yet exceed 1979 levels. There are still over 11 million unemployed.

The credit policy of Fed Chairman Paul Volcker has brought down inflation while producing one of our greatest recessions, a world banking crisis, and a political setback for the Republicans in November 1982. But the policy of monetary austerity, and the recession it caused, was not President Reagan's program of 1980. It was instead the policy of the Fed and the Office of Management and Budget. Like Mrs. Thatcher, Mr. Reagan unwittingly fell into the trap of his advisers who advocated credit austerity.

And so the West sways between expansionist central bank credit policies that lead to the euphoria of inflation, and austerity policies of credit contraction, which lead to the despair of unemployment and spiritual poverty. In a larger sense, and to some practical extent, this stop-go economics has impoverished us all. European and American workers are punished by Socialists and Conservatives for the "sin" of wanting wages that keep up with inflation.

In the meantime, because of unemployment, Western governments are preoccupied with the balance of trade—an all-time fallacy. The specter of protectionism is on the rise. But our disorders in the world trading system cannot be cured by GATT or by trade agreements. Those disorders are monetary in origin. Protectionism thrives on competitive exchange-rate policies, brought about by the abrupt currency depreciation and appreciations of well-meaning but uncertain central bankers and politicians.

Many central bank officials in Europe speak with pride about the new austerity. They look with equanimity on the 35 million unemployed of the OECD countries. The question is: Must policy makers put 2.5 million people out of work in Germany, 3 million in Britain, 11 million in the U.S.—in order to reduce inflation? Surely those who still believe in the future of the Free World and in the American dream must answer: No, there is a better way. Only national and international monetary reform can cure our monetary disorders.

It was the German monetary reform of 1948, based on a new convertible currency—a deutschemark tied to gold—that along with deregulation produced the German Miracle. It was the creation in 1959 of a convertible gold franc, which brought forth the savings and investment, that made the Fifth Republic of De Gaulle rich enough to create both nuclear defense and national prosperity. The gold convertibility of the dollar, and multilateral convertibility in Europe—the hallmarks of the Bretton Woods system—created the conditions for postwar prosperity. But the Bretton Woods system had the great flaw of being based on the *official* reserve currency status of the dollar.

SYSTEM IS IN DEEP TROUBLE

The monetary order of Bretton Woods was never reformed in this respect. As a result, when the dollar collapsed in 1971, Bretton Woods collapsed too, just as Prof. Jacques Rueff and Robert Triffin forecast in 1959.

The truth is that there is only one economy. It is the integrated world economy. Therefore, national economies need a monetary coordinating mechanism. And that is why an integrated world economy needs a common monetary standard, which is the best neutral international coordinating device. But no national currency will do; only a world currency will work. That is why having national currencies convertible to gold—an international money—has worked in the past and will work again.

Even Mrs. Thatcher was recently quoted as saying, "It's absolutely vital for us to jointly pursue policies which enable us to get and keep interest rates down and to keep inflation down." There is such a policy. The policy of convertible currencies, linked to an international monetary standard, is the only one which has worked reasonably well in the past. The policy is imperfect, as are all human institutions; but a system of fixed exchange rates which is the incidental by product of the real international gold standard is the least imperfect of the international monetary systems we know. Without such a free-world monetary order we shall never restore sustained price stability, long-term capital markets at low interest rates, and the investment boom which alone can lead to reasonably full employment.

Without a reformed monetary system of multilateral, unrestricted convertibility of the major Western currencies into gold, we shall continue in a topsy-turvy world, oscillating between autarky and entropy. Incredibly, Socialists will talk of reducing the real wages of workers to increase profits and end trade imbalances, as they do now in France. And self-styled anti-Keynesian Conservatives will rely on neo-Keynesian central bank credit expansion to create economic booms in order to end austerity and get reelected.

The international monetary system is in deep trouble; we won't just muddle along much longer. The time to deal with the so-called "structural" problems of our monetary order is now. If we do, we can once again create conditions of rapid non-inflationary growth. If we don't make the reforms, sooner or later the world economy will founder.

Only the U.S. can take the lead. We must begin at Williamsburg.

S. RES. 135

Whereas the continuing misalinement of major currencies with the United States dollar is a principal factor in undermining United States trade competitiveness and in depressing the United States economy over the past 2 years; and

Whereas the consequence has been the loss of many hundreds of thousands of jobs, severe dislocation in many areas of the United States economy, and the generation of protectionist pressures; and

Whereas persisting disparities in interest rate levels between the United States and other key currency countries have contributed heavily to these ongoing exchange rate misalinements; and

Whereas both these maladjustments result in major part from inadequate coordination and harmonization of general economic policies among the United States and other key currency countries; and

Whereas European and Japanese officials have indicated a desire to discuss remedies for there problems; and

Whereas the forthcoming Williamsburg Summit conference at the end of May will bring together the leaders of key currency countries: Now, therefore, be it

Resolved, That it is the sense of the Senate that: First, the President should arrange to have included among the highest priority themes of the Williamsburg Summit to seek a consensus among the participants on the need to improve the coordination of economic policies among Summit countries, aimed at reducing disparities in economic policies, interest rates, and exchange rates between the major industrial nations; at stemming current dangerous protectionist pressures; and at hastening a healthy and sustained recovery of industrial economies and of international trade.

Second, such consensus should include announcement of a mechanism or procedure for such consultation on a close and continuing basis so long as important protectionist pressure and increased governmental intervention in international trade remains a danger to the world trade system; and

Third, such consensus should also include provision for an early meeting of Summit country Ministers of Finance and the United States Secretary of the Treasury to consider steps to achieve better alinement between the interest rates and major currencies and to make public the objectives of such steps; and

Fourth, the President should arrange, in conjunction with the Williamsburg Summit, bilateral discussions with the Prime Minister of Japan to initiate special efforts to bring about consensus and joint action to achieve the earliest possible further realinement of the yen and dollar exchange rates.

NOMINATION OF RICHARD S. WILLIAMSON TO BE REPRESENTATIVE TO THE VIENNA OFFICE OF THE UNITED NATIONS AND DEPUTY U.S. REPRESENTATIVE TO THE INTERNATIONAL ATOMIC ENERGY AGENCY

Mr. McCLURE. Mr. President, I rise to offer my strong support for Richard S. Williamson who has been nominated to serve as U.S. Representative to the Vienna Office of the United Nations and Deputy U.S. Representative to the International Atomic Energy Agency. This newly created mission merges the former missions of the International Atomic Energy Agency and the U.S. mission in Vienna to various U.N. organizations.

Mr. Williamson's distinguished career in both private law practice and in the public sector includes experience in the field of international affairs. He has served as executive editor of the Virginia Journal of International Law while attending law school, has been active in the international law area while working in private practice, and, currently, chairs interdepartmental task forces on Puerto Rico and other U.S. territories which have involved him in the administration's Caribbean Basin Initiative. Mr. Williamson has been an invaluable asset to the administration while serving in various positions including Special Assistant to the President and Deputy Chief of Staff of the White House. As Assistant to the President for Intergovernmental Affairs, he has proven to be a very talented and capable negotiator during the delicate discussions on the President's New Federalism proposal. I believe that Mr. Wil-

liamson's experience in the fields of law and international affairs provide him with an appropriate background to meet his responsibilities in Vienna.

As Deputy U.S. Representative to the IAEA, Mr. Williamson will be working in conjunction with Ambassador at Large Richard T. Kennedy in Washington. I viewed with great pride the President's announcement on September 14, 1982, of the appointment of Richard T. Kennedy, then Undersecretary of State for Management, to be the President's and the Secretary of State's Special Representative for Nonproliferation Policy. I applauded that move then and now, because it demonstrates the President's personal commitment, and that of Secretary Schultz to assuring a high-level focus on nonproliferation policy for the remainder of the Reagan administration. I have met with Mr. Williamson personally and am equally impressed by his dedication to the administration's nonproliferation policy. As chairman of the Senate Committee on Energy and Natural Resources, I believe Mr. Williamson and Ambassador Kennedy will make an outstanding team to promote this Nation's nonproliferation interests.

The International Atomic Energy Agency, and its nuclear safeguards program, in particular, are very important to U.S. nonproliferation policy. Any weakness in the safeguards system would inhibit U.S. efforts to confine the use of nuclear power for peaceful purposes. A recent issue which has developed in this regard concerns the State Department's notification to Congress of its intent to open the Portsmouth Gas Centrifuge Facility to International Atomic Energy Agency safeguards.

The U.S.-IAEA treaty provides that only a minimum amount of information and data for implementing international safeguards must be disclosed to the IAEA and the agreement only applies to those facilities which do not have a national security significance. During the hearing on the U.S.-IAEA agreement in 1979, I pointed out that IAEA safeguards at Portsmouth could present a serious risk of disclosure of highly sensitive national security information and restricted data, based on DOE memorandums at the time. Since this significant risk of compromise of sensitive information is not necessitated by the terms of the treaty, I would urge the State Department, Ambassador Kennedy, and Mr. Williamson to insure that making the Portsmouth facility a candidate for international safeguards will not have such a negative result.

One optimistic development in regards to the safeguards program has been the Soviet Union's offer to begin negotiations on opening up some of its civilian nuclear plants to IAEA inspectors. The offer is considered a positive step toward encouraging other nations to sign the Nuclear Nonproliferation Treaty and could eventually lead to an agreement to permit onsite verification of arms agreements. The U.S.-IAEA Treaty should serve as a model for negotiations between the IAEA and the Soviet Union. Because of the significance of any such diplomatic development with the Soviet Union, I encourage Mr. Williamson in his new position to focus close attention on the IAEA negotiations with the Soviet representative.

In the past year, the IAEA became a symbol of the growing politicization within several of the U.N. organizations. On September 24, 1982, the IAEA voted to reject the credentials of the Israeli delegation to the General Conference, which had the effect of excluding them from further participation in that IAEA Conference. This action led to a walkout by the U.S. delegation and 15 other states. Then in October, the administration suspended its payment to the IAEA and Secretary Schultz announced that the United States would not participate or fund any U.N. agency which voted to exclude Israel. In December, the Senate Appropriations Committee reported out the foreign operations appropriations for fiscal year 1983 with no funding for the U.S. voluntary contribution to the agency. However, the State Department felt that in light of the administration's ongoing reassessment of U.S. participation in the agency, the full $14.5 million for the U.S. payment to the agency, should be restored by the Appropriations Committee. Subsequently, Senator KASTEN and I sponsored an amendment which was passed by the Senate on December 16 to provide $10 million in additional funds for the Agency, provided that the Board of Governors certified that Israel could participate fully in the IAEA. The Director General of the IAEA subsequently provided the necessary certification and the funding has now been resumed. Also, the interagency group working on the administration's reassessment concluded that the IAEA was crucial to U.S. national security interests and shortly thereafter, the United States resumed participation at the IAEA Board of Governors meeting in February. In the future, we must continue to express our opposition to any attempts to politicize this vital peacekeeping organization and prevent it from carrying out its safeguarding responsibilities. Mr. Williamson must make every effort to insure that the position of the United States at the IAEA on this crucial issue remains crystal clear.

In the past, controversies which have arisen in connection with the IAEA include the shipment of enriched uranium for India's Tarapur reactor, China's opposition to joining the IAEA, and Pakistan's refusal to accept full scope safeguards and IAEA inspection of all its nuclear activities. The Ambassador to the IAEA will have the difficult task of dealing with other troubling issues such as those while pursuing this Nation's nonproliferation objectives in Vienna—a challenge, I am confident that Mr. Williamson will be able to meet.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BIDEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BIDEN. Mr. President, morning business will end in about 3 seconds. I ask unanimous consent that I be permitted to speak for 5 minutes as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

POSSIBLE SOVIET VIOLATIONS OF ARMS CONTROL AGREEMENTS

Mr. BIDEN. Mr. President, it is not my habit to discuss sensitive intelligence subjects on the Senate floor. So far from this, I do not even like to discuss subjects that, while they themselves might not involve intelligence programs, are subjects related to or derived from intelligence programs. I think that in either case, essential U.S. intelligence sources and techniques might be compromised. In the long run, the benefit to the United States of having these sources and methods undisclosed far outweighs the short-term gain to be had in disclosing such information.

On the other hand, from time to time information is disclosed that, if left unchallenged, can significantly and improperly affect important political decisions in the Congress and in the executive branch. If left unchallenged, such selectively disclosed intelligence can end up by improperly affecting the opinions of the American people. In short, such selectively disclosed information can pollute the environment of public debate in this country.

Although the problem of partial disclosures of intelligence information that present a one-sided or slanted picture of important issues has been with us for a long, long time, in the past few years this problem has become particularly acute.

The current debate over Central America supplies an example of this problem. This debate has raged on and off for the last 2 years. Unfortunately, public understanding of the extremely complex issues in El Salvador and

Nicaragua has not been promoted at all by this administration's selective disclosures and use of intelligence information. For one thing, this selective disclosure severely overemphasizes the role of outside forces in the Salvadoran civil war and minimizes the role of other economic, political, and historic factors.

As someone who has closely studied what the CIA and other intelligence agencies have reported on a classified basis regarding Central America, I can attest to the fact that the role of the Nicaraguan and Cuban Governments in supplying arms to the insurgent groups of the Farabundo Marti National Liberation Front in El Salvador is beyond doubt.

Nevertheless, in speaking with far greater certainty than is possible about the quantities of such arms shipments and about their role in fueling the Salvadoran civil war, the Reagan administration has, I feel, done more harm than good to the promotion of public support for its Central American policies. It has made many Americans totally skeptical about the truth of this administration's public statements on the Nicaraguan and Cuban roles. Because of this skepticism, many Americans now feel it improper for the United States to assist efforts to interrupt this flow of arms. I doubt that this can have been the administration's desired effect.

It is not Central America, however, that I want to speak about today. I am concerned today about another, equally important misuse of sensitive intelligence information.

ALLEGATIONS OF ARMS CONTROL VIOLATIONS

The recent rash of disclosures in the press and allegations on the Senate floor about possible Soviet violations of arms control agreements constitute another troubling instance of such selective disclosures. We have read in the newspapers, for example, that some of President Reagan's more politically-minded advisers are urging him to speak publicly on a long, and potentially significant, list of possible Soviet violations of arms control agreements.

On April 14, the distinguished senior Senator from Idaho presented a list of similar allegations on the Senate floor. We heard, for example, that the Soviets are testing two new ICBM's in contravention of article 4 of the SALT II text permitting only one new, light ICBM for both the United States and the Soviet Union.

Furthermore, it was stated that the Soviet Union has violated the SALT I Treaty in a variety of ways. We heard, for example, that they have tested a tactical missile, the SAM-12, in an antiballistic missile mode. According to these claims, the SAM-12 has a capability not only against the Pershing II, but also against the Poseidon and Trident submarine-launched missiles. Similarly, it was stated that two other surface-to-air missile systems—presumably the SA-5 and the SA-10—are being developed with an ABM capability.

It was claimed that the five new, large phased array radars around the Soviet Union's periphery have an ABM battle management capability.

It was further stated that the SS-18 heavy ICBM had been given a rapid reload capability in violation of SALT II article 4.

Moreover, we heard that the Soviet Union, in their underground nuclear weapons tests, have consistently exceeded the 150-kiloton ceiling agreed to by the United States and U.S.S.R. in the unratified 1974 Threshold Test Ban Treaty.

Finally, we have heard that the Soviets have exceeded the SALT II ceilings of 2,400 on the number of strategic delivery vehicles and of 1,320 on MIRV'ed launchers.

These are just a selection of allegations based on and sometimes disclosing sensitive U.S. intelligence sources and methods that have recently been made on the Senate floor.

There is a real problem in proceeding with a public discussion of these charges. I am at a disadvantage in a public discussion because I steadfastly refuse to disclose or even tend to disclose classified information. Nevertheless, I feel required to discuss these allegations today.

Even in the most temperate of international climates, arms control is a delicate fabric. It is a vitally important fabric protecting an elementary, civilized dialog between countries that have very different outlooks on the world and very different notions of what is morally acceptable international behavior. In the current, rather untemperate international climate, these indiscriminate allegations of Soviet treaty violations threaten to shred this fabric into pieces that would take years to stitch back together.

As a member of both the Intelligence and the Foreign Relations Committees, it is virtually impossible for me not to have a close knowledge of our intelligence information regarding Soviet military activities bearing on arms control agreements. More specifically, it is virtually impossible for me not to have a close knowledge of the Soviet strategic military activities to which these allegations allude. It is also, however, virtually impossible for me not to have a close knowledge of the inherent ambiguities that surround much intelligence information and anmalysis.

SOVIET ACTIVITIES

Mr. President, it is not my ambition here to act as an apologist for the Soviet Union. I do not have to improperly release information from classified intelligence reports to show how damaging Soviet behavior is to constructive and harmonious international order. Examples enough can be found in the world's newspapers.

The use by Soviet client states of apparently Soviet supplied chemical weapons in Afghanistan, Kampuchea, and Laos in violation of the 1925 Geneva Convention, and quite possibly the 1972 Biological Weapons Convention, is quite convincingly documented.

The Soviet Union has brutally invaded and occupied Afghanistan—with over 100,000 combat troops and the most advanced weaponry—since Christmas of 1979. The Soviet Union continues its stranglehold on the aspirations for personal liberty and human dignity of the Polish people.

It should no longer be necessary for any Member of this body to prove his grasp of Soviet belligerent and interfering behavior by reciting the list of Soviet clandestine efforts in Central America that fuel insurgencies in an areas of the world of immense importance to the United States.

Recent weeks have supplied yet another, almost ironic example of unacceptable Soviet behavior. The Soviet Union has consistently taken uncooperative positions in a variety of international arms control agreements and negotiations by refusing to allow onsite inspection of military facilities as a means of helping to verify compliance, although it has shown some signs of flexibility in negotiations for the Comprehensive Test Ban Treaty. The recently adjourned Conference on Disarmament in Geneva found no exception to this recalcitrance. The Soviet Union argues that such onsite inspection for verification purposes infringes on its national soverignty.

Now the hyprocrisy in the Soviet concept of national sovereignty becomes clear as the Capitol's dome on a sunny day when it is realized that, during the last 2 months, over 70 Soviet diplomatic and other officials have been expelled from approximately 10 countries for espionage activities. Last week, for example, the Government of Switzerland expelled a representative of the Soviet news service Novosti. That Soviet official had offered to provide paramilitary training to participants in Swiss antinuclear demonstrations.

This sort of behavior is not exactly diplomatic. It makes cooperation with the Soviet Union a difficult and at times infuriating enterprise.

As I think these examples show, I am not an apologist for Soviet behavior in arms control or any other area of international behavior. Furthermore, I am very concerned about what is apparently Soviet supported violation of the 1925 Geneva protocol prohibiting the use of chemical weapons. I also am disturbed by highly ambigu-

ous, and possibly prohibited, Soviet behavior related to SALT II.

PROBLEMATIC USES OF INTELLIGENCE

Nevertheless, if recent statements alleging that the Soviet Union has violated strategic arms control agreements on a massive scale are left unchallenged, I am afraid that they will create the impression among the American people that the entire U.S. Government agrees with these allegations. I am concerned personally that if I, as a member of the Foreign Relations and the Intelligence Committees who has extensive access to classified information, say nothing at all in response to these charges of massive Soviet violations of SALT treaties, then I appear to give my tacit agreement to them. If I gave my tacit agreement to these charges it would make very little sense for me to be, as I still am, a strong supporter of the unratified SALT II agreement and of worthwhile future arms control agreements.

If I gave my tacit agreement to this process of selectively disclosing intelligence information to support a particular political point of view, it would make little sense for me not to selectively disclose intelligence information to support my own political point of view.

I will not give my tacit agreement to these charges of massive Soviet violation of strategic arms control agreements. I will not give my tacit agreement to this process of selectively disclosing classified information to support particular political positions. I want, therefore, to criticize these allegations on three counts.

SELECTIVE DISCLOSURE OF INTELLIGENCE

First of all, I want to criticize the general form of these allegations. With these allegations, individual governmental officials, in the administration or the Congress, have unilaterally released classified information and also thrown in heavy portions of speculation and hypothetical thought. As I have already stated, this approach to classified information is totally unacceptable. It places people who both disagree and respect classified information in the position of not being able to respond to these charges. I will not, as I could, disclose classified information that sheds a different light on classified information that has been released. Nor will I disclose hard, factual classified information, as I could, that convincingly refutes highly dubious speculation and hypothetical thought.

However, I will argue that this manner of selectively and improperly disclosing intelligence on possible Soviet arms control violations is unacceptable because it undermines the established procedures for using and protecting classified information within the U.S. Government. Virtually every individual in the Government can find pieces of classified information to support just about any political position. The only feasible way that this Government has to make sure that all these pieces of classified information are not released in a hemorrhage of leaks fatal to our intelligence sources and methods is if everybody agrees to follow classification regulations.

Moreover, this manner of selectively disclosing intelligence on possible Soviet arms control violations is unacceptable because it cripples the established diplomatic procedures that we have for dealing with the Soviet Union regarding possible violations of the treaties.

SALT I created a Standing Consultative Commission comprising American and Soviet representatives, who meet regularly in Geneva, for the purpose of dealing with these problems. Similar questions regarding SALT II have been addressed in the same forum. In the Standing Consultative Commission, ambiguities can be addressed in a frank and quiet way. It is possible to discuss problems without interjecting public relations and face saving concerns.

In the past, the United States has participated in the Standing Consultative Commission because Presidents of both parties have thought it was in America's national interest. They thought that the SSC was the best way to discuss highly complex issues of the SALT agreements in a relatively calm and technical format. Most importantly, Presidents of both parties felt that to start off with highly public charges of Soviet noncompliance would result only in making the issues so politically charged that problem resolution with the Soviets was almost impossible and massive disclosure of U.S. intelligence secrets almost guaranteed.

There may come a time when the United States will decide that the Standing Consultative Commission serves no worthwhile purpose. When and if the U.S. Government makes this decision, that will be the time to bypass the SCC. That will be the time to make doubts regarding Soviet compliance with SALT a matter of public debate and condemnation.

With these points in mind, or April 14, Senators GOLDWATER and MOYNIHAN, the chairman and vice chairman of the Intelligence Committee, wrote to President Reagan offering to have the Intelligence Committee do a study of Soviet compliance issues related to SALT II. While that letter addressed the need to take a firm stance with the Soviets on compliance issues, it discussed the fundamental and serious problems that arise when charges of violation are made public in a heated atmosphere.

Some people will argue that any effort to suppress or keep these allegations of Soviet noncompliance secret is only a coverup effort by SALT supporters. That is not the case. As I have already argued, there are established procedures both within the U.S. Government and between the United States and the Soviet Union for dealing with these sorts of problems. These procedures can and must be made use of by opponents of SALT just as much as by SALT supporters.

ROLE OF INTELLIGENCE IN VERIFICATION

The second of the three criticisms I want to make against these allegations of noncompliance is that they indicate a fundamentally mistaken and misleading approach to the role that intelligence information plays in arms control agreements. This role is hard to discuss in an unclassified setting, but a few basic principles can be mentioned.

In some instances, intelligence information—whether derived from human sources, photography, or other technical means—would be able to show a clear-cut violation of an arms control agreement. SALT II, for example, limits launches of MIRV'ed ICBM's to 820. If more than 820 launches for MIRV'ed ICBM's show up in overhead photography, there has been a clear violation of this provision.

Unfortunately, it is very rare that the verification task of SALT or other agreements is so straightforward or that the intelligence information available is so unambiguous. Consequently, verification considerations have been such an important and controversial feature of arms control agreements.

A significant detail that should be noted is that U.S. intelligence agencies do not even talk in terms of verification of arms control agreements. Instead, using the terminology of the intelligence agencies themselves, it is the function of the intelligence agencies to monitor compliance with arms control agreements. Verification of compliance, however, is a much more judgmental exercise. Verification involves a generally difficult weighing of often ambiguous information to determine whether there has been a violation of a treaty provision and, furthermore, decisionmaking about whether relevant activities of the Soviet Union are either politically or militarily significant.

With this distinction in mind, it strikes me that a certain contradiction lies at the heart of some of these allegations of Soviet noncompliance with SALT. On one hand, Senator MCCLURE has over the last month rattled off a growing list of Soviet actions that he is apparently very confident are violations of SALT I and II. On the other hand, he implies that U.S. intelligence capabilities are not really up to the job of following Soviet actions. He said on April 14, for example, that verification has not been a serious issue in the

past because of the mystique associated with national technical means.

This is not the time or place to conduct a complex analysis of the respective sets of problems posed by monitoring compliance with arms control agreements, on the one hand, and by verifying such compliance, on the other. What is important to understand is that both monitoring and verification are difficult and often highly ambiguous enterprises.

Clearly, I cannot take one of the recent charges of Soviet violation of SALT provisions—such as that the Soviet Union has deployed the SS-16 mobile ICBM at Plesetsk missile test center or that the Soviet Union is secretly preparing a nationwide ABM system—and conduct a public analysis of the corresponding intelligence information. But if such an analysis were to be done, it would become clear that the intelligence information presents a very different picture of Soviet behavior from that which emerges from these confident sounding lists of alleged violations. In short, the available intelligence is often ambiguous.

In some cases, the intelligence shows apparently conscientious Soviet compliance with arms control agreements. For example, the Department of Defense's publication "Soviet Military Power" states that "with the addition of each new SSBN, the Soviet Navy has dismantled older submarines in order to remain within the number of launchers (950) and number of hulls (62) allowed under provisions of the SALT I agreement, as extended." In other cases—such as with the testing of new ICBM's or mobile missile deployments—the available intelligence is more ambiguous.

In either case, however, it is important that the American public and news organizations realize that there is not intelligence information available at this time which discloses Soviet violation of the SALT agreements or the threshold test ban treaty. As a clarification, it should be noted that the Soviets have not dismantled 95 strategic nuclear delivery systems, as they would have been required to do, had the SALT II treaty been ratified, to reach the ceiling of 2,400.

INACCURATE ALLEGATIONS

The third and final argument that I want to make against the recent allegations of Soviet noncompliance is that they, in many cases, are simply flatly inaccurate. Because of the security and classification concerns which I mentioned earlier, several of these allegations cannot properly be discussed, weighed, supported, or criticized at all in a public forum.

There are other allegations that are quite possibly accurate. For example, the extremely high level of telemetry encryption in test programs of new strategic systems is a possible violation of article 15 of SALT II. The United States does not encrypt telemetry in its own strategic systems test programs. The Soviet insistence on not only doing so, but, recently, in its SS-NX-20, PL-4 and 5, and cruise missile test programs doing so almost totally, raises serious questions about whether the Soviets are willing to participate in arms control agreements in good faith. More directly, it raises questions about whether the Soviet Union has violated article 15 of SALT II.

Similarly, Soviet activities in regard to SALT provisions covering mobile ICBM's, the ban on the SS-16, and the one new type of light ICBM can only make me wonder about the depth of Soviet interest in maintaining the SALT framework. They seem highly incompatible with Soviet propaganda efforts to assure European public opinion of their commitment to arms control.

However, there is a series of allegations of Soviet violations of the SALT agreement that are quite simply false and false in terms of unclassified information which the U.S. Government has released.

For example, it is asserted that the Soviet Union, in conducting three tests of apparently dissimilar solid-fueled ICBM's, has violated the SALT II provision permitting only one new type of ICBM.

In fact, if all three missiles tested to date have the same number of stages and same propellant of each stage, there has been no violation of the provisions in the SALT II text governing the testing of one new type of permitted ICBM.

Article 4 of SALT II's text requires only that, in the beginning of a test program, every missile tested of the one new type have the same number of stages and the same propellant of each stage as the first missile tested. It is only farther into what is usually a test program of 20 or more launches that various dimensions of the tested missile must fall within narrow boundaries. Specifically, during the last 12 launches of the first 25 test flights or during the last 12 launches before deployment, whichever occur first, the length, diameter, the launch weight, and the throw weight of the tested missile may vary by no more than 10 percent. After these 12 tests, these dimensions may vary by no more than 5 percent. In any event, the three launches to date of new ICBM's are almost certainly not among the last 12 launches of a new ICBM test program, and therefore, not limited by either the 5-percent or 10-percent boundaries.

Of course, there are other provisions of the SALT II text which come into play after such tests, such as the prohibition on the testing of the small, solid-fueled, mobile SS-16 missile and on measures aimed at concealing the association between ICBM's and launchers during testing, among others.

Furthermore, these three Soviet tests can only make Western public opinion wonder about Soviet willingness to support the spirit of and not undercut SALT II. But it is inaccurate to call them a violation of the treaty.

As another example, it has been argued that the Soviet Union has exceeded the SALT II ceiling of 1,320 MIRV'ed missile launchers and bombers equipped with long-range cruise missiles. While the exact figure is classified, according to the intelligence community's most recent analysis, the Soviet Union is in fact under this ceiling of 1,320. Furthermore, even if current, nuclear-capable Bear, Bison, and Backfire bombers were considered to be carriers of long-range cruise missiles and, therefore, counted under the 1,320 MIRV'ed ceiling, the total number of Soviet MIRV'ed systems would still fall below the 1,320 ceiling.

Similarly, it was recently argued that the Soviet Union has deployed more than the 1,200 MIRV'ed ICBM's and SLBM's allowed under SALT II. This allegation is also incorrect. Again, while the exact figure is classified, according to the intelligence community's most recent analysis, the Soviet Union is beneath this ceiling.

Furthermore, it has been argued recently that the Soviets have exceeded the SALT II ceiling of 820 on MIRV'ed ICBM launchers. However, according to page 19 of the Defense Department's own "Soviet Military Power," the Soviets have deployed only 788 MIRV'ed ICBM launchers and are expected to deploy only 818 by the time they complete modernization of their fourth-generation ICBM systems in the mid-1980's.

It was also claimed that the Soviet Union violated a SALT II ban in giving some of its ICBM systems a rapid reload capability. This argument would seem to be succinctly rebutted by page 21 of the Defense Department's "Soviet Military Power" which states, "The Soviets probably cannot refurbish and reload silo launchers in a period less than a few days." Although the Soviet Union might have a limited capability to reconstitute its strategic forces after an initial firing, there is no real indication of a rapid reload capability.

Finally, my distinguished colleague from Idaho claimed on the Senate floor on April 14 that since 1976, the effective date of the unratified Threshold Test Ban Treaty, the Soviet Union has conducted over 15 underground nuclear tests in excess of the treaty ceiling of 150 kilotons. This claim is one that is virtually impossible to discuss in a meaningful fashion without reference to classified information. It is the sort of issue that really should not be raised at all in a

public forum because of the security concerns which I mentioned earlier. However, I would like to call attention to an article in the October 1982 Scientific American by Drs. Lynn Sykes and Jack Evernden, two distinguished geophysicists. In the article, these scientists write:

In recent years there have been reports that the U.S.S.R. may have repeatedly violated the 1976 treaty by testing devices with a yield greater than the 150-kiloton limit. Such reputed violations were recently cited as evidence that the threshold treaty, which has not been ratified by the U.S. Senate, is not verifiable and should be renegotiated. On the basis of our analysis we conclude that the reports are erroneous; they are based on a miscalibration of one of the curves that relates measured seismic magnitude to explosive yield. When the correct calibration is employed, it is apparent that none of the Russian weapons tests exceed 150 kilotons, although several came close to it.

In short, these, and other scientists argue that previous techniques for estimating the yields of Soviet nuclear explosions were in error because they made an incorrect assumption about the geology of Soviet test sites, an assumption that led to estimates of the yields of these explosions significantly higher than the actual yield. It is this discredited technique for estimating the yield of Soviet nuclear tests that has been improperly used to support the claim that the Soviets have violated the Threshhold Test Ban Treaty limit of 150 kiloton for nuclear tests. To repeat the expert judgment of Drs. Sykes and Evernden, "When the correct calibration is employed, it is apparent that none of the Russian weapons tests exceed 150 kilotons, although several come close to it."

Furthermore, even if the previous, discredited technique had been valid, there are still large statistical uncertainties that accompany the most rigorous estimates of the yields of nuclear tests.

SUMMARY

In summary, then, the entire exercise of selectively disclosing intelligence information which implies that the SALT agreements have been violated is both ill advised and misleading. Frequently, such disclosure misrepresents Soviet military activities and severely threatens the all important arms control process that we have with the Soviet Union—or what remains of it. Furthermore, this sort of disclosure fosters a basic misunderstanding of the role that intelligence information plays in the verifying compliance with arms control agreements.

As I think I have indicated, I have serious concerns of my own about whether the Soviet Union has violated specific provisions of the SALT texts. There are, however, proper channels within the U.S. Government for discussing these issues without either compromising or twisting intelligence information.

Furthermore, there are proper channels between the United States and Soviet Governments for discussing these possible violations without encouraging the disintegration of the arms control process.

The long term interests of the United States in nuclear weapons control are much better met and protected if both these types of channels are kept intact.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

The PRESIDING OFFICER. The Senate will resume consideration of the unfinished business which the clerk will state.

The bill clerk read as follows:

A Senate concurrent resolution (S. Con. Res. 27) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

The Senate resumed consideration of the concurrent resolution.

AMENDMENT NO. 1243

The PRESIDING OFFICER. The pending question is on the Domenici amendment No. 1243.

Who yields time?

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Domenici amendment as stated by the Chair be temporarily set aside so that Senator MITCHELL may offer an amendment regarding the EDA.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 1255

(Purpose: To restore funding for Economic Development Assistance programs)

Mr. MITCHELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Maine (Mr. MITCHELL) for himself and Mr. SASSER proposes an amendment numbered 1255.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, increase the figure on line 23 by $200,000,000.

On page 14, increase the figure on line 24 by $20,000,000.

On page 15, increase the figure on line 6 by $200,000,000.

On page 15, increase the figure on line 7 by $70,000,000.

On page 15, increase the figure on line 13 by $200,000,000.

On page 15, increase the figure on line 14 by $170,000,000.

Mr. MITCHELL. Mr. President, this amendment would provide an additional $200 million in budget authority and $20 million in outlays in fiscal year 1984 for the Economic Development Administration. These levels represent the continuation of fiscal year 1983 funding levels. The budget resolution before us assumes no funding for this program.

Since 1981, when the administration first announced its plan to eliminate the Economic Development Administration, I have opposed it. I have said repeatedly that no matter how successful the President's economic policy was going to be, some sectors of our Nation, some regions, some rural areas, and some cities would not enjoy a full share in that success because of long standing regional and local problems that inhibit economic growth.

Each year, the President has asked for more time and more patience for his economic program to work. He has asked the nearly 11½ million jobless Americans to be patient until capital investment and business expansion provide the jobs they need.

Those millions of unemployed are concentrated in areas and States hardest hit by the recession and in areas and States with chronically high unemployment.

The problems of such communities have been aggravated by the depth and duration of the recent recession. Even though the economy is now showing signs of a recovery, there is no assurance that the recovery will be strong enough, sustained enough, or broad enough to overcome the economic depression in many of our Nation's communities and regions. Some of these are areas which, in good economic times and bad, simply lack the internal resources to build for the future. Others are towns newly fallen into economic difficulty because of the recent and sudden decline of traditional industries and the uncertainty about what recovery will mean for those industries.

In the midst of uncertainty about the prospects for economic recovery, the termination of the Economic Development Administration has been proposed again. This course of action made no sense in 1981 or 1982, and it makes no sense now.

The EDA was created to promote the long-range economic development of areas with severe and persistent unemployment and with low per capita income. EDA aids in the development of public facilities and private enterprise to create new, permanent jobs and to preserve existing jobs which

might otherwise be lost by shutdown of an industry in such an area.

The act is grounded in the reality that no matter how successful national economic policies may be in stimulating overall economic growth and reducing inflation and unemployment, important structural problems will remain. Many of our Nation's urban and rural communities will still be experiencing unemployment, lagging economic growth, industrial decline, and underutilized production facilities.

Beneath the national statistics, there are always such economic disparities. National economic growth and health is never distributed evenly across the regions, communities, people, and businesses of the country.

EDA represents an effort to correct those disparities. It has created thousands of jobs in its lifetime, jobs that would not have been created if there had been no incentive for industries to relocate, and no money to save businesses that need time to regain their competitive viability.

EDA works in partnership with local governments, private companies, and banks to extend carefully targeted help to meet local conditions. It is not a Washington-based monolith that ignores State and local governments and imposes unrealistic solutions on unwilling communities. On the contrary, it works with State and local officials to develop and help finance projects responsive to local economic needs.

EDA exists because local conditions can cause economic problems that no national strategy can resolve. EDA exists because some national policies themselves have harsh local effects. EDA exists because we have long had a common understanding that our national goal is a thriving prosperous national community, not thriving regions separated by depressed regions, or prosperous States pockmarked with pockets of poverty. Where such pockets exist, our national policy has been to eliminate them, not to ignore them.

My State, Maine, has a mixed economy. It suffers a severe winter climate whose effects have been seriously worsened by oil price increases in the last decade. It is not a centrally located State, so gasoline and motor oil price increases have helped drive up transportation costs disproportionately. These natural physical features of the State have been aggravated by international political decisions on the part of the OPEC nations. Our Government was not responsible for them. But our Government does have, in my opinion, an obligation to be aware of the different impact that such uncontrollable events can have on different States.

National policies which encourage liberalized trade, which give more than fair trading advantages to help lesser developed nations, have also affected Maine. The footwear industry in Maine is not only coping with the high interest rates every business faces, but is being forced to bear the brunt of the administration's free trade policy, with no offsetting import relief. Our fisheries industry must compete against the products of a Canadian competitor which enjoys direct government grants and loans, major government help for marketing and transportation, and even a directly subsidized diesel fuel price—all of which undercut the price Americans can ask for their harvest. Our potato growers face an import surge designed to capture the U.S. market, which has been aggravated by a trade policy that makes our producers much more vulnerable to questionable trading practices.

The Economic Development Administration has been a way to help redress unfairness, by giving help to regain a competitive edge against imports, by helping provide marketing facilities, and by providing alternative private sector jobs to help offset job losses in changing industries.

That is clearly the most sensible, cost-effective and humane way to cope with localized pockets of economic hardship.

However, the administration has consistently maintained that it intends to deal with economic development at the subnational level by improving the national economy.

So the administration's plans rest on the hope that by improving the Nation's economic performance, every region of the country will share in that improvement.

That assumption has no historic basis in fact. It has not been true for Maine over the last 20 years. And, for over a century, it has not been our national economic policy.

In 1850, when it became apparent that the success of the Eastern States in building their rail networks promised an increase in wealth for the entire eastern seaboard, Congress enacted the Railroad Land Grant Act—truly landmark legislation—to encourage, by Federal subsidy, the expansion of the rail network in the South and West. And for 21 years thereafter, long after the transcontinental line met at Ogden in 1864, Congress continued to grant rail land rights, 131 million acres of land were granted for that purpose—a Federal subsidy for western and southern economic development whose worth cannot be calculated at today's prices.

Beginning in the 1880's, hydroelectric power was aggressively developed with Federal aid. The first major alternating power project was constructed on the Willamette River, in the State of Oregon. The first three-phase project was constructed at Mill Creek, in California. Ironically, the justification for concentrating development in that part of the Nation was a familiar one: the high cost of energy. In those days, it was the cost of transporting coal, but the problem of energy costs and their effects on economic growth was recognized then, and the Federal Government acted to offset it, to the immense benefit of the West.

By 1902, 30 years of homesteading acts had not been enough to encourage the settlement of the arid parts of the West, so Congress enacted the Reclamation Lands Act of 1902, a regional economic program which has changed the face of the country. Under the Reclamation Act, water projects were built in 17 Western States to irrigate arid land. Some of our great cities—Phoenix, Denver, Los Angeles—could not exist without that water. The Imperial Valley in California, the most productive farmland in the Nation, could not produce without it. Thousands of acres throughout the West today would be barren and arid without the life-giving aid of the water brought to them by Federal financing. And, as one result, western lands with less than 9 inches of rainfall each year now produce an agricultural product worth $4.4 billion every year.

In the 1930's, when the Great Depression was at its worst, Federal funds were poured into regional efforts to help provide employment and economic growth in the West and South. The massive Bonneville hydro project on the Columbia River was built to provide employment in the Pacific Northwest. Today, a potato-processing plant in Washington State pays one-fifth the rate of electricity that a similar plant pays in Maine, because of Bonneville power and the other Federal hydro projects in Washington.

The greatest of the regional development programs, the Tennessee Valley Authority, is still benefiting its seven-State area. Its series of dams, reforestation projects, powerplants, and fertilizer plants have lifted a region which was in the depths of poverty in 1933—its people then earned 45 percent of the national average income—to a thriving and economically productive region today. In 5 years, from 1933 to 1938, the Federal Government spent $190 million on the TVA—a sum whose present-day counterpart would run into many billions. And as a result of that Federal financing, the people of Tennessee today pay for their electricity half what the people of Maine pay for theirs. The TVA project permanently increased the level of employment in the region. It created the economic base that has enabled the entire Tennessee Valley area to grow.

This massive Federal assistance to the South and the West over the past century has given those areas a base from which today's rapid rate of economic development flows. It was grounded in the recognition that not all regions of the country have identi-

cal needs, that they do not move forward in lockstep, and help is needed at different times by different parts of the country.

Today, as we observe the prosperity of the Sun Belt, we should recall that the present economic boom owes its existence to many decades of generous Federal aid.

That Federal aid was paid for by the tax dollars of the people in the East and North. It was not paid grudgingly. It was paid in recognition of the reality that we are one Nation, and what helps one region helps all regions, what helps one American helps all Americans.

Today, we have a modest program which extends assistance to areas of chronic unemployment and low per capita income: the Economic Development Administration. And because of the forces of history and the actions of the Federal Government, the region that needs help now is the East and the North. Today, this is the region of high unemployment and low per capita income.

EDA is a small effort to redress the balance, an effort that cannot even possibly compare to the massive programs which benefited the West and the South over this Nation's history, to recognize that our Nation's older regions incur higher costs to maintain the investment in cities and industries that were built in earlier decades.

I can think of no action more destructive and less in keeping with any standard of fairness, including the standard of fairness that the President repeatedly professes, than the termination of this program.

The President's recommendation and the Budget Committee's resolution says those who have already benefited from Federal programs, those who have reaped the benefit of Federal assistance on a massive scale, those whose economies are advancing, are to be the final beneficiaries of Federal concern. The proposal to terminate EDA simply says to the regions whose tax dollars built that prosperity, "We have gotten ours. Now you fend for yourselves."

That is a narrow, shortsighted attitude, contrary to our national experience and, in the long run, counterproductive. It will be a tragic error to end one of the very few programs that is designed to and does, in fact, redress the imbalance that exists in economic growth rates.

Mr. President, EDA has been a successful program. Without the passage of this amendment today we will be discarding the best of a program because it has some shortcomings. That makes neither fiscal sense nor long-term economic sense. It is not fiscally responsible to terminate a program that creates jobs, saves welfare costs, generates State and local tax returns, and raises the level of economic development in areas that cannot sustain such activity through no fault of their own.

The changes in our Nation's economic structure reflect the passage of decades. They are not all due to the National Government. But just as the National Government has historically recognized and responded to its responsibility to aid the South and West, so today we should recognize our responsibility to the distressed regions in the older parts of the country. That, too, is a legitimate responsibility of a truly National Government.

Mr. BYRD. Mr. President, I am concerned that the Senate version of the first concurrent resolution on the budget (S. Con. Res. 27) contains no funding for the programs of the Economic Development Administration. These programs have been instrumental in encouraging industrial development and facilitating infrastructure improvements in the most economically distressed areas of our Nation. During a period when unemployment is at or near an all-time high in many regions, and with no robust economic recovery in sight, it makes no sense to me to assume the elimination of the very programs which are designed to build a sound base for economic growth.

I hope that my colleagues will recognize the value of funding the Economic Development Administration. These programs are investments in the future of the economically depressed areas which they serve. Moreover, the periodic industrial and business misfortunes of any one region adversely affect the prosperity of the rest of the country because of the various counter cyclical payments to that region as well as the lost market opportunities for other regions of the country.

The latest unemployment figures from the Bureau of Labor Statistics show that my own State of West Virginia continues to have the highest unemployment in the United States, 21 percent, The State's importance as one of the Nation's largest coal producers and exporters is indisputable. However, the near-term economic outlook for West Virginia's economy is clouded by the recent drop in OPEC petroleum prices, sharp curtailments in steel production, and the recession in general which have limited the demand for coal.

If we believe that OPEC is unstable and often operates contrary to the interest of the United States—and this has been demonstrated clearly several times—and if we believe that economic recovery can occur, then the importance of coal and the economic well being of coal producing regions is evident—coal is our largest domestic energy resource.

It should also be noted that the boom and bust cycles experienced by major coal producing States is moderated to some degree by the kinds of programs administered by the Economic Development Administration. Considering the lost productivity and inherent inefficiency and human misery of such cycles, I cannot understand the recommendation of the Budget Committee to exclude funding for these programs.

I would like to provide for my colleagues a few examples of how the people of West Virginia have benefited from the Economic Development Administration. Many people on the east coast are familiar with the fine skiing and resort facilities at Snowshoe Mountain in West Virginia. More than 250,000 people spent millions of dollars at this resort last year. Of special importance to the people of Pocahontas and neighboring counties is the fact that Snowshoe provides nearly 1,000 jobs, most of which are year-round employment because this facility is becoming a resort for all seasons. The employee payroll taxes alone approximated $1.5 million last year. This success story was made possible by a lot of hard work and a $2.5 million guaranteed loan which the EDA approved in 1977. This loan guarantee cost the Government nothing and has yielded tremendous benefits to West Virginians and non-West Virginians alike. Other examples of EDA's importance include the 750 jobs at the Sterling Faucett Plant in Morgantown and the 650 jobs at the Anchor Hocking glass plant which were saved by plant purchase and modernization programs made possible by relatively modest EDA loan guarantees.

The programs of the Economic Development Administration are positive, constructive efforts which employ people and lead to a stronger economy. These are not just paper studies—they are real contributions to the economic well being of the Nation.

Mr. President, I am as concerned as any Member in this Chamber with the need to limit unnecessary expenditures. The importance of the Economic Development Administration's programs is clear. And, this importance is heightened by the present economic recession. So, I am pleased to cosponsor this amendment and urge my colleagues to vote for the proposal of the gentleman from Maine to add $36 million in fiscal year 1984 budget outlays to this budget resolution.

Mr. MITCHELL. Mr. President, this controversy is not new to the Senate. This is the third consecutive year in which the President has proposed to eliminate the Economic Development Administration, and this is the third consecutive year in which I have stood before the Senate to urge that it not be terminated.

In the previous 2 years a substantial number of Senators, although short of a majority, have indicated their sup-

port for the EDA, and the House has overwhelmingly rejected the President's recommendation and approved continuation of this important program.

I believe the same result will occur this year. I am hopeful that it will occur this year.

I am, however, under no illusion that there will be any change in the results if the vote were put here in the Senate. Therefore, I believe that the most prudent course of action for those of us who support the continuation of the Economic Development Administration is to concentrate our efforts in the conference in the hopes that the House view will again prevail and this program will continue to serve the needs of the unemployed and the areas of this country with low per capita income.

Therefore, Mr. President, in the confidence and expectation that that will occur and the certain knowledge that the vote this year will be substantially similar to that which occurred in 1981 and 1982, I now withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

Mr. DOMENICI. I understand this quorum call gets charged equally to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I understand the distinguished junior Senator from Tennessee desires to speak to the amendment which has just been withdrawn. I ask unanimous consent that the time that he uses be charged against that amendment as if it had not been withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Tennessee.

Mr. SASSER. Mr. President, I thank the distinguished Senator from New Mexico.

Mr. President, I rise today to commend the able Senator from Maine (Mr. MITCHELL) for his efforts in the area of economic development. I also regret that the Senator has decided to withdraw this important and necessary amendment in the area of community and regional development, although I fully understand why he has done so.

I sincerely hope that both the Economic Development Administration programs and the very fine and necessary programs of the Appalachian Regional Commission will be preserved in this budget. Their termination, which is assumed in the Budget Committee resolution, is, I believe, a great mistake.

In my home State of Tennessee, since 1966 the Economic Development Administration has funded over 535 projects, providing over 60,000 jobs. These are not merely make work or temporary jobs. EDA funds create permanent, private sector jobs, just what the doctor ordered for a sick economy. These funds are used in construction of essential community projects—expansion of water and sewer lines, factory renovation, improvement of schools and other public buildings. This much-needed infrastructure improvement allows communities to attract new industry. For example, in Van Buren County and Byrdstown, Tenn., both communities are applying for industrial renovation funds necessary to entice companies willing to relocate in these areas to actually move in. Mr. President, these are areas that have an extraordinarily high unemployment level. They also have a very low level of per capita income.

The provision of economic development funds to communities like these, and the jobs that come with them, not only improve the state of the economy but they improve the economy in the State in which they are located. For many Americans, particularly those from lower income areas, it means the difference between unemployment and a steady job. For established businesses, it means the ability to take advantage of opportunities which otherwise would have been lost. For marginal businesses, it is often the difference between success and failure.

The provision of economic development funds seems tailormade, it appears to this Senator, for the stated objectives of the Reagan administration.

While the administration assumes that the general economic recovery will provide a sufficient boost to allow all areas of the country to recover from the current recession, the cold hard realities are that certain areas of the country will fail to join in any return to prosperity.

These areas of the country are the first to be affected by economic downswing and they are the last to recover. Why? Because they lack the industrial infrastructure and the capital base to take full advantage of normal industrial growth.

It is, therefore, imperative that we support, I think both the Economic Development Administration programs and the programs of the Appalachian Regional Commission.

The Appalachian Regional Commission and its development programs have been an unqualified success. They date back to the time when John Fitzgerald Kennedy, campaigning for the Presidency in the State of West Virginia, was shocked that such poverty and deprivation would be present here in the United States of America, the poverty and deprivation that he saw in West Virginia and other Appalachian States.

The distinguished senior Senator from West Virginia (Mr. RANDOLPH) has been instrumental in the birth of the Appalachian Regional Commission and has fought for it and its programs for many, many years. Through his efforts and the then new President in the early 1960's, the ARC was born and with it came new hope for the people in the Appalachian region who lived without hope for generation after generation after generation. In many countries and many towns, the cycle of poverty which had been a fact for over a century was finally broken.

To quote one Tennessee newspaper, "the Appalachian Regional Commission was created to bring new lifeblood and hope to an area in which poverty was a way of life." Over the past 20 years, ARC-funded projects have helped to reduce poverty in the 13-State region which embraces Appalachia while at the same time stemming the century-long tide of outmigration of people from the region.

In fact, in the past decade, people have actually begun to move back into the region and Appalachia has ceased exporting its problems to other areas of the country, its human problems, and is now dealing with them at home.

ARC programs have meant an increase of more than 1.9 million jobs in the private sector and the unemployment rate, which was 40 percent above the national average during the 1960's, is now only 10 percent above the national average—still too high, but dramatic progress has been made.

The percentage of Appalachians living below the poverty level has been reduced by one-half and average income is now 84 percent of the national average.

I see the distinguished senior Senator from West Virginia on the floor this morning. I know that he can take great pride and great solace in the works of the ARC and what this program has meant to his State and other States of the Appalachian area, including mine.

Improvements in health and education have been just as dramatic. Before ARC, the area had 50 percent fewer doctors than the rest of the Nation and many counties had no medical service at all. Death from infectious diseases was one-third higher than the national average. Tuberculosis death rates were 40 percent higher, and infant mortality was as much as twice the national average in some areas.

Today, there is primary health care available in all but 57 of the 397 counties of the region and those alarming

statistics have been brought more in line with national averages.

The concept of economic development works and as shown here it works well. Poverty still exists in the world and one does not have to travel too far from home to see it. The concept of economic development has enjoyed bipartisan support in the past and for good reason. Poverty cuts across political lines. May I say to my colleagues here, it is not either your problem or my problem, it is our joint problem.

The creation of the Appalachian Regional Commission was more than an economic statement, it was a statement that we in Congress are committed to ending a state of being—not just a region—that was synonymous with poverty called Appalachia. With its poverty, its sickness, its crumbled roads, and public works, Appalachia simply cannot be ignored as it was for nearly a century before John Kennedy startled upon it during the Presidential campaign of 1960. Tremendous strides have been made but much remains to be done. Just 2 months ago, on March 1, the region's 13 Governors reaffirmed their support for the Appalachian Regional Commission and they urged Congress to "consider the ARC as a vehicle for implementing appropriate aspects of any jobs-creation legislation which may be adopted during this session."

We must not retreat from the bipartisan commitment. Rather, we must strengthen our resolve to the ultimate elimination of the poverty existent in many areas of this country.

Mr. President, I ask unanimous consent to have the following articles printed in the RECORD: One is a copy of the resolution adopted by the Appalachian Governors supporting the Appalachian Regional Commission and a press release accompanying it; the other is an article from the National Journal on the continuing needs of rural areas.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MOTION OF APPALACHIAN GOVERNORS

Introduced by Governor John D. Rockefeller IV, West Virginia.

Seconded by Governor Dick Thornburgh, Pennsylvania.

"We, the Governors of the 13 Appalachian States, hereby re-affirm our strong support for the Appalachian Regional Commission and for our FY 1984 budget request of $215 million for highways and $83 million for area development, and we urge the Congress to consider the ARC as a vehicle for implementing appropriate aspects of any jobs-creation legislation which may be adopted during this session."

Approved unanimously at the Appalachian Regional Commission meeting of March 1, 1983.

Governor George C. Wallace, Alabama (Represented by Mr. Ned N. Butler).

Governor Joe Frank Harris, Georgia (Represented by Mr. Steve Rieck).

Governor John Y. Brown, Jr., Kentucky.

Governor Harry Hughes, Maryland.

Governor William F. Winter, Mississippi.

Governor Mario M. Cuomo, New York (Represented by Ms. Gail S. Shaffer).

Governor James B. Hunt, Jr., North Carolina.

Governor Richard F. Celeste, Ohio (Represented by Ms. Marnie Shaul).

Governor Dick Thornburgh, Pennsylvania.

Governor Richard W. Riley, South Carolina.

Governor Lamar Alexander, Tennessee (Represented by Dr. Michael E. McGuire).

Governor Charles S. Robb, Virginia.

Governor John D. Rockefeller IV, West Virginia.

[From the Appalachian Regional Commission, Press Release, Mar. 1, 1983]

GOVERNORS TESTIFY FOR ARC BEFORE TWO CONGRESSIONAL SUBCOMMITTEES

WASHINGTON, D.C.—Three Appalachian governors testified today before a joint hearing of two U.S. House subcommittees in support of a bill to provide the Appalachian Regional Commission with the opportunity to complete its programs now in progress. Six other Appalachian governors submitted written statements in support of the ARC.

The three governors, ARC States' Cochairman William Winter of Mississippi, Governor John Y. Brown Jr. of Kentucky and Governor Jay Rockefeller of West Virginia, earlier had joined with other Appalachian governors at a Commission meeting in a unanimous, bipartisan reaffirmation of their "strong support" for the ARC.

In a resolution introduced by Governor Rockefeller and seconded by Governor Dick Thornburgh of Pennsylvania, the Appalachian governors called on Congress to fund ARC programs at a level of $298 million in fiscal year 1984 and to use the Commission as a vehicle to help implement any jobs-creation program it passes.

The House hearing was conducted jointly by the Economic Development Subcommittee of the House Public Works and Transportation Committee and the Economic Stabilization Subcommittee of the Banking, Finance and Urban Affairs Committee.

The hearing addressed H.R. 10, legislation to implement an ARC finish-up program and establish a national economic development program for lagging areas, which was introduced by Rep. James Oberstar of Minnesota, chairman of the Economic Development Subcommittee. Chairman Oberstar and Rep. John J. LaFalce of New York, Chairman of the Economic Stabilization Subcommittee, presided jointly.

H.R. 10, which already has more than 100 cosponsors in the House, was passed overwhelmingly in the last session by the House; the Senate passed a more limited version. H.R. 10 would authorize a five-year area development and an eight-year highway finish-up program, which was proposed by the Appalachian governors in response to a Congressional request.

In his testimony, Governor Winter emphasized that the Appalachian states are doing their part in an effort to "raise the level of effectiveness of the Appalachian people." He cited legislation which he had successfully shepherded through the Mississippi legislature to provide the largest increase in history in funds for education in his state.

All three governors called the ARC program an example of federalism at its best. They cited substantial progress but noted that Appalachia still lags behind the rest of the country.

Governor Brown testified that even with ARC help, Appalachia still has been receiving only 84 percent of its per capita share of federal funds. He emphasized the importance of supporting the Appalachian people who mine and market the coal the nation will need. "I look at the program as an investment," he said.

Governor Rockefeller told the subcommittees that he considers ARC the best federal program for the states because it is efficient, responsive and shifts power to the states and to local people.

Comments from Members of Congress of both parties were supportive of the views expressed by the governors. At the conclusion of the two-hour session attended by 23 members of Congress, Oberstar indicated that the bill would be reported out of committee this month.

The six governors submitting written statements were Governor Lamar Alexander of Tennessee, Governor Jim Hunt of North Carolina, Governor George Wallace of Alabama, Governor Harry Hughes of Maryland, Governor Charles Robb of Virginia and Governor Dick Thornburgh.

In his statement Governor Alexander, a former ARC states' cochairman, called the Commission process "the best example we have that the President's federalism ideas can work effectively (and it) results in the best possible funding decisions for everyone concerned."

Governor Hunt, also a former states' cochairman, called the progress in education in the Region made possible by ARC initiatives "nothing short of phenomenal" and declared that "the Commission's program in education will help provide a basic tool for economic progress—a skilled work force."

Governor Hughes, a former secretary of the Maryland Department of Transportation, addressed his statement to ARC's Appalachian Development Highway System and called the governors' proposal to complete the most critical gaps in the System, including US 48 from Handcock, Maryland, to Morgantown, West Virginia, "the minimum necessary." He credited the System, now slightly more than half complete, with having brought new industries and jobs to the Region and having helped diversify the Appalachian economy.

Governor Wallace, one of the original members of the ARC, called "the Commission's help in the coming years . . . essential to make needed adjustments in my state's economy."

Governor Robb said that "the programs of the ARC (had helped to) enhance the accessibility and the attractiveness of our Region." He concluded that "H.R. 10 will help . . . enhance our ability to create new jobs while retaining existing jobs."

[From the National Journal, Sept. 9, 1982]

MORE GROWTH AND LESS FEDERAL AID MEAN NEW PROBLEMS FOR RURAL AREAS

(By Cameron La Follette)

The Nixon and Ford Administrations didn't have one. The Carter Administration didn't either. Now the Reagan Administration doesn't have one, although it is working on it.

In fact, not since the Depression has the federal government had a coherent rural development policy. The years since then have seen instead the haphazard growth of programs designed to help non-metropolitan

areas, which for a century lost people and jobs to the cities and suburbs.

But rural America is not losing people and jobs anymore. The 1980 census revealed that during the 1970s, population growth in non-metropolitan areas exceeded growth in metropolitan areas for the first time since 1860. That means different sorts of problems for rural areas: the need for more housing, roads and sewers to accommodate the newcomers.

Instead of redirecting rural development programs, the government so far has done little more than cut existing programs by more than comparable urban programs. Precise numbers are hard to come by, although Willard Phillips Jr., director of the Agriculture Department's rural development policy office, estimates that the Administration has budgeted $17 billion for rural development in 1983.

As Joyce J. Walker, deputy associate director of the Office of Management and Budget, said in a letter last year to the township officials of Illinois, "We realize that the impact of the Administration's proposed 1982 budget reductions falls more heavily on rural and small communities than on larger urban areas."

Since then, the Agriculture Department's Farmers Home Administration (FmHA), the chief federal rural development agency, has suffered substantial cuts. So has the Economic Development Administration (EDA), although the small-cities block grants of the Housing and Urban Development Department (HUD) are holding their own.

Rural advocates, traditionally out-gunned by their urban counterparts, banded together in 1980 into the Rural Governments Coalition. In Congress, they work with the 155-member Rural Caucus, whose chairman is Rep. Wes Watkins, D-Okla.

So far, they have been unable to stop the government from cutting rural development programs and move it toward formulating a strategy to deal with rural growth. "If there is a policy," Watkins said, "it's the best kept secret in this Administration."

A DECADE OF GROWTH

The pressure on the physical facilities of rural America is clear from the 1980 census. Between 1970 and 1980, non-metropolitan areas grew by 15.8 per cent, a great increase from the 4.4 per cent growth of the 1960s. The picture is just the opposite for metropolitan areas, whose growth rate fell from 17 per cent in the 1960s to 10 per cent in the 1970s.

In the past decade, the areas that are most rural had the highest rate of change, from a 3 per cent decline in the 1960s to 14 per cent growth. Rural areas of the West increased the fastest of all, by 32 per cent.

"Some of the change in rural population is not only people moving in, but also fewer people moving out," said Calvin Beale, the Agriculture Department's rural population expert. "When there are more local jobs, more people stay. My suspicion is that as much as one-third of the change is from reduced out-migration."

Employment indeed increased faster in rural areas. From 1969-79, rural nonfarm employment increased by 28 per cent, outstripping the metro increase of 21 per cent. Employment in the most rural counties had the highest growth rate, 31 per cent.

Rural employment growth has not been on the farm. White-collar and service jobs in rural areas grew by about 25 per cent each from 1973-79, according to figures from the Agriculture Department's Economic Research Service, compared with 18 per cent over-all growth in rural employment.

More than a fourth of the rural work force is still in manufacturing, construction and mining, and white-collar work, including government jobs, takes another 45 per cent. Rural areas have nearly twice as great an incidence of self-employed persons as metropolitan areas: 12.8 per cent (only a third of them farmers) against 6.9 per cent.

Most new jobs in rural areas are in larger firms rather than small businesses. Mature firms, no longer dependent on specialized urban services, move routine operations to rural areas, where labor costs are cheaper. "You find that at least in manufacturing, the medium-size branch plants provide the jobs. Textiles and electronics are good examples," said Fred K. Hines, director of Agriculture's regional analysis program.

"The good news is that there has been a major growth and diversification in the rural economy," Beale said. "It's more like the national economy now."

The bad news is that diversity has not insulated rural economies from the national recession. Agriculture has always been vulnerable, and manufacturing, still a large category of non-farm rural employment, is suffering this year.

Beale noted that the construction and automobile industries, both hard hit, are particularly important to many rural communities. The recession has also caused a decline in rural self-employed persons.

"More non-metro people are now wage and salary workers who are more vulnerable to layoffs," said Robert Coltrane, director of the Agriculture Department's rural labor market section. "The self-employed at least have some control over their jobs."

Consequently, since 1978, rural unemployment has risen faster than metropolitan unemployment. During the recession that peaked in 1975, rural and metropolitan unemployment were about equal. But in 1981, according to the Bureau of Labor Statistics, rural unemployment (including discouraged workers and half of persons involuntarily working only part time) averaged 11.5 percent, compared with 10.3 percent for urban areas.

The median family income in rural areas, $13,286 in 1980 as measured in 1977 dollars, was still $3,324 less than in metro areas. The Census Bureau reported that rural areas had 33 percent of the population in 1981 but 40 percent of the poor. The rural poverty rate in 1981 was 17 percent, substantially more than the 12.6 percent rate in metropolitan areas last year.

Despite the efforts of the FmHA, poor housing remains more common in rural areas than urban. In 1979, according to the Census Bureau, 8.4 percent of the rural population lived in substandard housing—without complete plumbing or with more than one-and-a-half persons per room—compared with 6.2 percent in metropolitan areas.

Determining the physical facilities that rural America needs is almost impossible. "There is all kinds of anecdotal information on infrastructure, but we don't have any systematic information," said J. Norman Reid, director of the Agriculture Department's state and local government program. "The story we always get from program managers is that there are a lot of unmet needs out there, but we don't have the whole picture."

Extrapolating from Environmental Protection Agency (EPA) data, Reid said that in 1980, the backlog of sewage treatment plants nationwide was $53.9 billion, including $20.8 billion in rural areas.

An unreleased EPA report on rural drinking water conditions estimates that in 1978-79, 29 percent of rural households' water contained bacterial contamination. The report also concludes that more than 70 percent of rural water systems contains heavy metal contamination, including 24 percent with mercury and 16 percent with lead. "The heavy metal figures are not consistent with other data, which show low levels of heavy metals," said Marian Mlay, deputy director of EPA's drinking water policy office. Many rural water systems are too small for federal regulation.

Growing rural areas suffer from their residents' great expectations. "People come because it's rural, but they are bringing urban ideas of services with them," said Beale. New people want more services, which require more money, but tax bases do not increase until the new people and industries are in place. The typically dispersed population of rural areas makes it more expensive to build such facilities as roads and sewers.

In particular, new employers need these kinds of facilities, which rural communities often cannot afford. They also need start-up capital, which rural banks often cannot provide.

FEDERAL ACTION

The federal government has long considered writing a rural economic development policy. Frustrated by lack of action, Congress in the 1980 Rural Policy Development Act required a rural policy—which must be submitted to Congress by January—to coordinate the numerous government programs for rural areas, improve rural residents' well-being and employment opportunities, strengthen family farms and protect the environment.

The act also established the job of Agriculture undersecretary for small community and rural development, now held by Frank W. Naylor Jr.

"I've had good support from the Secretary [John R. Block]," Naylor said. "I think we've gotten [the Administration's] attention. I think the timing is right, and the reception will be good, if it develops on the basis the President has pushed throughout government—of decisions bubbling up from below."

Phillips of the rural policy development office emphasized his strong commitment to fashioning a rural policy based on rural perspectives. "New Federalism as a concept—increasing local decisions—is a good idea," he said. "I think rural people want to do it themselves. It's important we help them in preparing for their new responsibilities. I have to become an advocate for rural America—as soon as I know what rural people want."

But rural interest groups are dismayed by budget cuts and the Administration's rhetoric of self-reliance in situations that they say the federal government should be helping.

"We complained bitterly about the fiscal 1982 budget cuts in rural programs because they unfairly impacted rural areas," said Bart Russell, executive director of the National Association of Towns and Townships. "We want Congress to stay, at a minimum, with the 1982 spending levels for 1983. It doesn't matter if you have a well-developed policy if there's no funding."

"The budget problem is one universally troublesome for all departments, I think," Naylor conceded.

Budget cuts in rural programs have been uneven. The FmHA, which runs most of the

rural development programs and has the most extensive rural delivery network, has been deeply cut.

Its water and waste loan and grant program dropped from $750 million in 1981 to $300 million in the Administration's 1983 request, a 60 per cent cut. Community facilities loans were cut in half from $260 million to $130 million. Business and industry loans totaled $652 million in 1981; the Administration wants to eliminate them in 1983.

The FmHA is best known for its housing programs, including rental, rehabilitation and single-family home loans, grant programs for low-income housing, rental assistance and self-help housing. These programs, which received $3.9 billion in 1981, were allocated only $1.3 billion in President Reagan's 1983 budget request, a cut of two-thirds.

"The government is not shutting down," Phillips maintained. "The Administration's proposed fiscal 1983 budget contained $17 billion for rural people, spread throughout government. We've got to find the way to get the most of that $17 billion: find out if there are burdensome regulations, if there are delivery problems. We have to face reality: there is no more federal money."

FmHA administrator Charles W. Shuman defends the budget cuts in his agency's housing and business programs as a means of focusing resources on farming, which he argues is the basic rural industry. The farm operating loan program increased from $823 million in 1981 to $1.3 billion in 1982, with a $1.4 billion request in Reagan's budget for fiscal 1983.

"The most limited resource in government is people resources," Shuman said. "The most important part of economic development in rural areas is farming—it's the basic industry the others are all built on. That's where I want to put my people resources, that's our basic mission."

The EDA provides grants for infrastructure development, loans for sudden and severe economic decline and a revolving loan fund for small businesses. EDA's budget, about half of which finds its way to rural communities, was cut by 40 percent, from $436 million in 1981 to $260 million in 1982, and Reagan has proposed eliminating the agency in 1983.

But HUD's small-cities block grants received just over $1 billion in 1982, the same as in 1981, and no cuts are proposed for 1983. The popular program, for community development in cities under 50,000 and counties under 200,000, won even more support when Congress in 1981 allowed the states to run it instead of HUD. Thirty-seven states elected to administer the program themselves last year, and the rest will probably do so this year.

When Congress acts on its 1983 appropriations bills, it is not likely to accept all the Administration's proposed cuts in rural programs. The House, for example, has voted to authorize $500 million a year for three years under a National Development Investment Act, which would essentially reconstitute EDA. The House attached its provisions to a Senate-passed bill reauthorizing the Appalachian Regional Commission (S 2144) that must now go to a House-Senate conference committee.

Some rural advocates are proposing programs, but critics charge that they would not always match the problems of non-metropolitan areas. Watkins has introduced a rural enterprise zone bill (HR 4576) to provide incentives to small businesses to locate in rural communities. But the Agriculture Department notes that it is middle-size manufacturing plants and, increasingly, white-collar and service industries that are the biggest job creators in rural areas.

"Rural depressed areas don't have the Fortune 500," Watkins said in defense of his approach. "We're raped for energy in rural America, but the companies' headquarters are in the cities. We impound the water, but it goes to the cities. Our young people go to the cities. It seems like a much simpler solution to build the jobs in rural America."

But in the current budget climate, Congress does not seem ready to increase the money available to non-metropolitan communities. Federal policy is unlikely to recognize very soon that rural America now has all the problems that accompany growth.

Mr. SASSER. Finally, I commend the strong efforts and the persistence of the Senator from Maine. He has been in the forefront of the battle to preserve these important programs.

Certainly, this morning I commend the efforts over the years of the senior Senator from West Virginia for, without him, there would have no Appalachian Regional Commission, and I suspect without his efforts over the years the ARC would not have continued to endure.

Mr. DOMENICI. Mr. President, will the distinguished Senator yield for a unanimous-consent request?

Mr. SASSER. I yield.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the distinguished senior Senator from West Virginia, who desires to speak on this amendment, be permitted to speak next and the time to be charged against the Mitchell amendment as if it were not withdrawn.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, the constructive career of the Senator from Tennessee (Mr. SASSER) is one recognized by Members of this body regardless of the aisle which separates the Democrats from the Republicans. Senator SASSER has, with realism, discussed the measures incorporated in legislation which became law in 1965. The Appalachian Regional Commission was the product, from the standpoint of the enactment of a specific measure for the 13-State area. The State of West Virginia as a whole with additional parts of 12 other States, combining this important part of America which needed, as we saw it in 1965 and earlier as President Kennedy saw it, an area of great promise but an area in which programs for progress—programs that were people programs—could be brought into being.

I am personally grateful, looking back to those earlier days, for the privilege of being in the Senate at the time my capable colleague, Senator SASSER, has addressed his thinking.

I regret that earlier today it was necessary for me to be in the Committee on Labor and Human Resources, and that I was not at my desk to listen to the cogent comments of that member of our Committee on Environment and Public Works, Senator MITCHELL, who has been so active in recent months to hopefully carry forward funding for the Economic Development Administration.

I do want the record to indicate that in connection with EDA, Mr. President, that I wish to not speak in a negative sense against our present Chief Executive. But I do recall that in his first speech in which he addressed himself to economic programs he made, in essence, the statement that "We will abolish the Economic Development Administration."

I believe the statement was made without complete or full facts which the President of the United States should have had in reference to that program, which has been the law of the land since 1965.

At that time, and it is proper to say, I asked the new Secretary of Commerce (Mr. Baldrige) if he would give me the opportunity to talk with him about the remarks that had been made by our Chief Executive.

Secretary Baldrige and I had a good talk. He would not be upset if I included in the record here that he indicated to me very frankly no knowledge actually of what the EDA program had done for communities, for the strengthening of plants that were temporarily closed, or for those programs fitted together which allow not only the EDA loan to be applied, but also be called into the circle of the effort to reopen a plant or to keep it in operation. In the State of West Virginia, perhaps 15 instances can be cited where funding took place that we never had before; where private interests, translated into actual contributions of men and women, came into the effort. It was then a package, not just Federal assistance but a package whereby many, many programs, projects, and industries in West Virginia are today alive and people are employed in our State, even though we have the highest unemployment rate in the United States—approximately 21 percent—at the present time. There are many counties in West Virginia that have 30 and 35 percent unemployment. But we do have the EDA, which has been very, very helpful in West Virginia, as it has been helpful across the Nation.

I had joined with my colleague from Maine (Mr. MITCHELL) in preparing to offer an amendment, which has been withdrawn, so that there would be sufficient room within the budget for the programs of the Economic Development Administration. This amendment, frankly, would have increased outlays by less than $250 million per fiscal year had we had the opportuni-

ty—which may occur at some later date or be handled in conference—to do so in the program which I have said happened to be given the attention, and rightly so, of the Senate in 1965.

It is important for us to realize today that not only in West Virginia, where I have given specific situations as to the value of this program, but in the rural sections throughout the country, basic facilities for economic development have gone forward. So, as we have talked here, Senator MITCHELL and Senator SASSER, about these problems, I am taking this time because we have it through the courtesy of the able chairman of the Budget Committee, my friend.

I do want to add—I could put it in the RECORD, but I want to state it on the floor: Over the last 27 years, nearly $150 million has been invested in projects in West Virginia. If I said that much money had been spent in West Virginia, that would not be a truism. For every dollar that has been spent, there has been a dividend—not only 100 cents brought back, but a dividend in improved living for people and for the strengthening of the communities in our State.

Mr. President, it is not bricks and mortar and asphalt but, rather, an investment in a State and a Nation from the standpoint of the citizenry of our country. So I shall think, certainly, of the methods by which we can work with the instructive Senator from New Mexico and others on the Budget Committee about the importance of the business loan program of EDA.

It became a lender of last resort, frankly—and I mean last resort—of those small businesses which would have failed in West Virginia and across this Nation. Again, I refer, not unkindly, to what Secretary Baldrige said to me: "Senator, very frankly, I do not know what the EDA program has done." Yet, at the very outset of an administration which I do not speak of as of a party different than my own, I think there was something said and something done which should not have taken place because, apparently, there was not the recognition of what had been placed on the books in 1965, had been renewed under Democratic and Republican Presidents, and was of tremendous value to the well-being of the people as a whole in the United States.

Now, coming more directly to the Appalachian regional program, I do hope, and I have reason to hope in capital letters rather than in small letters, that my friend from New Mexico and others will look very, very carefully into the need, which is a continuing need, to allow not ARC to fade away, but ARC in a phasing sense, whatever that might be, with lesser amounts because of what has been done to continue the progress that has been made. I hope that we do have the opportunity to have within the Senate conferees that realization as they meet with the House conferees, where there is a strong feeling for support of ARC.

So, Mr. President, I do not plead in the sense of futility.

I plead in the sense of an equity for ARC as we look at it, both bodies, to be given certain funding because of projects that need to be completed, because of programs that need to be funded, perhaps not always at the figure that I would like but that a reasonable figure can be established for ARC in these future weeks and months.

Mr. President, I wish to say this about the ARC program. We do have the support of each and every Governor in the 13-State region. That does not mean just Democratic Governors. It means, for instance, the Governor of Tennessee, who is a Republican. I hope our beloved majority leader, Mr. BAKER, not in the Senate Chamber at the moment, would not feel that I am speaking in a sense hopefully as to his future action, but I will say that factually he has helped us within the Committee on Environment and Public Works. We are glad that he continues, even though majority leader, as a member of that committee. He on occasion has given us his support by voting with us to see that ARC does remain a viable assistance program in the years ahead.

I do want to say, with the majority leader absent—I only wish that he could be present as I speak these words, but I know he shall read them with understanding—it was 50 years ago, Mr. President, that we created in this Congress, of which I was a Member, the Tennessee Valley Authority. That was a program of earlier years, just as the ARC was a program of later years, to give necessary attention to economically underdeveloped parts of this country.

I say to the majority leader, who is now in the Chamber, that when I actively supported the Tennessee Valley Authority in 1933, I did it not because I thought it was a program for 1 year or for 2 years or for 3 years. I believed there would be a well-reasoned continuance of that program, including the moment as I speak. I believe in the continuance of the Tennessee Valley Authority. I believe in it very, very strongly. And I shall have the privilege in a few days of joining our majority leader and others of those States, particularly Tennessee and Alabama, where the impact of the Tennessee Valley Authority has been on the plus, never on the negative side.

I recall so very, very well that I had a march on me, I say to the majority leader, when the Tennessee Valley Authority was before us because the miners of the State I represented, in part from the Second District where there were mines, felt that the hydroelectric power development would rob them of their jobs. The mining of coal would be lessened and lessened through the use of hydroelectric power generated there in that great region of the Tennessee Valley States.

I did not get upset with them for coming; they were my constituents, and I recognized that they had certain fears. But I recall saying to them, "I believe that that which will come in the future years will disabuse you of your opposition at the present time." I will use it in perhaps a nutshell rather than to elaborate to say to all my colleagues, particularly the able majority leader, their fears would in later years be unfounded because as I speak today the largest single purchaser of coal in the United States is the Tennessee Valley Authority.

So we must be very careful when we close our minds and our hearts to certain amounts of money which can continue to be used not only in the Tennessee Valley Authority but in the 13 Appalachian regional States where their compacted problems have been very pressing.

I know that someone could well say, "Well, JENNINGS is on the floor today and he's crying out for ARC to be continued."

I am not doing that. I am speaking of the equity of the program, of the desirability, frankly, of the right thinking and acting which would continue such a program. Have I stopped at the border of a Kansas when there was programs needed for the agricultural interests of that State where the corn grows taller through some program?

There is not a State across this Republic, when I felt there was a need, or States that were brought together in some type of effort of which the Senator is now speaking, that I would remain silent about because there might be a feeling that if you went out and helped a certain program specifically in some area of the country you were not helping your own State.

What we do in this country, a constantly shrinking Republic from the standpoint of time and distance, causes Americans today to recognize that we have not only the opportunity but the responsibility to help when we can, when it is reasonable to do so, when it is dollarwise right to do so, to continue a program and not cast it aside. And so with TVA, it lives, and I helped to bring it into being. It is there. And then in 1965 we created the Appalachian Regional Commission, and it has been here in the intervening years under Republican administrations as well as Democratic administrations. I am being repetitious, I understand. It is perhaps a failing when I speak about ARC, but I just hope that in whatever way we can within the

conference system or through the recognition of individuals in this body, not because I plead but because we think the matter through, there will be a sufficiency of funds so that ARC will not fade away but will be with us to continue to bless humankind.

Mr. BAKER. Mr. President, will the Senator yield 1 minute to me?

Mr. RANDOLPH. I yield.

Mr. BAKER. Mr. President, I was in the cloakroom when the Senator from West Virginia began his remarks, and I came to the floor as soon as I could disengage from another conversation in which I was trying to move along the schedule of the Senate.

I was reminded, however, in listening to his remarks on the speaker in the cloakroom, that the Senator from West Virginia, I believe, is the last Member of Congress who was present at the time of the creation of the Tennessee Valley Authority. We certainly owe him a debt of gratitude for that, particularly those of us who are the beneficiaries of that great Authority. TVA was conceived in the early days of the New Deal and was brought to fruition just prior to the most urgent demands that were placed on it by World War II.

The Senator from West Virginia was instrumental not only in the creation of TVA and its nurture in subsequent years but also in developing the concept of regionalism based on the economic development and the unification of diverse programs for the benefit of distressed and deprived regions of the country which, for many reasons, were never caught up in the mainstream of economic and social development of our country.

So, Mr. President, I should like to acknowledge, on behalf of this Senator—and, I am sure, for every other Senator—the debt of gratitude we owe Senator RANDOLPH for his contribution of insight and to thank him once again for the role he has played and the support he brings at this time.

Mr. RANDOLPH. Mr. President, I am grateful, as always, for the consideration of the majority leader.

Perhaps it is not wrong to say that we both have announced that we are not candidates for reelection to the Senate in 1984.

Someone said to me at the time, "JENNINGS, why are you announcing so early that you are not going to be a candidate for reelection?"

I said, "Well, I don't think I'm doing it too early, because I waited until after my friend HOWARD BAKER had said that he would not be a candidate for reelection."

Mr. BAKER. I thank the Senator for that remark.

Someone asked me the other day, "Are you sorry you have announced that you're not going to run for reelection?"

I said, "No. Not only am I not sorry, but I'm now actively engaged in negotiations to try to gain time off for good behavior." [Laughter.]

AMENDMENT NO. 1243

The PRESIDING OFFICER. The question recurs on the Domenici amendment.

Mr. DOMENICI. Mr. President, while the Mitchell amendment has been withdrawn and the distinguished senior Senator from West Virginia spoke——

Mr. CHILES. Mr. President, I was going to ask for the yeas and nays.

Mr. DOMENICI. They have been ordered.

Mr. CHILES. If we were ready to vote——

Mr. DOMENICI. We are not ready to vote.

I yield myself 1 minute.

Mr. President, I just wanted to say to my good friend Senator RANDOLPH that I was on the floor during most of his discussion. I do not think I have to say this to him and to the Senate, but I hold him in the highest esteem, and I think he knows that.

EDA is the subject of the Mitchell amendment, and ARC has not yet been the subject of amendment on the floor.

I hope the magnificent relationship that exists between the senior Senator from West Virginia and the Senator from New Mexico will remain after that vote.

If we cannot agree on EDA and ARC, I hope the Senator understands that we have a genuine difference of opinion and nothing else. A genuine difference in terms of what we ought to be doing in the next few years with economic development type moneys and nothing else. I think he understands that.

I thank him for his eloquent comments this morning and for the references he made to the Senator from New Mexico.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield.

Mr. RANDOLPH. Mr. President, there is no other Member of the Senate—and I want to weigh my words not in pleasantry but in truth—with whom I have a closer personal understanding than with the able Senator from New Mexico. I understand what he says, and I agree with his words.

I am grateful for his friendship, also, and for the fact that he still keeps an open mind on the matters I have discussed.

Mr. DOMENICI. Mr. President, I understand that the Senator from Montana (Mr. MELCHER) would like to offer a sense-of-the-Senate amendment regarding the IMF and other matters.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. DOMENICI. I am pleased to yield to the distinguished minority leader.

Mr. BYRD. I was interested and somewhat nonplussed when the Senator said he was not ready to vote on the substitute amendment.

Mr. DOMENICI. The Senator was what?

Mr. BYRD. Interested and nonplussed and puzzled. [Laughter.]

Will the Senator explain to me why he is not ready to vote on his substitute, which he offered? When was it offered?

Mr. DOMENICI. Two days ago.

Mr. BYRD. Two days ago. We are ready to vote on the substitute.

Mr. DOMENICI. It would take the Senator from New Mexico more time than we have on the resolution to explain why the Senator from New Mexico is not ready to vote on the amendment in the nature of a substitute. Suffice it to say that, in due course, I assume the will of the Senate will be worked on that amendment. But, to the extent possible, it will not be worked for awhile.

Mr. BYRD. It will not be worked today?

Mr. DOMENICI. I do not know about that. I am not prepared to go beyond saying that it is not going to be worked for a while.

Mr. BYRD. I would join the Senator in adding time on the overall resolution, because there is a provision for that, we both know, by motion. So we could add time.

Mr. DOMENICI. Does the Senator think we need more time?

Mr. BYRD. I took from what the Senator said that he could take all day today to explain his reasons.

Mr. DOMENICI. I would not want to do that. We have so many important things to consider on the floor that my detailed and rambling explanation of why I am not ready to call it up now would not be appropriate.

Mr. BYRD. It does not have to be called up. It is before the Senate.

Mr. DOMENICI. Why we are not going to vote on it, as the Senator asked me.

Mr. BYRD. So it would take quite a while?

Mr. DOMENICI. It would take a long time.

Mr. BYRD. I would be glad to listen to the Senator.

Mr. DOMENICI. I know that the Senator has a marvelous ear and a tremendous propensity for being considerate, and I greatly appreciate it, but I do not think any good purpose would be served in taking that much time. In due course, we will get to that matter. I am sure the Senator is aware that that will happen sooner or later, but not now.

Mr. BYRD. The Senator, with all his kind words, disarms me at this point,

so I will retire from the field with a broken sword at the moment; but I will be back and ready to listen to the Senator when he explains his amendment.

Mr. DOMENICI. If the Senator is retiring with a broken sword, with those comments, I am indebted to him for that generosity. [Laughter.]

Mr. BYRD. I may not be so generous later. [Laughter.]

Mr. DOMENICI. I am fully aware of that, and I am prepared to do battle.

Mr. BYRD. Mr. President, do I have the floor?

The PRESIDING OFFICER. The Senator from New Mexico has the floor.

Mr. DOMENICI. I yielded. I would be pleased to relinquish the floor, however, if the Senator desires the floor.

Mr. BYRD. I do not know whether I desire it or not. I was considering possibly moving to table the amendment in the nature of a substitute, but I hesitate to do that at the moment, because it would cut off the debate of the Senator.

Mr. DOMENICI. I clearly understand that the Senator could do that. I know him very well from the few years I have been here, when he was majority leader and now minority leader, and I think he understands the situation. It would not only surprise me but also would shock me if the good Senator were to do that at this point.

But I understand it is available not only to you but we do have to yield back time on it before you can do that. I do not think we have.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. DOMENICI. I yield.

Mr. BYRD. The Senator refers to me in the second person. He is not supposed to do that.

Mr. DOMENICI. I regret again that I have not learned well, and I apologize to the distinguished Senator.

Mr. BYRD. The Senator is an expert on the budget but he is quite right. I do not think I really would want to make a motion at this time to table.

Mr. DOMENICI. I thank the Senator. But we have not yielded back the time on it.

Mr. BYRD. No. That is right, we have not yielded back the time. We can yield if the Senator would, but he wants to retain that.

Mr. DOMENICI. Indeed.

Mr. BYRD. I thank the Senator.

Mr. DOMENICI. I thank my good friend.

Mr. BYRD. Let us have a little persiflage and badinage from time to time to keep our spirits high.

Mr. DOMENICI. It sure is healthy. I greatly appreciate it.

I understand that the distinguished Senator from Montana, Senator MELCHER, wishes to offer a sense-of-the-Senate resolution.

Mr. President, I ask unanimous consent that the Domenici amendment be temporarily set aside so that the distinguished Senator from Montana can offer a sense-of-the-Senate amendment which I think Senator CHILES has seen and we have seen.

The PRESIDING OFFICER. Without objection, it is so ordered.

amendment no. 1256

(Purpose: Reduce the budget deficits for fiscal years 1983, 1984, 1985, and 1986 by reducing budget authority and outlays for Function 150, International Affairs)

Mr. MELCHER. Mr. President, this is a lot more than a sense-of-the-Senate resolution. It is true that the first portion of the amendment is a sense of the Senate so we can fully describe what we are talking about rather than just having the barebones numbers which is the usual form of an amendment to the budget, without any explanation of what the numbers reductions or increases mean.

So, the first part is a sense of the Senate talking about what we are talking about so we can understand the amendment, and the second part deals with the actual budget cut.

The PRESIDING OFFICER. On whose time is the Senator speaking?

Mr. MELCHER. I am speaking on my own time on behalf of the amendment.

The PRESIDING OFFICER. Does the Senator wish to report the amendment?

Mr. MELCHER. The amendment is at the desk. I ask that it be read and that I be recognized thereafter.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Montana (Mr. MELCHER) for himself, Mr. DECONCINI, Mr. RANDOLPH, Mr. BURDICK, and Mr. HUMPHREY, proposes amendment numbered 1256.

Mr. MELCHER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the resolution, add the following new section:

"SEC. . Whereas, even with the changes that the Senate Budget Committee has made in the President's budget, the federal budget will contain deficits totaling $647.5 billion over the life of this resolution and the public debt will likely grow to almost $2 trillion in 1986; and,

Whereas, such deficits could increase interest rates, unemployment, halt economic recovery and lead to further recession; and,

Whereas, foreign aid spending for fiscal year 1984 is 108 percent higher than it was in 1979 while, for the same period, veterans' benefits and health care spending will have increased only 29 percent; natural resources and environment spending will have gone up 3 percent; health, 55 percent; and transportation 48 percent; and education, training, employment and social services actually dropped 9 percent; and community and regional development dropped 14 percent, proving that foreign aid has not been subject to the same budget restraints as domestic spending; and,

Whereas, U.S. international food aid, distributed under P.L. 480, is heavily concentrated in concessionary food sales to foreign governments under Titles I and III, which comprise 75 percent of the current program, while food donations through Churches, charitable groups, and other organizations, which is a more effective way to feed the hungry, comprise only 25 percent of our food aid; and

Whereas, new contributions to the International Monetary Fund would be used to provide funds to developing countries to cover interest payments on loans made by international banks at high interest rates, and to provide funds to developing countries for the purpose of subsidizing exports which unfairly compete with U.S. products on the world market, costing tens of thousands of American jobs, are excessive;

Therefore, it is the sense of the Senate that the totals in this Resolution for Function 150, International Affairs, should not exceed $19.8 billion in budget authority and $11.5 billion in budget outlays for Fiscal Year 1983, and should not exceed $12.5 billion in budget authority and $10 billion in budget outlays for Fiscal Years 1984, 1985 and 1986. Further, it is the sense of the Senate that, notwithstanding any of the budgetary limits placed on Function 150, the United States shall continue to meet the financial commitments made to Israel and Egypt in conjunction with the Camp David Accords."

Mr. MELCHER. Mr. President, with the $200 billion deficit facing us in this coming fiscal year, it is time for some tough blunt talk and time for a little more firmness in U.S. actions on what we are spending abroad and time that some attention be given to the problems we have here at home and how this spending abroad affects us here at home.

Despite the fact that over the past several years, we have had cuts in domestic programs—indeed almost every domestic program has been cut, some of these programs have been cut 2 or 3 years in succession—despite that fact, we have the $200 billion deficit looming before us for fiscal year 1984. There have been some exceptions, of course. We have had an exception in debt service that has been forced upon us because we have huge Federal deficits. We have to pay more and more in debt service on the national debt.

Of course, we have increased defense. The budget resolution here before us calls for a 5-percent real growth in defense expenditures in fiscal 1984. That is perceived by many to be near the bottom line on what we need for national defense. Indeed, the President has asked for 10 percent and reduced that after some time for consideration to a request of about 7½ percent in real growth for fiscal year 1984 in defense expenditures.

Yesterday, we saw in this Chamber a tie vote, 48 to 48, on whether or not there should be a 6½-percent increase

in terms of real growth for national defense.

So I think that emphasizes the strong feeling here in the Senate and perhaps the country on the need for our national defense.

But I think we should translate what our needs here are in the United States for our own national defense, and if it is so important to increase our own national defense expenditures in fiscal year 1984, I believe that those who feel strongly on that should be listening and should be heeding this amendment because there comes a point of whether we have enough money for our domestic needs including our own national defense expenditures.

But then there is a third area in the budget that we have not reduced by votes in either the House of Representatives and the Senate in the past several years, and that is in our foreign aid expenditures. This spending has increased for the past several years and it is increased in this proposed budget resolution, and increased rather radically.

It really boggles the mind to wonder how we can justify this increase when we are going to have to borrow the money that is going to be part of the deficit, and borrow it for spending that we could curtail if we wanted to. We are borrowing the money to send it abroad. That does boggle the mind of the average citizen, and the average taxpayer, and I confess that I share that bewilderment about how we can continually increase foreign aid, especially as it is increased in this budget resolution. With all deference to those who work on the budget and have brought this resolution before us, it puzzles me how these huge increases can be sensibly asked for.

There is a part of the foreign aid package that increases very dramatically. It is the contribution from the United States to the International Monetary Fund. I wish to state that it should be our policy, it should be Congress policy, it should be written in granite here in the Senate, we should not bailout banks with bad foreign loans. We should not get money out of the Federal trough to bailout banks who have made bad loans to foreign governments or to foreign companies in foreign countries.

We should not, of course, take taxpayers' dollars for that purpose. That is what the budget resolution sets us on course to do.

By the way, $8.5 billion is proposed in this budget resolution to increase the U.S. contribution to the International Monetary Fund.

We should not, by all that is holy—there ought to be something holy reserved in our principles—we should not borrow money to turn over to the International Monetary Fund at this time so that banks with bad loans can have their interest, mind you, on bad foreign loans, paid to them.

It is rather odd that we are going to borrow money on behalf of the U.S. taxpayers in this generation and the generations to come on which we are going to continually pay interest, to up our contributions to the International Monetary Fund so they, in turn, can provide it to countries that will then pay their interest due on these loans, many of them U.S. banks and, of course, other banks. That is a circle. We borrow the money on behalf of the U.S. taxpayers so the Congress can turn it over to the International Monetary Fund, those are their dollars, to turn over to foreign countries so they can shovel it through their governments to pay the interest on some bad debts owed to banks. That is a circle all right, and it is a very vicious circle.

I think it should also be pointed out that we should not, by all that is holy, send U.S. taxpayers' money to the International Monetary Fund to lend money to foreign countries to subsidize their industries which export products to us, and those are subsidized products, which take away part of our domestic market here. They send their exports over to us with those borrowed dollars from the International Monetary Fund which produce those subsidized goods, at less than cost, send them to us and the end result is that this takes away jobs here in the United States and makes our economy worse.

I hope, Mr. President, that I can address three very important viewpoints, and I hope that those who share these viewpoints of concern will heed this amendment. First of all, there are conservatives who are very much opposed to Federal deficits, and I hope those who hold that very high in their values will take heed of this amendment.

Second, I think those who have a grave concern and continually advocate foreign aid programs, who are the peaceful types, who attempt to have foreign aid to do good for our neighbors abroad, will take heed of this amendment and pay special attention to what this amendment accomplishes.

Economic Support Fund assistance in the foreign aid program really takes up the bulk of the foreign aid expenditures each year. Economic Support Fund assistance, however, is clearly identified by acts of Congress, and by the very colloquy which has been going on for over a generation on this Senate floor and on the House floor, with helping the military capability of those countries that receive it. It is used as a means of exporting weapons or as a means of foreign countries buying weapons or paying their troops or whatever is necessary in order to bolster their military capability. So it should not be treated, this vast increase of foreign aid expenditures over the past several years, as somehow a do-good venture to help the economic plight of people in their own countries. It is primarily to help those countries to have a stronger military.

The third group I hope will heed this amendment is a group that is vitally concerned about Israel. I want to point out at the outset that this amendment, very definitely addresses that and the amendment clearly states that the Camp David Accords will not be touched by adopting the amendment.

I share all these concerns. I share all three of them, those who feel our deficits are much too large and must be cut, and those who feel that foreign aid should be of a humanitarian nature and should really zero in on helping people, I share that concern, and I point out there is plenty of room in this amendment to allow those humanitarian concerns to be met, and I will point out there is plenty of room in this amendment to permit the military assistance for our allies to be met also. I will be able to document that.

Now, as to the question of Israel and the Camp David Accords, I believe we should meet those obligations, and that is why I and my cosponsors of the amendment, very deliberately insert lauguage in the amendment to make it clear that the understanding is there—that any cuts that would be made to the detriment of the Camp David Accords.

While I have concerns for all three of these areas, I want everyone to understand the amendment is really drafted to prevent any foolish waste or foolish ventures abroad, and to prevent payoffs of any foolish foreign loans, because the amendment clearly states it is the sense of the amendment to limit these things and to reduce the budget deficit for 1983, 1984, 1985, and 1986 by making cuts which total $18.2 billion in budget authority and $8.3 billion in outlays during the same fiscal years—4 fiscal years.

The actual spending reductions in my amendment are as follows: $5.1 billion decrease in budget authority for 1983, $5.7 billion decrease in budget authority for 1984, $4 billion in fiscal 1985, and $3.4 billion in budget authority in fiscal 1986, which nets out in budget reduction $2.7 billion in 1984; $2.8 billion in fiscal 1985; and $2.8 billion in fiscal 1986 in budget outlays.

Further, my amendment makes it clear that it is the sense of the Senate that any limitation on foreign aid spending not affect commitments to Egypt or Israel under the Camp David Accords.

While there is need to recognize we have to reduce foreign aid expenditures, because the amendment would roll back foreign aid spending levels to $10 billion, and that is the level of

spending in 1982, between 1982 and this year the proposal before us is that foreign aid would have been increased by 27 percent or $2.7 billion. Where these increases occurred, according to the President's foreign aid requests, in 1984 as compared to 1982, the increased spending of $2.7 billion is broken down as follows: first military aid related makes up 53 percent of the increase. That includes the economic support funds, which make up 19 percent of that; foreign military sales making up 15 percent of that; military assistance programs making up 9 percent; foreign military sales trust funds making up 6 percent. That is where that 53 percent of the increase came. It totals up to an increase of more than half of the $2.7 billion increase between 1982 and 1984.

The Export-Import Bank, however, during that time makes up only 8 percent of the increase. That is quite a difference. The Export-Import Bank is vital to some of our exports of goods abroad, commodities and merchandise exported from this country. The Bank only got 8 percent of that $2.7 billion increase.

There are administrative costs which reflect 11 percent of the $2.7 billion, and multinational banks the same, 11 percent.

Humanitarian funding got a 10-percent increase. I might point out, in actual dollars, humanitarian funding for Public Law 480 is getting a smaller portion—some 6 percent less—of the total dollars spent in foreign aid.

I particularly call that to the attention of those people who share my belief that one of the best things we can do in foreign aid is through Public Law 480. If they need food, help them, send it to them, give it to them. That is what Public Law 480 does. But that is not where this $2.7 billion increase between 1982 and 1984 has occurred.

(Mr. HUMPHREY assumed the chair.)

Mr. MELCHER. We can readily observe that in foreign aid spending the increase has not been spread proportionately for food and humanitarian needs. I believe that, overall, funding for the entire package is grossly excessive, and even with any cut in the budget there will remain a large amount of money to meet the program needs.

Now, there is still a question of whether or not the purpose of the Economic Support Fund is understood. So I want to briefly outline what its purpose is.

The Economic Support Fund (ESF) comprises the largest category under international security assistance, and the largest single category within the foreign aid budget itself.

The program originated in 1951 as a program of economic aid in support of military assistance. Under the Mutual Security Act, we provided defense support to U.S. allies with the aim of promoting military strength. During the 1950's, the Asian nations—South Korea, Republic of China, Indochina, and Pakistan—were the largest recipients.

With passage of the Foreign Assistance Act of 1961, the program was then labeled "supporting assistance." The major recipients of this aid were South Vietnam, South Korea, and Laos.

After the Vietnam war, the focus of the program shifted to the Middle East. Israel and Egypt became, and still are, the largest recipients, with Israel receiving $806 million in economic support funds during fiscal 1982, and Egypt receiving $771 million. Other major recipients during that same year included Turkey, $301 million; Pakistan, $100 million; and the Sudan, $100 million. Close to 75 percent of the total Economic Support Fund went to assist countries in financing their defense purposes. Economic Support Fund moneys in fiscal year 1982 also were utilized to insure our continued use of overseas military bases and facilities with aid to countries such as Portugal, $20 million; Spain, $17 million; the Philippines, $50 million; Oman, $15 million; Kenya, $20 million; and Somalia, $25 million. A total of $125 million was allocated to various countries in southern Africa.

The Economic Support Fund, despite its name, is primarily for bolstering foreign country military capability. Administration officials have testified in the past that ESF helps nations with their large military-related expenditures.

It, therefore, is pertinent that the increases in foreign aid expenditures have primarily resulted in growth of expenditures for support of military armaments in foreign countries.

Now, there is also a concern in Congress about whether or not touching foreign aid has anything to do with weakening our defense posture around the country. They wonder about Turkey or bases in Portugal or Spain, and they wonder about Pakistan, and so on.

Well, let me say right at the outset that while that argument will probably be offered, or is a grave concern to a lot of people in their own mind, the facts are that, according to the latest information we have available, our NATO allies fall short in their commitments to defense spending. Why don't they help pick up more of these military aid costs? But I wish to assure the Senate that, in spite of that, there will be plenty of room left in the $10 billion, if the amendment is adopted, available for budgetary purposes and also for appropriation purposes for this coming fiscal year and to meet all of those obligations.

There are really two basic parts to my amendment. First, it freezes foreign aid outlays for fiscal years 1984, 1985, and 1986 to $10 billion, to the level of that function in 1982.

Second, my amendment cuts $5.1 billion of the $8.5 billion that the committee has added to the 1983 budget authority to make room for an increase in our contribution to the International Monetary Fund. Thus, the amendment limits that increase for the International Monetary Fund contribution from the United States to $3.4 billion. That will permit a 20-percent increase but not any more.

In other words, the budget resolution before us recommends that it be increased from $16.5 billion—that is where it is right now—by another $8.5 billion, a 50-percent increase. My amendment would limit that increase to $3.4 billion, which is a 20-percent increase of the U.S. contributions, which are now $16.5 billion, to the International Monetary Fund. And that is enough. To go any higher I think is reprehensible.

The budget resolutions, of course, are always in the form of a series of dollar amounts covering various functions of the Federal Government or the agencies or the departments. It is often very confusing for the public to understand just what an amendment to the budget resolution means if it is adopted or what it would accomplish if it were adopted, because it just mentions figures.

Adoption of an amendment to the budget is meant to give direction to the authorizing and appropriations committees. The subsequent action by the Senate and the House determines what the Federal funding will actually be for each of the various purposes covered within the broad categories of the budget function, but the first step of that process is always action on the budget resolution.

As required by law, this is the way the budget resolutions are. If the Senate is to place constrictions on the amounts of money to be authorized and to be appropriated for various Federal programs through the adoption of the budget resolution, it better serves the purpose of this legislative vehicle to clearly identify the intent of the Senate when we vote on amendments to the budget resolution. For most or all the functions that are listed for budgetary purposes, there are a multitude of results that could occur in adopting an amendment. Consequently, the real purpose of a budget resolution amendment is often vague and open to question as to its real intent.

For that reason, Mr. President, I have included in my amendment today a sense-of-the-Senate resolution to give a clear purpose to what the amendment intends in function 150. While the sense-of-the-Senate resolution is not binding on the House, and

while it can be altered by subsequent actions in the authorization and appropration measures here in the Senate, it, nevertheless, is true that if we include a sense-of-the-Senate provision along with the reductions in funding for function 150, it will serve as better guidance to the authorizing committees as to what our real intent is at this particular time regarding this amendment.

The amendment, if adopted, will do just that. It will indicate, we think, that foreign aid and contributions to the International Monetary Fund are too high in the budget resolution and need to be reduced.

This explanation, of course, is not necessary for this amendment to be germane to the resolution. However, the explanation is germane to the process we have before us in the budget resolution. I think it is reasonable to ask the Senate to vote on something that is clearly described by the amendment.

Mr. President, I ask that the amendment in those sections be modified, that where the word "whereas" is used that we use "since."

The PRESIDING OFFICER. The amendment is so modified.

The amendment, as modified, is as follows:

At the appropriate place in the Resolution, add the following new section:

"SEC. . Since even with the changes that the Senate Budget Committee has made in the President's budget, the federal budget will contain deficits totaling $647.5 billion over the life of this Resolution and the public debt will likely grow to almost $2 trillion in 1986; and,

Since such deficits could increase interest rates, unemployment, halt economic recovery and lead to further recession; and,

Since foreign aid spending for fiscal year 1984 is 108 percent higher than it was in 1979 while, for the same period, veterans' benefits and health care spending will have increased only 29 percent; natural resources and environment spending will have gone up 3 percent; health, 55 percent; and transportation 48 percent; and education, training, employment and social services actually dropped 9 percent; and community and regional development dropped 14 percent, proving that foreign aid has not been subject to the same budget restraints as domestic spending; and,

Since U.S. international food aid, distributed under P.L. 480, is heavily concentrated in concessionary food sales to foreign governments under Titles I and III, which comprise 75 percent of the current program, while food donations through Churches, charitable groups, and other organizations, which is a more effective way to feed the hungry, comprise only 25 percent of our food aid; and

Since new contributions to the International Monetary Fund would be used to provide funds to developing countries to cover interest payments on loans made by international banks at high interest rates, and to provide funds to developing countries for the purpose of subsidizing exports which unfairly compete with U.S. products on the world market, costing tens of thousands of American jobs, are excessive;

Therefore, it is the sense of the Senate that the totals in this Resolution for Function 150, International Affairs, should not exceed $19.8 billion in budget authority and $11.5 billion in budget outlays for Fiscal Year 1983, and should not exceed $12.5 billion in budget authority and $10 billion in budget outlays for Fiscal Years 1984, 1985 and 1986. Further, it is the sense of the Senate that, notwithstanding any of the budgetary limits placed on Function 150, the United States shall continue to meet the financial commitments made to Israel and Egypt in conjunction with the Camp David Accords.

Mr. MELCHER. The first reduction is a cut in function 150 which deals with the various aspects of the foreign aid package and allows the authorizing committee to make the determination as to where those cuts will be. It simply imposes a cap in spending. The authorized spending level will be no higher than $10 billion in those areas covered under function 150.

The second part deals with the reduction in International Monetary Fund contributions. That is a reduction of $5.1 billion. Instead of a $8.5 billion contribution, it will be a $3.4 billion contribution.

The Budget Committee has gone much too high when they recommend that we provide $8.5 billion in obligations for the United States for the International Monetary Fund. That is a 50-percent increase in our contribution. My amendment simply says you can increase it up to $3.4 billion or a 20-percent increase over what our obligations are right now to the International Monetary Fund.

We should not make a budget commitment to provide any greater authority until we have fully and carefully examined just what it means and decided whether or not a majority in the Senate wants to make this commitment to the International Monetary Fund. There are (2) IMF funds. There is the general quota fund which as of today has built up a quota of funds for lending of $61 billion. Approximately $13.5 billion of that comes from the United States. When current commitments are filled, $26 billion will be left in available loans. That ought to be enough.

The second International Monetary Fund is the General Agreements to Borrow. The Third World debt is now established at about $500 billion. Although much of this debt is owed to private banks—for example $77 billion is owed to the 9 largest U.S. banks—the International Fund is affected since more than 25 of these countries are threatening to default on their loans unless the International Monetary Fund steps in and increases its lending to help them out.

I think this was dramatized yesterday on the business page of the Washington Post where two articles described the dire straits of some of these bad loans, or potentially bad loans, in foreign countries. It really dramatized the feeling of many monetary experts around the world that these are indeed bad loans. The principal will not be paid back. Loaning more money to pay the interest and the fees that are due will not assure anything except a greater debt.

Mr. President, I ask unanimous consent to insert into the RECORD at this point a list showing the major borrowers from the International Monetary Fund.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

THE BIG BORROWERS AT THE IMF

[Loan and balance in millions of dollars]

Country	Total loan [1]	Undrawn balance	Date of agreement	Expiration date
India	5,500.00	3,520.00	November 1981	November 1984.
Mexico	3,950.00	3,410.00	December 1982	December 1985.
Yugoslavia	1,828.20	809.40	January 1981	December 1983.
Turkey	1,375.00	319.00	June 1980	June 1983.
Romania	1,212.75	1,047.75	June 1981	June 1984.
Pakistan	1,010.90	521.40	December 1981	November 1983.
Peru	715.00	649.00	June 1982	June 1985.
Ivory Coast	532.95	211.60	February 1981	February 1984.
Jamaica	525.47	205.81	April 1981	April 1984.
Hungary	522.50	390.50	December 1982	January 1984.
South Africa.	400.40	225.50	November 1982	December 1983.
Morocco	309.38	92.81	April 1982	April 1983.
Thailand	298.65	246.51	November 1982	December 1983.
Sudan	217.80	140.80	February 1982	February 1983.
Kenya	166.65	67.85	January 1982	January 1983.
Uganda	123.75	82.50	August 1982	August 1983.
Costa Rica	101.53	75.90	December 1982	December 1983.
Honduras	84.15	67.32	November 1982	December 1983.
Somalia	66.00	49.50	July 1982	January 1984.
Liberia	60.50	55.00	September 1982	September 1983.
Madagascar	56.10	33.86	July 1982	July 1983.
Togo	52.25	44.28	February 1981	February 1983.
Senegal	51.98	51.98	November 1982	November 1983.
El Salvador	47.30	26.26	July 1982	July 1983.
Haiti	37.95	24.75	August 1982	September 1983
Gabon	37.40	37.40	June 1980	December 1983.
Barbados	35.07	24.55	October 1982	May 1984.
Mali	33.42	13.00	May 1982	May 1983.
Mauritius	33.00	8.25	December 1981	December 1982.
Panama	32.67	32.67	April 1982	April 1983.
Malawi	24.20	13.20	August 1982	August 1983.
Gambia	18.59	0	February 1982	February 1983.
Dominica	9.40	3.14	February 1981	February 1984.

[1] Interest charged on loans varies according to loan size, market conditions, and source.

Source: International Monetary Fund.

Mr. MELCHER. There are a number of reasons for opposing this rapid growth in the International Monetary Fund. When the United States increases its contribution, it receives dormant assets denominated in special drawing rights from the International Monetary Fund in exchange. Since these special drawing rights cannot be withdrawn by the United States to pay our own bills here at home, we have to finance these lost dollars by borrowing on the credit market. This is equivalent to increasing the budget deficits and there is a net loss to the U.S. Treasury because the interest paid out on the credit market is greater than that received from the International Monetary Fund on the U.S. reserve account.

That may sound a little complicated but, believe me, it is not complicated. It just means that you lose a little more money. If the U.S. quota increases were implemented today, for

example, the Treasury would lose almost 1 percent in interest because the 3-month Treasury notes are selling at about 8.04 percent and the return on U.S. reserves in the International Monetary Fund is 7.2 percent. That means you lose 1 percent. That is not complicated.

In 1982, that net loss amounted to $1.3 billion. That is a figure provided by Treasury Secretary Regan.

Obviously, as the U.S. quota becomes larger the loss becomes greater. There is already speculation that the final figures that will be requested for the U.S. share of the 1983 quota increase will be larger than the $8.5 billion proposed in this budget resolution.

Primarily, that is due to the fact that declining oil prices are pushing large debtor nations such as Mexico and Venezuela further into debt.

I want to say something very direct about lending money by private banks to foreign governments or foreign companies in foreign countries.

When those banks lend that money, they lend it, we would hope, as a good loan. These loans were made to these countries or to foreign businesses at rather high interest rates and often at a higher rate than could be received here in the United States. I remember when the prime was at 21 percent there were many overseas loans made from private banks here in the United States at 22 percent and higher. Obviously, those banks intended to make a better killing on these loans by a better return of interest. It was high-risk money and they knew it, but they took that risk.

We have no business providing taxpayers' funds to help bail them out so that that interest can be paid to them. To repeat, I do not think there is much likelihood that the principal will be paid on many of those loans. It is a question of how often they can pay the interest or the fees to keep from having to list them as uncollected debt.

We really have to ask whether it is the responsibility of the American taxpayers to bail out these bad loans without any reasonable sacrifice by the banks. It is their problem, really. What are they doing? What sacrifices are they making?

We have sent this money to the International Monetary Fund and they are going to get some of that. That will be how the taxpayers will bail them out. But the taxpayers are not the only ones who object to this proposal.

Here are some remarks made recently by George Champion, who was the former chairman of the Chase Manhattan Bank. That, Mr. President, is one of the banks with a large portfolio of some very doubtful foreign loans.

This former chairman of Chase Manhattan said that for the next 5 years banks should dedicate at least 50 percent of their pretax earnings to writing off some of the questionable loans they have made abroad. He further suggested that dividends not be increased and that banks increase their reserves for bad loans.

The banks that have these loans have not all jumped up and clapped their hands. I am told that they are opposed to such proposals as that and prefer not to make any sacrifices for their own financial situation. But it is their situation and they should make the sacrifice.

Another factor which needs to be considered is whether the International Monetary Fund policy of making structural adjustment loans is in our best interest. These are loans designed to allow the borrowers to increase their exports by investing in export-related products, export-related industries, and export-related projects.

In the domestic production of refined copper, just to give one example, we have had a decline of 24 percent between 1979 and 1982 in domestic refined copper. It was 1.2 million short tons in 1982, with copper prices down 25 percent and the mining sector operating at one-half capacity in 1982. At the same time, during that same period, the combined U.S. imports of copper ore and metal from Mexico and Chile increased by 229 percent to 333,369 short tons. This accounted for 46 percent of the total U.S. imports of copper in 1982, or 411 million dollars' worth of imports.

Mr. President, let me point out that every country that we import from in any quantity is at the window of the International Monetary Fund to get a renewal of International Monetary Fund amounts so they can continue to subsidize their copper industry. They do not outcompete us. They do not produce copper and refine it or smelt it cheaper than we do. They just subsidize it. And to a large extent, they are depending on International Monetary Funds to bail them out so they can continue to subsidize them.

Witness Chile, needing another loan right now; witness Mexico needing another loan right now. I remind my colleagues that they have a copper smelter within 2 miles of the U.S. border that is a subsidized copper smelter. To add insult to injury, we import the copper and also, because of the prevailing winds, we import polluted air because they have no air quality control methods on that particular smelter.

During the time that copper imports were cutting into the domestic copper market, the IMF approved a $3.9 billion loan to Mexico and, in January of this year, agreed to the use of funds totaling $882 million in support of the Chilean Government's economic program, with $326 million specifically to cover Chile's shortfall of export earnings due to lower export receipts from copper and other minerals.

These loans have cost thousands of U.S. jobs in the copper industry. Yet this is only one commodity where the IMF has provided loans to foreign countries which have been made in large part with U.S. contributions and have led to the direct loss of U.S. jobs and production.

You know, Mr. President, the argument is often made that foreign lending helps to maintain foreign trade for the export-related jobs in the United States. The reverse is too often true; many U.S. jobs are lost, not gained. If this lending is so beneficial for our trade balances, why have our trade balance payments run a deficit during the years in which foreign lending has been at a peak? That has been the case during the last several years.

I ask unanimous consent to have printed in the RECORD the amounts of our trade deficits during each of the years 1976 through the first quarter of 1983.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

	Billion
1976	−$17.3
1977	−39.2
1978	−42.3
1979	−40.4
1980	−36.4
1981	−39.7
1982	−42.7
1983 [1]	−42.8

[1] Based on first quarter figures.

Mr. MELCHER. I believe the budget figures for increased contributions to the IMF are excessive and should be cut, as called for in my amendments.

Mr. President, our strength which far surpasses all others throughout the world is the capability to do the things we do best—produce food and cotton. We do it easily and efficiently. We can concentrate our generosity and our charity in our foreign aid programs in Public Law 480. We would do a lot better if we did.

I reserve the remainder of my time, Mr. President.

Mr. GORTON. Mr. President, I yield such time to the Senator from Utah as he may need.

Mr. GARN. I thank the Senator from Washington.

Mr. President, I rise in opposition to this amendment. I intend to take no time whatsoever today debating substantive differences of opinion between the Senator from Montana and me on this issue because that day will come when, I am sure, we shall spend hours and hours on this floor. My opposition today is one of procedure and to indicate to this body and all of my colleagues that this issue has been before the Senate Foreign Relations Committee.

A bill has been reported out, sequentially referred to the Banking Commit-

tee, and, after literally months and months of hearings and meetings to consider a very difficult and very complex issue, the Senate Banking Committee has voted it out, with 15 votes in favor of the bill. Three voted present and reserved their rights on the floor. But 15 out of 18 did vote to report it to the floor, with changes in the law in addition to the increase in the International Monetary Fund.

It bothers me, Mr. President, that any Senator comes to the floor on an issue who has not had the benefit of any of the hearings on an extremely complicated and important issue to this country, to our foreign trade, to jobs in this country, and to the future of many of our industries that rely a great deal on export of their goods to the lesser developed countries, that we are to consider this complex an issue in a short period of time on a budget resolution. That is not the proper procedure. Even if I agreed with the Senator from Montana, that is not the issue today.

The issue is, do we ignore the committee system? Do we ignore all of the hours and hours put in by staff and members in both the Foreign Relations and the Banking Committees to report a bill to the floor that will have its day in court and will have an opportunity for every Senator, regardless of his——

Mr. MELCHER. Will the Senator yield?

Mr. GARN. No, Mr. President, I waited patiently for nearly an hour to make a very brief comment. When I am finished, I shall be happy to yield without any attempt to interrupt the Senator from Montana. I do not intend to get engaged in a substantive debate today and do it over again, because we will, within the next month, I am sure of that.

I urge my colleagues, even those who may agree with the Senator from Montana on the substance, that this is not the place and not the time to bring up an issue of this complexity and this importance in a relatively brief period of time and ignore the work of the Senate Foreign Relations Committee and the Banking Committee. Those are the committees I refer to, but it could be any committee. It does not matter whether it is Health and Human Services or any of the other committees that I respect. We do far too much of interjecting issues without the benefit of proper consideration on the floor of this Senate.

In this case it is not a matter of promising hearings or promising a bill as is often done on an amendment. It is an accomplished fact that we do have a bill that has been reported out and will have its day in court or may be many days on the floor of the Senate. So I encourage all Senators for no other reason but on a procedural basis that we consider this in its proper time when all of the information can be before us.

I thank the Senator from Washington.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. GORTON. I yield such time——

Mr. GARN. May I retrieve just one moment?

Mr. GORTON. The Senator may.

Mr. GARN. I promised the Senator from Montana that I would yield to him for a question at the end of the remarks and I do not want to go back on that commitment.

Mr. MELCHER. Does not my good friend from Utah believe that this is the only vehicle we have where we set what the total deficit is? This budget resolution is the first vehicle whereby the Senate sets the deficit. Does he not believe that is the first vehicle we use to set the total deficit and does he not also agree that the deficit is too large?

Mr. GARN. I agree that the deficit is too large. There is no doubt about that. It is far, far too large. This is the first concurrent budget resolution which is not a binding resolution. The Senator from Montana would have adequate opportunity when the authorizing bill comes to this Chamber to offer an amendment to reduce it totally or to any amount he wants to. Please do not get the Senator from Utah started on the reach of the Budget Committee today. The Senator from Washington does not want to hear the Senator from Utah on that issue. He has heard me talk about that in the Banking Committee, going far beyond what I think they should in instructing and authorizing the Appropriations Committee. So that is a debate we will have some other day when we talk about revising the Budget Act. But I am sure the Senator knows he will have more than adequate opportunity when that bill comes to the floor to offer any amendments he wishes to the IMF quota increase.

Mr. MELCHER. Does not the Senator also believe that those of us who believe the deficit is too large should be speaking directly to it at this time and not waiting? It is already too large. We know it is out of control. Should we not start addressing it now?

Mr. GARN. I think the Senate should start addressing overall totals. My complaint with the Budget Committee is that they are getting too specific. I do not think it is the right of the Budget Committee to tell the Banking Committee what they should do in every category. This amendment is an attempt to do that, not to set a total for the authorizations that we can make but to attempt to mandate a specific figure on one specific item in a whole range of things. That is where the Budget Committee goes beyond what I think their jurisdiction should be.

Mr. MELCHER. I thank the Senator.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. I yield such time to the distinguished Senator from Maryland as he may wish.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. MATHIAS. Mr. President, I thank the Senator from Washington for yielding. I associate myself with the point made by the Senator from Utah, that this is a matter that has had extensive consideration by several committees of Congress. I doubt, within the time constraints of this debate, that we ought to foreclose the kind of action which so many wise, able, and experienced people think is absolutely necessary. In the Foreign Relations Committee we have studied the question of the IMF quotas, which is clearly one of the targets of this amendment. We have had the advice of former Secretaries of the Treasury of both parties. We have had the advice of the current Secretary of State and the current Secretary of the Treasury. We have had the advice of the leaders of financial institutions and leaders of labor unions.

I think that I can say without any question that all are agreed that we need to go forward with the increased IMF quota contributions. This is not just some academic question, nor is it an accounting proposition in which bankers are interested. This is something in which jobs are involved, jobs for American workers—not jobs around the world, jobs for American workers. This is a question of the American economy as well as the economy of the world. If this amendment should prevail, it would put into jeopardy a carefully worked out formula which may keep the international financial system afloat during a very difficult period of recession. We hope that the economy is recovering in the United States. There are signs that it is. But in other parts of the world the recovery has not yet become visible. We cannot only judge by what we see on the streets around us as to what is necessary for the world financial community. If either one of the major government contributors to the IMF should fail in its commitment or if the private banking institutions, which hold 65 percent of the debt of the other developed countries of the world, should fail to maintain that line of credit and to increase it at the rate of 7 or 8 percent a year, if there should be a failure on either part, government or private institutions, then it is the opinion of the experts that we would not go through this very diffi-

cult period in the world's history without default by some important government, the loss of credit by that government and an incalculable impact upon the rest of the world's financial institutions. That is not a risk I want to see taken. I cannot believe that it is a risk that the Senate wants to take.

Mr. President, I urge that we would resoundingly defeat the pending amendment.

Mr. MELCHER. Will my friend from Maryland yield for a question?

Mr. MATHIAS. Yes; I yield for a question.

Mr. MELCHER. Is my friend aware of the comments of a former Treasury official, William Simon, on cutting off what he calls the international slush funds. The Senator mentioned the present Secretary of the Treasury. I wonder if he is aware of former Secretary Simon's remarks?

Mr. MATHIAS. He was invited to appear before the Foreign Relations Committee. I called him up and talked to him. I issued the invitation personally. He was unable to appear. But we do have the testimony of Joe Fowler, Mike Blumenthal, and Bill Miller. We have ample testimony by those who have held the Office of Secretary of the Treasury and other important positions of Government as well as in the private financial world. The opinion is unanimous on the record.

Now, if Mr. Simon had other views, I would regret that he was unable to appear before us and give us the benefit of them. But he was invited.

Mr. MELCHER. Will the Senator yield for a second question?

Mr. MATHIAS. Yes. Just one more.

Mr. MELCHER. In speaking of the jobs, is the Senator saying that if these International Monetary Funds are allowed, thereby allowing more drawing accounts to pay the interest and the fees that have accumulated, that in itself will generate some jobs here in the United States?

Mr. MATHIAS. What I am saying is that exports make jobs. Twenty percent of American industrial products must be exported or the people who make those products will be out of work. As the Senator knows, 40 percent of American agricultural products have to be exported. If less are exported, then farmers and those who are involved in agribusiness are out of work.

Now, the only way that countries, particularly developing countries, can purchase goods from us is by being creditworthy, by being able to continue to do business. If the Senator wants to know what would happen, just look at what has already happened to U.S. exports to Mexico. Just look at that record if the Senator wants to get a foretaste of what would result from this amendment. U.S. exports to Mexico have declined drastically——

Mr. MELCHER. They declined in all countries.

Mr. MATHIAS. As the economy of Mexico has experienced greater and greater difficulties.

If the economy of Mexico were to experience difficulties to the point that it was necessary for the Government of Mexico to default on its financial obligations, all credits to Mexico would be suspended at least for a period of time, perhaps for a very long period of time, and the ability of Mexico to purchase anything from the United States—even a toothpick—would evaporate, and that would cost American jobs.

So we are talking about U.S. workers. We are talking about American business. We are not just talking about some eleemosynary gesture to the rest of the world. This is a hardheaded business judgment, made by businessmen, that this is the only thing that prudent people can do to keep the financial system going through a rough, rough passage.

I do not like deficits, and the Senator from Montana does not like deficits, but this is one of the hard things we will have to do. If anybody falls down on it—the Government side or the banking side—then the chances that we get through will be diminished radically. I do not want to see that happen, and that is why I am going to oppose this amendment.

Mr. MELCHER. Mr. President, that hardly seems relevant to the discussion, since the countries getting International Monetary Fund moneys will have to reduce their imports.

With respect to Mexico, they will be required, under International Monetary Fund requirements, to reduce their imports from us. The reduction in the price of oil is the principal reason Mexico has a real problem right now. When oil started dropping, they were in trouble.

I do not know whether we can continue to bail out Mexico on taxpayers' money, on the basis that the oil market is cheaper. I find some inconsistency with these arguments.

Mr. GORTON. Mr. President, I understand that the distinguished Senator from New Hampshire (Mr. HUMPHREY), who is presiding, wishes to speak on this issue and that he wishes to speak on the side of the Senator from Montana.

Will the Senator from Montana or the Senator from Nebraska yield time to the Presiding Officer?

(Mr. GORTON assumed the chair.)

Mr. MELCHER. Mr. President, I yield 10 minutes of the time allotted to me to the Senator from New Hampshire. I think the manager of the bill will yield 5 minutes.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. I thank the Senator from Montana, and I commend him for offering these proposals today.

Mr. President, I support both proposals, but I will address my remarks to the latter—namely, that dealing with the IMF.

The proponents of the IMF increase make their argument on two bases: First, that if we do not extend hard American assets to the IMF, there will be a trade contraction around the world. The Senator from Maryland referred to that, in a way, when he cited the case of Mexico.

What they are suggesting when they propose that we, in Congress, appropriate $8.5 billion in U.S. badly needed capital to a line of credit made available to the IMF is that if we throw money into the wind, some of it will come back to us.

Former Secretary Simon, who was mentioned a moment ago, put it better when he said that the proponents are like a shopkeeper who takes money out of his cash register, goes out in the street, and starts passing it out to anyone who comes by, hoping that some of them will spend that money in his shop.

It does not make sense. It is not in our best interests or in the best interests of other countries, for reasons I will go into.

The second reason upon which they base their support for the IMF increase is that without making these hard American assets available to the IMF, which in turn will be loaned to debtor countries, which will use some of the money to pay the interest and principal owned on loans to U.S. banks, there will be a banking crisis in this country; that there are so many dangerous, risky loans being held by American banks that unless we extend this money so that it can be used by debtor nations to repay interest and principal on these loans, there will be a banking crisis in this country.

Absent any action on the part of the Senate, there will be no banking crisis, for this reason: Banks do not want a crisis. Already, they are prolonging, stretching out, the repayment period for those nations which are having difficulty paying their loans. They are extending grace periods on the repayment of principal, and some of them increasingly are setting up loan loss reserves, a very prudent practice, against those loans which appear doubtful of repayment.

So there will be no trade contraction; there will be no bank crisis.

Furthermore, no action is necessary on the part of Congress, because the problem, as will always be the case in an unconstrained world economy—of course, there is no such thing; but in any case, as will always be the case when things are left to their own resolution, the matter is in fact resolving itself. Loans are being rescheduled and stretched out. Interest rates are down around the world.

The economies of the United States and other Western countries are recovering, and the demands for the goods and services of debtor nations, increases, and their exports will improve.

Debtor nations—this is crucial—such as Mexico and Brazil, in recent weeks, have adopted more realistic exchange rates to make their exports more attractive and to make their imports more expensive.

So the problem is resolving itself—yet another reason why we should not make available to the IMF $8.5 billion.

Another good reason is that the IMF currently sits upon a hoard of 100 million ounces of gold. That gold is not pledged as collateral and is not obligated in any way. It is an asset which the IMF refuses to use. Instead, it comes, hat in hand, to Western nations, begging for more money.

In addition to that 100-million-ounce hoard of gold, which at today's price is worth between $40 billion and $50 billion, the IMF presently has on hand $8 billion in cash.

Mr. President, I want to address the aspect of the social and political implications of what the United States does when it extends hard assets to agencies such as the IMF.

The IMF lends money to Communist nations, to begin with. That is one point we should consider soberly. Do we want to subsidize Communist nations? Do we want to perpetuate Communist nations? Is it in the interests of oppressed people in those countries for us to bail out those governments with hard American assets? The answer is no.

Other economies are Socialist and are in trouble for that reason. Do we want to bail out Socialist economies with capital from a capitalist nation? The answer is obvious.

Many of those countries have state-owned industries—Mexico, for example—which are always inefficient. Do we want to promote state-owned industries with capital from a capitalist nation? The answer is obvious.

These nations are always involved in subsidized inefficiency. They want the fruits of an efficient capitalist society so that they continue to subsidize and maintain state-owned industries, continue to oppress their people, and the United States is asked to participate in this process.

Mr. President, history repeats and mistakes repeat. In 1980, the United States was asked virtually the same request, to increase its quota in the IMF, and at that time a number of Members of the House of Representatives, including JACK KEMP, Chuck Grassley, Dave Stockman, NEWT GINGRICH, and CARLOS MOORHEAD, wrote a letter to their colleagues. I ask unanimous consent to have the letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., July 21, 1980.

DEAR COLLEAGUE: The House will soon consider H.R. 7244, a bill that authorizes the U.S. to contribute $5.5 billion to the International Monetary Fund. This is bad legislation.

This bill's proponents argue that the IMF needs this increase to help prevent economies in the Third World from collapsing under the burden of excessive external debt and thereby becoming vulnerable to communist takeover or subversion. But the IMF does not have a record of success in strengthening unstable economies in the Third World. Indeed, it has been counterproductive.

In a special internal analysis, the IMF has itself admitted that less than one third of its programs have been successful in improving Third World nations' balance of payments positions. But those programs have been very successful in impoverishing less developed countries.

Some argue that the quota increase is needed to protect the international banks from the possible default of Third World loans. Except for an imprudent few, however, it is unlikely that banks will have difficulty weathering any such defaults.

In this time of economic stringency, when federal deficits are placing heavy borrowing requirements on the capital markets of this country, the American public should not be called upon to fork over $5.5 billion to the IMF. We urge you to defeat this bill when it is considered on the Floor of the House.

DAVID STOCKMAN.
CHARLES GRASSLEY.
NEWT GINGRICH.
JACK KEMP.
DON YOUNG.
CARLOS MOORHEAD.

Mr. HUMPHREY. Mr. President, the essence of the letter is as follows, referring to the proposal to increase the IMF quota, that is back in 1980, and it rings in our ears again today, because the same request is being made:

This is bad legislation. Proponents argue that the IMF needs this increase to help prevent economies in the Third World from collapsing under the burden of excessive external debt and thereby becoming vulnerable to communist takeover or subversion. But the IMF does not have a record of success in strengthening unstable economies in the Third World. Indeed, it has been counterproductive.

In a special internal analysis, the IMF has itself admitted that less than one third of its programs have been successful in improving Third World nations' balance of payments positions. But those programs have been very successful in impoverishing less developed countries.

Some argue that the quota increase is needed to protect the international banks from the possible default of Third World loans. Except for an imprudent few, however, it is unlikely that banks will have difficulty weathering any such defaults.

In this time of economic stringency, when federal deficits are placing heavy borrowing requirements on the capital markets of this country, the American public should not be called upon to fork over $5.5 billion to the IMF.

That letter was written in 1980. We could send the same letter today changing nothing except increasing the amount, striking 5.5 and inserting 8.5, and so it goes on. History repeats, mistakes are repeated over and over again.

I commend our colleague from Montana for trying to prevent the repetition of a mistake, for trying to prevent the repetition of the sorry history.

For myself I would prefer to zero out the IMF request entirely. But less is better than more, and on that basis I support the Senator from Montana and reserve to him the remainder of my time.

The PRESIDING OFFICER (Mr. COCHRAN). Who yields time?

Mr. EXON. Mr. President, I yield myself 5 minutes off the bill so that I might engage in a discussion session for answers to questions I have from the Senator from Montana on the amendment that he has offered.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. I wish to ask the Senator from Montana what is the thrust of the amendment that he has offered? As I read it, it seems to me that it is a sense-of-the-Senate resolution and if it would pass, and I, basically, agree with the thrust of what the amendment is saying, but if it would pass I take it that it would not have the full force and effect of law. Indeed, if it passes, the budget document that would eventually leave the Senate to be discussed in conference with the House of Representatives would retain the higher numbers that I understand the Senator is objecting to. Therefore, I am wondering what would be the effect of the sense-of-the-Senate amendment as it is.

Mr. MELCHER. I thank the Senator for asking that very pertinent question.

It is my intention that the full budget figures be changed in the budget resolution to conform with this proposal if the amendment is adopted and the totals of the deficit will reflect that, and I will modify my amendment to make that very clear.

Mr. EXON. When the Sentor says he would modify his amendment to make that very clear, does he mean he is going to modify his amendment to indicate that if the amendment passes, the numbers would be so reduced in the budget document that leaves the Senate Chamber if one does?

Mr. MELCHER. That is positively, absolutely correct.

Mr. EXON. With that understanding, I ask the Senator from Montana to add the Senator from Nebraska as a cosponsor.

Mr. MELCHER. Mr. President, I ask unanimous consent that the Senator from Nebraska (Mr. EXON) and the Senator from Montana (Mr. BAUCUS)

be added as cosponsors to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, I reserve the remainder of the 5 minutes I yielded myself and ask unanimous consent that it be applied back to the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. How much time remains on the amendment and in opposition?

The PRESIDING OFFICER. The proponents have 6 minutes and 25 seconds; the opponents have 44 minutes and 9 seconds.

Mr. DOMENICI. Mr. President, I yield myself 3 minutes.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, as much respect as I have for the distinquished Senator from Montana and those who are his principal cosponsors, I think I should be frank about this. This is basically a nice, cheap, nothing vote because the function that is referred to in this amendment is in the budget. It has some dollar numbers in it, budget authority in outlays, targets in accumulative sense for the first year and then literal targets in the outyears.

I really ask in all honesty what purpose does it serve to leave the numbers as they are reported by the committee when we are down here to debate the numbers and then put a sense of the Senate proposal on saying we did not want to vote on those numbers or maybe we have already voted on them and lost so let us let everyone have a chance to vote on the sense of the Senate that we really do not mean what we say.

I mean those numbers that are in those functions we do not want to propose that they be substantially reduced or if we tried the Senate has not gone along, but we offer you another shot at putting something on the record that you oppose these kind of expenditures in a way that will assure you that you can talk to some people about the fact that you do not support the programs of the Federal Government in the IMF and other areas that are referred to but, on the other hand, we do not want to vote to reduce those numbers.

I am not saying that is how the distinguished Senator from Montana feels because I assume he would move to amend the numbers. Members of this body have repeatedly over the last 2 or 3 days, whether it is to take a small amount out of this function or a large amount out of this function, voted not to do it. I am hopeful that they will understand that this is nothing more than an opportunity to go on record being opposed to what they might have already voted for. I do not think there is any other way to look at it.

While it is clearly the prerogative of the distinguished Senator from Montana and those who support him to handle a budget resolution this way, that is to permit the body to vote on a policy reflected in numbers, which is what a budget is about, and then adopt sense-of-the-Senate language inconsistent therewith, I hope that we really would not do that just for the sake of having an opportunity to vote so you can go home or go to a group of constituents and say whatever the budget resolution said about it, whatever my votes might have been on foreign assistance, IMF, and the like, do not misunderstand that; I voted for a sense-of-the-Senate resolution proposed by the distinguished Senator from Montana that said I really did not mean that, I really meant something else. The policy of the Senate as reflected in the budget is not what I was talking about, although that was the issue. I was talking about something else.

In other words, Mr. President, this approach should be handled on the bills as they come out and in particular the IMF reauthorization. That is the policy document. Or it should be handled by amending the budget resolution to delete the money that is provided by way of the accumulative target in 1984 or the rather vague outyear target and not saying we are really going to save money but we are not going to do it by amending the document that sets the money policies.

Having said that, I do not think we need a lot of our 44 minutes, but a few Senators want to speak in opposition and I am pleased to yield as much time to the distinguished senior Senator from Pennsylvania as he desires.

Mr. HEINZ. Not to exceed 5 minutes.

Mr. DOMENICI. Not to exceed 5 minutes.

Mr. HEINZ. Mr. President, I rise in opposition to the amendment and I do so for a number of reasons. I think the amendment is inappropriate and illtimed and I happen to think it is bad policy.

It is inappropriate because the budget resolution, as the Senator from New Mexico has just said, is a document where we should be debating how much money we are actually going to spend and raise by each function in that budget. The idea of having the budget resolution become a mechanism to express the sense of the Senate on 1 or 1,000 issues will bog down the budget process, will make it even more difficult to debate the substance that we should be debating, and the logical consequence of that is that we threaten, particularly when we have an already difficult budget resolution and set of amendments before us, to tie the budget process up in knots.

Mr. President, we do not need to tie the budget process up in knots. Fiscal reality is tough enough as it is.

I do not know what we would do if, Lord forbid, this amendment should pass. Why do I say that? Because we have had votes on whether or not we are going to reduce this particular function, the foreign affairs function, and along comes a sense-of-the-Senate resolution to withstanding the fact there are a bunch of votes the last few days that said no to reducing it, the sense of the Senate is we are going to.

Mr. President, I just do not think that adds to the clarity either of the debate or to the clarity of purpose of this body. So I say that a sense-of-the-Senate resolution, especially today, but to a budget resolution as this is, is inappropriate, and I think I would have the courage of my convictions to say that about any sense-of-the-Senate resolution that flew, particularly one that flew, in the face of a series of countervailing votes.

I also suggest that this resolution is untimely. In just a few weeks our President will go to Williamsburg, Va., to meet with the heads of state of the other economic powers, the other countries that constitute the Western community of nations.

We know that that is going go be a very difficult meeting for the community of Western nations. There is a very long agenda, it is a very difficult agenda. According to the most recent report from the New York Times yesterday our goals at that economic summit, as enunciated in an apparently leaked memorandum by Mr. Allen Wallis, Under Secretary of State for Economic Affairs, is, first, agreement that world economic recovery depends on each country establishing the domestic conditions for sustainable noninflationary growth and job creation; second goal, positive steps to fight protectionism, avoid predatory trade practices, resolve outstanding trade problems, and pursue greater trade liberalization; third goal, agreement to a set of principles to guide our collective approach to problems of international debt and finance; fourth, endorsement of the principles governing our future approach to East-West economic relations.

Mr. President, this resolution, as I understand it, really strikes at the heart of this administration's, indeed this country's policy, entire policy, with respect to that third goal, which is to find a means, an agreed-upon set of principles, to guide our collective approach in order to solve some of

these very troubling international debt and financial issues.

It seems to me that all we do, if we do anything, by adopting an amendment, a resolution such as this, is to make it more difficult for our President to go to that bargaining table, to go to that discussion, and get any results at all on any of those four goals because we have for openers undercut one very important goal, and people will have very good reason to suspect therefore that we may very well turn around and undercut the others.

I said that I thought the resolution was also bad policy. I happen to believe that every Member is entitled to make his judgments on whether this, the intent of this, amendment which is to roughly cut in half or cut by 60 percent the budget authority for the International Monetary Fund authorization is good or bad policy, that authorization, but I will not go into the issue of policy per se here today. My colleagues know where I stand on that. But I do say, that if you want to get to the issue of policy, the time to get to it is when we take up the International Monetary Fund authorization on this floor, and let us have a full debate, let us have amendments, if there be any, let us discuss the issue of the IMF, but let us treat it seriously and maybe then some of the people who are a little worried about the IMF might learn that of all the institutions that I know of, that this Senator knows of, it is the one must dedicated to free market principles. It tries to get rid of protectionist policies and substitute in their stead market adjustment, exchange rate adjustment, for example, so that international trade makes adjustments not through political decisions by individual politicians in individual countries but through market mechanisms, and exchange rate mechanisms, and internally within countries, pulling in the belt, limiting domestic spending, slowing down the growth of government intervention and expenditures, all the things we in this body keep saying "That is what we all ought to do more of. More free market, less spending." How many times have we heard that on this floor?

Maybe there is more than one path, Mr. President, to that goal here in this Chamber, but to that goal, more free market, less spending, I have heard practically every one of our colleagues espouse one time or another during this debate, and that is why I say in my judgment to try to come to the floor today, to try to settle in some rather confusing way how this body feels about the IMF authorization is indeed bad policy.

We are not going to have a careful debate, people will not have read the committee report, people will not have given thought to the issue. We are being forced to confront it prematurely.

For those reasons, Mr. President, I would respectfully ask our colleagues to reject this amendment. I would even more respectfully request that the Senator from Montana not pursue his amendment at this time. He may have decided to do so, and that is perfectly right. But it seems to me that this is the wrong time, it is the wrong place, and as far as I am concerned, of course, it is the wrong issue.

Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I yield myself half a minute. I understand that perhaps the distinguished senior Senator from Illinois would like to speak on our side. I know of no one else who desires to speak. So we ought to be finished shortly if he does desire to speak and be down, and then we will be prepared to yield back our time shortly.

With that, unless Senator MELCHER desires to speak, I would set a quorum in motion and charge it to the opposition.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I yield as much time as the distinguished Senator from Illinois desires.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. PERCY. I thank my distinguished colleague, the chairman of the Budget Committee.

I rise to call attention of the Senate to the fact that this amendment would have widespread implications for the entire free world. The implication that international organizations are set up just for the purpose of helping other countries and Uncle Sam just foots the bill, along with other developed countries of the world, is absolutely wrong.

What we have been talking about is the International Monetary Fund, which is one of those world organizations that has done more to instill discipline in the economies of the developing world and has done more to stabilize the currencies of the world and stabilize economic conditions in the world than any other organization.

When we think of the IMF, we should not think in terms of this agency being just for the use of the Third World. The United States of America and the United Kingdom are two countries which have relied heavily on the IMF. We have seen fit to draw upon the IMF time after time because of the stabilizing influence that it has on our economic well-being.

Therefore, the Melcher amendment, which would drastically cut the foreign affairs function for the years 1983, 1984, 1985, and 1986, is not only I think improper because of that, but also over the 4-year period the amendment would cut a total of $18 billion.

The amendment is objectionable for two reasons: First, partly on procedural grounds, it should be opposed by every Member of the Senate. As Senator JAKE GARN, chairman of the Banking Committee, pointed out, both the Foreign Relations Committee and the Banking Committee have held extensive hearings on the IMF quota increase. It is simply premature to consider this amendment before the Senate has considered the merits of the issue itself, in accordance with orderly procedures, having legislation reported out by two standing committees of the Senate, the Foreign Relations Committee and the Banking Committee.

I also must object to the amendment on substantive grounds. The reductions are clearly targeted on the IMF quota increase. Senator MATHIAS has rightfully emphasized that the IMF quota increase is crucial not only to preserve the soundness of the international financial system, it is also crucial to protect U.S. jobs.

I do not know precisely how other Senators feel, but I imagine they feel the same as I do. When I go back to my own State of Illinois, I hear three issues discussed from one end of the State to the other: jobs, jobs, and jobs. That is the name of the game today. That is what we are aiming for. That is the whole purpose of our economic recovery program. That has been the purpose of every major piece of legislation involving the economy and the budget that we have had for the last 2 years.

An economic recovery is beginning. We have already done a miraculous job in bringing inflation down. We have cut interest rates in half. That has helped stimulate the economy.

But certainly we cannot take any chance now on crippling an international organization which has helped stabilize the world economy and helped stimulate growth in the economies of developed and developing countries alike.

A financial collapse would create vastly more unemployment in the United States. The inability of the IMF to go into country after country, instilling economic discipline into those economies as a result of their ability, that ability of that nation to draw upon the IMF, is a necessary discipline that has kept many countries from collapsing.

When we consider, Mr. President, that 80 percent of the raw materials

used by factories all over the United States comes from abroad, we recognize the necessity of having stable governments all over the world. Whether it is Central America, Latin America, Africa, or Asia, the stability of those economies and the ability of those governments to sustain themselves and stand is necessary to keep our factories moving. What would happen if you have a total collapse in certain parts of the world furnishing raw materials to us that are needed and necessary?

The IMF helps to stabilize these economies and helps to instill discipline and direct them to do certain things as a condition of their loans that they politically could not do on their own.

A year ago when I was in Sudan, I was there at a time Sudan was under the orders of IMF. There was a procedure established by IMF. In order for Sudan to gain the credits that it wanted and to draw on the IMF, they had to instill a program that caused a sugar price increase of 80 percent. Sugar was one of the subsidized crops, subsidized to such an extent that it was extensively and vastly used. An 80-percent increase in price brought it back to what is a more normal price. Politically, the Government could not have done it. They did so to save their economy, through the IMF, but only could they do that if they met the conditions the IMF imposed upon them.

Something on the order of 1 million Americans have lost jobs today because of the deterioration of the U.S. trade account.

One out of two farmers in the State of Illinois is employed in jobs which depend on exporting. One out of four workers employed in manufacturing in the cities of Decatur, Springfield, Peoria, Danville, Rockford—1 out of 10 employees statewide—is employed in a job which depends on exports. But what if those export markets did collapse? We have 1 million people out of work today and we have lost billions of dollars of business abroad because of depressed economic conditions.

The situation would get much worse if the IMF were not able to meet the increased financial stresses in the world economic system.

I would also like to point out that in addition to eliminating the IMF quota increase, we would also have to make substantial further cuts in foreign aid and other foreign affairs programs. I doubt that the sponsors of this amendment have really looked at the implications of major reductions in other foreign affairs programs.

For example, would the sponsors of this amendment wish to stop the current efforts to enhance the security of U.S. embassies around the world? Would they want to cut back radio broadcasts to Communist countries? Would they want to cut into Radio Free Europe and Radio Liberty? Would they want to stop aid to foreign countries which is necessary to insure continued access of U.S. military forces to overseas bases?

We are building a Rapid Deployment Force to protect the Persian Gulf. We have recognized the vulnerability of that area for a long time.

When the Soviet Union moved into Afghanistan, it came within 300 miles of the Strait of Hormuz. A stick of dynamite set off in that strait, a ship going through blown up, would put it out of commission for 2 to 3 years before repair if, under peaceful conditions, repair could be undertaken. That would literally cut off the shipments of oil from the Middle East. It would bring to its knees the economy of Japan. it would decimate the economies of Western Europe. It would severely cripple the economy of the United States.

We are building bases in Oman, in Kenya, and in Somalia. Funds for those bases are in this bill. They would be cut as a result of the pending amendment. I cannot think of an amendment that would do more damage to the American economy and to the U.S. position in the world than this particular amendment.

In short, it would damage seriously our foreign policy interests abroad and would jeopardize our domestic economy recovery. I urge my colleagues to reject the pending amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. PERCY. To be equally divided.

The PRESIDING OFFICER. Is there objection?

Who yields time?

Mr. DOMENICI. We will suggest the absence of a quorum and ask that it be charged to the time of the opposition.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, I think the real issue on this amendment is how much can we afford for foreign aid. I propose in the amendment that the cap be $10 billion for foreign aid and a little over $3 billion for the International Monetary Fund commitments this year. The $10 billion cap would be for fiscal years 1984, 1985, and 1986. Mr. President, that would reduce this budget resolution by more than $8.3 billion, a reduction we very much need for fiscal years 1984, 1985, and 1986.

Mr. President, I have a modification of my amendment at the desk. I ask that the modification be reported.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. The amendment will be modified further.

The amendment, as modified further, is as follows:

At the appropriate place in the resolution, add the following new section:

SEC. . Since even with the changes that the Senate Budget Committee has made in the President's budget, the Federal budget will contain deficits totaling $647.5 billion over the life of this resolution and the public debt will likely grow to almost $2 trillion in 1986; and

Since such deficits could increase interest rates, unemployment, halt economic recovery and lead to further recession; and

Since foreign aid spending for fiscal year 1984 is 108 percent higher than it was in 1979 while, for the same period, veterans' benefits and health care spending will have increased only 29 percent; natural resources and environment spending will have gone up 3 percent; health, 55 percent; and transportation, 48 percent; and education, training, employment and social services actually dropped 9 percent; and community and regional development dropped 14 percent, proving that foreign aid has not been subject to the same budget restraints as domestic spending; and

Since United States international food aid, distributed under Public Law 480, is heavily concentrated in concessionary food sales to foreign governments under titles I and III, which comprise 75 percent of the current program, while food donations through churches, charitable groups, and other organizations, which is a more effective way to feed the hungry, comprise only 25 percent of our food aid; and

Since new contributions to the International Monetary Fund would be used to provide funds to developing countries to cover interest payments on loans made by international banks at high interest rates, and to provide funds to developing countries for the purpose of subsidizing exports which unfairly compete with United States products on the world market, costing tens of thousands of American jobs, are excessive;

Therefore, notwithstanding any other provision of the resolution, for function 150, budget authority for fiscal year 1983 shall be $19.8 billion and budget outlays for fiscal year 1983 shall be $11.5 billion. For fiscal year 1984, fiscal year 1985, and fiscal year 1986, budget authority shall be $12.5 billion and budget outlays shall be $10 billion. Further, it is the sense of the Senate that, notwithstanding any of the budgetary limits placed on function 150, the United States shall continue to meet the financial commitments made to Israel and Egypt in conjunction with the Camp Accords.

Mr. MELCHER. This modification would make it clear that these reductions were part of the Senate budget resolution as passed and would reduce the total amount of the money authorized under the budget resolution.

There are several things involved here. If we are going to have a realistic approach to minimizing our Federal deficits, I think this is the proper place to start that debate. That is ex-

actly why my amendment has been brought to the attention of the Senate at this time. It is a very much needed debate in the Senate, and it is very much needed throughout the country.

If we are going to have U.S. economic recovery continue, and we all hope that it does, we have to show some restraint in spending.

Foreign aid spending has been increased every year for the past several years. In fact, foreign aid spending under function 150 has doubled, more than doubled, since 1979. It is time to retrench on the expenditures we are making from the U.S. Treasury.

We retrenched on domestic programs. It is time now to retrench on foreign spending, too. I call particularly to the attention of the Members of the Senate that the budget resolution has $8.5 billion in budget obligation for the International Monetary Fund. That is too much. This amendment cuts that back by $3 billion, enough to meet any reasonable commitment on our part to the International Monetary Fund. There is inconsistency in the argument that if we have money in the International Monetary Fund, it is going to help us here in the United States, even though we have to borrow the money to obligate it. I do not believe that inconsistency should go unchallenged.

One of the conditions that is going to be required of countries to get these loans from the IMF is to cut back on their imports. They are going to have to retrench in order to get those funds. There is no use kidding the public by saying that somehow we can help ourselves by borrowing money for our contribution to the International Monetary Fund so the Fund can make commitments to foreign governments. That just does not play. It should not play here on the Senate floor. It does not play in the countryside. I think people see through that rather quickly.

I cannot stress strongly enough that if we are going to have a sensible foreign aid program, we had better make it sensible now. There is plenty of money left after we cap foreign aid at $10 billion a year. It is a very mild step. We have cut most domestic programs. We would still be authorizing and appropriating as much as we did in 1982. That should be adequate. It should help us to have some economic recovery here; it should also say to the world that we do have restraint, that we are concerned about maintaining the economic recovery, nurturing it, seeing it grow, and that we are really making an effort to cut down on the Federal deficit where we can.

I do not believe there is any reason to apologize for doing as much as we can for our neighbors abroad. We will still be doing so under this amendment. We just cannot do it excessively, as we have over the past several years.

Our strength that surpasses all others throughout the world is the capability in the United States to produce food and cotton. It is a real strength that is better than bullets or bombs. It is a renewable strength that producers a great abundance.

We do it so easily.

We do it efficiently.

We do it so well our greatest problem with agriculture is the U.S. surplus of commodities which producers painfully realize forces prices low—often below the cost of production.

Currently to offset over production in four basic commodities—wheat, corn, rice, and cotton—we have, through the Department of Agriculture, permitted payment-in-kind (PIK) to be used to pay farmers not to produce these commodities leaving the land idle.

The cost of PIK is off budget to be made up by appropriations to the Commodity Credit Corporation in the Department of Agriculture in 1984 or 1985.

That cost will be nearly $12 billion by the end of the first year (12 months) of the contract obligations between the U.S. Department of Agriculture and farm producers. Since this Department has been wary of the releasing cost estimates, I have asked the Comptroller General to prepare a report to Congress on their estimates of payments to producers for the same period of time along with a break down of acreages and the method of payment whether in actual commodity or in warehouse receipts in lieu of a payment of the commodity in wheat, corn, rice or cotton.

Never has the Department of Agriculture spent so much—on or off budget—to reduce surplus commodities. The PIK program will reduce surplus commodities. But at big cost.

I believe it goes against the grain to subsidize out of the U.S. Treasury not to produce food.

First of all, I believe it goes against the grain for the farmers. They prefer to produce crops at or above the cost of production. That is their business, that is their life, that is their fullment and satisfaction.

Second, I believe it goes against the grain of good Government policy. In a world where hunger and poor nutrition is the lot of more than a billion people and in our country where several million of our people know hunger and under nourishment there are means at our disposal to do better with U.S. agriculture than PIK will provide.

Third, I must point out that PIK as a massive land retirement program has not included with it any semblance of a solid soil conservation plan. Transpiring before our eyes is a present American tragedy of world food production dimension—that is the past 7 years of dwindling soil conservation, for the Nation's land and water base.

We not only can do better, we must do better or our arid agricultural areas will increase with less production, and our top soil will blow or wash away debilitating rich land into poor land.

I propose that we promptly use the tools at hand to stem the tide of poor agricultural policy—food rather than guns, nutrition for health medical attention, veterinarians help and public health research—that we use the laws already enacted to alleviate hunger, strengthen our agricultural markets at home so producers on the land receive a just and fair price in the market for their products rather than the dole of Government PIK payments, develop markets abroad for our commodities, and protect through conservation the consistent breadbasket of the world that is the land and water base so vital and precious within our 50 States.

I propose we use the same theory that is employed in PIK to distribute surplus commodities to the hungry, through the institutions of government including State and local for nutrition needs of our people, the Federal nutrition programs, and the charitable groups; the needs are here. The law is in place. The food is here.

I propose we use Public Law 480 (Food for Peace) in its broadest force rather than a concentration of armaments through our various foreign aid programs but rather, I propose a force of food through all of the international agencies of our Government and with a particular emphasis to broaden the involvement of international organizations of charity and in particular the churches of those hungry and needy countries. We have the food in Federal storage. Rather than reducing commodities through PIK not growing food our interests are better served if we reduce our surplus commodities through programs that satisfy hunger needs, provide nutrition needed for growth and health of people young and old. We accomplish our goals not only to reduce commodity surpluses but achieve understanding and acceptance here and abroad.

I propose that in particular we use Public Law 480 for Central and Latin American countries that need this nutritional help more than they need armaments of war. The stability we encourage can better be resolved in the Caribbean, in Latin America with adequately fed people who must turn their attention to peaceful negotiations rather than war, civil strife, and bloodshed.

The existing law is also in place to use our international agencies, our U.N. efforts, and the activities of our churches, private organizations, and our help as individuals, companies, or professions to augment the betterment of nutrition and food sufficiency,

betterment of health and habitation, the improvement of living standards, and the promise of better life through these means and also, human medicine, veterinary medicine, and public health improvements.

Food is the key. Food for them is the starting point and we have to help them. It opens the opportunity and the time for people who seek to better their life, their government, and their country.

We have the food in Government warehouses costing us storage charge.

Let us use it.

The results gain us friends and future markets for our products.

The results bring us better prices in the markets for our producers.

And this spurs our economy.

The results stabilize the country we help and keeps their people at their homes in their country rather than setting in motion a new tide of refugees seeking heaven here in the United States.

The results will permit the countries we help to progress.

The necessary laws we need to accomplish all of this we now have.

We need only shift our policies to save money and suffering by sending less armaments to foreign countries.

It is unwise—foolish to provide International monetary funds and pay for the armaments for foreign countries with borrowed money—funds the Treasury must borrow—increasing the deficit, increasing the public debt.

We must have better judgment and restraint is necessary in these spending programs abroad.

This amendment provides that needed restraint.

Mr. DOMENICI. Mr. President, we are about ready. I was asked to wait for the distinguished Senator from Florida, the minority manager (Mr. CHILES). I suggest the absence of a quorum and charge it to the minority. We are finished on our side.

I suggest the absence of a quorum and ask unanimous consent that it be charged to the minority on the bill.

The PRESIDING OFFICER. Is there objection? Without objections, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. I understand the distinguished Senator from Montana is going to yield back his time on his amendment as modified. I am going to yield back all my time in opposition.

Mr. MELCHER. I am ready to yield my time, Mr. President.

Mr. DOMENICI. I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. DOMENICI. Mr. President, I move to lay this amendment on the table and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Colorado (Mr. ARMSTRONG) is necessarily absent.

Mr. CRANSTON. I announce that the Senator from Illinois (Mr. DIXON), the Senator from Colorado (Mr. HART), the Senator from Massachusetts (Mr. KENNEDY) and the Senator from Michigan (Mr. RIEGLE) are necessarily absent.

The PRESIDING OFFICER (Mr. MATTINGLY). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 76, nays 19 as follows:

[Rollcall Vote No. 84 Leg.]

YEAS—76

Abdnor	Gorton	Nunn
Andrews	Hatch	Packwood
Baker	Hatfield	Pell
Bentsen	Hawkins	Percy
Biden	Hecht	Pressler
Bingaman	Heinz	Proxmire
Boschwitz	Hollings	Quayle
Bradley	Inouye	Roth
Bumpers	Jackson	Rudman
Byrd	Jepsen	Sarbanes
Chafee	Johnston	Simpson
Chiles	Kassebaum	Specter
Cochran	Kasten	Stafford
Cohen	Lautenberg	Stennis
Cranston	Laxalt	Stevens
D'Amato	Levin	Symms
Danforth	Long	Thurmond
Denton	Lugar	Tower
Dodd	Mathias	Trible
Dole	Matsunaga	Tsongas
Domenici	Mattingly	Wallop
Durenberger	McClure	Warner
Eagleton	Metzenbaum	Weicker
Garn	Mitchell	Wilson
Glenn	Moynihan	
Goldwater	Murkowski	

NAYS—19

Baucus	Grassley	Nickles
Boren	Heflin	Pryor
Burdick	Helms	Randolph
DeConcini	Huddleston	Sasser
East	Humphrey	Zorinsky
Exon	Leahy	
Ford	Melcher	

NOT VOTING—5

Armstrong	Hart	Riegle
Dixon	Kennedy	

So the motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. BENTSEN. Mr. President, I was misrecorded on the Domenici motion to table the Melcher amendment, and I ask that the permanent RECORD be corrected to show that I voted to table.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

(The foregoing tally has been changed to reflect the above order.)

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I understand the distinguished Senator from Missouri and the distinguished Senator from Vermont, Senator LEAHY, desire to offer an amendment. I ask unanimous consent that the pending Domenici amendment be temporarily set aside so that the Senator from Missouri can offer his amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT NO. 1257

(Purpose: To express the sense of the Congress that the United States should establish a more balanced foreign assistance program that places greater emphasis on development aid)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Missouri (Mr. DANFORTH), for himself and Mr. LEAHY proposes an amendment numbered 1257:

At the bottom of page 35, add the following:

SEC. 7. (a) The Congress finds that—

(1) the world economy is suffering from global recession, and development prospects in the Third World have plummeted;

(2) the continuing deterioration of economic conditions aggravates the problems of hunger and poverty, which are daily facts of life for millions of people in developing countries;

(3) these economic conditions threaten the political stability of developing countries;

(4) the economic well-being and security of the United States is closely linked to that of the rest of the world; and

(5) both bilateral development aid provided by the United States and multilateral development aid provided by the United States in cooperation with other nations have proven to be effective tools in promoting economic growth and eliminating hunger, poverty, illness, and ignorance.

(b) It is the sense of the Senate that—

(1) increased emphasis should be given to long-term development concerns in the allocation of United States foreign aid; and

(2) the United States Government should maintain and increase its commitments to multilateral as well as bilateral development aid.

Mr. DANFORTH. Mr. President, may we have order in the Senate, please?

The PRESIDING OFFICER. There will be order in the Senate. Anyone

wishing to talk please go to the cloakroom.

Mr. DANFORTH. Mr. President, today Senator LEAHY and I are offering an amendment to the budget resolution which expresses our concern about the balance in our foreign aid program between security assistance and long-term development aid. As the Senate sets an overall budget level for international affairs and foreign aid programs, we would like to focus attention on this balance and the need for increased development assistance in response to a prolonged global recession that has had a devastating impact on the world's poorest countries.

Our amendment is a sense-of-the-Senate resolution that makes two points about the balance of our foreign aid program. First, it expresses the view that increased emphasis should be given to long-term development concerns in the allocation of our foreign aid. Second, it expresses the view that, within the budget levels we set, the United States must maintain and increase its commitments to multilateral as well as bilaterial development aid.

Mr. President, as we engage in the budget process and continue our efforts to reduce the Federal deficit, we find ourselves in a situation in which there is intense competition between foreign aid and other vital Government programs. Of course, foreign aid is not mere giveaway; it is a vital program that promotes our political, economic, and humanitarian interests. Nonetheless, in this situation we must carefully examine each component of our foreign aid program and seek the most effective forms of assistance.

Moreover, today we must engage in this scrutiny against the backdrop of an international recession and deteriorating global economic conditions that aggravate the hunger and suffering that are daily facts of life for millions of people living in developing countries. While the entire world has been in an economic slump, it is the poorer, developing countries that have been hit the hardest. In these countries, recession and inflation are causing great distress, and economic growth has fallen to its lowest level in decades. Sharp reductions in commodity prices and in the demand for exports, as well as growing trade barriers, have meant serious loss of earnings, enormous deficits, mounting debts, and poor prospects for future development.

This global recession has set back substantially the efforts of these developing nations to meet basic human needs and to achieve economic self-sufficiency. Further decline is likely to increase social and political tensions and undermine the stability of these countries, whose economic and political well-being is linked ultimately to our own. Indeed, further decline will also increase the overall tension between the industrialized and developing nations of the world.

An examination of our foreign aid program shows that it has not responded fully to the gravity of this economic crisis and the urgent need for cooperation between the industrial and developing nations to meet human needs and to promote economic growth and development. Instead, over the past few years we have seen a shift in emphasis in our foreign aid program from development aid to security assistance.

Due to this shift in priorities and increased budgetary constraints, there is a growing imbalance between security assistance, which promotes our strategic interests, and development aid, which addresses the basic human and economic needs of third world countries. Increases in such development aid have been relatively small compared to those for security assistance, which is provided in the form of the military aid and the economic support fund components of our foreign assistance program. As a result, more than half of all U.S. foreign aid is now security assistance, and the proportion is increasing.

Not only in the United States, but all over the world, the level of development aid is dropping. Less and less aid is flowing to the poorest countries that need it the most and face the greatest difficulties. Moreover, as we give greater priority to our strategic interests, we have become slow to maintain and increase our support for those multilateral organizations that directly and effectively address the basic development needs of these poor countries.

Examples are numerous. We have stretched out our contribution to IDA, the International Development Association, a multilateral agency that provides urgently needed concessional loans to the poorest countries, struggling with enormous debt burdens. We have also failed to support adequately the important work of such agencies as UNICEF, which is embarking on a vital new program to reduce infant and child mortality—a program that could cut in half, from 40,000 to 20,000, the number of children who die each day from malnutrition and infection.

Nor have we met our existing commitment to IFAD, the International Fund for Agricultural Development—an agency whose mission is to promote agricultural self-sufficiency in the poorest countries. Congress has authorized a $180 million contribution for the first replenishment of this cooperative international development effort over a 3-year period, ending this year; however, to date we have provided only $24 million.

Of course, security assistance serves vital American interests in strategically placed nations. It provides arms and supplies, as well as economic support to assure the strength and stability of those countries that maintain a special economic, political, or security relationship with us. Such aid is essential: it has strengthened our allies and been instrumental in deterring aggression.

In the long run, however, we believe that this Nation would be better served by greater emphasis on development aid. Such aid is a practical response to our economic interests and the needs of political security, because all nations benefit from a stronger global economy and more secure world. Ultimately, peaceful economic development and the political stability it engenders depend on such development aid, which meets the needs and aspirations of millions of people in developing countries, who still live in conditions of abject poverty.

A foreign aid program with less emphasis on security assistance and with expanded bilateral and multilateral development aid would be more responsive to critical and widespread global needs. It would help developing countries to become more self-reliant in meeting the needs of their people, and it would promote long-term economic growth and political stability. It would also enable us to further humanitarian interests consonant with the very principles upon which this country was founded.

Only if we remain committed to such programs can we ultimately achieve these ends. I call upon my colleagues to join me in such a commitment by supporting this amendment, which is not only a practical response to our needs for economic growth and national security, but is also an affirmation of what is best in ourselves and our country.

Mr. President, I yield to the Senator from Vermont.

Mr. LEAHY. Mr. President, I am pleased to cosponsor with my good friend from Missouri (Mr. DANFORTH) this sense of the Senate resolution which calls for increased emphasis on long-term bilateral and multilateral development assistance within the budgeted amounts for the international affairs function. I believe this resolution expands and supports the report language of the Senate Budget Committee which "assumes a balanced program of financial, economic, and military aid."

The budget resolution, as it now stands, provides the administration with the amount of funds it requested for international affairs, which is $182 billion. While it can be debated if this is an appropriate amount for foreign aid, I wish to call attention to the assumptions which were presented to the Congress about how the foreign assistance portion of these funds will

be spent to aid the nations of the world.

There is a disturbing trend exhibited in the administration's budget request and in the committee's documents toward a greater reliance on military assistance for developing countries and away from help for economic, social, and cultural development. If the administration spends this $18.2 billion as it says it intends to do, it would create a situation in which military security assistance would have increased $8 for every $1 increase in development aid between 1981 and 1984. Funding levels in constant dollars for bilateral development assistance between fiscal year 1982 and 1984 would actually decline slightly, but spending for military aid would increase by 77 percent.

This shift in emphasis within foreign aid comes at a time when developing nations are under great stress. The worldwide recession has created a situation in which there is grave danger that millions of people who live on the edge of starvation will fall off that edge. It does not take something as drastic as a crop failure for masses of people to starve. They can die because they have no land to produce food and no cash to buy food and no access to dwindling food aid supplies. An enormous number of people die each year from these causes, more than the number of people in my own State of Vermont.

I have no quarrel with the idea that foreign aid should further the interests of the United States. My question is whether it is in our interests to arm Third World military establishments, while the masses of people sink deeper into conditions of desperate poverty.

To illustrate my concern about foreign assistance priorities in the budget, one has only to examine the case of a country such as Honduras. The assumptions of the administration would increase military grant assistance next year almost fourfold, while development assistance would remain about the same as previous years. It is clear that the administration wants to increase the Honduras military effort through a jump in military grant assistance from $10.5 million to $40 million in 1 year.

I want to pose the question, does a country such as Honduras have more to fear from a military threat or from its own economic crisis? Honduras is the second poorest nation in the Western Hemisphere. Only Haiti exceeds it in human misery. Almost half the population of Honduras has a per capita annual income of less than $50. This same half of the country has a per capita protein intake that is 40 percent less than scientifically considered adequate. Illiteracy runs at over 50 percent in rural areas.

The source of all this poverty and suffering in the Honduran countryside is not hard to find. The lowest 20 percent of the population received a little over 2 percent of the national income. Fifty-two percent of the farmers share 5.5 percent of the farmland, while 1.7 percent of the farmers control 44 percent of the available soil. In other words, a few have much while many have nothing.

What will a quadrupling of military aid to a country such as Honduras accomplish?

Whatever we may believe about the involvement of outside forces in the countryside of Central America, no insurgency can take root in the absence of poverty and economic injustice. Honduras is certainly a country that we should be looking toward for the nurturing of democratic ideals. My question, again, is whether those democratic ideals are going to be nurtured by quadrupling their military assistance instead of increasing the aid for economic development. Our best insurance against political instability is the development of responsive political systems which can implement strong agrarian reform laws accompanied by economic development programs that are geared to the realities of the world marketplace. On a human level, we must understand that people do not make the decision to take up arms lightly. The motivation comes from a personal reaction to repression and poverty and hunger.

Mr. President, the administration's foreign aid policy is equally ineffective in Africa. This poverty-stricken continent is suffering from overall declines in per capita food production. The rural sector in many countries is in a state of disarray, with small farmers leaving the land and no one replacing them. Eighty percent of Africans below the Sahara have no access to basic health care. Disease adds significantly to problems of low productivity in the agricultural sector. Huge sections of fertile land are unavailable because of insect infestations.

In the face of these staggering problems, the administration is hoping to jump military aid from its present level of $87.4 million to over $200 million in 1984. At the same time, assistance for agriculture, rural development, and nutrition would remain virtually static.

The budget priorities of the administration neglect multilateral as well as bilateral foreign assistance. UNICEF, the United Nation's program for the world's children, would suffer a 36-percent reduction in funding from 1983 levels. Similar drastic reductions for other multilateral assistance agencies would also be in store under the administration's budget.

It is my hope that this sense-of-the-Senate resolution—which I really feel should be accepted by the Senate—would make it clear to the administration that adequate levels of funding for development assistance, both bilateral and multilateral, should be restored, and that excessive commitments to military establishments in developing countries should be curtailed. Only through such a rearrangement of priorities will the United States lead the world toward a more just and stable order.

I understand that what Mr. DANFORTH and I propose today will not be accepted by the Budget Committee, although I suspect the majority of the Members of the Senate agree with us. But what I had hoped our statement might do would be to encourage the administration to look for the kind of bipartisan support they could receive in such a reordering of priorities. It is not only for the good of those developing countries we speak, it is ultimately for our own good because of the stability it would bring from the world order.

So I am proud to join my friend from Missouri.

I yield the floor, Mr. President.

Mrs. KASSEBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I discussed this amendment with the chairman of the Budget Committee prior to offering it. As Senator LEAHY indicated, it is the position of Senator DOMENICI that he would rather not have this amendment on the budget resolution. He does not state a position for or against it, but rather feels that it is not appropriate in the budget resolution to state a position as to precisely how foreign aid should be spent.

I understand that view of the chairman of the Budget Committee. Senator LEAHY and I, in offering this amendment, merely wanted to air our views as to the division of foreign aid between economic development assistance and security assistance and also to inform the Senate that in the months ahead we do intend to pursue this point.

Therefore, Mr. President, I withdraw the amendment.

Mr. LEAHY. Mr. President, I concur with the Senator from Missouri. I would note, however, that it will be my intention to raise a similar concern again on an appropriate piece of legislation, either from the authorizing committees or appropriation committees. I think that what we must face up to at some point—and I think the Senate is the best place to do it—is exactly how our foreign aid is being used and which way it is being skewed,

whether it is going away from developmental aid into military aid, or whether we are achieving an appropriate balance and indeed foreign aid is enhancing the security of the United States and carrying out the humanitarian aims the American people expect it to.

I concur with the decision to withdraw the amendment, but I would hope that my colleagues would note the concerns raised by Senator DANFORTH and myself, and be alert to the fact that it will be raised in another form on another bill.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

RESEARCH NEEDS AND THE BUDGET RESOLUTION

Mr. DANFORTH. Mr. President, I have previously stated my views of this budget debate. I described the need for deficit reduction and the need for compromise. I continue to believe that such compromise should embody four parts:

First, restraint on the nonmeans tested entitlement programs, the fastest growing part of the budget;

Second, restraint on defense spending growth;

Third, preservation of the reductions in discretionary spending made in the last 2 years, with some selective increases; and

Fourth, an increase in revenues.

One of the important selective increases that we must make, I believe, is in the area of basic science and advanced education. We must build upon the Reagan administration's commitment to strengthen investment in research, a commitment I applaud. The Budget Committee also deserves commendation for increasing the authorizations beyond the levels requested by the President in some of the key budget functions that encompass Federal support for science research.

I, along with Senator EAGLETON and, we hope, many of our colleagues on both sides of the aisle, plan to seek further increases in the research budgets of six agencies and departments: the National Science Foundation, the National Institutes of Health, the National Aeronautics and Space Administration, and the Departments of Agriculture, Energy, and Defense. We have developed this initiative in cooperation with the Association of American Universities.

I believe there is sufficient room in this budget resolution for such increases, and it is my current intention to press for additional funds when the Senate considers the various authorization and appropriations bills that include basic science research and advanced education programs.

There are important reasons for an increased, sustained investment in the production of new knowledge and in the education of the young men and women who will be our next generation of leaders in science, engineering, and technology. Let us call them first principles. These principles include the following:

The long-term economic vitality, security and well-being of the Nation depend fundamentally on our ability to sustain the search for new knowledge and to educate future generations in essential scientific, engineering, and technological skills.

The future effectiveness of our national defense requires a position of sustained leadership in basic science, engineering, and technological development; to guarantee that leadership, the Nation's capacities to educate well its most able citizens must be sustained and protected.

The health and future well-being of our people and other nations depend upon sustained national investment in fundamental biomedical research and the improvements in health care that result from that search for knowledge.

The Nation's research universities are the primary sources of the new knowledge that underlies technological and economic development; they also educate practically all of our scientists, health care professionals, engineers, and skilled managers.

If we are to retain a leadership position in the international marketplace and secure our national defense, we must as a nation attend to the education and training of the Nation's best young minds or fall behind those nations that do.

The Nation cannot presume the availability of a sufficient cadre of highly trained and talented scientists and scholars unless national policy provides incentives adequate to bring about that result.

Quality research, scholarship and education depend upon the exercise of national leadership and will to establish and sustain balanced Federal policies and targeted initiatives designed to assure long-term excellence in advanced education and research.

I know that the Senate will recognize the truth of these principles. I feel confident that the Senate will see the need to increase our Federal research budget to meet the needs we face. I look forward to working with Senator EAGLETON and others in this Chamber to rebuild this Nation's capacity for basic science and advanced education.

Mrs. KASSEBAUM. Mr. President, I note the absence of a quorum, and I would like to request that the time for the quorum call be equally charged.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. EXON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EXON. Mr. President, this Senator from Nebraska has been watching with keen interest the deliberations of the U.S. Senate.

The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. I would be happy to yield time on the resolution to the Senator from Nebraska.

Mr. EXON. I thank my friend.

Mr. President, I have been watching with keen interest the deliberations of the Senate for the past week or so with regard to the budget resolution. We just finished a rollcall vote about 20 minutes ago that was the last effort to begin to reduce the level of funding of the Federal Government, in this case specifically it was with regard to the reduction of the money that would otherwise go to the International Monetary Fund. Certainly that was in the billions and billions of dollars.

The Senator from Nebraska notes that this is only the last of a whole series of such efforts that have failed.

It seems to me that we continue to overlook the fact that we are here to reduce—and I emphasize the word "reduce"—the Federal budget rather than to increase spending. It is a familiar pattern that we have followed with devastating regularity.

One might wonder what we are here about. This is true if one is concerned about the skyrocketing deficits, the most unbalanced budget in our history, and what we are going to do about it here.

The RECORD will show that we have done essentially nothing—nothing—after more than a week of budget debate and votes to reduce spending. The fact is we are going the other way. We should be subtracting; instead, we are adding thereto.

The deficit is a concern everywhere, it seems, except here on the floor of the Senate. It is a concern to the Secretary of the Treasury who indicated today that continued high interest rates, essentially caused by the ever-increasing deficit and national debt of the United States, is causing us trouble not only so far as economic recovery here at home is concerned, but also causing further reduction in the strength of the dollar overseas, and which causes great difficulty in selling our products around the world.

Mr. President, I would hope that before we finish the budget resolution successfully, if we ever do, that my colleagues would come to realize that we are not getting anywhere the way we are going right now, and what has been suggested as to what we are likely to vote on in the next few hours or the next few days gives little hope whatsoever of any chance of getting the deficit under control.

I am hopeful that I can persuade my colleagues in the Senate that we better start looking for cuts in spend-

ing much more diligently than we have in the past, and, therefore, reduce deficits from their current record levels.

Mr. President, I ask unanimous consent that a table entitled the Johnston-Exon-Nunn-Boren budget be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

JOHNSTON/EXON/NUNN/BOREN BUDGET COMPARED TO:

[In billions of dollars]

	1984	1985	1986	3-yr. total
Current policy baseline:				
Outlays	−8.4	−33.6	−57.9	−99.9
Deficits	−24.9	−69.2	−123.3	−217.4
President's budget:				
Outlays	+4.0	−12.9	−31.6	−40.5
Deficits	−8.9	−37.5	−29.8	−76.2
Senate Budget Committee:				
Outlays	−2.5	−14.8	−21.7	−39.0
Deficits	+12.7	−5.7	−29.8	−22.8
Senate Republican Caucus:				
Outlays	−4.0	−20.7	−33.1	−57.8
Deficits	−16.4	−45.0	−93.1	−154.5

Mr. EXON. This table shows a comparison between the budget which my three colleagues and I offered and four other budget possibilities. It is obvious from even a glance at these figures that the Johnston-Exon-Nunn-Boren budget does the most over the next 3 years to cut spending and reduce deficits. The comparison with the budget of the Senate Republican Caucus is the most striking. The budget we offered proposed to cut nearly $60 billion more over the next 3 years and our budget deficit would have been nearly $100 billion lower in 1986. I should note that the 1986 comparisons are estimates, since 1986 has been left off the Senate Republican Caucus budget because its policy consequences are so obviously unattractive.

It is astounding to this Senator that the political party which has tried over the years to associate itself with fiscal responsibility has now, when in power, become the party of more spending and higher deficits. I do not believe many Americans of either major political party would support the Republican budget if they understand how irresponsible it is with regard to sound fiscal policy. Regardless of the banner it flies under it is a prescription for sure economic disaster. JACKIE KEMP has said that "the Republican Party no longer worships at the alter of a balanced budget." That is one thing but it is quite another, and a disservice to that great political party to place it in a position, as the Republican alternatives do, of worshiping at the alter of unbalanced budgets forever.

Mr. President, I believe we need a bipartisan budget approach which will reduce deficit spending, reduce interest rates, and restore our export markets. Continued Federal borrowing at the levels suggested in the Republican Caucus budget will require the Federal Government to borrow more than $1 out of every $2 raised in domestic credit markets over the next 3 years. We cannot reasonably anticipate significant necessary interest rates reductions under such conditions, and we cannot expect the value of the dollar to stabilize at a level which will make our exports competitive once again.

Before it is too late, I ask my colleagues to reflect on a message which all of us received last week from the group known as the bipartisan budget appeal, headed by former Commerce Secretary Peterson, and other outstanding Americans knowledgeable in and properly concerned about our economy and the threat to same by these unmanageable skyrocketing deficits. Mr. President, I ask that their message be printed in the RECORD at the conclusion of my remarks.

The Johnston-Exon-Nunn-Boren budget addressed all of the major points raised by the bipartisan budget appeal. Perhaps this is why it was defeated, for we touched too many sensitive parts of the budget in our across-the-board attempt to reduce deficits. Indeed, the budget we offered was very much the no sacred cows budget alternative.

Mr. President, it is time for all of us to face the hard facts squarely and move toward a responsible bipartisan budget.

When I say that I do not mean to imply that a bipartisan budget has to be a budget that is drafted by the Democrats that we try to force the Republicans to come aboard on, or one that is written by the Republicans that they try to get the Democrats to join in passing. We hear a lot of talk about bipartisanship today, but entirely too much of the work of the U.S. Senate is being done today in the Republican Caucus, the farthest thing removed from a true bipartisan approach.

As one Senator on this side of the aisle, I once again pledge my support to those on that side of the aisle if they will come and talk to me. Maybe we can get together on a bipartisan budget. I am not likely to sign on to anything that they come out of that Republican Caucus with, because in entirely too many cases, I feel it is essentially dictated from the White House. And oftentimes, the White House does not take a bipartisan approach.

It seems to me, Mr. President, that all of this means that each of us will have to give a little ground from the rigid ideological and political positions that we have. Six former Cabinet Secretaries of both political parties found it possible to reach a bipartisan middle ground, and I believe it is our duty, before passing a disastrous budget resolution, or no budget resolution at all, to do likewise.

Mr. President, I pledge my support to that effort and I hope that we can get that out on the floor of the U.S. Senate, out of the caucus rooms, and get on with the business of trying to reduce spending and trying to get the staggering deficit back somewhere in line.

In closing, Mr. President, let me say that I am very fearful, that everyone is concerned about skyrocketing deficits, the likelihood that the national debt of the United States will bust through the $2 trillion figure by the year 1988, according to the CBO, unless we somehow can get off the track that we are presently on.

Mr. President, I yield the floor.

EXHIBIT 1

From the founding members of the Bipartisan Budget Appeal: the Hon. W. Michael Blumenthal, Sec. of Treasury, 1977-1979; the Hon. John B. Connaly, Sec. of Treasury, 1971-1972; the Hon. C. Douglas Dillon, Sec. of Treasury, 1961-1965; the Hon. Henry H. Fowler, Sec. of Treasury, 1965-1968; the Hon. Peter G. Peterson, Sec. of Commerce, 1972-1973; the Hon. William E. Simon, Sec. of Treasury, 1974-1976.

Hon. J. JAMES EXON,
Senate Office Building,
Washington, D.C.
To Members of the U.S. Senate:

In the process of reassessment that now marks the debate over the Federal budget, the founding members of the Bipartisan Budget Appeal urge further essential steps to reduce the Federal deficit.

These steps would neither impose hardship on the neediest sector of the population nor jeopardize national security. They are urged at this time because debate over the Federal budget continues to avoid difficult and very critical issues requested to bring the Federal deficit under control.

The time to address these issues is now, not a year from now and not two years from now. Our recommendations are based on the belief that budget changes, to be credible to the financial markets and to have the desired effect on long-term interest rates, must be enacted into law this year and must hold out the promise of reducing the deficit to about 2 percent of GNP (or less than DLRS 100 billion) by about 1985, moving toward balance.

If you fail in the course of your current deliberations to take the steps required to bring out-year deficits under control, you will consign the economy to a fitful and unsatisfactory course. Real long-term interest rates will remain high for the foreseeable future, smothering capital intensive sectors and causing the recovery to sputter and stall. Massive Federal borrowing will consume savings urgently needed for investment in new plant and equipment, new infrastructure and new jobs and training. Overvalued dollars will also have a crushing effect on export industries.

The long-term result will be far more painful than the steps necessary now to avert it. The financial markets need a persuasive and credible signal that outyear deficits are coming down steadily and sub-

stantially, there is no such signal now, without such signs, the markets will fear that either the government deficit will be monetized, which will lead to renewed inflation, or the federal reserve will have to force up interest rates, either case would cause a premature end to recovery.

The bipartisan budget appeal has proposed a sound, equitable program to address the federal budget crisis. That program has three elements.

1. First, and foremost, nondefense spending must be reduced sharply and structurally, among the required steps are:

A one-year freeze in the growth of benefit levels of cash payments flowing from large non-means tested entitlements programs. The six-month delay in the social security COLA is simply not adequate.

Some form of a cap must be put on future indexing of these non-means tested entitlements, at present they are far more generous than parallel benefits in the private sector, as indeed are federal pensions which clearly must be reformed. However difficult politically, controlling the budget requires controls on the large non-means tested entitlement program and on the inflation indexing process that drives the cost of those programs upward, (e.g., by capping inflation adjustments at 60% of the CPI, or at 4% per year, or by providing adjustments only for the amount of inflation in excess of 3% per year). If these programs are instead placed off-limits, it will be impossible to make budget savings now necessary for financial stability. As it stands now, there is only a half-year freeze in some of the programs and no change in the indexing system. As a result, over the period covering fiscal 1984 through 1988, the six-month delay reduces entitlement programs, which will aggregate to nearly DLRS 2.2 trillion, by only DLRS 25 billion over the entire period.

Moreover, the hardship that would be imposed on the really needy is too great to justify substantial additional reductions in areas of their requirements.

Medicare costs must be brought under control. They are now exploding.

Non-essential Federal subsidies to business and agriculture must be reduced.

Long-term control of Federal spending is hopeless unless fundamental reforms of this sort are made. There is simply not enough saving in the variable, non-entitlement segments of the budget to achieve the needed budget reductions.

2. Second, defense spending must be placed on a more stable, long-term footing. This nation needs a sustained, multi-year buildup in its defense capability supported on a bipartisan basis—a buildup which will send a signal to allies and adversaries alike that we intend to refurbish our defense capability and to pay for that refurbishing. We do not need a defense budget that surges in one year and lapses back the next—wide variations in defense spending and policies will merely increase the cost of a given defense capability, send a garbled diplomatic message to the rest of the world and lead to defense planning that is not coherent.

3. Third, even after giving top priority to much larger spending reductions than any now being proposed, additional revenues must be raised in the out years. The state of the economy and the nation's urgent need for savings and increased productivity suggest great caution before eliminating scheduled tax reductions in 1983. Our tax systems are far more stimulative to borrowing and consumption and discouraging to savings and investment than the tax systems of other industrialized countries. The goal must therefore be to design tax increases which are targeted primarily at consumption rather than investment and productivity. These can be constructed in ways that protect the needy. But, even though tax increases by 1985 may reduce deficits, taxes alone are not an effective substitute for restraints on spending.

A balanced program of the sort sketched above can bring the Federal deficit by 1985 to just over 2 percent of GNP. That would offer real hope for a sustained recovery, a decade of investment in the future, and growing prosperity and global influence. The alternative of delay—of avoiding difficult programs—is no longer tenable.

The following table compares the outlook for fiscal 1985 under the proposals advocated by the Senate Budget Committee, the House, the administration and the Bipartisan Budget Appeal.

[In billions of dollars, 1985]

	Senate Budget Committee	House Budget Committee	President Reagan	Bipartisan Appeal
Revenues	[1] 762.6	[1] 765.9	[1] 732.4	[1] 770.6
Total outlays	909.6	912.6	917.0	855.6
Defense	270.7	256.3	285.2	267.5
Nondefense noninterest	536.9	552.9	517.8	492.8
Interest	102.0	103.4	114.0	95.3
Deficits	147.0	146.7	184.6	85.0

[1] Includes proposed revenues increases beyond those in effect as of January 1983.

We deeply appreciate all the hard work you have already done and the political difficulty of the task before you. But more must be done. Our country's economic future is at stake.

Respectfully,

W. MICHAEL BLUMENTHAL,
JOHN B. CONNALLY,
C. DOUGLAS DILLON,
HENRY H. FOWLER,
PETER G. PETERSON,
WILLIAM E. SIMON,

The founding members of the Bipartisan Appeal.

The PRESIDING OFFICER. Who yields time?

Mrs. KASSEBAUM. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be equally divided against the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

Mr. CHILES. Mr. President, I notice that the hour is approximately 3:30 p.m. We have for the time being, I think, exhausted the amendments that we have on our side in regard to this resolution. Most of today, yesterday, and really the day before that there were amendments that the Democratic side of the aisle was offering to the budget proposal we now have before us.

I think we are now working on at least the third day that the Domenici-Baker substitute has been laid down, and I thought that we heard early this morning that we should be prepared to finish this resolution tonight, that we would have votes on the Chafee amendment and then on the Baker-Domenici substitute.

I am wondering, because the hour is 3:30 p.m., when that is going to happen.

I have heard the Baker-Domenici substitute referred to as a compromise. I think it is interesting to try to determine the genesis of that word and where that springs from and what the compromise is.

I would assume, Mr. President, if it is a compromise it is a compromise between the President and the Republicans because to date my side of the aisle has not been included. Generally around here when we talk about compromise I thought the Democrats would be included. But maybe it is a term I do not understand, and maybe when the President even said in his state of the Union address that he hoped that our economic policy would be set on a bipartisan basis, I assume he has a different meaning for that word again than we understand.

What we did have, Mr. President, is we did have a bipartisan basis in our committee budget that we adopted and brought to the Senate floor, and in a chart that we have placed on the floor today, and I was explaining that to the distinguished Senator from Kansas today, we have labeled and set the committee work on the top of this chart and we show that our deficits under the committee chart would start at $163 billion in 1984 and then go to $147 billion in 1985. They go to $133 billion in 1986, $135 billion in 1987 and down to $124 billion in 1988, still very high deficits, Mr. President, but end up with about 2.6 percent of the GNP being a structural deficit.

But if we look at the Republican substitute, the so-called compromise, we see that those deficits start at $192 billion and end up at $220 billion 5 years later. So there is a difference of $306 billion in a larger deficit in the substitute than there is in the committee product.

It seems to me it sort of proves the worth of bipartisanship and how it does work in order to give us a showing of those additional deficits.

That really does not tell the whole story because, of course, what that $306 billion extra deficit translates into is also a $41 billion additional interest the Federal Government will have to pay on the borrowing and that, I think, Mr. President, is the great, great danger that we face as we

are trying to prolong this recovery that we have gotten into.

If the Federal Government has to borrow these massive sums of money where will enough dollars come from to fuel the private sector, to fuel housing, to fuel the buying of automobiles and iceboxes, to take care of the industrial expansion that we hope will follow the recovery that we started?

We know the genesis of this particular recovery started when interest rates began to go down last year, and those interest rates began to go down after the Congress took action of increasing revenues. That was not called a tax increase last year, as you recall, Mr. President. That was revenue enhancers, but we enhanced revenue about $81 billion over a period of 3 years, and based on that and the fact that the Fed then took that signal and eased up somewhat on the money supply and we began to see those interest rates start down and as those rates started down, we saw the basis of a recovery consumer-led, led by consumers buying houses and now buying automobiles, and that, of course, has started our recovery.

We still have unused industrial capacity or unused plant capacity of 68 percent so that the economy has not really taken off yet. The indications are that that will follow, and we certainly hope that it will. But for it to follow there has to be sufficient capital to be able to borrow.

If the Federal Government is borrowing $192 billion next year on top of the $240 billion deficit, it is $210 billion already, most of us would probably think we would be lucky if we got by with a $230 or $240 billion deficit, if they borrow that we are talking about 87 percent net private saving that will go to fuel that deficit to take care of those borrowings next year. Maybe that can happen next year if the industrial capacity has not really started up.

But what happens in the next year, in 1985? There I think is the time we can see we would no longer have a recovery and we could be in real trouble. This is exactly the point that is made by the Peterson group. These, as you know, are the founding members of the Bipartisan Budget Appeal, made up of Pete Peterson—these are former Cabinet members under Democratic and Republican administrations—Mike Blumenthal, and John Connally, and Douglas Dillon, and Henry Fowler, Pete Peterson, and Bill Simon, former Secretaries of the Treasury, former Cabinet officials under President Ford and President Nixon and President Carter, all raising the point that we need to take these essential steps to reduce the deficits. And they tell us the time to address these issues is now, not 1 year from now and not 2 years from now.

Mr. President, I ask unanimous consent that the telegram from the Bipartisan Budget Appeal be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Mailgram]

From the founding members of the Bipartisan Budget Appeal: The Hon. W. Michael Blumenthal, Sec. of Treasury, 1977-1979; the Hon. John B. Connally, Sec. of Treasury, 1971-1972; the Hon. C. Douglas Dillon, Sec. of Treasury, 1961-1965; the Hon. Henry H. Fowler, Sec. of Treasury, 1965-1968; the Hon. Peter G. Peterson, Sec. of Commerce, 1972-1973; the Hon. William E. Simon, Sec. of Treasury, 1974-1976.

Hon. LAWTON CHILES,
Senate Office Building,
Washington, D.C.

To Members of the U.S. Senate:

In the process of reassessment that now marks the debate over the Federal budget, the founding members of the bipartisan budget appeal urge further essential steps to reduce the Federal deficit.

These steps would neither impose hardship on the neediest sector of the population nor jeopardize national security. They are urged at this time because debate over the Federal budget continues to avoid difficult and very critical issues required to bring the Federal deficit under control.

The time to address these issues is now, not a year from now and not two years from now. Our recommendations are based on the belief that budget changes, to be credible to the financial markets and to have the desired effect on long-term interest rates, must be enacted into law this year and must hold out the promise of reducing the deficit to about 2 percent of GNP (or less than DLRS 100 billion) by about 1985, moving toward balance.

If you fail in the course of your current deliberations to take the steps required to bring out-year deficits under control, you will consign the economy to a fitful and unsatisfactory course. Real long-term interest rates will remain high for the foreseeable future, smothering capital intensive sectors and causing the recovery to sputter and stall. Massive Federal borrowing will consume savings urgently needed for investment in new plant and equipment, new infrastructure and new jobs and training. Overvalued dollars will also have a crushing effect on export industries.

The long-term result will be far more painful than the steps necessary now to avert it. The financial markets need a persuasive and credible signal that outyear deficits are coming down steadily and substantially. There is no such signal now. Without such signs, the markets will fear that either the government deficit will be monetized, which will lead to renewed inflation, or the federal reserve will have to force up interest rates. Either case would cause a premature end to recovery.

The bipartisan budget appeal has proposed a sound, equitable program to address the federal budget crisis. That program has three elements.

1. First, and foremost, nondefense spending must be reduced sharply and structurally. Among the required steps are:

A one-year freeze in the growth of benefit levels of cash payments flowing from large non-means tested entitlements programs. The six-month delay in the social security COLA is simply not adequate.

Some form of a cap must be put on future indexing of these non-means tested entitlements. At present they are far more generous than parallel benefits in the private sector, as indeed are federal pensions which clearly must be reformed. However difficult politically, controlling the budget requires controls on the large non-means tested entitlement program and on the inflation indexing process that drives the cost of those programs upward, (e.g., by capping inflation adjustments at 60% of the CPI, or at 4% per year, or by providing adjustments only for the amount of inflation in excess of 3% per year). If these programs are instead placed off-limits, it will be impossible to make budget savings now necessary for financial stability. As it stands now, there is only a half-year freeze in some of the programs and no change in the indexing system. As a result, over the period covering fiscal 1984 through 1988, the six-month delay reduces entitlement programs, which will aggregate to nearly DLRS 2.2 trillion, by only DLRS 25 billion over the entire period.

Moreover, the hardship that would be imposed on the really needy is too great to justify substantial additional reductions in areas of their requirements.

Medicare costs must be brought under control. They are now exploding.

Non-essential Federal subsidies to business and agriculture must be reduced.

Long-term control of Federal spending is hopeless unless fundamental reforms of this sort are made. There is simply not enough saving in the variable, non-entitlement segments of the budget to achieve the needed budget reductions.

2. Second, defense spending must be placed on a more stable, long-term footing. This nation needs a sustained, multi-year buildup in its defense capability supported on a bipartisan basis—a buildup which will send a signal to allies and adversaries alike that we intend to refurbish our defense capability and to pay for that refurbishing. We do not need a defense budget that surges in one year and lapses back the next—wide variations in defense spending and policies will merely increase the cost of a given defense capability, send a garbled diplomatic message to the rest of the world and lead to defense planning that is not coherent.

3. Third, even after giving top priority to much larger spending reductions than any now being proposed, additional revenues must be raised in the out years. The state of the economy and the nation's urgent need for savings and increased productivity suggest great caution before eliminating scheduled tax reductions in 1983, our tax systems is far more stimulative to borrowing and consumption and discouraging to savings and investment than the tax systems of other industrialized countries. The goal must therefore be to design tax increases which are targeted primarily at consumption rather than investment and productivity, these can be constructed in ways that protect the needy. But, even though tax increases by 1985 may reduce deficits, taxes alone are not an effective substitute for restraints on spending.

A balanced program of the sort sketched above can bring the Federal deficit by 1985 to just over 2 percent of GNP. That would offer real hope for a sustained recovery, a decade of investment in the future, and growing prosperity and global influence.

The alternative of delay—of avoiding difficult programs—is no longer tenable.

The following table compares the outlook for fiscal 1985 under the proposals advocated by the Senate Budget Committee, the House, the administration and the Bipartisan Budget Appeal.

[In billions of dollars, 1985]

	Senate Budget Committee	House Budget Committee	President Reagan	Bipartisan Appeal
Revenues	[1] 762.6	[1] 765.9	[1] 732.4	[1] 770.6
Total outlays	909.6	912.6	917.0	855.6
Defense	270.7	256.3	285.2	267.5
Nondefense noninterest	536.9	552.9	517.8	492.8
Interest	102.0	103.4	114.0	95.3
Deficits	147.0	146.7	184.6	85.0

[1] Includes proposed revenues increases beyond those in effect as of January 1983.

We deeply appreciate all the hard work you have already done and the political difficulty of the task before you. But more must be done. Our country's economic future is at stake.

Respectfully,

W. MICHAEL BLUMENTHAL,
JOHN B. CONNALLY,
C. DOUGLAS DILLON,
HENRY H. FOWLER,
PETER G. PETERSON,
WILLIAM E. SIMON,
The founding members of the Bipartisan Appeal.

Mr. CHILES. Mr. President, when we look at the substitute we see that rather than a 3-year budget it only projects a 2-year budget so that means the reconciliation process only works for 2 years so there are not 3 years savings on any of the items, and it means that only in the revenues, they only provide for the first 2 years of what the President was providing for in his plan.

Remember, Mr. President, in his plan he picks up very little revenues in the first 2 years. He waits until the third year and then he has a massive infusion, a massive tax increase, in the third year, 1986. But in the plan we have before us we have left that out so we cannot even tell the markets that we are going to do something in 1986, and that is why you see those deficit figures swelling to $220 billion.

Mr. MOYNIHAN. I wonder if the distinguished ranking member would yield for a question?

Mr. CHILES. I would be happy to yield.

Mr. MOYNIHAN. With respect to the markets over the weekend, as he knows, we were able to compute the ratio that is not widely reported in the American press but it is very carefully attended to in the financial markets; and, I suppose as the senior Senator from New York, I represent the locale of those markets, although they are in fact across the country and the world. But there is a ratio which describes the proportion of all credit that is extended in a given year that is absorbed by the Federal Government, which is to say in any given year there is a certain amount of savings that come to market, as it were, and offers itself, as President Coolidge might have said, to be hired when he said of the allies and the war debt "they hired the money, didn't they."

This credit comes available on the market and the Federal Government makes the first play on that credit by virtue of the fact that it can offer the highest rate of interest, combined with the most secure paper, as it is called. Why can it offer the highest rate of interest? Because there is no restraint on the rate of interest it can offer, there is no earnings capacity that has to be judged and be a limiting factor.

Now, in the postwar period, the Federal Government has absorbed an average of 20 percent of the available credit on the market, and this is a fairly stable series. Then enters this administration, calling for greater availability to private markets for investment and greater reward for savings, and the rate of Federal absorption of private credit moved from an average of 20 percent, to 25 percent in fiscal 1981, to 38 percent in 1982, to 65 percent in 1983 in the budget that is proposed by the distinguished majority leader and the chairman of our committee, to 57 percent next year, in 1984 and 51 percent in 1985.

I ask the ranking member, my distinguished friend from Florida, has there ever been a period in American history where for 3 consecuive years the Federal Government has absorbed more than 50 percent of the credit available? And second, if under this administration industrial production returns to normal—it is now 68, 69 percent of capacity and if America were equivalent to Japan, America would be bankrupt—but if production does return to normal, and normal requirements of capital formation, and if capital replacement comes about, what has to be the effect of the Federal Government, preemption of more than half the credit available?

Does that have to mean ruinous real rates of interest for yet another 3 years?

Mr. CHILES. It has to mean that, and it probably has to mean tremendously high rates of inflation if you try to accommodate the need for that additional capital by loosening up the money supply. Of course, you know what that would do to the inflation spiral. We would be back over everything we have seen in inflation.

I appreciate the Senator's point about how the absorption of a large share of total domestic credit and how a larger share of U.S. credit is absorbed under this substitute plan relative to the Senate budget resolution.

The base of comparison that the Senator has used, total domestic funds raised in U.S. credit markets, is certainly an appropriate base for measuring credit market shares, but I think now I have some information that does measure another important aspect of the Federal budget deficits, and that is how those Federal deficits affect the growth potential of the U.S. economy, which we are now talking about. Total domestic funds raised in the U.S. credit markets, the figure the Senator has given us, includes depreciation allowances.

Mr. MOYNIHAN. That is right.

Mr. CHILES. And we would hope that is being used to replace the stock of existing capital being used to produce the GNP.

Mr. MOYNIHAN. That was our plan.

Mr. CHILES. So that cannot go for anything in the way of expansion. It also includes purchases of consumer durables, which are not used by businesses to produce our gross national product.

It seems if we used another base, if we sought to see the funds that are available for increasing our capital stock and therefore increasing our growth potential, then net private saving is the figure that we might want to look at to measure the extent to which the Federal deficits would crowd out private net investment. Under the Domenici-Baker plan, Federal deficits will be 87.3 percent of net private savings in 1984.

Mr. MOYNIHAN. Did the Senator from Florida—and is there anyone listening—did I hear him say that the Federal deficit in fiscal 1984 will use up 87 percent of net private savings?

Mr. CHILES. If we pass the Domenici-Baker plan, 87.3 percent.

Mr. MOYNIHAN. Will this ever be reported in the press?

Mr. CHILES. Well, I do not know. That percent would fall to 73 percent, a mere 73 percent, in 1988. The Senator has used the base of total U.S. credit and asked how the Federal deficit could absorb 50 percent. But when we are talking about net private savings, we are talking about from 87 to 73 percent over the next 5 years.

Mr. MOYNIHAN. Can it be that Mr. David Stockman has attained the final Sovietization of the American economy? I cannot believe that the Politburo disposes of 87 percent of private savings.

Mr. CHILES. I really do not know those figures, but we know there is some outside free economy that does operate there, and it may be as high as 13 percent.

Mr. MOYNIHAN. It would not have to be higher.

Mr. CHILES. It would not have to be any higher than that. It is interesting to note that if we passed our plan, in 1988, we would be using 41 percent, still a very high figure.

Mr. MOYNIHAN. Still high, but half.

Mr. CHILES. I agree it is too high until you compare it with 73 percent and that makes it a totally different figure.

But I think the point the Senator raises is the point that we had brought to our attention when we received a letter from David Jones, who is a financial economist, senior vice president in the firm of Aubrey Langston & Co. They specialize in U.S. Government and Federal agency securities.

Mr. Jones told us in his letter that, and I am quoting:

> The Domenici-Baker budget proposal would have an extremely unsettling impact on the financial markets, and because of the inadequate measures to either increase revenues or cut spending, the plan would result, even assuming a moderate recovery, in a rising deficit pattern rather than a desired declining trend.

We see that in our chart, that the rising trend goes from 192 to 220. He says that by fiscal year 1988 the deficit would end up well above the acceptable $200 billion level and, in that unfortunate event, Federal borrowing requirements would gobble up an unacceptably high 75 percent or more of net private savings, leaving precious little savings available to finance longer term business spending of new plant and equipment.

Mrs. KASSEBAUM. Will the Senator from New York or the Senator from Florida yield for a question?

Mr. CHILES. We would be happy to yield if the Senator would use some of her time on that question.

Mrs. KASSENBAUM. Yes.

Mr. President, I say to the Senator from New York and the Senator from Florida, regarding the substitute plan, true, I think we would all acknowledge they are higher deficits than any of us want to live with. The key difference is, though, that we are talking about high taxes on the part of the proposal that the Senator is supporting. I am talking about low taxes. I think that while we are both trying to get the deficits down, it seems to me, during this period of time that we are coming out of a recession, we simply cannot stand the type of tax increase that is proposed by the Senator. I would like to ask how you acknowledge that. Many economists, despite the letter the Senator read, have said that this is not the time.

Mr. CHILES. Let me say I asked a question of Mr. Martin Feldstein, the Chairman of the President's Council of Economic Advisers. The question I asked Mr. Feldstein was:

> If we did not have the July 1 tax cut in place, if that was not already in law and in place, would you recommend, when we are running a $210 billion deficit, borrowing another $30 billion to give to the public a red ink tax cut? We are not talking about raising taxes, we are talking about whether we should make an additional tax cut on top of the tax cuts of 20 percent that have already been made out there; should we make another 10 percent tax cut?

And his answer was interesting, I say to the distinguished Senator from New York. He said:

> I am afraid that is too hypothetical a question for me to be able to answer.

But the Chairman of the Federal Reserve did not take that kind of dodge. He said no, he would not.

Mr. MOYNIHAN. May I say to the Senator from Kansas that she raises a genuine question where judgments can differ. Dr. Feldstein chose not to answer a hypothetical question where there was no option. We are talking about signals to a world financial market as much as to the American financial market.

If I can say to the Senator, there is something to be gained from this catastrophe, which is we might learn something from it. We might learn that Government is not simple and economics is not easy, and that the exact opposite, the polar extreme, of all the promises made in the euphoria of a lobotomized majority 2½ years ago have failed.

Let me read this for you, if I may, and for my friend from Florida. This comes from the senior vice president and economist, the senior economist at Manufacturers Hanover Trust Co.—not a notoriously erratic or extremist group. He wrote this for this debate, and it is time it was reported.

He said:

> While today's deficits are far too large for our economy, they can be financed in the context of declining interest rates because of the easing of monetary policy that has occurred since last July, along with reductions in demands for short-term funds by the private sector.

Translated, the Federal Reserve finally responded and, too, there is such an enormous excess capacity in the producing sector of the economy that there is no demand for capital, either to replace or to add.

He goes on to say:

> It is essential that these deficits be cut dramatically if the recovery is to continue beyond 1984. The deficits envisioned by the Domenici-Baker plan, in my opinion, do not meet this test, since they are likely to cause the Federal Government to borrow an amount equivalent to all the savings that the economy will make available each year starting in 1984.

That, sir, is the largest assertion we have yet heard—the senior economist at Manufacturers Hanover.

Mr. CHILES. We have now gone from 87 to all of it.

Mr. MOYNIHAN. All of it. That is the triumph of supply side economics. There is no supply. It is such a loss to the Nation.

Mr. CHILES. That is perpetual motion, then, which we have created.

Mr. MOYNIHAN. I suppose you go to the World Bank and borrow.

Mr. CHILES. Chile is doing that and Mexico is doing that.

Mr. MOYNIHAN. It is our time to go to the World Bank, but there will not be anything left. It is so painful, it is so wrong, and it is reversible in the long run only if it is acknowledged as a disastrous set of calculations.

To think back to college days for a moment. I was required, as perhaps the Senator from Florida was, to read, in translation let me say, the works of the great Austrian historian Jacob Burkhardt. A century ago he said the 20th century would be the century of the terrible simplifiers.

You will remember how simple it was going to be, how simple economics were going to be, and how ruinously wrong those turned out.

Mr. CHILES. I will say I did not study that work. But I do remember well that we were told that we were going to have a balanced budget in 1983. That would be the year of the balanced budget as a result of supply-side economics. I do know that we are now looking at 1983 and we are looking at deficits of $230 billion or $240 billion.

Mr. MOYNIHAN. Keynesian economics, which appeared on the world scene at a time of excess capacity of plant and equipment all over the world, was a basic corrective to stimulate the demand side of the economy. This was a correct prescription at that time. The larger body of supply-side economics made the sensible proposition that in the main, in the history of the race, there is never enough to go around. You do not have to think about supply and demand because demand will take care of itself.

But take a good idea and turn it into a five-word sentence and force it on to the American economy and you get the present disaster, ruin.

Mr. CHILES. There were those of us on our side of the aisle that felt for years you could spend yourself into a strong economy. We used to hear that doctrine preached.

We were wrong. It took us a long time to find that out, but we have discovered we were wrong. We have decided we were wrong. Now we find our colleagues on the other side of the aisle buying the notion that you can tax cut yourself into this prosperity. How long does it take them to find out, before they find out they were wrong?

We have said we decided you cannot spend yourself into it. When will they find out you cannot tax cut yourself into it?

Mr. MOYNIHAN. The terrifying thought is it will take 25 years of being in the majority before they learn this is a serious business.

Mr. CHILES. I do not think that will happen when I look at this chart, I say to my distinguished friend from New

York. I think there is a timetable spelled out in red in that chart to keep that from happening.

I would hope that we would not have to go into that kind of a dilemma because the country cannot stand it, given the kind of high pain that we and the world have had as a result of this recession. The world is suffering that pain and will continue to suffer it as we recover.

Mr. MOYNIHAN. And those interest rates are developing a debt crisis in the nondeveloped countries of the world that might radicalize politics in this century as nothing we have ever known. No developing nation's political leader can possibly explain his debt crisis save in the terms of the extreme left.

Mr. CHILES. Those interest rates are also causing our dollar to be overvalued perhaps 30 percent, causing our inability to sell our exports, which now make up 24 to 25 percent of our GNP, and creating record high unemployment, creating a massive debt, a massive imbalance of trade.

Mr. MOYNIHAN. It is $78 billion.

Mr. CHILES. It is $78 billion because we are unable to compete with the Japanese or Germans.

Mr. MOYNIHAN. And will not in the currency markets. It is a problem of people trying to go through 20th century economic life. The OECD has a basket of currencies. The dollar went up 21 percent in the last 2 years. That is $1,000 off the price of a Japanese automobile. The doctrine says thou shalt not intervene. Two weeks ago, the President of France said, "All right, in that case we will retarget our missiles." I do not exaggerate what he said. But he certainly said the world is in a crisis so long as Americans insist. He obviously did not say he would retarget his missiles, but he said there has to be a change because the United States will not act as a competent leader.

From the other side of the aisle we have asked and begged this matter but they cannot face what they did, they cannot acknowledge it. You have a catatonic majority.

Mr. CHILES. There has been a search going on. It is like an Easter egg hunt, after Easter now, seeking the magic 51. The last report I heard was that the golden egg has not been found, the 51 have not appeared. I reiterate the offer that I made every day that we have been talking on the budget that there are 46 warm bodies on this side who would like to participate in the economic policy of this country, that would like to take the President up on his offer to have a bipartisan economic policy.

Mr. MOYNIHAN. We have made mistakes. No one need fear admitting mistakes over there. We admit them for a generation when we have made them.

Have you had any response to your offer?

Mr. CHILES. Not yet, not yet. We are still willing and waiting, but the clock is running down.

Mr. MOYNIHAN. How many hours are there left, Mr. President?

The PRESIDING OFFICER. There are 9 hours and 54 minutes left, 5 hours and 19 minutes to the Senator from Florida, and 4 hours and 35 minutes to the Senator from New Mexico.

Mr. MOYNIHAN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. MOYNIHAN. Is there any rule that if one side of the aisle refuses to debate, part of its time automatically reverts to the side of the aisle that is willing to debate?

The PRESIDING OFFICER. The only rule on refusal to debate is that if both sides decline to yield time, time runs equally.

Mr. CHILES. I say to the Senator from New York that in 9 hours and whatever minutes it will be, there will be the shootout at the OK Corral. By that time, whether the golden egg has been found or not, Gary Cooper will walk down the street and we will have the guns begin to go off. It seems to me we should be having some kind of dialog, we should be trying to determine how we put this package together.

I am reminded of a story of the young man who applied for employment with a railroad company, and he was going to be a tower operator, an operator in the control tower of the train yard. They were showing him the equipment. He seemed to be able to grasp all of this.

They said, "Now, we want to give you a little test."

They said, "The express is coming in down the east track and it is going to arrive at 2:15. The local is coming in down the west track and it is to cross at 2:15, but someone has opened a switch. It is now on the main track. What would you do?"

He said, "I would go get my brother."

"Why in the world would you do that?"

He said, "He ain't never seen a train wreck, either."

It seems to me, Mr. President, that now should be the time, before we send for our brother, that we ought to do something to avoid this train wreck. We know the trains are coming down this track and will collide. Yet we are just allowing the time to go and go while one side continues to search for the golden egg.

Mr. MOYNIHAN. I wonder if I may have permission, in the circumstances—it is a beautiful day outside and nothing is taking place inside. The west front of the Capitol is falling down. At least we could watch that while we wait for the time to run out. May I be excused?

Mr. CHILES. I would be happy to excuse the distinguished Senator from New York.

Mr. MOYNIHAN. I thank my distinguished friend and colleague and leave.

Mr. CHILES. I yield the floor.

Mr. DOMENICI. Mr. President, I might say I would be pleased to excuse the Senator, also.

Mr. MOYNIHAN. I can understand that, certainly.

Mr. DOMENICI. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. What did the Chair say about the time remaining on the bill?

The PRESIDING OFFICER. Senator CHILES has 5 hours and 19 minutes. Senator DOMENICI has 4 hours and 35 minutes.

Mr. DOMENICI. It seems to me, Mr. President, in terms of debate, the distinguished Senator could talk for 25 plus 19 minutes and we would be even in terms of debate. We seem to have used a little more time than they have.

I think the Senator knows——

Mr. CHILES. I wonder if the Senator would repeat for me. I must have missed some of the things the Senator said about the Domenici-Baker plan in some of the time that has been used up.

Mr. DOMENICI. I think in terms of statements on it, I am not sure the Senator was here, but I think I spoke without any interruption on it for 20 minutes, maybe 25, in detail, point by point, in the RECORD. It was close to the time it was introduced. I think the Senator will find it there. I would be pleased, at the appropriate time, to discuss it in more detail.

I am not reluctant at all to debate it. In fact, I shall say a few words shortly about it. But let me make a couple of points, because I share some things very strongly with the Senator, my good friend.

Mr. President, I want a budget resolution. I want him to know that. I do not think anyone has worked any harder to get one than I and I continue to do that.

Mr. CHILES. I concur in that and I congratulate the distinguished chairman for that. He knows how much I feel that we need a budget resolution, too. I think that we shall have chaos if we do not have one.

I have also listened to those who talk about a veto strategy. I wonder if they really thought that through. When you talk about a veto strategy, we are pointing out a grant total of $153 billion, or 18 percent of the budget, that is spent on nondefense discretionary programs subject to annual appropriation. It seems to me

that veto strategy is going to 18 percent of the budget. I wonder if that is sufficient strategy to convince the White House or anyone else that we should try to operate without a resolution.

I do congratulate the Senator.

Mr. DOMENICI. I also want to say to my good friend from Florida, Mr. President, with reference to the passage of time and his concern, which I take to be genuine, that apparently, we are moving close to some deadlines in time. From his vantage point, nothing is happening.

Let me say, while he has served on this Budget Committee as long as the Senator from New Mexico has, in my 2 years as chairman, what we are going through has been rather normal. It is in the last few hours that we finally muster the votes to get a resolution. I do not like that. I am not in favor of that. I assure the Senator that I am doing what I can to get a budget resolution. I shall continue to do that.

The nature of the 50 hours is rather deceptive, as the Senator knows. It sounds like it goes by awfully fast, but in the way this great body does things, 50 hours of debate is a long time. We always open them thinking it is going to take 1 week. I can remember now three different times that we opened on a Monday or Tuesday and were going to finish by Friday. Each of those times, we went to Thursday or Friday of the following week.

I think we are just going through that. We still have today and tomorrow before the normal time runs out. I have no desire to stay late tonight. We are going to do what we can.

Mr. CHILES. If I may just comment on that——

Mr. DOMENICI. Of course.

Mr. CHILES. Mr. President, I do not want to interrupt the Senator in his remarks. He said in his statement the 2 years he has been chairman. I agree this is kind of normal in that 2 years. I remember an earlier time, when the Senator from New Mexico was a spear carrier and the Senator from Florida was a javelin catcher for the then chairman of the Budget Committee. At that time, we sort of operated in the committee on a bipartisan basis. We brought that budget to the floor. The distinguished chairman stood and the ranking member stood and warded off amendments that would come from the left or come from the right. Basically, the committee tried to make its work product, tried to do its job as well as it could. I think we had a centrist budget, that generally did not always please those on the left or those on the right of the respective parties, but it was the product of a Budget Committee that, I think, had well provided. The Senate went along with that. We produced a product that would go with a strong position to go to the House on.

I happen to think there was nothing wrong with that basis of operating. I wish we did not have to operate under this way where, 2 years ago, we found a budget sort of brought to us, or last year, we were brought a budget at 3:30 in the afternoon and that budget was voted out at 10 o'clock that night. We never got an opportunity to participate in that.

Now, we see this year, while we did operate—and I think with some good results and on more of a bipartisan basis in the committee—I know the revenue number was not truly a bipartisan basis, because the Senator's side could not come to an agreement on that. We did on the spending side. Then we come to the floor, and suddenly, we are waiting for days while the Republicans are gathering 51 Members.

Why does that have to be? Why cannot we come out here and debate this? We have Members on both sides. We have philosophy spread. We have conservatives and liberals on our side. The Senator seems to have some on his side this time that do not totally agree.

Why can we not come out and let the Senate work its will? This was supposed to be the greatest deliberative body in the land. It sure has not deliberated any on this particular product except behind closed doors.

(Mr. RUDMAN assumed the chair.)

Mr. MOYNIHAN. I wonder if the Senator will yield for a question?

Mr. CHILES. I yield.

Mr. MOYNIHAN. Does the Senator happen to remember how large a document it was that we received in the form of a budget a year ago? Does he remember that document that we got at 3 in the afternoon?

Mr. CHILES. It went by me so fast, I cannot tell the Senator, truthfully.

Mr. MOYNIHAN. Is it possible that the Senator might remember it was one page?

Mr. CHILES. The Senator refreshes my memory.

Mr. MOYNIHAN. It was one page. That is called participation. We were handed it and told "that is the budget." Is there any disputation?

Mr. CHILES. I do remember that we were told that we could not get any function-by-function analysis until the next morning because the staff had not done it yet, it had to be done overnight.

Mr. MOYNIHAN. We had to pass it, we called it sentence by sentence, I believe.

Mr. CHILES. I apologize to the Senator for interrupting.

Mr. DOMENICI. I assume the Senator would like to charge that time to himself?

Mr. CHILES. Certainly.

Mr. DOMENICI. So we will get the debate equalized on this.

Mr. CHILES. My time.

Mr. DOMENICI. Let me say to my good friend from Florida that I, too, wish that we could be in a situation as he described it going back 5 or 6 years ago. I frankly do not believe that is possible, although I will continue to try to do that.

I want to use Senator MOYNIHAN's figures for just a moment from his speech and document that he inserted in the RECORD entitled "Federal Participation in the Nation's Financial Markets for the Years 1984 and 1985." I regret that the distinguished Senator is no longer in the Chamber, and I do not do this because he has left. I have had it with me planning to do it. I just did not make the point until now.

Mr. President, when you hear the debate about the difference between the Domenici-Baker substitute and the Senate Budget Committee reported resolution in terms of Federal participation in the Nation's financial markets, you would think we were talking about some difference between the two that was mammoth, something in the dimension of three or four times, 300 or 400 percent difference—one is just going to gobble up the Nation's financial markets, and the other in some way is just going to have a modest impact.

I will use the Senator's own numbers so we will have them right. The Senate Budget Committee reported reduction in terms of 1984 would be 51 percent. The Domenici-Baker substitute would be 57. If my arithmetic is right, that is a 6-percent difference. You are talking about a recovery period, and you are basically talking about making up all that difference with taxes. Then if you go out to 1985, again it sounds like the difference is again something geometric, big, many times. I will give you the percentages: 44 and 51—7 percent difference, and that is if we really know with certainty what we are talking about. That is assuming these estimates based on economic happenings are correct. The differences are in percentages less than 10 percent and all of the differences in that respect, using that kind of approach, are made up of the assumed differences in borrowing by the Federal Government because we tax the American people $30 billion and $40 billion, respectively. So let us make sure we understand that.

Now, if you go into 1986, 1987, and 1988, I understand. I understand that there is much to be done, and there are a lot of things that have to happen. So for those who want to look at the red block as it goes out into 1986, 1987, and 1988, there is not any disputing that we are on a very serious deficit path. But I repeat, the only and basic difference is 2 years versus 3 years and do you want to force big taxes in 1986, following rather large taxes in 1983 and 1984 right now and

assume that the Congress is going to pass them and put them on the American people in a bill this year?

That is basically the only difference in the two plans. I submit probably the President's approach was closest to right when he said, "Put something out in 1986 of a contingent nature and, if we need it, do it."

There is no way to put a contingent tax on a budget resolution. You either put it out there as a target or you order it in reconciliation. All we have done in the Domenici-Baker resolution is said the President's approach to no new taxes in the first 2 years, suffer with the deficits and take a new fresh look as times goes on.

They talk about how quick will we learn. I am glad that somebody mentioned that it should not take us 50 years. It will not. We do not have to worry about that. It has been 2 years and a couple of months. That is all it has been since we have been in the majority and President Reagan in the White House. We have not run the ship of state for 40, 45, or 50 years. We have been at it 2 years and a few months, so if there is anything we have to learn I hope it does not take us that long to learn it. I do not think it will.

Having said that, we are working on seeing what we can do about this budget. If the other side has some amendments, I would be glad to set mine aside and vote on them, if they have a tax number that is not the 30 and the 40 and the 50, which I suspect they do not have the votes for. I honestly suspect there are not 51 votes in this body and certainly not a majority on that side that literally straight up and down are going to vote for $30 billion in new taxes, $40 billion the next year, $50 billion the next year, reconciled in order.

So since this is bipartisan and we ought to all participate, the Senator from New Mexico would be delighted to set his aside and let the other side try $15 billion, $30 billion, $40 billion and then projections into the outyears; that the way to get the deficit down is $70 billion or $80 billion. Maybe that is what the Johnston proposal had. Try that on and see if there is a majority over there. See if they are all for that. Maybe if there is we can round them up five or six votes and we can have a budget resolution with those kinds of taxes in it.

That is the issue. There is no other issue. A compelling majority of the Senators on this side are saying we do not want to be part of new taxes in the middle of this recovery for 1983 and 1984.

I do not mean to do my good friend from Florida an injustice by talking about new taxes. I will use whatever words he wants—getting rid of the third year of the tax cut which the people have not yet realized, getting rid of indexing which still is not operative. Wherever I have mentioned "increased taxes," we can use those words in the record and whenever I talk about it, that is what I mean.

I do not think there are votes for that. If there were, I submit that we would have already voted on them. I submit we would have already passed them. But I do not believe the budget resolution with the taxes in it as reported by the Senate Budget Committee, which my good friend from Florida accurately depicted was bipartisan in nature on domestic spending but on the tax side was reported out only because three Republicans accommodated and said we were going to vote for it and bring it down here—I think that approporiately sets it—I do not believe that there are a majority of Senators who are going to vote for that resolution with that many taxes in it. I do not know what number will work. I can tell you from what I find out on this side that there are very few Senators who want to take the risk of reducing, significantly enough where it might really matter, the deficits with new taxes. That is the basic premise. I tell you if you get down to $10 billion and you negotiate that out, or $12 billion, you get a very different feeling. It kind of comes out de minimis, I must tell my friend, because you look at the deficit you are going to put $10 billion or $12 billion on, or $14 billion as suggested by Senator CHAFEE, and you still have a very large deficit and you have asked the taxing committees of this Congress to busy themselves with a whole bunch of new taxes that really do not have very much effect.

Now, what you really have to do is have 3 years of big taxes in order to have any effect on that. I think what a majority on this side are saying, and certainly the Senator from New Mexico is, is that you do not have to do that now unless you really believe that the marketplace of the United States insists that we pass taxes of a significant size, in the $40 billion to $50 billion size effective in 1986 right now. If there is anyone that absolutely feels that is the only way you are going to get recovery, because that is the only way in a budget resolution that you can predict a trend line coming down, then I have not talked to any economists that are that certain, I can guarantee you; $10 billion here, $15 billion next year—you just look at it realistically and you have done little or nothing about the deficits in 1984 and 1985.

That is what sets in when you sit Senators on our side in a room, I say to the Senator from Florida, and you say, "Here is somebody's approach."

So you add it up for 1984, and somebody says, "Compromise at 12." Somebody says, "Do the arithmetic, Mr. Chairman;" and you do the subtracting, and you still have, under the bipartisan budget on spending, even with defense at 5, a deficit of $75 billion or $80 billion.

Appropriately, they say, "What are you going to do that for? It is going to be that deficit if you do not put on new taxes. We do not know how that will affect things."

I am explaining it as best I can. I know that my good friend the Senator from Florida, literally one of my best friends, has called the 2-year budget with little or no taxes—perhaps it was merely in the public relations arena—rinkydink. I have not characterized his $30 billion, $40 billion, $50 billion, $60 billion in new taxes as anything other than that, or whatever I said a while ago—not new. I merely call it what it is.

I also say to my friend from Florida that when you take that red box there and then say we are going to really cut it down, we are going to draw a new line for ours, and we are going to take 30 off and 40 off, and the Senator from Florida says we are going to reduce the deficit by 30 and 40 and whatever the next number in taxes, that we are going to take that red and turn it into black, does he really believe that the U.S. Senate and the House of Representatives—if you did that and you say we have turned that nice, big package at the bottom from red to black—are going to pass a tax bill in the next 3 or 4 months with 30, 40, or 50 in tax revenue?

I do not believe they are going to do that. I take the chairman of the Ways and Means Committee at his word. The House passed that budget resolution with 30 in it. The vote was hardly public, until a letter was disclosed that he had signed, saying, "We cannot raise 30"—his committee. You can reconcile it, whatever it is. He said maybe 8.

Then we have the President saying, "I am not going to sign one. Leave taxes alone for a while."

So, as to the reduction of the red by a new black line up there, I might categorize it in that respect as being rinkydink, because it seems to me that it is not going to happen.

So we are going to produce a budget resolution allegedly to have an impact on interest rates, allegedly to tell the marketplace of America that we have these deficits coming down—$30 billion, $40 billion, $50 billion in taxes.

They sit over there and read everything I am reading and they say, "Isn't that something. They put that in the budget resolution."

The President says he will not sign the tax bill. The chairman of the Ways and Means Committee says he is not going to raise those taxes. Somehow, that black line reducing that red box has become a masterful plan for recovery. I just do not believe that, and that is in all deference to my good

friend from Florida. That is in all deference to those on that side of the aisle, from the committee I chair and otherwise, both the Senator from Nebraska and the Senator from New York. They have had a lot to say about reducing deficits.

I say to the Senator from Nebraska he was not talking about the Senate Budget Committee resolution with taxes in the nature of 30, 40, and 50 in the next 3 years. He had another approach on the floor. Nonetheless, a very significant amount of anyone's proposal from that side of the aisle to reduce deficits has been taxes.

I just do not believe that is any more realistic than ours, when we say nobody is going to put any big taxes on the people of this country before 1986, and I believe that. I believe there are a lot of people around who are going to take the risk, and I believe there are a lot of people around who will have to take the heat of deficits because they are not going to go away. The Senator is right—they might be a little stronger with economic recovery, but they will be there.

So the whole issue, as I see it, is this: Do you want to force, in a budget resolution, taxes that are not going to be imposed, and do you really believe that you can have a significant impact on the money markets of America and bring interest rates down with exactly the same spending plan but a reduction that is based upon 3 years of mandatory taxes of the type in the budget resolution?

I do not think the money market people, the people in business, are that dumb. I think they are very realistic, and they are not going to believe that that is a much better deficit plan approach than the reality that we are going to have big deficits and we are probably going to face up to deficits, but we are going to do it until this economic recovery is given a full chance.

I also mention that these numbers about how much of the new net savings are going to be used up are high. But anybody who comes to the floor and talks about 20 and 25 instead of 60, 70, or 80 is not talking about recovery cycles. I looked at the previous recovery cycle, and we were up as high as 70, had a great recovery. You could not stay up at 70, but you used 70 during almost 2 years of the last good recovery when you were coming out of it—both times, 2 years, in the neighborhood of 70 of net savings.

So, there again, you are not talking about the difference between 18 and 20 and 85 or 78 or 91; because the numbers are very big each time you come out of a recovery.

So I am not embarrassed to debate the Domenici-Baker substitute. It is pending, and we may have a vote on it, and it may be adopted. I do not think it is anything like what the other side says about it being a disaster.

I repeat: Depending on what the Senate does with the defense number, its domestic spending level numbers are supported by a compelling number of Senators on that side of the aisle; and, from what I can tell on this side of the aisle, while there are those who would like to reduce them, a compelling number are willing to go along with that.

So I close by reminding the Senate and the people of this country that the only issue is taxes. Do you want to order them imposed now, for the next 3 years, in substantial amounts, or do you want to wait a while? That is the only difference.

I yield the floor.

Mr. CHILES, Mr. President, I am delighted to hear my distinguished chairman and my very good friend discuss his plan. I listened to the differences between the figures that came from the testimony of the Senator from New York in regard to savings and the similarity between those savings. I do not think that my friend from New Mexico had a chance to hear me discuss the net private savings chart that we had that showed that those figures actually went from 87.3 percent in 1984 under Domenici-Baker, and they declined to only 73 percent over 5 years, and I listened again with interest to my friend say that during the recovery we might have 2 years of taking high savings.

But the projections of the Republican substitute, the Domenici-Baker amendment projects 87.3 percent of all savings in 1984, 77.7 percent in 1985, 75.3 percent in 1986, 75.9 percent in 1987, and 73 percent in 1988.

That is a little longer than 2 years of the recovery—that is 5 years—that is projected at full employment. That is projected at a full recovery and we are still taking 73 percent of all savings.

Senator DOMENICI responded earlier that deficits in previous recoveries absorbed as high as 70 percent of net private savings, and that this even occurred during the second year of some recoveries in previous years.

Mr. President, the Congressional Budget Office has calculated for us the percent of net private savings absorbed by deficits during previous post-war recoveries. I shall ask unanimous consent to have printed in the RECORD a table which shows deficits as a percent of net private saving at a trough of previous postwar recessions, and also shows this ratio four and eight quarters after the trough. As the table shows, deficits as a percent of net private saving was never greater than 42.5 percent four quarters after the trough of a recession. It reached this level during the fourth quarter of recovery from the recession of 1973–75. In general, the deficit as a percent of new private savings would then fall in the following year.

Mr. President, the only time that this ratio goes above 70 percent is during the eighth quarter of recovery from the recession of 1980, but that quarter was at the depths of the recession of 1982, the worst recession since the Great Depression.

The Domenici-Baker plan, if adopted, would create deficits so large over the 5-year budget horizon that deficits as a percent of net private saving would remain above 70 percent for 5 years out to 1988. The deficits under this plan would absorb 70 percent of net private saving over the entire 5-year budget horizon. Mr. President, five of the seven recoveries from postwar recessions did not even last 5 years, and those recoveries were accompanied by much lower deficits, and these deficits absorbed less than half of net private saving. These were the recoveries from the recessions that bottomed-out in 1949, 1954, 1958, 1970, and 1980, Mr. President.

The deficits produced under the Domenici-Baker plan will not create recovery and indeed might abort the recovery we are now in.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

DEFICITS AS PERCENT OF NET PRIVATE SAVING DURING RECOVERIES [1]

Trough date	Ratio at trough	Ratio 4 quarters after trough	Ratio 8 quarters after trough
49.4	29.7	−79.7	6.3
54.2	27.8	−16.6	−18.2
58.2	42.0	−4.1	−13.5
61.1	13.8	13.0	4.7
70.4	28.3	26.7	25.9
75.1	50.3	42.5	36.4
80.3	48.5	32.5	83.6

[1] Minus signs indicate surplus as percent of net private savings.
Source: Congressional Budget Office.

Mr. CHILES. We could not have a full recovery, we could not have 5 years of recovery and have 5 years of the deficit taking 73 percent of net private saving. Under the committee budget, the use of those savings would go from 74 percent in 1984 to 41 percent in 1988. It still seems high to me to absorb 41 percent of net private saving, but it is not high when I compare it to 75 percent.

My distinguished friend from New Mexico who had to leave the Chamber has also told me that the only difference in this plan is basically one is 2 years only, does the taxes for 2 and the other operates for 3. I want to know why my good friend is going backward. He talked about there is no need for raising revenue. In the Budget Committee the Domenici plan proposed to raise revenue of $53 billion in 1986. And that was not contingent as the President's plan could be because the distinguished chairman and my friend from New Mexico said it is not a good enough signal to send

to the markets that we are going to have a contingent plan. We need to lock in and reconcile this $53 billion in 1986, and I agree with him. We certainly need to do that. I wish to do a little more in 1984 and 1985 but now we see in this plan we have gone backward because we have zero dollars to be proposed for revenue in 1986.

Is 1986 magic because that is 2 years into the recovery, or is 1986 magic because that is the first year that we start working on really after the elections of 1984?

I happen to think that the magic of 1986 is because it follows after November 1984 and that is why we do not want to talk about any revenues now. We do not want to say to the American people there is no way we can have these kinds of deficits; there is no way we can have spending at 25 percent or 24.5 percent of the GNP and revenues at 18.9 percent. We have to close that gap. Do not close it, though, until after November 1984.

I will have to say that there are probably some Senators on this side of the aisle—I do not see any of them around now—but there may be some who also would rather wait until after 1984 before we raise any particular revenue and yet when we look at those numbers, and I will say again to my good friend and he says there is no way of knowing whether the chart on the top is going to propose any kind of economic recovery, I think there is a way of knowing that the one on the bottom is disaster when we go down to $220 billion deficits in 1988.

I would hope, Mr. President, that we could get a little action. The hour is 4:30 p.m. We have a lot of Senators who are ready to vote. We have taken up some amendments and it seems as if we have thoroughly debated this amendment today, maybe we should just kind of move on and get to a vote and then see where we go from there.

The PRESIDING OFFICER. Who yields time?

The Senator from Nebraska.

Mr. EXON. Mr. President, as a member of the Budget Committee——

The PRESIDING OFFICER. Who yields time?

Mr. CHILES. I yield.

Mr. EXON. Are we short of time?

Mr. CHILES. I yield such time as the Senator needs.

Mr. EXON. I thank the Senator. I do not see anyone else in the Chamber who wishes to talk. Whatever time I get up and say something someone says "Who yields time?"

The PRESIDING OFFICER. Who yields time off the resolution?

Mr. EXON. It seems to me that the only thing we have is time around here but never enough time to get anything done.

I have listened to the debate between the chairman and the ranking minority member of the Budget Committee on which I serve. I could only read between the lines which says, "We are not going to have any votes today."

I ask my friend from Florida and my friend from Washington, did I read that correctly or was I not listening?

Mr. CHILES. The Senator from Florida does not know the answer to that question.

Mr. EXON. Could the Senator from Washington answer the question from the Senator from Nebraska? Are we going to have any votes today?

Mr. GORTON. The Senator from Washington cannot answer that question unequivocally. It is his opinion there probably will be additional votes today.

Mr. EXON. I am delighted. I wish we could move ahead with this. I like to work when the sun is shining and sleep some time when the sun goes down. I know the Senate does not customarily work in that manner, and I have never been able to figure that out for the time I have been here.

Let me say a few things about the interesting exchange and debate that took place between the chairman of the Budget Committee and the ranking minority member.

I am fearful and have been for the last week and a half that the budget process has disintegrated into an argument as to whether or not we are going to raise taxes. My experience, and I have had quite a little experience in balancing budgets in my lifetime, goes back to the basic premise that if you spend so much money then you better raise taxes to pay for it.

I know that a great deal of the press have taken up the cry today that it is indeed a question as to whether or not we are going to raise taxes. The question is whether or not we are going to put up with that deficit.

I think one of the best kept secrets in Washington today is that the staggering deficits, the largest in our history that are projected to go on up and up and up without anyone doing anything about it, now are simply being put off until 1986, 1987, or 1988.

I can tell you that I am convinced that things are not going to be any better in 1986, 1987, or 1988 when it comes to have the courage to either cut spending more, which I think we should do, and also raise revenues.

There is a very simple way out of this dilemma that we are in, but no one wants to face it, and that is simply to say we have to increase the revenues some and we have to lower the spending level.

There was a vote the other day on the so-called Johnston-Exon-Nunn-Boren amendment that would have done just that. I believe when the vote count was finished there was a magnificent total of 13 votes. The so-called liberal Members of the Senate went to the table and they said: "Well, I am not going to vote for that. It reduces spending." The so-called conservatives of the Senate went to the table and said: "I am not going to vote for that. It raises taxes."

Now the simple facts are, and every Member of this body knows it, there is only one way out of this dilemma that we are in to arrest the staggering deficits that I think are going to abort the economic recovery, maintain the high value of the dollar in the international marketplace, back to the interest rates here at home, abort the recovery, make it impossible for us to sell the products of our farmers and our manufacturers overseas, all because we lack the courage, whether it is because of an election year or whether we just do not have the courage to do what we know must be done, and what must be done, Mr. President, I think if you would get the people off the floor of the Senate, where they might not be heard they would agree to a man and a woman that the only way out of this is to have the combination: reductions in spending and the raising of some revenue. It is that simple. I think we are making the case very complicated for political reasons and I wish we could, as the Senator from Florida has said, join in a true bipartisan approach.

I voted for the budget resolution as it came out of the Budget Committee. If I had it to do over again I would not because I recognize that basically we have reported to the floor of the Senate a sham, that has so divided this Senate that we are now wasting time and essentially have been wasting time all day today, until they get the votes counted on that side of the aisle through arm-twising or some other maneuvers to get something accomplished.

I said earlier, and I am glad the chairman of the Budget Committee is back on the floor, this is one Member on this side of the aisle, and there are others, who does indeed want to cooperate with a true bipartisan approach to the budget, and I think that the chairman of the Budget Committee knows and realizes and recognizes that. I just wish that before we go too far in this staggering deficit in the amendment offered by the chairman of the Budget Committee and before it is voted on that he will come to realize and recognize that that is not the way to go if we want to attack the problem now rather than to put it off until a later time.

So I openly invite him once again to talk to some of us on this side of the aisle, through the ranking minority member of the Budget Committee or otherwise, to see if we cannot come up with some kind of a true bipartisan approach rather than what is called a bipartisan approach, one that is hatched on that side and sold in the press as a

bipartisan approach when it is really not.

I think it is critically important that we protect the budget process, and that is the reason why I voted for the First Concurrent Budget Resolution as reported from the committee. But as every member of that committee knows, I think each and every member of that committee, during closing debate and before the vote, said "But I am not going to support that when it gets on the floor of the U.S. Senate."

That is not a very good way to run a budget committee; it is not a very good way to run a railroad, and it is not a very good way to recommend legislation to the U.S. Senate.

I say that not in criticism of either the chairman of the committee or of the ranking minority member of the committee because I know they worked very hard. I simply say that, as I understand the committees of the Congress, they are supposed to get together, thrash out their differences, work the bipartisan approach in the committee, and come out with something on the floor of the Senate in this case that at least a majority of that committee can support.

I suggest we have never had a committee that has been more fractured than is the Senate Budget Committee on the matter presently before us.

I do think that the budget process is an important one, but I will say that unless we can do a better job in the future than we have in the past, that maybe it is best if we throw in the towel in the Budget Committee and go back to the old way that certainly helped to get us into the deficit position that we are in today.

Mr. President, I suggest the absence of a quorum.

Mr. CHILES. I do not think we need to do that.

Mr. EXON. I yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum and that it be charged equally.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. I object.

The PRESIDING OFFICER. Objection is heard.

Does the Senator withdraw his request for a quorum? Does the Senator from New Mexico withdraw his request for a quorum?

Mr. DOMENICI. I do not think I have to withdraw it. There is an objection.

The PRESIDING OFFICER. Is the Senator suggesting the absence of a quorum?

Mr. DOMENICI. I have not suggested it but the distinguished Senator from Florida does not want to share the time so I will suggest it and ask it be taken from my time. We will not be too long on this one I do not think.

The PRESIDING OFFICER. On the resolution? The Senator wishes the time charged against the resolution, is that correct?

Mr. DOMENICI. On the resolution, excuse me, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DOMENICI). Without objection, it is so ordered.

Mr. BYRD. Mr. President, I have sought recognition to ask the majority leader if he is in position at this time to tell the Senate what the program is for the rest of the day. I am getting some inquiries from my side of the aisle.

Mr. BAKER. Yes. Mr. President, I thank the minority leader.

As I announced at the beginning of the session today, it is the hope of the leadership on this side that we can run through the dinner hour, to approximately 8:30 or 9 tonight. That is still my intention.

I hope that between now and then we can do some useful work. I hope, if there are amendments to the pending Domenici substitute, they will be offered. I hope that at some point we can arrange a time to vote on Domenici and vote on any other amendments that are going to be offered including any as substitute amendments if they are to be offered and to try to make our hours between now and 9 useful and productive.

I do anticipate that we will have rollcall votes yet this evening. I wish I could say to the Senator from West Virginia, the minority leader, what sequence they will be in and what they will be, but I cannot do that at the moment. I am hopeful that we will be able to do this a little later. But it is my intention to ask the Senate to remain in session in an effort to try to dispose of the pending question and other amendments that may be offered either to the resolution or to the substitute.

Mr. BYRD. Mr. President, I thank the majority leader.

I understand that the Senator from Florida (Mrs. HAWKINS) is going to call up an amendment. I wonder if there will be a rollcall vote on this amendment.

Mrs. HAWKINS. Yes.

Mr. BAKER. I thank the Senator. I yield the floor.

AMENDMENT NO. 1258

(Purpose: To reduce undistributed offsetting receipts in order to authorize the Chrysler Corporation Loan Guarantee Board to relinquish certain warrants to Chrysler Corporation)

The PRESIDING OFFICER. The Senator from Florida is recognized.

Mrs. HAWKINS. Mr. President, I sent an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mrs. HAWKINS) proposes an amendment numbered 1258.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, in paragraph (3), increase the figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (4), increase the figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (5), increase the first figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (5), increase the first figure relating to fiscal year 1985 by $200,000,000.

On page 4, in paragraph (5), increase the second figure relating to fiscal year 1984 by $200,000,000.

On page 23, increase the figure relating to outlays for fiscal year 1984 for the functional category "Undistributed Offsetting Receipts (950)" by $200,000,000.

Mrs. HAWKINS. Mr. President, the amendment I call up today addresses——

The PRESIDING OFFICER. Will the distinguished Senator withhold?

Mrs. HAWKINS. Surely.

The PRESIDING OFFICER. Without objection, the Domenici amendment is temporarily laid aside.

Mr. CHILES. I object. I assumed that the amendment was going to be the Domenici substitute.

The PRESIDING OFFICER. The Chair must advise the distinguished Senator that her amendment is not in order unless the Domenici amendment is set aside.

Mrs. HAWKINS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. CHILES. Reserving the right to object, Mr. President, I will not object if it goes to the Domenici substitute. The objection would simply be the time has not been used on the Domenici amendment.

The PRESIDING OFFICER. Without objection, the amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mr. HAWKINS) proposes an amendment numbered 1258 to the Domenici amendment numbered 1243.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, in paragraph (3), increase the figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (4), increase the figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (5), increase the first figure relating to fiscal year 1984 by $200,000,000.

On page 4, in paragraph (5), increase the first figure relating to fiscal year 1985 by $200,000,000.

On page 4, in paragraph (5), increase the second figure relating to fiscal year 1984 by $200,000,000.

On page 23, increase the figure relating to outlays for fiscal year 1984 for the functional category "Undistributed Offsetting Receipts (950)" by $200,000,000.

Mrs. HAWKINS. Mr. President, the amendment I call up today addresses the request made public recently by Chrysler Corp. officials that the U.S. Government give back 14.4 million warrants, worth $220 million at today's prices. In my opinion, this request should be rejected in the strongest possible terms which is what rejection of my amendment will accomplish. To me this request sounds similar to a man pleading guilty to murdering his parents then begging a court for mercy because he is an orphan.

Let me briefly lay out the facts surrounding this presumptuous request. In 1979, the Chrysler Corp. came to the Congress with hat in hand, asking for taxpayers' dollars to fend off bankruptcy. After considerable controversy, the Congress agreed to bail out Chrysler Corp. by guaranteeing over $1 billion in new Chrysler obligations.

Now there were many people who at that time felt this was the wrong thing to do. I was one of them. They argued that our system is based as much on the right to fail as the right to succeed, and that there would be no end in the requests for help if every businessman who got into trouble could come to Washington and return home with a bailout. Right or wrong, we did it. We risked over $1 billion of the taxpayers' money on one company, on one roll of the dice.

And when we agreed to become Chrysler's partner with the taxpayers' money, we asked and received certain assurances from them. One assurance was that the loan package was balanced. We asked that creditors make concessions, we asked that employees make concessions, as well as executives, and finally we asked that shareholders sacrifice, too. If all these elements came together, then the Congress was willing to place a bet with taxpayers' money that Chrysler would survive and at a later date repay them.

Now the principal concession made by the shareholders, who it should be remembered were facing the loss of their entire investment, was that warrants would be issued to the Federal Government and others. At the time that did not look like much of a concession. After all, owning 100 percent of nothing is still nothing. And so, during the negotiations, Chrysler management agreed to provide warrants with a strike price of $13 per share to the Federal Government in exchange for risking over $1 billion. They issued a similar number of warrants to 300 banks under similar conditions.

At the time they made this arrangement, Chrysler stock sold for less than $5 per share. Thus exercising options with a strike price of $13 a share did not seem likely.

But conditions change. Now the Federal Government, on behalf of its taxpayers can acquire a 9-percent interest in the shares of the Chrysler Corp., at profitable prices. Or it can tear up the warrants as Chrysler management wants.

In effect, the Chrysler management is saying that they wanted to be partners with the taxpayers when it looked like there would only be losses to share. However, now that the potential for profit has emerged, they want a divorce and leave their partners in the cold, without the compensation previously agreed to.

Interestingly, they are not treating their other partners who have warrants and options with such contempt. Within the last 2 weeks, the Treasury Department informs me, Chrysler shareholders ratified a proposed restructuring of the debts owed by the company to 300 banks and others, many of whom held warrants, just like the ones the taxpayers hold.

While the transaction was complex, involving swaps of warrants for common stock as well as accelerating the repayment of other debts, Treasury staff informed my office today that full value was recieved for the options. That means roughly 10 million warrants, with strike prices of $13 per share, have already been exercised.

In addition, the five top officers of the Chrysler Corp., hold about 1.3 million options, with strike prices ranging from $7 per share to $9 per share. Another 1.7 million is held by other employees. None of these officers or employees to my knowledge have agreed to tear up their options. Thus, all other holders of warrants and options have been paid off or will be when they feel like it. I wonder why Chrysler management feels that only the taxpayers should be shortchanged.

I do not feel this is fair. For that reason, I have submitted an amendment that will allow the Senate to express its feelings on this subject.

Due to restrictions on the nature of amendments to the budget resolution that are considered germane, I have taken the advice of the Parliamentarian and structured this amendment in a special way. Specifically, the amendment I have sent to the desk lowers offsetting receipts by $200 million in fiscal year 1984, making room in the budget to tear up the taxpayers' warrants. I then ask that the Senate join me in defeating this amendment. If it does so, it will send a signal to the Loan Guarantee Review Board to stand firm, and not violate their fiduciary responsiblities to the taxpayers. Put simply, a no vote on my amendment is a vote for the taxpayers, and lower deficits, a yes vote is a vote for Chrysler's management and for a higher deficit.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER (Mr. GORTON). Who yields time?

Mr. GARN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. HAWKINS. Mr. President, during the quorum call I have had an opportunity to have an indepth conversation with the Senator from Utah who is chairman of the Banking Committee. He has given me every assurance that as chairman of the Banking Committee, which has jurisdiction over this matter, he is watching closely the situation. I understand he feels as keenly as does the Senator from Florida that these warrants, which have considerable value to their owners, the taxpayers should be honored, not turn up. We have discussed what we feel the responsibility is of the Loan Guarantee Review Board to see that the taxpayers receive the return on their investment they are entitled to, just like the 300 banks who within the last 2 weeks traded their warrants in, and as part of an overall package, received full value for them. With the assurance given me by the Senator from Utah that he will watch this closely I will withdraw the amendment, and I ask unanimous consent to do so.

Mr. GARN. Will the Senator yield before withdrawing the amendment?

Mrs. HAWKINS. I yield.

Mr. GARN. Let me say I agree with the Senator from Florida in her remarks about the taxpayers' interests. I was on the Guarantee Committee when the loan came up, was very much opposed to the loan guarantees as setting a precedent, had a fair amount of responsibility for imposing some of the conditions, along with others on the committee, on the original request of Chrysler which was far, far beyond what they originally were granted, and insisting on sharing in responsibility by employers, by stockholders, employees, by everyone concerned, that they should want their jobs enough and want their stock enough and all those things to give. So they were considerably modified. Even after they were I voted against the loan guarantees because I thought it was setting a bad precedent.

Since Chrysler has succeeded I have continually had people come to me and say: "Ha, ha, ha, you were wrong. It worked." Let me give the Senator from Florida an illustration because they asked me, "Wouldn't you if you would go back do it differently?" No, I would not. I would vote again because it is sort of like some of these basketball games you have seen where at the last second somebody shoots from the opposite foul line about a 80-foot shot and it goes in and everybody is groaning why did he do that? But it worked and it is wonderful. But the coach is not going to say, "Shoot those kind of shots all the time," so I am very happy Chrysler succeeded and I hope they succeed and pay back all the money to the Federal Government. But I have not changed my mind one bit that it sets a bad precedent even in those cases where it worked. We should not be taking those long shots.

But I appreciate the willingness of the Senator from Florida, a distinguished member of the Banking Committee, where she certainly can have input into this so that we not enact something on the budget resolution today. But I agree with her that, to use her term, Treasury should not tear up these warrants and we do have jurisdiction and we will certainly look very closely, and I hope Treasury takes note of what we have said here today, that we want to make sure that the taxpayers are protected on this issue. I thank the Senator from Florida.

Mrs. HAWKINS. I thank the Senator from Utah.

The PRESIDING OFFICER. Is there objection to the withdrawal of the amendment? Without objection, the amendment is withdrawn. Who yields time? Does either side yield time? If not, time will be charged equally. Who yields time?

Mr. SYMMS. Will the distinguished chairman of the committee yield me some time to make some remarks on the bill?

Mr. DOMENICI. Might I say to my good friend I would be pleased to yield time on the resolution. Since the time of the Senator from New Mexico is rapidly going down I would ask how long the Senator thinks he might take? Ten minutes?

Mr. SYMMS. Mr. President, I think I could say all I need to say herein, I would say to my colleague, it will be a short time. I can make a unanimous-consent request and put it in the RECORD.

Mr. DOMENICI. No, do not do that.

Mr. SYMMS. I think I can say it all in 5 minutes.

Mr. DOMENICI. I yield the Senator 10 minutes on the resolution.

The PRESIDING OFFICER. The Senator from Idaho.

CIVIL SERVICE RETIREMENT SYSTEM

Mr. SYMMS. I thank the distinguished chairman of the committee. I would just like to say to my colleague from New Mexico that I do not think anyone in the Congress has a more difficult job than the Senator from New Mexico and that is to try to fashion and form some kind of a budget that has some semblance of responsibility to it and get 51 votes to vote for it here in this Senate Chamber. I certainly commend him for his diligent and tireless efforts he has made in the last 2 years to try to bring about some sanity to the budget question.

I would say that when I study the budget and the proposal that passed the other body I will certainly say there was a lack of comprehension of the problems that I think this country faces. I made some comments here yesterday. I am not real happy with the budget that the Senator from New Mexico has but in view of all of the other forces that are working here in this Chamber, I think he certainly deserves the commendations of all of his colleagues, and I wish to add my name to that list.

Mr. President, the issue I want to address briefly, which has been overlooked, I mentioned it yesterday here in debate, and that is something the President brought up in his 1984 budget message last January. He proposed changes in the civil service retirement system to bring benefits closer into parity with those offered in the private sector and to reduce the costs of the system to affordable levels.

Now the administration's proposals included permanent reform in the manner in which the cost-of-living adjustments are made and gradual reductions in some of the retirement benefits. President Reagan also suggested that it may be necessary to increase revenues to the civil service retirement system through phased-in increases in employee and employer contributions.

While the administration's proposal to reform the civil service retirement program may need to be modified, I do believe it is important that the Congress address the fact that the civil service retirement program has approximately a one-half trillion dollar unfunded liability facing it in future years. To just say that again, Mr. President, we are facing a one-half trillion, approximately one-half trillion, I think it may be fair to say it is closer to $478 billion which is nearly one-half trillion dollars, of unfunded liability that we face in the civil service retirement program.

So when someone comes in here, as this Senator did yesterday, and makes the observation that the Federal Treasury has $1 trillion less than nothing in it, really that is a very optimistic statement. The fact of it is we have $1 trillion of debt plus in the general fund. Then there is nearly one-half trillion dollars in the civil service retirement fund and another one-half trillion dollars of unfunded liability in the military pension fund.

I think that this is something that I want to address and I think it should be part of this record.

The budget resolution that was reported by the Senate Budget Committee does not require the authorizing committee to even begin to review this matter. I believe that it is simply irresponsible on the part of Congress to keep at risk the present retirees who depend on the system for the retirement income, and the current Federal workers who are contributing to a system that will not be able to provide them with the benefits they are planning to receive.

In addition to the fact that the workers and retirees are at risk, the unfunded liabilities of all the public pension programs are perhaps the single largest factor in restraining economic recovery. Public pension programs account for approximately 40 percent of our entire Federal budget, and to be realistic, those public pension programs are reeling out of control.

Long-term capital markets are essential if we are going to continue to exist in a capitalist economy. Because of the ravages of inflation, inflationary expectations, high budget deficits, excessive Government spending, and so forth. Those capital markets have shrunk from 30-to-40 year markets to 3-to-10 year markets. If the private sector is not able to finance investments into new plants and equipment over the long term, our ability to have a healthy and growing economy is extremely limited.

And that is a problem. I would just say again that I know my colleagues are concerned about this, but long-term capital markets are the key and they will be the mainspring, the driving force of long-term economic recov-

ery where we can have noninflationary growth.

These long-term capital markets, in my judgment, will not be restored unless the investors in our economy believe that investing over the long-term is a sound investment. Those investors cannot possibly believe that a long-term investment is a good investment when they see a Federal budget that is out of control; Members of Congress unwilling to take the necessary steps to control that budget; and most importantly, some attempt by the Members of Congress to begin to control the public pension programs whose unfunded liabilities run into the trillions of dollars.

The civil service retirement system is but one of the public pension programs, but it is a system that needs to be revamped because of the fact that the Congress will be including the newly hired civil servants into the social security system beginning in January 1984. Without some adjustment, newly hired civil servants will have to pay into both the civil service retirement system and the social security retirement system with the knowledge that they may never realize the benefits for which they are being required to pay.

Continuing to keep retirees and employees hanging in limbo is, in my opinion, absolutely simply unjustified. The system is in trouble and solutions to the problems facing that system need to be found. The administration proposed one set of solutions, and while they may not be acceptable to all parties concerned, their proposals represent a good start. It should be kept in mind that in seeking a solution to the solvency problems facing the civil service retirement system that the general taxpayer should not be forced to bear a disproportionate share of the burden.

As I stated earlier, it is unfortunate that we do not have the courage or fortitude to address these problems now. I am hopeful, however, that we will somehow summon enough fortitude to address this problem at some point in the future and not remain forever recalcitrant.

Mr. President, I would just simply state that I am not married to the proposal that the administration offered. In fact, I think in many cases—and I have said so to Mr. Don Devine of the Office of Personnel Management—their proposal to raise the retirement age comes about too rapidly, but I still think it is a problem that we must face up to in this Congress. As I said here yesterday, in terms of the overall picture of the budget, it is a matter of what we are doing with this budget and this budget process that sends the wrong signals to the financial markets, to the people who make the decisions about lending money.

I think that the decisions about lending that money are simply made based on expectations of what is going to happen here in this body. Well, what does happen when we have a one-half trillion dollar unfunded liability in the civil service pension fund? The question that comes up is, How is Congress going to pay for it? Are they going to ask the people who are getting benefits from the fund to take less benefits? Are they going to ask the people who are paying into the fund to pay in more money? And if that is going to be the case, how is it going to be paid for? And if they are paying in the money, where is the money going to come from?

So I think we have to recognize that, despite the imbalance of this budget and this big deficit, in reality, the way you balance the budget around here is you borrow the money or you commit future taxpayers for the accommodation of the debt that you are accruing today.

What it simply amounts to is there are three ways to balance the budget. One is to have the outflow and income of the Federal Government be equal and put it on a cash basis and go on a day-to-day or month-to-month or a year-to-year basis where the Congress does not spend any more money than it takes in in revenues. That has been tried by many people of my political persuasion. Much to our chagrin, there never seems to be enough votes to reduce the Government expenditure side of the equation, so we end up at the end of the year with a deficit.

Then how is that handled? Then you have to balance off the deficit because the Federal Government has accrued commitments and debts and so what happens is we borrow the money. When the money is borrowed, it crowds out consumers at the loan window at the bank and forces up the price of money or the price of interest. And that very happening is very difficult and it lowers the amount of freedom the American citizenry has because the Government is crowding them out at the loan window.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The time yielded to the Senator has expired.

Mr. SYMMS. Will the chairman yield me 1 more minute?

Mr. DOMENICI. Yes; I yield 1 more minute.

Mr. SYMMS. I will just wrap up this thought and make this point. Then if we do not crowd them out at the loan window, the other answer is that the politicians, historically, not just in the United States but throughout the history of mankind and organized society, have inflated the money. They have done it historically back to clipping the coins, where they actually clipped off the corners of coins. Then they would melt those down and make more coins. They melted the gold coins and put brass and other alloys in the coins and devalued it that way so they could have the gold go around a little further and spread it out, or they simply ran the printing presses and printed money.

But it is a polite way to say they were stealing the money from the people because the people have money in their pockets and if the Governments print money or inflate the currency what they are really doing is stealing from the private sector and the population and taking away their savings and taking them through inflation and ending up with a budget that is balanced according to your definition of accounting.

So, in fact, for us to sit here and say we are not balancing the budget is really not true. We are, but we are simply doing it by methods that have the same impact on the people as if we were raising the taxes directly on them.

The PRESIDING OFFICER. The Senator's time has once again expired.

Mr. SYMMS. Mr. President, I yield the floor.

The PRESIDING OFFICER. Who yields time? If neither side yields time, the time will be charged equally.

Mr. CHILES. Mr. President, I yield such time as the Senator from New Mexico might desire to use off of his time.

Mr. SYMMS. Will the Senator from Florida yield some time to the Senator from Idaho?

Mr. CHILES. Off of the time of the Senator from New Mexico, I would be happy to.

Mr. SYMMS. I do not want it from the time of the Senator from New Mexico. There is not anything I have to say that is that important, I say to my friend.

Mr. DOMENICI. Mr. President, the Senator from Florida has great powers, but that power has not been delegated to him to this point.

The PRESIDING OFFICER. Who yields time? If neither side yields time, time will be charged equally against both sides.

Mr. GRASSLEY. Mr. President, I yield myself such time as I might consume.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object, and I do not intend to object, will the distinguished Senator indicate from where the time is coming? Is it on the amendment or on the resolution?

Mr. GRASSLEY. It is on the resolution.

Mr. BYRD. I thank the Senator.

I have no objection.

Mr. GRASSLEY. Mr. President, as I have said so often before, and as I have said once previously on this budget resolution, I am adamantly op-

posed to increasing defense spending beyond fiscal year 1983 budget authority until—and that is a very important until—structural changes are made to prevent the continued weakening of our national defense.

What is occurring in the Defense Department should make the most conservative among us, in this body or even outside this body, reel in disbelief. The Defense Department is souring on bad management. The process for procuring weapons and spare parts is scandalous.

The result has been a systematic weakening of our national defense. Simultaneously, defense costs are skyrocketing, our forces are shrinking, and our readiness is fading.

The situation has reached a critical stage. If the trend is not reversed at once, we may find ourselves permanently unable to deal with not only the Soviet threat, but with any threat at all.

The structural deficiencies weakening our defense are directly related to the perverse system of rewards and penalties in the defense procurement process. Instead of rewarding efficiency and cost discipline, we discourage it. Those who want to be responsible by blowing the whistle on cost overruns and inefficiency are penalized.

Recent victims of this were Franklin Spinney, a Pentagon budget analyst who has been exiled from macrobudget analysis for identifying structural underfunding; and George Spanton, the defense auditor who caught a major contractor ripping off the taxpayers, and he was rewarded with the threat of job relocation.

The signal sent to the public by such action is one of enormous discouragement, especially to those working in DOD. It weakens their morale and their resolve to do what is right. And the entire Nation suffers the consequences.

Because the defense bureaucracy is not structured for disciplining costs, the system accommodates cost overruns. This is why we hear neverending cases of defense contractors overcharging for weapons and spare parts, or DOD officials renegotiating contracts and allowing the taxpayer to pick up the tab for the higher costs.

The structural malaise in DOD is departmentwide. Cost overruns are consequently the rule rather than the exception. And when all the overruns are added up, we find ourselves with a gigantic budget problem. The defense budget becomes extensively underfunded. The pressures of underfunding then lead Congress to reduce quantities of weapons below what we planned for. The Pentagon responds to the pressures by taking money from readiness to finance the underfunding.

The net effect is shrinking forces and declining readiness, despite substantial increases in costs. In other words, despite a constantly increasing defense budget, our national defense is progressively diminishing. We have now reached a critical stage. If the appropriate structural changes are not made immediately, the systematic weakening of our defense will reach crisis proportions.

It has been frustrating for me, as a prodefense conservative, to enter this battle to strengthen our defense without the help of my fellow conservatives. This should be a conservative issue. It is the classic issue of the free market versus the bureaucracy. But there is an apparent inconsistency in the way we conservatives approach defense spending.

We seem to favor applying our free market principles to the production of eggbeaters and sunglasses. We do so because we believe it is morally right, and because it is efficacious. Why, then, do we conservatives have difficulty shifting that approach to the more vital area of national defense, where there is vastly more at stake?

Let me read to you a couple of passages which reveal an inconsistency on our part. They reveal our tendency to approach defense differently from other agencies of the budget. This comes from the Economic Report of the President, 1982. This is how we view nondefense agencies:

> The advantage of market-like devices is that they can create incentives to behave in the desired way. That is, if we can simulate an effective market, we can rely on self-interest to achieve the desired goals. This will reduce the cost of achieving the regulatory goal and also increase the extent to which the goal will be achieved.

That is for the nondefense agency.

Now, here is how we view the Defense Department:

> In the private sector, competition tends to prevent inefficient producers from passing their higher costs on to consumers. In the defense sector the function of encouraging efficiency is largely performed by DOD analysts of contract negotiations and administration. Their jobs are always difficult because of unanticipated problems in developing high technology equipment, lack of competition among suppliers, and a history of erratic fluctuations in defense procurement levels. The defense buildup will therefore increase the challenge to DOD administrators. Careful planning, tight management, and accurate cost estimates can reduce the adverse consequences of the buildup, but some problems may arise.

Upon reflection, Mr. President, we can see how the Defense Department is regarded in a different light from other agencies of the Federal Government. There actually seems to be an awareness that the Defense Department is operated in direct conflict with the principles of the free market.

And indeed, that is the case. In defense, we have adopted a remarkably ineffective method of operation. And we conservatives champion it. It is bizarre. And it is frustrating.

The defense procurement system is devoid of incentives to hold down or reduce costs and to enhance output and efficiency. In other words, the Defense Department behaves like any other bureaucracy. The bureaucratic approach is authoritative and inwardly focused. It is in total contrast to entrepreneurial behavior with its outward focus and its ability to stay in touch with a changing environment.

Bureaucracies do not like change. They like rigidity and control. Production is secondary. It has a mechanistic vision of the world. The entrepreneurial world is organic. It can adapt to the inevitability of change and then exploit that change. Leadership and character tend to dominate in the entrepreneurial world. It is a mirror of the individual.

The bureaucratic outlook tends toward monopoly. That makes domination easier. It reduces the avenues challenged. Reality becomes abstracted. The entrepreneur, on the other hand, must compete wherever appropriate. Its adaptability to change makes the entrepreneurial approach more able to achieve variety and rapidity, the key to winning a war—or the key to keeping the peace.

Now take a look at the Defense Department. On which side of the fence does its method of operation lie?

Is it adaptable and flexible? Or is it predictable and mechanistic?

Does it behave more like a bureaucracy, or like an enterprise?

Is it centralized, or are their numerous checks and balances?

Does it tend toward monopoly, or toward competition?

To me, the answer is quite simple. The Defense Department is clearly a typical bureaucracy. It is no different from any other agency which conservatives have criticized in the past for inefficiency and waste. There is no true competition for defense contracts. Contracts are negotiated. There is no competitive pricing. Prices are administered, as in a socialist government. And there is no fresh influx of ideas or management skills. Instead, there is total stasis.

This is hurting our ability to establish a strong national defense. We need to orient the Defense Department toward free market principles to increase the efficiency of the procurement process.

Mr. President, if we are to have integrity, we must be consistent. We must apply the same principles indiscriminately to all agencies of Government.

The greatest danger we face is losing the faith and support of the American people. If we continue to be inconsistent in the application of our principles, we will send the signal that our deeds do not match our words. Our integrity would come into question. And

rightfully, the American people cannot be expected to support those who show a lack of integrity.

Mr. President, the road to rebuilding our bond of trust with the American people begins with a commitment to fairness and equity. That is the basis for establishing the moral grounds for consensus.

We do not see a consensus reflected in this budget resolution. Some of us are talking about breaking the conservative coalition by repealing indexing. But how does that achieve fairness?

Repeal of indexing would strike hardest at the lower income earners of this country. It would not affect at all those in the highest salary brackets.

How can we attempt to build a consensus on such a preposterous notion?

Others in the party have lost sight of their free market principles on a consistent basis. In the swirl of legislaltive battle, they have neglected to apply those principles to defense. This, too, undermines the moral prerequisite to consensus-building; namely, fairness.

I think it is very clear what is happening in the struggle to come up with a budget resolution.

There is simply no direction. There is no vision. There is no means for consensus. There is no preception of equity.

We are getting a very clear signal, Mr. President. I think we should take advantage of that signal and pause to reflect on just where we are headed.

Thank you, Mr. President.

The PRESIDING OFFICER. Who yields time? If neither side yields time, time will run equally divided against both sides.

ROUTINE MORNING BUSINESS

(During the day routine morning business was transacted and additional statements were submitted as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed in the end of the Senate proceedings.)

REPORT ON ACTIVITIES WITH RESPECT TO NONPROLIFERATION AND PEACEFUL NUCLEAR COOPERATION MESSAGE FROM THE PRESIDENT—PM 48

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Foreign Relations.

To the Congress of the United States:

Preventing the spread of nuclear weapons is a longstanding and fundamental security objective. My Administration is strongly committed to that goal and has actively pursued it by reinforcing essential non-proliferation measures and by adopting new approaches where these will serve our non-proliferation interests.

As noted in my March 31 statement, for arms control to be complete and world security strengthened, efforts to halt the spread of nuclear arms need to be increased. We are undertaking further efforts with key countries on the need for urgent movement to strengthen measures against nuclear proliferation.

The activities of the Administration with respect to non-proliferation and peaceful nuclear cooperation during 1982 are described in the report called for by Section 601 of the Nuclear Non-Proliferation Act of 1978 (Public Law 95-242). The report has been prepared by the Department of State in collaboration with other concerned departments and agencies.

RONALD REAGAN.

THE WHITE HOUSE, *May 11, 1983.*

MESSAGES FROM THE HOUSE

At 11:02 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 287. An act to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes.

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 957. An act to provide for an increase in the number of members of the Congressional Award Board, and for other purposes.

The message further announced that the House has passed the following bill, with amendments, in which it requests the concurrence of the Senate:

S. 653. An act to amend title 10, United States Code, to establish a Foundation for the Advancement of Military Medicine, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2173. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to authorize additional appropriations to carry out such act; and

H.R. 2174. An act to amend title 18 of the United States Code to prohibit certain tampering with consumer products, and for other purposes.

ENROLLED BILL SIGNED

At 12:22 p.m., a message from the House of Representatives delivered by Mr. Gregory announced that the Speaker has signed the following enrolled bill:

S. 287. An act to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE MEASURE REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 2173. An act to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to authorize additional appropriations to carry out such act; to the Committee on the Judiciary.

HOUSE MEASURE PLACED ON CALENDAR

The following bill was read the first and second times by unanimous consent, and placed on the calendar:

H.R. 2174. An act to amend title 18 of the United States Code to prohibit certain tampering with consumer products, and for other purposes.

MEASURE REFERRED PURSUANT TO RULE XXV

Pursuant to Rule XXV (o)(2) the chairman of the Committee on Finance (Mr. DOLE) requested the referral of S. 499, a bill to require the usage of tax-exempt financing in connection with the Small Business Administration's section 503 loan program, which is presently on the Legislative Calendar, to the Committee on Finance. The bill has been so referred.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, May 11, 1983, he had presented to the President of the United States the following enrolled bill:

S. 287. An act to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 212. A bill to authorize funds for the U.S. Travel and Tourism Administration (Rept. No. 98-82).

By Mr. HATCH, from the Committee on Labor and Human Resources, with amendments:

S. 336. A bill to increase the penalties for violations of the Taft-Hartley Act, to prohibit persons, upon their convictions of certain crimes, from holding offices in or certain positions related to labor organizations and employee benefit plans, and to clarify certain responsibilities of the Department of Labor (Rept. No. 98-83).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HELMS (by request):

S. 1257. A bill to repeal the mandatory honey price support program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1258. A bill to improve programs for the stabilization of agricultural prices and production; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1259. A bill to recover costs associated with Federal marketing agreements and orders, printed reports for cotton and tobacco market information and statistics, plant variety protection, and wool and mohair promotion programs; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1260. A bill to repeal that paragraph of the act of March 4, 1913, that designates 10 percent of all national forest receipts for the construction of roads and trails on the national forest (37 Stat. 843, as amended; 16 U.S.C. 501); to the Committee on Agriculture, Nutrition, and Forestry.

S. 1261. A bill to amend the act of May 27, 1955 (69 Stat. 66; 42 U.S.C. 1856-1856d), to permit the use of firefighting forces of foreign nations and the reimbursement of such forces for costs incurred in fighting wildfires throughout the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GRASSLEY:

S. 1262. A bill to amend the Internal Revenue Code of 1954 to improve Internal Revenue Service procedures concerning investigations and audits of churches, and for other purposes; to the Committee on Finance.

By Mr. HELMS (by request):

S. 1263. A bill to amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for 2 years; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. QUAYLE:

S. 1264. A bill to require extended coverage under group health plans for employees who become unemployed, to provide grants to States for health benefit programs for unemployed workers, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. DODD:

S. 1265. A bill relating to the tariff treatment of gut imported for use in the manufacture of surgical sutures; to the Committee on Finance.

S. 1266. A bill to amend the tafiff schedules of the United States to suspend temporarily the duty on 4'bis (a, a-dimethylbenzyl) diphenylamine; to the Committee on Finance.

By Mr. TOWER (for himself, Mr. GARN, Mr. HEINZ, Mr. ARMSTRONG, Mr. D'AMATO, Mr. GORTON, Mrs. HAWKINS, Mr. MATTINGLY, Mr. HECHT, Mr. TRIBLE, Mr. PROXIMIRE, Mr. CRANSTON, Mr. RIEGLE, Mr. SARBANES, Mr. DODD, Mr. DIXON, Mr. SASSER, Mr. LAUTENBERG, and Mr. GRASSLEY):

S.J. Res. 98. Joint resolution to designate October 2 through October 9, 1983, as "National Housing Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. BAKER (for himself, Mr. BYRD, Mr. MATHIAS, and Mr. FORD):

S. Res. 138. Resolution relating to expenses of the Commission on Art and Antiquities of the U.S. Senate; to the Committee on Rules and Administration.

By Mr. ZORINSKY:

S. Res. 139. Resolution disapproving the recommendation of the Study Group on Senate Practices and Procedures to abolish the Senate Committee on Veterans' Affairs; to the Committee on Rules and Administration.

By Mr. EAGLETON (for himself and Mr. DANFORTH):

S. Con. Res. 33. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Harry S. Truman; to the Committee on Rules and Administration.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HELMS (by request):

S. 1257. A bill to repeal the mandatory honey price support program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1258. A bill to improve programs for the stabilization of agricultural prices and production; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1259. A bill to recover costs associated with Federal marketing agreements and orders, printed reports for cotton and tobacco market information and statistics, plant variety protection, and wool and mohair promotion programs; to the Committee on Agriculture, Nutrition, and Forestry.

S. 1260. A bill to repeal that paragraph of the act of March 4, 1913, that designates 10 percent of all national forest receipts for the construction of roads and trails on the national forests (37 Stat. 843, as amended; 16 U.S.C. 501); to the Committee on Agriculture, Nutrition, and Forestry.

S. 1261. A bill to amend the Act of May 27, 1955 (69 Stat. 66; 42 U.S.C. 1856-1856d), to permit the use of firefighting forces of foreign nations and the reimbursement of such forces for cost incurred in fighting wildfires throughout the United States, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

AGRICULTURE LEGISLATION

● Mr. HELMS. Mr. President, in my capacity as chairman of the Committee on Agriculture, Nutrition, and Forestry I am introducing at the request of the Department of Agriculture and the Reagan administration five bills that are part of the legislative package of the Department of Agriculture. I believe it is important to place before the Senate the major legislative recommendations of the administration as they pertain to agriculture.

The five bills requested by the Secretary would do the following:

First. Repeal the mandatory price support program for honey. The Secretary's discretionary authority to support the price of honey through loans, purchases, or other operations would be retained.

Second. Authorize the Secretary of Agriculture to establish target prices for the 1984 and 1985 crops of wheat, feed grains, upland cotton, and rice at such levels as the Secretary determines appropriate but not less than the 1983 target price levels. This bill would also expand the authority of the Commodity Credit Corporation to donate overseas any surplus stocks of agricultural commodities that are held by the Corporation, not just dairy stocks as at present.

Third. Authorize the Secretary of Agriculture to charge fees to recover the costs of the Department of Agriculture that are associated with marketing orders, cotton and tobacco market information reports, plant variety protection, and wool and mohair promotion programs.

Fourth. Delete the current requirement that 10 percent of the moneys received from activities on the national forests during each fiscal year shall be available for construction and maintenance of roads and trails on national forests in those States from which the receipts were derived.

Fifth. Broaden the situations in which firefighting forces of foreign nations may be used to fight wildfires in the United States and be reimbursed for their costs.

Mr. President, I ask unanimous consent that the text of the bills and the transmittal letters from the Department of Agriculture be printed in the RECORD.

There being no objection, the bills and letters were ordered to be printed in the RECORD, as follows:

S. 1257

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by—

(a) striking out in the first sentence the words "tung nuts," and "honey,"; and

(b) striking out all of subsection (b).

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., February 2, 1983.

Hon. GEORGE H. W. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a proposed bill which would amend the Agricultural Act of 1949 to repeal the mandatory honey price support program. The proposed bill would also provide a technical amendment to the 1949 Act to delete references to a mandatory price support program for tung nuts which was authorized only through the 1976 crop.

Section 201 of the Agricultural Act of 1949 requires that the price of honey be supported by means of loans, purchases, or other operations at not less than 60 percent nor more than 90 percent of the parity price therefor. While the level of support for honey has not been increased above the minimum level of 60 percent since 1973, the parity price has increased rapidly in recent years. This has resulted in the level of support for the 1981 and 1982 crops of honey being established above the market price for such crops and has increased the quantities of honey being purchased by the Commodity Credit Corporations (CCC).

In 1980, honey was acquired by CCC under the price support program for the first time since 1969. Six million pounds of 1980 crop honey were acquired by the Corporation compared with 3 million pounds of 1969 crop honey. In addition, CCC has acquired 38.7 million pounds of 1981 crop honey under the price support program. As of the end of calendar year 1982, CCC had 80 million pounds of 1982 crop honey under loan. It is anticipated that about 60 million pounds of 1982 crop honey will be acquired by CCC.

Furthermore, honey imports have increased substantially in recent years. Initially, the increase in imports of honey was due to a deficit in the domestic supply of honey as the result of declining domestic production. Now, however, because the minimum level of price support is above the market price and the domestic production is being acquired by CCC, honey imports are further replacing the domestic production in the marketplace. This has resulted in increases in costs to the American taxpayer. Without a change in legislation, the continued escalation of the level of price support under the present formula will continue to increase costs to the American taxpayer. It will also further encourage the supplantation of imported honey for that which is domestically produced.

Enactment of this proposed legislation would permit the Secretary to support the price of honey by means of loans, purchases, or other operations using discretionary authority in accordance with section 301 of the Agricultural Act of 1949, as amended. This would allow the price of honey to be supported in a responsible manner, taking into consideration the needs of beekeepers as well as the potential cost to consumers.

The Office of Management and Budget advises that enactment of this proposed legislation would be in accordance with the President's program.

An identical letter has been sent to the Speaker of the House of Representatives.

Sincerely,

JOHN R. BLOCK,
Secretary.

S. 1258

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Agricultural Amendments of 1983".

SEC. 2. Notwithstanding the provisions of sections 107B(b)(1)(C), 105B(b)(1)(C), 103(g)(3)(B) and 101(i)(2)(C) of the Agricultural Act of 1949, the Secretary may prescribe that the established price for the 1984 or 1985 crop of wheat, corn, upland cotton or rice shall be such price as the Secretary determines to be appropriate, but in no case shall the price be less than the minimum established price for the 1983 crop of the commodity.

SEC. 3. Section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431) is amended by—

(1) striking out the last two sentences;

(2) inserting "(a)" immediately after "Sec. 416"; and

(3) adding the following new subsection:

"(b) Agricultural commodities (as defined in section 402 of the Agricultural Trade Development and Assistance Act of 1954) acquired by the Commodity Credit Corporation through price support operations, which the Secretary determines meet the criteria specified in subsection (a), may be furnished by the Secretary for carrying out the provisions of title II of the Agricultural Trade Development and Assistance Act of 1954. The provisions of section 203 of that Act shall apply to commodities furnished under this subsection. The cost of commodities furnished under this subsection and expenses incurred under section 203 of that Act in connection therewith shall be in addition to the level of assistance programmed under that Act and shall not be considered expenditures under that Act for purposes of provisions relating to classification of expenditures.".

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 25, 1983.

Hon. GEORGE H. W. BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for the consideration of the Congress is a proposed bill "To improve programs for the stabilization of agricultural prices and production."

This Department recommends enactment of the proposed legislation.

Section 2 of this proposed legislation would amend the Agricultural Act of 1949 by authorizing the Secretary of Agriculture to establish target prices for the 1984 and 1985 crops of wheat, corn, upland cotton and rice at such level as the Secretary determines to be appropriate. However, the level of target prices established could not be less than the level of target prices established for the 1983 crops of these commodities. The Agricultural Act of 1949 currently mandates increases in the target prices for these commodities for the 1984 and 1985 crops. These increases will provide incentives for excessive production at a time when market signals do not call for increases. The increased production will likely result in the Government acquiring large stocks of these commodities under the price support programs. By giving the Secretary the discretionary authority to establish the 1984 and 1985 target prices at not less than the 1983 levels, there would be some assurance that future production would not be stimulated by Government program incentives to build up burdensome surpluses. Moreover, the significant reduction in inflation has eliminated the need for escalating target prices.

Section 3 of the proposed bill would amend Section 416 of the Agricultural Act of 1949 to authorize the donation of agricultural commodities overseas.

Section 416 currently authorizes the Commodity Credit Corporation (CCC) to donate only its stocks of dairy products overseas. However, CCC has surplus stocks of other agricultural commodities which could be used for this purpose. These other commodities, like the dairy products, can be used to help needy people in poor countries. Therefore, we request an amendment to Section 416 to allow the donation overseas of all stocks of agricultural commodities which are held by the Corporation. The expanded authority would be used to alleviate our stock situation and to benefit needy people. Such assistance would be in addition to existing food aid shipments by the United States Government and will be designed so as to assure that there would be no disruption of ongoing commercial trade. We would implement this additional authority in such a way as to meet these requirements. In view of the known magnitude of the malnutrition problem in poor countries, now is the time to take advantage of our excess stocks to remedy this problem.

Further we are requesting an amendment to Section 416 to require such surplus agricultural commodities to be distributed through the procedures established to carry out the provisions of Title II of the Agricultural Trade and Development Act of 1954. This will facilitate the coordination of commodities donated overseas under Section 416 with the existing donations program under Title II.

The Office of Management and Budget advises that enactment of this proposed legislation would be in accord with the President's program.

An identical letter has been sent to the Speaker of the House of Representatives.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

S. 1259

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act shall be cited as the Omnibus Marketing User Fee Act of 1983.

TITLE I—FEDERAL MARKETING AGREEMENTS AND ORDERS

SEC. 101. Section (10)(b)(2) of the Agricultural Adjustment Act of 1933 (7 U.S.C. 610(b)(2)) is amended by redesignating subparagraph (iii) as subparagraph (vi) and by inserting new subparagraphs (iii), (iv), and (v) as follows:

"(iii) The Secretary may also prescribe, by regulations promulgated pursuant to Section 553 of Title 5, United States Code, such assessment to be paid by handlers as the Secretary finds are likely to be required to pay all or part of the expenses incurred during each fiscal year for administration of this Act by the Department of Agriculture. Any such assessment made shall be apportioned among all handlers subject to marketing agreements or marketing orders by such method of apportionment as the Secretary finds will be equitable, giving due consideration to differences among the several marketing agreements and orders. Such assessments shall be payable to the authority or agency established to administer the agreement or order and shall be transmitted

by each such authority or agency to the Secretary for application and use as provided in subparagraph (iv). Assessments so prescribed by regulation shall be effective with respect to each marketing agreement and each order affected thereby and the handlers shall be subject to such assessments with the same force and effect us though incorporated in such marketing agreement or order.

"(iv) Any assessments collected pursuant to subparagraph (iii), of this paragraph shall be deposited into a fund and shall be available without regard to fiscal year limitations for the expenses incurred in the administration of this Act as specified in said subparagraph (iii).

"(v) In the event that the expenses of administration of the Act are in excess of receipts from the assessments authorized by subparagraph (iii), and to provide operating capital prior to receipt of assessments, up to $3 million may be transferred from the fund established pursuant to Section 32 of Public Law No. 320, 74th Congress, 49 Stat. 774, 7 U.S.C. 612c, to cover such obligations, without regard to limitations on the use of such fund contained in any appropriation Act: *Provided*, That amounts so utilized shall be reimbursed to the fund established pursuant to Section 32 from subsequent assessments, except for costs associated with a proposed order that fails to be approved.".

SEC. 102. The provisions of this title shall become effective upon date of enactment.

TITLE II—PRINTED REPORTS FOR COTTON AND TOBACCO MARKET INFOMATION AND STATISTICS

SEC. 210. The Cotton Statistics and Estimates Act (7 U.S.C. 471-476) is amended by adding a new section 7 to read:

"SEC. 7. The Secretary of Agriculture may, by regulation, charge and collect such fees as the Secretary may determine to be reasonable to cover costs of postage, printing and handling of marketing infomation and statistics authorized under Sections 1 and 3b of this Act, and the fees collected shall be credited to the account that incurs the cost of such services and shall be available until expended.".

SEC. 202. Section 9 of The Tobacco Inspection Act (7 U.S.C. 511h) is amended by deleting the words "without cost to the grower", and adding at the end thereof a new sentence to read: "The Secretary may, by regulation, charge and collect such fees as the Secretary may determine to be reasonable to cover costs of postage, printing and handling of such marketing information, and the fees collected shall be credited to the account that incurs the cost of such services and shall be available until expended.".

SEC. 203. The provisions of this title shall become effective upon date of enactment.

TITLE III—PLANT VARIETY PROTECTION

SEC. 301. Section 31 of the Plant Variety Protection Act (7 U.S.C. 2371) is amended to read:

"SEC. 31. (a) The Secretary may, under such regulations as the Secretary may prescribe, charge and collect fees sufficient to reimburse the Secretary for all or part of costs incurred in administration of this Act. Such fees and charges shall be deposited into a fund which shall be available without fiscal year limitation for the expenses incurred in the administration of the Act.

"(b) There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this Act.".

SEC. 302. The provisions of this title shall become effective October 1, 1983.

TITLE IV—WOOL AND MOHAIR PROMOTION PROGRAMS

SEC. 401. Section 708 of the National Wool Act of 1954 (7 U.S.C. 1787) is amended by adding at the end thereof the following new sentence: "The Secretary may recover by agreement, deduction from price support payments, or otherwise all or part of costs incurred in carrying out the provisions of this section. Fees collected shall be credited to the account that incurs the cost of such services and shall be available until expended.".

SEC. 402. The provisions of this title shall become effective upon date of enactment.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., March 24, 1983.

Hon. GEORGE H. W. BUSH,
President, U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed for consideration by the Congress is a draft bill "To recover costs associated with Federal marketing agreements and orders, printed reports for cotton and tobacco market information and statistics, plant variety protection, and wool and mohair promotion programs."

The Administration recommends enactment of this draft bill. This legislative proposal is part of the President's fiscal year 1984 Budget and provides for recovery of costs associated with:

Administration of Federal marketing agreements and orders for milk, fruits, vegetables, and certain specialty crops;

Postage, printing and handling of market information and statistics for cotton and tobacco;

Providing plant variety protection; and

Administration of the wool and mohair promotion programs, including costs for conduct of referenda.

Estimated revenues to be generated in fiscal year 1984, as a result of enactment of this legislation, approximate $6.5 million.

Title-by-title summaries of the provisions of the bill are enclosed.

A similar letter has been sent to the Speaker of the House of Representatives.

This legislation would have no significant effect on the quality of the human environment.

The Office of Management and Budget advises that enactment of this proposed legislation would be in accord with the President's program.

Sincerely,

RICHARD E. LYNG,
Acting Secretary.

UNITED STATES DEPARTMENT OF AGRICULTURE

Title I: Proposed Legislation to Recover Costs Associated with the Federal Administration of Marketing Agreements and Orders.

The authority of the Secretary of Agriculture under the Agricultural Adjustment Act of 1933 is currently being used to stabilize marketing conditions for fluid milk, fruits, vegetables, and certain specialty crops. This objective is achieved under Federal milk orders by providing minimum milk prices to farmers and handlers that are reasonable in relation to economic conditions and which will assure consumers at all times of adequate supplies of pure and wholesome milk. In the other commodities mentioned, regulations governing the quality or quantity of shipments are used to achieve similar objectives.

Marketing agreements and orders are administered at the local level by market administrators or committees whose expenses are financed by assessment on regulated handlers. At the national level a portion of the expenses of administration is currently financed by annual appropriations and a major portion by permanent annual appropriation pursuant to Section 32 of the Act of August 24, 1935 (7 U.S.C. 612c).

This title would authorize the Secretary to prescribe, by regulation, assessments to pay all or part of the Department's expenses in administering the Act. The recovery of such costs is consistent with the Administration's economic recovery program to establish fees for the provision of services by the government to identifiable users. Two major principles underlie this principle. One is fairness. It is unfair for the general taxpayer to pay for a service when the benefits are generally restricted to a specific group of users rather than spread among the general public. The other basic concept is the efficient allocation of scarce Federal resources. When users pay for a Federal service, they tend to match its quantity and quality with the cost, as occurs in the free market. When such services are free to the user, he tends to request as high a level as possible, since the general taxpayer bears the costs.

Under the President's budget we estimate that for fiscal year 1984 the cost to be recovered, and the resulting annual savings to the taxpayer, would be not less than $5.8 million.

Upon enactment of this title, the Department would apportion costs among the various orders as equitably as possible. The assessment would be collected by the market administrators and local governing committees. In light of the collection of assessments by the market administrators and committees to cover their costs, the collection of assessments, as would be established under this program, would impose little administrative cost and burden.

Additionally, Title I authorizes a transfer of up to $3 million from the Section 32 account. Such funds would be used to provide approximately six months operating capital prior to the receipt of assessments and for the payment of administrative expenses which are in excess of receipts. Funds transferred from the Section 32 account would be reimbursed from subsequent assessments, except for costs associated with a proposed order that fails to be approved.

Assessments collected under this authority will have no significant impact on retail price levels. The estimated cost impact for each of the marketing agreement and orders is an increase of about 10 percent. For milk, the assessment would equate to about 1/10 of a cent per gallon or 1 cent per 30 gallons. However, for the fruit, vegetable and specialty crop marketing agreements and orders, it is difficult to assess precisely the cost impact due to variables among the numerous commodities covered. For some programs Federal costs may be relatively large compared to current industry costs.

Title II: To Provide for Recovery of Costs Associated with the Postage, Printing, and Handling of Market Information and Statistics for Cotton and Tobacco.

Title II will enable the Department to recover costs associated with the postage, printing and handling of printed market news reports for cotton and tobacco. Pursuant to authority contained in the 1981 Farm

Bill, the Department implemented in fiscal year 1982 a system of user fees for printed market news reports for all commodities except for cotton and tobacco. Enactment of this title would, thus, afford the same treatment to all commodities.

The Market News Program administered by the Department's Agricultural Marketing Service (AMS) provides current reports on prices, supplies, movement, demand, and quality for fruits and vegetables, peanuts, ornamentals, livestock, meat, wool, poultry, eggs, dairy products, grain, sugar, cotton, and tobacco. Timely and equal access to the latest market information and statistics is provided to those who want the information; i.e., farmers, shippers, packers, dealers, processors, wholesalers, and retailers, to help them decide the best time and the best place to buy and sell their products.

The 1981 Farm Bill provided general authority to the Department to recover costs associated with the printing and distribution of certain printed reports and publications. However, because of the language and legislative histories of both the Cotton Statistics and Estimates Act and The Tobacco Inspection Act, printed market news reports are currently provided without charge to recipients of cotton reports, as well as tobacco growers. To provide uniformity and consistency in the administration of the total Market News Program, this legislation is proposed to provide explicit authority for the Department to charge postage, printing and handling costs for market information and statistics for cotton and tobacco.

Consistent with the President's budget for fiscal year 1984, we anticipate revenues under this title to approach about $300,000 annually, and outlays to be reduced in the same amount.

The Department initiated action in fiscal year 1982 to charge annual subscription rates for printed market news reports, except for cotton and tobacco. Subscription rates were based on the frequency of mailings, the number of pages, postage costs, and other factors invovled at the time of implementation. A similar plan will be instituted for printed cotton and tobacco market news reports upon passage of this title.

The Department urges enactment by the Congress of this title so that the Department will be able to establish subscription rates for printed market news reports for all commodities in an orderly and uniform manner.

Title III: To Recover the Cost of Providing Plant Variety Protection.

The Plant Variety Protection Act (PVPA), enacted December 24, 1970, provides patentlike protection for a period of eighteen years to developers of new varieties of plants which are reproduced by seeds. Protection under the PVPA is currently afforded to more than 350 species of plants which include field crops, vegetable crops, and ornamentals. Participation is entirely voluntary.

Plant variety protection certificates are granted on the basis of novelty as documented in the breeder's application. Information provided by the breeder is stored and maintained in a computerized data base, along with descriptive characteristics of all known varieties, protected and non-protected. Such information is utilized by the Plant Variety Protection Office in the search process in order to determine if the variety described in the application is unique.

From the time regulations implementing the PVPA were promulgated in November 1972 until November 1982, a fee of $750 was charged to those granted certificates of protection, or exclusive property rights to sell, advertise, or license others to sell seed of a novel plant variety. The fee was increased to $1,500 in November 1982. Fees collected are deposited to Miscellaneous Receipts in the U.S. Treasury as required by law. However, these fees have never covered the full costs of operating the program, which have risen from less than $2,000 per application nine years ago to as much as $3,600 in recent years.

The sole source of funds for operating the program since its inception has been annual appropriations. In view of the special identifiable benefits which accrue to breeders from this type of protection, we believe it is in the public's interest to place the program on a cost-recovery basis, and that fairness demands that we stop asking the general taxpayer to bear these costs. We are currently taking steps to reduce the costs of this program to $2,000 to $2,500 per application. This reduction in costs will be achieved by reducing the amount of search time as well as the volume of information currently stored in the computer base. These and similar measures recommended by the PVP Board are expected to result in improved program efficiency and productivity, and offer recipients the same protection they currently enjoy without placing an unfair burden on the taxpayers.

Under Title III, breeders of novel varieties of sexually-reproduced plants would continue to be charged a fee for protection under the Act. However, fees collected would be deposited to a fund available for expenditure by the program without fiscal year limitation. Such fees would be sufficient to reimburse the Secretary for all or part of the costs incurred in administration of the Act.

At the beginning of fiscal year 1983, we had 232 applications in process. We expect this number to increase in fiscal year 1983, depending on industry reaction to the 1982 increase in fees and efforts currently underway to increase program efficiency and productivity. Therefore, limited appropriations of $214,000 have been requested for fiscal year 1984 to process pending applications during the transition from an appropriated basis to full cost recovery user-fee funding. We anticipate that not less than $350,000 of the program's estimated costs for fiscal year 1984 will be derived from user fees.

Title IV: To Recover Costs Incurred in the Administration of the Promotion Programs for Wool and Mohair

Title IV would amend Section 708 of the National Wool Act of 1954 to authorize the Secretary of Agriculture to recover costs incurred in the administration of the promotion programs for wool and mohair.

The Department provides oversight under several statutes over research, education and promotion programs for a number of agricultural commodities. With the exception of wool and mohair, the Department is reimbursed for most of the costs it incurs in the oversight of commodity promotion type programs. This proposed amendment would place wool and mohair on a comparable basis with other commodities that have such programs.

Under this title, the Department proposes to recover all or part of costs incurred in carrying out its responsibilities pursuant to Section 708. Funding for Department costs would be derived from money which producers have set aside for promotion and other purposes from the payments they receive under the National Wool Act.

The fiscal year 1983 appropriation was reduced by $23,000 in anticipation of enactment of wool user fee legislation. However, the costs associated with research and promotion programs will increase by at least $12,500 as a result of the mohair program's approval in a December 1982 referendum. Therefore, the fiscal year 1984 costs of these programs will be something over $35,500. However, since wool and mohair referenda are conducted every 4 years, outlays will then be further reduced every fourth year by approximately $128,000 for wool and $3,500 for mohair because referenda costs will be charged to producers. These costs represent about 1/10 of 1 percent of the value of wool production and about 1/100 of 1 percent of the value of mohair production for those years when referenda are held.

Upon enactment of this title, it would be too costly to hold referenda to address reimbursing the Department's annual costs. Therefore, as an interim measure and until the next referenda are conducted in 1986, the Department will seek to recoup such costs pursuant to Memoranda of Understanding with the respective organizations carrying out authorized programs.

S. 1260

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to insure that the construction of roads and trails on the lands of the National Forests proceeds in an orderly and efficient manner, that paragraph of the Act of March 4, 1913, as amended, requiring that 10 percent of all moneys received from the National Forests during each fiscal year shall be available for the construction and maintenance of roads and trails within the National Forests in States from which such proceeds are derived (37 Stat. 843, as amended; 16 U.S.C. 501), is hereby repealed.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., April 20, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith, for the consideration of Congress, is a draft bill "To repeal that paragraph of the Act of March 4, 1913, as amended, that designates 10 percent of all National Forest receipts for the construction of roads and trails on the National Forests (37 Stat. 843)."

The Department of Agriculture recommends introduction and enactment of the draft bill.

The proposed legislation would repeal a paragraph of the Act of March 4, 1913 (37 Stat. 843, as amended; 16 U.S.C. 501). This paragraph requires that 10 percent of all moneys received from activities on the National Forests during each fiscal year shall be available for construction and maintenance of roads and trails on National Forests in those States from which the receipts were derived.

This account has not been used since fiscal year 1981 and serves no useful purpose. It is very difficult to estimate the funds available for this account since an estimate must be made of the anticipated National Forest receipts 2 years in advance of the fiscal year that they will be received. This estimate then must be included as a part of the overall appropriation process. A road construction program partially dependent on these funds may be adversely affect-

ed when estimates exceed actual receipts. Supplemental appropriations may become necessary to maintain the originally budgeted program level. The bulk of the National Forest road construction program appears in the Forest Service budget under two other items: (1) an annual appropriation for forest road construction; and (2) a permanent appropriation from a working fund for timber purchaser roads constructed by the Forest Service. As a practical budgetary procedure, the 10 percent road fund is merged with the first item.

We believe that the purpose of the paragraph in the 1913 Act would be better served if the forest road construction program were financed entirely through the appropriation process, and the earmarking of National Forest receipts for this purpose eliminated. Forest Service appropriations for fiscal years 1982 and 1983 provided a limited resolution of the problem to which this draft bill is directed. We believe that a permanent solution would be preferable to dealing with the situation on a year-to-year basis.

The proposed legislation would not require additional budget outlays by the Federal Government. Its enactment would have no significant effect upon the quality of the human environment.

The Office of Management and Budget advises that there is no objection to the presentation of this proposed legislation from the standpoint of the Administration's program.

A similar letter is being sent to the Speaker of the House of Representatives.

Sincerely,

JOHN R. BLOCK,
Secretary.

Enclosure.

S. 1261

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to increase the effectiveness of domestic fire fighting forces and to ensure prompt and effective control of wildfires on Federal lands, the Act of May 27, 1955 (69 Stat. 66; 42 U.S.C. 1856-1856d), providing for fire protection agreements and assistance between agencies of the United States Government and other fire organizations, is amended as follows:

(1) In section 1(c), insert a period after "country" and delete the remainder of the sentence;

(2) In the first sentence of section 2(a), delete the comma after "agreement" and delete "in the vicinity of such property,"; and

(3) In section 3, delete ", within the vicinity of any place at which such agency maintains fire-protection facilities,".

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., April 15, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Transmitted herewith for the consideration of Congress is a legislative proposal "To amend the Act of May 27, 1955 (69 Stat. 66; 42 U.S.C. 1856-1856d), to permit the use of fire fighting forces of foreign nations and reimbursement of such forces for costs incurred in fighting wildfires throughout the United States, and for other purposes."

The Department of Agriculture recommends introduction and enactment of the draft bill.

The proposed legislation seeks to improve the wildfire fighting capability of the Federal Government. The draft bill would broaden the provisions of the Act of May 27, 1955 (69 Stat. 66; 42 U.S.C. 1856-1856d), to allow the Federal Government to reimburse foreign governments, including agencies and subdivisions thereof, and foreign private corporations and associations, for costs they incur in wildfire prevention and suppression activities on Federal lands within the United States. Present law restricts reimbursement of fire fighting organizations of foreign nations to such activities "in the vicinity of any installation of the United States". One of the major purposes of the 1955 Act was to ensure adequate fire protection for United States facilities throughout the world. The proposed amendment would permit fire fighting organizations of foreign nations to assist in fighting wildfires on Federal lands in the United States. The assistance would involve both manpower and equipment.

The proposed legislation would allow the fire fighting resources of the Canadian provinces, for example, to supplement those of the United States during periods of extreme wildfire emergency. Catastrophic wildfire situations in the Western States, such as those that occurred in 1973 and 1977, require the commitment of all available Federal and State forces. Canadian forces could have been effectively used on each of those occasions to supplement domestic forces and to provide backup. Further, there are situations where it would be more cost-effective to use Canadian forces than to transport Federal or State forces from more distant locations. It is estimated that the need for such assistance from foreign governments would occur 2 to 3 times each decade.

It is estimated that the impact on the Department of Agriculture's budget would be approximately $1,000,000 over a 5-year period. Fighting forest fire (FFF) funds would be used for this purpose in the same manner as they are now used to pay Federal agency costs. The irregular and less than annual occurrence of wildfire emergencies make an annual budget impact estimate inappropriate.

Enactment of the proposed legislation would complement a memorandum of understanding regarding cooperation on forestry-related programs between the Department of Agriculture and Environment Canada and signed June 25, 1982. This agreement calls for mutual assistance in program planning, program operation (including emergency fire situation) and the sharing of information. Enactment of the proposed legislation would have no significant effect upon the quality of the human environment.

The Office of Management and Budget advises that there is no objection to the presentation of this proposed legislation from the standpoint of the Administration's program.

A similar letter has been sent to the Speaker of the House of Representatives.

Sincerely,

JOHN R. BLOCK,
Secretary.●

By Mr. GRASSLEY:

S. 1262. A bill to amend the Internal Revenue Code of 1954 to improve Internal Revenue Service procedures concerning investigations and audits of churches, and for other purposes; to the Committee on Finance.

CHURCH AUDIT PROCEDURES ACT OF 1983

● Mr. GRASSLEY. Mr. President, I rise to introduce a bill establishing clearer church audit procedures for the IRS. The Internal Revenue Code prohibits the examination of the religious activities of churches except to the extent necessary to determine if the organization is a church and limits the examination of a church's books and records to determine the amount of tax owed. However, some churches have been caught in expensive and time-consuming entanglements with the IRS trying to preserve their rights as set forth by Congress.

I am introducing this legislation to encourage a rigorous analysis of this important topic. Religious organizations associated with mainline, evangelical and fundamental churches have argued that a set of audit procedures and rights should be set forth in the statute to give churches guidance in how best to pursue their disputes with the Internal Revenue Service. This legislation will also give the IRS instruction on how they should proceed with an audit which potentially affects a church's right to freely exercise their religion without state interference.

Under current law, a church does not need to file an exemption with the IRS to receive tax-exempt status. The Internal Revenue Service generally examines churches for three reasons: first, to determine if the charitable contribution deductions claimed by the church members were received by the church; second, to determine if a church has unrelated business income which is subject to tax; and third, to determine if a church is indeed a religious organization entitled to claim tax-exempt status. Obviously, legitimate church organizations have no interest in seeing the proliferation of tax shelters disguised as religious organizations. Nevertheless, churches have legitimate concerns about the scope of the IRS attempt to determine who is entitled to tax-exempt status.

This bill requires the IRS to specify the legal and factual issues which have given rise to their preexamination request for information and an explanation of why the IRS has determined an examination might be necessary. The bill also requires the IRS to explain its examination procedures and provide the church with an opportunity to meet the IRS to respond to questions prior to the initiation of an investigation or an audit. Since churches are not required to file income tax returns if they have no unrelated business income, the bill sets a 3-year statute of limitations on prior years eligible for audit. This provision may need refinement to avoid a poten-

tial problem when a church has never filed a return to report unrelated business income which was properly reportable.

Additionally, this legislation requires the IRS to complete their investigation within 1 year after commencement of an investigation or an examination. A provision is also included which waives the exhaustion of remedies requirement if a church has received a notice from the IRS that its tax-exempt status will be revoked.

All of these provisions need careful study. Many of the investigations of churches do not reach the adjudication stage. Thus, many of the problems these organizations have faced have not surfaced. Information about difficulties encountered by churches will be helpful in enabling Congress to make this legislation as effective as possible in remedying problems.

I urge my colleagues to join me in cosponsoring this legislation and assisting me in crafting legislation which protects the civil liberties of churches without jeopardizing the enforcement efforts of the IRS in stopping unlawful tax shelters.●

By Mr. HELMS (by request):

S. 1263. A bill to amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for 2 years; to the Committee on Agriculture, Nutrition, and Forestry.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT AUTHORIZATION

● Mr. HELMS. Mr. President, at the request of the Environmental Protection Agency, I introduce a bill proposed by EPA "to amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for 2 years."

The bill would amend section 25(d) of FIFRA to extend the activities of the Scientific Advisory Panel through September 30, 1988. The bill would also extend the EPA's appropriation authority under FIFRA through September 30, 1985.

Mr. President, I ask unanimous consent that the text of the bill and EPA's transmittal letter be printed in the RECORD.

There being no objection, the bill and later were ordered to be printed in the RECORD, as follows:

S. 1263

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136w), is amended by striking "September 30, 1981" and inserting in lieu thereof "September 30, 1988".

SEC. 2. Section 31 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 U.S.C. 136y), is amended by adding at the end thereof the following new sentence: "There are hereby authorized to be appropriated to carry out the provisions of this Act for the period beginning October 1, 1983, and ending September 30, 1984, $46,624,400 and for the period beginning October 1, 1984, and ending September 30, 1985, such sums as may be necessary.".

U.S. ENVIRONMENTAL PROTECTION AGENCY,
Washington, D.C., May 10, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is the Environmental Protection Agency's proposed bill "To amend and extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for two years."

This bill would amend Section 25(d) of the Act to extend the activities of the Scientific Advisory Panel and section 31 of the Act to extend the Environmental Protection Agency's appropriation authorities through fiscal year 1985. These authorities expired on September 30, 1981.

Section 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) established the Scientific Advisory Panel (SAP) to advise the Environmental Protection Agency (EPA). The SAP is comprised of seven members chosen from among twelve nominees—six nominated by the National Institutes of Health and six nominated by the National Science Foundation. The Act requires that all proposed and final regulations issued under section 25(a) and proposed cancellations or changes in the classification of pesticides be submitted to the SAP for comment as to their impact on health and the environment. Further, the SAP is empowered to advise the Administrator on improving the Agency's scientific analyses conducted pursuant to FIFRA. The present language of the statute required the panel to terminate its activities at the end of fiscal year 1981.

Since its establishment in 1976, the SAP has been active in several areas. In 1979 twelve meetings were held to deal with five regulation proposals and four cancellations. During 1980, thirteen meetings were held covering six regulations and four cancellation classification actions. In addition, the panel assisted EPA with a scientific review of six issues of concern to public health. The SAP has been regarded by the scientific community, the agricultural community, the chemical industry, and the Congress as an important checkpoint for EPA actions under the FIFRA. Under the Act, EPA's charge is to insure that pesticides do not cause "unreasonable adverse effects on the environment, taking into account the economic, social, and environmental costs and benefits of the use of any pesticides." The SAP serves the vital function of providing information on health and environmental effects of proposed EPA actions and of providing objective and scientifically rigorous review. The various interested parties to pesticide regulatory actions are inclined to view a SAP opinion as objective and therefore to accept it, which is crucial if our pesticide regulatory program is to progress.

The Agency has determined that the SAP's continuing review of Agency actions is an essential element of the difficult decisionmaking processes under the FIFRA. The panel's past record has been exemplary. Section 1 of the enclosed draft bill, therefore, would amend the Act to extend the life of the SAP for another five years through fiscal year 1988.

The estimated annual operating cost of the SAP is $100,000, which includes an allowance for 2.0 workyears of staff support provided by the Office of Pesticide Programs. This amount has been included in the President's Budget for fiscal year 1984.

Enactment of Section 2 of the enclosed draft bill would enable the Environmental Protection Agency to continue the non-research programs envisioned by the Federal Insecticide, Fungicide and Rodenticide Act. We have requested extension of related research and development appropriation authorities in another draft bill, "The Environmental Research, Development and Demonstration Authorization Act of 1984." The enclosed draft bill provides appropriation authorization for our non-research activities under the Act, including developing and processing registration standards for pesticide ingredients; reviewing and registering new pesticide products; classifying pesticide products for general or restricted use; establishing a minimum level of pesticide residue tolerances for food and feed commodities; assistance to State pesticide regulatory agencies for enforcement and for training and certification of pesticide applicators, and funds for basic operating expenses and salaries. In 1984, the enforcement program reflects a shift of more responsibility to the States.

We recommend that this proposal be referred to the appropriate Committee and that it be enacted.

Our request for appropriation authorizations for fiscal year 1984 under the Federal Insecticide, Fungicide, and Rodenticide Act is $46,624,400. This is the amount requested in the President's 1984 Budget for these activities.

The Office of Management and Budget advises that enactment of this legislative proposal would be in accord with the program of the President.

Sincerely yours,

LEE L. VERSTANDIG,
Acting.●

By Mr. QUAYLE:

S. 1264. A bill to require extended coverage under group health plans for employees who become unemployed, to provide grants to States for health benefit programs for unemployed workers, and for other purposes; to the Committee on Labor and Human Resources.

HEALTH BENEFITS FOR UNEMPLOYED WORKERS

● Mr. QUAYLE. Mr. President, following 2 days of extensive hearings on health benefits for the unemployed, I am today introducing S. 1264, a bill to provide a temporary program to serve the preventive health care needs of unemployed Americans. On May 3, 1983, I heard testimony from 15 witnesses in my capacity as chairman of the Employment and Productivity Subcomittee. Those witnesses convinced me that something should be done in this area and I am very pleased that the Senate decided to provide funds for such a program in the budget resolution, together with an offsetting revenue increase.

Mr. President, first of all I would like to say that any solution to the problem of providing these health care benefits must include an equitable distribution of the burdens and sacrifices that such a program will entail. Employers, insurance companies, health

care providers, the working public, and the unemployed must all contribute to making this program work. Employers must do their share by offering open enrollment for spousal and dependent coverage and extended coverage of laid-off employees for a full 90 days after the date of layoff. During the second 90 days after layoff they must offer former employees the option of coverage under the group plan, but with the employee responsible for the full premium. Insurance providers must do their share by working with employers to provide these benefits at a reasonable cost. Health care providers must do their share, as they have in the past, by offering their services at no cost or reduced cost to those who are either not eligible for these services or whose particular affliction is not treatable within the confines of this bill.

I am delighted to report that many witnesses came forward at my hearings to support provisions which my proposal contains. For example, the National Association of Manufacturers and the Washington Business Group on Health said that open enrollment for family coverage and extended health insurance benefits under group plans and at group rates would be feasible for most employers. Providers of health care services, while they affirmed that many physicians and hospitals are already providing care at reduced cost or no cost, strongly supported the need for a public program to attend to the need for preventive health care services. I was also pleased that OMB Director David Stockman agreed that the solution to this problem cannot come totally from the public, but must come from private efforts as well.

In response to these and other recommendations, my proposal addresses the problem from two angles. First, my proposal expands the current system of employment-based health insurance to provide better protection for the unemployed. Second, it provides for a temporary public program during the current high unemployment period to help those persons who cannot be served through the existing system. Accordingly, my proposal provides for an extension of availability of group health insurance for the first 6 months of unemployment: The first 3 months to be financed under the same conditions as during employment and the second 3 months at the cost of the former employee. It provides a block grant to the States for meeting the needs, and particularly the preventive health care needs, of persons who have been unemployed for over 6 months and who were eligible for unemployment compensation. The authorization of appropriations for this program is contingent on the enactment of a revenue measure that will fund the program.

I plan to offer this bill as an amendment to S. 242 which will be marked up in the full Labor and Human Resources Committee next week.

I ask unanimous consent to insert in the RECORD at this point a brief explanation and the text of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1264

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Health Benefits for Unemployed Workers Act of 1983".

EXTENDED COVERAGE UNDER GROUP HEALTH PLANS

SEC. 2. (a)(1) Section 1310(a)(1) of the Public Health Service Act is amended, in the matter following subparagraph (B), by inserting after "such calendar quarter" the following: "the extended coverage and open enrollment required under paragraph (2), and ".

(2) Section 1310(a) of such Act is amended by redesignating paragraph (2) as paragraph (3) and inserting after paragraph (1) the following new paragraph:

"(2) The requirements of this paragraph are met only if any health benefits plan offered to such employees provides—

"(A) that any such employee who is covered by such a health benefits plan may elect to remain covered under such plan for a period of at least 90 days after such employee is involuntarily terminated (other than for cause) as such an employee, and such coverage shall be provided at the same premium (or similar charge) charged for such coverage immediately before such termination of employment;

"(B) that any employee described in subparagraph (A) may elect to remain covered under such plan for an additional period (after the period described in subparagraph (A)) of at least 90 days, but with the employee responsible for the total premium (or similar fee); and

"(C) for an open enrollment period—

"(i) of at least 30 days duration for each married employee who is (or at a previous time was) eligible to enroll under the plan and whose spouse loses coverage under a group health plan due to the involuntary termination (other than for cause) of the spouse's employment, which shall begin on the day after (or within 7 days before) the date the spouse loses such coverage; and

"(ii) the terms of which shall be the same as the terms (including any option for coverage of immediate family members) most recently offered with respect to the enrollment of that employee or (at the employer's, State's, or political subdivision's option) to newly hired or other employees similarly situated, except that such enrollment may not require or discriminate on the basis of lack of evidence of insurability and if the employee was previously covered and only exercised the option to cover immediate family members there may be no delay in the coverage of such immediate family members.".

(b) The amendments made by subsection (a) shall become effective on January 1, 1984.

BLOCK GRANTS TO STATES FOR HEALTH CARE BENEFITS FOR UNEMPLOYED WORKERS

SEC. 3. (a) Part A of title XIX of the Public Health Service Act is amended by adding at the end thereof the following:

"Subpart 2—Grants to States for Health Care Benefits for Unemployed Workers

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1910. (a) For the purpose of carrying out the provisions of this subpart, there are authorized to be appropriated $200,000,000 for fiscal year 1983, $900,000,000 for fiscal year 1984, and $700,000,000 for fiscal year 1985.

"(b) Amounts authorized under subsection (a) are authorized only if, after June 1, 1983, there is enacted an Act which increases the net revenues of the United States for fiscal year 1983, 1984, and 1985 by not less than the amounts authorized under subsection (a) for each such fiscal year.

"USE OF FUNDS

"SEC. 1910A. (a) From the amounts allotted to States under section 1910C, the Secretary shall make grants to States for use in carrying out health benefit programs for eligible individuals.

"(b) For purposes of this subpart, a health benefit plan means a plan which provides preventive health services, pregnancy, prenatal, and postpartum services, and such other health care services as the State may determine to include in the plan.

"(c)(1) For purposes of this subpart, except as provided in paragraph (3), a State must include as an eligible individual—

"(A) any individual who—

"(i) was receiving regular unemployment compensation but has exhausted his rights to such compensation with respect to his recent benefit year (as determined under applicable law) ending no earlier than January 1, 1983 and no later than September 30, 1985;

"(ii) is unemployed; and

"(iii) has been unemployed for not less than 26 weeks after the beginning of his most recent benefit year; and

"(B) the spouse and minor children of an unemployed individual described in subparagraph (A).

"(2) The State may include as eligible individuals, except as provided in paragraph (3), other individuals as the State may determine to be appropriate.

"(3) No individual shall be an eligible individual if such individual is eligible for health care under any other public program, is covered under a group health plan, or is eligible for coverage under a group health plan available to such individual by reason of the employment of the individual's spouse.

"PROVISION OF HEALTH CARE

"SEC. 1910B. A state may use funds provided under this subpart to provide health care, directly or through insurance or otherwise, for eligible individuals. The State may (but need not necessarily)—

"(1) provide partial or total payment of health insurance premiums.

"(B) establish group health insurance for unemployed workers and their families.

"(C) take into account income or assets in structuring benefits or determining premium payments, or

"(D) provide for cost-effective financing and delivery structures such as competitive bidding among carriers or providers, or capitation reimbursement systems, while taking into account the existence of related programs or financing structures in given areas.

"ALLOCATION AND PAYMENT OF FUNDS

"SEC. 1910C. (a) The Secretary shall allot the amount appropriated to carry out this subpart for any fiscal year among the States as follows:

"(1) One-third of such amount shall be allotted among the States on the basis of the relative number of unemployed individuals who reside in each State as compared to the total number of unemployed individuals in all the States.

"(2) One-third of such amount shall be allotted among the States on the basis of the relative excess number of unemployed individuals who reside in each State as compared to the total excess number of unemployed individuals in all the States. For purposes of this paragraph, the term "excess number" means the number which represents unemployed individuals in excess of 6 percent of the civilian labor force in the State.

"(3) One-third of such amount shall be allotted among the States on the basis of the relative number of individuals who have been unemployed for fifteen weeks or more and who reside in each State as compared to the total number of such individuals in all the States.

"(b) Allotments shall be made on the basis of the most recent twelve-month period, preceding the month in which the Secretary makes such allotments, for which adequate data is available.

"(c) The Secretary is authorized to reallot any amount of any allotment to a State to the extent that the Secretary determines that the State will not be able to obligate such amount within one year of allotment.

"(d) From its allotment under subsection (a), the Secretary shall make payments to each State in accordance with section 203 of the Intergovernmental Cooperation Act of 1968, for use under this subpart.

"APPLICATIONS AND REQUIREMENTS

"SEC. 1910D. (a)(1) Each State desiring to receive an allotment for any fiscal year under this subpart shall submit an application to the Secretary. Each such application shall be in such form as the Secretary shall require. Each such application shall contain assurances by the chief executive officer of the State that the State will meet the conditions enumerated in subsection (b) or incorporated by reason of subsection (c).

"(2) After the expiration of the first fiscal year for which a State receives funds under this subpart, no funds shall be allotted to such State for any fiscal year under this subpart unless such State conducts public hearings with respect to the proposed use and distribution of funds to be provided under this subpart for such fiscal year.

"(b) As part of the annual application required by subsection (a), the chief executive officer of each State shall certify that the State agrees to—

"(1) use the funds available under this subpart for the purpose of carrying out health benefit programs in accordance with the requirements of this subpart;

"(2) conduct outreach activities designed to assure that eligible individuals are made aware of the assistance provided under this subpart;

"(3) coordinate its activities under this subpart with similar and related programs administered by the Federal Government and such State; and

"(4) provide that—

"(A) in each fiscal year, the State may use for planning and administering health benefit programs under this subpart an amount not to exceed 10 per centum of its allotment under this subpart for such fiscal year; and

"(B) the State will pay from non-Federal sources the remaining costs of planning and administering the programs assisted under this subpart and will not use Federal funds for such remaining costs.

"(c) Except where inconsistent with the provisions of this subpart, the provisions of sections 1903(b), 1906, 1907, 1908, and 1909 of this part shall apply to this subpart in the same manner as they apply to subpart 1 of this part.".

(b) Part A of title XIX of the Public Health Service Act is amended—

(1) by amending the heading to such part to read as follows:

"PART A—PREVENTIVE HEALTH, HEALTH SERVICES, AND HEALTH BENEFITS FOR THE UNEMPLOYED BLOCK GRANT PROGRAMS";

(2) by inserting after the heading of such part the following:

"Subpart 1—Preventive Health and Health Services Block Grants";

and

(3) by striking out "this part" and inserting in lieu thereof "this subpart" each place it appears in sections 1902(d)(1)(A), 1902(d)(1)(B), 1904(a)(1), 1904(b), 1905(c)(1), 1905(c)(3), 1905(c)(6), 1905(c)(8), and 1905(d).

(c) The amendments made by this section shall become effective on the date of the enactment of this Act.

HEALTH PROTECTION FOR THE UNEMPLOYED

1. Increasing health protection through the private sector

a. Require continuation of coverage under an employer's group policy for at least 90 days after lay-off. Cost-sharing between employer and employee to remain as it was during the employment period.

b. Require employers to continue the unemployed worker in the employer's group for another 90 days after lay-off but with total premium cost to be borne by the laid-off employee.

c. Require employers to permit working employees to elect health insurance coverage within 30 days after spouse loses coverage due to unemployment.

d. The above requirements would not apply to small businesses with 25 or fewer employees.

e. Effective date: January 1, 1984

2. Increasing health protection through the public sector.

a. Provide a block grant to the States of $200 million for fiscal year 1983, $900 million for fiscal year 1984 and $700 million in fiscal year 1985. Authorization to be contingent upon the enactment of a revenue increase in the amount of the authorization.

b. States must use funds to provide or finance prenatal and postpartum care, pregnancy, immunizations and preventive health services. Other uses are discretionary with State.

c. Eligible persons are those with prior employment who have at least six months of unemployment and are ineligible for health insurance coverage under a spouse's group plan.

d. State has broad discretion in how to provide or finance services.●

By Mr. TOWER (for himself, Mr. GARN, Mr. HEINZ, Mr. ARMSTRONG, Mr. D'AMATO, Mr. GORTON, Mrs. HAWKINS, Mr. MATTINGLY, Mr. HECHT, Mr. TRIBLE, Mr. PROXMIRE, Mr. CRANSTON, Mr. RIEGLE, Mr. SARBANES, Mr. DODD, Mr. DIXON, Mr. SASSER, Mr. LAUTENBERG, and Mr. GRASSLEY):

S.J. Res. 98. A joint resolution to designate October 2 through October 9, 1983, as "National Housing Week"; to the Committee on the Judiciary.

NATIONAL HOUSING WEEK

● Mr. TOWER. Mr. President, today it is my pleasure to introduce Senate Joint Resolution 98, which designates the week of October 2-9, 1983, as "National Housing Week."

In all economic recoveries one of the earliest and most consistent signs of renewed vigor in the commercial and industrial sectors occurs in the area of housing construction. Total housing starts in the first quarter of this year, currently at a 1.7 million unit annual rate, are nearly twice the level of just 1 year ago. And, this marks the highest level in 3½ years. Starts in the single-family sector are up 83 percent over a similar period in 1982, with first quarter housing permits being up 80 percent over first quarter 1982.

Mr. President, it is my understanding—based on analysis provided my Subcommittee on Housing and Urban Affairs—at this stage of the business cycle, five quarters from the housing trough of October 1981, that this is the strongest housing recovery since World War II. The some-95-percent gain in total home starts since those dark days of October 1981 is nearly twice the 49-percent increase which was generated in the comparable five-quarter period of the best previous housing recovery—that of 1975-76. Furthermore, Mr. President, the current upturn substantially exceeds the 55-percent increase in housing starts achieved during the entire period of the average of the seven postwar recoveries.

The best possible service that the Congress and this administration can provide the housing industry and the economy in general is to continue to fight and win on the inflation front and in the reduction of massive Federal budget deficits. Lower inflationary expectations will cause further reduction in long- and short-term rates. This is what will return our Nation to work, recoup the purchasing power of our dollar, and make our homes affordable.

Mr. President, I urge my colleagues to join in supporting this resolution which pays tribute to those homebuilders and all those related industries and tradesmen who continue to lead our economy forward.●

● Mr. D'AMATO. Mr. President, I am proud to cosponsor this resolution which so aptly credits this Nation's housing industry for its strong leadership in promoting the economic health and well-being of this country. Perhaps no other industry can give us a

more accurate indication of our economy's performance than can the housing industry. Thus, Mr. President, when the housing industry prospers, America prospers. America prospers in jobs, tax revenues, and in the fulfillment of the American dream of homeownership.

The housing industry has repeatedly demonstrated its faith in the recovery of America by investing in its future. Thus, it is important and appropriate, Mr. President, that the Congress, in return, demonstrate its support for the housing industry by passage of this resolution declaring October 2-9, 1983 "National Housing Week."●

ADDITIONAL COSPONSORS

S. 137

At the request of Mr. ROTH, the name of the Senator from New Hampshire (Mr. RUDMAN) was added as a cosponsor of S. 137, a bill to amend the Internal Revenue Code of 1954 to continue to allow mortgage bonds to be issued.

S. 212

At the request of Mr. PRESSLER, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 212, a bill to authorize funds for the U.S. Travel and Tourism Administration.

S. 402

At the request of Mr. MOYNIHAN, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 402, a bill to reenact the Emergency School Aid Act.

S. 553

At the request of Mr. HART, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of S. 553, a bill to authorize a national program of improving the quality of education.

S. 688

At the request of Mr. HATFIELD, the names of the Senator from New Hampshire (Mr. RUDMAN), the Senator from Connecticut (Mr. WEICKER), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 688, a bill to provide that unless the Government of El Salvador actively participates in negotiations with all major parties to the conflict which are willing to participate unconditionally in negotiations for the purpose of achieving a cease-fire and an equitable political solution to hostilities, U.S. military support for El Salvador shall be terminated, with military assistance funds to be transferred for use for development and humanitarian assistance.

S. 786

At the request of Mr. PRESSLER, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 786, a bill to amend title 38, United States Code, to establish a service-connection presumption for certain diseases caused by exposure to herbicides or other environmental hazards or conditions in veterans who served in Southeast Asia during the Vietnam era.

S. 1144

At the request of Mr. HEINZ, the name of the Senator from Ohio (Mr. GLENN) was added as a cosponsor of S. 1144, a bill to suspend periodic reviews of disability beneficiaries having mental impairments pending regulatory reform of the disability determination process.

S. 1145

At the request of Mr. DENTON, the names of the Senator from New Mexico (Mr. DOMENICI), the Senator from Rhode Island (Mr. PELL), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 1145, a bill to recognize the organization known as the Catholic War Veterans of the United States of America, Inc.

S. 1159

At the request of Mr. HATFIELD, the names of the Senator from Louisiana (Mr. JOHNSTON), the Senator from Rhode Island (Mr. PELL), and the Senator from New York (Mr. D'AMATO) were added as cosponsors of S. 1159, a bill to amend the Export Administration Act of 1979 to extend the provisions relating to the export of domestically produced crude oil.

SENATE JOINT RESOLUTION 42

At the request of Mr. MURKOWSKI, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mrs. HAWKINS), the Senator from Illinois (Mr. DIXON), the Senator from North Carolina (Mr. HELMS), the Senator from Texas (Mr. BENTSEN), the Senator from North Dakota (Mr. BURDICK), the Senator from Georgia (Mr. MATTINGLY), the Senator from North Dakota (Mr. ANDREWS), the Senator from New Mexico (Mr. DOMENICI), the Senator from Oregon (Mr. HATFIELD), the Senator from Indiana (Mr. LUGAR), the Senator from New York (Mr. D'AMATO), the Senator from Georgia (Mr. NUNN), the Senator from Montana (Mr. MELCHER), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of Senate Joint Resolution 42, a joint resolution designating Alaska Statehood Day, January 3, 1984.

SENATE JOINT RESOLUTION 45

At the request of Mr. BURDICK, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of Senate Joint Resolution 45, a joint resolution designating November 20 through 26, 1983, as "National Family Week."

SENATE JOINT RESOLUTION 93

At the request of Mr. EAST, the name of the Senator from Minnesota (Mr. DURENBERGER) was added as a cosponsor of Senate Joint Resolution 93, a joint resolution to designate the month of September each year as "National Sewing Month."

SENATE JOINT RESOLUTION 96

At the request of Mr. DECONCINI, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of Senate Joint Resolution 96, a joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

SENATE JOINT RESOLUTION 97

At the request of Mr. BOSCHWITZ, the names of the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Delaware (Mr. ROTH) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of members of the Armed Forces of the United States and the allied forces who served in the Korean war.

SENATE CONCURRENT RESOLUTION 24

At the request of Mrs. HAWKINS, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of Senate Concurrent Resolution 24, a concurrent resolution expressing the sense of the Congress that the people of the United States should observe the month of May 1983 as Older Americans Month.

SENATE RESOLUTION 52

At the request of Mr. CHAFEE, the name of the Senator from New York (Mr. D'AMATO) was added as a cosponsor of Senate Resolution 52, a resolution expressing the Senate's opposition to an imposition of a fee on domestic and imported crude oil and refined products.

SENATE RESOLUTION 133

At the request of Mr. MOYNIHAN, the names of the Senator from North Dakota (Mr. BURDICK), and the Senator from Connecticut (Mr. DODD) were added as cosponsors of Senate Resolution 133, a resolution to express the sense of the Senate in support of "Solidarity Sunday."

SENATE CONCURRENT RESOLUTION 33—HARRY S TRUMAN CENTENNIAL

Mr. EAGLETON (for himself and Mr. DANFORTH) submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration:

S. CON. RES. 33

Whereas the year 1984 marks the one hundredth anniversary of the birth of Harry S Truman on May 8, 1884;

Whereas Harry S Truman was born and reared in rural Missouri, enjoyed a boyhood reminiscent of Huckleberry Finn's, graduated from high school, made his living for a

decade on a farm behind a plow, joined the Army in the First World War, and, as a captain, led Battery D, 129th Field Artillery, 35th Division, in combat in the Meuse-Argonne and at Verdun;

Whereas he served for a decade as judge (commissioner) of Jackson County, Missouri, and among other responsibilities, oversaw the building of some of the first paved roads around Kansas City;

Whereas he was elected to the United States Senate and took his seat in 1935, serving as a member of the Senate Appropriations, Military Affairs, and Interstate and Foreign Commerce Committees, was instrumental in writing major pieces of legislation, including the Civil Aeronautics Act of 1938 and the Transportation Act of 1940, proposed and served as chairman of the Senate Special Committee to Investigate the National Defense Program (the "Truman Committee"), which was estimated to have saved taxpayers billions of dollars on war contracts;

Whereas under Franklin D. Roosevelt, he served as Vice-President of the United States from January 20, 1945, to April 12, 1945;

Whereas upon the death of Roosevelt on April 12, 1945, Harry S Truman was sworn in as President of the United States at the climax of the Second World War and with almost no preparation for the historic military and diplomatic problems that were piling up on the United States, including the question of using the atomic bomb to end the war against Japan quickly so as to save Japanese and American lives in the end;

Whereas with modesty, courage, and common sense he took up the cause of opposing Soviet expansion in Eastern Europe, the Balkans, the Black Sea Straits, and Iran, directed that, despite Roosevelt's sudden death, the United Nations Conference on International Organization meet in San Francisco as scheduled to establish the United Nations, and successfully recommended that the Senate approve ratification of the Charter, bringing the United States into the United Nations;

Whereas he presided over the turbulent task of postwar reconversion of the economy from wartime to a peacetime production, obtained passage of the landmark Employment Act of 1946 that declared that "it is the continuing policy and responsibility of the Federal Government to use all practical means . . . functions and resources" to foster "maximum employment, production and purchasing power", prevailed upon Congress to pass the National Housing Act of 1949 to provide low-cost housing and slum clearance, won a bitter battle in Congress to keep control of nuclear weapons in civilian hands, introduced legislation for national medical insurance that was the forerunner of Medicare, which has assured adequate medical treatment for millions of Americans, unified the armed forces in a new Department of Defense and created modern new organs of government, including the Council of Economic Advisers, the National Security Council, and the Central Intelligence Agency;

Whereas he directed that the United States be the first nation to recognize the new State of Israel in 1948 and began the special relationship that has existed between Americans and Israelis;

Whereas he ordered the racial desegregation of the Armed Services in 1948 and the same year submitted to Congress the first presidential special message on civil rights, based on a report To Secure These Rights, which proved to have laid out the agenda for the civil rights reforms of the 1960's;

Whereas by his decision to institute an airlift at the time of the Soviet blockade of Berlin in 1948 and 1949, he balked an attempt by the Kremlin to dominate all of Germany, if not of Europe;

Whereas under his policies the former enemy states of Japan and Germany (West Germany at least) were brought into a friendly and constructive relationship with the United States;

Whereas in 1950, he resolutely drew the line against further Communist expansionism and upheld the ideal of collective security by committing American forces—later joined by those of other members of the United Nations—to throw the invading North Korean Communist army back to the 38th parallel in Korea, preserving South Korea, still a steadfast ally; and

Whereas he took as his slogan "The Buck Stops Here" and said in his farewell address of January 15, 1953, "I have tried to give it everything that was in me" and left office, after virtually two full terms, with employment and prosperity high and the Western world firmly allied against possible Communist aggression: Now, therefore be it

Resolved by the United States Senate (the House of Representatives concurring), that (a) in order to provide for an appropriate commemoration by the Congress of the centennial of the birth of Harry S Truman, thirty-third President of the United States of America, there is established a Special Joint Committee on Arrangements (hereinafter referred to in this concurrent resolution as the "joint committee") which shall be composed of sixteen members as follows:

(1) The President pro tempore of the Senate and the Speaker of the House of Representatives.

(2) Seven Members of the Senate to be appointed by the President pro tempore of the Senate, four upon recommendation of the majority leader of the Senate and three upon recommendation of the minority leader of the Senate.

(3) Seven Members of the House of Representatives to be appointed by the Speaker of the House of Representatives, three upon recommendation of the minority leader of the House of Representatives.

(b) The members of the joint committee shall select a chairman and a vice chairman from among its members. A majority of the members shall constitute a quorum for the transaction of business. Any vacancy in the membership of the joint committee shall be filled in the same manner in which the original appointment was made.

(c) For the purposes of paragraph 4 of rule XXV of the Standing Rules of the Senate, service of a Senator as a member or chairman of the joint committee shall not be taken into account.

SEC. 2. It shall be the duty of the joint committee to—

(1) make arrangements for a joint meeting of the Congress to be held on Tuesday, May 8, 1984, or such other day as may be designated by the Speaker of the House of Representatives, in the Hall of the House of Representatives in commemoration of the centennial of the birth of Harry S Truman;

(2) plan the proceedings of and issue appropriate invitations for such joint meeting; and

(3) coordinate the joint committee's arrangements with the activities of the Truman Centennial Committee, Washington, D.C.

SEC. 3. The joint committee may—

(1) appoint an Executive Director, who shall serve without compensation, and accept such other volunteer services of individuals as it deems appropriate;

(2) adopt rules respecting its organization and procedures; and

(3) sit and act at such times and places as it shall deem appropriate.

SEC. 4. The expenses of the joint committee under this concurrent resolution may not exceed $25,000 and shall be paid from the contingent fund of the House of Representatives upon vouchers approved by the chairman of the joint committee.

● Mr. EAGLETON. Mr. President, today I am introducing along with my colleague from Missouri, Senator DANFORTH, a very special Senate concurrent resolution. This resolution marks the beginning of a year of celebration commemorating the birth of Harry S Truman.

As a Missourian, a Democrat, and a friend of Harry S Truman, it is with great pride and honor that I ask the other Members of the House and Senate to join with me in setting aside a special day in Congress to remember our 33d President of the United States.

Next year—May 8, 1984—marks the centennial of a great President, and I hope we will put much thought and planning into honoring the legacy of this plain-spoken man who historians regard as one of the most decisive and courageous Presidents ever to hold the office. Following in the footsteps of the revered F. D. R., few people at the time thought Harry Truman as anything but a weak and transient caretaker. But, they underestimated the feisty man from Missouri, who proceeded to leave his own indelible mark on history by showing the courage to bring the war to an end, the wisdom to rebuild peace through the Marshall plan, and the dogged determination to see that all Americans shared in the prosperity that followed.

Congress this week took an important first step in remembering Harry S Truman, by completing action on the Harry S Truman National Historic Site. The bill, just passed, authorizes the Secretary of the Interior officially to acquire the former residence at 219 Delaware Street in Independence, Mo.

On April 22, I had the great pleasure of getting a "sneak preview" of the house, which is now being renovated by the National Park Service as a result of special appropriations last year. I was able to see how President Harry Truman and his beloved Bess lived and to view the personal mementos of the career of the greatest Missourian. As a result of Congress work, the Truman home will be opened next year as part of the Truman Centennial.

In addition to the home and the special session of Congress, Senator DANFORTH and I have introduced S. 1213, a bill to direct the U.S. Postal Service to

issue a special postage stamp in commemoration of the 100th anniversary of Harry S Truman's birth.

I look forward to May 8, 1984, as more than an occasion to celebrate a great President's centennial. Far more, it is a chance to rededicate ourselves to the things Harry S Truman stood for all his life—concern that working people of this country get a fair deal out of life; an insistence on facing up to problems no matter how difficult they are; and the courage and honesty to tell it like it is.

Mr. President, I look forward to working with every Member of the Senate in the year ahead in making Harry S Truman's centennial a very meaningful one.●

● Mr. DANFORTH. Mr. President, it is Missouri's honor, and our own, to prepare for the observance of the centennial of the birth of Harry S Truman. In order that the remarkable qualities and accomplishments of President Truman be recognized, I join today with Senator EAGLETON, Congressman IKE SKELTON of Missouri, and others, to introduce a concurrent resolution establishing May 8, 1984, as the date of a special joint session of the Congress.

It will be recalled that the Nation's 33d President had the following words for a student who asked if he had mellowed after leaving the White House:

They are trying to make an elder statesman of me, but they will never succeed.

He is the fellow who arose to accept an award after a number of laudatory speeches about his accomplishments:

You don't know how overcome I am. You don't know how difficult it is to be present at your own funeral and still be able to walk around.

It is our privilege, then, to honor a man who, in life, carried his own greatness with unfailing humor and modesty.

It is with terrific enthusiasm that I join in inaugurating the centennial year celebration. Next year will be a time of great pride for Missouri, and an opportunity for the Nation to remember the signal accomplishments of the President and the inspiring qualities of the individual. I know, too, that President Truman would take delight in knowing that I was taking part in the centennial—time and time again, I will find myself surrounded by Missouri Democrats and utterly outnumbered, just the situation that President Truman considered most appropriate for a Republican. Let me tell you, I could not feel more at home. I have spent 15 years learning how to feel outnumbered.

To give proper honor to the greatness of Harry Truman, it seems to me, we should think first of the kind of person each of us would like to be. If we were as good as we would wish, we would have courage. We would have modesty and humor and plain speech. We would act with dedication to basic principles.

There is no greater and no more inspiring model of these virtues than Harry S Truman.

He had what it took to step before a crowd in Lee's Summit for his first political speech, when he was so scared he could not say a word. He had what it took when, in his words, the death of President Roosevelt made him feel like the moon, the stars, and all the planets had fallen on him. When it was his duty to protect the postwar world from the expansionist impulses of the Soviet Union, he summoned the same courage.

In his farewell address to the American people in January 1953, he spoke with the modesty so affectionately remembered by Missourians:

When Franklin Roosevelt died, I felt there must be a million men better qualified than I, to take up the Presidential task. But the work was mine to do, and I had to do it. And I have tried to give it everything that was in me.

Finally, there is the perfect clarity of Harry Truman's basic principles. He knew that this Nation and its institutions are good, and that Nazi and Soviet totalitarianism are evil. He knew it, he said it, and he made the right decisions in a terribly dangerous and uncertain world. He believed that government has a positive obligation to the people. Hence, the construction of paved roads around Kansas City, the desegregation of the Armed Forces and so many other of his accomplishments as President. Hence, I believe, his affection for Abraham Lincoln.

Courage, intelligence, modesty, humor, dedication . . . a person who gave everything he had to the most difficult job in the world.

I look forward to the passage of the concurrent resolution that we introduce today, to the coming celebration of the Truman Centennial, and to the opportunity for Americans to renew their love and appreciation of the man from Independence, Mo.●

SENATE RESOLUTION 138—RELATING TO THE EXPENSES OF THE COMMISSION ON ARTS AND ANTIQUITIES

Mr. BAKER (for himself, Mr. BYRD, Mr. MATHIAS, and Mr. FORD) submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 138

Resolved, That, effective with respect to the fiscal year 1983 and each fiscal year thereafter, the amount authorized to be expended out of the contingent fund of the Senate under section 5 of Senate Resolution 382, 90th Congress, agreed to October 1 (legislative day, September 24), 1968, is increased to $22,500.

SENATE RESOLUTION 139—REJECTING THE PROPOSAL TO ABOLISH THE SENATE COMMITTEE ON VETERANS' AFFAIRS

Mr. ZORINSKY submitted the following resolution; which was referred to the Committee on Rules and Administration:

S. RES. 139

Whereas the Committee on Veterans' Affairs of the Senate was established pursuant to the Legislative Reorganization Act of 1970 as a standing committee of the Senate to facilitate action on the substantial workload of the Senate in addressing the needs of veterans of service in the Armed Forces of the United States;

Whereas the Committee on Veterans' Affairs of the Senate performs a vital function in the Senate by providing the legislative effort and expertise that is necessary to meet the needs of our Nation's veterans;

Whereas on April 5, 1983, the Study Group on Senate Practices and Procedures appointed pursuant to Senate Resolution 392, agreed to on May 11, 1982, submitted its draft report to the Committee on Rules and Administration of the Senate;

Whereas Recommendation Number 15 of such report proposes that the Committee on Veterans' Affairs of the Senate be merged with the Committee on Armed Services of the Senate and cease to exist as a separate standing committee of the Senate;

Whereas a merger of the Committee on Veterans' Affairs of the Senate with the Committee on Armed Services of the Senate would increase the workload of the Committee on Armed Services of the Senate extensively while diluting the resources available to address legislation relating to veterans' needs; and

Whereas a merger of the Committee on Veterans' Affairs of the Senate with the Committee on Armed Services of the Senate or with any other standing committee of the Senate is unlikely to result in equal or improved legislative service to the Senate or to the Nation's veterans: Now, therefore, be it

Resolved, That the proposal to abolish the Committee on Veterans' Affairs of the Senate as a standing committee of the Senate by merging it with the Committee on Armed Services of the Senate (included in the draft report submitted by the Study Group on Senate Practices and Procedures to the Committee on Rules and Administration of the Senate on April 5, 1983) is disapproved, and the Committee on Veterans' Affairs of the Senate shall continue to be a separate standing committee of the Senate.

Mr. ZORINSKY. Mr. President, today I am submitting a resolution to reject the Senate Study Group proposal to abolish the Senate Committee on Veterans' Affairs as a separate standing committee by merging it with the Committee on Armed Services, and to affirm that the Committee on Veterans' Affairs should continue to function in its present capacity as a separate standing committee.

The Study Group on Senate Practices and Procedures—henceforth, the Senate Study Group—has conducted an examination of the operation of the Senate pursuant to Senate Resolu-

tion 392, agreed to on March 11, 1982. Its goal was:

To make a full and complete study of the practices and procedures of the U.S. Senate with a view to recommending to the Senate such revisions thereof as may be necessary or appropriate to preserve and enchance the traditions, customs, functions, forms, and spirit of the U.S. Senate while enabling the Senate to conduct debate which is focused on major issues of national policy.

The study group has completed its examination and submitted its report to the Rules and Administration Committee.

Mr. President, the aspect of the report prompting my resolution is recommendation 15 that proposes, among other things, that the Veterans' Affairs Committee cease to exist as a separate standing committee and merge its functions with the Armed Services Committee.

Let me begin by expressing my deep respect and admiration for the two former Members of the Senate that comprise the Senate Study Group, Senator Pearson and Senator Ribicoff. Thanks to their investigation, drawing on their experience as esteemed Members of this body, these distinguished gentlemen have done a great service to the Senate and to the citizens of the Nation in recommending a number of changes to streamline the processes of the Senate. A number of the study group's proposals seem very promising, and I look forward to further consideration of various aspects of the report. However, when it comes to eliminating the Veterans' Affairs Committee as the group has proposed, I am afraid my revered colleagues and I must part ways.

Mr. President, I will not take up space on this record recounting the history of the various vehicles by which the Senate has addressed the legislative concerns of our country's military veterans in the past before consolidating these functions with the Veterans' Affairs Committee pursuant to Public Law 91-510, the Legislative Reorganization Act of 1970. The important point is that, since its inception, the Veterans' Affairs Committee has rendered the outstanding service that is required to properly address the needs of the former members of our military. It is this concentration of effort, expertise, and unity of purpose that has allowed the Veterans' Affairs Committee to discharge the Senate's responsibilities for the unique and varied needs of veterans so well.

Mr. President, I have always strongly advocated increased efficiency in Government and Government spending, so I genuinely appreciate the reasoning behind the group's merger proposal. But in making decisions to streamline the Senate, we must not lose sight of the fact that we have certain jobs to do, certain duties that must be done, and one of those duties is to adequately provide for the needs of those who have served their country's national defense. I do not believe that this duty will be discharged any more efficiently, or even as well, by eliminating the Veterans' Affairs Committee and dumping its functions on the Armed Services Committee. This is in no way meant to denigrate the abilities of my distinguished colleagues on the Armed Services Committee, of course.

Quite to the contrary, I am sure we all agree that the Senators and staff of Armed Services discharge their important duties with exemplary diligence and dispatch. That is part of my point: Armed Services should be allowed to continue performing the monumental task of overseeing the national defense without taking on the additional duties currently discharged by Veterans' Affairs. To merge committees as is proposed would eliminate one committee that is functioning quite well while diluting the time, resources, and concentration of another committee that is also functioning well under its current structure. I think that any gains to be made by a merger would be more than offset by the problems inherent in such a move. I call to mind the sage advice, if it is not broke, do not fix it.

Mr. President, I hope my colleagues in the Senate will appreciate as I do the importance of the separate standing committee to address the needs of our veterans, and will reject this proposal. I thank you and I will appreciate my colleagues' consideration of these comments.

AMENDMENTS SUBMITTED

COMPREHENSIVE CRIME CONTROL ACT

EAST AMENDMENT NO. 1254

(Referred to the Committee on the Judiciary.)

Mr. EAST submitted an amendment intended to be proposed by him to the bill (S. 829) entitled the "Comprehensive Crime Control Act of 1983"; as follows:

Delete Title VI and insert in lieu thereof the following Title: "Title VI—Reform of Federal Intervention in State Proceedings".

SEC. 601. This title may be cited as the "Habeas Corpus Reform Act of 1983."

SEC. 602. Section 2254(a) of title 28, United States Code, is amended to read as follows:

"(a) The Supreme Court, a Justice thereof, a circuit judge, or a district court shall entertain an application for a writ of habeas corpus on behalf of a person in custody pursuant to a judgment of a State court only on a ground which presents a substantial Federal constitutional question, and then only if—

"(1) it was not previously raised and determined,

"(2) there has been no fair and adequate opportunity to raise it and have it determined, and

"(3) it cannot thereafter be raised and determined in a proceeding in the State court, by an order or judgment subject to review by the Supreme Court of the United States on a writ of certiorari.".

SEC. 603. Section 636(b)(1)(B) of title 28, United States Code, is amended to read as follows:

"(B) a judge may also designate a magistrate to conduct hearings, including evidentiary hearings, except evidentiary hearings in cases brought pursuant to section 2254 of this title, and to submit to a judge of the court proposed findings of fact and recommendations for the disposition, by such judge, of any motion excepted in subpargraph (A), of applications for post trial relief made by individuals convicted of criminal offenses and of prisoner petitions challenging conditions of confinement.".

FIRST CONCURRENT RESOLUTION ON THE BUDGET

MITCHELL (AND SASSER) AMENDMENT NO. 1255

Mr. MITCHELL (for himself and Mr. SASSER) proposed an amendment to the concurrent resolution (S. Con. Res. 27) revising and replacing the congressional budget for the U.S. Government for the fiscal year 1983, and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986; as follows:

On page 14, increase the figure on line 23 by $200,000,000.

On page 14, increase the figure on line 24 by $20,000,000.

On page 15, increase the figure on line 6 by $200,000,000.

On page 15, increase the figure on line 7 by $70,000,000.

On page 15, increase the figure on line 13 by $200,000,000.

On page 15, increase the figure on line 14 by $170,000,000.

MELCHER (AND OTHERS) AMENDMENT NO. 1256

Mr. MELCHER (for himself, Mr. DECONCINI, Mr. RANDOLPH, Mr. BURDICK, Mr. HUMPHREY, Mr. BAUCUS, and Mr. EXON) proposed an amendment to the concurrent resolution Senate Concurrent Resolution 27, supra; as follows:

At the appropriate place in the resolution, add the following new section:

"SEC. . Since, even with the changes that the Senate Budget Committee has made in the President's budget, the federal budget will contain deficits totaling $647.5 billion over the life of this resolution and the public debt will likely grow to almost $2 trillion in 1986; and,

Since such deficits could increase interest rates, unemployment, halt economic recovery and lead to further recession; and,

Since foreign aid spending for fiscal year 1984 is 108 percent higher than it was in 1979 while, for the same period, veterans' benefits and health care spending will have increased only 29 percent; natural resources

and environment spending will have gone up 3 percent; health, 55 percent; and transportation 48 percent; and education, training, employment and social services actually dropped 9 percent; and community and regional development dropped 14 percent, proving that foreign aid has not been subject to the same budget restraints as domestic spending; and,

Since U.S. international food aid, distributed under Public Law 480, is heavily concentrated in concessionary food sales to foreign governments under Titles I and III, which comprise 75 percent of the current program, while food donations through Churches, charitable groups, and other organizations, which is a more effective way to feed the hungry, comprise only 25 percent of our food aid; and

Since new contributions to the International Monetary Fund would be used to provide funds to developing countries to cover interest payments on loans made by international banks at high interest rates, and to provide funds to developing countries for the purpose of subsidizing exports which unfairly compete with U.S. products on the world market, costing tens of thousands of American jobs, are excessive;

Therefore, notwithstanding any other provision of the resolution, for Function 150, budget authority for fiscal year 1983 shall be $19.8 billion and budget outlays for fiscal year 1983 shall be $11.5 billion. For fiscal year 1984, fiscal year 1985, and fiscal year 1986, budget authority shall be $12.5 billion and budget outlays shall be $10 billion. further, it is the sense of the Senate that, notwithstanding any of the budgetary limits placed on Function 150, the United States shall continue to meet the financial commitments made to Israel and Egypt in conjunction with the Camp David Accords."

DANFORTH (AND LEAHY) AMENDMENT NO. 1257

Mr. DANFORTH (for himself and Mr. LEAHY) proposed an amendment to the concurrent resolution, Senate Concurrent Resolution 27, supra; as follows:

At the bottom of page 35, add the following:

SEC. 7. (a) The Congress finds that—

(1) the world economy is suffering from global recession, and development prospects in the Third World have plummeted;

(2) the continuing deterioration of economic conditions aggravates the problems of hunger and poverty, which are daily facts of life for millions of people in developing countries;

(3) these economic conditions threaten the political stability of developing countries;

(4) the economic well-being and security of the United States is closely linked to that of the rest of the world; and

(5) both bilateral development aid provided by the United States and multilateral development aid provided by the United States in cooperation with other nations have proven to be effective tools in promoting economic growth and eliminating hunger, poverty, illness, and ignorance.

(b) It is the sense of the Senate that—

(1) increased emphasis should be given to long-term development concerns in the allocation of United States foreign aid; and

(2) the United States Government should maintain and increase its commitments to multilateral as well as bilateral development aid.

MOYNIHAN (AND OTHERS) AMENDMENT NO. 1259

(Ordered to lie on the table.)

Mr. MOYNIHAN (for himself, Mr. STAFFORD, Mr. LEAHY, Mr. RANDOLPH, Mr. MITCHELL, Mr. HUMPHREY, Mr. BRADLEY, Mr. HART, Mr. LEVIN, Mr. RIEGLE, Mr. SARBANES, Mr. CRANSTON, Mr. RUDMAN, Mr. KENNEDY, Mr. LAUTENBERG, Mr. INOUYE, Mr. DODD, Mr. JACKSON, and Mr. BURDICK) submitted an amendment intended to be proposed by them to the amendment proposed by Mr. DOMENICI (Amendment No. 1243) to the concurrent resolution, Senate Concurrent Resolution 27, supra, as follows:

On page 3 line 18 increase the number by $300,000,000.

On page 3 line 19 increase the number by $300,000,000.

On page 3 line 23 increase the number by $200,000,000.

On page 3 line 24 increase the number by $300,000,000.

On page 4 line 1 increase the number by $200,000,000.

On page 4 line 2 increase the number by $300,000,000.

On page 4 line 6 increase the number by $200,000,000.

On page 4 line 7 increase the number by $500,000,000.

On page 4 line 12 increase the number by $200,000,000.

On page 4 line 13 increase the number by $300,000,000.

On page 9 line 3 increase the number by $300,000,000.

On page 9 line 4 increase the number by $200,000,000.

On page 9 line 9 increase the number by $300,000,000.

On page 9 line 10 increase the number by $300,000,000.

MOYNIHAN (AND OTHERS) AMENDMENT NO. 1260

(Ordered to lie on the table.)

Mr. MOYNIHAN (for himself, Mr. STAFFORD, Mr. LEAHY, Mr. RANDOLPH, Mr. MITCHELL, Mr. HUMPHREY, Mr. BRADLEY, Mr. HART, Mr. LEVIN, Mr. RIEGLE, Mr. SARBANES, Mr. CRANSTON, Mr. RUDMAN, Mr. KENNEDY, Mr. LAUTENBERG, Mr. INOUYE, Mr. DODD, Mr. JACKSON, and Mr. BURDICK) submitted an amendment intended to be proposed by them to the concurrent resolution, Senate Concurrent Resolution 27, supra, as follows:

On page 3 line 13 increase the number by $300,000,000.

On page 3 line 14 increase the number by $300,000,000.

On page 3 line 15 increase the number by $300,000,000.

On page 3 line 19 increase the number by $200,000,000.

On page 3 line 20 increase the number by $300,000,000.

On page 3 line 21 increase the number by $300,000,000.

On page 4 line 1 increase the number by $200,000,000.

On page 4 line 2 increase the number by $300,000,000.

On page 4 line 3 increase the number by $300,000,000.

On page 4 line 7 increase the number by $200,000,000.

On page 4 line 8 increase the number by $500,000,000.

On page 4 line 9 increase the number by $800,000,000.

On page 4 line 14 increase the number by $200,000,000.

On page 4 line 15 increase the number by $300,000,000.

On page 4 line 16 increase the number by $300,000,000.

On page 10 line 9 increase the number by $300,000,000.

On page 10 line 10 increase the number by $200,000,000.

On page 10 line 15 increase the number by $300,000,000.

On page 10 line 16 increase the number by $300,000,000.

On page 10 line 21 increase the number by $300,000,000.

On page 10 line 22 increase the number by $300,000,000.

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Senate Committee on Governmental Affairs will hold a nomination hearing for Stephen Eilperin to be an associate judge of the D.C. Superior Court on Monday, May 17, at 2 p.m., in room SD 342 of the Dirksen Senate Office Building. For further information, please contact Ms. Margaret Hecht at 224-4751.

Mr. President, the Senate Committee on Governmental Affairs will hold a hearing on Oversight of the Management of the Department of Defense: Implementation of Cost Accounting Standards on Thursday, May 19, at 9:30 a.m., in room SD 342 of the Dirksen Senate Office Building. For further information, please contact Mr. Lincoln Hoewing at 224-4751.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Thursday, May 12, at 10 a.m., to mark up foreign aid.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, May 12, at 10 a.m., to hold a continuation of hearings on trade reorganization.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Thursday, May 12, at 2 p.m., to consider the nomination of

David Martin for the position of Director of the Office of Government Ethics.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON GOVERNMENTAL EFFICIENCY AND THE DISTRICT OF COLUMBIA

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Subcommittee on Governmental Efficiency and the District of Columbia of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, May 11, to hold a hearing on the District of Columbia School System Career Oriented Curriculum.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

BALANCED BUDGET—SPENDING FREEZE PROPOSAL

● Mr. HATCH. Mr. President, last week I introduced a substitute Federal budget proposal for a modified spending freeze constituting the first step to achieving a balanced budget by 1989.

The Heritage Foundation has prepared an excellent analysis of why my proposed budget is essential for sustained economic recovery. The analysis supports the dual measures of this proposal—cutting the burden of excessive Federal spending on the economy and holding the line on taxes—necessary for attaining a balanced budget. I ask that it be printed in the RECORD.

The analysis follows:

THE HATCH-GRAMM BALANCED BUDGET—SPENDING FREEZE PROPOSAL

INTRODUCTION

The House and Senate Budget Committees apparently have short memories. They have produced budgets that are tired reruns of the 1970s—calling once again for more spending and more taxes. This is precisely the bitter brew that created the nation's painfully high inflation and high unemployment. The 1970s should teach us that high taxes and unrestrained spending are not the means to a healthy and stable economy. This end is promised by the Balanced Budget-Spending Freeze advocated by conservatives Senator Orrin Hatch (Utah) and Congressman Phil Gramm (Texas). The Hatch-Gramm budget would lead to a balanced budget by 1989.

The proposal calls for $836 billion in outlays in fiscal year 1984—$13 billion less than the Senate Budget Committee (SBC), $31 billion less than the House Budget Committee (HBC), and $8 billion less than the President's budget. The proposal would freeze income taxes over the next five years—compared with the $30 billion in new taxes in 1984 alone, favored by the House and Senate Budget Committees.

The budget freeze requires compromise from all Americans and interest groups for the sake of fiscal austerity necessary for continued economic recovery. The budget would freeze non-defense discretionary spending at nominal levels for three years, allow entitlements to grow at the rate of inflation, leave untouched the new Social Security package, and allow for only a 7 percent increase in defense budget authority in fiscal year 1984, tapering down to 4 percent in the following years.

The proposal faces rough going on the Hill and in the White House. Many congressional Democrats would prefer to balance the budget on the backs of the taxpayers by repealing the third year of the tax cut and tax indexing. Moderate Republicans, on the other hand, are wary of the proposal because they fear that Congress will not deliver the fiscal austerity necessary to achieve the plan's spending and projected growth levels.

The Hatch-Gramm proposal is the only budget which recognizes the true danger in the federal budget—that total Federal spending, not deficits, is responsible for low economic growth. Raising taxes will reduce individual incentives and encourage further wasteful spending, killing the economic recovery now under way.

HOW THE BALANCED BUDGET-SPENDING FREEZE WOULD WORK

The proposal is a modified spending freeze. Rather than attempting a freeze in nominal (or current) dollars, the proposal aims to achieve a freeze in "real" terms. Allowing for growth in defense and entitlements programs, aggregate spending under the plan will increase about 5 percent annually during the next five years, roughly equal to inflation.

The budget makes few programmatic assumptions. Instead, it sets specific growth rates for groups of programs, such as nondefense discretionary spending, entitlements, and defense. This leaves spending priorities to congressional discretion, so long as they remain within the guidelines.

TOTAL FEDERAL OUTLAYS

[In billions of dollars]

	Fiscal year				
	1984	1985	1986	1987	1988
SBC	851	913	969	1,040	1,109
Hatch-Gramm	836	877	922	976	1,037
President	843	907	973	1,044	1,112

Note: These figures are based on the latest CBO computer analysis. They are subject to change. SBC is Senate Budget Committee, Hatch-Gramm is budget freeze, and President is President Reagan.

Source: Senate Budget Committee.

Non-defense discretionary spending would be frozen at current nominal levels for three years, then allowed 3 percent nominal growth per year. This would save $8 billion in fiscal year 1984 and $101 billion over five years. Several Heritage Foundation studies have demonstrated that this target is reasonable since large spending cuts could be accomplished by reducing subsidies to businesses and wealthy individuals, restructuring the delivery of public services through privatization and devolving functions to the states.[1]

Two of the most sensitive entitlement programs, unemployment insurance and social security (the single largest program in the budget) would not be frozen. Aggregate spending for other entitlement programs would grow at the rate of inflation for three years, then at the rate of inflation plus 3 percent.

While keeping pace with inflation, however, a "real" entitlements freeze, of the type proposed, would mean $2 billion in aggregate program cuts from the fiscal year 1984 Congressional Budget Office baseline (the budget resulting from a continuation of current policy) and $79 billion in cuts over the next five years, since new beneficiaries meeting the eligibility criteria would otherwise boost the budget total.

Despite these imposing numbers, significant savings could be effected with minimal loss in essential services to the truly needy. Reducing the cost-of-living (COLA) benefits or lowering income eligibility requirements are two obvious methods of slowing benefits growth and limiting welfare to the truly needy. Heritage Foundation studies have presented other more efficient and less painful means of cutting entitlement spending. Among them: requiring workfare of welfare recipients and instituting higher copayments on Medicare and Medicaid. Workfare would reduce welfare rolls and increases public service while co-payments would limit the incentive to abuse "free" health care, thus lowering the strain on the federal budget, the demand for health services in general, and the price of health care for all.[2]

Defense budget authority would grow at 7 percent in fiscal year 1984 under the plan, then at 5, 5, 4, and 4 percent in four succeeding years. Initially, these are significantly higher rates than the 2.5 percent fiscal year 1984 increase recommended by the House Budget Committee and the 5 percent proposed by the Senate Budget Committee, but lower than the President's request for 10 percent. It still translates into a cut of $1.6 billion from the Senate Budget Committee outlay target for fiscal year 1984. In addition, it means an $88 billion reduction in nominal defense outlays from the Congressional Budget Office's baseline figure, and a reduction of $132 billion from the President's request, over the next five years.

[1] See, for example, John Palffy, "Saving $111 Billion: How To Do It," Heritage Foundation Backgrounders No. 240, 241, 242, Jan. 24, 25, 26, 1983.

[2] Palffy, op. cit., Peter Germanis, "Workfare," Heritage Foundation Backgrounder No. 195, July 9, 1982.

THE POLITICAL BENEFITS OF THE FREEZE BUDGET

The Hatch-Gramm proposal is the only budget resolution that addresses the twin objectives of reducing spending and holding the line on income taxes. Spending cuts must begin with a budget resolution that forces Congress to meet its targets. Cuts cannot come from the appropriations process, where many a special interest will line up to protest the cut. The Hatch-Gramm budget would discourage the special interest groups in two important ways.

First, it restructures the budget by replacing general tax financing with specific financing through user fees. This limits excess and inefficient use of "free" or subsidized goods such as navigational charts, deep water ports, airports, weather satellites, or highways. Politically, this is very important. Special interests would have to pay for more goods and services from their own pockets. This is likely to translate into less intensive lobbying and fewer special interest pork barrels. The Hatch-Gramm budget increases such fees in several program areas.

Secondly, it would result in a budget resolution demanding cuts in aggregate spending rather than in specific programs. This means that supporters of particular programs would have to compete with each other for a share of the total pie. At the moment, each special interest tries to entrench its own program and the budget is, in practice, the total of the successful demands.

WHY IS THIS PROPOSAL NECESSARY?

This budget proposal is essential to the economic recovery. Under the Senate Budget Committee budget, federal spending during the Reagan years (fiscal years 1981-1984) will have increased at an annual rate of 9 percent. Spending as a percentage of GNP will have increased from 18 percent in 1965 and 19.4 percent in 1975 to 26 percent in 1984.

Clearly, the spending spiral has not been broken. In fact, spending is no longer viewed as the primary foe. Debate at both budget committee mark-ups centered on the size of recent and prospective deficits. Most Democrats, and some Republicans, argue that these deficits crowd out private economic activity, and that the budget gap must be bridged with new taxes (which, of course, would also crowd out private economic activity). The real goal of this strategy should be clearly understood; it is to use the bugaboo of deficits to convince the public to support an even bigger federal government. Explains economist Paul Craig Roberts, former Assistant Secretary of the Treasury for Economic Policy, "the deficit crisis applies only when it is time to derail the President's tax cuts and defense buildup."[3]

Many Republicans have mistakenly sought compromise by cutting spending a little and raising taxes a lot. The Republicans voted for a $98 billion tax increase in 1982 on the premise that they would receive $3 in spending cuts for $1 in taxes. Secretary of the Treasury Donald Regan recently admitted that the Administration expects the final deal to work out to "slightly less" than a one-for-one tradeoff; that is, less than one-third of the cuts promised.

This concern with budget deficits deliberately ignores the economic reality that federal spending, not deficit size, is the true indicator of the government's drain on the economy. Discussions of taxes and deficits distract attention from the fundamental truth—all government expenditures must be financed by the nation's wage earners through some combination of higher taxes, higher inflation and higher interest rates. Each damages the economy and destroys jobs.

Proponents of tax increases overstate the correlation between government deficits and interest rates. In fact, most empirical analysis and historical evidence confirms that, if anything, there is a slight negative relationship between interest rates and deficits. Deficits skyrocketed in 1982, for instance, and this was supposed to fuel inflation and interest rates. In fact, interest rates and inflation have plummented, and the economy is recovering robustly. And other countries, such as Japan, have managed for years to run much larger deficits than the United States as a percentage of GNP, while maintaining low inflation and a health economy.

"STRUCTURAL DEFICITS"

Office of Management and Budget (OMB) Director David Stockman has dipped into neo-Keynesian textbooks to revive the spurious concept of the "structural deficit." This theory claims to separate the deficit into two components—a cyclical deficit that is reduced through economic recovery, and a structural deficit which equals the remaining deficit after "full" or "potentially full" recovery. This concept focuses policy on reducing the structural deficit. As long as a structural deficit exists economic recovery supposedly will be inhibited by public borrowing crowding out private borrowers in the financial markets.

Some Republicans, including Stockman, apparently have abandoned trying to cut spending to eliminate the structural deficit. This leaves tax increases as the only means of reducing the current "structural deficit"—as if tax increases somehow will accelerate economic recovery, and thereby reduce the cyclical deficit.

[3]Paul Craig Roberts, "The President's Men Will Do Anything to Cut a Deal," the Wall Street Journal, Apr. 26, 1983, p. 34.

This argument fails to take into account the economic reality confirmed by distant and recent experience, that tax increases reduce rather than stimulate economic growth. Lower economic growth is reflected in lower levels of "full" recovery. So, less of the deficit would be reduced through economic growth. In other words, using tax hikes to tackle the deficit may actually increase the structural deficit, rather than reduce it. And the response of tax increase advocates to this unwelcome result is—increase taxes!

This theory is documented by the experience of past major tax increases which have so stifled economic activity that the deficit has increased rather than fallen. As Roberts notes, 1982 saw the largest tax increases in history, but the only impact it had on the deficit forecast was to raise it by $841 billion for fiscal year 1983 to fiscal year 1987.

THE SPENDING FREEZE AND THE PROSPECTS FOR "HIGH GROWTH"

The Hatch-Gramm proposal has been criticized because it requires the Congressional Budget Office's high growth projections of 4.4 percent growth in the economy over the next five years to balance the budget. If growth does not meet these projections, tax revenues would be lower and entitlement spending would be higher, leaving a significant, albeit declining, budget deficit in 1988.

Many legislators maintain that this rate of growth is unobtainable without first reducing current deficits which, they claim, can only be achieved through tax increases. Proponents of the Hatch-Gramm budget, however, contend that rapid economic growth can, and must, be reached with federal spending cuts and no tax increases.

CBO's growth projections are predicated on a baseline budget, but the spending freeze critically alters the assumptions of these growth projections by cutting spending far below baseline figures, while holding the line on income taxes. This will stimulate economic growth not accounted for in the CBO model, because it reduces the government's financial burden on the economy. With these new fiscal assumptions, it is possible that the economy will grow faster than even the CBO projection—conceivably resulting in a budget surplus.

The CBO growth projections are indeed pessimistic by historical standards; they have been conditioned by the dismal performance of the economy in the 1970s. With the regrettable exception of the inflationary 1970s, every decade in this century has enjoyed a six-year period of growth higher than the supposedly optimistic CBO projection.

The period 1962-1967 is of particular interest because today's economic conditions are similar in many respects; prices were relatively stable, there was excess capacity in both the labor and capital markets, and

also, as now, there were similar tax policies put into effect which were aimed at stimulating investment and economic growth. During that period the economy grew at an annual real rate of 6 percent, and unemployment fell by 43 percent, largely because of the tax cuts. In addition, deficits actually declined.

The Institute for Research on the Economics of Taxation has estimated that given a baseline budget and a similar 5 percent growth, the deficit could be reduced to 1.9 percent by GNP by 1988.[4] Under CBO's 4.4 percent growth assumptions, the baseline budget would equal 3.6 percent of GNP in 1988. According to the budget freeze proposal, the remaining deficits would be eliminated by spending cuts.

According to the most accurate among the economic forecasters during the past several years, Wainwright Economics, Inc., growth of 5.7 percent will occur in 1983, followed by 9 percent in 1984, and 4 percent thereafter.

In sum, given the stimulative policy of the Hatch-Gramm proposal, the original CBO growth projections should be revised upwards. And further, the CBO projections are overly pessimistic in light of historical experience.

CONCLUSION

Congress seems to worry about high deficits only when it wants to repeal the President's tax rate reductions or slash defense growth, and not when it wants to pass pork-barrel projects for the voters back home. If deficits and government spending are as out of control as the congressional rhetoric on tax and defense issues would claim, then the compromises inherent in the Hatch-Gramm proposal are essential.

Only the Hatch-Gramm Budget freeze tackles the exploding growth of entitlements, not by decimating assistance to the poor, but by ending the annual circus of special interest pleading and congressional vote buying. At the same time, it offers compromise on defense and assures the income security of the elderly. All it does not do is raise taxes—and that is something every American taxpayer and businessman should heavily endorse.

Most important, the Hatch-Gramm budget freeze gets the nation out of the degenerating cycle of taxes, recession, deficits, and more taxes, with a sound fiscal plan for economic recovery.●

BALTIMORE JUNIOR ASSOCIATION OF COMMERCE

● Mr. SARBANES. Mr. President, this year marks the 50th anniversary of the Baltimore Junior Association of Commerce, an organization that has devoted a half-century to serving the civic interests of Baltimore City. Founded in the spring of 1933, the purpose of the group was to provide leadership training for young men between the ages of 18 and 35 through active participation in local community improvement programs.

Now, after 50 years of growth and change, the Baltimore Junior Association of Commerce provides leadership training to men and women alike. The Baltimore JAC broadened its base of membership and support several years ago by withdrawing from the U.S. Jaycees and admitting women as members. It is now considering extending the age limit of voting members from 35 to 40. Yet its commitment to the original mandate of active participation in community affairs remains steadfast.

The success and diversity of the civic and charitable projects that the Baltimore JAC has undertaken are evidence of the extent to which it has met its goal. Santa Claus Anonymous, to mention just one of its many charitable programs, has raised approximately $3 million since its inception in 1934; in 1982 alone, it raised $340,000 and provided food and gifts for over 46,000 needy children last Christmas.

A fine article recounting the Baltimore Junior Association of Commerce's history of outstanding service to the people of Baltimore appeared in the Baltimore News American on May 9, 1983; it is a history of ingenuity, dedication and perseverance. I ask that this article be printed in the RECORD.

The article follows:

HALF A CENTURY OF GOOD WORK—JUNIOR ASSOCIATION HELPS CIVIC CHARITABLE CAUSES

(By Audrey Bishop)

For half a century, the Baltimore Junior Association of Commerce has been involved in everything from port development to Christmas parties for underprivileged children, lobbying for daylight saving time to renovation of the Shot Tower, golf and tennis tournaments to promotion of legitimate theater.

One of its early successes was a campaign for voting machines and permanent registration in the city. It later led the effort to remove outdoor stalls from the streets surrounding Lexington Market, and initiated a toy-lending program that provided toys for needy youngsters and employment for handicapped adults.

During the 1940s, it operated wartime salvage drives and sponsored air shows at Harbor Field to stimulate public awareness of aviation. In the 1950s, it raised more than $10,000 for Radio Free Europe and encouraged the city to install pedestrian crossing signals at intersections.

More recent undertakings include sponsorship of the Maryland Special Olympics and "Take Me Out to the Ballgame," a program that has accommodated 23,000 elderly and handicapped people at Memorial Stadium.

But what put the JAC in the news was the decision two years ago to separate itself from state and national Jaycees in order to admit women members.

The Junior Association was founded in the spring of 1933 by a group of the city's younger businessmen, who reversed the usual order of things, electing officers and directors before they recruited members.

Insurance man Landon B. Davies, who was the first president, will be on hand for the 50th anniversary banquet to be held Saturday at Blue Crest North. But he'll be paying more this time around—$37.50 a plate compared to $1.50 for the first dinner.

Santa Claus Anonymous, thought to be the largest all-volunteer Christmas charity in the nation, was started in 1934 when Theodore R. McKeldin, later to become mayor and governor, headed the JAC. Over the years, the project has raised roughly $3 million.

The current JAC president is Frederick J. Cuomo, assistant director of admissions at the University of Baltimore (soon to be succeeded by attorney Robert F. Scholz).

Cuomo thinks the admission of women is one of the best things that has happened to the JAC.

"Women account for about 30 percent of our 110 members," he says. "That's a big drop from the halcyon days of the 1950s, when there were as many as 900 names on the books. But ours is a different organization today than it was then, and Baltimore is a different city.

"We're developing into more of a civic organization which keeps us up with the times. We have a minimum participation program that challenges members to be productive. And we're one of the few organizations that bases membership on a person's potential."

Even while it was an arm of the Jaycees, the local group retained the name, Junior Association of Commerce.

The question of female membership plagued the JAC from 1972 until 1981, when it withdrew voluntarily from the Jaycees. Other Jaycee affiliates—in Rochester, Chicago, Pittsburgh, Houston and Philadelphia—were expelled after they allowed women to join, and have since formed Vector International.

But, according to Cuomo, the JAC is "gunshy about getting involved with another national organization."

Under the association's by-laws, members "graduate" when they reach their 35th birthday.

"On the other hand," says Cuomo, "79 of the 80 member-countries in Junior Chambers International, make 40 the age cut-off. Our thinking is to follow their example. The way things stand, we're missing out on a lot of good people."

The membership will vote on the issue this week.●

U.S. PROBLEMS WITH INTERNATIONAL BUREAUCRACIES

● Mr. PRESSLER. Mr. President, increasingly the United States is losing its grip in the negotiating processes within UNESCO and other international organizations. Part of this problem arises from the underrepresentation of U.S. nationals on the staffs of these organizations. But there are also other reasons for the diminishing capabilities of U.S. negotiators to fend off harmful decisionmaking in the international bureaucracies. On this subject, I ask that an article by E. J. Dionne, Jr., be printed in the RECORD and I commend it to the attention of my distinguished colleagues.

The article follows:

[From the New York Times, Apr. 21, 1983]

AMERICAN IN PARIS WHO'S DISENCHANTED BY UNESCO

(By E. J. Dionne, Jr.)

PARIS, April 20.—Chester E. Finn, Jr. entered the world of UNESCO politics here for the first time this week. It is not, he

says, an experience he would wish on a friend.

For Mr. Finn, a Vanderbilt University professor appointed to a special delegation by the Reagan Administration, the United Nations Educational, Scientific and Cultural Organization is a place where words entirely lose their original meaning and then reappear, monstrously, meaning something completely different.

It is also a place where, Mr. Finn says, the United States is faring very badly indeed and where the Soviet Union plays the game far better.

"As far as I can tell," Mr. Finn said after a negotiating session, "the Soviets devote considerable effort to this process, a lot of time and energy. And we just ad hoc it. We deal with these events as if they're shooting stars or comets. They deal with it as a solar system. My feeling is that we should take it seriously, or we should get out of it."

A FORMER MOYNIHAN AIDE

The 38-year-old Mr. Finn is typical of the private citizens called on by their government from time to time to participate in special events at UNESCO headquarters here.

Like many of them he brings experience to his task. Among other things, he holds a doctorate in education from Harvard and served as an aide to Senator Daniel Patrick Moynihan, the New York Democrat, both on his Senate staff and when he was Ambassador to India.

Career diplomats at UNESCO can become numbed by the bombast or develop a certain critical sympathy for the organization. The newcomers often bring a fresh view that sometimes leads to outrage.

"There's a whole view of what constitutes 'the successful conference,'" said Mr. Finn, dallying sarcastically over the last three words. "The successful conference is one that achieves a consensus.

"Some of the career guys, and some of our allies, will say, 'If you only yield on this phrase or that sentence, we can be part of the consensus.' The problem is that the consensus is often against our values. We keep yielding and give up a mile a year. We haven't gotten to our heartland yet, but our perimeter keeps getting pushed back."

FRUSTRATION IS NOTED

Mr. Finn said his criticism was not aimed at the Reagan Administration or at America's representative at UNESCO, Jean Gerard. Rather, he said, it reflected general frustration over the seeming unwillingness of the United States to make the effort needed to win. Too many American and allied diplomats, he said, seemed resigned to losing to a Soviet-third world bloc.

What is being fought over mostly is words, usually the texts of resolutions and directives to the UNESCO staff, and Mr. Finn acknowledged that a lot of this "Unescoese" was of no consequence.

But he also argued that words can mean a great deal—that the way a resolution reads can give either the Americans or the Russians advantages in the war for world public opinion. More importantly, he said, a resolution that is badly worded from the American point of view could turn over part of the substantial UNESCO bureaucracy to programs opposed to American objectives or ideas.

WHAT'S IN A TITLE?

The present conference, which is scheduled to close later this week, was called to chart the future of a nine-year old UNESCO project on educating students around the world on the need for peace and international cooperation.

The meeting carries the title "Intergovernmental Conference on Education for International Understanding, Cooperation and Peace and Education Relating to Human Rights and Fundamental Freedoms, with a View to Developing a Climate of Opinion Favorable to the Strengthening of Security and Disarmament."

"Now look at that title," Mr. Finn said. "If you go back to the original document, you'll find that it stopped at 'human rights and fundamental freedoms.' That was a great victory for the American position—we want to keep attention on human rights. But over time the Soviets managed to add the 'climate of opinion' phrase."

The Americans are intent on preventing the Soviet Union from using the conference to set up a UNESCO project that will in effect be an adjunct to its drive to stop the installation of new American cruise and Pershing missiles in Europe.

"The danger," Mr. Finn said, "is a conception that says that the only obstacle to peace in the world is Western resistance to Soviet aggression—which, of course, is never called 'aggression.'"

The other main American objective is to include in the documents phrases defending "academic freedom" and "the free flow of information and ideas," and to drop phrases that imply that education and textbooks should follow a particular political line.

Mr. Finn riffled through his papers and pulled out a Mongolian resolution calling for "improving cooperation and coordination of the activities of government institutions, social organizations and families."

POSSIBLE PROBLEMS AT HOME

There is another a whole other side to the UNESCO business: Countries also have to live at home with the resolutions they vote for here.

For example, Mr. Finn said, some of the American declarations on academic freedom could be used by liberals fighting textbook censorship in the United States.

"If you believe in academic freedom, you believe in academic freedom," be said. "On the other hand, I think you have to remember than in a decentralized school system like ours, decisions on local public school textbooks are made by people fighting these questions out democratically before their local school boards."

Sometimes the fight over words took on the cast of a state legislature dustup.

At one point, Mr. Finn said, the Minister of Education from Nova Scotia, "a likable, salty old guy," came up to him and said, "I like your resolutions, but I have a problem with this phrase about opposing 'all impediments to the full exercise of academic freedom,' You see, the professors' unions in Nova Scotia, regard budget cuts as restrictions on academic freedom. Could you drop the word 'all'?"

"I told him I was a professor and understood," Mr. Finn said with a chuckle. "I said we'd gladly drop the word just to get in any mention of academic freedom." The deal was made.●

CAPITAL ASSISTANCE LEGISLATION NEEDED

● Mr. SASSER. Mr. President, yesterday, Washington Post editorial, "The Crumbling Infrastructure," was an argument in the right direction as it addressed the problem of our Nation's deteriorating infrastructure and the need for the Congress to address this problem by planning public works expenditures more sensibly.

Planning public works expenditures more sensibly: This is precisely the purpose of S. 676, the Capital Assistance Revenue Sharing Act (CARS) of 1983, which I introduced a little more than 2 months ago. It targets Federal funds to infrastructure repair and improvement projects at the State and local level.

The construction of this bill is as clear and unequivocal as its purpose. It calls for a $3.5 billion a year appropriation to State and local governments for the purpose of infrastructure repair and rehabilitation. Of this total, $3 billion would be distributed using a simplified revenue-sharing formula to State and local governments; one-third would go to the States and the remaining two-thirds would go to local governments. The other $500 million would be allocated on a project-by-project basis to local governments not eligible for other funds under the bill's formula.

Consider the thrust of the Post editorial:

> Most essential public works systems are already in place, and emphasis in federal spending should now shift from new construction to repair.

The CARS bill recognizes this shift. The Post goes on to suggest that:

> The Federal Government also needs to find a better way to expend its resources on truly national concerns while giving states and localities more flexibility in addressing their widely varying public works needs.

The Capital Assistance Revenue Sharing Act of 1983 does this. It makes a Federal statement on a matter of utmost national need, the need to improve and repair a deteriorating infrastructure. It also provides State and local governments with the flexibility, through a simplified revenue-sharing formula, to address "their widely varying public works needs."

I want to emphasize that funding under S. 676 would be in addition to, and not in place of, general revenue sharing's own extension.

In targeting the infrastructure needs of State and local governments, my legislation embraces the spirit of the original revenue-sharing law enacted in 1972, before the economic difficulties of the mid-1970's forced most State and local governments to use revenue sharing funds simply to stabilize tax rates, and not to focus on their capital budgets.

Yesterday's Post editorial is additional evidence that we ought to establish a regular, permanent program to fund infrastructure repair and improvements in this Nation. Further, I believe the editorial is another testimonial to the need for the vehicle which can best accomplish this objec-

tive, the Capital Assistance Revenue Sharing Act of 1983. I ask that the editorial be printed in the RECORD.

The editorial follows:

[From the Washington Post, May 9, 1983]

THAT CRUMBLING INFRASTRUCTURE

Ever since policy experts drew attention a couple of years ago to the dilapidated state of many public facilities, proposals for repairing what came to be called the nation's infrastructure have abounded. So extreme was the deterioration said to be that trillions of dollars would be needed to put highways, sewers, transit systems and other public works in decent condition. Two recent studies, however, suggest that the situation is more manageable than had been supposed. That's the good news. The bad news is that dealing with it will probably require a far more disciplined approach to public works financing than Congress is likely to accept.

A survey of 809 cities by the National League of Cities and the Conference of Mayors found that almost all face sizable repair jobs, but that the cost of urgent repairs was relatively modest and that local resources could cover much of it. The Congressional Budget Office similarly found that—despite the $5.5 billion added last year to annual highway spending and the $4 billion voted in the recent public works "jobs" bill—all levels of government needed to step up capital spending by about $11 billion a year. But, the study observed, most of the spending shortfall could be met by better allocation of current federal dollars.

The CBO criticized current federal public works policy for overemphasizing construction of new facilities, for channeling dollars to projects of local interest but low national priority, and for encouraging states and localities to neglect needed repair and replacement of existing facilities. Most essential public works systems are already in place, and emphasis in federal spending should now shift from new construction to repair. The federal government also needs to find a better way to expend its resources on truly national concerns while giving states and localities more flexibility in addressing their widely varying public works needs.

To get Congress to plan public works expenditures more sensibly, Reps. Bill Clinger and Bob Edgar have been pushing the idea of requiring the administration to prepare an inventory of the nation's capital assets and to make annual assessments of the most-needed improvements and repairs. The administration wisely opposes the idea of a separate "capital budget," on the ground that this would be an invitation to run up still larger federal deficits. But it has warmed somewhat to the idea of compelling Congress to consider the long-term implications of its public works spending decisions.

All this sensible advice, however, is likely to fall on deaf ears in Congress. As long as congressmen judge their worth to their constituents by the imposing public works they cause to be constructed in their districts—never mind the future cost of maintaining them—the poor old infrastructure is likely to keep crumbling while the repair bills steadily mount.●

IMF'S BLANK CHECK

● Mr. HELMS. Mr. President, The Washington Times of April 15 contained an article by Pat Buchanan (We Pay and the LDC's Get A Blank Check) in which Mr. Buchanan makes it clear why we should not grant the International Monetary Fund more money in quota increases.

He accurately points out that an $8.4 billion IMF bailout merely adds fuel to the deficit fires. If this IMF bailout is approved, the Federal Government will borrow more from the private sector, thus draining billions that could go toward national economic recovery and providing permanent jobs in the private sector.

The IMF is understandably popular with chronic debtor states. Though the fund does impose "austerity plans," as Pat Buchanan points out, these plans are often aimed at raising taxes and cutting economic growth—practices that undermine creditworthiness.

The perpetual state of financial ill health of IMF borrowers like India, Poland, and Mexico testifies to the error of granting the IMF more financial resources.

Mr. President, I ask that this article be printed in the RECORD.

The article follows:

[From the Washington Times, Apr. 15, 1983]

WE PAY AND THE LDC'S GET A BLANK CHECK

(By Patrick Buchanan)

As President Reagan scrounges about for a piddling $50 million for ammunition for the beleaguered army of El Salvador, the House Banking Committee is greasing the skids for the International Monetary Fund-Bank Bailout, involving a sum a thousand times as large.

The $8.4 billion bundle, the U.S. share of the $47 billion IMF package, is said to be unstoppable. Perhaps so. When, previously, the president lined up with the establishment, the coalition proved invincible.

Eventually, however, when the American people learn how the Republican Party conspired to use their savings—to spare Rockerfeller's reputation and save Rockefeller's bank—while less-favored businesses were allowed to perish at the rate of 500 a week, a reckoning will come.

But the point here is not to underscore anew the social injustice or political folly of the Big Bank Bailout, but to limn the Brave New World toward which we now seem irretrievably headed.

With that $47 billion, the IMF will receive more than an immense slice of the accumulated savings of Western people. With it goes unprecedented clout, lethal leverage over the American banks—to a claque of international bureaucrats who bear no allegiance whatsoever to the United States.

What is taking place is not simply a transfer of savings, but a transfer of sovereignty.

Here is how the New International Economic Order—the dream of the Brandt Commission, the demand of the Third World—will work:

One by one, the bankrupts of the Communist Bloc and the Socialist South will be arriving in Washington, D.C., and queueing up at the offices of the IMF.

We cannot pay our debts, they will say; besides, we need more money. Not to wory, the IMF officers will answer. We will draw up an "austerity plan" for your economy. Upon your acceptance, we will tide you over with a few hundred million or billion from our newly replenished hoard of capital. In addition, the Big Banks will be "bailed in" to your rescue plan, i.e., the Big Banks will be required by the IMF to send good American dollars chasing the tens of billions in bad loans. If a country balks at the IMF terms, it gets no new money; If a bank balks at the IMF demands, it gets no relief—i.e., no interest on its old loans.

With the new billions and enhanced power, the IMF will gain permanent access to the investment capital of the United States, a decisive voice in how much of America's savings, henceforth, will be used to maintain the credit ratings of regimes from South America to Central Africa to Eastern Europe. As not a single applicant at the IMF window has yet been turned away, we may expect this record of generosity with our money to continue.

Before our eyes and by the hand of our Congress, the greatest foreign aid machine in history is being constructed, a system of permanent wealth transfers from the capitalist West to the anti-capitalist South and the communist East.

It will work, Don Regan of Treasury assures us, because the IMF "requires debtor nations to pursue sound economic policies." The IMF "is playing a key role in assisting nations to move back to a sound economic footing."

That so? What "sound economic policies" were imposed by the IMF upon Stalinist Romania, $10 billion in debt, as a condition of its latest loans? Has Mexico, beneficiary of the biggest bailout, been placed upon a "sound economic footing" when President de la Madrid continues to hold that 75 percent of the private economy was seized by Lopez Portillo and the thieves so lately departed?

The rules of economics and sound banking are being stood on their heads.

Do you truly help people mired in poverty by collaborating with the socialist regime responsible for their condition in imposing "austerity" upon them? Do you truly help countries hopelessly in debt by increasing that debt? Do you truly assist banks with billions in bad loans by increasing their exposure to bankrupt regimes? Can the way into this mess be the way out?

Who is looking out for the American people? One day, they will demand to know why their savings were plundered to be shipped off to Nigeria and Mexico and Venezuela so these three arrogant oil producers could hold production down and keep prices up, the better to gouge the very American people bailing them out.

Watching Mr. Conservative march merrily toward this sunken road calls to mind the cri de coeur of Oliver Cromwell in his letter to the Church of Scotland: "I beseech you, in the bowels of Christ, think it possible you may be mistaken."●

SCHOOL NUTRITION PROGRAMS GET HIGH MARKS

● Mr. DOLE. Mr. President, the U.S. Department of Agriculture has recently completed and submitted to the Congress the final report from the national evaluation of school nutrition programs, an assessment of the effectiveness and efficiency of the national school lunch and school breakfast programs. This is a landmark study in that it is the first ever, truly nationally representative public health and nu-

trition survey of the school-age population. The information provided in this final report is tremendously valuable to those of us who have to make decisions about these programs regularly and to the many dedicated professionals whose job it is to monitor the health and well being of our Nation's children. We encourage the Secretary to build upon this fine effort and continue in the future to support similar evaluation research into the child nutrition programs on an ongoing basis.

I ask that the attached executive summary be printed in the RECORD.

The summary follows:

THE NATIONAL EVALUATION OF SCHOOL NUTRITION PROGRAMS, FINAL REPORT—EXECUTIVE SUMMARY

(Prepared by Jack Radzikowski)

In October 1979 the Food and Nutrition Service (FNS) of the U.S. Department of Agriculture began an evaluation of the National School Lunch, School Breakfast and Special Milk Programs. The evaluation is formally called the National Evaluation of School Nutrition Programs. This is an executive summary of the final report from that study.

The major objectives of the evaluation were to: identify and synthesize existing research and evaluation data on the school nutrition programs, identify the determinants of participation in the school nutrition programs and develop statistical models for use in forecasting participation rates, determine the impact of the school nutrition programs upon students and their families, and determine whether existing benefit levels are appropriate for participants' needs. The study was initiated in response to Senate Resolution 90 (June 20, 1979, Report 98-208).

This report is the third major report emanating from the National Evaluation of School Nutrition Programs. The first report, U.S. Department of Agriculture's Response to Senate Resolution 90 (Radzikowski and Vogel, 1981) presented preliminary evaluation findings. The second report, The National Evaluation of School Nutrition Programs—Review of Research (Nelson et al., 1981) identified and synthesized the results from research studies completed between 1960 and 1980 that addressed the topics of school nutrition program operations and effectiveness.

In the subsequent parts of this summary, the goals of the school nutrition programs are identified and program operations are briefly described. Thereafter, highlights of the descriptive, impact and participation findings from the study are presented.

PROGRAM GOALS AND OPERATIONS

The National School Lunch Program was authorized in 1946 (P.L. 79-396) to safeguard the health and well being of the nation's children by providing them with nutritious foods and to support farm income by increasing the consumption of domestic agricultural products. In pursuit of similar goals, the Child Nutrition Act of 1966 (P.L. 89-642) authorized the School Breakfast Program and the Special Milk Program. Through these programs, meals designed to meet specific nutritional requirements are offered at full price, reduced price or free to students in participating schools, according to uniform national eligibility criteria based on family income and size.

The Food and Nutrition Service of the U.S. Department of Agriculture is the principal administering agency for the National School Lunch, School Breakfast and Special Milk Programs. At the federal level, FNS is generally responsible for implementing program legislation; establishing regulations, policies and guidelines; monitoring program performance; and providing program and administrative funds to states. At the regional level there are seven FNS offices. The major functions of the FNS Regional Offices are to monitor and provide technical assistance to the state agencies. When state agencies cannot administer the programs in private schools because of state laws, FNS Regional Offices directly administer the programs in private schools. In turn, the state agency, usually the Department of Education, administers the programs within the states by providing technical assistance to local School Food Authorities (SFA's) at the school district level, by monitoring SFA performance, and by establishing fiscal record-keeping systems. At the local level, SFA's administer the programs in the schools they supervise, in accordance with all of the appropriate regulations such as those governing the income criteria for free and reduced price eligibility. Finally, individual schools are responsible for preparing nutritious meals and making them available to all children.

The school nutrition programs receive federal support primarily by a performance funding mechanism. The allocation of resources to the states by the federal government, and subsequently to the SFA's by the states, is based on a cash reimbursement for each meal or half pint of milk served. In addition to the cash reimbursement, schools receive an amount of commodities based on the number of lunches they serve plus as much of specified types of surplus commodities (e.g., cheese) as they can use without waste. At the time this study was conducted, during Fiscal Year 1981, states received approximately $2.4 billion in cash subsidies and $894 million in donated commodities for the National School Lunch Program, $330 million in cash subsidies for the School Breakfast Program, and $102 million in cash subsidies for the Special Milk Program.

METHODOLOGY

The National Evaluation of School Nutrition Programs was the first study to examine the effects of the School Lunch, School Breakfast and Milk Programs on a nationally representative sample of public school students and their parents. In the Fall of 1980, data on public school students' program participation, dietary intake, growth and development and well being were taken through personal interview or direct measurement from approximately 6,500 students. During the same time period, data on family food expenditures, income and family composition were collected from the students' parents. Also, during this period, measures of program characteristics were collected from principals and food service managers in 1,100 public schools, through a mail survey. Statistical inferences and descriptive national estimates were made about school nutrition operations, participation patterns and impact, based on a wide range of program participants and nonparticipants in the sample.

DESCRIPTIVE FINDINGS

School lunch—General characteristics

The National School Lunch Program is available to almost all the public school students in the United States. During the time of the survey, 98 percent of these students had daily access to the Lunch Program.

About 25 million School Lunches, enough to feed 60 percent of those attending public schools were served every day. Students tended to be regular participants and eat the School Lunch every day or not at all. Two out of five School Lunches were served free of charge. Slightly more than half of all School Lunches were served to students paying full price. The average price of a full price School Lunch was 63 cents in the Fall of 1980 (81 cents in late 1981).

School breakfast—General characteristics

In contrast to the Lunch Program's pervasiveness in the United States, the newer School Breakfast Program is available to only 39 percent of public school students. The distribution of schools maintaining the Breakfast Program is by no means random—participating schools occur disproportionately in poor, southern and urban districts. Schools with the Breakfast Program also tend to have lower per pupil expenditures (i.e., local resources devoted to education tend to be less than in other schools).

At the time of the study, about four million School Breakfasts were served every day, enough to feed approximately 10 percent of the students attending public schools. Four out of five School Breakfasts were served free of charge. The average price of a full price School Breakfast was 28 cents in the Fall of 1980 (41 cents in late 1981). As in the Lunch Program, students tend to be regular participants and eat the School Breakfast every day or not at all.

School lunch—Income and family composition of participants

As a general rule, participation in the Lunch Program is highest for students from families in the lowest quartile of total income (below $12,250) and per capita income, and for students from large families (i.e., five or more members) and from single parent families. Large and single parent families are both known to be associated with lower socioeconomic status.

Black, Hispanic and other minority students also have higher participation rates than white students, who have the lowest rate. Although white students have the lowest rate of participation, they constitute the largest part of the school-age population and thus receive slightly more than two-thirds of the School Lunches.

School breakfast—Income and family composition of participants

The same participant characteristics of income and family composition described about for the Lunch Program also apply to the Breakfast Program; however, they are more pronounced for the Breakfast Program. That is, the Breakfast Program provides benefits to relatively higher percentages of low income and non-white participants than is provided by the Lunch Program. Only 1.4 percent of those in the upper quartile of family income (above $30,000) participate in the Breakfast Program. Again, although white students have the lowest rate of participation, they constitute the largest part of the population and thus receive 40 percent of the School Breakfasts.

Schools that do not have the lunch or breakfast programs

There are about 1,700 public schools in districts where none of the schools have the School Lunch or Breakfast Program. They have an enrollment of about 1,000,000 students. The students in these schools are

about 93 percent white, compared to a national average of about 75 percent white. These schools appear to serve students who are more affluent than those in schools that have the Lunch Program.

IMPACT FINDINGS

School lunch—Impact on family food expenditures

The monetary value of the federal reimbursement for School Lunches represents a subsidy to the families of participating students. An important issue is whether families use the subsidy to supplement or to substitute for their usual food expenditures.

Analyses from the study clearly show that the Lunch Program supplements family food expenditures. Contrary to some speculation, families in general do not reduce their food expenditures when their children receive subsidized meals at school. Thus the Lunch Program is attaining one of its legislated goals. It is promoting the consumption of agricultural products by increaseing the amount or quality (i.e., value) of food obtained by participating families.

The School Lunch Program is an efficient way of increasing the value of food available to participants' families since, in most cases, the value is increased by about the same amount as the federal subsidy. To judge the magnitude of the effect, one can compare it to the increased amount of food expenditures resulting from an additional dollar of cash income. That comparison shows that an increase of between $9.00 and $10.00 of direct cash income would be needed to have the same effect on food expenditures as $1.00 of School Lunch subsidy.

The above findings hold for the general population of School Lunch participants. There are some differences in the effect of participation among different ethnic groups. There is a slight reduction in food expenditures for blacks and Hispanics. Most of the reduction is in expenditures for food away from home. No significant reduction is shown for food expenditures at home. Since the differences are slight and are for food away from home, it is possible that participants from these groups are diverting the money they would have spent on alternative lunches or snacks to other family expenditures.

School breakfast—Impact on family food expenditures

There is no reduction in family food expenditures for the general population of School Breakfast participants. The effect of Breakfast Program participation on the food expenditures of low income and ethnic groups is the same as that for the general population.

Because no substitution effect is found, the Breakfast Program, even more than the Lunch Program, can be considered primarily a food supplementation program and an efficient way of increasing the value of food available to participants' families.

School lunch—Impact on the nutrient intake of students

Impact on dietary intake gives an indication over the short term of the extent to which the school nutrition programs are attaining their goal of safeguarding the health of the nation's school-age children through the provision of nutritious foods.

Students who participate in School Lunch have higher intakes of energy and more nutrients than students who do not participate in any of the school nutrition programs.[1] The Lunch Program is superior not only when participants' nutrient intake from the noon meal is compared to that of nonparticipants, but also when participants' 24-hour nutrient intake is compared to that of nonparticipants. The differences in nutrient intake are accounted for mainly by the higher nutritional value of School Lunches compared with the lunches eaten by nonparticipants.

It is worth noting that of the many nutrients for which Lunch Program participants show superior intakes, four (vitamins A and B6, calcium and magnesium) are ones that typically are deficient in the diet of the school-age population.

The superiority of the School Lunch is reflected in higher daily intake of nutrients for the general school-age population and for all the population subgroups that were examined. Elementary students, secondary students, and students from families with per capita income below the sample median (i.e., below $3,845) all benefit from participation in the Lunch Program. It was expected that an even greater nutritional impact would be found for low income students than for middle or high income students; however, the results for the low income students are quite similar to those for the general population of students.

School breakfast—Impact on the nutrient intake of students

The School Breakfast Program was originally established in part to combat the nutritional problems of poor children. Although all children in schools with this program are now eligible to participate regardless of their parents' income, historically there has been a conscious effort to target the Breakfast Program toward schools with high percentages of children from low income families.

The findings from the study suggest that the principal nutritional benefit of the Breakfast Program is that it increases the likelihood that children will eat breakfast. This can be considered a nutritional benefit in that, on the average, children who eat a breakfast are substantially better nourished than those who skip breakfast. Based on projections made from this study's data, it is estimated that over 600,000 students who currently skip breakfast would eat it if the Breakfast Program were available in their schools.

Given that children do eat breakfast, the School Breakfast is not superior to the meal students obtain from non-USDA sources expect for the milk-related nutrients. Moreover, the findings for the low income, elementary and secondary School Breakfast program participants are similar to those for the general population of Breakfast Program participants. Participants in these subgroups also have nutrient intakes that are inferior to those of nonparticipants. In fact, the School Breakfast provides less vitamin A and B6, and less iron than breakfasts eaten by nonparticipants.

Milk—Impacts on the nutrient intake of students

When judging the dietary intake findings of the study, it is important to keep in mind the nutrient contribution of milk as part of the meal patterns. Milk is a major source of calcium, phosphorus and riboflavin. In almost all of the comparisons that demonstrate the relative efficacy of the school nutrition programs, singly or in combination with one another, the high intakes of some (i.e., calcium, phosphorus and riboflavin) but not all nutrients, are most likely due to milk consumption.

School lunch—Impact on the growth and development of students

Impact on growth and development (i.e., height and weight) provides indications of the long-term effects of program participation on children's health. However, such indices are much more likely to be affected by illness, genetic and environmental influences than by school meals.

Participation in the School Lunch Program shows no effects on students' height adjusted for age. However, intermediate and secondary school students who have participated in the program an average of five days per week since entering school, weigh slightly more for their age and have slightly bigger triceps fatfolds than students who were less frequent participants. These effects of School Lunch participation do not vary with income status. The differences in weight and triceps fatfold thickness associated with participation among the older students are quite small compared with the effects of other factors such as the sex of the child, ethnic background and parents' height and weight. Consequently, the significance of these findings with respect to the goal of safeguarding the health of school-age children is difficult to evaluate.

School breakfast—Impact on the growth and development of students

School Breakfast participation is not related to students' height adjusted for age. Relationships with weight and triceps fatfold thickness are inconsistent and rather weak, although it appears that frequent Breakfast participants are somewhat less likely than nonparticipants to be under- or overweight, i.e., they are somewhat more likely to be in the normal range. These effects of School Breakfast Program participation do not vary with income status.

PARTICIPATION FINDINGS

School lunch—Determinants of participation

The biggest single determinant of School Lunch Program participation is meal price.[2] Holding other factors constant, students who pay higher prices participate less frequently. The responsiveness of participation frequency to the price paid for School Lunch depends very much on the price level. At a Lunch price of 40 cents for example, a 10 percent increase in price is associated with a 5 percent decrease in participation, while at a price of 60 cents, a 10 percent increase in price is associated with a 7.5 percent decrease in participation.

Students whose parents report that the School Lunch is less expensive, more convenient and of higher nutritional value than lunch at home are more likely to participate. The strength of the effect of these factors suggests that parent attitudes as well as economic factors are important in predicting participation levels.

[1] Nonparticipants, unless otherwise noted, are students in schools where the program in question is available but who choose not to participate. Comparisons are between students who eat the School Lunch and students who eat an alternative lunch. If students who skipped lunch were included in the non-participating group, differences between Lunch participants and nonparticipants would be even greater than the differences described here.

[2] Participation in this context is defined as the number of times within a given week a student eats the school meal.

Other factors that account for a substantial amount of variation in School Lunch participation suggest that more frequent participants are students who are younger (under age 13), have parents who make the decision where to eat lunch, are male, have parents who are less educated, cannot eat lunch at home, live in rural areas and go to schools where the faculty and staff eat in the same dining areas as students.

School breakfast—Determinants of participation

Students who receive free Breakfasts or pay very low prices for Breakfast participate more frequently than those who pay higher prices. The responsiveness of participation frequency to the price paid for Breakfast depends on the price level of the meal but is generally quite high. At a Breakfast price of 20 cents for example, a 10 percent increase in price is associated with a 7 percent decrease in participation. The high responsiveness of participation to Breakfast price changes and the fact that only 27 percent of Breakfast participants pay anything for meals suggest that when students have to pay for the School Breakfast, the demand is quite low.

Other factors that account for a substantial amount of variation in School Breakfast participation suggest that more frequent School Breakfast participants are students who are younger, cannot eat breakfast at home, are black, are male, have parents who consider the School Breakfast a better nutritional value and more convenient than a home breakfast, make their own decision about where to eat breakfast and come from families that receive WIC benefits.

School lunch—Targeting of program benefits

The targeting analyses developed a tool for examining the effects of current policy and changes to current policy on the distribution of program benefits.

For simulation purposes in the final report, the policy under scrutiny was the eligibility criteria for free and reduced price meals. The benefits of the School Lunch and Breakfast Programs were defined in terms of the number of meals that children received through the programs. The distribution of benefits was measured both by the participation rate of the total public school population and by the participation rates of various subgroups of public school students. Since the needs of various subgroups differ, the results of these analyses help in determining the extent to which the programs reach those groups with the greatest need.

The effects of different criteria were assessed by comparing participation rates under several different sets of eligibility criteria for free and reduced price meals. For example, the effects on various population subgroups of the eligibility criteria in use in Fall 1980 (i.e., a hardship deduction, 125 percent of poverty for free, 195 percent of poverty for reduced) were compared to the eligibility criteria in use after passage of the Omnibus Reconciliation Act of 1981 (i.e., no hardship deduction, 130 percent of poverty for free, 185 percent of poverty for reduced). This comparison showed that students from families in the second quartile of per capita income (i.e., $2,500 to $4,250) received a much greater reduction in School Lunch benefits than the general population. There were no important differences in effects for students of various ages or ethnicity, or for students from different regions of the country.

School breakfast—Targeting of program benefits

The targeting analyses show the effects of changing eligibility criteria to be greater on School Breakfast participation than on School Lunch participation. Comparison of participation rates under the eligibility criteria in use in Fall 1980 to the rates under the eligibility criteria in use after passage of the Omnibus Reconciliation Act of 1981 shows the greatest reduction in Breakfast Program benefits for students who are in families with per capita income in the second quartile, live in the western or northeastern United States, are in grades 10 through 12 and are Hispanic.

CONCLUSIONS

The School Lunch Program, while it delivers benefits to substantial numbers of poor students, serves all students.

The School Breakfast Program, because it delivers mostly free meals and is found predominantly in schools located in low income areas, serves primarily the poor.

Both the School Lunch and Breakfast Programs function more as food supplementation than as income supplementation programs. This is because, in general, the federal subsidy results in an increase in the value of food available to the family rather than an increase in discretionary income. Moreover, both programs are likely more efficient than the provision of additional cash income in accomplishing food supplementation goals.

The School Lunch Program, as judged by the nutrient intake of students, clearly provides meals that are superior to the lunches received by nonparticipants. These differences are probably accounted for by the nutritional quality of foods prescribed in the national meal pattern.

Compared to alternative breakfasts, the School Breakfast is superior only in the milk-related nutrients. Since the nutrients for which the School Breakfast suffers by comparison are low in the diets of a large percentage of school-age children, the School Breakfast meal pattern should be examined and improved. The major advantage of the School Breakfast Program is that fewer students skip breakfast in schools where the School Breakfast is available.

Participation rates in both the School Lunch and Breakfast Programs are more sensitive to differences in the price of meals than any other factor affecting participation. School Breakfast participation rates would be especially depressed in the face of any substantial price hikes.

Altering major policies (e.g., eligibility criteria) in the School Lunch and Breakfast Programs to control program costs, while often having simple fiscal implications, can have different and not immediately obvious effects on the distribution of benefits to various subpopulations of participants. Such unanticipated effects of various policy options in many cases can now be estimated from the data collected in the National Evaluation of School Nutrition Programs.●

STOP THE BAILOUT BANDWAGON

● Mr. HUMPHREY. Mr. President, a recent Wall Street Journal editorial discussing the proposed bailout of the International Monetary Fund stresses a theme which in the view of this Senator deserves very careful consideration. Noting that "crisis legislation invariably turns out to be bad legislation," the editorial recognizes that we in Congress tend to respond to such so-called crisis only after the natural course of events has begun to solve them.

This was the atmosphere in which the recent jobs bill was passed, Mr. President, and I fear that history is preparing to repeat itself as the IMF bill comes to the floor. Just as the jobs bill was passed at a time when economic recovery had clearly begun, so will this IMF bailout be considered at a time when worldwide recovery begins to ease the debt burden of the Third World.

Transfer of valuable capital to a multilateral institution that will allocate it among the least creditworthy is an economically unsound approach to the debt issue. It is the fervent hope of this Senator that the bailout bill will not be rushed through amidst threats of a crisis that is likely more illusory than real. As the leader of the free industrialized world, it would behoove us to demonstrate the extent to which the free market can and will resolve this issue if only given the chance.

Acquiescence to the IMF bailout will constitute an ill-advised reactive response to the international debt situation. On the other hand, a rejection of this request, accompanied by a consistent adherence to policies designed to support economic growth, will represent a well-reasoned and proactive approach. Despite the threats of the international doomsayers, the entire world will benefit if the latter course prevails.

I ask that the editorial appear in the RECORD.

The editorial follows:

[From the Wall Street Journal, Apr. 20, 1983]

WHAT DEBT CRISIS?

The Reagan administration has been flogging Congress to add $8.4 billion to International Monetary Fund coffers as the key element in a plan to quell the "debt Crisis" that is said to be threatening the world financial system. But we have been watching with a rising sense of unease as the legislation wends its way through Congress. Many questions about the IMF scheme have gone unanswered. One is: What debt crisis?

To us, it appears that the international debt crisis, as conventionally defined, is for all practical purposes over. The chief element in that crisis was what bankers at the time were pleased to call an "unexpectedly" severe recession. To our mind, bankers are paid to expect the unexpected, but let that pass for a moment. There's no doubt that less-developed countries were finding it more and more difficult to export their goods to the industrialized countries and thereby generate enough revenue to meet their debt service. The length and severity of the recession supposedly made it necessary to arrange an emergency fund to stave off an old-fashioned banking panic.

But now most of the industrialized countries are well on their way to recovery, judg-

ing from the official indicators and ebullient stock markets world-wide. Government economists reportedly have run the recovery scenario through their computers recently and found that 4.2% growth over the next two years, which looks very much in the ballpark, would pretty much solve whatever debt problem exists.

That's not to say that some countries, and some banks, couldn't still go down the tubes. But the market has had ample time to discount the probability of this, and there's no reason it should lead to a panic. Poland has already declared a virtual moratorium on repayment of its debt, and that didn't lead to financial armageddon, as some predicted. Anyway, there are established national procedures for dealing with potential bank failures.

And if a crisis really does exist, the IMF is sitting on about $45 billion of gold that could be pledged to raise more than enough hard currency to deal with it. The proposed quota increase, by contrast, wouldn't take effect until late this year. That doesn't sound like much of an emergency to us, although it does sound like a way of permanently augmenting the power of the IMF bureaucracy.

Cooler heads have all along been skeptical about the true extent of the "debt crisis." A confidential Federal Reserve/Treasury Department staff study last summer concluded that "a collapse of the system is highly unlikely (although) there is always the danger that an individual borrower, or borrowing country, will run into difficulties." Only in the cases of Mexico and Brazil, the study said, "is the magnitude of U.S. banks' exposure sufficient to pose a potential threat to confidence in the event of total loss." But, the study quickly added, "total loss . . . is highly unlikely."

That was a good judgment then and it's good judgment now. At the very least, it makes it incumbent on the administration and the IMF to make a more positive showing why huge new sums of money must be taken out of our capital markets, guaranteed by the taxpayer and flung at countries around the globe with proven records of poor economic policies. It also hasn't been made clear by the administration and the IMF why adding more debt to the backs of poor countries will help rather than hurt them. Or how it will help the soundness of the banking system to be "bailed in" for billions more in shaky loans to whomever he IMF's bureaucrats deem worthy. The IMF has had some successes in recent years, but most of its customers seem to come back again and again for more money.

Debtor nations, bankers, IMF officials and others with a vested interest in bailouts like to scare the public with such specters as the $600 billion or so owed to the industrialized world by the non-OPEC developing countries. But only a fraction of that total is in doubt, and even that amount will be reduced by the economic recovery now taking place. The banks themselves seem in no hurry to raise their reserves substantially against the calamity supposedly stalking them.

The banks have been pushing for a higher IMF quota as a means of ultimately extricating themselves from this morass. But they are likely to pay a heavy price. Congress is working on companion legislation that would, among other things, restrict bank lending abroad. But development lending is by no means intrinsically a bad thing. Done properly, it can be vital to the health of less developed countries, as it was to the U.S. in the 19th century, and quite profitable for prudent banks. Doubtless many bad loans were made to developing countries, in large part out of belief that the IMF would in fact bail out the banks if push came to shove. This problem does need to be addressed, and rushing to add to IMF coffers is scarcely the way to start.

We said recently that we knew the recession was over because Congress was enacting a jobs bill. It now looks to us as though the international "debt crisis" is over because Congress is whooping through an increase in IMF quotas. Crisis legislation invariably turns out to be bad legislation, and it would be a good idea to put the quota increase on hold until we can start to understand our recent experience, and define what the international debt problem is and what it is not.●

CAMPAIGN FINANCE REFORM

● Mr. CHILES. Mr. President, the Federal Election Commission recently released its final figures for the 1982 congressional elections. The FEC report underscores both the continued escalation in campaign spending and the increasing dominance of money from political action committees in congressional elections.

Candidates for the House of Representatives and the Senate spent a total of $343.9 million in 1981–82, almost an increase by half from the previous 2-year election cycle. For that same period political action committees contributed $83.1 million; an increase of 51 percent over 1979–80. Perhaps most significant, PAC money represented 31.5 percent of campaign funds spent by winning House and Senate candidates in 1982. If this trend of ever-increasing PAC contributions continues unabated, we are not far from a situation in which PAC money will be the major source of congressional campaign funds.

I doubt there are many Members of the Congress who would argue that it is a healthy prospect for the electoral process to be basically underwritten by the PAC's. Rather, it is a dangerous prospect which argues for some prompt preventive medicine. The Congress cannot afford for the American people to believe that we reach decisions for reasons other than our best judgment of what is good for this country. If the Congress is seen as being under the influence of PAC money our lawmaking responsibility loses its legitimacy.

We have an opportunity and the responsibility to address the issue of campaign finance reform in the present Congress. The public is alarmed at the explosion of PAC money, editorial opinion overwhelmingly calls for reform, and many Congressmen and Senators are vitally concerned.

Senators INOUYE, PROXMIRE, MATSUNAGA, and HATFIELD have joined me in sponsoring S. 911. Congressman PAUL SIMON of Illinois has introduced a companion measure in the House of Representatives (H.R. 2876). This legislation seeks to accomplish two goals. Initially, its passage would register the judgment of Congress that the unprecedented growth in campaign contributions by PAC's represents a threat to the electoral process; undermines equal political participation and exercises a coercive influence on the legislative process. It would put the Congress on record as supporting a limit on the role of political action committees in financing Federal elections.

Second, the Chiles-Simon bill would establish by statute a Commission to Reform Campaign Finance. This Commission will provide the mechanism to achieve the desired reforms. It is a short-term, bipartisan instrument that will have the mission of fully examining the complex legal, political, and practical questions involved in campaign finance and developing recommendations for achieving the goals set by the Congress.

Mr. President, the Congress faces many pressing and important issues. I would place high on that list the challenge to insure the purity and integrity of Federal elections. How we are elected, whether the concept of political equality is realized, is critical to our ability to be a truly representative legislative body. The American public is beginning to question just who is being represented in Congress. It is a question we had better answer promptly and with the clear message that it is the public not the special interest to which Congress responds. To send that message we must pass meaningful campaign reform legislation.●

INDIANA SMALL BUSINESSMEN OF THE YEAR

● Mr. QUAYLE. Mr. President, I am proud to bring the Senate's attention to the State of Indiana's Small Businessmen of the Year, Allan B. Hubbard and Edwin H. Klink, both of Indianapolis, Ind. These two gentlemen have been selected as Indiana's most outstanding small businessmen for their efforts in making their company, Worldwide Chemicals, Inc., into one of this country's fastest growing and most successful small businesses.

Al Hubbard attended Vanderbilt University for his undergraduate studies and obtained his master's in business and his law degree from Harvard University in 1974. While at Harvard, Al met Ed Klink, who attended West Point and after two tours of duty in Vietnam, went on to obtain his master's in business from Harvard. These two gentlemen embarked on separate careers in assorted locations around the country, but each kept their eye out for potential small business acquisitions and partnerships. Indiana was

lucky enough to provide the opportunity that Ed and Al wanted.

In 1977, after they had exhausted all possibilities for private financing, Ed and Al were able to obtain an SBA loan guarantee and thus, acquired what is now known as Worldwide Chemicals, Inc. What started as a tiny manufacturer of automotive cleaning products with annual sales of approximately $70,000 had annual sales of over $3.2 million in 1982. Aside from themselves, Al and Ed had two employees in 1977. They now have 30 full-time employees. Inc. Magazine rated it as the 41st fastest growing small business in the Nation based on this dramatic 2,005 percent growth in sales during the first 5 years under these two gentlemen's ownership. Worldwide Chemicals is currently the second largest manufacturer of automotive cleaning products in the country and retains a 10-percent share of the domestic market.

Ed and Al are in Washington this week as part of National Small Business Week. Here, they will receive the recognition that they deserve for their accomplishments from the Nation's leading small business advocates and experts, including President Reagan.

One cannot help but notice the fact that Ed Klink and Al Hubbard have accomplished this spectacular growth throughout the drastic economic decline that this country has been experiencing. I have observed these two gentlemen's dedication to their company and to its success over the past few years and I am not at all surprised by their accomplishments. I fully expect to hear more about them in the years to come.●

SPEECH BY ART BRESSI COMMEMORATING NATIONAL POW/MIA DAY

● Mr. DECONCINI. Mr. President, on April 9, 1983, one of my constituents, Mr. Art Bressi, gave a speech at Nellis Air Force Base in Nevada to commemorate National POW/MIA Day. Mr. Bressi is a past national commander of the American Defenders of Bataan and Corregidor. As a Japanese prisoner of war for more than 3 years, Mr. Bressi was both a witness to and victim of the atrocities and human indignities to which our servicemen and women were subjected during their internment. Despite the inhumane conditions in which they lived and the torture they endured, these heroic members of our Armed Forces remained loyal to their country and to the principles upon which it was founded. They are, I think you would agree, the bravest of the brave. Mr. Bressi's words are far more poignant than any I could say, and I ask that the full text of his speech be printed in the RECORD.

The speech follows:

IN COMMEMORATION OF POW/MIA DAY
(By Art Bressi)

Major General Jack Gregory, Mrs. Gregory, Ladies and Gentlemen, My Combat Buddies, and Former Prisoners of War:

To each of you, we would like to express our gratitude that you would take time to share today's events with us. We all know the primary purpose in this gathering is to honor and pay homage to our prisoners of war and those still missing in action. With your indulgence, I will remind you what is a Prisoner of War or a person Missing in Action.

Both the Prisoner of War and the person Missing in Action start out as a free individual, volunteering his life for his country with honor. He or she is a member of an honorable, and, at least in wartime, a high esteemed group—the Military.

Society and governments have held many conferences to provide humanitarian controls over those unfortunate enough to fall into either of these categories. From the beginning of time to the present, however, the lot of either varies tremendously from one place to another, from one time to another, from one season to another, from one war to another, and even from one captor to another.

I, personally, do not know of any individual who ever surrendered to an enemy. In the instances with which I have awareness, we were either shot down or captured through no direct fault of our own.

Time and time again we have been asked what difference there is between us and the combat soldier, sailor, marine or airman. The answer is quite simple: Each of us have been combat people with our respective branches of service. In addition to having been combat people, we have been subjected to an extra undeserved dose of trauma imposed upon us. The prospect of combat was what we bargained for; the undeserved dose of a POW or MIA was not mentioned in that contract.

The enemy has tortured us, beaten us, starved us, marched us unreasonable distances, failed to provide us with adequate medicines and clothing, exposed us to ridicule from the civilian populace, denied us the benefit of communications with our parents, families, and the outside world, forced many of us to solitary confinement, humiliated us in entirely too many instances, shattered our dignity, worked us and starved us almost to death, and, yes, even tried to brainwash us.

Most of us here today would gladly take 100 days of combat rather than one of the many bitter and unforgetable days we had as prisoners of war. Today, we would like to remind the American public we haven't changed much from the combat person we were; it is just that circumstances tossed us into a situation we neither wanted nor liked. We ask only that the same Americans never forget those who were prisoners of war, and, even more importantly, those who are still missing in action.●

THE EMERGENCY SCHOOL AID EXTENSION ACT OF 1983

● Mr. MOYNIHAN. Mr. President, yesterday, I joined with a number of my distinguished colleagues in introducing S. 1256, legislation to authorize a new program of special assistance for school desegregation activities. This program is intended as a replacement for the Emergency School Aid Act, first enacted in 1972 to assist local communities to desegregate voluntarily their schools.

I have a long history with the original bill. In 1970 I was a member of President Nixon's administration and was much involved in education matters for the President when he first proposed the creation of a program to assist local communities to desegregate voluntarily their schools. He recommended that $1 billion be provided for that purpose and directed, by Executive order, the creation of the emergency school aid program; 2 years later, Congress adopted the Emergency School Aid Act, later to become title VI of the Elementary and Secondary Education Act of 1965.

The purpose of the 1972 act was to encourage communities to voluntarily adopt desegregation programs. From that time forward, Federal funds to assist local school districts with desegregation have been made available; from fiscal year 1973 to fiscal year 1981—the last year ESAA was a separate categorical program—$2.2 billion was appropriated for this purpose. The funds received under the ESAA program have been used for a variety of activities. These include staff training, employment of additional staff, development of new curricula, creation of magnet and neutral site schools, and the pairing of schools with colleges and businesses to help address desegregation related problems.

During consideration of the Omnibus Reconciliation Act of 1981 President Reagan decided to include the emergency school aid program in his State education block grant proposal. I fear that an unanticipated consequence of this decision has been the drastic reduction or elimination of voluntary school desegration programs in hundreds of school districts throughout the country.

In fiscal year 1981, $512 million was available to State and local educational agencies for all programs folded into the block grant. A year later, funding for the same programs was reduced to $455 million. With respect to emergency school aid assistance, school districts in 43 States received $149.2 million in fiscal year 1981. But such assistance has not been forthcoming under the block grants. This is due in large part to the formula embodied in the block grants, which has had the effect of increasing the number of school districts eligible to receive Federal education assistance at a time when the combined level of funding was being reduced.

A recent survey by the American Association of School Administrators (AASA), an organization of approximately 17,000 local school superintendents, revealed that "94.3 percent of the school districts surveyed are not using chapter 2 funds for desegrega-

tion purposes; the funds are simply not available in the quantity necessary." A Rand study prepared for the U.S. Department of Education in February concluded:

> The inclusion of ESAA in chapter 2 largely eliminates Federal financial support of desegregation. Moreover, ESAA's demise has a further consequence for nondiscrimination. The Education Department's Office for Civil Rights (OCR), charged with enforcing nondiscrimination, had sign-off reponsibility on ESAA grant applications. This authority gave enormous leverage in reviewing school district treatment of protected groups. LEA's complied with OCR dictates rather than lose ESAA funds.

The Reagan administration has repeatedly stated its support for voluntary school desegregation. A 1980 Presidential campaign position paper stated:

> Governor Reagan would rigorously enforce laws which prohibit intentional racial segregation, and would support voluntary integration plans such as magnet schools.

In a brief filed with the Fifth Circuit Court of Appeals in New Orleans on August 9, 1982, the Justice Department called for the use of voluntary incentives rather than mandatory busing to achieve desegregation. The brief further specified the establishment of magnet schools offering unique, high-quality curriculums to draw students from all areas into a segregated school.

Yet, by including ESAA moneys in the chapter 2 block grant program, the administration has effectively deprived school districts of funds necessary for undertaking school desegregation programs. Apart from the dissipation of ESAA funding, the Reagan administration has further proposed eliminating the $24 million civil rights training program under title IV of the Civil Rights Act of 1964. The President's fiscal year 1984 budget proposal did not include any request for title IV funding; a program that has helped pay the salaries of State desegregation officials and has provided assistance to school districts implementing desegregation plans—a substantial number of which include voluntary elements—under court order.

The cutbacks in ESAA funding have been almost ruinous for major school districts around the country, many of which are midway through implementation of school desegregation plans. In New York, funding for school desegregation has dropped precipitously, from more than $20 million in fiscal year 1981 to less the $3 million in fiscal year 1982—an 85-percent cut. The Buffalo public schools received $6.57 million for desegregation purposes in 1981, but only $1.05 million in 1982. The school systems in New York City, Rochester, West Irondequoit, Syracuse, Newburgh, and Mount Vernon also experienced dramatic reductions in Federal support.

The situation elsewhere is no better. A recent report of the House Subcommittee on Civil and Constitutional Rights reveals that the State of Delaware received only half as much for all of its school districts in 1982 from the block grant as one of its school districts—New Castle County—received in 1981 under the ESAA program. An article in the March 24, 1982, issue of Education Week reports that two school systems in Missouri—St. Louis and Kansas City—received more Federal desegregation money in 1981 than all of the State's school districts obtained through the block grant in 1982.

The Emergency School Aid Extension Act of 1983 would create a new program of special assistance for school desegregation activities as title VI of the Elementary and Secondary Education Act of 1965. Senators EAGLETON, DANFORTH, BRADLEY, TSONGAS, JACKSON, RIEGLE, and LAUTENBERG have joined me in this bipartisan effort.

Our bill would authorize $125 million for desegregation assistance in fiscal year 1983. Depending on appropriations, this money could be made available to school districts by the beginning of the 1983-84 school year. The bill also authorizes $125 million for each of the 3 succeeding fiscal years 1984-86. Total funding for desegregation activities would amount to $500 million.

Local school districts would compete for funding under the program by submitting applications to the Department of Education, which would administer the program; 5 percent of the total authorization would be set aside for grants to State educational agencies providing support for desegregation related activities to local school districts. Similar legislation was approved today by the full House Committee on Education and Labor with bipartisan support.

Surely, the proven benefits of the emergency school aid program, as a fulfillment of the Federal Government's commitment to school desegregation, and as a means for providing millions of American schoolchildren with better educational opportunities, warrant this expenditure. In December 1982, the U.S. Commission on Civil Rights, in a statement on school desegregation, noted:

> Since its enactment in 1972, ESAA has assisted numerous school districts in the desegregation process and has aided school children to overcome the educational disadvantage of minority group isolation.

To date, my efforts to restore the emergency school aid program have been endorsed by 12 major education and civil rights organizations: American Federation of Teachers, American Association of School Administrators, Leadership Conference on Civil Rights, National Association for the Advancement of Colored People, National Coalition for Quality Integrated Education, National Committee for School Desegregation, National Education Association, National School Boards Association, National Urban League, National Association of Elementary School Principals, the Council of Great City Schools, and the Federal Education Project of the Lawyers Committee for Civil Rights Under the Law.

I strongly urge my colleagues in the Senate to reconsider the advisability of including the emergency school aid program in the State education block grants. Although local control of education is a well established principle in this Nation, the Federal Government has made the funding of school desegregation a national priority over the past 13 years. Without a separate, categorical program of assistance for voluntary desegregation, local school districts across the country will in all probability be unable to meet their obligations under the law. We must not surrender our commitment to providing equal education opportunities to children of all races by depriving local school districts of the resources necessary to carry out desegregation plans. To do so would be to undo all of the good achieved by ESAA programs to date.

Mr. President, I request that a table showing the loss of Federal school desegregation funding in my own State of New York under the chapter 2 block grant, and the full text of S. 1256, be included with my statement in the RECORD.

The material follows:

ECIA CH. 2 EXPENDITURES FOR DESEGREGATION PURPOSES [1] BY FORMER ESAA DISTRICTS IN NEW YORK STATE SCHOOL YEAR 1982-83

District	Formula award			Money allocated for desegregation	Desegregation dollars as percentage of formula award		Competitive grants		Total expended by districts for desegregation
	Public	Nonpublic	Total		Total	Public share	Amount for desegregation	Percentage of district's total award dollars	
Buffalo	$956,866	$335,950	$1,292,816	$956,866	74.0	100.0	$95,000	61.5	$1,051,866
Mount Vernon	196,886	28,043	224,929	1,573	.7	.8			1,573
Newburgh	336,010	27,618	[2] 363,628	336,010	92.4	100.0			336,010
New York City [3]	8,305,723	2,692,429	[2] 10,998,152				281,683	50.6	281,683

ECIA CH. 2 EXPENDITURES FOR DESEGREGATION PURPOSES [1] BY FORMER ESAA DISTRICTS IN NEW YORK STATE SCHOOL YEAR 1982–83—Continued

District	Formula award			Money allocated for desegregation	Desegregation dollars as percentage of formula award		Competitive grants		Total expended by districts for desegregation
	Public	Nonpublic	Total		Total	Public share	Amount for desegregation	Percentage of district's total award dollars	
Poughkeepsie	109,657	40,711	150,368	104,107	69.2	94.9			104,107
Rochester	647,210	116,508	763,718	647,210	84.7	100.0	88,491	86.7	735,701
West Irondequoit	16,873	4,202	21,075				79,000	100.0	79,000
Syracuse	266,572	58,441	325,013	266,572	82.0	100.0	89,312	33.7	355,884
Total	10,835,797	3,303,902	14,139,699	2,312,338			633,486		2,945,824

[1] Includes Magnet School expenditures.
[2] This figure differs from an earlier reported figure due to adjustments in the assignment of nonpublic schools to this district.
[3] NYC's block grant money was divided among 35 public school districts ($237,000 per district). Because this amount was insufficient for maintaining any single district's desegregation programs previously funded by ESAA, only moneys acquired through discretionary grants were directed toward desegregation activities.

S. 1256

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Elementary and Secondary Education Act of 1965 is amended by inserting at the appropriate place in the Act the following title:

"TITLE VI—SPECIAL DESEGREGATION ACTIVITIES

"SHORT TITLE

"SEC. 601. This title may be cited as the Emergency School Aid Extension Act of 1983."

"FINDINGS AND PURPOSE

"SEC. 602. (a) The Congress finds that the process of eliminating or preventing minority group isolation and improving the quality of education for all children often involves the expenditure of additional funds to which local educational agencies do not have access.

"(b) The purpose of this title is to provide financial assistance—

"(1) to meet the special needs incident to the elimination of minority group segregation and discrimination among students and faculty in elementary and secondary schools; and

"(2) to encourage the voluntary elimination, reduction, or prevention of minority group isolation in elementary and secondary schools with substantial proportions of minority group students.

"POLICY WITH RESPECT TO THE APPLICATION OF CERTAIN PROVISIONS OF FEDERAL LAW

"SEC. 603. (a) It is the policy of the United States that guidelines and criteria established pursuant to this title shall be applied uniformly in all regions of the United States in dealing with conditions of segregation by race in the schools of the local educational agencies of any State without regard to the origin or cause of such segregation.

"(b) It is the policy of the United States that guidelines and criteria established pursuant to title VI of the Civil Rights Act of 1964 and section 182 of the Elementary and Secondary Education Amendments of 1966 shall be applied uniformly in all regions of the United States in dealing with conditions of segregation by race whether de jure or de facto in the schools of the local educational agencies of any State without regard to the origin or cause of such segregation.

"AUTHORIZATION

"SEC. 604. (a) The Secretary shall, in accordance with the provisions of this title, carry out a program designed to achieve the purpose set forth in section 602(b).

"(b) There are authorized to be appropriated for the purposes of this title, $125,000,000 for fiscal year 1983 and such sums as may be necessary for each of the three succeeding fiscal years.

"(c)(1) From the amount appropriated in each fiscal year the Secretary shall reserve not more than 5 per centum for carrying out section 607.

"(2) The remainder of the amount appropriated for each fiscal year shall be available for grants and contracts to local educational agencies which meet the eligibility requirements of section 605.

"ELIGIBILITY FOR ASSISTANCE

"SEC. 605. (a)(1) The Secretary is authorized to make a grant to, or enter into a contract with, a local educational agency—

"(A) which is implementing a plan—

"(i) which has been undertaken pursuant to a final order issued by a court of the United States, or a court of any State, or any other State agency or official of competent jurisdiction, and which requires the desegregation of minority group segregated children or faculty in the elementary and secondary schools of such agency, or otherwise requires the elimination or reduction of minority group isolation in such schools, and which may, in addition, require educational activities in minority group isolated schools not affected by the reassignment of children or faculty under the plan in order to remedy the effects of illegal segregation; or

"(ii) which has been approved by the Secretary as adequate under title VI of the Civil Rights Act of 1964 for the desegregation of minority group segregated children or faculty in such schools; or

"(B) which, without having been required to do so, has adopted and is implementing, or will, if assistance is made available to it under this title, adopt and implement, a plan for the complete elimination of minority group isolation in all the minority group isolated schools of such agency; or

"(C) which has adopted and is implementing, or will, if assistance is made available to it under this Act, adopt and implement a plan—

"(i) to eliminate or reduce minority group isolation in one or more of the minority group isolated schools of such agency;

"(ii) to reduce the total number of minority group children who are in minority group isolated schools of such agency; or

"(iii) to prevent minority group isolation reasonably likely to occur (in the absence of assistance under this title) in any school in such district in which school at least 20 per centum, but not more than 50 per centum, of enrollment consists of such children; or

"(D) which, without having been required to do so, has adopted and is implementing, or will, if assistance is made available to it under this title, adopt and implement a plan to enroll and educate in the schools of such agency children who should not otherwise be eligible for enrollment because of nonresidence in the school district of such agency, where such enrollment would make a significant contribution toward reducing minority group isolation in one or more of the school districts; or

"(E) which is developing a plan of desegregation—

"(i) issued by a court of the United States or a court of any State, or any other State agency or official of competent jurisdiction; or

"(ii) undertaken by such agency voluntarily; and which plan will require the desegregation of minority group segregated children or faculty in the elementary and secondary schools of such agency, or otherwise will require the elimination or reduction of minority group isolation in such schools, or which has been approved by the Secretary as adequate under title VI of the Civil Rights Act of 1964 for the desegregation of minority group segregated children or faculty in such schools, and the period for such planning does not exceed two years; or

"(F) which is located within, or adjacent to, a Standard Metropolitan Statistical Area, the schools of which are not attended by minority group children in a significant number or proportion, and which has made joint-arrangements with the schools of a local educational agency located within that Standard Metropolitan Statistical Area which are attended by minority group children in a significant proportion, for the establishment or maintenance of one or more integrated schools.

"(2) Not more than one grant for the development of a plan under clause (E) of paragraph (1) may be made to any local educational agency. Receipt of a grant or contract under clause (E) of paragraph (1) shall not be used as an absolute defense in any court of the United States or a court of any State, or before any other State agency or official of competent jurisdiction.

"(3) No grant may be made under clause (F) of paragraph (1) unless the application for such grant has been approved by local educational agencies in the Standard Metropolitan Statistical Area, the students of which constitute two-thirds or more of the number of students in the schools of all the local educational agencies in the Standard Metropolitan Statistical Area.

"(b)(1) Except as provided in paragraph (2), no educational agency shall be eligible for assistance under this title if the Assistant Secretary for Civil Rights has determined that it has, after June 23, 1972—

"(A) transferred (directly or indirectly by gift, lease, loan, sale, or other means) real or personal property to, or made any services available to, any transferee which or reasonably should have known to be a nonpublic school or school system (or any organization controlling, or intending to establish, such a school or school system) without prior determination that such nonpublic school or school system (i) is not operated on a racial-

ly segregated basis as an alternative for children seeking to avoid attendance in desegregated public schools, and (ii) does not otherwise practice, or permit to be practiced, discrimination on the basis of race, color, or national origin in the operation of any school activity;

"(B) had in effect any practice, policy, or procedure which results in the disproportionate demotion or dismissal of instructional or other personnel from minority groups in conjunction with desegregation or the implementation of any plan or the conduct of any activity described in this section, or otherwise engaged in discrimination based upon race, color, or national origin in the hiring, promotion, or assignment of employees of the agency (or other personnel for whom the agency has any administrative responsibility);

"(C) in conjunction with desegregation or the conduct of an activity described in this section, had in effect any procedure for the assignment of children to or within classes which results in the separation of minority group from nonminority group children for a substantial portion of the school day, except that this clause does not prohibit the use of bona fide ability grouping by a local educational agency as a standard pedagogical practice; or

"(D) had in effect any other practice, policy, or procedure, such as limiting curricular or extracurricular activities (or participation therein by children) in order to avoid the participation of minority group children in such activities, which discriminates among children on the basis of race, color, or national origin, except that, in the case of any local educational agency which is ineligible for assistance by reason of clause (A), (B), (C), or (D), such agency may make application for a waiver of ineligibility, which application for a waiver of ineligibility contain such information and assurances as the Secretary shall require by regulation in order to insure that any practice, policy, or procedure, or other activity resulting in the ineligibility has ceased to exist or occur and include such provisions as are necessary to insure that such activities do not reoccur after the submission of the application.

"(2) Whenever a local educational agency applies for assistance under clause (E) of section 605(a)(1), the provisions of clauses (C) and (D) of paragraph (1), of this subsection shall not apply if the local educational agency provides assurances in the application for assistance that the development of the plan for which assistance is sought will address the conditions described in such clauses (C) and (D).

"(3)(A) Applications for waivers under paragraph (1) may be approved only by the Secretary. The Secretary's functions under this paragraph shall, notwithstanding any other provision of law, not be delegated.

"(B) Application for waiver shall be granted by the Secretary upon determination that any practice, policy, procedure or other activity resulting in ineligibility has ceased to exist, and that the applicant has given satisfactory assurance that the activities prohibited in this subsection will not reoccur.

"(4) No application for assistance under this title shall be approved prior to a determination by the Secretary that the applicant is not ineligible by reason of this subsection.

"(5) All determinations pursuant to this subsection shall be carried out in accordance with criteria and investigative procedures established by regulations of the Secretary for the purpose of compliance with this subsection.

"(6) All determinations and waivers pursuant to this subsection shall be in writing.

"(7) The Secretary shall prepare and include in the annual report required by section 422(a)(4) of the General Education Provisions Act a list of all the waivers granted under this subsection for the preceding fiscal year.

"AUTHORIZED ACTIVITIES

"SEC. 606. (a) The Secretary shall make sums appropriated under section 604(a) for any fiscal year available for programs and projects designed to meet educational needs that arise from the development of or the implementation of a plan described in section 605(a). The programs and projects may include, but are not limited to—

"(1) planning to implement or carry out a plan of desegregation issued by a court of the United States, or a court of any State, or any other State agency or official of competent jurisdiction, and which requires the desegreation of minority group segregated children or faculty in the elementary and secondary schools of such agency, or otherwise requires the elimination or reduction of minority group isolation in such schools or which has been approved by the Secretary as adequate under title VI of the Civil Rights Act of 1964 for the desegregation of minority group segregated children or faculty in such schools;

"(2) the planning for, design of, and conduct of programs in magnet schools, including necessary minor remodeling or alteration of existing school facilities;

"(3) the training of school staff and local educational agency staff in the handling of problems incident to the implementation of a qualifying plan;

"(4) the provision of additional staff members (including teacher aides) to assist in meeting educational needs that arise from the implementation of the plan;

"(5) innovative educational activities, including extracurricular activities, which involve the joint participation of minority group children and other children;

"(6) community relations activities, including public information efforts, in support of the implementation of a qualifying plan;

"(7) the provision of compensatory services to children who have received such services under title I but who are no longer eligible to receive those services as a result of attendance area changes under a qualifying plan;

"(8) activities to prevent or eliminate recurring or continuing problems resulting from the implementation of a qualifying plan; and

"(9) in the case of an applicant implementing a court-ordered desegregation plan under section 605(a)(1(A)(i), the conduct of educational activities in one or more minority group isolated schools which are not affected by the reassignment of children or faculty under the plan, where the activites have been required by the court to remedy the effects of illegal segregation.

"(b) In recruiting and hiring teacher aides to assist in carrying out a program or projects under this section the local educational agency shall give preference to parents of children affected by the implementation of a qualifying plan.

"SPECIAL STATE PROJECTS

"SEC. 607. From the amount reserved under section 604(c)(1) in each fiscal year, the Secretary is authorized to make grants to, or enter into contracts with—

"(1) State educational agencies, and

"(2) other State agencies involved in or responsible for the desegregation of public elementary and secondary schools within a State,

to provide supportive services to local educational agencies or groups of local educational agencies to implement voluntary or court-ordered plans to eliminate or reduce minority group isolation in such agencies.

"APPLICATIONS

"SEC. 608. (a) Any local educational agency desiring to receive assistance under this title shall submit to the Secretary, at such time, in such form, and containing only such information as the Secretary deems necessary to carry out their functions under this title, an application describing the activities to be carried out under the application during the period, not to exceed five academic years, for which assistance is being sought. That application, together with all correspondence and other written materials relating thereto, shall be made readily available to the public by the applicant and by the Secretary. The Secretary may approve an application only upon a determination that such application—

"(1) has been developed and will be carried out—

"(A) in open consultation with parents, teachers and, where applicable, secondary school students, including at least one public hearing at which such persons have had a full opportunity to understand the program for which assistance is being sought and to offer recommendations thereupon, and

"(B) with the participation of a committee composed of parents of children enrolled in the applicant's schools, teachers and, where applicable, secondary school students, of which at least half the members shall be such parents and at least half shall be persons from minority groups;

"(2) sets forth such policies and procedures, and contains such information, as will insure that funds paid to the applicant under the application will be used solely to pay the additional cost to the applicant in carrying out the programs described in the application;

"(3) provides that the plan with respect to which such agency is seeking assistance (as specified in section 605(a)(1)(A)) does not involve freedom of choice as a means of desegregation, unless the Secretary determines that freedom of choice has achieved, or will achieve, the complete elimination of a dual school system in the school district of such agency;

"(4) provides assurances that such agency will carry out, and comply with, all provisions, terms, and conditions of any plan, as described in section 605, upon which a determination of its eligibility for assistance under this title is based;

"(5) sets forth such policies and procedures, and contains such information, as will insure that funds made available to the applicant (A) under this title will be so used (i) as to supplement the level of funds that would, in the absence of such funds, be made available from non-Federal sources for the purposes of the program for which assistance is sought, and for promoting the integration of the schools of the applicant, and for the education of children participating in such program, and (ii) in no case, as to supplant such funds from non-Federal sources, and (B) under any other law of the

United States will, in accordance with standards established by regulation, be used in coordination with such programs to the extent consistent with such other law, except that nothing in this clause shall prohibit the use of funds under this title for otherwise authorized activities required under a court-ordered plan described in section 605(a)(1)(A)(i);

"(6) provides that (A) to the extent consistent with the number of minority group children in the area to be served who are enrolled in private nonprofit elementary and secondary schools which are operated in a manner free from discrimination on the basis of race, color, or national origin, and which do not serve as alternatives for children seeking to avoid attendance in desegregated or integrated public schools, whose participation would assist in achieving the purpose of this title stated in section 602(b), provides assurance that such agency (after consultation with the appropriate private school officials) has made provisions for their participation on an equitable basis, and (B) to the extent consistent with the number of children, teachers, and other educational staff in the school district of such agency enrolled in or employed in private nonprofit elementary and secondary schools whose participation would assist in achieving the purpose of this title stated in section 602(b), such agency (after consultation with the appropriate private school officials) has made provisions for their participation on an equitable basis;

"(7) provides that the applicant has not reduced its fiscal effort per student or the aggregate expenditure for the provision of free public education for children in attendance at the schools of such agency for the fiscal year for which assistance is sought under this title to less than that of the second preceding fiscal year;

"(8) provides that the appropriate State educational agency has been given reasonable opportunity to offer recommendations to the applicant and to submit comments to the Secretary;

"(9) provides (A) that the applicant will make such periodic reports as the Secretary may reasonably prescribe, and (B) that the applicant will keep such records and afford such access thereto as—

"(i) will be necessary to insure the correctness of such reports and to verify them, and

"(ii) will be necessary to insure the public adequate access to such reports and other written materials; and

"(10) provides that the applicant, in developing the program or project for which it seeks assistance, has considered the need for compensatory services for children who received those services under title I of this Act, but who are no longer eligible to receive those services as a result of attendance area changes under a qualifying plan.

"(b) The Secretary shall determine whether the applicant is eligible under section 605(b), and notify the applicant in writing of any determination of ineligibility under that subsection, including in detail the relevant information on which the determination of ineligibility is based, not later than March 1 of the year in which the academic year or other period for which the assistance is sought begins. Not later than June 30 of that year, the Secretary shall notify the applicant of the approval or disapproval of the application and the amount of its award, if any.

"(c) No application under this section may be approved which is not accompanied by the written comments of a committee established pursuant to clause (2)(B) of subsection (a). The Secretary shall not approve an application without first affording the committee an opportunity for an informal hearing if the committee requests such a hearing.

"(d) In approving applications submitted under this title the Secretary shall apply the following criteria:

"(1) the recentness of the implementation of the plan described in section 605(a) or modification thereof;

"(2) the proportion of minority group isolated children involved in the plan described in section 605(a);

"(3) the need for assistance based on the expense or difficulty of effectively carrying out a plan described in section 605(a) and the program or projects for which assistance is sought; and

"(4) the degree to which the program or project for which assistance is sought affords promise of achieving the purposes of this title.

"(e)(1) The Secretary shall not give less favorable consideration to the application of a State or local educational agency (including an agency currently classified as legally desegregated by the Secretary) which has voluntarily adopted a plan qualified for assistance under this title (due only to the voluntary nature of the action) than to the application of a local educational agency which has been legally required to adopt such a plan.

"(2) The Secretary shall not finally disapprove in whole or in part any application for funds submitted by a State or local educational agency without first notifying the agency of the specific reasons for his disapproval and without affording the agency an appropriate opportunity to modify its application.

"(f) The Secretary may, from time to time, set dates by which applications shall be filed.

"(g) In the case of an application by a combination of local educational agencies for jointly carrying out a program or project under this title, at least one such agency shall be a local educational agency described in section 605(a) and any one or more of such agencies joining in such application may be authorized to administer such program or project.

"(h) No State shall reduce the amount of State aid with respect to the provision of free public education or the amount of assistance received under chapter 2 of the Education Consolidation and Improvement Act of 1981 in any school district of any local educational agency within such State because of assistance made or to be made available to such agency under this title.

"PAYMENTS

"SEC. 609. (a) The Secretary shall pay to each applicant having an application approved under section 608 the amount set forth in the application. Payments under this title for a fiscal year shall remain available for obligation and expenditure by the recipient until the end of the succeeding fiscal year.

"(b)(1) If a local educational agency in a State is prohibited by law from providing for the participation of children and staff enrolled or employed in private nonprofit elementary and secondary schools as required by clause (6) of section 608(a), the Secretary may waive such requirement with respect to local educational agencies in such State and, upon the approval of an application from a local educational agency within such State, shall arrange for the provision of services to such children enrolled in, or teachers or other educational staff of, any nonprofit private elementary or secondary school located within the school district of such agency if the participation of such children and staff would assist in achieving the purpose of this title stated in section 602(b). The services to be provided through arrangements made by the Secretary under this paragraph shall be comparable to the services to be provided by such local educational agency under such application.

"(2) In determining the amount to be paid pursuant to paragraph (1), the Secretary shall take into account the number of children and teachers and other educational staff who, except for provision of State law, might reasonably be expected to participate in the program carried out under this title by such local educational agency.

"(3) If the Secretary determines that a local educational agency has substantially failed to provide for the participation on an equitable basis of children and staff enrolled or employed in private nonprofit elementary and secondary schools as required by paragraph (8) of section 610(a), he shall arrange for the provision of services to children enrolled in, or teachers or other educational staff of, the nonprofit private elementary or secondary school or schools located within the school district of such local educational agency, which services shall, to the maximum extent feasible, be identical with the services which would have been provided such children or staff had the local educational agency carried out such assurance. The Secretary shall pay the cost of such services from the grant to such local educational agency and shall have the authority for this purpose of recovering from such agency any funds paid to it under such grant.

"(c) After making a grant or contract under this title, the Secretary shall notify the appropriate State educational agency of the name of the approved applicant and of the amount approved.

"ATTORNEY FEES

"SEC. 610. Upon the entry of a final order by a court of the United States against a local educational agency, a State (or any agency thereof), or the United States (or any agency thereof), for failure to comply with any provision of this title or for discrimination on the basis of race, color, or national origin in violation of title VI of the Civil Rights Act of 1964, or the fourteenth amendment to the Constitution of the United States as they pertain to elementary and secondary education, the court, in its discretion, upon a finding that the proceedings were necessary to bring about compliance, may allow the prevailing party, other than the United States, a reasonable attorney's fee as part of the costs.

"NEIGHBORHOOD SCHOOLS; PROHIBITION AGAINST USE OF APPROPRIATED FUNDS FOR BUSING

"SEC. 611. (a) Nothing in this title shall be construed as requiring any local educational agency which assigns students to schools on the basis of geographic attendance areas drawn on a racially nondiscriminatory basis to adopt any other method of student assignment.

"(b) No funds appropriated for the purpose of carrying out this title may be used for the transportation of students or teachers (or for the purchase of equipment for such transportation) in order to overcome racial imbalance in any school or school system, or for the transportation of stu-

dents or teachers (or for the purchase of equipment for such transportation) in order to carry out a plan of racial desegregation of any school or school system, except for funds appropriated pursuant to title I of the Act including any portion of such funds as are attributable to children counted under subparagraph (C) of section 3(d)(2) or section 403(1)(C) of the Act.

"DEFINITIONS

"SEC. 612. Except as otherwise specified, the following definitions shall apply to the terms used in this title:

"(1) For the purpose of section 605(a)(1)(F), the term 'integrated school' means a school with an enrollment in which a substantial proportion of the children is from educationally advantaged backgrounds, in which the proportion of minority group children is at least 50 per centum of the proportion of minority group children enrolled in all schools of the local educational agencies within the Standard Metropolitan Statistical Area, and which has a faculty and administrative staff with a substantial representation of minority group persons.

"(2) The term 'magnet school' means a school or education center that offers a special curriculum capable of attracting substantial numbers of students of different racial backgrounds.

"(3) The term 'minority group' refers to (A) persons who are American Indians and Alaskan Natives; Asians and Pacific Islanders; blacks, not of Hispanic origin; Hispanics; Franco-Americans; and Portuguese; and (B) (except for purposes of section 605), as determined by the Secretary, persons who are from environments in which the dominant language is other than English and who, as a result of language barriers and cultural differences, do not have an equal educational opportunity.

"(4) The terms 'minority group isloated school' and 'minority group isolation' in reference to a school mean a school and condition, respectively, in which minority group children constitute more than 50 per centum of the enrollment of a school.

"(5) The term 'Standard Metropolitan Statistical Area' means the area in and around a city of fifty thousand inhabitants or more as defined by the Office of Management and Budget.

"(6) The term 'State' means one of the fifty States or the District of Columbia.".

SEC. 2. (a) Section 561 of the Education Consolidation Improvement Act of 1981 is amended by striking out "VI,".

(b) Section 576 of such Act is amended by striking out "title VI, relating to emergency school aid, of the Elementary and Secondary Education Act of 1965,".

(c) Section 577 of such Act is amended—

(1) by striking out clause (3); and

(2) by redesignating clauses (4), (5), (6), and (7) as clauses (3), (4), (5), and (6), respectively.

(d) Section 587(a)(1) is amended by striking out "VI,".

● Mr. DANFORTH. Mr. President, I am pleased to join with Senators MOYNIHAN, EAGLETON, and others in introducing the Emergency School Aid Extension Act. Passage of this legislation would once again put into place a categorical program designed to assist local communities with the desegregation of their public schools. Such a program existed for almost a decade, until the Congress folded the then Emergency School Aid Act (ESAA) program into the education block grant. This was done in the Omnibus Reconciliation Act of 1981.

I have been a supporter of many of this administration's block grant proposals. This is because I believe that the election of November 1980 was in part a response to the American people's fear that they somehow were losing control of their Government's decisions. To the extent that the Federal Government tells the people and the States how every tax dollar will be spent, we exacerbate that concern. Wisdom about local affairs—more often than not—is close to the people and not reposed in the Federal Government.

There are exceptions to every rule, however, and desegregation assistance must, in my judgment, be one. I am the first to admit that my reflections have been focused by the genuine need for such assistance in my own State, particularly for the voluntary desegregation plan being implemented by the St. Louis city and county schools. But the experience of my own State is of consequence for all the States with school districts in such need.

In the school year 1981–82, the last year before ESAA was folded into the education block grant, the city of St. Louis received $4,666,000 for desegregation assistance. The very next year St. Louis received only $654,000 from the block grant, which replaced not only the emergency school aid program, but four other programs as well. In the 2 years from 1980 to 1982 St. Louis experienced a 90-percent decline in funding for the programs included in the education block grant. According to the Council of the Great City Schools, no other major city suffered quite the proportional loss of St. Louis. But others have suffered severe declines—Boston, Buffalo, Cleveland, Dallas, Minneapolis, Oakland, and Seattle have all experienced funding declines of more than 70 percent.

We must reverse this unfortunate state of affairs for several reasons. First, drastically lower Federal funding for desegregation purposes discourages the States and school districts themselves from solving their own problems. The Federal Government should be doing what it can to encourage the localities to do more, not less.

Let me be clear. By this I do not in any way mean that the Federal Government should be encouraging the forced busing of school children. The bill we are introducing today specifically provides that these new funds cannot be used for busing purposes. But I do mean that we should work diligently to encourage desegregation by such desirable means as the establishment of magnet schools and open enrollment. Such schemes are expensive.

Second, some States are in the second or third year of implementing desegregation plans and find themselves with little or no money to carry them out.

Third, and most important, desegregation plans often are mandated by the Federal Government itself, frequently by order of the Federal courts. The Federal Government has a financial obligation to help local communities meet the desegregation requirements set out by the Federal Government itself.

This legislation authorizes $125 million for desegregation assistance in fiscal year 1983. This sum would be available for the 1983–84 school year. The aid is targeted to local educational agencies which are or will be adopting and implementing desegregation plans, either voluntarily or by court order.

As I have emphasized, no funds, under the bill would be available for busing. There are, however, several activities for which funds specifically are authorized, including the planning and implementation of desegregation plans, the planning and establishment of magnet schools, the training of staffs to handle desegregation efforts, the hiring of community relations personnel to keep the public informed about such efforts, and so forth.

The award of funds by the Secretary of Education would be made on a competitive basis. The bill sets out certain criteria for the approval of applications, including: First, the need for assistance; second, the proportion of minority students involved in a desegregation effort; third, the degree to which a plan actually would achieve desegregation; and fourth, the recentness of the implementation of a desegregation plan. The bill also allows the Secretary of Education to reserve up to 5 percent of the funds authorized to aid those State agencies which are themselves providing desegregation assistance to the public schools. This should act as an incentive for States to do more.

It is no exaggeration to say that there is widespread concern in our country today about the Federal Government's commitment to quality education for all our public school children. Integration of our public schools is a constitutional necessity, and most of the achievements in the desegregation of our public schools are a result of Federal action. Without resort to the failed policy of forced busing, we can demonstrate a steady progress in this area, but the Federal Government must be prepared to accept its financial responsibility. I urge my colleagues to lend their support to this bill.

EARLY CONSIDERATION OF S. 24 URGED

● Mr. HUDDLESTON. Mr. President, last week the House of Representatives completed consideration of H.R. 1190, the Emergency Agricultural Credit Act of 1983. I introduced a similar bill, S. 24, on January 26. The Senate Agriculture Committee favorably reported the bill, with amendments, on March 18.

Despite the emergency conditions that many farmers are operating under, the Senate has not taken action on this important legislation.

The threat of foreclosure is the most serious and demoralizing aspect of the current depression in the agricultural economy. Federal credit programs need to be adjusted immediately to prevent foreclosures against efficient farm operators who are experiencing temporary financial hardship through no fault of their own.

S. 24 provides the temporary emergency credit assistance that is needed immediately by our Nation's farmers.

The bill has been significantly modified by the Agriculture Committee to reduce possible costs and to address other concerns that have been raised about its provisions. I am prepared to make additional modifications in the bill to insure its enactment.

PROVISIONS OF THE BILL

Specifically, the bill establishes a temporary loan deferral program for Farmers Home Administration farm loan borrowers who are faced with foreclosure. Under the bill, the Secretary of Agriculture will be required to grant deferrals on repayment of loans if the borrower can show to the satisfaction of the Secretary—

First, that he has exercised good management practices; second, that due to circumstances beyond his control, he is temporarily unable to continue making payments on the loan; and third, that he has a reasonable chance of repayment of the loan after the deferral period ends.

Under the bill, no principal or interest owed to the Farmers Home Administration by borrowers will be foregiven. In addition, the bill restricts eligibility for deferrals to those farmers who are unable to make payments on their loans due to circumstances beyond their control; and the burden of proof to qualify for a deferral rests solely on the borrower.

The bill gives the Secretary of Agriculture discretionary authority, through the end of fiscal year 1984, to implement the insured economic emergency loan program.

The bill provides $200 million in additional insured operating loan funds for use during the remainder of this fiscal year, for farmers who are refused credit from their traditional lenders.

The bill raises the insured operating loan limit for individual FmHA farm borrowers to $300,000 and extends the maximum repayment period on operating loans from 7 to 15 years.

The bill requires the Farmers Home Administration to make use of the operating loan and ownership loan funds allocated for the low-income, limited-resource farmer programs during this fiscal year.

The bill provides that the interest rate on any Farmers Home Administration farm loan that is consolidated, reamortized, or rescheduled must be set at a rate that is the lower of the original rate of interest on the loan or the current rate being charged by the Farmers Home Administration on similar loans.

DEFERRAL PROVISIONS

The deferral provisions contained in S. 24 were modified by the Agriculture Committee to address administration concerns.

The bill, as reported, addresses the administration's concerns that, under S. 24, large numbers of FmHA borrowers, not just those in need, would seek loan deferrals, and that the provisions of S. 24 would lead to the filing of a large number of lawsuits by those seeking deferrals.

Specifically, the bill as reported, provides that the Secretary of Agriculture will be required to grant a deferral on repayment of the loan only if the borrower subject to foreclosure for nonpayment can show to the satisfaction of the Secretary that he meets all the qualification criteria.

It should be noted, that last year, about 8,000 Farmers Home Administration farm borrowers were foreclosed or liquidated for financial reasons. The Farmers Home Administration does not expect the foreclosure and liquidation figures this year to be higher than last year. If that is the case, a good estimate of the total number of farmers who could possibly receive deferrals under the bill this year would be 8,000; of this number, not all would necessarily qualify for a deferral under the rigid qualification criteria established by the committee's amendment.

Also, it is important to note that the CBO estimate and other published estimates of the costs of the deferral do not fully reflect the true fiscal effect of deferrals under the bill.

These presentations estimate only the principal and interest lost during the periods of deferral; they do not include the income from repayment of loan installments deferred. As the Congressional Budget Office itself notes in its cost estimate on S. 24, as reported, and I quote, "Most of such deferred payments would presumably be recovered in subsequent years, with interest."

We must recognize that, under the bill's deferral provisions, interest and principal payments on loans will only be deferred, not forgiven; the deferral payments will ultimately be recovered in subsequent years, with interest; and, based on these facts, notwithstanding the various estimates and regardless of assumptions as to the number of farmers participating, the major costs of the deferral will be administrative costs.

I share the administration's concern about involving the Farmers Home Administration in excessive litigation. FmHA is already being sued in 22 district courts and in several bankruptcy proceedings because, to many borrowers, its present foreclosure policy is not clear, is too subjective, and is open to interpretation by FmHA employees at the county level.

Any confusion and appearance of inequity will be eliminated by defining in law, as does the bill, the principles that will be used to grant a deferral.

ECONOMIC EMERGENCY LOANS

Under the bill, the implementation of the economic emergency loan program will be at the discretion of the Secretary of Agriculture. The Secretary needs this discretionary authority to respond to unanticipated economic emergencies, such as the credit conditions that, recently, resulted in the Farmers Home Administration running out of operating loan funds in 20 States.

CONCLUSION

The authorities provided in the bill will enable the Farmers Home Administration to assist FmHA borrowers who have been adversely affected by the depression in agriculture and many of the thousands of other farmers who have been refused credit from farm credit system and commercial lenders this year.

The provisions of S. 24 provide much more than symbolic support for our Nation's farmers. This legislation will provide the tangible and sensible assistance that our farmers need now.

Therefore, I urge the Senate to give this legislation the timely consideration that it deserves.●

CLINCH RIVER—NOW GAO CRITIQUES COST SHARING

● Mr. HUMPHREY. Mr. President, as I noted in my RECORD entry of April 26, the backers of Clinch River breeder reactor are now arguing that private investors might offset Federal appropriations on the basis of the revenues the plant might produce from electricity sales. As I noted then, this is a mistaken notion since there does not appear to be any willing buyer for either the reactor or its electricity.

Now the General Accounting Office (GAO) has come out with a report on DOE's alternative financing proposals of March 15, which makes it clear that such cost-sharing will actually in-

crease the Federal Government's liability for the project. As the report notes:

. . . as long as the Government can raise funds by selling Treasury securities at a rate less than the rate of return which is anticipated for the CRBR private sector funds, it would cost the Government more—in interest payments—to build the CRBR with funds from private investors. The Government will incur this increased cost whether the project succeeds or fails.

But the likelihood that the project will operate as well as DOE hopes it will is open to serious question. It is also doubtful that the project will produce as much revenue as DOE optimistically projects. Under these circumstances, DOE's proposals to guarantee that the investors will get all of their money back plus interest would end up costing the taxpayers even more. As the GAO notes, with these guarantees—ones that the project's backers claim are essential to secure private investors—"the Federal Government, still retains most risks [sic] if the project fails, or if cost overruns occur."

All of this should lead us to the conclusion that the proper test for whether or not Congress should back the project is whether or not it has the stomach to pay for it outright. I believe the House all gave us some instruction on this issue last December. It's time we followed the House's lead.

Mr. President, because the funding of Clinch River and alternative financing for the project will be major issues in the Senate's consideration of the energy and water development appropriations bill for fiscal year 1984, I ask that the entire text of the GAO's report be printed in the RECORD.

The text of the report follows:

U.S. GENERAL ACCOUNTING OFFICE,
Washington, D.C., May 11, 1983.

B-104105.

Subject: Analysis of Studies on Alternative Financing for the Clinch River Breeder Reactor (GAO/RCED-83-151).

Hon. GORDON J. HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: The Conference Committee Report for the Further Continuing Appropriations Act for Fiscal Year 1983 (Public Law 97-377, Dec. 20, 1982) directed the Department of Energy (DOE) to report to the Congress by March 15, 1983, on options for securing additional private sector financing for the Clinch River Breeder Reactor (CRBR) project. When CRBR was first authorized in 1970 it was estimated to cost $700 million with private sponsors and the Government assuming nearly equal shares of the project's cost. However, the private contribution was fixed while the Government was responsible for cost increases. In the intervening years project costs have increased to an estimated $4 billion [1] of which the Government's share is about $3.7 billion. Against this backdrop, the Conference Committee requested DOE to report on additional private financing.

Between February 16 and March 2, 1983, you and three other Members of Congress [2] asked us to review the anticipated DOE report and provide our assessment on the alternatives presented by DOE for securing additional private financing.

DOE issued its "Report to the Congress on Alternative Financing of the Clinch River Breeder Reactor Plant Project" on March 15, 1983. In the report DOE said that its approach was to develop Government technical input which a utility task force, organized by the Breeder Reactor Corporation [3] in January 1983, could use to develop private financing. Reflecting this approach, the DOE report presented

A history of the CRBR;

Information on project costs, reliabililty, and projected revenue; and

A synopsis of a possible private financing alternative developed for DOE by the corporation task force.

The DOE report presented the corporation's alternative, but DOE's report did not present any other alternatives.

The corporation's alternative is only a preliminary one. The Chairman of the Breeder Reactor Corporation presented the task force's alternative in a March 12, 1983, report to the Secretary of Energy. This report also described in general terms other funding alternatives for CRBR from the private sector perspective. In transmitting the report to DOE, the corporation chairman cautioned that the report was preliminary, had not been reviewed by the corporation's board of directors and the task force was continuing its work developing more specifics on its alternative.

The task force concluded that CRBR should be able to attract a large amount of private funding—up to an additional $800 million—because it, would (1) generate revenue from electricity sales and (2) provide additional income from Federal tax incentives which private investors should find attractive. However, the corporation report points out that the viabililty of private sector investment will be contingent on enactment of a number of Government assurances and guarantees related to funding, completing, licensing, and operating the CRBR plant. The report points out that the assurances and guarantees are required because CRBR presents unique risks to private investors.

Thus DOE's and the corporation's reports represent only the beginning of a process that will require much more work before a detailed private financing proposal is developed. DOE's report recognizes that developing the specific structure and arrangements of a private investment venture will require extensive discussions with potential customers of CRBR-generated power and negotiations with potential investors. DOE stated that such discussions and negotiations were not possible in the time available to prepare its and the corporation's reports. Without such discussions, DOE said that it could not predict the potential interest of possible invetors in the project. DOE recognized that decisions by potential investors depend on developing a more specific proposal and on the final form of legislative authority that DOE seeks to enable it to provide the desired assurances and guarantees. DOE is relying on the corporation to pursue discussions with potential investors aimed at developing specific investment and marketing strategies. A date for completing a private investment proposal has not been established. However, DOE officials said that they hoped a specific proposal can be developed in time to provide private funding in early 1984.

Because DOE and the corporation have not yet developed and presented specific information, a detailed analysis or conclusion regarding the feasibility and/or merits of increased private sector investment in the CRBR project is not possible. However, certain of the underlying concepts contained in the framwork for securing alternative financing have been sufficiently described for us to offer the general comments and observations contained in this report. It should be noted that other variations of private CRBR financing—both within and outside the framework presented—are possible, and could affect our comments and observations.

Before presenting our comments and observations on the financing proposals, one basic point must be made. Over the last several years, we have consistently pointed out in reports and testimony to the congress that CRBR is a research and development project on the road to demonstrating the potential for applying breeder technology in the United States. Therefore, we continue to believe that the main element in considereing funding decisions must be the project's research and development importance.

With this overall point in mind, we have two specific observations on the private financing proposal presented in the corporation task force report. First, while the proposal will probably change many of the existing project arrangements, the Federal Government still appears to retain most risks if the project fails or if cost overruns occur. Second, while the additional private sector financing discussed in DOE's and the corporation's reports would produce budgetary savings during the CRBR's construction, such savings would be a trade-off against either future reductions in Federal revenues or additional budget outlays. Specifically, the revenues expected to be produced from the sale of CRBR-generated electricity will be used to pay back private investors. If, however, the revenue is inadequate, private investors would have to be repaid from DOE appropriations.

The remainder of this report discusses (1) our objectives, scope, and methodology, (2) why private sector financing is being sought for CRBR, and (3) certain issues raised by changing the existing CRBR arrangements and their impact on the Federal Government.

OBJECTIVES, SCOPE, AND METHODOLOGY

At the request of the Chairmen, Subcommittee on Energy Conservation and Power, and Subcommittee on Oversight and Investigations, House Committee on Energy and Commerce; Senator Gordon J. Humphrey, and Representative Marilyn Lloyd, this report discusses Federal impacts of the private funding proposal presented in DOE's and the Breeder Reactor Corporation's reports. While some of the requestors asked for reports on other areas, these areas will be covered in subsequent reports.

Neither DOE's nor the Breeder Reactor Corporation's report proposed a specific method for obtaining private sector investment. We did, however, review the financial mechanisms and the assumptions, guarantees, and assurances which are discussed in the respective reports. Our review was conducted from the perspective of how private sector funding and the associated tax bene-

Footnotes at end of article.

fits would affect the net Federal cost of the CRBR and how the reports' assumptions, guarantees, and assurances would affect the risk and responsibilities assumed by the Federal Government. Our review was also conducted under the assumption that CRBR would be built.

We discussed the contents of the reports with DOE and Breeder Reactor Corporation task force officials who were responsible for major report segments. When appropriate, we discussed the reports and documents with those officials who prepared information used in the reports and with utilities which may be asked to purchase CRBR-generated electricity or invest in the CRBR project.

We also reviewed a March 18, 1983, internal DOE study which detailed a possible financing arrangement. This study was not intended to be a part of DOE's report to the Congress nor was it intended to be an actual draft proposal. However, because the assumptions and financing configuration were within the parameters of DOE's and the corporation's reports, the study was a useful example of a possible proposal. We discussed this study with the DOE officials who prepared it and with the officials who prepared DOE's report to the Congress.

The review was performed in accordance with generally accepted government auditing standards.

PRIVATE SECTOR FINANCING FOR CRBR SOUGHT BECAUSE OF INCREASED FEDERAL COSTS

When the CRBR—designed to be the Nation's first liquid metal fast breeder reactor[4] demonstration plant—was initially authorized by the Congress in 1970, it was estimated to cost around $700 million. In 1974, after completion of detailed design work, Government and industry participants estimated that the CRBR would cost $1.7 billion to construct.[5] A number of utility companies had pledged $256 million to the Breeder Reactor Corporation to be used to construct the CRBR (that sum, plus interest, is currently estimated to total about $352 million). The remainder was to be funded by the Federal Government.

DOE currently estimates CRBR will cost $4 billion. Much of the cost increase can be attributed to project delays and changes in program emphasis. We have issued reports on the program's direction[6] and its current cost estimate.[7] In those reports we commented that the Congress has several basic options available for deciding the future of breeder reactors in the United States and on the uncertainty of CRBR cost estimates.

Although CRBR's estimated construction cost has increased substantially, the utilities' contribution has remained relatively constant (increasing only due to interest earned on contributions). The resulting increase in the Federal Government's share has been the subject of congressional concern during its recent debates over continued funding for CRBR. Accordingly, the Congress directed DOE to study alternative methods to finance the remaining $2.3 billion required to complete the CRBR (about $1.7 billion of the total $4 billion has already been funded). Reflecting the intensity of the congressional concern is the Secretary of Energy's statement in early 1983 that unless private sector funding was secured, he doubted that the Congress would continue to fund CRBR.

DOE's March 15, 1983, report provided a framework for developing financing alternatives but did not contain a specific, detailed proposal for obtaining private funding. Instead, DOE indicated that the report was to provide technical input "concurrent with and for use in the development of financial alternatives by the private sector Utility Task Force organized under the auspices of the Breeder Reactor Corporation." As a result, DOE's report contains background information on CRBR and present projections for CRBR's operating costs, electricity production, and the anticipated revenues. DOE's report also synopsizes the private financing alternative presented in the corporation's report.

The Breeder Reactor Corporation report was prepared to provide information on alternative financing possibilities for CRBR. Its report estimated that up to an additional $800 million in private investment could be provided to construct CRBR. It also states that based on estimated CRBR revenues and tax benefits to the investors, significant private sector investment should be available if the Federal Government guarantees and assurances include:

Federal assurances that CRBR will be completed, licensed, and operated. Such assurances must be unconditional if private investment is to obtained. In the event CRBR is not completed, licensed, and operated, private investors must be able to recover their investment plus a return on the investment.

Federal assurance that CRBR will produce the estimated revenues. The Federal Government must guarantee the amount of power CRBR will produce and that the power will be purchased at an assured price.

Federal commitment that adequate Federal funds will be appropriated after fiscal year 1983 to enable current construction schedules to be met and a commitment that funding will continue until the project achieves a commercial level of reliability.

Federal assurance that CRBR-related tax incentives will be available to private investors. The tax incentives include investment tax credits and accelerated depreciation. Further, the report suggested that if they were not adequate, the Congress might wish to consider other tax credits, tax deductions, and exemption of investment income.

To take full advantage of the Government's guarantees and the tax benefits, the corporation report concluded that the private investment should be a combination of direct borrowing, repayable equity partnership, and debt securities.

The corporation's report provides few details. For instance, specific rates of return, payback methods, and timing were not discussed. Although the corporation's report was synopsized in DOE's report to the Congress, the Deputy Assistant Secretary for Breeder Programs told us that DOE's report would not recommend a specific proposal because it will be up to the Congress to select a proposal.

PRIVATE FINANCING WOULD CHANGE EXISTING CRBR ARRANGEMENTS

Under present arrangements, DOE is responsible for (1) managing the CRBR project, (2) supplying all but about $350 million (mainly the utilities' contribution) toward the cost of designing and constructing the CRBR, and (3) funding all cost overruns. In addition, although the Tennessee Valley Authority (TVA) is responsible for operating the CRBR during its first 5 years of operation, DOE will pay all operating costs and will receive all revenues from the sale of CRBR-produced electricity. Information obtained from operating the CRBR, as well as patent and licensing rights, belong to the Federal Government and to the contributing and noncontributing utilities.

DOE's and the Breeder Reactor Corporation's reports predict that in order to attract additional private sector investment, many of the existing arrangements will need to be changed. For example, (1) the private investors will take over partial ownership of CRBR from DOE, (2) TVA would have to give up its option to purchase CRBR after its first 5 years of operation, and (3) TVA will have to give up its right to purchase CRBR power at its marginal power cost. If the private financing proposal includes the types of guarantees outlined in the DOE and corporation's reports, the Federal Government, still retains most risks if the project fails, or if cost overruns occur.

POTENTIAL IMPACT OF PRIVATE FINANCING

DOE's and the Breeder Reactor Corporation's reports state that private sector investment could provide an alternative financing source for the funds needed to construct the CRBR. The reports estimate that private financing could replace from $385 million to $800 million (depending on the timing of the investment) that would alternatively have to be provided by the Federal Government. Such private investment would offer the distinct short-term advantage of reducing the need for appropriated funds to complete construction of the CRBR.

Although private funding for CRBR will reduce the amount of Federal appropriations required for construction, it could increase the Government's overall cost. The added cost could accrue if the Government has to repay the investment at a rate of return higher than the Government's cost of borrowing, a likely possibility. The tax benefits available to private investors will, in effect, enhance the investors rate of return by reducing their Federal taxes.

Private investors generally need a higher return than Government must pay for funds

Although no specific proposals have been presented, apparently the corporation report views private investment as a mixture of debt (loans and/or bonds) and equity (partnership) financing. Our discussions with corporation representatives indicate that a private equity investment would have to be repaid—both principal and interest—just as the loans and/or bonds are repaid. For that reason, the discussion of private investment repayment pertains to both the debt and equity portions of the funding. DOE officials projected that a rate of return in the range of 10 to 20 percent would be required to attract private funding. The Breeder Reactor Corporation expects debt financing to carry a rate of return of about 10 percent while the equity financing is expected to carry a rate of return—including tax benefits—of about 20 percent.

According to the Breeder Reactor Corporation's report, if private investment for CRBR is obtained, all such investment—including both equity and debt investment—must be repaid either from CRBR revenues or by the Federal Government, which would provide guarantees to project investors if the CRBR fails to provide the estimated revenues. Because the Federal Government is expected to guarantee that the investors will be repaid either from project revenues the Government is giving up, or from appropriations, the private investment can be viewed as a loan to the Government. Similarly, the direct Federal financing option can also be viewed as a borrowing arrangement because the Government raises much

of its money through direct borrowing in the capital market.

Thus, the value of private versus direct Federal financing can be determined by comparing the Government's borrowing cost under each alternative. In the private funding alternative the Government must pay the investor a rate of return which the corporation report estimates to be over 10 percent. In direct Federal borrowing the Government's interest rate is determined by the rate it pays on Treasury securities, which is currently under 10 percent. As illustrated, as long as the Government can raise funds by selling Treasury securities at a rate less than the rate of return which is anticipated for the CRBR private sector funds, it would cost the Government more—in interest payments—to build the CRBR with funds from private investors. The Government will incur this increased cost whether the project succeeds or fails. If the project succeeds, the higher interest cost will be paid from the project revenue. However, because of the difference in interest rates, the same amount of revenue could offset higher levels of Government borrowing. If the project fails or does not provide adequate revenues to repay investors, the Government will pay the cost with appropriations. Hence, obtaining private sector financing for the CRBR, of the type conceptually described by DOE and the Breeder Reactor Corporation, appears to offer no cost advantage over the current CRBR financing arrangement.

Need to consider tax consequences of obtaining private financing

The Breeder Reactor Corporation report stated that the tax benefits which may be associated with CRBR would help make it a more attractive investment to the private sector. The report cites investment tax credits and accelerated depreciation as the primary forms of tax incentives for private investors. Further, the report suggested that if these tax incentives were not adequate, the Congress may want to consider energy tax credits, research and development tax deductions, and exemption of investment income. While CRBR's tax benefits may attract private investors by raising the effective rate of return, it is important to note that they will result in reduced Federal tax revenues. However, this lost revenue must be balanced against increased revenues that the Government would receive by taxing income private investors would earn from investing in CRBR. Whether these increased future tax revenues would offset the short-term reduction in Federal tax revenues is a question we cannot answer because the corporation's report does not provide the necessary specific information.

Investment tax credits could be an important incentive in attracting private investors. Generally, the investment tax credit allows a reduction in the investors' tax liability amounting to 8 percent of their investment. Although the size of private equity investment is not now known, the credit on an $800 million investment could reduce investor's tax liability by a total of as much as $64 million (in year of expenditure dollars from 1984 through 1989).

The incentives resulting from accelerated depreciation provide another area in which the proposed private investment could affect Federal tax revenues. Using a financing example contained in a March 18, 1983, DOE study,[8] tax savings resulting from accelerating depreciation on a $763 million investment would reduce the investor's tax liability by about $351 million (assuming a Federal tax rate of 46 percent). Because the reduced tax liability is a loss to the Treasury, the Government could be giving up $351 million in future tax revenue—due to depreciation alone—to obtain an increased private investment of $763 million during 1984, 1985, and 1986.

The corporation report mentioned that additional tax credits could be made available to investors through energy tax credits.[9] The Energy Tax Act of 1978 (Public Law 95-618, Nov. 9, 1978) and the Crude Oil Windfall Profit Tax Act of 1980 (Public Law 96-223, Apr. 2, 1980) provided the Business Energy Investment Credit as one of several tax incentives to encourage the conversion from oil and gas to new energy systems. The credit applies to solar and wind energy systems and would have to be extended to apply to CRBR. Furthermore, the authority for the credit is scheduled to expire in 1985. If the act were amended to cover the CRBR and extended past 1985, investors could obtain a tax credit equal to 15 percent of their investment. This is in addition to the 8-percent investment tax credit available to CRBR investors and any other business investing in new machinery or equipment.

The corporation's report suggested that research and development tax deductions would also be an attractive incentive to private investors. That deduction would be equivalent to the difference between the cost of CRBR—about $4 billion—and the plant's market value. The market value is derived from expected sales revenue and tax savings to investors. The corporation task force estimates the market value to be about $1.1 billion. Therefore, the deduction could be based on about $3 billion. Because this incentive is a tax deduction and not a tax credit the actual impact on the tax liability would depend on the investors' tax rate. According to the corporation report, a favorable tax ruling or specific legislation would be required to make use of this incentive.

The final tax incentive suggested by the Breeder Reactor Corporation involves exempting investment income. If a portion of the private sector investment is obtained through industrial development bond issues, the income from that investment could be exempted from tax if special authorization by the Congress is enacted.

The Breeder Reactor Corporation believes that the tax benefits associated with privately financing CRBR will not decrease Federal tax revenues. The rationale for that belief is that if CRBR is privately financed, investors will not build a similar amount of coal-fired powerplant capacity. Thus, tax benefits taken on CRBR will only displace tax benefits that would otherwise be taken on coal plants.

This reasoning does not appear appropriate. First, private investors' tax benefits are a real cost of the private financing option, whether or not the CRBR displaces a conventional powerplant and, therefore, should be considered. We recognize, however, that although these tax benefits are a short-term loss to the Federal Government they could be offset over the life of the project by taxing investors' future income. Second, one should not necessarily assume that investors would build a similar amount of coal-fired powerplant capacity if CRBR were not built. Given the relatively small contribution CRBR power output (350 megawatt) would make to total generating capacity it is unlikely that the loss of CRBR power would of necessity require investment in coal-fired facilities. This is especially true in light of the overcapacity which currently exists in the utility market.

OTHER MATTERS

The alternative ways that the Congress may finance CRBR and the guarantees that may be required in a private funding alternative raise two basic issues about how the various financing and guarantee impacts can be best identified in the budget process.

The first issue revolves around two options for the timing of appropriations. Under one option called full funding, the Congress would, under any financing alternative, appropriate in DOE's budget the Government's total estimated cost for CRBR construction in the year it commits to construct the project. The main advantage of this approach is that it allows the Congress to have a clear presentation of the project's full cost when it considers whether construction should be started. Recognizing this advantage, we have consistently supported the full funding approach for projects such as CRBR. For example, we have recommended that the General Services Administration fully fund leases[10] and that the Federal Maritime Adminstration fully fund ship construction.[11] The other option is continued yearly review and appropriation. The main advantage of this approach is that it allows the Congress to evaluate a project's needs and schedule yearly.

The second question is how guarantees, which the Congress may have to honor in later years, should be shown in the budget. In numerous reports and testimony before the Congress we have stated that when the Federal Government makes guarantees which (1) could involve large amounts of money, (2) are directed to only a few entities, and (3) involve a considerable risk of failure, the Congress should provide—in the budget year of commitment—an amount of budget authority—an appropriation—sufficient to cover a significant portion of the guaranteed amount. The main advantage of this approach is that it ensures that the guarantees are given adequate visibility and appropriate attention in the budget process. Because CRBR meets these requirements any Federal guarantees supporting the project should—to some extent—be covered by budget authority.

In summary, this report discuses the salient aspects of the Breeder Reactor Corporation's report for achieving additional private financing for the CRBR. We point out that this alternative would modify certain of the management arrangements for the CRBR and presents a tradeoff of short-term budgetary savings against possible higher overall Government costs for the project. However, we recognize that the efforts to obtain additional private financing are of a preliminary and evolving nature and that changing certain of the key provisions in the financing alternative presented in the Breeder Reactor Corporation report would likely impact its attractiveness to the Government in terms of costs and risks. While the focus of this report is on obtaining additional private financing, we continue to believe that it is important not to lose sight that the main element influencing continued funding decisions is the CRBR's research and development importance.

We did not solicit DOE's review and comments on a draft of this report. We have, however, discussed the report's contents with managers of DOE's CRBR project in an effort to include DOE's views and ensure the report's accuracy.

We are also sending this report today to the Chairmen, Subcommittee on Energy Conservation and Power, and Subcommittee on Oversight and Investigations, House Committee on Energy and Commerce; and Representative Marilyn Lloyd.

We plan no further distribution of this report until 7 days from the date of the report unless its contents are publicly announced by you or one of the other requestors. At that time, we will send copies of the report to the Director, Office of Management and Budget; the Secretary of Energy; and to other interested parties. We will also make copies available to others on request.

Sincerely yours,

J. DEXTER PEACH,
Director.

FOOTNOTES

[1] In 1982 DOE estimated that CRBR would cost $3.6 billion. This figure is obtained by subtracting net revenue during the project's first 5 years of operation from construction cost. The $4 billion figure represents construction cost without subtracting net revenue.

[2] The three other Members of Congress who requested this review are listed on page 4. As agreed, this report will be issued simultaneously to all requestors.

[3] The Breeder Reactor Corporation is a company formed to obtain the financial and other participation of the 753 utilities contributing funds to the project.

[4] A breeder reactor is a nuclear reactor that creates more fuel than it consumes. The term "liquid metal" refers to the liquid sodium which serves as the reactor coolant.

[5] All CRBR costs are shown in current dollars.

[6] "The Liquid Metal Fast Breeder Reactor—Options for Deciding Future Pace and Direction" (GAO/EMD-83-79, July 12, 1982).

[7] "Interim Report on GAO's Review of the Total Cost Estimate for the Clinch River Breeder Reactor Project" (GAO/EMD-82-131, Sept. 23, 1982) and "Analysis of the Department of Energy's Clinch River Breeder Reactor Cost Estimate" (GAO/RCED-83-74, Dec. 10, 1982).

[8] On March 18, 1983, DOE completed a study of a possible investment scenario. The study is not part of the submission to the Congress and is not a proposal. The scenario is, however, within the investment framework described in DOE's and the Breeder Reactor Corporation's reports.

PROGRAM FOR THURSDAY

Mr. BAKER. Mr. President, I have consulted with the minority leader's office and have been advised that the minority leader agrees to the request I am about to put.

Before I do so, however, may I say that it is clear, for a variety of reasons, that no other amendments will be offered tonight and no further debate will be conducted. The alternatives are to stay here and stare at each other or make some other and more reasonable arrangement.

So I propose the following unanimous-consent request, which I am advised has been cleared with the minority leader.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

First, Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. tomorrow morning.

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

I further ask unanimous consent that after the recognition of the two leaders under the standing order, the time remaining between that time and 10:30 a.m. be devoted to the transaction of routine morning business, in which Senators may speak for not more than 2 minutes each.

THE BUDGET RESOLUTION

Mr. President, I ask unanimous consent that on tomorrow, at 10:30 a.m., the Senate resume consideration of the pending budget resolution, at which time the Domenici substitute will be the pending question.

I further ask unanimous consent that from the moment the Senate recesses this evening until 8:30 p.m. this evening, the time remaining in that period be charged equally against the two sides.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, with apologies to all those who have waited for further action today, let me simply say that, for reasons that have persisted throughout the day, it is clear now that negotiations will not produce an opportunity for us to vote any further today.

Therefore, Mr. President, I move, in accordance with the order previously entered, that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and at 7:57 p.m. the Senate recessed until tomorrow, Thursday, May 12, 1983, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate May 11, 1983:

THE JUDICIARY

Leonard D. Wexler, of New York, to be U.S. district judge for the Eastern District of New York vice George C. Pratt, elevated.

Charles E. Clapp II, of Rhode Island, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office, vice Irene Feagin Scott.

IN THE NAVY

The following-named officer for appointment as Senior Navy Member of the Military Staff Committee of the United Nations pursuant to the provisions of title 10, United States Code, section 711.

Having designated the following-named officer for command and other duties of importance and responsibility within the contemplation of title 10, United States Code, section 601, I nominate him for reappointment to the grade of vice admiral while so serving.

To be vice admiral

Vice Adm. James A. Lyons, Jr., xxx-xx-xx... xxx-.../1110, U.S. Navy.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. Arthur S. Moreau, Jr., xxx-xx-x... xxx-.../1110, U.S. Navy.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370.

To be vice admiral

Vice Adm. Thomas J. Kilcline, xxx-xx-xxxx xxx-.../1310, U.S. Navy.

IN THE MARINE CORPS

The following-named officers of the Marine Corps and Marine Corps Reserve for permanent appointment to the grade of major, under provisions of title 10, United States Code, section 624, subject to qualifications therefor as provided by law:

Adair, Charles W., xxx-...
Adams, Michael J., xxx-...

HOUSE OF REPRESENTATIVES—*Wednesday, May 11, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, gracious and good, full of compassion and love, may Your blessing be upon those who labor in this place. May Your spirit inspire them, may Your presence encourage them, and may Your grace give them a sense of renewal for each new day. May all who work here see in what they do a vocation of a high calling, and be sensitive to the needs of colleagues and associates. Help make us understanding of our mutual needs that together we may be in harmony and respect one for the other. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Vice President, pursuant to the provisions of sections 1928(a)-1928(d) of title 22, United States Code, as amended, appointed Mr. HATCH and Mr. SARBANES as members of the Senate delegation to the North Atlantic Assembly spring meeting to be held in Copenhagen, Denmark, June 9 to 13, 1983.

The message also announced that the Vice President, pursuant to the provisions of sections 276(d)-276(g) of title 22, United States Code, as amended, appointed Mr. HEFLIN as a member of the Senate delegation to the Canada-United States Interparliamentary Group during the first session of the 98th Congress to be held in Kenora, Canada, June 16 to 20, 1983.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO SIT TODAY DURING 5-MINUTE RULE

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services be permitted to sit today during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION FOR COMMITTEE ON ARMED SERVICES TO FILE REPORT ON DEPARTMENT OF DEFENSE AUTHORIZATION BILL FOR FISCAL YEAR 1984

Mr. PRICE. Mr. Speaker, I ask unanimous consent that the Committee on Armed Services have until midnight, tonight, May 11, to file a report on the fiscal year 1984 Department of Defense authorization bill.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

HOSPICE CARE

Mr. RATCHFORD. Mr. Speaker, in a very short time hospices have established themselves in this country as a compassionate, home-oriented alternative to hospital care for the terminally ill. When Congress authorized the coverage of hospice services under medicare last year, the administration expressed the fear that the availability of hospice care would induce some medicare beneficiaries to seek support from the program in place of home care they had been receiving from relatives.

This callousness toward the elderly and infirm is again being demonstrated by the administration's proposal to reduce the hospice benefit under medicare to 60 percent of the level Congress had envisioned. Although experience with hospice costs is not extensive, it is abundantly clear that a lower ceiling will discourage hospice use by the most severely ill patients. This is cruel to the patients and their families, could contribute to the destruction of an important new alternative in American health care, and ironically, will probably drive medicare costs up rather than down. Mr. Speaker, few people could argue against hospices on philosophical grounds. Let us not allow the administration to strangle them for spurious economic reasons.

AMERICA'S DISABILITY SYSTEM—A NATIONAL SCANDAL

(Mr. SHANNON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHANNON. Mr. Speaker, America's disability system has become a national scandal. Thousands of people have had their lives seriously disrupted by Government attempts to remove them from the disability rolls.

This is a disgrace. Our workers rely on our having a fair and effective disability system. But the Government has let them down.

Congress took a first step toward handling the problem last December, when we agreed to provide benefits for people who are cut from the rolls and are appealing the decision.

We also made improvements in the way the system is administered.

But those were stopgap measures. They did not go far enough. Today I am introducing the Social Security Disability Determination Reform Act of 1983.

This bill goes after the system's remaining problems. It guarantees that we will have sensible ways of determining who is able to work, and who is not.

I look forward to working with Social Security Subcommittee Chairman PICKLE to see to it that this Congress establishes effective disability procedures.

We need to assure all disabled Americans that if they are unable to work, they can at least count on being treated fairly.

THE PLIGHT OF OUR RAILROAD WORKERS

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, I rise today on behalf of the tens of thousands of railroad workers throughout this Nation who are unemployed or retired. Because the railroad industry is one of America's oldest and most important resources, its economic deterioration should be of grave concern to the Congress.

In Ohio's Ninth District alone, railroad unemployment hovers around 40 percent, with hundreds of men and women idled. These workers have been among the hardest hit by the current protracted recession. The outlook for a significant upturn in this basic industry is grim.

I believe we must send the same clear and positive message to the unemployed and the retired in our rail-

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

11-059 O-87-23 (Pt. 9)

road industry as we recently have to their counterparts in other private sector industries. Those covered by the Railway Labor Act should not be treated with any less compassion or any less commitment than other workers. H.R. 1646, which addresses the issue of the solvency of the railroad retirement system, and H.R. 459, which seeks to improve the compensation for unemployed railroad workers, should be acted upon immediately by this body. Failure to act on these initiatives in as immediate a manner as possible is to treat railroad workers as second-class workers.

There are many in this country who would have us forsake the railroad industry and its workers. I, for one, am not ready to do so. An industry that helped build this Nation deserves far better treatment than abandonment.

THE INTERNATIONAL MONETARY FUND

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, I rise today to speak in opposition to the administration's request for an additional $8.5 billion in funding for the International Monetary Fund.

It is time for Congress and America to make some hard choices about how we spend our money.

The International Monetary Fund is a giant loan operation with international bankers loaning American money to nations that often have no intention of paying the loans back.

The bankers do not assume the losses when their nations default. No, the American taxpayers foot the bill. This comes at a time when Americans cannot get loans for their own houses, businesses, or cars.

We should reject this bailout of the bankers for more money to the International Monetary Fund. The $13.6 billion currently spent on the Fund by the United States should be reduced.

Let us send the bankers a message. Let us stamp "No" on their loan application.

THE 100TH ANNIVERSARY OF BIRTH OF HARRY S. TRUMAN

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, today I am privileged to introduce legislation commemorating the 100th anniversary of the birth of America's finest President, Harry S. Truman, which will be celebrated on May 8, 1984. Joining me in this tribute are the members of the Missouri congressional delegation, the majority leader, JIM WRIGHT, and the Honorable CLAUDE PEPPER.

The bill which I am introducing would provide for a special joint session of Congress to be held on President Truman's birthday next year. A special joint committee of Congress would be selected to begin preparations and to issue invitations. Their work would be coordinated with the activities of the Truman Centennial Committee under the chairmanship of the Honorable Clark Clifford. The special joint session of Congress will be the pinnacle of the Truman Centennial Year Celebration activities which are being planned by the committee. The record of the proceedings on that date will provide an invaluable historic document on a remarkable American.

This afternoon, a news conference will be held to kick off the Truman Centennial Year Celebration. In attendence will be the Honorable Clark Clifford, Special Counsel to President Truman, the Honorable Averell Harriman, Truman's Secretary of Commerce, the Honorable John W. Snyder, Secretary of the Treasury under Truman, the President's daughter, Margaret Truman Daniel, and the Missouri congressional delegation. The convening of these luminaries attests to the love and admiration felt for Truman by those who worked for him, and by those for whom Truman worked.

I would like to make a special note of thanks to my colleague, Congressman ALAN WHEAT for the help and support he has given on this legislation. I also would be remiss to not thank my colleague, Congressman JOHN SEIBERLING, who facilitated the final passage of the Truman Home legislation yesterday so that we might have it for today's Centennial Year Celebration kick off.

It is a privilege for me to be a Missourian. To have known President Truman and his family. To have learned the same down home Missouri values that guided his leadership. To have experienced the same small town Missouri upbringing that made Truman, and me, proud to be an American. And, today, it is an honor to be able to take a part in planning the Truman Centennial Year Celebration to commemorate a man, a president, and a way of life that deserve to be remembered.

PEACE DAY AT TIFFANY ELEMENTARY SCHOOL IN RENTON, WASH.

(Mr. LOWRY of Washington asked and was given permision to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWRY of Washington. Mr. Speaker, the debate on the nuclear freeze and passage of the freeze resolution have happened because the American people have made clear their interest in peace and their support for efforts to control the arms race. I would like to take a brief moment to describe two innovative and touching events in support of peace, which I had the honor to attend in the Seventh Congressional District of Washington.

The sixth grade class of Tiffany Elementary School in Renton, Wash., organized a Peace Day last year. The school gymnasium was filled with students' pictures of pastoral scenes contrasted with drawings of war scenes. The students captioned the peaceful scenes with the word "Yes," and the war scenes with the word "No." The word "Peace" was spelled out using brightly colored handprints as the forms for the letters.

In part, this event was inspired by "Sadako and the Thousand Paper Cranes," a book by Eleanor Coerr. This beautiful book is about a little Japanese girl who lived from 1943 to 1955 and who died as a result of radiation from the atomic bomb dropped on Hiroshima. A Japanese legend has it that, if a sick person folds a thousand paper cranes, the gods will grant her wish and make her healthy again. Sadako died after making 644 paper cranes. The students of Tiffany Elementary folded cranes and hung them at the assembly in honor of Sadako, and gave me postcards to give to you, my colleagues, as tokens of their support for peace. The assembly was held on October 25, the same day Sadako died 27 years earlier.

Several weeks ago, the Phinney Neighborhood Association in Seattle dedicated a part of its community center as a Peace Site. Neighborhood residents of all ages attended the formal dedication ceremony where local members of Performing Artists for Nuclear Disarmament provided entertainment and local elected officials reiterated their support for the nuclear weapons freeze. The Phinney Peace Site will now stand as a resource center for the neighborhood and will be a rallying place for the neighborhood's call for world peace.

These two events symbolize the interest and concern of people of all ages and walks of life have about our future. Passage of the nuclear freeze resolution has made a strong statement that we are listening to the people of our country and are seeking to move forward in controlling the arms race.

A statue honoring Sadako is engraved with the following words, which may best express the meaning of our action:

This is our cry,
This is our prayer,
Peace in the world.

THE INTERNATIONAL MONETARY FUND

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, there is not a Member of the House who has not recognized the vital importance of the U.S. contribution to the International Monetary Fund—the IMF—and its key role in the world economy. Not a day goes by that we do not read of the potential for a world economic crisis, that we do not hear of the folly of "Bailing Out the Banks," that we do not learn of another foreign debtor tottering on the brink of default.

And yet, yesterday, the Banking Committee voted by a split vote of 27 to 14 to package legislation which increases the U.S. quota for the IMF with the bills that authorize the Eximbank and the multilateral development banks—knowing that these banks have their own distinct characteristics and some different purposes.

Was this action taken after considered study and open debate? It was not. This shameful business was rammed through the committee without discussion. Why? To create yet another omnibus bill—a bill to obscure difficult issues and deny the House the opportunity to examine the very different issues peculiar to each of these institutions and the substantive changes included in the legislation.

Mr. Speaker, I speak to you today to alert my colleagues, if the committee seeks to bring this omnibus bill to the floor, and if you agree with me that we must consider the banking authorizations independently, I urge you to join me in opposing this effort before the Rules Committee.

□ 1215

CANCELLATION OF MEETING WITH AMBASSADOR KIRKPATRICK ON CENTRAL AMERICA

(Mr. COLEMAN of Missouri asked ans was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN of Missouri. Mr. Speaker, I take this opportunity to inform the membership that the bipartisan meeting which was scheduled for tomorrow at noon, at which Jeane Kirkpatrick was to address the issue of Central America, unfortunately is being canceled because of the Security Council meeting on Nicaragua that Mrs. Kirkpatrick must attend in New York tomorrow.

We do want to reschedule this meeting in the near future at her convenience. I do want to try to get the word out to the membership so that nobody shows up at the meeting tomorrow at noon.

We had a very good response from both sides of the aisle to this meeting which attempts to try to come up with more understanding of a very crucial area of the world in Central America.

NATIONAL SCIENCE FOUNDATION AUTHORIZATION

(Mr. PURSELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PURSELL. Mr. Speaker, one of Government's chief objectives is the support of research and development. By providing incentives for business and industrial R&D through the Tax Code, Government helps maintain America's technological edge. And by supporting the National Science Foundation, we are able to enhance the base of scientific research in America.

Later today, the House is scheduled to consider the fiscal year 1984 authorization for the National Science Foundation. In supporting this legislation, we are able to support research activities in the most important of the scientific fields. Mathematical and physical sciences; engineering; biological, behavioral and social sciences all receive essential support through NSF.

I am particularly interested in the financial support provided for behavioral and social sciences. Research support in this area is essential in addressing the questions of improved human productivity. Important to remember is the fact that increases in human productivity are tied as closely with behavioral factors as with technological advances.

I support the authorization of the National Science Foundation. Its activities directly assist in fully 20 percent of Federal funding for basic scientific research. Because a large portion of NSF funds is directed to academic research, new scientific discoveries are accompanied by the training of the next generation of scientists and engineers. Federal support for research and development is important and authorization of NSF is one way to continue this activity.

REPRESENTATIVE VUCANOVICH SUPPORTS NATIONAL TOURISM WEEK

(Mrs. VUCANOVICH asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. VUCANOVICH. Mr. Speaker, I rise in strong support of House Joint Resolution 168 which would designate the week beginning May 29 as "National Tourism Week."

Each Member of this body should be a cosponsor of this bill because each State in the Union relies on tourism, to some extent, as a source of State revenue. In 1981, the travel and tourism industry generated 4.6 million jobs, paid $40 billion in wages and salaries, and produced $18 billion in Federal, State, and local taxes nationwide.

In Nevada, tourism is our major industry. In 1980, the gaming industry alone provided nearly $170 million in taxes and fees which is about 48 percent of all State revenue.

Nevada ranks No. 1 in terms of importance tourism is to our State economy, and tourism in Nevada is the No. 1 employer in the State. This industry certainly deserves national recognition.

I believe Memorial Day weekend is an appropriate time to focus national attention on tourism since this holiday marks the traditional beginning of summer and vacation travel. This special week could be used by the travel and tourism industry as a kickoff for summer promotional and educational activities throughout the United States.

We currently have approximately 150 cosponsors, but we need 218 in order for the bill to be reported to the floor. I urge each of my colleagues to cosponsor this legislation so the Nation can recognize an industry that contributes vitally to our national, State, and local economies.

"UNITED STATES HAS TIED ITSELF IN A KNOT" IN CENTRAL AMERICA

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, I would like to quote in part from a recent editorial by Georgie Anne Geyer which has placed, in tandem, Central America and Afghanistan:

> The Soviets simply act. There are no complications back home—no Congress, no marches, no dissent, no need for TV bang-bang.
>
> The United States, on the other hand, has so tied its hands regarding virtually any action in the world today that it is rapidly becoming an irrelevant and even pitiful player in the ongoing games of nations.
>
> Should we call ourselves Hamlet or Gulliver? Both characters fit.
>
> But do our actions reflect moral self-curtailment—or self-castration?

She goes on to say: "Doesn't guilt over what we have done come, in its turn, to deprive others, like these Afghans, of justice?"

We might add Central Americans, too. "The Soviets threaten us from acting here," she is writing from the Peshawar near the Afghan border in Pakistan,

> where the Afghans barely have the guns to fight, and we stop ourselves from acting in Central America where the Soviets and Cubans act with total immunity and freedom. Isn't this, to put it in the vernacular, a little screwy?

Today, it is our self-imposed powerlessness and not our power or abuse of power, that is the major topic of conversation and concern in the foreign ministries of the world.

She goes on to end,

I have here the feeling that if we do not, as a Nation, pull ourselves together and decide how and when to act, we will not be defeated militarily or go up in a nuclear cloud. We will just fade away, still debating how our evil must be controlled.

Mr. Speaker, I believe we can pull ourselves together. The issue is the pursuit of freedom. The place is Central America. The time is now.

COMING ELECTIONS IN GREAT BRITAIN—A STATEMENT ON NORTHERN IRELAND

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, Prime Minister Thatcher announced earlier this week that she is calling for general elections in Great Britain for June 9. The New York Times this morning observed that not since 1945 . . . "have Britain's major political parties fought a general election on platforms as diametrically opposed as the ones they have adopted for this election."

As chairman of the Ad Hoc Congressional Committee for Irish Affairs, it is my fervent hope that this election can serve as a referendum on British policy in Northern Ireland. The British Labor Party has taken a strong position in support of Irish unity. The ruling Conservatives have not put forth any new positions since their support of the Northern Ireland Assembly.

In the coming weeks, I hope the debate on Northern Ireland can be extensive and constructive. I hope both parties will endorse a political rather than a military solution in Northern Ireland. I hope both parties will recognize the absolute necessity of the British presence being withdrawn from the North in a phased and orderly fashion. I hope both parties will renounce all forms of violence in Northern Ireland, whether civilian or official. Above all, it is vital for both parties to take a stand on bringing the long agony of injustice in Northern Ireland to an end. Let the debate begin so the foundation for an agreement bring peace, justice, and human rights for all in Northern Ireland can be established.

REPORT ON ADMINISTRATION ACTIVITIES WITH RESPECT TO NUCLEAR NONPROLIFERATION AND PEACEFUL NUCLEAR COOPERATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore (Mr. MOAKLEY) laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs:

(For message, see proceedings of the Senate of today, Wednesday, May 11, 1983.)

EMERGENCY HOUSING ASSISTANCE ACT OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 142 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 1983.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 1983, with Mr. AUCOIN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Tuesday, April 19, 1983, section 1 was open for amendment at any point.

Are there any amendments to section 1?

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. WYLIE. Mr. Chairman, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. WYLIE: Strike all after the enacting clause and insert in lieu thereof the following:

"SHORT TITLE

"SECTION 1. This Act may be cited as the 'Emergency Housing Assistance Act of 1983.'

"ACTIONS BY FEDERAL SUPERVISORY AGENCIES

"SEC. 2. (a) Each Federal supervisory agency, with respect to financial institutions subject to its jurisdiction, and the Secretary, with respect to other approved mortgagees, shall, not later than 14 days following the date of the enactment of the Emergency Housing Assistance Act of 1983—

"(1) communicate in writing with each such institution or mortgagee encouraging them to exercise forbearance (including the acceptance of partial payment), to the maximum extent possible, with respect to residential mortgage foreclosures;

"(2) waive or relax limitations pertaining to the operations of such institutions or mortgagees with respect to mortgage delinquencies, to the extent the waiving or relaxing of such limitations is not inconsistent with laws relating to the safety and soundness of such institutions or mortgagees; and

"(b)(1) In considering applications for advances, the Federal home loan banks shall give special consideration to those institutions that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"(2) In considering applications for advances or discounts, the Federal Reserve banks shall give special consideration to those depository institutions and other borrowers that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"(3) In considering applications for extensions of credit, the National Credit Union Administration Board, on behalf of the National Credit Union Central Liquidity Facility, shall give special consideration to members that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"ACTION BY SECRETARY OF AGRICULTURE

"SEC. 3. Section 505 of the Housing Act of 1949 is amended—

"(1) by adding after 'the Secretary is authorized' the following: 'and encouraged to take all reasonable steps,'; and

"(2) by adding at the end thereof the following new sentences: 'The Secretary shall ensure that each delinquent borrower under this title is provided notice, in a timely and meaningful manner, of the assistance available under this section. The Secretary shall, to the extent necessary, provide technical assistance to each such borrower in applying for such assistance. The Secretary may, before or after any period of moratorium under this section, reamortize the accrued debt of any delinquent borrower under this title for a new period equal to the original amortization period, if such reamortization is likely to result in the resumption of periodic payments by such borrower.'."

EMERGENCY SHELTER ASSISTANCE

SEC. 4. (a) Section 107(a) of the Housing and Community Development Act of 1974 is amended by inserting after the first sentence thereof the following new sentence: "In addition to such amounts authorized to be set aside for grants under subsection (b), there is authorized to be appropriated $100,000,000 for fiscal year year 1984 to carry out the provisions of subsection (d).".

(b) Section 107(c) of the Housing and Community Development Act of 1974 is amended by inserting ", or appropriated for use under subsection (d)," after "subsection (b)".

(c) Section 107 of the Housing and Community Development Act of 1974 is amended by redesignating subsection (d) as subsection (e), and by inserting after subsection (c) the following new subsection:

"(d) The Secretary shall, to the extent approved in appropriation Acts, make grants to States, units of general local government and Indian tribes for the provision of shelter and essential services for individuals and families who are subject to life-threatening situations because of their lack of housing, except that in the case of a grant to a State, the Secretary shall first certify that the purposes of this subsection will be more effectively carried out by making a grant to such State that has an existing program that serves such individuals and families. Such grants shall be awarded on the basis of the need for emergency housing in the area where the project is or will be located, shall take into account regional variations in the cost of providing shelter, and shall consider the extent to which units of general local government and nonprofit organizations are currently providing shelter and assistance. Such grants may be used by such units of general local government or by local nonprofit organizations to rehabilitate existing structures in order to provide basic shelter, to maintain structures providing such shelter, to pay for utilities and the furnishing of such shelters, to provide for any necessary health and safety measures that are required to protect the individuals using such shelter, and for other purposes described in

section 105(a) that are consistent with the purpose of this program. In the case of a structure that is rehabilitated with assistance under this subsection, such structure shall be used for emergency housing, after such rehabilitation, for a period of not less than 3 years. In providing grants under this subsection, the Secretary shall take into consideration the special needs of families and single women. The Secretary shall ensure that grants provided under this subsection are used solely to provide additional shelter capacity and essential services and are not used to replace amounts currently expended in the provision of such shelter and services. The restriction contained in the preceding sentence shall not apply to applicants under this subsection that, pursuant to a State constitutional mandate, have provided shelter to any person who presents himself or herself for shelter.".

Mr. WYLIE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

(Mr. WYLIE asked and was given permission to revise and extend his remarks.)

(By unanimous consent, Mr. WYLIE was allowed to proceed for 5 additional minutes.)

Mr. GONZALEZ. Mr. Chairman, will the gentleman yield?

Mr. WYLIE. I yield to the Chairman.

Mr. GONZALEZ. I would merely ask the gentleman if this amendment he is offering in the nature of a substitute has been distributed and if we have copies of this version now before us.

Mr. WYLIE. I gave one to Mr. McMurray. I do believe you have one and they were filed at the desk.

Mr. GONZALEZ. The reason I ask is, the gentleman knows he has revised this two times. I believe the gentleman had two different versions of the substitute.

Mr. WYLIE. I had one, and then as I pointed out, I was adding $100 million for shelters for the homeless, and that is the second amendment which has also been printed in the RECORD.

I believe the gentleman has copies.

Mr. GONZALEZ. I thank the gentleman.

Mr. WYLIE. First of all, I would like to explain what my substitute amendment does.

First, it retains the language which Chairman ST GERMAIN offered in the form of an amendment and which I agreed to even before it was offered, directing Federal agencies to encourage market incentives to facilitate forbearance and to prevent foreclosures. This is in the finest tradition of our free enterprise system to help people to help themselves, I respectfully submit.

Second, my amendment removes the language mandating a moratorium on farmers home loans and retains the present language in the law and encourages the Secretary to provide a moratorium on payments of mortgage and interest for borrowers in need because of economic developments beyond their control. It actually strengthens the directive to the Secretary by saying that he should take all reasonable steps to grant a moratorium when possible.

Three, it retains the $100 million emergency shelter for the homeless provision, as I just mentioned.

Four, and most important, my amendment would strike the bureaucratic redtape $760 million administrative nightmare bailout to the mortgage lenders program. Why do I say it is a bailout to the mortgage lenders program? Because the bill would provide Federal dollars to private lenders.

The availability of Federal dollars would reverse a homeowner's priority to attempt to repay his mortgage and create incentives for lenders "to give notice of their intent to foreclose at the earliest possible moment of eligibility for subsidy." Those words are of HUD Secretary Samuel Pierce and his concern has been echoed by the American Bankers Association, the U.S. League of Savings Institutions, the American Farm Bureau Federation, and the Mortgage Bankers Association, and now the National Realtors Association.

I say administrative nightmare because it would be necessary for the HUD Secretary to propose regulations. This is provided for in section 108.

Second, to develop a handbook to guide HUD's central and field offices on how to process applications and assess eligibility. This is the only way, of course, that they could get the information into the field.

Third, hire and train HUD staff or contract the job to someone outside the agency in order to assure HUD processing of all applications within 45 days.

HUD says it would require as many as 250 new employees and I believe it because this bill requires the HUD Secretary to do various things. I counted it and there are 65 different directives mentioned to the HUD Secretary in this bill that he must perform before it would be applied.

□ 1230

Fourth, he must consult with the Federal Home Loan Bank Board to establish a data base from which to begin, that is section 104, paragraph 5.

Fifth, he would have to verify that the mortgagor has suffered a reduction in income and determine that the loss is significant. Section 105.

Sixth, he would have to calculate the amount of assistance necessary to bring a delinquent mortgagor current and to pay the difference between 38 percent of the mortgagor's net monthly effective income and his mortagage. Seven, assess the home owner's prospects for reemployment or rebut the presumption that the mortgagor meets the requirement before this loan can be made.

Now, the Secretary is going to be a very, very busy man if he carries out all those mandates under their bill. I do not believe that the Secretary has the expertise or the experience to make such determinations and may I say that the Secretary agrees and points out that they have not been involved in the conventional lending business up to now and they do not really want to get involved in it.

Once he has done all that, it becomes an entitlement program, I respectfully submit, just as sure as I stand here.

To be sure, the bill authorizes only $760 million. But the Congressional Budget Office says that could take care of only about 100,000 homeowners. Now, CBO admits these figures are soft, saying, "The estimated number of households served is very sensitive to the assumptions used."

CBO assumes assistance will be required over an average of 18 to 21 months. When questioned, CBO admitted that HUD would likely have to reserve budget authority for the full 36 months for those assisted, thereby reducing the number of households assisted to 50,000 or perhaps as much as 60,000.

Now, let us assume an estimate of 60,000; that leaves somewhere between 160,000 and 180,000 entitled but unassisted, economically distressed homeowners, as defined by this bill.

Consequently, we will be back here next year to take care of those left out. And, boy, will your mail burn if your next-door neighbor is left out and somebody across the street is paid Federal Government money to pay their mortgage and interest on their loan.

The Office of Management and Budget estimates that if all eligible recipients are assisted over the next 5 years, based on projections from statistics over the last 10 years, the cost could be $15 billion, to add to the Federal deficit.

Now, let us take a look at what I mean here.

If we use the 1.3 figure which is provided for in the bill, we find that over the last 10 years, this emergency relief for entitlement program, if it had been enacted in 1973, would have been in effect 100 percent of the time, since 1973, in the Pittsburgh district. It would have been in effect 100 percent of the time in the Cincinnati district. It would have been in effect 96.7 percent of the time in the Boston district. It would have been in effect 79.2 percent of the time in the New York district, and in the Chicago district, 68.3

percent of the time. All districts had an average of 59.4 percent of the time when assistance would have been triggered under this bill.

Well, I am not ready to add a new Federal subsidy program of this magnitude to the Federal deficit.

Experience shows that the best medicine for delinquent mortgage payments is a strong economy and delinquencies are declining. A prime factor in insuring long lasting recovery would be a determined effort on our part to reduce the massive deficit.

We found during testimony that lenders are forbearing out there in the real world. For a variety of reasons, no lender wants to take back property. Lenders are willing to reschedule payments because it is in their best interests to do so. So, what my amendment does is to say "amen" and "regulators encourage forbearance wherever possible without jeopardizing the safety and soundness of your institution."

I think that is a far better way to go and I encourage the Members to support my substitute.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. GONZALEZ. Mr. Chairman, I offer an amendment as a sustitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE: Strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Emergency Housing Assistance Act of 1983".

EMERGENCY MORTGAGE RELIEF

SEC. 2. Title I of the Emergency Housing Act of 1975 is amended to read as follows:

"TITLE I—EMERGENCY MORTGAGE RELIEF

"SHORT TITLE

"SEC. 101. This title may be cited as the 'Homeowners Emergency Relief Act'.

"FINDINGS AND PURPOSE

"SEC. 102. (a) The Congress finds that—

"(1) the Nation is in a severe recession, and the sharp downturn in economic activity has driven large numbers of workers into unemployment and has reduced the incomes of many others;

"(2) as a result of such adverse economic conditions, the capacity of many homeowners to continue to make mortgage payments has deteriorated and may further deteriorate in the months ahead, leading to the possibility of widespread mortgage foreclosures and distress sales of homes; and

"(3) many such homeowners could retain their homes if they received temporary financial assistance until economic conditions improve.

"(b) It is the purpose of this title to establish a program that will preserve and promote forbearance with respect to mortgages and, through emergency mortgage relief payments, prevent widespread mortgage foreclosures and distress sales of homes resulting from the temporary loss of employment and income.

"DEFINITIONS

"SEC. 103. For purposes of this title:

"(1) The term district means any Federal Home Loan Bank district established by the Federal Home Loan Bank Board under section 3 of the Federal Home Loan Bank Act.

"(2) The term 'Federal supervisory agency' means the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, the Comptroller of the Currency, the Federal Home Loan Bank Board, the Federal Savings and Loan Insurance Corporation, and the National Credit Union Administration.

"(3) The term 'Fund' means the Homeowners Emergency Relief Fund established in section 109.

"(4) The term 'monthly net effective income' means the monthly gross income of a mortgagor, less any Federal, State, or local income or employment taxes due with respect to such income.

"(5) The term 'mortgage' includes a land contract or other instrument providing for the sale and purchase of property referred to in section 105(a)(1), and the terms 'mortgagor' and 'mortgagee' include the parties to such agreement of sale and purchase.

"(6) The term 'Secretary' means the Secretary of Housing and Urban Development.

"(7) The term 'State' means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States.

"(8) The term 'total monthly housing expense' means the sum of—

"(A) the monthly payment of principal, interest, taxes, assessments, ground rents, hazard insurance, and mortgage insurance premiums due by a mortgagor with respect to a property assisted under this title;

"(B) the monthly maintenance costs of such mortgagor with respect to such property, excluding—

"(i) the costs of maintaining any riding stables, swimming pool, tennis court, sauna, Jacuzzi, hot tub, or other recreational facility or luxury appurtenance on the premises of such property;

"(ii) the costs of employing any individual to maintain such property; and

"(iii) the costs of maintaining any flora on the premises of such property; and

"(C) the monthly utility costs of such mortgagor with respect to such property, excluding utility costs attributable to the operation of any riding stables, swimming pool, tennis court, sauna, Jacuzzi, hot tub, or other recreational facility or luxury appurtenance on the premises of such property.

"EFFECTIVE MORTGAGE DELINQUENCY RATE

"SEC. 104. (a)(1) The Secretary of Housing and Urban Development shall, to the extent approved in appropriation Acts, carry out the program established in this title.

"(2) For the purpose of carrying out such program, the Secretary shall contract to make, and make, assistance available under this title in any district when, on an average monthly basis for a period of 3 consecutive months for either such district or the Nation, the amount of funds represented by mortgage loans and contracts that are accounted for in a mortgage delinquency series maintained by the Federal Home Loan Bank Board, and for which payments have been delinquent for 60 days or more, exceeds 1.3 percent of all funds represented by mortgage loans and contracts accounted for in such series.

"(3) For purposes of determining when such assistance is to be made available pursuant to paragraph (2), the Secretary shall take into account all months beginning with or after the third month before the month in which the Emergency Housing Assistance Act of 1983 is enacted.

"(4) With respect to the initial occurrence, after the date of the enactment of such Act, of the delinquency rate condition described in paragraph (2), the Secretary shall begin to contract to make, and make, assistance available at the beginning of the first month after the month in which the mortgage delinquency series referred to in such paragraph indicates that such condition has occurred.

"(5) The mortgage delinquency series referred to in paragraph (2) shall be made available by the Federal Home Loan Bank Board to the Secretary and the Congress on a monthly basis and shall contain data on the mortgage delinquency rate during the previous month for each district and for the Nation.

"(b)(1) Once assistance is made available under this title in any district, the Secretary shall continue to contract to make, and make, such assistance available until the date on which the mortgage delinquency series referred to in subsection (a)(2) indicates that the amount of funds represented by 60-day delinquent mortgage loans and contracts accounted for in such series has declined, on an average monthly basis for a period of 3 consecutive months for both such district and the Nation, to below 1.2 percent of all funds represented by mortgage loans and contracts accounted for in such series, except that—

"(A) such assistance shall continue to be made available pursuant to contracts entered into before such date; and

"(B) the Secretary shall reinstitute the program established in this title in such district whenever the delinquency rate condition described in subsection (a)(2) reoccurs.

"(2) In any case in which such program is reinstituted in any district, the Secretary shall begin to contract to make, and make, such assistance available beginning with the day after the date on which such mortgage delinquency series indicates that such delinquency rate condition has reoccurred.

"(c) The Secretary shall promptly notify each financial institution or other mortgagee holding a mortgage on property in any district in which the Secretary has determined to institute or reinstitute the program of assistance established in this title.

"ELIGIBILITY FOR ASSISTANCE

"SEC. 105. (a) No assistance may be made with respect to a mortgage under this title unless—

"(1) the property securing such mortgage (or other security interest in the case of units in cooperative or condominium projects, or in the case of any manufactured home and the lot on which such home is situated) is a one- to four-family residence (including one-family units in a condominium project, a membership interest and occupancy agreement in a cooperative housing project, and any manufactured home and the lot on which such home is situated) and

is the principal residence of the mortgagor involved;

"(2)(A) the mortgagee involved has indicated to such mortgagor its intention to foreclose; or

"(B) payments under such mortgage have been delinquent for at least 90 days;

"(3) such mortgage is not assisted under title V of the Housing Act of 1949;

"(4) such mortgagor has incurred a substantial reduction in income as a result of—

"(A) an involuntary loss of, or reduction in (i) his or her employment, other than as a result of any willful repeated or felonious misconduct by such mortgagor; (ii) his or her self-employment, other than as a result of any willful repeated or felonious misconduct by such mortgagor; or (iii) returns form the pursuit of his or her occupation, other than as a result of any willful repeated or felonious misconduct by such mortgagor; or

"(B) any similar loss or reduction by any person contributing to the income of such mortgagor;

which reduction in income renders such mortgagor unable to correct a mortgage delinquency within a reasonable time or to resume full mortgage payments;

"(5)(A) the average aggregate annual income of such mortgagor and the members of the family of such mortgagor residing with such mortgagor, for the 3 completed calendar years preceding the date of the application of such mortgagor for assistance under this title, does not exceed $20,000 with respect to a family of 4 individuals, or such higher or lower amount as the Secretary may establish for larger or smaller families;

"(B) in the case of any mortgagor and family whose income exceeds the applicable amount established under subparagraph (A), the Secretary has determined that the aggregate value of the assets of such mortgagor and the members of the family of such mortgagor residing with such mortgagor does not exceed $10,000, except that the Secretary shall not include as such assets—

"(i) the property securing such mortgage;

"(ii) one motor vehicle of such family;

"(iii) the households goods and personal effects of such individuals, not to exceed an aggregate value of $5,000, or such higher amount as may be determined to be appropriate by the Secretary;

"(iv) professionally prescribed health aids for any such individual;

"(v) the entitlement of any such individual to receive any payment under a pension, annuity, or similar plan or contract on account of age or length of service; and

"(vi) the aggregate interest of such individuals in any implements, professional books, or tools, of the trade or occupation of such individuals, and the aggregate interest of such individuals in any other property without which their trade or occupation would be so impaired as to prevent them from deriving an income sufficient for self-support;

"(6) the Secretary has determined that such mortgagor, if contacted by such mortgagee, has cooperated with such mortgagee in attempting to establish a reasonable plan for the making of partial payments of the amounts due under such mortgage or, considering the financial circumstances of such mortgagor, any other reasonable plan to correct the mortgage delinquency of such mortgagor without financial assistance under this title;

"(7) the Secretary has determined that payments under this title are necessary to avoid foreclosure and that there is a reasonable prospect that such mortgagor will be able to—

"(A) resume full mortgage payments within 36 months after the beginning of the period for which payments under this title are provided or upon termination of assistance under this title; and

"(B) make the payments under such mortgage in full by its maturity date or by a later date agreed to by such mortgagor and mortgagee; and

"(8) an amount equal to the original principal obligation of such mortgage does not exceed the principal amount that could be insured, at the time such mortgagor applies for assistance under this title, with respect to the property of such mortgagor under section 203(b) of the National Housing Act (or under section 203(n) or 234(c) of such Act with respect to a unit in a cooperative housing project or condominium project, respectively).

"(b) Upon a determination that the conditions of eligibility described in subsection (a) have been met by a mortgagor such mortgagor shall become eligible for the assistance described in section 107, to the extent amounts are available under section 109 for such assistance.

"APPLICATION FOR ASSISTANCE

"SEC. 106. (a) During any period in which the program established in this title is in effect in any district, each financial institution or other mortgagee shall, not less than 30 days prior to instituting any foreclosure proceeding with respect to any property described in paragraphs (1), (3), and (8) of section 105(a), assist the mortgagor involved in the preparation and submission to the Secretary of an application for assistance under this title. Such application shall not be required if such mortgagor executes a waiver of assistance under this title after full disclosure of his or her possible eligibility.

"(b) If any mortgagor submits an application for assistance under subsection (a), the financial institution or other mortgagee involved may not institute foreclosure proceedings with respect to such mortgagor prior to the receipt of notification from the Secretary under section 107(g) with respect to approval or disapproval of such application for assistance.

"(c) A mortgagor may submit an application for assistance after foreclosure proceedings have been instituted, in which event such proceedings shall be automatically stayed until receipt of notification from the Secretary under section 107(g).

"(d) In States that require judicial approval of foreclosure, compliance with this section shall be pleaded and proved as a precondition to foreclosure of any mortgage eligible for assistance under section 105. In all States, failure to comply with the provisions of this section shall be the basis of an action to enjoin a foreclosure. Proof of the refusal of the mortagagor involved either to submit an application or to execute a waiver under this section shall satisfy the burden of proof established in this subsection.

"(e) Each application for assistance under this title, other than an application submitted under subsection (c), or waiver of such application shall contain the certification of the mortgagee involved that—

"(1) not less than 3 full monthly installments due under the mortgage involved are unpaid after application of any partial payments; and

"(2) such mortgagee has extended to the mortgagor involved the same or greater opportunities for voluntary forbearance as such mortgagee extended to similarly situated mortgagors within the 4-month period ending March 31, 1983.

"ASSISTANCE PAYMENTS

"SEC. 107. (a) Assistance under this title shall be provided in the form of emergency mortgage relief payments made by the Secretary to mortgagees on behalf of mortgagors. Such payments shall be made using amounts available in the Homeowners Emergency Relief Fund.

"(b)(1) Payments with respect to any mortgage under this title shall be in an amount that, together with the contribution of the mortgagor involved, is equal to the amount of the principal, interest, taxes, assessments, ground rents, hazard insurance, expenses of the mortgagee involved in connection with payments or repayments under this title, and mortgage insurance premiums due under such mortgage, and the initial such payment shall include an amount necessary to make the payments on such mortgage current. Payments under this title shall not exceed amounts that the Secretary determines to be necessary to supplement the amounts, if any, that the mortgagor involved is capable of contributing toward such mortgage payments.

"(2) Payments on behalf of any mortgagor under this title shall not be less than the amount required to ensure that the total monthly housing expense of such mortgagor does not exceed 38 percent of the monthly net effective income of such mortgagor.

"(c) Payments under this title may be provided for a period of not to exceed 18 months plus any period of delinquency. Such period shall be extended for a period not to exceed 18 months if the Secretary has determined that such extension is necessary to avoid foreclosure. The Secretary shall establish procedures for (1) each mortgagor, on whose behalf payments are made under this title, to inform the Secretary of any significant increase or decrease in income; and (2) periodic review, to be conducted not less than once annually, of the financial circumstances of such mortgagor for the purpose of determining the necessity for continuation, termination, or adjustment in the amount of such payments. Such payments shall be discontinued at any time if the Secretary determines that, because of changes in the financial circumstances of such mortgagor, such payments are no longer necessary to avoid foreclosure.

"(d)(1) All payments under this title shall be secured by a lien on the property involved and by such other obligation as the Secretary may require. Such lien shall be subordinate to all mortgages existing on such property on the date on which the initial assistance payment is made under this title on behalf of the mortgagor involved.

"(2) Payments under this title shall be repayable upon terms and conditions prescribed by the Secretary, and such terms and conditions may include requirements for repayment of any amount paid by the Secretary toward the expenses of a mortgagee in connection with the payment or repayments made under this title. The Secretary may establish interest charges on payments made under this title, except that the interest charge on the payments made on behalf of any mortgagor shall be set at a single rate that does not exceed whichever of the following rates is less: (A) 10 percent; and (B) a rate determined by the Secretary of the Treasury taking into consideration the average interest rate on all interest

bearing obligations of the United States then forming a part of the public debt, computed at the end of the month preceding the month in which the initial such payment is to be made on behalf of such mortgagor. Such interest charges on any payments made on behalf of a mortgagor under this title shall not begin to accrue until termination of such payments. Such interest charges shall be payable notwithstanding any provision of any State constitution or law or local law that limit the rate of interest on loans or advances of credit.

"(3) The Secretary shall establish the monthly repayment to be made by any mortgagor under this title at an amount necessary to ensure that the sum of such monthly repayment and the total monthly housing expense of such mortgagor does not exceed 38 percent of the monthly net effective income of such mortgagor. The Secretary may, at the option of any mortgagor, establish appropriate incentives for early repayment of the amount owed to the Secretary under this title, including forgiveness of part of the interest charged on the payment made on behalf of such mortgagor. The Secretary shall establish procedures for (A) each mortgagor making repayment under this title to inform the Secretary of any significant increase or decrease in income; and (B) periodic review, to be conducted not less than once annually, of the financial circumstances of such mortgagor for the purpose of determining the necessity for adjustment in the amount of such repayments.

"(4) All receipts from repayment made to the Secretary under this title shall be deposited in the Homeowners Emergency Relief Fund established in section 109.

"(e) Payments by the Secretary under this title may be made without regard to whether the Secretary has previously taken action under this title on behalf of a mortgagor, except that payments may not be provided on behalf of a mortgagor under this title for more than an aggregate of 36 months.

"(f) The Secretary shall provide homeownership counseling to mortgagors on whose behalf payments are made under this title.

"(g) The Secretary shall process applications for assistance under this title in as expeditious a manner as is practicable. In carrying out this title, the Secretary shall provide that, within not more than 45 calendar days from the receipt of an application for assistance under this title, the mortgagor and mortgagee involved will be notified by the Secretary of his determination to approve or disapprove such application for assistance.

"(h) In providing assistance under this title, the Secretary shall (1) seek to assure a reasonable distribution of funds among districts in which the program established in this title is in effect; and (2) take into consideration the rates of residential mortgage foreclosure and unemployment in the units of general local government in which the properties involved are located and whether such units of general local government are eligible for assistance under section 119 of the Housing and Community Development Act of 1974, giving particular consideration to units of general local government that have rates of unemployment exceeding the national average or are eligible for assistance under such section 119. In carrying out the provisions of this subsection, the Secretary shall utilize the most recent information available from the Secretary of Labor with respect to rates of unemployment.

"AUTHORITY OF THE SECRETARY

"SEC. 108. (a) the Secretary may make rules and regulations that are consistent with the provisions of this title and are necessary to carry out the provisions of this title.

"(b) In the performance of, and with respect to, the functions, powers, and duties vested in the Secretary by this title, the Secretary shall—

"(1) have the power, notwithstanding any other provision of law, whether before or after default, to provide by contract or otherwise for the extinguishment upon default of any redemption, equitable, legal, or other right, title in any mortgage, deed, trust, or other instrument held by or held on behalf of the Secretary under the provisions of this title; and

"(2) have the power to foreclose on any property or commence any action to protect or enforce any right conferred upon the Secretary by law, contract, or other agreement, and bid for and purchase at any foreclosure or other sale any property in connection with which assistance has been provided pursuant to this title.

In the event of any such acquisition, the Secretary may (notwithstanding any other provision of law relating to the acquisition, handling, or disposal of real property by the United States) complete, remodel and convert, dispose of, lease, and otherwise deal with, such property.

"(c) Notwithstanding any other provision of law, the Secretary shall also have power to pursue to final collection by way of compromise or otherwise all claims acquired by him in connection with any security, subrogation, or other rights obtained by him in administering this title. Any funds collected by the Secretary under this section shall be deposited in the Homeowners Emergency Relief Fund established in section 109.

"HOMEOWNERS EMERGENCY RELIEF FUND

"SEC. 109. (a) There hereby is established in the Treasury of the United States a revolving fund, to be known as the Homeowners Emergency Relief Fund.

"(b) The Fund shall consist of—

"(1) any amount approved in appropriation Acts for purposes of carrying out this title;

"(2) any amount received by the Secretary as repayment for payments made under this title;

"(3) any amount collected by the Secretary under section 108; and

"(4) any amount received by the Secretary under subsection (d).

"(c) The fund shall, to the extent approved in appropriation Acts, be available to the Secretary for purposes of carrying out the provisions of this title, including—

"(1) the making of emergency mortgage relief payments to mortgagees on behalf of mortgagors under secion 107;

"(2) the provision of homeownership counseling under section 107(f); and

"(3) the administrative expenses of the Secretary in carrying out the provisions of this title.

"(d) Any amounts in the Fund determined by the Secretary to be in excess of the amounts currently required to carry out the provisions of this title shall be invested by the Secretary in obligations of, or obligations guaranteed as to both principal and interest by, the United States or any agency of the United States.

"AUTHORIZATION OF APPROPRIATIONS; LIMITATION ON BUDGET AUTHORITY

"SEC. 110. (a) There is authorized to be appropriated to carry out the provisions of this title $760,000,000 for fiscal year 1983. Any amounts so appropriated shall be deposited in the Fund and shall remain available until expended.

"(b) The aggregate amount of assistance made available over the duration of the contracts entered into under this title, including amounts expended for the provision of homeownership counseling assistance under section 107(f), may not exceed $760,000,000.

"ACTIONS BY FEDERAL SUPERVISORY AGENCIES

"SEC. 111. (a) Each Federal supervisory agency, with respect to financial institutions subject to its jurisdiction, and the Secretary, with respect to other approved mortgagees, shall, not later than 14 days following the date of the enactment of the Emergency Housing Assistance Act of 1983—

"(1) communicate in writing with each such institution or mortgagee encouraging them to exercise forbearance (including the acceptance of partial payment), to the maximum extent possible, with respect to residential mortgage foreclosures;

"(2) waive or relax limitations pertaining to the operations of such institutions or mortgagees with respect to mortgage delinquencies, to the extent the waiving or relaxing of such limitations is not inconsistent with laws relating to the safety and soundness of such institutions or mortgagees; and

"(3) take such actions as may be necessary to insure that each such institution or mortgagee complies with the requirements established in section 106.

"(b)(1) In considering applications for advances, the Federal home loan banks shall give special consideration to those institutions that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"(2) In considering applications for advances or discounts, the Federal Reserve banks shall give special consideration to those depository institutions and other borrowers that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"(3) In considering applications for extensions of credit, the National Credit Union Administration Board, on behalf of the National Credit Union Central Liquidity Facility, shall give special consideration to members that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"REPORTS TO CONGRESS

"SEC. 112. (a) Within 60 days after the date of the enactment of the Emergency Housing Assistance Act of 1983, and within each 90-day period thereafter, the Secretary shall make a report to the Congress on—

"(1) the current rate of delinquencies and foreclosures in the housing market areas of the country that should be of immediate concern if the purposes of this title are to be achieved;

"(2) the extent of, and prospect for continuance of, voluntary forbearance by mortgagees in such housing market areas;

"(3) actions being taken by governmental agencies to encourage forbearance by mortgagees in such housing market areas;

"(4) actions taken and actions likely to be taken with respect to making assistance under this title available to alleviate hardships resulting from any serious rates of delinquencies and foreclosures; and

"(5) the current default status and projected default trends with respect to mortgages covering multifamily properties, with special attention to mortgages insured under the various provisions of the National Housing Act and with recommendations on how such defaults and prospective defaults may be cured or avoided in a manner that, while giving weight to the financial interests of the United States, takes into full consideration the urgent needs of the many low- and moderate-income families that currently occupy such multifamily properties.

"(b)(1) The Secretary shall, after consulting with the Federal Home Loan Bank Board, conduct a study to determine if a mortgage delinquency series other than the mortgage delinquency series referred to in section 104(a)(2) would be a more effective and efficient series to utilize in carrying out this title.

"(2) The Secretary shall, by April 1, 1974, transmit to the Congress the findings and conclusions of such study along with any legislative recomendations concerning the program established in this title.".

EMERGENCY SHELTER ASSISTANCE

SEC. 3. (a) Section 107(a) of the Housing and Community Development Act of 1974 is amended by inserting after the first sentence thereof the following new sentence: "In addition to such amounts authorized to be set aside for grants under subsection (b), there is authorized to be appropriated $100,000,000 for fiscal year 1984 to carry out the provisions of subsection (d).".

(b) Section 107(c) of the Housing and Community Development Act of 1974 is amended by inserting ", or appropriated for use under subsection (d)," after "subsection (b)".

(c) Section 107 of the Housing and Community Development Act of 1974 is amended by redesignating subsection (d) as subsection (e), and by inserting after subsection (c) the following new subsection:

"(d) The Secretary shall, to the extent approved in appropriation Acts, make grants to States, units of general local government and Indian tribes for the provision of shelter and essential services for individuals and families who are subject to life-threatening situations because of their lack of housing, except that in the case of a grant to a State, the Secretary shall first certify that the purposes of this subsection will be more effectively carried out by making a grant to such State that has an existing program that serves such individuals and families. Such grants shall be awarded on the basis of the need for emergency housing in the area where the project is or will be located, shall take into account regional variations in the cost of providing shelter, and shall consider the extent to which units of general local government and nonprofit organizations are currently providing shelter and assistance. Such grants may be used by such units of general local government or by local nonprofit organizations to rehabilitate existing structures in order to provide basic shelter, to maintain structures providing such shelter, to pay for utilities and the furnishing of such shelters, to provide for any necessary health and safety measures that are required to protect the individuals using such shelter, and for other purposes described in section 105(a) that are consistent with the purpose of this program. In the case of a structure that is rehabilitated with assistance under this subsection, such structure shall be used for emergency housing, after such rehabilitation, for a period of not less than 3 years. In providing grants under this subsection, the Secretary shall take into consideration the special needs of families and single women. The Secretary shall insure that grants provided under this subsection are used solely to provide additional shelter capacity and essential services and are not used to replace amounts currently expended in the provision of such shelter and services. The restriction contained in the preceding sentence shall not apply to applicants under this subsection that, pursuant to a State constitutional mandate, have provided shelter to any person who presents himself or herself for shelter.".

RURAL HOUSING LOANS

"SEC. 4. Section 505 of the Housing Act of 1949 is amended by adding at the end thereof the following new sentences: "The Secretary shall insure that each delinquent borrower under this title is provided notice, in a timely and meaningful manner, of the assistance available under this section. The Secretary shall, to the extent necessary, provide technical assistance to each such borrower in applying for such assistance. The Secretary may, before or after any period of moratorium under this section, reamortize the accrued debt of any delinquent borrower under this title for a new period equal to the original amortization period, if such reamortization is likely to result in the resumption of periodic payments by such borrower.".

Mr. ST GERMAIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

Mr. WYLIE. Mr. Chairman, reserving the right to object, I do so to inquire of the gentleman from Texas, (Mr. GONZALEZ): Is this the amendment in the nature of a substitute entitled "GONZAL 092 (5-11-83), for the amendment in the nature of a substitute offered by Mr. WYLIE of Ohio," which the gentleman handed me just before we came on the floor?

Mr. GONZALEZ. If the gentleman will yield, yes, it is; and I also understand that the gentleman should have had the identical copy before that.

Mr. WYLIE. It does say, "Substitute offered by Mr. GONZALEZ of Texas for the amendment," et cetera?

Mr. GONZALEZ. That is right.

Mr. WYLIE. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

The CHAIRMAN. The gentleman from Texas (Mr. GONZALEZ) is recognized for 5 minutes.

Mr. GONZALEZ. Mr. Chairman, the sad and tragic situation is that at this moment there are more than 12 million Americans out of work. One out of every four of those people have been looking for work longer than 6 months. Forty percent of the unemployed have been out of a job for 3 months or longer. Four and one-half million people have been out of work for at least 15 weeks. And the number of long-term unemployed today is 2½ times higher than it was 2 years ago.

Despite all the noise about economic recovery, tragically, sadly, long-term unemployment is still growing.

Even the President admits that the unemployed will be the last to see any benefit from this so-called recovery.

With each passing day more of the unemployed find themselves unable to meet mortgage payments. And I must simply say by way of parenthesis, in view of what the distinguished minority leader of the committee just said, if it is true, as he told you, that these institutions are forbearing, that is these lenders, then why did 260,000 Americans through foreclosure have their homes under distress sale and foreclosed upon? It is just the fact that there is no denial as to the need; even the minority does not deny that because we had comprehensive hearings in which we had every section of the country presenting testimony. And as a result of that we are presenting this, what we had hoped would have been acted upon even before the Easter break, Emergency Homeowners Assistance Act.

More people continue to become homeless. That is why we have this bill here today. It is simply the issue today, whether we want to respond to this crying need that is burgeoning forth from our people or we turn our back on them in favor of a $10 billion bailout of the big banks who, incidentally, are opposing us on this bill?

The American Bankers Association are against this. These are the people that the gentleman wants to be kind and forbear from foreclosing, when the record shows they certainly are not. And we do not expect them to.

The issue is: Do we or do we not respond to Americans in a desperate effort to keep possession of the only thing that identifies them with the country, which is their home? That is the issue. Everything else is a lot of spoof, a lot of jiggery and pokery.

There is no disagreement with the need for action to prevent mortgage foreclosures, either during our hearings in the markup sessions or since then. There is no denial of the need. There is no disagreement about the need to help the homeless because the gentleman's substitute has restored that which he had deleted in the second section there, with respect to the homeless. The only issue is what action should be taken on the mortgage foreclosure problem? The minority says that we need only exhort the lenders not to foreclose. But their suggestion ignores economic and practical reality.

Mortgage lenders that are the least able to forbear are the ones operating in the areas of highest unemployment. Our hearings clearly and irrevocably

brought that out. Those lenders are just as much in trouble as their customers.

On the other hand, lenders that can most afford to forbear are in areas where the economy is fairly sound, relatively speaking.

The Wylie dispute would work for those who do not really have trouble, if at all. And it would not work for those who are in the greatest difficulty because it is turning itself back on their need. It would be a cruel joke because it is no help at all. There is only one way to address the market foreclosure problems; real financial trouble requires real financial help. That is what H.R. 1983 is all about, real financial help.

Our substitute will provide help, real help to people who really need the assistance and who, through no fault of their own, are faced with the loss of their homes.

A number of the originial provisions of H.R. 1983 are included in the substitute, such as a homeowner must have a mortgage within the FHA limits and have suffered an involuntary loss of income due to unemployment in order to be eligible for assistance.

However, my substitute also includes a number of provisions that cover concerns expressed by Members who, in good faith, were trying and are trying to be constructive.

The CHAIRMAN. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. GONZALEZ was allowed to proceed for 3 additional minutes.)

Mr. GONZALEZ. So, we provide an assets test, which would limit assistance to unemployed families whose average aggregate income over 3 years does not exceed $20,000 for a family of four of whose assets, excluding, my good friend from Connecticut, excluding family residence, car, $5,000 in households goods and job-related equipment, cannot exceed $10,000. No assistance could go to individuals whose unemployment is voluntary or is a result of their own misconduct. A homeowner and lender must attempt a workout on the mortgage delinquency before a homeowner can seek assistance.

HUD is to assure a reasonable distribution of funds among areas of the country taking into consideration unemployment rates, high delinquencies and foreclosures.

□ 1245

The rebuttable presumption provision has been deleted and the Secretary must determine that there is a reasonable prospect that the homeowner will be able to resume full mortgage payments within 36 months at the most, and will pay the mortgage off in full by the maturity date.

HUD presently has a policy in making this type of determination in the so-called FHA assignment program. Under that policy if a borrower has a good employment record and has certified that he or she is actively seeking employment, the reasonable prospect test has been met. This is what HUD is expected to use under the emergency program. Since only families who have suffered a reduction in income due to unemployment can qualify for assistance under this program, any stricter standard or requirement for this test would be arbitrary or capricious.

Certain housing expenses are specifically excluded. Language has been included to permit FHA insured homeowners' loans to be eligible.

In short, to qualify for emergency mortgage assistance an applicant must be a responsible person, a person in genuine financial trouble through no fault of his or her own. And the applicant must have undertaken every reasonable effort to avoid foreclosure.

The mortgage assistance available would require the applicant to keep up every effort to find work and would require the applicant to put every reasonable effort into a mortgage payment program. No less than 38 percent of adjusted income.

We are not talking about a giveaway program or an entitlement program. Mortgage assistance would be a loan with interest rates—and let me say personally I am against 10 percent, but I am just one man—but with an interest rate of 10 percent or the current Treasury rate, whichever is less. And the loan would be secured by a lien on the property. As soon as the borrower can resume payments he must do so.

The emergency assistance housing program we are offering provides real help to responsible Americans who are in real need.

The substitute amendment contains every reasonable safeguard, meets every reasonable objection thus far raised, and provides for an abundance of caution.

If you believe that it does take real money to solve the problems of people who are faced with the loss of their home you will support our pending substitute.

Mr. ST GERMAIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the substitute offered by the distinguished chairman of the Housing Subcommittee, the gentleman from Texas (Mr. GONZALEZ).

The gentleman's substitute addresses the majority of the concerns that have been expressed to me by many of our colleagues. It includes an assets test, a requirement that a workout between lender and homeowner be attempted. It deletes the rebuttable presumption provision as well as a provision that housing expenses cannot include such costs as maintenance or heating of recreational facilities.

The substitute includes provisions from the original bill as well as the language that requires the Federal financial supervisory agencies to take specific action to support continued forbearance.

This language requires the Federal financial supervisory agencies to comunicate with mortgage lenders encouraging them to exercise forbearance on residential mortgage foreclosures. These agencies are also directed to waive or relax limitations relating to mortgage delinquencies so as not to unfairly penalize those lenders who are exercising forbearance out of compassion as well as logic.

Safety and soundness considerations naturally would still apply.

Finally, Federal agencies that provide assistance in the form of advances, discounts, and extensions of credit are directed to give special consideration to applying institutions that have exercised forbearance.

The Gonzalez substitute provides two ways of dealing with the serious problem of delinquency and foreclosure facing many of the Nation's homeowners. One is the loan program in instances where the homeowner cannot meet his or her obligation due to circumstances beyond his or her control and cannot work out an alternative plan with the lender, and special actions required of the Federal financial supervisory agencies for those lenders in a position to forbear.

I strongly urge the Members to give serious consideration to this substitute and to support it.

Mr. VENTO. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Minnesota.

Mr. VENTO. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman in the well and the chairman of the subcommittee, the gentleman from Texas (Mr. GONZALEZ). I know that the language of the chairman of the subcommittee with respect to regulatory agencies is good language because I notice that it is being copied by the ranking Member in terms of his amendment.

The real difference here is not whether or not we think that regulatory institutions ought to forbear; indeed, they came before us and said that they were doing it.

I think the chairman's language is constructive. I think the ranking Member concedes that in offering it as his substitute essentially with the homeless provision of the bill.

So I think there is not disagreement there.

The question is whether or not we, as a Congress, ought to go beyond that.

Mr. ST GERMAIN. One step further.

Mr. VENTO. One step further in terms of providing an adequate amount of money or at least some money to provide an opportunity for homeowners who are affected by the economic cycle.

Mr. ST GERMAIN. If I could say to the gentleman and reclaim my time, those who are concerned about frankly the minimal amount of funds that are authorized in this legislation, I suggest they stop and consider what the alternative is. The alternative, I feel convinced, would be much more costly to the taxpayers of this Nation. Much more costly. I think that this is being pennywise.

Mr. VENTO. If the gentleman will yield further, I think he is to be commended and the chairman of the subcommittee should be commended for trying to absorb the amendments that raise some reasonable concerns. Frankly, I am not interested in financing swimming pools and frills. It was never our intention to do that.

A needs test, which was initially offered by, of course, the gentleman from Connecticut (Mr. MCKINNEY) in subcommittee, I think has good intentions. We are concerned about the workability on this type of amendment. But I think the chairman is granting those arguments, trying to dismiss those arguments, and should have dismissed any type of reasonable criticism based on those type of concerns.

We are really down to the basic question here, whether or not we are going to go beyond the forbearance. It is not whether banks are good guys or bad guys, it is a recognition that even——

Mr. ST GERMAIN. If I may state to the gentleman, the financial institutions who are exercising forbearance can just go so far, but, by the same token, they have to look at the integrity of their institution. And in some instances, they will not be able to forbear enough to get us over this period and for that reason we have to go that one step further.

The CHAIRMAN pro tempore (Mr. DONNELLY). The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has expired.

(At the request of Mr. VENTO and by unanimous consent, Mr. ST GERMAIN was allowed to proceed for 3 additional minutes.)

Mr. VENTO. If the gentleman will yield further.

Mr. ST GERMAIN. I yield to the gentleman from Minnesota.

Mr. VENTO. I think that what really gets down to the point here is that there is only a certain amount that any bank can do based on its franchise in terms of public service that it provides, in terms of forbearance, and once we get beyond that point, then I think it is up to us in these uninsured areas to try to do what we can to relieve the economic plight of those who are unemployed.

This bill is one aspect. Many, Mr. Chairman, and others have complained that really the recession is over, that we have a moderate recovery. And, indeed, we hope that particular recovery occurs.

The problem is that the casualties of this recession are now starting to float to the surface and many of them happen to be autoworkers, steelworkers, others across this Nation, small businessmen, farmers, who find themselves strung out to wit's end and are not able to make those mortgage payments and are, consequently, losing their homes.

Mr. ST GERMAIN. If the gentleman will allow me to reclaim my time for a moment, the recession might be over in the minds and in the eyes of certain economists, analysts, and forecasters, and the optimists in the administration would like to say it is over. But for those people who are still unemployed and who have exhausted all of their benefits, that recession is not a recession, it is a very real depression. And that is why this legislation is still very necessary.

Mr. VENTO. I think this particular amendment and the strategy that we are offering in terms of providing the funds says that, down the road, things are going to get better. But ironically, the apparent fear that many critics have stated, that first of all, we are not meeting total need, I guess that you might expect those critics might want to come on this floor and double the amount of money, but I think what is in H.R. 1983 is prudent and reasonable, but second, apparently the critics' real fear is that maybe down the road, things really are not going to get better, that this economic recovery is not for real. So I think it is a case here where we, the Democrats in this Congress, are saying that we trust and we hope and intend to invest in the future of these homeowners so that they can continue to be homeowners and that we are going to get a better U.S. economy 2 or 3 years down the road.

Mr. ST GERMAIN. Let me again say to the gentleman, if indeed the pronunciations and pronouncements of the administration about the recession being over are accurate, then they should not be concerned because that means that there will not be a call for these funds, but God forbid, if it is not over, and if, as I stated earlier, there is still a depression for many people in this country, Lord, let us be ready.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Kansas.

Mr. GLICKMAN. I thank the gentleman for yielding and I want to thank the committee for incorporating in this substitute a couple of amendments I had offered, one dealing with people who lose their jobs as a result of their own misconduct—they are not qualified. And the other one removes the rebuttable presumption.

In the earlier bill, there was a rebuttable presumption that you would meet the criteria of the bill, that is, able to resume mortgage payments in 36 months.

The CHAIRMAN. The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has again expired.

(At the request of Mr. GLICKMAN and by unanimous consent, Mr. ST GERMAIN was allowed to proceed for 3 additional minutes.)

Mr. GLICKMAN. If the gentleman would yield further, what I want to clarify for the record is the following things: Is it true that there is no rebuttable presumption in this bill that the applicant for assistance is eligible for the funds and that the applicant has the burden of proof of showing that he or she is eligible for the assistance?

Mr. ST GERMAIN. I am very happy to state that, as a result of the efforts of the gentleman, that is indeed the case. He made a good case and the committee was happy, both the chairmen of the full committee and subcommittee, to take his suggestions in this area.

Mr. GLICKMAN. The second question is: In no way, then, is this program an entitlement program that a Federal court should construe becomes eligible for anyone who seeks assistance, notwithstanding the funding cap? That is one of my worries is that if you created a rebuttable presumption that the applicant is entitled to it, that a Federal court would then determine everybody is entitled to it, notwithstanding the funding limits.

Mr. ST GERMAIN. I can assure the gentleman that as far as my limited knowledge of the law is concerned, he is absolutely correct. We are not creating an entitlement.

Mr. GLICKMAN. And the third question concerns reviewability by a court of the question of "a reasonable prospect that such mortgagor will be able to resume his payments in 36 months," it says on page 10 of the substitute.

Basically, it is my understanding that since you have no standard for reviewability by a court in this section, that if you wanted to attack this in court, appeal it, that the standard would be that the Government acted in an arbitrary and capricious manner. And I wanted to get from the gentleman what he believed the standard of reviewability ought to be since the bill is silent on this point.

The question is, if I may explain it a little bit: It is very important under

the laws of administrative procedure and the appellate system in this country to spell out how you ought to be able to appeal a decision.

Now, in this case, the question will be: Does this applicant have a reasonable prospect to resume payments within 36 months and the other criteria, make the payments under such mortgage in full by its maturity date?

In the farmers home deferral bill we passed earlier this week, the question was raised: OK, what happens if an applicant disagrees with the Government? What should the standard of proof be if he takes it to the court?

And in that case, we held that the decision will be upheld by the court unless it found that the Government acted in an arbitrary and capricious standard.

Mr. ST GERMAIN. It would have to be in this instance as well an arbitrary and capricious manner.

Mr. GLICKMAN. So the gentleman would confirm that the standard would not be any more liberal than the standard in the earlier bill we passed and that the decision could not be successfully challenged unless the Government acted in an arbitrary and capricious fashion.

Mr. ST GERMAIN. I am in total agreement.

Mr. GLICKMAN. I thank the gentleman.

□ 1300

The CHAIRMAN. The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has expired.

(On request of Mr. WYLIE and by unanimous consent, Mr. ST GERMAIN was allowed to proceed for 2 additional minutes.)

Mr. WYLIE. Mr. Chairman, will the distinguished chairman yield?

Mr. ST GERMAIN. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, in the gentleman's statement a little while ago, he said, in effect, that if the recession is really over, that the administration would not have to worry about this bill. It would not really take effect. And in my statement a little earlier, I pointed out that, this program would have been in effect in certain bank board districts during all of the last 10 years. Under section 104 of this bill, it says that for the purpose of carrying out such program, the Secretary shall contract to make, and make, assistance available under this title in any district where there is, for more than 60 days, a delinquency which exceeds 1.3 percent of all the funds represented by mortgage loans. That trigger would have been activated much of the past 10 years and much of the next 10 years.

Now, may I respectfully suggest to the distinguished chairman that, if this had been in place, there would have been in the Pittsburgh district some emergency relief available under the terms of this bill 100 percent of the time over the last 10 years.

I do not think the chairman is meaning to say that the recession started in 1973.

Mr. ST GERMAIN. No. But, by the same token, for those people who are out of work through no fault of their own, the recession is there. And I repeat: It is not a recession; it is a depression.

Mr. WYLIE. I understand that.

Mr. ST GERMAIN. And there are, I would say to the gentleman, other criteria contained in the legislation that make it, I feel, crystal clear that it is not only the unemployment rate within the area that governs, but also the fact that the individual who applies for his assistance must be one who is unemployed through no fault of his own or her own.

Mr. WYLIE. I understand that. But the point I want to make is that in good years or bad this program would have been in effect—and we did have some good years there since 1973——

Mr. ST GERMAIN. There are always going to be people who are unable to meet their mortgage payments. But maybe the gentleman has a district that is very unique.

Mr. WYLIE. No.

Mr. ST GERMAIN. But in my district, the First Congressional District of Rhode Island—let us forget the charts—the realities of life are——

The CHAIRMAN. The time of the gentleman from Rhode Island (Mr. ST GERMAIN) has again expired.

(On request of Mr. WYLIE and by unanimous consent, Mr. ST GERMAIN was allowed to proceed for 1 additional minute.)

Mr. ST GERMAIN. We had a President who got up there with the classified ad section, and said, "Look, there are all kinds of jobs available. Why are these people not working?"

That chart is about as meaningless as that statement was.

Mr. WYLIE. Well, if he believes it is meaningless, then the gentleman is missing my point. Columbus is in the Cincinnati district, and the unemployment rate was relatively low until just recently. But we would have qualified 100 percent of the time under the trigger that is in this bill.

Mr. ST GERMAIN. Is that the only factor that the gentleman is looking at for eligibility?

Mr. WYLIE. No. There are a lot of other factors.

Mr. ST GERMAIN. There are other criteria that the gentleman recognizes.

Mr. WYLIE. There are many. But the program would have been in effect; that is the point I want to make, if this criteria, this trigger, had been used.

Mr. ST GERMAIN. Frankly, I say to the gentleman that if people are unemployed as a result of the actions or inactions of the Federal Government, then certainly whether it be the last 2 years or 3 years, or the next 1 or 2 years, maybe we should give consideration to assisting them in those cases.

Mr. WYLIE. I do not necessarily disagree with that point, but the point I want to make is, it would have been in effect.

Mr. MITCHELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the Gonzalez substitute.

Mr. Chairman, I rise in support of the Gonzalez proposition. I want to commend the chairman of the Housing Subcommittee and the chairman of the full committee for making the accommodations to the objections that were raised by some Members to the original bill. I think this covers all of the objections that have been raised. I commend you for it. But, in one sense, it is an exercise in futility.

There are people in this Chamber, no matter how much you accommodate, no matter how much you give, no matter how much you include their ideas in a bill, who have a mind set that the Government ought to be oblivious to the needs of people. I congratulate you for what you have done, but it is essentially futile because minds were made up that no one on that side was going to give any attention to this bill, it was philosophically not in tune with the thinking of some people and, therefore, no matter what you do, it would not be acceptable to them.

I serve on the Joint Economic Committee. Last Friday we got the statistics on unemployment from the Bureau of Labor Statistics. There had been a "significant" and "dramatic" drop in unemployment in the last month. It went down from 10.8 percent to 10.3 percent, and everyone was so excited about the drop. Yet we asked Commissioner Norwood of the Bureau of Labor Statistics: "Does this mean that unemployment has peaked?" The answer was: "No."

"Does this mean that we can expect a dramatic decrease in unemployment for the next year?" The answer was: "No."

That means that there are going to be people who are going to be losing their houses through no fault of their own. They are trying to get work but they cannot get it because there is something in place in this Nation that is keeping unemployment high.

Mr. Chairman, on March 29, I held hearings in Baltimore concerning homelessness. During that hearing I heard testimony from Mrs. Jane Harrison, from the Women's Housing Coalition, Inc. She stated:

The worst sin toward our fellow creatures is not to hate them but to be indifferent toward them, and I think the resistance against your legislation is typical of an attitude of indifference toward those who hurt.

Mr. Chairman, much has been said about forbearance. On March 2, 1983, the Wall Street Journal reported nationwide foreclosures during the fourth quarter of 1982 hit a 30-year high. It was stated that 7.6 percent of all outstanding mortgages were in foreclosure and 5.7 percent were delinquent.

In my city of Baltimore alone, the current average delinquency rate on home mortgage loans is 10.1 percent. How much forbearance can the lending institutions give? They have got to be responsible to their investors.

I just think it makes sense for us to attempt to show some compassion and some concern for those persons who are out of work and losing their homes through no fault of their own. Sure, there are going to be some deadbeats. There are going to be some deadbeats who are going to try to take advantage of the program. It was not designed for them, and there should be safeguards against that. I think that is included in the bill. Those are not my concerns, the slicksters, the deadbeats, and those who want to use Government for their own selfish and slothful purposes. My concern is with the legitimate hard-working head of a family or member of a family unit who has sustained a job and, suddenly, it is lost to that person and then they lose their precious investment in a home, not just for themselves, but for their children who might come.

I am so strongly concerned about the provision which deals with homelessness. Ladies and gentlemen of this Committee, that is not going to go away. It is going to get warm this summer and we are going to forget about people who slept outdoors last winter. There are four categories of people that desperately need this assistance. One of the most interesting of those categories is a brand new phenomenon in homelessness—the young male. Suddenly, because of unemployment that is ripping this Nation, we find young males ages 18 through 26, who have no home to go to.

The CHAIRMAN. The time of the gentleman from Maryland (Mr. MITCHELL) has expired.

(By unanimous consent, Mr. MITCHELL was allowed to proceed for 2 additional minutes.)

Mr. MITCHELL. In most cities the answer to those problems of homelessness on the part of those young males is that the welfare department or some local institution sends them to the mission, and they go to the mission where they are thrown in with people of ages from 30 to 90, 150 packed in the mission, and just that experience tends to deteriorate their own ability to try to survive in this society.

Another category of homelessness is the category of whole families being homeless. Here is what is happening: People in my city are doubling up, and when they cannot double up, then they try to find a place to stay. But most of the few institutions that we have will not take a whole family. They divide the family up, and that is destructive.

I would suggest that you look around in your city where there is boarded-up housing. And I am willing to wager any Member in this Chamber that you are going to find people living in boarded-up housing, not because they want to, not because they are subhuman human beings, but because through no fault of their own they have lost their property.

I cannot, for the life of me, understand why there is this built-in inflexible, rigid resistance to what is a simple act of humanitarianism on the part of our Government. People look to the Government as the last resort to solve some of their problems. No, we do not solve it for everyone. We deal with only 100,000 families. But does that not say to 100,000 people, "Your Government still cares"?

I strongly urge my colleagues to support the passage of this legislation. At least through this vehicle we can begin to seriously address this country's neglect and irresponsibility toward those who are homeless in this Nation.

Mr. Chairman, I rise in support of Congressman HENRY GONZALEZ' amendment to the Emergency Housing Assistance Act.

Let me go back to the March 29, 1983, hearing in Baltimore concerning homelessness. During this hearing, I heard testimony from Ms. Jane Harrison, a housing developer for the Women's Housing Coalition, Inc. In her statement, Ms. Harrison stated, "The worst sin toward our fellow creatures is not to hate them, but to be indifferent to them. That's the essence of inhumanity." By failing to pass my colleague's bill, the House will be renouncing its sacred responsibility to meet the basic survival needs of the American people.

A March 2, 1983, Wall Street Journal article reported that nationwide foreclosures during the fourth quarter of 1982 hit a 30-year high. Moreover, it stated that 0.76 percent of all outstanding mortgages were in foreclosure and 5.7 percent were delinquent during this quarter.

In Baltimore City alone the current average delinquency rate on home mortgage loans is 10.1 percent. As a result, many Baltimoreans are facing the bleak prospect of foreclosures and possible homelessness.

I believe my colleague's bill will reverse the current nationwide insensitivity toward these two growing problems. Briefly, this bill authorizes $760 million to establish a new revolving loan fund to assist homeowners who are facing foreclosure on home mortgage loans not insured by the Farmers Home Administration (FmHA). The measure also authorizes $100 million to provide assistance for shelter and essential services for the homeless.

The $760 million revolving loan fund, to be administered by the Secretary of HUD, would become active when the average default rate over a 3-month period, as measured by the Federal Home Loan Bank Board, rises to 1.3 percent of mortgage funds. The program would be suspended when the default rate drops to a 3-month average of 1.2 percent or below.

Only mortgages on one- to four-family homes, cooperatives, condominiums, or manufactured housing that are the primary residence of the homeowner would be eligible for assistance. Furthermore, mortgage payments would have to be 90 days' delinquent, or the owner must have been notified that the lender intends to foreclose. In addition, the original mortgage amount cannot exceed the maximum mortgage amount that could be insured by the FmHA ($67,500 to $90,000).

Congressman GONZALEZ' bill is based upon the premise that a large number of potential foreclosures will occur as a result of the Reaganomics-induced 10.5-percent unemployment rate. Consequently, individuals would only be eligible for assistance if they have suffered a substantial loss of income as a result of unemployment or reduced employment.

The assistance payments cover the difference between what the homeowner is capable of paying and the amount needed to cover total monthly housing expenses. The homeowner, however, is responsible for contributing at least 38 percent of his monthly net effective income. The payments last for 18 months, plus any period of default, and may be extended, at the Secretary's discretion, for an additional 18 months. The interest repayment portion of the loan would be based on Treasury bonds or 10 percent, whichever is lower.

Finally, H.R. 1983 addresses the immediate problem of homelessness. It authorizes $100 million to be placed in the Secretary's discretionary fund under the community development block grant (CDBG) program to make grants to metropolitan cities, urban counties, small cities, and to nonprofit organizations to provide shelter and essential services for individuals subject to life-threatening situations because they lack housing.

I strongly urge my colleagues to support the passage of H.R. 1983. By passing this bill, we can begin to seriously address this country's neglect and irresponsibility toward its homeless citizens.

Mr. FRANK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I hope Members will understand exactly what is at stake in the choice they will soon be making between the substitute offered by the gentleman from Texas, who chairs the Housing Subcommittee, and the substitute offered by the gentleman from Ohio, which I guess will be reoffered by another Member.

The question is very clear: Shall there be any program whatsoever whereby the Federal Government responds to people who have lost their jobs because of prolonged unemployment and, because of that loss of jobs, face a temporary difficulty in meeting their mortgage payments?

Now, in both bills there is language which says that we encourage banks to show forbearance. That is not an issue. Both sides agree that we should encourage banks to show forbearance. The chairman of the full committee, the gentleman from Rhode Island (Mr. ST GERMAIN), worked on this concept, and it is in both bills. The difference between them is very stark. In the bill which came out of committee, supported by the gentleman from Texas, there is a program which says if you have been working hard all your life and if because of no fault of your own you have lost your job because of a recession, which everyone admits has caused high unemployment, and if you are threatened with the loss of your home, the trauma of you and your family being turned out of your home because of this temporary problem of job loss and inability to continue to make mortgage payments, for 18 months the Federal Government will lend you the money at 10-percent interest, provided you meet a fairly strict assets test. It is not an entitlement. There is no presumption you can repay. If you can show the Secretary of HUD that the reason you are in temporary difficulty in meeting your mortgage is that you have lost your job, you expect to get it back, we are told we are going to get a recovery, people will be rehired, but should people lose their homes in the interim, should they lose the equity, should they suffer the trauma of being turned out?

Many Members have had questions and concerns to tighten this bill up. It is not an entitlement. The regular presumption of administrative regularity will extend to the Secretary's decision. It will be virtually impossible to overturn a secretarial denial of someone's application.

So the question remains: Shall a very tightly drawn program, which offers assistance to those unemployed through no fault of their own—that language is in the substitute of the gentleman from Texas—shall the Federal Government offer them any assistance at all?

It is a 10-percent loan, hardly a giveaway. In many cases there will be working people 40 and 50 years old who had a mortgage that cost them less than that. Should they get this for 18 months, with one extendable renewable term?

Mr. Chairman, I have to say again that I am struck by the incredible inconsistencies of people telling us that we can advance $9 billion Federal dollars, just because we call if off-budget, to the International Monetary Fund, but we cannot make $700 million available to be repaid to Americans who lose their jobs, because the motto of the logic is the same: We are told by the bankers, with regard to International Monetary Fund matters, that they made good loans to good borrowers. These good borrowers, they tell us, because of the unexpected depth and length of the recession, have a liquidity crisis, which, to most of us, means no dough. Now, because of this liquidity crisis, they cannot repay their loans. So the Banking Committee has voted out, with strong support from the minority and the administration, a $9 billion commitment of Federal dollars to say to the rest of the world, to Argentina, Brazil, Chile, and Mexico, "Oh, well, because of the recession, you temporarily cannot meet your loan, we will advance some money."

Now, we have an austerity program in there, but it is not as strict as the assets test you have got in this bill that applies to Americans.

Why in the world is it justifiable to say that $9 billion can go temporarily to bail out people who, because of the recession, have a liquidity problem everywhere in the world except the United States of America, when we are talking about American dollars?

I am prepared to support a properly drafted bill to deal with the IMF. I am not prepared to discriminate against Americans with their own money. And that is what you do if you accept the substitute that strikes out any program whatsoever. We are not arguing in this substitute choice details, we are not arguing specifics. The question is: Should there be any program at all which extends to Americans who have lost their jobs the help that we are being told to extend to others?

The President went on television a couple weeks ago and he said $600 million is not a significant sum. He said he could not understand why we were upset about it. He only wanted to give $600 million to Central America, and he pointed out that that is only one-tenth of what we spend on video games.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. FRANK) has expired.

(By unanimous consent, Mr. FRANK was allowed to proceed for 1 additional minute.)

Mr. FRANK. For purposes of simplicity, let us call that measure, $600 million, one-tenth of what we spend on video games and Atari. The President has told us that spending one Atari on his Central American program is, after all, insignificant.

Mr. Chairman, this is barely an Atari and a tenth. This is not much more. We simply want to lend to Americans under terms that guarantee the repayment of almost all of it. We want to lend to Americans temporarily out of work in the recession some money so they do not lose their homes.

How can the administration ask us to send $600 million to Central America and snap its fingers and say that is insignificant, but we want to send a similar sum to Americans in a very carefully drafted bill that somehow becomes fiscally irresponsible. There simply is no justification for turning our backs on hard-working Americans who, through no fault of their own, face the loss of their homes on top of the loss of their jobs. We have a carefully drafted program to avoid that trauma and that pain, and I hope the House will adopt it.

AMENDMENT OFFERED BY MR. ROEMER TO THE AMENDMENT OFFERED BY MR. GONZALEZ AS A SUBSTITUTE FOR THE AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WYLIE

Mr. ROEMER. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment in the nature of a substitute.

The Clerk read as follows:

Amendment offered by Mr. ROEMER to the amendment offered by Mr. GONZALEZ as a substitute for the amendment in the nature of a substitute offered by Mr. WYLIE: Strike section 2 beginning on Page 1 line 4 and all through the end of the substitute on Page 27 line 7 and insert in lieu thereof the following:

"ACTIONS BY FEDERAL SUPERVISORY AGENCIES

"SEC. 2. (a) Each Federal supervisory agency, with respect to financial institutions subject to its jurisdiction, and the Secretary with respect to other approved mortgagees, shall, not later than 14 days following the date of the enactment of the Emergency Housing Assistance Act of 1983—

"(1) communicate in writing with each such institution or mortgagee encouraging them to exercise forbearance (including the acceptance of partial payment), to the maximum extent possible, with respect to residential mortgage foreclosures;

"(2) waive or relax limitations pertaining to the operations of such institutions or mortgagees with respect to mortgage delinquencies, to the extent the waiving or relaxing of such limitations is not inconsistent with laws relating to the safety and soundness of such institutions or mortgagees; and

"(b)(1) In considering applications for advances, the Federal home loan banks shall give special consideration to those institu-

tions that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"(2) In considering applications for advances or discounts, the Federal Reserve banks shall give special consideration to those depository institutions and other borrowers that have exercised forbearance in residential mortgage foreclosures as a result of action taken pursuant to this section.

"(3) In considering applications for extensions of credit, the National Credit Union Administration Board, on behalf of the National Credit Union Central Liquidity Facility, shall give special consideration to members that have exercised forbearance in residential mortgage foreclosures as a result of actions taken pursuant to this section.

"ACTION BY SECRETARY OF AGRICULTURE

"Sec. 3. Section 505 of the Housing Act of 1949 is amended—

"(1) by adding after 'the Secretary is authorized' the following: 'and encouraged to take all reasonable steps,'; and

"(2) by adding at the end thereof the following new sentences: 'The Secretary shall ensure that each delinquent borrower under this title is provided notice, in a timely and meaningful manner, of the assistance available under this section. The Secretary shall, to the extent necessary, provide technical assistance to each such borrower in applying for such assistance. The Secretary may, before or after any period of moratorium under this section, reamortize the accrued debt of any delinquent borrower under this title for a new period equal to the original amortization period, if such reamortization is likely to result in the resumption of periodic payments by * * *

EMERGENCY SHELTER ASSISTANCE

SEC. 14. (a) Section 107(a) of the Housing and Community Development Act of 1974 is amended by inserting after the first sentence thereof the following new sentence: "In addition to such amounts authorized to be set aside for grants under subsection (b), there is authorized to be appropriated $100,000,000 for fiscal year 1984 to carry out the provisions of subsection (d).".

(b) Section 107(c) of the Housing and Community Development Act of 1974 is amended by inserting ", or appropriated for use under subsection (d)," after "subsection (b)".

(c) Section 107 of the Housing and Community Development Act of 1974 is amended by redesignating subsection (d) as subsection (e), and by inserting after subsection (c) the following new subsection:

"(d) The Secretary shall, to the extent approved in appropriation Acts, make grants to States, units of general local government and Indian tribes for the provision of shelter and essential services for individuals and families who are subject to life-threatening situations because of their lack of housing, except that in the case of a grant to a State, the Secretary shall first certify that the purposes of this subsection will be more effectively carried out by making a grant to such State that has an existing program that serves such individuals and families. Such grants shall be awarded on the basis of the need for emergency housing in the area where the project is or will be located, shall take into account regional variations in the cost of providing shelter, and shall consider the extent to which units of general local government and nonprofit organizations are currently providing shelter and assistance. Such grants may be used by such units of general local government or by local nonprofit organizations to rehabilitate existing structures in order to provide basic shelter, to maintain structures providing such shelter, to pay for utilities and the furnishing of such shelters, to provide for any necessary health and safety measures that are required to protect the individuals using such shelter, and for other purposes described in section 105(a) that are consistent with the purpose of this program. In the case of a structure that is rehabilitated with assistance under this subsection, such structure shall be used for emergency housing, after such rehabilitation, for a period of not less than 3 years. In providing grants under this subsection, the Secretary shall take into consideration the special needs of families and single women. The Secretary shall ensure that grants provided under this subsection are used solely to provide additional shelter capacity and essential services and are not used to replace amounts currently expended in the provision of such shelter and services. The restriction contained in the preceding sentence shall not apply to applicants under this subsection that, pursuant to a State constitutional mandate, have provided shelter to any person who presents himself or herself for shelter.".

Mr. ROEMER. Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. ROEMER. Mr. Chairman, my amendment, for the benefit of the Members on the floor today, is simply the Wylie substitute, no more, no less.

It does three things: It calls for Federal regulators to relax rules and regulations regarding foreclosure. It eliminates the $760 million in the committee bill and in the substitute offered by the chairman of the subcommittee, the gentleman from Texas (Mr. GONZALEZ). And it retains the $100 million for emergency shelter.

I use this parliamentary technique to immediately put before the Members of the House in the clearest terms possible, up or down, the philosophical and economic differences over the issue of homeownership guarantees. If my amendment passes, the issue is resolved and a long and tedious process of amending a flawed committee bill can be avoided.

Make no mistake about it. The committee bill, if the Wylie substitute, in effect, is not passed, demands amendment. Although I am not on the Housing Subcommittee, as a member of the Banking Committee I participated in hours of review and debate on H.R. 1983, and when the bill came to the floor weeks ago, its weaknesses were obvious. They included lack of an assets test, lack of an earnings test, a heavy increase in bureaucratic workload, inadequate funding at $760 million to equally help all those homeowners in like economic circumstances, and finally, the creation of a new entitlement program.

Pretty it up how you will, if it follows the history of other entitlement programs, it will be never ending and very expensive.

The unrest over these and other shortcomings in the bill became apparent to the general membership and the bill was pulled, and pulled again. The leadership has returned H.R. 1983 in the form of a substitute with proposed amendments which do in fact reduce some, but certainly not all, the onerous features of the original bill.

I want to thank my chairman, the gentleman from Rhode Island (Mr. ST GERMAIN), and the subcommittee chairman of the Housing Committee, the gentleman from Texas (Mr. GONZALEZ), for attempting to reshape and improve the bill, no matter what happens here today.

My friend, the gentleman from Maryland (Mr. MITCHELL), is correct that their efforts are appreciated and respected; I know by this Member.

The proposed amendments, however, to H.R. 1983 still beg the major questions in my mind, questions regarding interest rates, entitlement creation, inequitable distribution of limited resources, administrative nightmares, and arbitrary implementation thresholds. The questions still exist and should not be ignored.

The Wylie substitute, which I reintroduce in my amendment, emphasized forbearance rather than foreclosure by utilizing the influence and leadership of HUD, the Secretary of Agriculture and the Federal regulators to achieve a maximum of forbearance in as short a time as possible at a minimum cost to the taxpayer.

My amendment does not affect the $100 million provided in the bill for emergency shelter for the homeless. I believe that section of the bill both worthy and necessary.

Finally, the Wylie substitute as represented by my amendment avoids the creation of yet another entitlement program for a Government already saddled with an explosion in entitlement program expenses. Remember that the $760 million in H.R. 1983 assists only a portion of the homeowners that face potential foreclosure. What will we tell those not helped by H.R. 1983 when they come for money that we do not have. Some will tell them yes, too, and I understand that, and I understand that compassion, but others might say, and I hope you would tell them, that you supported our efforts which yield immediate benefits for pressed homeowners by directing Federal agencies to relax rules and regulations, to encourage institutional forbearance, rather than constructing a complex, bureaucratic, expensive and ultimately unfair system of entitled forbearance that is too little and too late.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER) has expired.

(By unanimous consent, Mr. ROEMER was allowed to proceed for 2 additional minutes.)

Mr. ROEMER. I hope that you tell them, when they, too, come, that you supported our efforts because it reduced the drain on the Treasury and put downward pressure on interest rates rather than upward pressure on the same, upward pressure at a huge expense to the millions of Americans who are meeting their obligations.

Finally, I hope you tell them that you supported our efforts because it encouraged forbearance, rather than support H.R. 1983 which, in effect, practically, encourages foreclosures by banks and S&L's so they can qualify for their money.

Finally, I readily admit that the Wylie substitute does not guarantee that every homeowner facing hard times will keep his home, but neither does H.R. 1983 give that guarantee. Neither is perfect, but the Wylie substitute is workable where H.R. 1983 is not. The Wylie substitute is equitable, where H.R. 1983 is not. The Wylie substitute is timely in its effect, where H.R. 1983 is not.

And finally, Mr. Chairman, we have heard from Members who preceded me here that all this bill does is help those who worked hard all their lives and now face the loss of that home. It is interesting that that language is not in the bill. It is interesting that that language is not in the substitute. It is interesting that none of those caveats of limiting and targeting are in the bill at all.

As a matter of fact, the practical effect of the bill will be to help a few and then set yourselves up as a body to help the rest when they come. Some of you might want to do that. Some of you might think this Nation can afford that. Some of us might think that, therefore, we do not have to make the hard decisions about spending and interest rates which will put people back to work.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER) has again expired.

(On request of Mr. MITCHELL and by unanimous consent, Mr. ROEMER was allowed to proceed for 3 additional minutes.)

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield first to the gentleman from Massachusetts, and then to the gentleman from Maryland.

Mr. FRANK. I thank the gentleman for yielding.

Mr. Chairman, first I would just like to say I hope we all understand that forbearance that the gentleman is talking about is in both bills.

Mr. ROEMER. That is correct.

Mr. FRANK. It is not a question of either/or.

Mr. ROEMER. Let me reclaim my time to tell the gentleman that he is correct in that statement.

Mr. FRANK. Thank you.

Mr. ROEMER. The bills are the same on forbearance. The difference is, in the bill that you support forbearance is matched by a carrot or $760 million. I wonder which avenue will be selected?

Mr. FRANK. If the gentleman will yield further, the other point I would make is what seemed to me a contradiction. The gentleman simultaneously attacked the bill for being an entitlement and for not helping all the people who were entitled to help. One cannot simultanously confer an entitlement and not help everyone. In fact, it is not an entitlement; it is explicitly not an entitlement. We made that clear.

The gentleman said where was the language about working hard all their lives? Well, rhetoric does not often get into the bills.

Mr. ROEMER. I understand that. Thank goodness.

Mr. FRANK. But there is language in the substitute which says if you lost your job and it was not your fault, you do not qualify. So I will concede, if the gentleman is in the mood, you need not have worked hard all your life. If you did not start until you were 18, 19, or 20, you would be covered. You need not have worked and sold papers when you were 8. But it does say that if you lost your job through no fault of your own, you are not eligible. So to simultaneously attack a bill for being an entitlement and then for not helping enough people seems to me contradictory.

Mr. ROEMER. Let me reclaim my time to answer the gentleman. First of all, as to the supposed contradiction between pointing out that the bill helps very few, but the bill then increases the political pressure on this body to help the rest, I do not consider that a contradiction.

Mr. FRANK. If the gentleman will yield further, that is not what the gentleman said. The gentleman said it was an entitlement.

Mr. ROEMER. No, I do not yield. I reclaimed my time to answer the gentleman. He can get his own time later to build his case.

On the question of contradiction, there is none. To point out that $760 million will not help every American, and then to further point out that if you have compassion about the few, how can you turn down the many?

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding.

The gentleman knows that I have enormous respect for his keen intellect and the absolute veracity of the statements that he makes, and that is why I wanted the gentleman to get more time, because you have frequently referred to the matter of entitlements.

As a general rule, in this House, an entitlement would not require an annual appropriation. An entitlement is there in place and we do not take it up each year. It is locked into law.

I have examined this bill, and I am being very sincere, if it were an entitlement, I might not necessarily oppose it. Let the record show that. But I want to know where in the world you find the rationale on which you claim it is an entitlement?

Mr. ROEMER. All right, let me respond to the gentleman.

The gentleman happens to be my chairman on the Committee on Small Business, and I love and respect his work here.

Mr. MITCHELL. Let me assure you it is mutual. That is why I wanted the gentleman to clarify this for me because I have such implicit faith in the veracity of the statements he makes.

Mr. ROEMER. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER) has again expired.

(On request of Mr. MITCHELL and by unanimous consent, Mr. Roemer was allowed to proceed for 2 additional minutes.)

Mr. ROEMER. The bill is not caged in entitlement terms or language. The gentleman is correct. But the bill comes to the floor because of a sincere desire on the part of many to help those who hurt. That is sincere. If the pressure is great, even though we may or may not be coming out of this recession, if the pressure is great now and remains great for some time and we have a bill to help only a few, then my fear is that entitlements are born this way, one baby step at a time.

Mr. MITCHELL. I have to interrupt the gentleman at that point because I got him the time.

Mr. ROEMER. Surely.

Mr. MITCHELL. Then you are not saying it is an entitlement; you are saying it might be an embryonic entitlement or potential entitlement.

Mr. ROEMER. Yes, on two points, if the gentleman will let me reclaim my time.

Mr. MITCHELL. I am sorry. I will not interrupt the gentleman again.

Mr. ROEMER. Two points: One, the money is inadequate to help everybody described in the bill, the loose descriptions in the bill. That means if we help some, in terms of equity we ought to help them all. The bill might have had a stronger constituency in the House and more honesty in the budget practices if it had the $4 billion or $5

billion or $7 billion over 3 years that was required. That is my first point.

My second point: As has already been pointed out by our colleague from Ohio, if the arbitrary threshold of 1.3 percent set in this bill, and where that came from I am sure will be explained later, it seems to have come from somewhere north of the constellation, but that arbitrary figure, if it were in the bill for the last 10 years, would have meant that at least three and perhaps more of the regional FHLBB regions would have been entitled 100 percent of the time. If an entitlement covers all who are eligible and is in effect for 100 percent of the time, I do not care what dress you put on the turkey, it is a turkey with feathers and I call it an entitlement.

□ 1330

Mr. MITCHELL. Mr. Chairman, will the gentleman yield further?

Mr. ROEMER. I yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Chairman, I got the gentleman some more time because I had two questions, and, if necessary, I will get him some more.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER).

(On request of Mr. MITCHELL, and by unanimous consent, Mr. ROEMER was allowed to proceed for 3 additional minutes.)

Mr. ROEMER. Mr. Chairman, I will yield for one more, and then I will yield to other Members.

Mr. MITCHELL. I will ask the gentleman to yield for two more because I got him the time.

Mr. ROEMER. All right, two more.

Mr. MITCHELL. Mr. Chairman, I just want to be sure that I understand what the gentleman is saying. The gentleman has said at this point in the legislative history of this piece of legislation on the floor that it is not an entitlement program—and I want the record to be clear—but that it has the potential for maybe becoming one, depending on economic circumstances. Is that a fair statement?

Mr. ROEMER. I concede that.

Mr. MITCHELL. All right. Then it is not an entitlement program at 1:30 on this day of the year of our Lord?

Mr. ROEMER. I do not know if I will concede that.

Mr. MITCHELL. The second thing is that the gentleman is talking about forbearance.

Let me go back to my city of Baltimore, where we had a 10.2 potential default, and there is forbearance. The gentleman will notice that in my statement I pointed out that the statement of the Commissioner of the Bureau of Labor Statistics, Commissioner Norwood, was that she expects the high unemployment rate to continue for the next year or so, no matter how much the economy improves. If that is true, we could reasonably in my city expect a 1-percent increase in the foreclosures, moving it up to 11 percent. Suppose it extends out to 1 or 2 years.

The point I am trying to get at is, what are the limits of forbearance on the part of the lending institutions? Surely there must be some. Surely they do not forbear ad infinitum.

Mr. ROEMER. No, there are foreclosures. There have been foreclosures since we have the institutions that have the capability of foreclosing. Some institutions are obviously sharper and some are more compassionate than others.

Let me make two quick points relative to the valid point the gentleman raised. In the mid-1970's the House of Representatives passed a bill similar to this. I think it was in 1975 or 1976. The only difference was that the threshold or the triggering mechanism was left to the Secretary at the time. He could pick out those parts of the country which had extraordinary problems with forbearance and foreclosure.

This bill does not do that. This bill treats Omaha like Bossier City, it treats Shreveport like Boston, and they are not the same, nor are the pressures the same.

Mr. MITCHELL. Mr. Chairman, the gentleman must understand that he has to explain it simply to me. My question was, Are there limits to forbearance on the part of the lending institutions?

Mr. ROEMER. Yes, there are.

Mr. MITCHELL. And if there are such limits, that means that some people are going to face eviction, is that right?

Mr. ROEMER. Yes.

Mr. MITCHELL. What, then, is the responsibility of the Federal Government on the part of those who face eviction? Does it have any responsibility?

Mr. ROEMER. There are two that I can list from my experience.

Mr. MITCHELL. All right.

Mr. ROEMER. One is the shared responsibility of the Members of this House. For example, we might construct a budget that lowered the deficit in America. We might construct a budget here that sent interest rates down, not up. I predict that if we were to lower, by our courage, long-term interest rates by 2 points, we could help more people at less cost to the Treasury and the taxpayer than this bill would help in 3 years.

Mr. MITCHELL. Mr. Chairman, I would ask the gentleman, Can we arbitrarily do that?

Mr. ROEMER. Yes, we can.

Mr. MITCHELL. Mr. Chairman, I will not request any more time for the gentleman.

The CHAIRMAN. The time of the gentleman from Louisiana has once again expired.

(On request of Mr. SCHUMER, and by unanimous consent, Mr. ROEMER was allowed to proceed for 2 additional minutes.)

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I thank the gentleman for yielding, and I have a question to ask of the gentleman from Louisiana.

It is really hard for me to follow the drift of the argument. First, I heard that it is an entitlement program because it covers regions of the country.

Mr. ROEMER. No, I never said that.

Mr. SCHUMER. All right. It was my understanding that the gentleman said there were certain areas that would have been under this program, to be specific three parts of the country that would have been under this program for the last decade, and that makes it an entitlement. Is that incorrect?

Mr. ROEMER. For those regions, it does.

Mr. SCHUMER. Does the gentleman feel that CBDG is an entitlement? Does the gentleman feel that water projects are an entitlement? They incur responsibilities to certain parts of the country over a 10-year period. Are those entitlements?

Mr. ROEMER. The way we approach them in this House, they certainly have become so. When is the last time we have cut or restrained them?

Mr. SCHUMER. Mr. Chairman, I would submit that the gentleman's definition of "entitlement" is quite different than the definition of "entitlement" that most of us in this House have used.

The second question I have of the gentleman is this: The gentleman said before that we are only helping some of the people. Yet it is a significant percentage of those who need help, and I hope the Members of this body are aware of that. It is estimated that between 25 and 50 percent of those people who will be foreclosed against will be helped by this bill. But I ask the gentleman this:

The gentleman said that if we really were serious, we would do it for everybody. Would the gentleman support that proposal? Would he support a $5 billion allocation.

Mr. ROEMER. No.

Mr. SCHUMER. That is the point I wished to make.

Mr. ROEMER. Mr. Chairman, let me respond to the gentleman in the time I have left by saying that the gentleman would do his argument more service if I thought he were correct in his estimate of the cost of the

program. The gentleman might in fact increase support for his somewhat narrow view if he were to treat everybody on an equitable basis.

At the moment the gentleman does neither. He is neither correct in his approach to the numbers nor does he treat every American the same.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. No, I will not yield. I am responding to the question.

The second point is that the gentleman, with his use of the money in the bill, does not treat all homeowners in like economic circumstances the same.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER) has expired.

PARLIAMENTARY INQUIRY

Mr. MITCHELL. Mr. Chairman, I wish to make a parliamentary inquiry.

The CHAIRMAN. The Chair will entertain the gentleman's parliamentary inquiry.

Mr. MITCHELL. Mr. Chairman, does a statement reflecting upon the honesty of a Member, impugning his honesty, violate the rules of the House?

Mr. ROEMER. No, I did not mean that.

Mr. MITCHELL. I am asking the question of the Chair.

The CHAIRMAN. The Chair will state that only the Speaker could rule following a timely demand that the words of a Member be taken down.

Mr. MITCHELL. Well, Mr. Chairman, I did not want to do that. That was my first reaction. I did not want to do it because I know that my friend did not necessarily mean to impugn, and rather than ask that his words be taken down, I would like to give the gentleman an opportunity to clarify what he said.

Mr. ROEMER. Mr. Chairman, I tried to say, and I thought I did say, I will say to the gentleman from New York (Mr. SCHUMER) "the honesty of his approach."

Mr. SCHUMER. Mr. Chairman, I would just like to pursue that with the gentleman for 2 minutes.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER), has expired.

Mr. SCHUMER. Mr. Chairman, I ask unanimous consent that the gentleman from Louisiana (Mr. ROEMER) be allowed to proceed for 2 additional minutes.

Mr. McKINNEY. Mr. Chairman, reserving the right to object, since the other side of the aisle has managed to talk nonstop now for almost a 40-minute period, and since there are other Members of the House who wish to get the floor, I would just inform the gentleman that there will be no more unanimous-consent requests for extensions of time agreed to after this one. I will not object to this one.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I say again that I do not understand what the gentleman is saying.

The numbers in this bill have been worked out by the Congressional Budget Office. They have said that approximately 100,000 will be helped by this $760 million allocation. Is the gentleman saying that those numbers are incorrect and that the Congressional Budget Office has worked it out incorrectly? And if he has, I would like to know why.

Mr. ROEMER. All right. I will say to the gentleman from New York (Mr. SCHUMER) that the numbers could be incorrect. History or the events of the future will have to tell that. If history is any guide, the cost per homeowner assisted is understated in the bill.

I know the gentleman has seen the optional numbers developed by others which show the cost to be twice as much as CBO says. If CBO is correct, it is 100,000. If their costs are off by a factor of 50 percent, it is only 50,000. In any case, the numbers are not to be laughed at. I want the gentleman to understand that. It is only a portion of it.

Mr. SCHUMER. Mr. Chairman, does the gentleman agree that the bill contains the CBO numbers? Is that correct?

Mr. ROEMER. Yes, it does.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. ROEMER. I yield to the gentleman from Ohio.

Mr. WYLIE. Mr. Chairman, I made that point in my statement, that CBO itself admits the estimated number of households served is very sensitive to a substance use. They say that in their statement.

So the figures are soft, and they also suggest that they are talking about an average of 18 to 21 months. Under the bill it could last for 36 months, which would make them even softer. So they also admit it perhaps could vary from as much as 50,000 to 100,000.

I used the figure 60,000 to give them the benefit of the doubt.

Mr. Chairman, I think the gentleman in the well does make a valid point, and I want to thank him for offering this amendment and for this very significant contribution to the debate.

The CHAIRMAN. The time of the gentleman from Louisiana (Mr. ROEMER) has expired.

Mr. McKINNEY. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, there has been a great deal of debate on this issue, and I would like to stand and very strongly compliment my friend, the gentleman from Louisiana (Mr. ROEMER), for an excellent job in bringing forth the facts of the Wylie-Roemer or Roemer-Wylie amendment to this bill which was so aptly called by my friend, the gentleman from Louisiana, a "turkey" with or without feathers.

We know it was said earlier that the Wylie substitute was a "cruel hoax." I would suggest that the committee bill is the cruel hoax. This bill is a cruel hoax for many reasons.

First, when is the program going to be operational? If, in fact, aid were needed right now, the Wylie substitute could, with the Senate cooperation, be on the President's desk and become the law of the land within 2 or 3 days. this bill is going to force HUD to promulgate some of the most complicated regulations they have ever issued. I would suggest that in the case of section 8, which is not anywhere near as complicated, it took HUD 18 months to develop regulations. The regulations for this program are going to have to undergo review 15 days before publication here on the Hill, 30 days after publication in the Federal Register, and 30 days of congressional review before they will eventually take effect. Then HUD has 45 days to review applications.

How many people, if the need is so desperate right now, are going to fall under the carpet during that period?

□ 1340

In fact, we are belaboring one point here: We do not know what we are talking about. The CBO budget estimates are all over the place, everyone else's are, as to what we are going to do, if we are doing the right thing for the people of this country, instead of having a cruel hoax on what we pretend to give them, which we are not going to give them in this Year of Our Lord 1983, and everyone in this room knows it.

We would pass the Wylie substitute right now and then the Housing Committee under the chairmanship of my good friend, the gentleman from Texas, could sit down and find out what we are really doing here.

I have sat through the hearings on this bill. Look at some of the problems in this bill. Is there an equity qualification within this bill? No, no.

In the case of a Veterans' Administration mortgage, for instance, or a mortgage with a very low downpayment, you could get to a negative equity position in this bill very quickly.

What does this bill say is going to happen at the end of 36 months? Return the person to exactly the same mortgage payment, when in fact they probably should have worked out a new schedule, a new time schedule, a new interest schedule, a new payment schedule.

What happens at the end of 36 months? Is that not somewhat of a cruel hoax?

I have heard most of my colleagues from the other side rant and rave about double-dippers. Do you know that this bill would allow the Government to pay the mortgage even though someone was receiving a substantial pension, for example, someone who had 20 years in the military and who got under less than $20,000—that would not have to be included. That does not become part of the assets test.

We sit here and we talk; in factor, we sometimes do something about double-dippers. But not this time.

This bill does not say anything about the man who has the $89,000 mortgage on a $350,000 house.

This bill does not say anything about the man who has set aside his assets into a trust for a period of time.

I could go on and list the other flaws.

The fact of the matter is that the bill is ill-conceived. The real tragedy of the matter is that the bill is not going to do anything for anybody.

Now, you know, you can talk about out of work. It has been said many times this afternoon, out of work not by his own fault; yet I would hope everyone sitting back in their offices and in this room would read page 8 of the bill and would read section (A) where it says, "An involuntary loss or reduction in his or her employment, other than as a result of any willful, repeated, or felonious misconduct by such mortgagor."

Figure that one out, lawyers of America.

"His or her employment, other than any willful, repeated, or felonious misconduct."

Now, I wonder about that. You know, you can go on and on about that, but it does not make any sense.

What about just plain incompetence? What about alcoholism, which we claim is a sickness? You could go on and on.

The CHAIRMAN pro tempore (Mr. DURBIN). The time of the gentleman from Connecticut has expired.

(By unanimous consent, Mr. MCKINNEY was allowed to proceed for 1 additional minute.)

Mr. FRANK. Mr. Chairman, will the gentleman yield?

Mr. MCKINNEY. I am not going to yield, because I think we have gotten into a habit of not letting this body debate. Instead, we yield and bounce back and forth too much.

The fact of the matter is, the bill is ill conceived. The Wylie substitute should be passed. The Wylie substitute will do good now. It will not hold up a pipedream that is going to rob every man and woman on a reduced workweek, whose wife is bagging groceries, whose wife is working at McDonald's trying to do their share of paying for what the American dream is.

The Wylie substitute will keep that dream house there right now. This bill is just a farce, a snare, and a delusion on the people of this country.

Mr. LEHMAN of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the Wylie substitute.

Mr. Chairman, I rise to illustrate the total hypocrisy the administration has displayed by opposing this effort to provide temporary relief to thousands of American men and women who are about to lose their homes because of the recession. Nowhere are the callous contradictions in Reaganomics more evident than in the debate over this bill.

The administration has been in the Banking Committee almost on a daily basis, asking us to send $8.5 billion to bail out U.S. banks, to bail out the International Monetary Fund, and to bail out foreign countries who are experiencing what the administration calls "temporary liquidity problems."

How ironic. The same administration that deplores what it calls "quick fixes" at home, should sanction them abroad; indeed, even ask us to pay for them. If we are going to be the benevolent bankers to the world's deadbeats, at least let us lend a hand to a few unfortunate citizens here who are the victims of problems they did not create.

If we were to apply the logic of the Wylie substitute to the International Monetary Fund, we would ask the banks to forbear there, also.

If we are to be the arms supplier to every rightwing Latin American dictatorship, at least let us give this one weapon to our own citizens who just want to keep their homes so they can keep their children in the same schools.

If, as the President suggests, we are going to build MX missiles, cruise missiles, B-1 bombers, Trident submarines, and neutron bombs, let us at least allow those who have been forced to pay the price for our economic incompetence and our preverse prioritization, a domicile to protect.

Finally, as the gentleman from Massachusetts (Mr. FRANK) pointed out, how can anyone justify $600 million in aid for Central America, most of which will do absolutely no good at all, most of which would be better spent in video arcades, while denying this relief for a few of our own unfortunate citizens, many of whom will soon be refugees in the streets themselves if we do not do something to stand with them in this crisis.

There is not 1 cent for anyone with a foreclosure problem in the Wylie substitute. What the substitute does is politely ask the banks to continue what the banks claim they have already done. That is not enough.

If there is any lesson from the last election, it is that the American people really care. They are willing to lend a hand to those who want to help themselves, but cannot.

With the Gonzalez substitute, we extend that hand, we keep our promise.

With the Wylie substitute, we offer only lipservice.

Mr. Chairman, I received a communication from the president pro tempore of the California State Senate, Senator David Roberti. The data accompanying Mr. Roberti's letter adequately documents the need for this legislation. I include the letter and the factsheet for the RECORD:

STATE OF CALIFORNIA SENATE,
Sacramento, Calif., April 25, 1983.

Hon. RICHARD H. LEHMAN,
Longworth Office Building,
Washington, D.C.

DEAR MR. LEHMAN: To help prevent thousands of California families from losing their homes through foreclosure, the State Senate Leadership urges you to support H.R., 1983, the Emergency Housing Assistance Act of 1983.

As you know, the California unemployment rate of 10.6 per cent exceeds the nationwide average. One of the painful side effects of the economic recession we are experiencing is the dramatic increase in mortgage foreclosure.

In California, home mortgage foreclosures increased six-fold between 1980 and 1982. According to the California Department of Housing and Community Development, 5,000 foreclosures occurred in 1980, increasing to 11,000 in 1981, and 30,000 in 1982. These figures represent completed foreclosures. The statistics on mortgages in default are far higher. Both are included on the attached fact sheets for your information.

The temporary loans to homeowners provided in H.R. 1983 could help many families avoid the tragedy of losing their homes while faced with involuntary job loss. The Senate leadership urges you to vote for H.R. 1983 when it is considered on the House floor.

Sincerely,

DAVID ROBERTI.

FACTSHEET—EXTENT OF MORTGAGE FORECLOSURES IN CALIFORNIA

Mortgage foreclosures have risen significantly in California during the past two years. It is estimated that close to 30,000 household foreclosures occurred statewide during 1982, an almost three-fold increase from approximately 11,000 foreclosures in 1981, and a six-fold increase from approximately 5,000 home mortgage foreclosures in 1980.[1] Data from individual counties demon-

strate the widespread nature of home mortgage foreclosures in the State, as indicated in the table below.

MORTGAGE FORECLOSURES IN SELECTED CALIFORNIA COUNTIES

County	1979	1980	1981	1982	1983 [1]
Alameda	203	148	343	973	356
Humbolt	13	17	38	71	19
Los Angeles	1,319	1,280	3,006	7,976	1,867
Monterey	26	39	91	281	63
Orange	260	259	608	2,343	NA
Riverside	326	465	1,113	2,397	NA
San Bernardino	732	904	1,405	3,180	NA
San Diego	196	511	1,407	3,083	NA
Santa Barbara	10	14	52	183	NA
Ventura	62	66	199	620	NA

[1] Figures compiled for January through March 1983.

These data represent trustees deeds recorded as a result of foreclosures having gone to completion. Data regarding notices of default are attached for four representative counties.

NOTICES OF DEFAULT AND MORTGAGE FORECLOSURES

[Illustrative data (1979–83)]

	Notice of default	Foreclosures (trustees deed)
Monterey County:[1]		
1979	655	26
1980	1,192	39
1981	870	91
1982	1,520	281
1983 (January–February)	354	63
Los Angeles County:[2]		
1979	22,516	1,319
1980	27,965	1,280
1981	44,088	3,006
1982	55,141	7,976
1983 (January–February)	9,088	1,867

Mr. KILDEE. Mr. Chairman, will the gentleman yield?

Mr. LEHMAN of California. I yield to my colleague, the gentleman from Michigan.

Mr. KILDEE. Mr. Chairman, I rise to associate myself with the gentleman's words. I oppose the Wylie substitute and support the Gonzalez substitute.

Mr. Chairman, as a cosponsor of H.R. 1983, the Emergency Housing Assistance Act, I rise in support of the substitute offered by the distinguished subcommittee chairman, Mr. GONZALEZ.

The Gonzalez substitute strengthens the original bill by insuring that the emergency housing assistance will be targeted to those who are most in need. I am particularly pleased that the Gonzalez substitute incorporated into its text the language of the amendment which was to be offered by the gentleman from Texas (Mr. COLEMAN). The Coleman amendment would target the emergency assistance provided in this act to areas which have been hardest hit by the ravages of recession. Just 8 weeks ago, the House passed, by an overwhelming vote of 335 to 83, the Edgar amendment to H.R. 1718, the emergency jobs bill. The economic situation today is no less urgent than it was 2 months ago. I urge my colleagues to join with me in support of this substitute.

Despite a year of rosy predictions, the economic situation remains grim for millions of unemployed Americans. The national unemployment rate stands at 10.2 percent of the work force. There are more than 11.4 million Americans actively searching, in vain, for employment. Meanwhile, the delinquency and foreclosure rates have continued to increase as more and more workers become unemployed or continue to be unable to find a job after prolonged periods of unemployment. In my own district, where unemployment has hovered at or above the 20-percent level for much of the last year, the foreclosure rates have increased by more than 86 percent over their levels of just 3 years ago.

The Gonzalez substitute takes into account the need to focus emergency housing assistance money into areas that have, as a result of prolonged unemployment, recently become pockets of poverty. As one who comes from an area with an unemployment rate which is nearly double that of the national average, I am well aware of the personal and economic hardship which this joblessness has caused. For too many in my district—and in congressional districts in every geographical region of our country—the fruits of a lifetime of labor are being spoiled by this prolonged period of economic hardship. People who have spent their lifetimes working and buying their homes are now faced with the prospect of being put into the streets, their jobs gone, their self-respect evaporated, their dreams extinguished.
